From: Paul_C_G
Topic: 1 Message: 70

Christian,

Before you can legally buy, attempt to buy or possess an amplifier that works on 10 meters, you MUST supply proof of a valid Amateur Radio license.

You have not posted your call sign either in your message to this forum nor in your Yahoo! profile.

I didn't make this rule, the FCC did.

Please post your call sign - it will be verified.

The ol' meanie,

? ? ? ? ? ? Paul - K9ERG

Bill will said I used to get in trouble when I worked in Radio Shack because People would come in and try to the Radio Shack two meter handheld
without a license but I would not sell it to
them. Because I knew the rules from THE FCC having a ham callsign myself 73's de bill k2gvc

73. Wanted Used dual band radio

Yahoo group: amatuerradioswapfest
Date: 2000-05-28 13:27:49 UTC
From: jfhr
Topic: 1 Message: 73

I am looking for a good used dual band rig. HT if possible, mobile/base is good also.
Can not afford a lot I just took my Technician test last week (Sat. 20 May 2000) so I have not got my call sign fromm FCC yet. They are probably up to their knees in alligators right now
because of all the people upgrading right now.

So it might be acouple of weeks before that shows up.

73's
Pat Allen

79. Re: Antenna Wanted

Yahoo group: amatuerradioswapfest
Date: 2000-07-12 17:05:19 UTC
From: WA8ETY
Topic: 1 Message: 79

I use an MFJ vertical, don't remember the number, but it has 80 thru 2 meters. I paid about $199 for it a few years ago and was never disappointed with it. A tornado came down my road a few years ago, snapped it off the iron pipe it was mounted on and beat the daylights out of my roof with it. Homebrew inverted V coaxial dipole kept it from ending out in Lake Erie. Surprisingly it still works just fine! Talk about your ultimate stress-test! I run a TS-440-S on it at 100 watts, and use a MFJ-949E antenna tuner with it... next to a beam and if I had it to do again, I'd buy another. Works good on 2mtrs for SKYWARN. It is up about 40 feet. I also use an ANTRON 99(up 70') on 10 mtrs and tuner. Some day I'm going to talk the OM into assembling the big beam and getting it up. In the meantime, the ANTRON and Verticle will have to do.

Sharon-WA8ETY

PS-with antenna tuner, I load it up on all bands.

102. Crystals for DRAKE SPR-4 Wanted!

Yahoo group: amatuerradioswapfest
Date: 2000-11-05 17:26:19 UTC
From: sv1na
Topic: 1 Message: 102

Hi folks,
I am looking for some crystals to cover ham band needs, for a Drake old receiver, the SPR-4.
I found this item recently at a local fleemarket, it is in mint condition, works fine, ...but has only commercial bands coverage.

I already contacted ICM (International Crystals Manufacturing), and another US constructor named Sentry, but both of them replied negatively. They dont make crystals for this model any more!.

So, please, any idea, or alternative, will be very much appreciated.

Best 73,
de Yorgos, SV1NA Athens, Greece

Howdy Folks !
I have visited many Radio Swapfest, Fleamarkets, etc! But after digging, shuffing, grabbing, greedy fingers and buried under Cables, rusting antennas,boat anchors and only Moses knows what else is there displayed on the tables of Treasures that perhaps one day can come in handy. So I am buying or selling nothing. But from al those that are walking around, tired, bloodshot eyes with a paper cup full of last years Coffee at $ 1.00 a shot, lukewarm and with lucl you mind find a roach on ther bottom (Like Tequilla with its worm) No folks its time to take a break with KB7LYM...The Black sheep of Hamradio. Did you know that a Ham have send a message after 27 years being death ? Go to the link and click.... soon you will know

http://members.tripod.com/~hambones2/HAMBONES.html

http://members.tripod.com/~hambones2/HAMBONES-B.html

Relax Folks, that rusting pile of RG-8 will be still there for a few years :)

192. Oscilloscope

Yahoo group: amatuerradioswapfest
Date: 2001-04-20 21:11:57 UTC
From: kb3eqa
Topic: 1 Message: 192

I'm looking for an old oscilloscope to use for my graduation project. It doesn't need to be anything special, 500khz to 1Mhz is plenty, it does need to be triggered or driven sweep, and storage would be a plus, though not necessary. If your feeling generous, a local radio club is willing to accept it as a donation that is tax deductible (ok, Im reaching here) but I also have a budget to buy one.

Thanks,
Dave Marshall, KB3EQA

200. ROHN Tower

Yahoo group: amatuerradioswapfest
Date: 2001-07-01 19:51:22 UTC
From: jtk4644
Topic: 1 Message: 200

I just picked up a rohn tower(I think). It is made of galvanived steel,the base is 2 feet accros it is 40 feet tall and consist of 5 8ft sections.the only numbers I could find on it is BX6L. Does anyone have any info on this tower(is it a rohn?). How can I find out about how to anchor it in concreet. also where can I find the hardwear to make it lay down tower?

201. Re: ROHN Tower

Yahoo group: amatuerradioswapfest
Date: 2001-07-03 16:33:39 UTC
From: kmatheny2
Topic: 1 Message: 201

Rohn did produce a BX model for some time. I am not, however, familiar with the "6L" designation. Perhaps that's part of the individual section nomenclature? The BX series was designed to be a TV antenna tower.

Rohn's contact information is available via their website. http://www.rohnnet.com/
I believe Rohn catalogs that have all the specs are $5.00. Hope this is of some help,
KG4LXA

From: jyoung1939
Topic: 1 Message: 209

I bought this rig back in the 70's and never had the opportunity to earn my ticket. I've probably had the radio on for a total of 5 hours. It's been stored away along with the matching speaker unit and other associated gear. I'd like to find someone interested in buying such a unit and all it's peripherals. It even came with the dreaded 11 meter crystal in it! If anyone is interested in this type of setup please contact me. Everything is in pretty good shape. I'll be glad to give you a full list of items if you're interested.

www.flatbedwillies.com....Personalized hats, mouse pads, coffee mugs and more. Check out our past hat designs where a customer made a hat for amatuer radio friend of his. Pretty cool stuff.
thanks

252. TS-700A Sell or trade

Yahoo group: amatuerradioswapfest
Date: 2001-12-20 00:06:35 UTC
From: w8ems_9
Topic: 1 Message: 252

I have a TS-700A, all mode 2 meter rig with built-in ac supply. The radio powers up, but has weak transmit and recieve. I suspect a problem in the T/R switching. Has manual and touch-tone mic. Will sell or trade.

Interested in other 2 meter FM, VHF or UHF commericial HT or mobile, or 12+ amp power supply.
Please e-mail questions or offers to:
w8ems@...

Topic: 1 Message: 256

Crystal bullet mic/beleived to be Argonne AR-54. Green in color/made in Japan in 1960 era. Many companies put their name on it. Had chrome grill with green housing. If you have one lying around I would like to hear from you. Trying to assembly my early ham shack.

thanks
ken

257. FORSALE: YAESU FT-101E HF RADIO NICE!!

Yahoo group: amatuerradioswapfest
Date: 2001-12-27 04:23:20 UTC
From: kg4gsf
Topic: 1 Message: 257

I HAVE A VERY NICE YAESU FT-101E HF RADIO FORSALE. THIS RADIO COVERS 10 THRU 160 METERS AND 11 METERS ALSO. THE RADIO IS IN VERY GOOD SHAPE INSIDE AND OUT. THIS IS A LATE MODEL BECAUSE IT HAS THE HIGHER SERIAL NUMBER. IT ALSO HAS THE YAESU SSB FILTER INSTALLED. NOW FOR THE BAD NEWS!!--((THE RADIO NEEDS TUBES FOR THE OUTPUT!))-- IT WILL NEED TWO 6JS6C FINALS AND ONE 12BY7A DRIVER. OTHER THAN THAT THE RADIO IS 100% WORKING. IT COMES WITH THE SERVICE MANUAL, POWER CORD AND I WILL EVEN INCLUDE A NICE D-104 WITH IT. THE WIREING ON THE MIC PLUG MAY NEED TO BE CHANGED BUT NOT A BIG DEAL. (THE RADIO IS SOLD AS IS!) BUT IT DOES WORK VERY GOOD BUT IT WILL NEED TUBES TO TRANSMIT. WILL TAKE $250 FOR IT. OR POSSIBLE TRADE FOR SOME OTHER HF RADIO.
HAVE ANY QUESTIONS PLEASE EMAIL ME!
THANKS AND 73'S
BRANDON

262. Hallicrafters SX-140 & HT-40 FS/T

Yahoo group: amatuerradioswapfest
Date: 2001-12-30 01:42:09 UTC
From: w8ems_9
Topic: 1 Message: 262

I have a Hallicrafters SX-140 in working condition, except for the "s" meter, and a HT-40, untested, as I don't have a crystal or HF antenna. These radios have been sitting for the past 12+ years as the owner passed away. Both rigs are somewhat "dirty" from sitting, but otherwise seem to be in good condition. No cracks or chips in knobs and the glass on the receiver is clear. Transmitter has some paint chips missing from bottom lip. Asking $150 plus shipping for the pair, or may be interested in trades. Please e-mail questions or offers to: w8ems@... es 73 de w8ems/9, Jim

271. FS: Too Many HT's

Yahoo group: amatuerradioswapfest
Date: 2002-01-18 18:21:42 UTC
From: w8ems_9
Topic: 1 Message: 271

I have collected too many HT's so got to get rid of some of them! Some have chargers, some do not, but can be purchased from Radio Shack or dealer.

1. GE High Band VHF, 10 channel programmable (by dealer), no scan, 5 watt, with drop in quick charger. Now on fire and public safety channels in the 154-155 MHz band. $50.00

2. Pair of Motorola "Spirit" UHF 2 watt HT's, no chargers, user programmable to one of eight pre-programmed business channels and does all 38 PL tones. $75.00 each or $125.00 for the pair.

3. Ranger Marine band HT with wall charger. All us and international channels, scan and more. $75.00

4. Maxon six channel, 5 watt, low band / low split HT. Dealer programmable, now on 10 meter ham band (2 repeater and 4 simplex channels) Got three in a package deal, only have need of two. This radio is 100% like new. No charger. $75.00

All radios have batteries and antennas. Some have belt clips. All are in good condition. I cannot reprogram any of the radios. Trades may be considered. (esp. low-band commerical gear in the 39 MHz range) Price includes shipping priority mail (US only). E-mail questions or offers to: w8ems@...

Thanks Jim. But there are six different wires leading to the main motor in the chassis. They are yellow, black with brown stripe, green, black, brown, and orange. these seperate and lead all over the radio as well as to different ones of the twelve pins i described. The orange could possibly be the hot but i want to be sure because this radio worked perfectly before it was stored many years ago and i wouldnt want to cause any damage to it.

-JAKE-35....I NOW THINK WHAT YOU NEED IS THE MATCHING POWER SUPPLY
FOR YOUR RIG...THERE IS A SWAN NET WITH K4BOV, MANUALS ARE STILL
AVAILABLE FROM OCEANSIDE CALIFORNIA...the swan units use a model 117x
or the power supply with speaker "117-xc" these are always on ebay
and various ham radio sites; qth.com,qrz.com,eham.com etc... and they
are available from about 30.00 to 95.00 dollars.....ck out local
area ham fests and they will be cheaper 20-50.00 dollars..hopes that
helps.....good luck, jim k0ylw

If you dont have a local ham/elmer/club to assist you .. then ck out qrz.com and qth.com for sample tests...you can take these online, and practice without any money envolved.....one book that you can purchase used (ebay etc...) or new from the ARRL is "Now you are Talking" is the bible to get your first "technician" license..... .....You will find that the tech questions are mostly about rules and regulation of how to safely operate your rig, and proper procedures to be used on the radio.....very very little electronics and technical jargon or electronic theory...that comes with other levels of tickets/license later....hope that helps.
If you need more assistance: k0ylw@... is my email address.
best wishes and good luck on getting your ticket, 73 jim k0ylw

298. WTB 811A good used Tubes

Date: 2002-04-04 04:32:28 UTC
From: w4mcl
Topic: 305 Message: 305

HI. I am looking for the following:
1. Cheap 2 meter mobile (to put in my truck), as long as it works, I do not care what it looks like.
2. Cheap 2 meter ht
3. Cheap 440 ht
I would like to have some ht''s that are cheap around 50.00 or so
I am trying to re-gain some equipment after I sold all of mine, thinking I would get a nice radio from a guy who did not follow through.
If ANYONE has any radios, please e-mail me as I need some kind of fast. I PERFER to pay via paypal or local pickup (charlotte nc).
Shipping is no problem as I have a ups shipping account and can send you a label. Thanks
Please e-mail: w4mcl2000@...

310. For Sale: Icom 970h vhf/uhf base

Yahoo group: amatuerradioswapfest
Date: 2002-04-11 17:25:07 UTC
From: w4mcl
Topic: 310 Message: 310

Go to: http://members.aol.com/w4mcl2000/icom.html for more info.

Hi, up for sale is a ICOM IC-970H With the following Options:
-- ux-r96 Receiver Module (general coverge from 50 mhz to 905 mhz CONTINOUS (NO GAPS AT ALL!!!)
-- Keyer board
Now for the specs. This is a VHF/UHF BASE. This is the HIGH power model (45 watts) ALL MODE. It was close to a LIGHTING STRIKE so somethings do NOT FUNCTION CORRECTLY.
A. 2 meter side is OUT! No transmit or receive
B. 440 side is working - I did get it to transmit but I do not know for how long or if it was just a fluke thing. I did key up a local repeater on 440. But I DID NOT actually speak to anyone.
C. The ux-r96 gen. receiver board WORKS with no problems.
D. I looked inside the radio, and NOTHING is visable as far as damage.
E. ALL LIGHTS WORK.
F. ALL CONTROLS WORK
RADIO ONLY, NO MIC, NO MANUAL
Other than the problems I listed, it receives really well (on the general coverage board). Meter works, everything works execpt the 2 meter side and transmit (Read above). I think this is WELL worth what I am asking. Shipping is 25.00 FIXED (weighs 44 lb's boxed). I ship via ups. I will take PAYPAL or US POSTAL MONEY ORDERS ONLY!!!
(If paying via a us postal money order, it MUST BE OVERNIGHTED TO ME VIA EITHER ups next day air or usps express mail). I do this because of time restraints.
Finally, THANK YOU! for your time! If interested, e-mail me at: w4mcl2000@... or use the bar below to send me a instant message or click to e-mail me.
ASKING PRICE: $700.00 E-MAIL ME WITH a offer (resonable offer!). I will also trade even for the following:
Icom IC-706 MKII OR MKIIG
YAESU FT-817
or e-mail me on what you have to trade. I perfer the money though.
THIS RADIO IS clean!!!!

320. Repeater Controller for sale

Yahoo group: amatuerradioswapfest
Date: 2002-05-14 13:41:24 UTC
From: Johnny Knight
Topic: 320 Message: 320

Hello All,

I have for sale a Zetron 37-MAX commercial repeater controller for sale. The unit is in excellent condition. It was removed from service to be replaced by another controller. I have the installation and programming manual. The 37-MAX allows you to build a repeater out of most any radio that you can pull the proper control signals out of. You need received audio, a COR signal, 12 volts and ground. The controller outputs transmit audio and PTT. It is programmable over-the-air via DTMF and uses a security code to prevent unauthorized programming. It offers all CTCSS and DCS tone/code detection and generation. It does not offer phone patch capacity. Price is $250 and I'll pay shipping anywhere in the US. I will also consider any offer you wish to make, if interested reply to me at wb4u@...

Johnny

Further information on the controller can be found at:
http://www.epcom.net/radio_ing/model37max.htm

321. Scanner For Sale

Yahoo group: amatuerradioswapfest
Date: 2002-05-14 13:49:25 UTC
From: Johnny Knight
Topic: 321 Message: 321

Hello everyone,

I have a radio Shack model PRO-2006 scanner for sale. It is in excellent condition.
Only thing it needs is the have the backlight panel replaced as it has dimmed over the years.
I have the replacement panel and that will go with the scanner. The scanner has been modified,
and it has been tapped for discriminator audio output and there is an RCA jack on the back for this. The scanner is AC/DC has the AC cord but no DC cord since that was originally an option. This is still considered a top scanner. It does not trunk track, but does cover from
25 to 1300 MHz with NO GAPS. Price is $250 and I'll ship anywhere in the US. Other offers will be considered. If interested e-mail me at wb4u@....

Thanks Johnny

326. Alinco dx-70th

Yahoo group: amatuerradioswapfest
Date: 2002-05-23 15:40:55 UTC
From: w4mcl
Topic: 326 Message: 326

have up for sale a Alinco Dx-70th. Seems to work well.
I have had reports on the mars net of sounding a little "high" toned.
Also the multifunction dial is a bit sticky. But the MAIN vfo dial is
fine. You can use the up and down keys on the mic to assit in what
the multi-function know fails to do.
Puts out the full 100 watts on hf and 6 meters. Include the
instruction manual, and seperation cable. And mounting bracket.
If interested, please e-mail me.
asking price: 400.00 OBO. (overnight shipping to you included)
I accept only a U.S. POSTAL MONEY ORDER BY OVERNIGHT OR EXPRESS MAIL.

330. Radios for sale

Yahoo group: amatuerradioswapfest
Date: 2002-05-24 03:15:06 UTC
From: nypower161
Topic: 330 Message: 330

Hello everyone.
Yaesu FT 902DM,,with am,cw,ssb and fm filters installed,all
options,original box,packing,mic,cables,manual and bill of sale.
this rig is flawless,email for price ,trades might be considered.

I have a Browning Golden Eagle Mark 3 in near mint shape.
Knobs,face,covers and chassis are flawless.
This set was not used much.
Transmitter and receiver have original BROWNING SERVICE TAGS,dated
and signed by the tech that worked on them.
The original D104 mic is also included and also serial numbered to
match the TX/RX.
Both pieces have all original browning tubes,no real mods,except VFO
tap for the SILTRONIX MOD90 #3 VFO that is also included and is also
in near mint shape.
This add is for the serious collector.
Remember,you get what you pay for in life.

I also have an exstremely clean Cobra 2000,with matching speaker and
stock cobra mic.
This is rare,being NO ONE HAS EVER PUT THERE HANDS IN IT.
fully stock and clean as a whisle.
for prices or address for pick up please email: NYpower161@a...
thanks

Download the program for Audiogalaxy which can be found at C-NET.
Once that is done run a search under "ARRL" and you can dowload a
considerable amount of code learning MP3s.

334. For sale or trade: Icom 2800h

Yahoo group: amatuerradioswapfest
Date: 2002-05-27 01:20:46 UTC
From: w4mcl
Topic: 334 Message: 334

For sale/trade: Icom 2800h in mint condition. Includes manual and
service manual (on cd).
MIc, and bracket. Works great! Vhf/Uhf mobile 50w/35w Clean condition.
I will sell for $350.00 OR trade for a hf radio. Either way, I MUST
have the money/trade before I
ship radio. I will pay shipping both way! I have references upon
request. I am a honest and FAIR trader.
Thanks!

From: hamden48
Topic: 339 Message: 339

Have two clean Heath HW-101 radios. Have 1 power supply and manual. Both radios power up and receive. Unable to test transmit. From the shape of these rigs, I would think that any problem would be very minor. Looking for a 10-15-20 beam and rotor setup in exchange. E-mail (remote48@...

340. Amp info???

Yahoo group: amatuerradioswapfest
Date: 2002-06-12 01:14:57 UTC
From: hk165
Topic: 340 Message: 340

Well Ive tried 3 search engines, the newsgroups and a couple of bbs's and havent found anything. Lets hope the folks here have some info on this amp. I have an amp that has no brand name. It does have a label on the front panel that reads: B2500A CLASS AB LINEAR AMPLIFIER 275 WATT P.E.P. 500 WATT S.S.B.. It also has 4 switches labeled POWER, REC-AMP, AM/SSB, HI/LOW CARRIER. Inside the power supply is huge(my 35 amp ps has a transformer that is smaller than this amp). It has a fan on the back and the transisters are MRF-454. If I remember the 454's are 100 watt HF transisters. Also it has a meter of the front panel labeled RELATIVE POWER. If anyone has info on where I can find any info I would be eternally greatful. Thank you, Bill BTW I do have a ham ticket but Im having problems with a bootlegger so I wont post it. B

342. Items for Sale

Yahoo group: amatuerradioswapfest
Date: 2002-06-16 14:33:30 UTC
From: Johnny Knight
Topic: 342 Message: 342

Hello folks,

I have the following items for sale or trade, reply to the e-mail address give, Thanks
Johnny

Item 1:

I have a radio Shack model PRO-2006 scanner for sale. It is in excellent condition.
Only thing it needs is to have the backlight panel replaced as it has dimmed over the
years.
I have the replacement panel and that will go with the scanner. The scanner has been
modified,
and it has been tapped for discriminator audio output and there is an RCA jack on the back
for this. The scanner is AC/DC has the AC cord but no DC cord since that was originally an
option. This is still considered a top scanner. It does not trunk track, but does cover
from
25 to 1300 MHz with NO GAPS. Price is $250 and I'll ship anywhere in the US. Other offers
will be considered. If interested e-mail me at wb4u@....

Item 2:

I have for sale a Zetron 37-MAX commercial repeater controller for
sale. The unit is in excellent condition. It was removed from service to be
replaced by another controller. I have the installation and programming
manual. The 37-MAX allows you to build a repeater out of most any radio that
you can pull the proper control signals out of. You need received audio, a
COR signal, 12 volts and ground. The controller outputs transmit audio and
PTT. It is programmable over-the-air via DTMF and uses a security code to
prevent unauthorized programming. It offers all CTCSS and DCS tone/code
detection and generation. It does not offer phone patch capacity. Price is
$250 and I'll pay shipping anywhere in the US. I will also consider any offer
you wish to make, if interested reply to me at wb4u@...

Further information on the controller can be found at:
http://www.epcom.net/radio_ing/model37max.htm

From: wc8i
Topic: 344 Message: 344

Have for sale nice 12 Volt Recharable lead acid batterys, these are used but very nice and i have sold a lot of them.

12 volt 2 AH Batterys, very thin and will slip into your back pocket or in a ladies purse very easily, very good for hts, laptops,cellular phones, scanners, digital cameras, qrp rigs, i use one with my 817 and it works nice. selling 2 of them for $6.00 Plus shipping costs,

12 Volt 6.5 AH these are nice also, $10.00 each plus shipping.

12 volt 24 ah, this is nice also for 100 watt rigs,and will power a few rigs at one time, $25.00 each plus shipping costs.

Motorola batterys for the ht-1000 handhelds, $5.00 each plus shipping.

can send pictures of any of these if requested, please e mail me at wc8i@... only, thanks Bill

350. K7HOG Field Day and Rohn HBX-56 Tower for sale

Yahoo group: amatuerradioswapfest
Date: 2002-06-27 04:09:51 UTC
From: regularguy01
Topic: 350 Message: 350

The K7HOG Field Day team was hosted by Marsh Johnson, KK7CW. The set up was 3a high power with all hf bands in use, as well as a novice station.
I operated at the 20 meter ssb and cw position, as well as the 75 meter ssb position. Conditions were pretty good, with ability to hold a frequency even on 20 ssb with about 350 - 400 watts to a TA 33 JR at 45 feet or so.
Total efforts netted us approximately 1600 QSO's total, with the majority on 20 and 75 ssb.
The operators were Larry, AA0BY, John, K7FD, Harlan, N7HN, Jack, K7QH, Marsh, KK7CW, Chuck, KK7KU, and other operators. There were approxiamtely 35 operators who showed up.
How did everyone else do?

From: Ken Simpson, W8EK
Topic: 376 Message: 376

TenTec Accessory Items For Sale:

TenTec 217 CW filter.
500 Hz, for the 9 MHz IF. Will work in the older Omni 546, the newer Omnis in the 9 MHz IF, and in the Argonaut. Like new, with all of the paper work for $65.

TenTec 218, narrow SSB filter
It is 1800 Hz wide, for the 9 MHz IF, and fits the rigs listed above. Also like new, with paper work for $ 65

TenTec 248 noise blanker.
This is the noise blanker that goes in the Omni 546, but not the newer Omni V or VI. This one has all the paper work with it, for $50.

TenTec 700 C hand microphone
This one presently has the 1/4 inch stereo connector on it, but can be changed to the 4 pin connector for the newer rigs, if desired. With paper work for $30.

Prices do not include shipping from Florida.

Thanks.

From: Ken Simpson, W8EK
Topic: 377 Message: 377

For Sale:

Kenwood TH-21 HT for 2 meters.
Fully synthesized, small HT, about the size of a deck of cards. Thumbwheel selection of frequency. Very easy to use. About 1.3 W in high power and 1/3 W in low power. This one is in very nice condition. It includes rubber duck antenna, good battery, charger, and original manual for $65.

Kenwood BC-6 fast desk charger.
Charges PB-21 and PB-21 H battery packs, as used on the Kenwood TH-21 / 31 / 41 series of HTs. Holds two batteries, charging one and then the other. Takes about an hour or so to charge. It can also be used to power the radio for base station use. With manual for $ 50.

Kenwood SMC-30 speaker mic for use with TH-21 / 31 / 41 series of HTs and other Kenwood HTs.
Good shape for $25.

Kenwood SMC ?? Speaker mic.
It has the same connections as the SMC-30, but has an "L" connector, instead of the straight connector. $ 25

AC adapter for TH-21 / 31 / 41 HTs
Wall wort DC supply plugs into wall, and has adapter that slides on to the HT to use it off of 115 V AC. $ 25

Kenwood SC-6 protective case.
Fits the TH-21 /31 /41 series of HTs. It does not have a "cut out" for the DIP switches on the PL encoder, but will protect the HT in great shape. $ 10

Kenwood DC-21 used to operate the TH-21 / 31 / 41 from 13 V DC. Includes cigarette lighter plug, and voltage converter. With paper work for $25.

Kenwood RA-8 A "Stubby duck" antenna for the TH-21, two meter HT. $ 10

Kenwood RA-10 A "Stubby duck" antenna for the TH-41. 440 MHz HT. $ 10

Antenna adapter to fit the connector on the TH - 21 / 31/ 41, and adapt it to standard PL-259 antenna connector. $ 3

Antenna adapter as above, but goes to
BNC connector. $ 3

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

For Sale:

Autek QF-1 A Audio Filter

This is an audio filter that goes between your rig and speaker. It runs off of 110 V AC, and will peak, notch, or become a low pass or high pass filter. Selectivity (bandwidth) and frequency are adjustable from the front panel. This is the "A" model that also has an additional notch filter added. The input is an RCA phono plug, and the output is a 1/4 inch jack on the rear panel. This particular unit looks very close to new (it has a very small scratch on the top--the rest is perfect), and works the same. With paper work for $ 45 plus shipping from Florida.

Thanks.

379. TenTec 544 digital Triton IV HF xcvr FS

Yahoo group: amatuerradioswapfest
Date: 2002-08-28 13:21:17 UTC
From: Ken Simpson, W8EK
Topic: 379 Message: 379

For Sale:

TenTec Triton IV, Model 544, digital HF xcvr
Covers 80 thru 10 meters (no WARC bands) with 100 W
output. SSB and CW, with full QSK on CW. This is
the model with the digital readout. This one is in nice
shape. It has a scratch on the heat sink, and some wear
around the mode switch, but in general is in very nice
condition. With manual for $ 275.

TenTec 252 M power supply, 20 amp, 13 V DC supply.
Matches the Triton IV series of transceivers. It has an
ammeter on front. Good condition, with manual for $ 100

Buy both of above together for $360.

Prices do not include shipping from Florida.

Thanks.

From: Ken Simpson, W8EK
Topic: 380 Message: 380

For Sale:

Trac TE-144 electronic keyer

This one is all CMOS, and runs off of a 9 volt battery.
It will key both positive and negative voltages, and also
has a switch for "semi-automatic" operation, like a bug.
This particular unit looks close to new, with a very slight
mark on the rear lip of the cover. Front panel is perfect.

$ 40 plus shipping from Florida.

Thanks.

Drake TV-300-HP
High Pass filter for the TV. 300 ohm twin lead.
This filter is collectable, in that it is unused as best I can determine.
It is still in its original box, with an "RLD" logo on it, and says "NEW TV-300 HP High Pass Filter, Attenuates 0-52 MHz". A grounding strap is also attached. The case is no longer shiny, but I am fairly certain it has never been used. $ 15

I seem to have many more TVI filters than I need, and no TVI!

For Sale:

Drake TV-300-HP
High Pass filter for the TV. 300 ohm twin lead.
This filter is collectable, in that it is unused as best I can determine.
It is still in its original box, with an "RLD" logo on it, and says "NEW TV-300 HP High Pass Filter, Attenuates 0-52 MHz". A grounding strap is also attached. The case is no longer shiny, but I am fairly certain it has never been used. $ 15

B & W TVI filter, model FL 10 / 1500 (also known as model 425). Translated, this means that it cuts off just above 10 meters, and will handle 1500 Watts. SO-239 connector on each end. Looks and works just like new. $ 30

Ameco Model LN-2
It says it is designed for 50 to 72 ohm coax. This is a smaller filter, good only for about 100 watts. It could be used between an exciter and amplifier, if desired. SO-239 connector on each end. Good shape. $ 12

B & W TVI filter, model 415
I have not been able to find specs on this model, but it says right on it that it is for 52 ohm systems. It looks like it will easily handle 1500 Watts. SO-239 connector on each end.
Good shape. $ 30

TVI filter, made by Communications Power, Inc in the USA.
This appears to be a bandpass filter for use on 10 (or 11) meters, and is rated at 600 watts. It has provisions for tuning the input and output for maximum TVI reduction. SO-239 connector on each end. $ 30

Drake TV-1000-LP
This is the filter that may also be used on the low end of six meters. It is good for 1000 W below 30 MHz, and about 200 W up to 52 MHz. $ 30

E F Johnson low pass filter for sale.
52 ohms impedance, Catalog number 250-20. This is the cylindrical filter, with an SO-239 connector on each end.
It even has its brackets for mounting it to the wall still with it. $30

NyeViking 020-001
Cuts off just above 10 meters, and will take full legal power. Nice shape. $ 30

Prices do not include shipping from Florida.

Thanks.

385. Heath SB-630 station console FS

Yahoo group: amatuerradioswapfest
Date: 2002-09-05 23:44:58 UTC
From: Ken Simpson, W8EK
Topic: 385 Message: 385

Heath SB-630 Station Console For Sale

This unit includes an SWR bridge, phone patch, station ID
timer (both visual and auditory), and digital mechanical clock.
Its styling is such to match the SB-100/101/102 xcvrs, and
the SB-300/301/303 and SB-400/401 combos.

This particular unit has a WORKING original digital mechanical
clock. Most of these have had the clock quit, but this one works,
and the big digits look fine as well. The seconds digits are
not as clear, but if I remember correctly, those digits
smeared when a new one was about a week old. It is all
original. The face is in nice shape. The case is not perfect,
but it is not as bad as most. A bit of dust, but no dings.

Paper work included for $ 100 plus shipping from Florida.

Thanks.

From: Jim Thompson - w3lap
Topic: 411 Message: 411

Hey Gang
Good morning...
I want to buy One or Two UT-50's to go in an Icom-820H. The UT-50 is a tone squelch board. Need one for the UHF and one for the VHF. I am in desperate need for at least one UT-50 for the VHF. I will purchase two, used or new.

If you have these boards or know of someone that has them, please e-mail me off the list. By the way i plan to use this IC-820 as a remote base on my 6-meter machine, 53.010 tx - 52.010 rx - 77-hz tone.

Thanks in advance,

412. NCTECH 2002 Hamfest Announcement

Yahoo group: amatuerradioswapfest
Date: 2002-09-25 16:28:34 UTC
From: kb5ylg
Topic: 412 Message: 412

Hi, this is a courtesy announcement going to your group.

==========

NCTECH 2002
North Central Texas Emergency Communicators' Hamfest
Nov 9, 2002 7am until noon.

Returning to City of Azle Municipal Center annexes in
Ash Creek Park, 513 NW Parkway, Azle, Texas.

Directions:

Texas Highway 199 to Denver Trail exit in Azle.
Follow service road northwest 1/4 mile past municipal
center and library, turn right into Ash Creek Park.

Hamfest features:

Indoor and outdoor Swap meet, educational forums, ARRL
forum, demonstrations, ARRL and W5YI VE Examination session.

Vendor set up Friday night 6pm, and Saturday morning
5am.

General admission: $3 includes 1 doorprize ticket.
Additional tickets for door prizes $2 each.
No charge for program presenters and NCTECH staff
volunteers working at least 2 hours.
Reservations not required, thanks.
Indoor Tables: $10 each includes 1 General Admission.
These go fast, reservations strongly recommended.
Tailgate slot: $5 each includes 1 General Admission.
Reservations accepted, not required.

Valuable door prizes will be donated and purchased
from vendors on site.

Parking is free.

Friday night vendor reception during set up includes
barbecue dinner, please RSVP in advance to
participate.

Tent and RV camping optionally available at nearby
Heritage RV Park.

Lots of local restaurants nearby for breakfast and lunch.

Ash Creek Park includes covered picnic table pavilions, swingsets, basketball court, and kids play equipment, right on site for the ham fest.

Our website is at http://www.wc5c.org

For information and reservations, contact me at 817/905-8157 evenings or preferrably by email at kb5ylg@.... Doorprizes and other donations are gratefully accepted, and include recognition on our website as well as at the hamfest, unless anonymous.

The Hamfest is sponsored by the Tri-County Amateur Radio Club of North Texas WC5C, and the City of Azle Department of Public Safety. The Hamfest is sanctioned by the ARRL, and the club is ARRL affiliated. WC5C also partners with the National Weather Service via the Skywarn program, Tarrant County Radio Amateur Civil Emergency Service, Wise and Jack County Emergency Communications Team. All proceeds benefit programs of WC5C.

Regards,

David Johnson

427. Two-Tone Motorola code tone encoder

Yahoo group: amatuerradioswapfest
Date: 2002-10-03 22:53:40 UTC
From: Paul Finch
Topic: 427 Message: 427

Hello,

Anyone have an old Comm-Spec PE-100 or equivalent two-tone paging encoder on the old Motorola format they would be willing to part with? I have a project started that I need one to test with.

Paul

FOR SALE:

Two James Millen adjustable coils on ceramic forms.
Type 69045 Dimensions 2-1/8" long X 1/2" diameter.
Single hole mounting, solder terminals.
QTY 2 available for $4.00 each
http://home.cfl.rr.com/happysurfer/imag/two_james.jpg

3 turn link with two tube plate caps attached.
Ideal for homebrewing.
Bakelite swinging arm for coupler. Pivot goes to ceramic "BVL" Jack bar
with 4
metal jack sockets, and pivot brackets that are wired to two large plate
caps made
for tubes with 1/2" diameter plate cap. Part of a BVL tank system.
Has enameled copper wire and some very useful hardware attached.
Link coil dimensions 2-1/2" diameter. Enamelled 18 gauge copper wire.
QTY 1 only at $5.00
http://home.cfl.rr.com/happysurfer/imag/3turn_link.jpg

6 turn air wound coil - airdux style. Dimensions 3/4" long X
2" diameter. Inductance 2.2 uH.
One only - available for $3.00
http://home.cfl.rr.com/happysurfer/imag/6turn_air_wound_coil.jpg

18 turn coil. Airdux style. 1.75" long and 2" diameter. 10 TPI.
12.2 uH. Will sell for $5.00
Similar to above coil only longer. Picture available.

30 turn air core coil. Dimensions are 4" long and 2" in diameter.
Inductance is 18 uH. QTY 1 only at $6.00
http://home.cfl.rr.com/happysurfer/imag/30turn_air_core.jpg

48 turn air core coil - airdux style. Has Dimensions 7" long X 2"
diameter.
Inductance is 29 uH. QTY 1 only available for $10.00
http://home.cfl.rr.com/happysurfer/imag/48_turn_air_core.jpg

91 turn air core coil - Measures 6.5" in length and 1.5" diameter. 14
turns per inch.
65 uH inductance. Excellent with plexiglas support and four mounting
holes. QTY 1 only for $12.00
http://home.cfl.rr.com/happysurfer/imag/91turn_air_core_coil.jpg

Ceramic coil, split off-center. Has total of 20 turns with a
tap at 13 turns.
On white ceramic form - former dimensions 3" long X 1.5" diameter.

Coil length is 2". Inductance is 8.56 uH.
Qty 1 only for $3.00
http://home.cfl.rr.com/happysurfer/imag/ceramic_coil_split.jpg

Ceramic coil with approx 110 turns of green cotton covered wire.
White ceramic form has dimensions - 2" long X 1.5" diameter.
Inductance is around 330 uH. Suitable for AM band or LF applications.
Has screw terminals and solder lugs for connection.
New old stock. QTY 1 only for $4.00
http://home.cfl.rr.com/happysurfer/imag/ceramic_coil_with.jpg

Coil form, ribbed white ceramic. Dimensions are 5" long and
2" diameter.
Ribbed style with slots for wire. Designed to hold 26 turns and
would have about 20 uH. Has 4 mounting holes on each end.
Has been repaired; looks fine, hence low price.
Qty 1 only at $1.00
http://home.cfl.rr.com/happysurfer/imag/coil_form_ribbed.jpg

Coil form - odd design ribbed ceramic former with 6 terminals on
base and three nice threaded holes for mounting screws.
Dimensions are 2-1/2" tall X 1-1/8" diameter.
Inner coupling coil is 7/8" diameter with tapped coil of enamelled
wire brought out to three terminals.
Qty 1 available for $3.00
http://home.cfl.rr.com/happysurfer/imag/coil_form_odd.jpg

Multi-tapped coil. Unique design attached to a PC board with a tap
for every turn.
Airdux type air core form. Coil has a total of 32 turns and dimensions of
4" long X
1.5" diameter. Approx 12.5 uH.
QTY 1 available for $6.00
http://home.cfl.rr.com/happysurfer/imag/Multi-tapped_coil.jpg

14 MHz plug-in tank coil with link coupling. 20m coil on 5-pin base.
Marked as model 2420. Medium size. Airdux style coil has 11 turns
and the link outside it has 3 turns. QTY 1 only for $5.00
http://home.cfl.rr.com/happysurfer/imag/plug_in_coil_with_link.jpg

438. Tentec 229 B full power HF tuner and other TenTec items FS

Yahoo group: amatuerradioswapfest
Date: 2002-10-08 13:06:11 UTC
From: Ken Simpson, W8EK
Topic: 438 Message: 438

For Sale:

Ten-Tec 229 B antenna tuner. Has roller inductor,
so will match almost any antenna, 160 through 10
meters, including WARC bands. Good for full legal
power. Also has wattmeter, SWR bridge, and a 4
position antenna switch. Almost new condition.
This particular one is the color that matches the
Corsair II / Paragon series. With manual for $ 250.

TenTec 255 Deluxe Power Supply
Matches the early Omni series, and includes ammeter
and speaker, and trim ring. Dual pass transistors similar
to the heavy duty 280 power supply. Good for 20 amps
at 13 V DC. This one looks almost like new, and works
the same. With manual and original box for $ 145.

TenTec 252 M power supply, 20 amp, 13 V DC supply.
Matches the Triton IV series of transceivers. It has an
ammeter on front. Good condition, with manual for $ 100

TenTec 248 noise blanker.
This is the noise blanker that goes in the Omni 546 or 545,
but not the newer Omni V or VI. This one has all the paper
work with it, for $50.

TenTec 245 CW filter
Plugs in to the Triton (I, II, IV, 540 and 544).
Works great, with paper work for $50

Prices do not include shipping from Florida.

Thanks.

Full coverage of the 49 m, 31m, 25m and 19m bands.
Also has a logging scale.

Has controls for volume, tone, band and tuning. Also has
a front-mounted headphone jack.

All original knobs. Brown metal case.

Will sell for $115.00 plus shipping

445. Kenwood 2 m HT and 440 MHz HT and accessories FS

Yahoo group: amatuerradioswapfest
Date: 2002-10-12 15:18:18 UTC
From: Ken Simpson, W8EK
Topic: 445 Message: 445

For Sale:

Kenwood TH-21 AT 2 meter HT.
Fully synthesized, small HT, about the size of a deck of cards. Thumbwheel selection of frequency. Very easy to use. About 1.3 W in high power and 1/3 W in low power. This one is in very nice condition. It includes rubber duck antenna, good battery, charger, and original manual for $65.

Kenwood TH-41 BT HT for 440 MHz.
Similar to the TH-21, but for 440 MHz.
SubAudible (PL) tones internal, with DIP switch selection. Very good shape, with rubber duck, battery, charger and original manual for $95.

Kenwood PB-21 H
This is the heavy duty battery for the TH-21 / 31 /41 series of HTs. It is 450 mahr, instead of the standard 180 mahr of the regular PB-21. With paperwork for $35.

Kenwood BC-6 fast desk charger.
Charges PB-21 and PB-21 H battery packs, as used on the Kenwood TH-21 / 31 / 41 series of HTs. Holds two batteries, charging one and then the other. Takes about an hour or so to charge. It can also be used to power the radio for base station use. With manual for $ 50.

Kenwood W09-0393
"Wall wort" charger to use with the PB-21 H battery pack (above), if you do not use the desk charger. This is NOT the standard charger for the regular PB-21, but a special one for the PB-21 H. $12

AC adapter for TH-21 / 31 / 41 HTs
Wall wort DC supply plugs into wall, and has adapter that slides on to the HT to use it off of 115 V AC. $ 25

Kenwood SC-6 protective case.
Fits the TH-21 /31 /41 series of HTs. It does not have a "cut out" for the DIP switches on the PL encoder, but will protect the HT in great shape. $ 10

Kenwood DC-21 used to operate the TH-21 / 31 / 41 from 13 V DC. Includes cigarette lighter plug, and voltage converter. With paper work for $25.

Kenwood RA-8 A "Stubby duck" antenna for the TH-21,
two meter HT. $ 10

Kenwood RA-10 A "Stubby duck" antenna for the TH-41.
440 MHz HT. $ 10

Antenna adapter to fit the connector on the TH -
21 / 31/ 41, and adapt it to standard PL-259
antenna connector. $ 3

Antenna adapter as above, but goes to
BNC connector. $ 3

Prices do not include shipping from Florida.

Thanks.

Date: 2002-10-14 13:19:39 UTC
From: Brian Carling
Topic: 449 Message: 449

FOR SALE: Crystal bank sockets.

Neat bakelite panel that will accept four crystals that
you can switch or select from via solder terminals.

They are made to accept two differet sizes of crystals,
all with the larger type pins than an FT243 uses.

That would be CR-1A and FT-171 types for example.
The pin spacing is for both 1/2" and 3/4" pins.

Have four mounting holes in the corners with 1/2"
standoffs.

Picture available via e-mail.

QTY 2 available for $6.00 each.

E-mail me to arrange purchase:

450. FSA: Crystal Sockets HC-6/U

Date: 2002-10-14 13:22:28 UTC
From: Brian Carling
Topic: 450 Message: 450

FOR SALE: Crystal sockets for HC-6/U crystals.

I have about 10 or 20 of these available for $2.00 each
plus shipping

These are new parts. They are teflon and anodized
metal.

They have two hole side mounting, with a clip that
nicely holds the crystal in place.

Great for repairing older rigs, or for homebrewing
tube transmitters and receivers.

This is NOT the same as FT243. These are
for the similar sized crystals that have thinner pins.

E-mail me to arrange purchase.

459. FS: E.F. Johnson Thunderbolt linear

Yahoo group: amatuerradioswapfest
Date: 2002-10-20 11:54:16 UTC
From: Brian Carling
Topic: 459 Message: 459

FOR SALE:

E.F. Johnson Thunderbolt linear amplifier in very good condition.
Inside is immaculate, clean and shiny almost like new.
Has full output from a good pair of 4-400A tubes.
Outside is extra nice with only a couple of minor scratches that will
clean up easily. Otherwise it is immaculate. The inside looks almost like
new both above and below deck. This amplifier sparkles. Front panel has
one small sticker that you can very easily remove.
Power supply needs 220V AC and included is the original power cord in
good shape.
Picture at:
http://home.cfl.rr.com/happysurfer/imag/thunderbolt.jpg

Will sell for $900.00 plus insured shipping
Price includes heavy duty packaging with a wood support base.

465. FS: Channel Master Automatic Rotator

Yahoo group: amatuerradioswapfest
Date: 2002-10-31 10:53:19 UTC
From: Brian Carling
Topic: 465 Message: 465

FOR SALE:
Antenna Rotator suitable for small beam. This was originally intended for turning a TV antenna but will work nicely for a small ham antenna such as a Mini Beam or a VHF array. Good working condition.

Automatic control box is in excellent condition.
Rotor comes with all hardware. Brackets have some surface rust but will clean up just fine.

You supply the 3-wire cable. Will sell for $65.00 plus shipping

Picture at:
http://home.cfl.rr.com/happysurfer/imag/channel_master.jpg

METERS

Nice round voltmeter with keystone face appears to be from a General Radio Company RF voltmeter. Scales calibrated in VHF 0 - 0.4 and UHF 0-2 with a dBm scale up to +4 DBm.
Made for 2-/14" round hole. Great looking meter. Ideal as spare part for your test gear. Will sell for $5.00

Phasetron 0 - 300 A DC, new meter in box. Yes, it's NOT 300 mA!
Needs shunt. Has black case and is 3" in diameter.
Very nice looking. Available for $8.00

Tiny meter - black. Looks like antique type. Dimensions 1-1/8" diameter with mounting hardware for 1" diameter hole.
Two are marked 0 - 12 X 1000 FT. The other reads 0 - 1.
QTY 3 available for $3.00 each

6A DC meter by Prime Co. of Ohio. Rectangular face dimensions 2.25" wide X 1.375" high.
Overall dimensions are 2.25" wide X 2.375" high.
QTY 1 only for $2.00

E-mail me for pictures of any of these.

490. FS: VX5R with freeband mod.....

Yahoo group: amatuerradioswapfest
Date: 2002-11-14 16:28:11 UTC
From: PottsLadd13
Topic: 490 Message: 490

I have a VX5R, the unit is about 1 yr old. Its overall condition is very
good. Keypad and numbers in great shape. It has one slight problem, the SMA
connector in the radio keeps working loose. The antenna stays on, but the
antenna moves around even when its screwed onto the radio. Other than that,
it works great, on TX & RX.
It has the freeband mod done and works great.
First $175.00 takes it. Plus $5.00 Priority Mail shipping.
Insurance is extra.
Please email RW613@...

491. Daiwa CN-720 B "cross needle" wattmeter FS

Yahoo group: amatuerradioswapfest
Date: 2002-11-15 13:24:54 UTC
From: Ken Simpson, W8EK
Topic: 491 Message: 491

For Sale:

Daiwa 720 B "Cross needle" wattmeter.

This is much more than your average wattmeter. It covers from 1.8 to 150 MHz, which means it covers all of the HF bands, and also 6 and 2 meters. It has full scale readings of 20 W, 200 W, and 2000 W. The actual meter movement itself is very large -- about 4 1/2 inches on each side. Of course, with the cross needle feature, you can read forward power, reflected power, and SWR all at the same time.

This particular meter is in nice shape, and includes paper work for $125 plus shipping from Florida.

Thanks.

Mattco 745 Frequency Counter

Works with any radio to measure and show your
operating frequency. Simply connects in line with your
antenna with a PL-259 jumper.

Has controls for ON-OFF, SENSITIVITY and MHz-KHz.

The digital readout will show, for example 27.185
in the MHz position or down two digits further
(if you want) in the kHz position.

Works at all power levels from 2 watts and up.

Requires 12V DC to operate. Fully tested and guaranteed.

Will sell for $125.00 plus $5.00 conus shipping

E-mail me for a picture or to arrange purchase:

Date: 2002-11-23 15:58:42 UTC
From: Ken Simpson, W8EK
Topic: 501 Message: 501

Yaesu FT-757 GX For Sale:

Yaesu FT-757 GX, HF transceiver
Covers 160 thru 10 m, including the WARC bands. General
coverage receiver. Nice digital readout. CW keyer built in.
SSB / CW / FM / AM modes. Approximately 100 W output.
Dual VFOs, plus memory. Pass band tuning.

This particular unit has both CW filters in it. Hand microphone
and power cord included. It functions 100% electrically, and
looks nice, with some wear on the case. The front panel is
very nice. With paper work for $400 plus shipping from Florida.

Thanks.

73,

Ken, W8EK

502. New Yahoo group for Icom HT's

Yahoo group: amatuerradioswapfest
Date: 2002-11-23 16:53:10 UTC
From: PottsLadd13
Topic: 502 Message: 502

I've started a new group in the interest of Icom Ht's. It is dedicated to the late model of HT's known as the SAT series. Which includes all the following radio's:
2SAT
3SAT
4SAT
24AT
W2A
R1
2SRA
4SRA

Check it out.
http://groups.yahoo.com/group/2SAT/

503. FS: Crystal Bank Sockets QTY 2

Yahoo group: amatuerradioswapfest
Date: 2002-11-23 23:17:44 UTC
From: Brian Carling
Topic: 503 Message: 503

FOR SALE:

Two crystal bank sockets for older type crystals. Great for switching in several different rocks with a rotary switch.

QTY 2 Bakelite panels available - dimensions 4" X 1.75" with 4 standoffs for corner mounting. These hold up to 4 crystals each, and have two spacing sizes paralleled. 1/2" and 3/4" pin spacing available. Pin size is for CR-1A and FT-171 type rocks etc.

Will sell for $5.00 each plus postage.

From: Bill
Topic: 505 Message: 505

I have nice 12 volt, 3.2 amp hr sealed recharable lead acid batterys for sale, these are very nice for qrp rigs, digital cameras, hts, laptops, cellular phones, hunting lights, fishing lights, scanners, etc. they were reveiwed in qst a couple of yrs ago, and received a very good right up. They are nice to throw on the seat, or floor, of a vehicle and power your equipment with(no acid spill). They will last a couple of days between charging, depending on transmit time. Also, they do not hold a memory as ni-cads do. Im selling them for(2 for $5.00 plus shipping costs), OR if you buy 15 or more, i will sell them to you for ($1.50 each plus shipping costs). I can send pictures if requested , please e mail me at wc8i@...
thanks, Bill

513. FS: Globe HG-303 Transmitter

Yahoo group: amatuerradioswapfest
Date: 2002-11-28 13:28:37 UTC
From: Brian Carling
Topic: 513 Message: 513

For sale - rather rare Globe HG-303 novice transmitter. Mint condition.

6146 final for 75 watts on 80, 40, 20, 15 and 10m bands. CW only.
Has metering for plate and grid current.
Standby-Operate-Tune switching etc.

Comes in the original box with manual.

Looks just like new and operating fine with full output.

Picture at:

http://home.cfl.rr.com/happysurfer/imag/globe_hg303.jpg

Will sell for $135.00 plus shipping

514. FS: Icom Hand Mike

Date: 2002-11-28 13:33:14 UTC
From: Brian Carling
Topic: 514 Message: 514

FOR SALE: Icom HM-7 Hand microphone with standard built-in pre-amplifier. This microphone is used with many of the earlier Icom rigs such as IC-740, IC-251A etc. and is in excellent condition.
Will need the connector to be attached. Nice coil cord and all in excellent shape.

Picture at:
http://home.cfl.rr.com/happysurfer/imag/icom_hm7.jpg

Available for $20.00 plus shipping

516. Greenlee Chassis Punches

Yahoo group: amatuerradioswapfest
Date: 2002-12-01 17:03:22 UTC
From: Ken Simpson, W8EK
Topic: 516 Message: 516

In digging thru some more "stuff", I found a box of Greenlee chassis punches that I am certain I will never use, so they might as well go to someone that can.

All of them are in very good shape, and all are in their original boxes. I have attempted to price them at about 1/2 to 2/3 of new price, which I think would be fair.

Here is what is available:

Round
1 3/8 inch - $ 23
7/8 inch - $ 21
5/8 inch - $ 20

Square
1/2 inch - $ 50
3/4 inch - $ 100 (appears to be new and never used)

"Conduit set"
These are sold as a set only, for two reasons. They came that way, and there are only 2 bolts for four punches. Greenlee has the size of the conduit marked on them, but of course the hole is larger than the conduit. Hole size, as best I can measure is in ( ).
1 inch (1 1/4)
1 1/4 inch (1 5/8)
1 1/2 inch (1 3/4)
2 inch (2 1/4)
These are not in boxes, and are used more, but still have a lot of life left, and are in good shape. $100 for the set.

Prices do not include shipping from Florida.

Thanks.

519. Kenwood MC-50 and other desk microphones FS

Yahoo group: amatuerradioswapfest
Date: 2002-12-05 23:16:58 UTC
From: Ken Simpson, W8EK
Topic: 519 Message: 519

For Sale:

Kenwood MC-50 desk microphone. This is the
popular mic that is made to match the TS-120,
TS-130, TS-180, TS-520, TS-820, TS-530, TS-830
and others of that vintage. It has both high and low
Z output. This one is in very nice shape. Someone
very tastefully added and "up" and a "down" pushbutton
switch to it, making it function like the $100 type of
desk mics. But this one is only $ 60.

Other microphones and related for sale:

Turner 253 desk microphone.
This is a low Z model, so it will work with most of
the new modern rigs. It is a brushed chrome styling
with nice PTT switch. It looks almost like new. $45

Shure 444 desk microphone.
The Shure has voice shaping built in to it, with PTT switch
on the base, and a switch for High or Low Z under the base.
This mic is the gray color, and is in good shape for $ 45.

Turner "Plus 3" desk microphone
It has an amplifier built in to the base, so will match
either Hi Z or Lo Z rigs. Nice shape for $50

Prices do not include shipping from Florida.

Thanks.

527. CW keyer and paddles FS

Yahoo group: amatuerradioswapfest
Date: 2002-12-10 15:55:09 UTC
From: Ken Simpson, W8EK
Topic: 527 Message: 527

For Sale:

MFJ 422 B electronic keyer.
This is the keyer that uses the Curtis chip as the keyer,
but includes sidetone, and has adjustments for volume,
tone frequency, and weighting, as well as speed. Can
be used in fully automatic mode, or semi-automatic like
a bug. It will key either positive or negative voltages,
and is powered by an internal 9 V battery, or external
5 to 9 volt supply. It is made to go on the back of a
Bencher Paddle. $ 60

MFJ 422 (Not the "B" model)
Very similar to above, but older version. $55

MFJ-564 Deluxe Iambic Paddle.
This is the MFJ clone of the Bencher Paddle.
This model is the all chrome model, and is in very
nice shape. It will work with the MFJ 422 keyer above.
It looks close to new. With paper work for $ 45.

Bencher BY-1 Iambic Paddle.
True Bencher, and not the MFJ clone. This has the
black base, with chrome parts. Very nice condition. $65

I'll make you a deal if you want both a keyer and a paddle.
Either keyer will fit on either paddle.

Prices do not include shipping from Florida.

Thanks.

If you are still looking for a straight key, I have a really nice one for sale. It is a SpeedX model mounted on a base with feet.

It is the sharpest looking SpeedX I have ever seen and is in far better condition than most of them that hams have in their shacks.

If you would like it I will sell for $35.00 plus shipping.

Best regards - Brian, AF4K

538. Ameco PT-2 Preselector

Yahoo group: amatuerradioswapfest
Date: 2002-12-15 19:47:48 UTC
From: Brian Carling
Topic: 538 Message: 538

For sale - Ameco PT-2 preselector in mint condition.

This selective preamplifier works with any receiver or transceiver to improve gain and selectivity on receive. Covers 1.8 to 54 MHz
Can handle any modern transceiver of around 100 watts.

Built in AC power supply and cables included. Uses SO-239 connections for radio and antenna.

Will sell for $36.00 plus shipping

540. FS: Pair of 4-400 glass chimneys

543. Accessory items for Kenwood TH-21 / 31 / 41 HTs FS

Yahoo group: amatuerradioswapfest
Date: 2002-12-19 16:42:43 UTC
From: Ken Simpson, W8EK
Topic: 543 Message: 543

Accessories for Kenwood TH-21 / 31 / 41 HTs For Sale:

Kenwood PB-21 H
This is the heavy duty battery for the TH-21 / 31 /41 series of HTs. It is 450 mahr, instead of the standard 180 mahr of the regular PB-21. With paperwork for $ 25.

Kenwood W09-0393
"Wall wort" charger to use with the PB-21 H battery pack (above), if you do not use the desk charger. This is NOT the standard charger for the regular PB-21, but a special one for the PB-21 H. $10

AC adapter for TH-21 / 31 / 41 HTs
Wall wort DC supply plugs into wall, and has adapter that slides on to the HT to use it off of 115 V AC. $ 25

Kenwood SC-6 protective case.
Fits the TH-21 /31 /41 series of HTs. It does not have a "cut out" for the DIP switches on the PL encoder, but will protect the HT in great shape. $ 10

Kenwood DC-21 used to operate the TH-21 / 31 / 41 from 13 V DC. Includes cigarette lighter plug, and voltage converter. With paper work for $25.

Kenwood RA-8 A "Stubby duck" antenna for the TH-21, two meter HT. $ 10

Kenwood RA-10 A "Stubby duck" antenna for the TH-41. 440 MHz HT. $ 10

Antenna adapter to fit the connector on the TH - 21 / 31/ 41, and adapt it to standard PL-259 antenna connector. $ 3

Antenna adapter as above, but goes to BNC connector. $ 3

Prices do not include shipping from Florida.

Thanks.

Topic: 544 Message: 544

FOR SALE:

VARIAC Model W10 variable transformer for 120V AC in,
and 0-120V out at 10 Amps, brand new and complete with
the knob and dial scale
$75.00 plus shipping

VARIAC Model W10 variable transformer for 120V AC in,
and 0-120V out at 10 Amps, looks like new, has knob
but is missing the dial scale plate
$65.00 plus shipping

General Radio Variac model M20 has 0-140V AC at 20 Amps - enclosed in heavy
duty aluminum case with feet.
Heavy duty construction that G.R. is famous for.
Comes with knob and scale. Excellent shape - Looks like new.
Plate states that it is for 350 Hz and up but works OK up to a
few amps on 60 Hz also.
Will sell for $45.00 plus shipping.

E-mail me for pictures or to arrange purchase.

558. REDUCED: E.F. Johnson Thunderbolt

Yahoo group: amatuerradioswapfest
Date: 2003-01-13 20:57:00 UTC
From: Brian Carling
Topic: 556 Message: 558

E. F. Johnson Thunderbolt linear amplifier in very
good condition.Inside is immaculate, clean shiny almost like new.
Has full output from a good pair of 4-400A tubes.
Outside is extra nice with a couple of minor scratches that will clean up easily.
Otherwise immaculate.
Inside looks almost like new above and below deck.
This amp sparkles.

Non-original items are the feet (nice new good quality plastic ones)
and new solid state rectifier replacements have been installed instead of 866es.
.
Front panel has one small sticker that can easily be removed.
Needs 220V AC and comes w/good power cord. Also has original accessory
cord with special connector.

Was $900.00 - now $750.00 plus insured shipping
Includes heavy duty packaging w/woodbase.

Did I mention it comes with the ORIGINAL MANUAL in great shape too?

565. Electronic keyer and paddle FS

Yahoo group: amatuerradioswapfest
Date: 2003-01-17 14:29:48 UTC
From: Ken Simpson, W8EK
Topic: 565 Message: 565

For Sale:

MFJ 422 electronic keyer.
This is the keyer that uses the Curtis chip as the keyer,
but includes sidetone, and has adjustments for volume,
tone frequency, and weighting, as well as speed. Can
be used in fully automatic mode, or semi-automatic like
a bug. It will key either positive or negative voltages,
and is powered by an internal 9 V battery, or external
5 to 9 volt supply. It is made to go on the back of a
Bencher Paddle. $ 60

MFJ-564 Deluxe Iambic Paddle.
This is the MFJ clone of the Bencher Paddle.
This model is the all chrome model, and is in very
nice shape. It will work with the MFJ 422 keyer above.
It looks close to new. With paper work for $ 45.

Both of the above for $100.

Prices do not include shipping from Florida.

Thanks.

120V AC Primary to 6.3V at 50 Amps - $55.00

shipping additional on all.

571. FS: Triplett Freq. Meter

Yahoo group: amatuerradioswapfest
Date: 2003-01-22 01:30:51 UTC
From: Brian Carling
Topic: 570 Message: 571

FOR SALE:
Triplett Model 3256 Frequency Meter.
This appears to be an absorption wave meter.
Shaped very much like a grid dip meter.
Has two ranges. One band covers 80 and 40m and has
the calibration markings for these two bands.
Other band covers 14 through 30 Mc with markings for
20m, 15m and 10m bands.
Has a switch to select between the two ranges.
Neat little gadget measures 5-1/4" long X 2-1/4" X 2-1/4"
plus a coil extends 2-1/2" out the top.

Has a very nice Triplett 0-1 mA meter built in.
There is a headphone jack on the front for monitoring detected
signals. Signals are coupled into the unit by inductive coupling to the coil. Can be
used for identifying, monitoring and tracing RF signals along transmission lines, in
tank circuits etc.

Condition of the unit is very good. Gray hammertone finish over copper plated
steel chassis-cabinet.

Will sell for $18.00 plus shipping

572. FS: 20 CH UHF Mobile Radio

Yahoo group: amatuerradioswapfest
Date: 2003-01-25 19:23:42 UTC
From: Scott DeSantis (KB9VRW)
Topic: 572 Message: 572

For Sale- I have for sale a very nice looking used Motorola M1225 UHF mobile transceiver. This unit is a 20 channel 40 Watt model for the 450-470 Mhz band. It has had some use, but is in great condition (8 out of 10).

I'm asking $350 OBO plus the shipping in the CONUS.

Please email me direct if you are interested or have any questions.

Thanks,
Scott De Santis

601. FS: Swan 250 VHF station for 6m

Yahoo group: amatuerradioswapfest
Date: 2003-02-20 20:31:08 UTC
From: Brian Carling
Topic: 601 Message: 601

FOR SALE:
Swan 250 with 117C power supply/speaker cabinet. Comes with all cables
The Swan 250 is a 6 meter transceiver which was first introduced in the spring of 1965.
With two 6146B tubes as the PA, this radio is rated at 240 watts PEP on SSB, 180 watts CW, and 75 watts on AM.
Band coverage is 50 to 54 Mc, and the pi network coupling provides for a wide range of antenna impedances.
The original selling price of the 250 was shown as $325.00 US.
A review of the 250 appears in the July 1967 issue of CQ.
All in good operating condition with manual. Cabinets look excellent.
The 117C power supply has two small holes in the front, easily filled.
Swan 250 available for $225.00
Swan 117C available for $75.00
Will sell for $275.00 plus shipping

Also have VX-2 VOX unit possibly available for additional $35.00
(Sale is pending with the 350 at present)

Henry 3K-A 80-10 meters in very good condition. Prefer not to ship due to weight (167lbs). Can easily run legal limit with less than 100 watts of drive. Uses a pair of inexpensive 3-500's at about 3800 volts. Includes original manual. Located in the Olympia, WA area. This Amp is very heavy duty and is built to last! Asking $1000.00 Can deliver to Puyallup ham fair on March 8th. E-mail Garret at w7get@... or call 360 239-0030

603. MFJ SBF-2 SSB filter FS

Yahoo group: amatuerradioswapfest
Date: 2003-02-21 16:05:21 UTC
From: Ken Simpson, W8EK
Topic: 603 Message: 603

For Sale:

MFJ SBF-2, SSB filter

This filter is very similar to the MFJ CWF-2, except it is for use on SSB. It is an audio filter, and operates off of a 9 V battery, or "wall wort" power supply. It has audio in and out jacks, and a headphone jack. The selectivity is variable with switch selections of 1.5 KHz, 2.0 KHz, 2.5 KHz, or "high pass" mode. If course there is also an on-off switch that also bypasses the unit. It is all in a nice little enclosure, approximately 2 inches high, 3 1/4 inches wide, and 4 1/2 inches deep.

This one looks almost like new. Paper work is included for $18 plus shipping from Florida.

Thanks.

73,

Ken, W8EK

606. FS: Hallicrafters S-53 Receiver

Yahoo group: amatuerradioswapfest
Date: 2003-02-22 20:54:27 UTC
From: Brian Carling
Topic: 606 Message: 606

FOR SALE:

Hallicrafters S-53 Receiver available for $38.00
It's all there. All original knobs etc.
Non working - requires some restoration.

It comes with a SAMS manual with all voltage charts, alignment
instructions, dial stringing guide etc.
It also comes with a reel of dial string (you would need this)
and is complete. Restoration required, but should be easily done.

Also comes with a Gernsback booklet on how to restore these older
Hallicrafters series receivers.

Photo and details at:
http://www.gizba.com/x/sidevalve/radios.htm

E-mal me to arrange purchase.

621. FS: Rare Globe Electronics VHF-62 Transmitter

Yahoo group: amatuerradioswapfest
Date: 2003-03-01 14:46:08 UTC
From: Brian Carling
Topic: 621 Message: 621

FOR SALE:

Globe Electronics Hi-Bander model VHF-62 Transmitter.
RARELY seen. This rig runs 60 watts AM and CW on both
6 meters and 2 meters.
Equipment is in fairly good shape. The inside looks
VERY good.
Tubes: 6146 P.A. final and modulator type 6L6GB.
Has a built-in 120V AC power supply, modulator etc.
Provision is made for VFO input or crystal control.
Pilot lamps for power & plate.
Front panel controls are: AC off-Mic Gain,
Function switch for: AM/STBY/TUNE/STBY/CW,
Osc. Tune, Buffer Tune, Band selector 2m/6m,
Final Grid Tune, Antenna load, Final plate tune,
Meter switch for Osc./Buffer/PA Grid/PA Plate.
On the rear panel there are two fuses, Mic input,
Accessory plug, and SO-239 connectors
for 2m and 6m antennas.

This is a really cool piece of equipment and
they only sold a small number of them.
Must be one of a handful still in existence.
Will sell for $159.00 plus shipping

Picture and details at:
http://www.gizba.com/x/sidevalve/radios.htm

629. Azden PCS-4000, 2 m FM, parts radio FS

Yahoo group: amatuerradioswapfest
Date: 2003-03-08 16:19:20 UTC
From: Ken Simpson, W8EK
Topic: 629 Message: 629

For Sale:

Azden PCS-4000, 2 m FM transceiver

This radio is being sold for parts, although the radio does function on both transmit and receive. The problem with it is that one digit does not read. For example, if the frequency is set to 146.520, the "2" is blank. It does transmit the full 25 W (or 5 W in low power), and it does receive OK. It had been used as a packet radio, and can still be used that way, if one does not mind the missing digit.

This is the radio only -- no microphone and no mobile bracket, but I will include a copy of the PCS-4000 service manual for $30 plus shipping from Florida.

Thanks.

From: Brian Carling
Topic: 633 Message: 633

FOR SALE -
Military type AN/URR-13A (R-266) receiver. Covers 220-420 MHz and has two panel meters on the front.

This is a real "Grand Dame." A nice looking radio.
Built by Federal Telephone And Radio Company of Clifton, NJ.
for the Department of The Navy, Bureau of Ships.

Has controls for Main tuning, Phones level, CRYSTAL - OSC - MANUAL, ALIGN-REC, DIMMER,
A.F. LEVEL, SILENCER LEVEL, SILENCER ON-OFF, Noise limiter ON-OFF etc.
Some controls are behind cool panels that open.

Built-in 120V AC power supply for 60 Hz. Good condition.
Will sell for $35.00 plus shipping

E-mail me off the list for pictures and details please.
Best regards to all.

650. TS-520 manual needed

Yahoo group: amatuerradioswapfest
Date: 2003-03-31 18:30:42 UTC
From: jonn7411
Topic: 650 Message: 650

Hello everyone,

I recently bought a Kenwood TS-520 transciever at a hamfest, however the manual was not included with it.

I am looking for the manual that comes with the radio to help with tune up, set-up, etc.

If anyone has one that they would be willing to part with or are willing to make a copy of it would be much appreciated.

Reasonable expenses will be reimbursed.

Please email me so we could work out the details at jonn7411@...

Thanks in advance for any help provided.

Date: 2003-04-18 01:06:25 UTC
From: Ken Simpson, W8EK
Topic: 659 Message: 659

TVI filters for the transmitter For Sale:

Drake TV-1000-LP
Low pass filter for the transmitter
This is the filter that may also be used on the low
end of six meters, as well as HF. It is good for 1000 W
below 30 MHz, and about 200 W up to 52 MHz. $ 30

Bud LF-601 "Variable Low Pass filter"
This filter is a bit over a foot long, and about 3 inches square
with an SO-239 connector on each end. In addition, it has 5
variable capacitors on the top of it, that can tuned for maximum
TVI improvement. Although a bit harder to adjust, it should
give better TVI reduction. $ 30

B & W TVI filter, model 415
I have not been able to find specs on this model, but it says
right on it that it is for 52 ohm systems. It looks like it will
easily handle 1500 Watts. SO-239 connector on each end.
Good shape. $ 30

TVI filter, made by Communications Power, Inc in the USA.
This appears to be a bandpass filter for use on 10 (or 11)
meters, and is rated at 600 watts. It has provisions for tuning
the input and output for maximum TVI reduction. SO-239
connector on each end. $ 30

Prices do not include shipping from Florida.

Thanks.

From: Ken Simpson, W8EK
Topic: 663 Message: 663

Coax Switches For Sale:

B & W Model 376 Coax Switch
This will switch up to 5 antennas, grounding all unused
antennas. It also has a ground position that will ground
ALL antennas connected to it. It has SO-239 connectors,
with the coax going out like spokes of a wheel.
This one is good condition. Works 100%. $ 35

Heath 4 position Coax Switch
Five SO-239 connectors, with coax going out like
spokes of a wheel. This one does NOT ground all of
the unused connectors. Good shape for $ 25

Generic 3 position Coax Switch
3 position switch with SO-239 connectors.
Small rectangular box, with the 3 switched connectors
coming out the rear, and the common coming out the
front. Very nice condition for $ 15

Prices do not include shipping from Florida.

Thanks.

667. TenTec KR-50 keyer and 245 CW filter FS

Yahoo group: amatuerradioswapfest
Date: 2003-05-06 23:32:10 UTC
From: Ken Simpson, W8EK
Topic: 667 Message: 667

For Sale:

TenTec KR-50 keyer.
Iambic, with dit and dah memories, if desired (they can be turned on or off). Built in Iambic paddles, 12 V DC or 110 V AC power, and reed relay output to key most any rig. $ 65

TenTec 245 CW filter.
Fits any of the Triton series (I, II, IV, 540, and 544), and has up to 3 levels of filtering (as narrow as 150 Hz).
With the paper work for $50

Prices do not include shipping from Florida.

Thanks.

668. Bencher BY-21 paddle and MFJ 422 keyer FS

Yahoo group: amatuerradioswapfest
Date: 2003-05-10 11:32:02 UTC
From: Ken Simpson, W8EK
Topic: 668 Message: 668

For Sale:

Bencher BY-2 Iambic CW Paddle.
True Bencher, and not the MFJ clone. This has the
chrome base, with chrome parts, in other words --
all chrome. Very nice condition, in its box, with
paperwork for $95.

MFJ 422 B electronic keyer.
This is the keyer that uses the Curtis chip as the keyer,
but includes sidetone, and has adjustments for volume,
tone frequency, and weighting, as well as speed. It can
be used in fully automatic mode, or semi-automatic like
a bug. It will key either positive or negative voltages,
and is powered by an internal 9 V battery, or external
5 to 9 volt supply. It is made to go on the back of a
Bencher Paddle. $ 60

Both of the above for $145.

Prices do not include shipping from Florida.

Thanks.

670. Accessories for Yaesu VX-5 and VX-1 multiband HTs FS

Yahoo group: amatuerradioswapfest
Date: 2003-05-14 19:48:17 UTC
From: Ken Simpson, W8EK
Topic: 670 Message: 670

For Sale:

Accessory items for either VX-5 or VX-1 dual band HTs
and others in that series:

Yaesu MH-37 A4B
Lightweight earphone and microphone with PTT switch.
Four conductor plug. Never used; like new. $25

MFJ-288 I
Deluxe Headset with microphone and PTT switch.
Four conductor plug. Also never used; like new. $25

For the Yaesu VX-5 (and I think VX-7 as well)
FNB-58 LI Lithium Battery
I thought I would need a spare battery for the VX-5,
but that has not been the case. Since I have the FBA-23
"AA" pack as a spare as well, I have no need for an
extra Lithium. I think this one has been charged 3 times.
Virtually like new, in its box, with paper work. $ 50

For the Yaesu VX-1
FNB-52 LI, Lithium Battery for VX-1
My wife found the same thing I did, on her VX-1, so the
spare battery is available. I think it has been charged
twice. Like new. $30

Prices do not include shipping from Florida.

Thanks.

Yahoo group: amatuerradioswapfest
Date: 2003-05-18 11:30:33 UTC
From: Ken Simpson, W8EK
Topic: 672 Message: 672

For Sale:

Drake TR-22 C, 2 meter FM transceiver

This is an older 12 channel crystal controlled rig, but it is in very good shape, both electrically and cosmetically, for its age. As far as I know, it works 100% electrically. Cosmetically it has some wear, and a bit of paint worn off at the very back, but no scratches that I find. It even includes the Drake 1525 EM touchtone microphone, which is worth $40 itself. The telescoping antenna is original, and is not broken at all. The internal batteries are not included. The 13 V DC power cord is included.

I do not have the original manual, but I do have a copy of a manual for the Kenwood TR-2200 which is very close to the same rig.

$65 plus shipping from Florida.

Thanks.

Yahoo group: amatuerradioswapfest
Date: 2003-05-20 22:24:00 UTC
From: Ken Simpson, W8EK
Topic: 673 Message: 673

I have some 220 MHz xtals available. Here is the list:

Transmit:
Clegg FM-76
222.52
222.56
223.06
223.30

Midland 13-509
222.70
222.78
222.94
223.18
223.30

Receive:
Clegg FM-76
224.12
224.16
224.66
224.90
224.94

Midland 13-509
222.18
223.34 (2)
224.30
224.38
224.90

I have been told that both the Clegg and the Midland are basically
the same rig, so xtals for one work in the other.

Crystals are $5 each, plus shipping from Florida.

Thanks.

Topic: 674 Message: 674

CW Keys and Keyers For Sale:

MFJ 422 electronic keyer.
This is the keyer that uses the Curtis chip as the keyer, but includes sidetone, and has adjustments for volume, tone frequency, and weighting, as well as speed. Can be used in fully automatic mode, or semi-automatic like a bug. It will key either positive or negative voltages, and is powered by an internal 9 V battery, or external 5 to 9 volt supply. It is made to go on the back of a Bencher Paddle. $ 60

TenTec KR-50 keyer.
Iambic, with dit and dah memories, if desired.
Built in Iambic paddles, 12 V DC or 110 V AC power, and reed relay output to key most any rig. $ 65

CW "Straight key"
This CW key is sort of a Japanese copy of J-38 key. Not exactly, but sort of! There is no shorting switch, as if we need that anyhow. But it has an oval base that is brass colored. The key is mounted on a wood base, that I think is cedar. Under the wood base is a piece of lead to add weight, so the key will not "walk around". There are also four fairly large rubber feet to keep it from slipping. $30

Prices do not include shipping from Florida.

Thanks. 73,
Ken Simpson, W8EK

Date: 2003-05-26 17:41:13 UTC
From: Ken Simpson, W8EK
Topic: 675 Message: 675

For Sale:

I have two very nice, small SWR bridges for sale.

Both are about 3 1/2 inches wide, 2 inches high,
and 2 1/2 inches deep, and are black in color.
The two SO-239 connectors come out the rear,
and the "set" pot is on the front, along with the
forward-reverse switch and the meter itself.

One says Lafayette on it and the other says Sears.

Take your choice for $18 each, plus shipping
from Florida.

Thanks.

Hi just a suggestion, I am a new member yes but I moderate several lists. You should put all new members on moderated status intel they prove themselves. So anyone who subscribes today and is going to spam the list will be caught before it gets to the list. Anyone who is a genuine poster will get through and once they have posted once or twice you move them to a non moderated status. If you would like I would be happy to help you moderate the list since I sit at work all day infront of a computer

just my .02

AOR AR900 Handheld scanner with Radio Shack scanner antenna, and small
Li-Ion 6V batt.
Scanner always shows low batt, even when hooked to power supply. The
battery
cover clip is also broken, but is intact. The receiver is fine, works
well.
Comes with wall charger and original hard leather case.
Features include:
100 channels
search mode
channel lockout
delay
AM & FM modes (user selectable), unlike the new handheld scanners.
27-54mhz
108-174mhz
406-512mhz
830-950mhz (no gaps)

Serial#7395

$50.00 plus shipping

email direct if interested
thnx

Yahoo group: amatuerradioswapfest
Date: 2003-06-14 22:44:55 UTC
From: Brian Carling
Topic: 697 Message: 697

FOR SALE:

RARE YAESU FL-1000 linear amplifier.
1000 watts input on 80 through 10 meters. Uses Four 6JS6C Tubes.

See:
http://www.alphalink.com.au/~gfs/yaesu/Yaesu2.htm
EARLY YAESU RADIOS

This was used with the early FL-100B and FR-100B series HF radios. Beige case.

Good working condition for its age - very rare item.

Set up for 120V AC operation - all original.
Will need some callsign stickers removed off the front
panel. Peel off and the panel will look almost like new.

Available for $250.00 plus shipping

700. FS; Ameco PT-2 Preselector for HF

Yahoo group: amatuerradioswapfest
Date: 2003-06-15 20:34:48 UTC
From: Brian Carling
Topic: 700 Message: 700

FOR SALE:
AMECO PT-2 Preselector for HF-VHF receivers.

Covers 1.8 through 54 MHz to increase the sensitivity of
any shortwave communications receiver.
This model is also designed so that it can also be used with a TRANSCEIVER and
has automatic switching.

Looks excellent. Ready to plug in and go. 120V AC operation.

Just great for older model tube type receivers, or inexpensive sets that need a
boost.

Will sell for $35.00 plus shipping

FOR SALE:

500 pF at 20 kV doorknob capacitor. QTY 1 only
Will sell for $5.00 plus shipping

BUD Company Neutralizing capacitors
Pair of excellent ceramic-mount variable caps. Classic type.
Great for stabilizing a final amplifier.
Dimensions: each is 2.5" tall and has 1" diameter plates.
Will sell the pair for $12.00 plus shipping.

RF Plate Choke 1
Pi-wound type with 6 sections. Has ceramic mounting and
solder terminals.
Good for approximately 400 watt final amplifier.
Dimensions: 3.5" tall X 2" diameter.
Available for $6.00 plus shipping

RF Plate Choke 2
Pi-wound type with ceramic mounting and solder terminals.
3 sections pi windings, and approximately 2 to 2.5 mH
Good for about 100 to 150 watts.
Dimensions: 2.75" tall X 0.5" diameter.
Available for $4.00 plus shipping

RF Plate Choke, Hammarlund
Pi-wound type new in box, with solder terminals.
Dimensions: 2.375" long X 1.125" diameter.
Looks like about 5 mH inductance.
Good for approximately 300 watt RF final amplifier.
Available for $8.00 plus shipping

Small Vacuum Variable Capacitor
Suitable for VHF applications OR as a neutralizing cap.
Rated for 10,000 V DC.
Dimensions: 3" long X 0.75" diameter.
Uncertain of rating but probably about 10 or 20 pF
Hence very reasonable selling price of $4.00 plus shipping

Barker & Williamson Type 3031 Coils
Two coils only. With original box. One of these appears to
have been used a little.
Dimensions: 2.5" diameter X 6" and 2.5" diameter X 4"
10 turns per inch
Will sell the pair for $15.00 total plus shipping

Pictures and details at:
http://home.cfl.rr.com/happysurfer/miscpart.htm

TenTec Crystal Filters and noise blanker For Sale:

TenTec 219 CW filter.
250 Hz, for the 9 MHz IF. Will work in the older Omni 546,
the newer Omnis in the 9 MHz IF, and in the Argonaut. Like
new, with all of the paper work for $69.

TenTec 218, narrow SSB filter
It is 1800 Hz wide, for the 9 MHz IF, and fits the rigs listed
above. Also like new, with paper work for $ 69

TenTec 285 CW filter
250 Hz, for the 6 MHz IF. Used in the Paragon, newer Omnis,
and others. Also like new, with paper work for $69.

TenTec 220, 2.4 KHz SSB filter.
This filter works in the 9 MHz IF, and is the 8 pole filter that
is used to replace the "standard" 4 pole filter in the Corsair I,
Argosy, etc. It can also be cascaded, and used in a slot for
a 218 filter for steeper skirts. This one is also like new. $75

TenTec 248 noise blanker.
This is the noise blanker that goes in the Omni 546, but not the
newer Omni V or VI. This one has all the paper work with it,
for $50.

Prices do not include shipping from Florida.

Thanks.

732. Alinco DX-70 SSB/CW/FM/AM xcvr FS

Yahoo group: amatuerradioswapfest
Date: 2003-07-14 23:48:52 UTC
From: Ken Simpson, W8EK
Topic: 732 Message: 732

For Sale:

Alinco DX-70, 160 thru 6 meter transceiver

The DX-70 covers 160 thru 6 meters, including the WARC bands, and also has a general coverage receiver. Modes include SSB, CW, FM, and AM. The narrow SSB filter is in it. Of course it has memories, scan, dual VFOs, etc. It is a small unit, ideal for mobile or use in a motor home, but its performance is fine for a base station as well. A 13 V DC power supply at about 20 amps is needed in that situation.

This particular unit works 100% as best I can tell, and looks close
to the same. It is in its original box, and includes all of the things
that it came with originally -- hand microphone, power cord, manual, etc.

$495 plus shipping from Florida.

Thanks.

733. MFJ audio filters FS

Yahoo group: amatuerradioswapfest
Date: 2003-07-16 21:57:16 UTC
From: Ken Simpson, W8EK
Topic: 733 Message: 733

For Sale:

MFJ -751 "Signal Enhancer" tunable CW/SSB filter

This unit is very similar to the Autek QF-1. It has provisions for being a notch filter, a peaking filter, or a low pass filter. The width of the filter can be varied (making it useful on both CW and SSB), and the frequency of the notch, peak, or low pass function can be selected. It is quite versatile. It requires 9 to 18 V DC, and has an input jack, output jack, and a headphone jack on the back. $50

MFJ 720 "Deluxe Super CW Filter"

This is an audio CW filter, but it is fancier than most of the MFJ CW filters. Well, at least the cabinet is fancier.

The filter has an "off" position along with 180 hz, 110 hz, or 80 hz positions on its rotary switch. There is a 1/4 inch phone jack on the front, with RCA jacks on the back for both speaker and input. There is also a 1/8 inch jack for 9 to 18 V DC to power it, so using your regular 13 V DC supply should work just great. $40

On both of these filters, the cabinet is one of the TenTec enclosures that matches the Triton series of rigs. It is wood grain and eggshell white. Of course it will match many other rigs also.

Both are in really great shape. I can not find a scratch on them.

Prices do not include shipping from Florida.

Thanks.

735. FS: Cantenna type dummy load

Yahoo group: amatuerradioswapfest
Date: 2003-07-19 11:43:17 UTC
From: Brian Carling
Topic: 735 Message: 735

FOR SALE:

52 ohm at 1 KW dummy load. Looks just like the
Heath Cantenna but can't say for sure as the label is gone.

Can has a small dent but this does not affect performance.
Has SO-239 connector on top for standard co-ax to attach.

Comes with "Tee" adapter for sampling RF.

Will ship without oil and you add mineral oil.

Available for $10.00 plus shipping.

737. REDUCED: 2 Hammarlund Super Pros

Yahoo group: amatuerradioswapfest
Date: 2003-07-19 12:50:18 UTC
From: Brian Carling
Topic: 737 Message: 737

REDUCED:

Hammarlund Super Pro receivers needing restoration.
I have two of these. Both are missing several tubes, but the dials, transformers, meters etc. all look good.

You might put tubes into one or both and find that they play OK.

Great for "parts rigs."
No covers.
You will need a power supply for these receivers.

eHam reviews:
Considering the 1938 design, the designer was brilliant. It is almost unbelievable radios like this existed 65 years ago. The radio has a so-so xtal filter, however the mechanical coupled I.F. bandwidth control actually works! The 15 watts of high-end quality PP audio using triode connected 6F6s driven by a 6F6 could 'fly' in a modern high-end tube type stereo system. Good sensitivity with a good audio amps equals picking out the signal you want to hear out of the three on top of one another. Some AMers swear by this radio. A SP-400 would perform about the same - N8FVJ

I am one of the AMers who swears by this radio... it has the rich, creamy smooth AM sound and warm tube overtones that you just don't get from most communications receivers. In terms of pleasant audio, I have put it up against an SX28 - and the Hammarlund won. - W1GFH

There were a lot of tire kickers, therefore:
Now reduced to only $65.00 each, plus shipping.

I am told that the models are as follows:
The first one appears to be either an SP-110X or SP-210X.

The second one is a military version of the SPR-210X, a.k.a. BC779.
It has been modifed to use miniature tubes in the RF section
100 kHz to 20 MHz in 5 ranges.

E-mail me for pictures.

MFJ 422 electronic keyer for sale

This is the keyer that uses the Curtis chip as the keyer,
but includes sidetone, and has adjustments for volume,
tone frequency, and weighting, as well as speed. Can
be used in fully automatic mode, or semi-automatic like
a bug. It will key either positive or negative voltages,
and is powered by an internal 9 V battery, or external
5 to 9 volt supply. It is made to go on the back of a
Bencher Paddle. $ 60 plus shipping from Florida.

Thanks.

739. Kenwood TU-6 subaudible tone encoder plus other HT and accessories FS

Yahoo group: amatuerradioswapfest
Date: 2003-07-28 11:25:46 UTC
From: Ken Simpson, W8EK
Topic: 739 Message: 739

For Sale:

Kenwood TU-6 sub-audible tone encoder
for use in the TH-21 / 31 / 41 series of HTs.
With paper work, in great shape, for $40.

Other associated items:

Kenwood TH-21 AT 2 meter HT.
Fully synthesized, small HT, about the size of a deck of
cards. Thumbwheel selection of frequency. Very easy
to use. About 1.3 W in high power and 1/3 W in low power.
This one is in very nice condition. It includes rubber duck
antenna, good battery, charger, and original manual for $65.

Kenwood PB-21 battery pack.
As used on the TH-21 / 31 /41. Very good shape,
in its box, with paper work. $25

Kenwood DC-21 used to operate the TH-21 / 31 / 41
from 13 V DC. Includes cigarette lighter plug, and
voltage converter. With paper work for $25.

AC adapter for TH-21 / 31 / 41 HTs
Wall wort DC supply plugs into wall, and has adapter
that slides on to the HT to use it off of 115 V AC. $ 25

Kenwood SC-6 protective case.
Fits the TH-21 /31 /41 series of HTs.
This will protect the HT in great shape. $ 10

DC adapter used to operate the TH-21 / 31 / 41
from 13 V DC. Includes cigarette lighter plug. $20

Kenwood BH-2 belt clip for the TH-21 / 31/ 41. $ 5

Kenwood RA-8 A "Stubby duck" antenna for the TH-21,
two meter HT. $ 10

Kenwood RA-10 A "Stubby duck" antenna for the TH-41.
440 MHz HT. $ 10

Antenna adapter to fit the connector on the TH -
21 / 31/ 41, and adapt it to standard PL-259
antenna connector. $ 3

Antenna adapter as above, but goes to
BNC connector. $ 3

Prices do not include shipping from Florida.

Thanks.

748. Heath SB-610 monitor scope FS

Yahoo group: amatuerradioswapfest
Date: 2003-08-13 13:43:46 UTC
From: Ken Simpson, W8EK
Topic: 748 Message: 748

For Sale:

Heath SB-610 monitor scope

This item matches the SB line of Heath equipment, and is
made to monitor your transmitted signal, and can also be
used to monitor receive signals. It uses a 3 inch CRT.

This particular unit has a very nice bright trace. I have
used it to monitor transmit signals, and it works fine for that.
I have not used it to monitor receive signals, so can not verify
that part, although I believe everything works fine.
Cosmetically, it look almost like new. No scratches that I
can find, and no paint chips either.

$110 plus shipping from Florida.

Thanks.

752. Alinco DX-70 160 thru 6 m xcvr FS

Yahoo group: amatuerradioswapfest
Date: 2003-08-19 23:14:56 UTC
From: Ken Simpson, W8EK
Topic: 752 Message: 752

For Sale:

Alinco DX-70, 160 thru 6 meter transceiver

The DX-70 covers 160 thru 6 meters, including the WARC bands, and also has a general coverage receiver. Modes include SSB, CW, FM, and AM. The narrow SSB filter is in it. Of course it has memories, scan, dual VFOs, etc. It is a small unit, ideal for mobile or use in a motor home, but its performance is fine for a base station as well. A 13 V DC power supply at about 20 amps is needed in that situation.

This particular unit works 100% as best I can tell, and looks close
to the same. It is in its original box, and includes all of the things
that it came with originally -- hand microphone, power cord, manual, etc.

$495 plus shipping from Florida.

Thanks.

755. 2 meter crystals

Yahoo group: amatuerradioswapfest
Date: 2003-08-21 22:41:08 UTC
From: Ken Simpson, W8EK
Topic: 755 Message: 755

Does anyone have an older two meter rig around
that still needs crystals?

I likely can help. I literally have 100s of both transmit
and receive 2 meter xtals. Most are in the 146 and 147
MHz band segments, with very few in the 145 MHz
segment.

These are all the small HC-25 xtals, like were used in
most of the solid state 2 meter mobiles and HTs.

If you need some, please e-mail the operating frequency
you need. I have them listed by operating frequency and
rig, and not by actual xtal frequency. Send the frequencies
you need (transmit or receive), and the rig that you have,
and I'll see if I can help. I have cross references for the
various rigs, so I will know what you need if you give the
rig. Crystals are $5 each, plus shipping from Florida.

Thanks.

Electronic Keyer and Bencher Paddle For Sale:

MFJ 422 B electronic keyer.
This is the keyer that uses the Curtis chip as the keyer, but includes sidetone, and has adjustments for volume, tone frequency, and weighting, as well as speed. Can be used in fully automatic mode, or semi-automatic like a bug. It will key either positive or negative voltages, and is powered by an internal 9 V battery, or external 5 to 9 volt supply. It is made to go on the back of a Bencher Paddle. $ 50

Bencher BY-1 Iambic Paddle.
True Bencher, and not the MFJ clone. This has the black base, with chrome parts. It works 100 %, and looks like new. $65

Both keyer and paddle above, purchased as one unit for $105.

Prices do not include shipping from Florida.

Thanks.

769. Ebay Buyer beware

Yahoo group: amatuerradioswapfest
Date: 2003-09-19 00:10:18 UTC
From: Rob J
Topic: 769 Message: 769

This is just an FYI for anyone looking to buy radios
and or antyhing else ham related on Ebay. I would warn
anyone NOT to buy from "plumrzbutt". I bought what I
thought was going to be a non DOA TS-430S unit and it
turned out to be nothing more then a door stop. When I
told him what had come to my doorstep he informed me
to bad sale done. I have reported him to Ebay, square
trade and so far neither has done NOTHING for me...
Now I am reporting him to my credit card company. Well
I might have been stuck with a piece of JUNK, but I am
for warning anyone else not to buy from this guy!
Sorry for taking up any bandwidth with trivial stuff,
but I thought I would try to at least make people
beware of this guy! You might be getting a deal, but
with this guy you could be getting nothing but junk
and he isnt going to stand behind it either!

770. FS: Collins Mechanical Filters

Yahoo group: amatuerradioswapfest
Date: 2003-09-20 13:10:26 UTC
From: Brian Carling
Topic: 770 Message: 770

FOR SALE:

Collins I.F. Filters - suitable for R-390A and other radios...

I have 5 filters available:

Type F455-Z5 USB Crystal Filter - $45.00
Type F455-Z4 LSB crystal filter - $45.00
(Use both of the above with a 455 kHz crystal
to receive and generate SSB signals.

Type F500-F94 Mechanical filter (12V2) - $35.00

Type F455-31 Mechanical filter - $35.00

Mechanical filter similar size to above - label missing $10.00

Pictures at:
http://home.cfl.rr.com/happysurfer/miscpart.htm

Main index at:
http://home.cfl.rr.com/happysurfer/trade.htm

There are some great tips on aligning and using the various filters in R-390 and R-390 receivers at:

771. Daiwa VHF/UHF Wattmeter FS

Yahoo group: amatuerradioswapfest
Date: 2003-09-20 13:27:11 UTC
From: Ken Simpson, W8EK
Topic: 771 Message: 771

For Sale:

Daiwa CN-630 Wattmeter
This meter covers from 140 to 450 MHz. It has the
"cross needle" meter so that it reads both forward
and reverse power simultaneously, and hence SWR
as well. Full scale ranges are 20 W and 200 W.
SO-239 connectors on back.

This particular meter works fine and looks fine also.
There is a very light scratch on the top that one can
see if the meter is held just right in the light. Most of
the time it can not be seen. The face is perfect.

$60 plus shipping from Florida.

Thanks.

From: Ken Simpson, W8EK
Topic: 782 Message: 782

Santec HTs and accessories For Sale:

Santec ST-144
Covers 142 to 150 MHz, with 3 power levels.
Approx 3.5 W, 1 W, and 0.1 W. It has 10
memories, including ability to program odd
offsets. 24 hour clock built in to the LCD
display. This unit also has the SS-32 sub-
audible tone encoder in it. Works fine, but
shows its use cosmetically. With both operating
and service manuals for $ 50.

Santec ST-7 T
This HT covers 440 to 450 MHz with thumbwheel
selection of operating frequency. It has 3 power
levels, and includes the SS-32 subaudible tone
encoder. Touchtone pad on front. $ 40

Santec speaker microphone
It has the small round plug (about 3/8 inch)
with 6 pins, as used on most Santec HTs, and
many Wilson and Yaesu HTs. $25

Leather case for most Santec HTs, including ST-7,
ST-142, ST-144, and HT-1200 and maybe others.
This is real Bianci (spelling) leather -- not vinyl. $ 20

DC cord for Santec HTs.
Cigarette lighter plug on one end has special voltage
dropping circuitry. $ 12

Prices do not include shipping from Florida.

Thanks.

783. FS: VHF Dummy Load / Wattmeter MX-1785/U

Yahoo group: amatuerradioswapfest
Date: 2003-09-27 09:12:49 UTC
From: Brian Carling
Topic: 783 Message: 783

FOR SALE:

MX-1785/U Dummy Load / Wattmeter
Air-cooled 52 ohm load will work at all frequencies.
This is a large, heavy-duty, VHF 1000 watt rated dummy load.
Has built-in VHF-UHF wattmeter that covers 20 to 1400 MHz.

R.F. connector has protective cover. Also has hardline connector
plus silver-teflon adapter with protective keeper/socket.
Use with Type 'N' adapter that is supplied with the unit.

The 52 ohm dummy load will also work below 20 MHz.
Meter movement has markings as both 'Hickock 468' and
Bird Electronic Corp.

Excellent, clean condition.
Will sell for $295.00 plus shipping

784. Hustler 4 BTV vertical antenna FS

Yahoo group: amatuerradioswapfest
Date: 2003-09-27 14:34:04 UTC
From: Ken Simpson, W8EK
Topic: 784 Message: 784

For Sale:

Hustler 4 BVT vertical

This is a very heavy duty vertical antenna covering
40, 20, 15, and 10 meters. It can be ground mounted,
or mounted in the air. As with all verticals, more radials
increases performance.

This particular antenna is in good shape, works fine, and
includes the paper work with it for $95 plus shipping from
Florida.

Thanks.

Cox Electronics audio compressor. Great for AM ops.
Use with internal 3 X AA batteries or external 4.5V power
(Not supplied)
Very good condition - $45.00

Heathkit HS-24 speaker
This is the later version of this external speaker
with nice wrinlkle paint. The earlier ones were plain paint
and were not as pretty.
The HS-24 was used with a number of the mobile
transceivers such as the HW-12, HW-101, SB-101 etc.
With cable and is in excellent condition - $35.00

Heathkit SB-600 Speaker
Front looks nice. Case has a few paint chips and marks,
but will clean up nicely. Has a new speaker inside.
Available for $35.00

Heath HP-23 Power Supply
Works great with all of the old Heath radios such as HW-101,
SB-101 etc. Has a little surface rust on the top of transformer,
but otherwise in fairly decent shape. Works FB.
This may also work with some other radios like Collins etc.
Complete with all cables.
Will sell for $55.00

National Radio Company Model SOJ-1 Select-O-Ject
BOOSTS 38 db! REJECTS 38db! On any frequency.
Rare and hard-to-find accessory that is very desirable
for use with all models of National receivers.
http://www.io.com/~nielw/nat_list/selec.htm
(Picture and specifications)
Looks and works great with your National receiver.
A copy of the manual is included.
Available for $125.00 plus shipping

Barker and Williamson Model 426 Low Pass Filter.
Heavy duty construction like all of their equipment.
A top performer for your 1 KW class station with two SO-239 connectors.
Battleship gray color case.
Available for $25.00 plus shipping

Protax 5-position rotary antenna selector switch.
Also has grounding position.
Excellent condition - $45.00 plus shipping

National Radio Company SPP-3 ceramic tube plate caps.
Brand new in unopened bags.
QTY 2 available for $4.00 each

E.F. Johnson Low Pass Filter
This is the 1000 Watt in-line TVI filter. Great condition.
Ready to prevent all of those TVI headaches.
Available for $25.00 plus shipping.

Shipping additional on all items.

From: Tim Carroll
Topic: 790 Message: 790

ADVERTISEMENT

Hello, My name is Timothy Carroll, I live in Allen, TX and Am a Senior in High school. I am a member of several local first responder groups and disaster response teams, one which I captain, I am starting an official REACT Team in my county and am currently out of pocket in terms of radio equipment, as I had to sell most of mine to try and raise money for a used vehicle to get me to and from school; I am still currently working towards my goal, I am writing this post to ask if there is anyone on this list who would be willing to donate any type of radio equipment, new or used, to my REACT team, so that we may monitor as accordingly to the standards set by REACT Intl. we need radio equipment that mainly picks up all bands locally, IE: Scanners, 2M, 10M, and 70CM. as well as CB. Any radio equipment or accessories will be gladly accepted, even the old ancient crystal type equipment. If anyone has anything they are sick of looking at out in their garage or ham shack, and would be willing to donate it to my team, REACT Collin County, Please Email me As to how you may be able to Help, Thanks to all of you who took the time to read this, and have a great day.

God Bless

Timothy Carroll ><>

791. Kenwood MC-85 desk microphone FS

Yahoo group: amatuerradioswapfest
Date: 2003-10-03 00:18:44 UTC
From: Ken Simpson, W8EK
Topic: 791 Message: 791

For Sale:

Kenwood MC-85 desk microphone

This desk mic has the 8 pin plug, and is made to work
with most all of the Kenwood rigs that take the 8 pin
plug. It is a very nice "gooseneck" type mic. This
desk mic is similar to the MC-80, but has provisions
for 3 separate cables, so that it can be used with 3
different radios. It also has a speech compressor built in.
This one is in good shape, no scratches that I can find,
with paper work, for $110 plus shipping from Florida.

Thanks.

Thanks.

801. 13 Volt DC power supplies FS

Yahoo group: amatuerradioswapfest
Date: 2003-10-09 20:16:29 UTC
From: Ken Simpson, W8EK
Topic: 801 Message: 801

13 V DC power supplies For Sale:

TrippLite PR-10 a
This is a 10 amp regulated supply, so it is
good for most 2 meter rigs, etc. $30

DYN, 3 amp
This is a regulated 3 amp supply. It would
be fine for smaller 2 meter rigs, or to eliminate
that tangle of a dozen wall worts that you have
plugged in all over the place. $ 18

Generic 1.2 amp
This is only 1.2 amps, but it is regulated. It would
work for HTs requiring 13 V DC, or to replace the
wall worts. However, it is regulated, which most
wall worts are not. $12

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

804. looking for handheld radio scanner.

Yahoo group: amatuerradioswapfest
Date: 2003-10-11 16:47:46 UTC
From: goshawk
Topic: 804 Message: 804

hello list,
I am looking for a hand held scanner that covers as close to everything as possible on all modes.
something like the AOR r8200MK-ii or the icom R10 sound like what I am looking for, and if they have extras such as software and required cables as well so much the better.
however I also have one extra and rather unusual requirement, as I am totally blind I would like if possible to see the unit first, Firstly so that I can have the controls on the unit pointed out to me so that I know what they all are, and secondly so that I can get an idea if the unit will be ok for a totally blind person to use.
I would also like if possible when purchasing to pay by either fastpay, paypal, nochex or direct bank transfer as I can't write cheques and getting cash is a bit of a pig.

call on 020 8478 5841 or e-mail to,
goshawk.158@...
if you think you have what I am looking for.

Simon

805. FS: VINTAGE JOHNSON RANGER

Yahoo group: amatuerradioswapfest
Date: 2003-10-12 12:24:57 UTC
From: Brian Carling
Topic: 805 Message: 805

FOR SALE: Johnson Ranger Transmitter

75 watts CW and 65 watts phone on 160 through 10 meter bands.
Full metering of all functions, and built-in VFO.

Comes with the manual and an original sales literature.
Good condition. Front panel looks excellent.
I would repaint the case, but it is not dented or beaten up.

Has a new AC power cord. Needs the three long cabinet screws.
May require some additional repairs, but appears to be complete
and in pretty good shape.

Picture available at:
http://home.cfl.rr.com/happysurfer/radios.htm

Available for $325.00 plus shipping

806. FS; Station Accessories

Yahoo group: amatuerradioswapfest
Date: 2003-10-13 12:15:38 UTC
From: Brian Carling
Topic: 806 Message: 806

FOR SALE:

ICDI Military Speaker
For use with 600 ohm military radios.
This device is a powered speaker that has 600 ohm and
high impedance inputs. Has volume control to set level.
It was designed to be used with radios like the R-390 and other military sets.
Switchable input impedance for hi-z and 600 ohm lines.
Comes with AC adapter that provides the needed 48V DC to power
the built-in audio amplifier stage. Rack mountable design.
Tailored for voice communications. Excellent condition.
QTY 1 Available for $40.00 plus shipping

Footswitch
Heavy duty type. has cables attached for switching AC power line
but may be used with other arrangement for radio PTT line etc.
Switch is rated for 250V at 20 Amps.
Excellent coindition and top quality unit.
Qty 1 only available for $16.00 plus shipping.

Antenna Changeover relay 120V AC
Has SO-239 connector and two RCA connectors.
Good for up to 200 watts.
Available for $12.00 plus shippiing.

Radio Shack 12V DC power supply
OPerates on 120V AC line to power your 12v equipment
Rated for 2.5A continuous duty. Fused for protection
Binding posts terminals and fuse are in rear.
Has over-sized heatsink for trouble-free operation.
Will sell for $12.00 plus shipping

MARS SWR Meter
Has forward-reverse power meter that also shows percent.
reflected power. Switchable from 52 ohms and 75 ohms
Uses standard SO-239 connectors.
Very good condition
Will sell for $25.00 plus shipping

Antenna Elevation Rotator Motor
Satellite Ops take note!
This is a nice elevation rotor used for satellite operations.
I have used one of these before with 20 elements 435 MHz
and 10 elements on 144 MHz and they do a great job.
The cross-boom goes through the rotator to equally distribute
weight and support the balanced load.

I have NO CONTROLLER for this rotator.
It needs a Four (4) wire controller.
Appears to be in excellent shape.
Available for $6.00 plus shipping.

811. Hallicrafters Tuning Units For HT-4

Yahoo group: amatuerradioswapfest
Date: 2003-10-18 12:15:21 UTC
From: Brian Carling
Topic: 811 Message: 811

FOR SALE
Hallicrafters Tuning Units For HT-4 / BC-610 Transmitter
A complete set of QTY 7 available with the carrying case.
These were used with the WW2 era Hallicrafters HT-4A through HT-4F.
They are selected from the front panel to cover three frequencies.
Cover all tuning ranges TU-47 through TU-53 cover 160 through 30m bands.
TU-47 Tuning unit, 2.0 to 2.5 MHz
TU-48 Tuning unit, 2.5-3.2 MHz
TU-49 Tuning unit, 3.2-4 MHz
TU-50 Tuning unit, 4-5 MHz
TU-51 Tuning unit, 5-6.35
TU-52 Tuning unit, 6.35-8 MHz
TU-53 Tuning unit, 8-12 MHz

These all have the original, unusual smooth (cool) Hallicrafters black knobs that look like miniature tires.
They all appear to be complete and have not had any parts removed or any 'mods' done.
Will sell for $30.00 each or all seven for $175.00 plus shipping

Pictures & details at:
http://home.cfl.rr.com/happysurfer/radios.htm

Yahoo group: amatuerradioswapfest
Date: 2003-10-22 19:37:14 UTC
From: Brian Carling
Topic: 815 Message: 815

FOR SALE:
Transmitter, Receiver & Keyer.

Classic Heathkit DX-20 Transmitter.
Great little nostalgic CW rig in very good condition.
Crystal controlled, or use with an external VFO.
Uses 5U4 rectifier, 6CL6 oscillator tube and 6DQ6 sweep tube final.
50 watts input on the 80, 40, 20, 15, 11 and 10 meter bands.
Specifications at:
http://www.heathkit-museum.com/ham/dx-20.shtml

All of the knobs are original AND the rare crystal access hole hole cover is here.
Very clean internally. Still has a good, original AC power cord.
The case has no dings or dents. A few minor marks and scratches
here and there, but overall not bad. Has only a few tiny
rust spots. For its age, this is one of the better DX-20s
that I have seen.
Comes with a copy of the manual.
Will sell for $95.00 plus shipping

Now the receiver:
Collins R-388. This is the military version of the 51J3
superheterodyne receiver. Has 18 tubes.
is a 30 band receiver that covers 540 khz to 30.500 MHz The receiver will readout
out to 1 khz for extremely good dial accuracy.
The filter bandwidth ranges from 200 Hz to 6 kHz in 5 steps. The unit is extremely
stable.
Linear tuning, divided into thirty 1 MHz tuning bands.
Built-in crystal calibrator (100 KHz)
Has convenient 4 ohm and 600 Ohm audio outputs.
Power: 85 W at 115 or 230 VAC, 45 to 70 Hz
This unit comes with the top cover and is in excellent condition.
Shipping weight 40 pounds.
Available for $525.00 plus shipping.

And finally a Hallicrafters TO-keyer for Boatanchor CW.
Hallicrafters HA-1 'TO Keyer'
Great for use with tube type transmitters.
Will also work fine with the newer radios.
Excellent working condition - $115.00 plus shipping

Date: 2003-11-05 04:20:44 UTC
From: clausont
Topic: 838 Message: 838

I have for sale one Bendix King EPH5101A handheld radio for sale. It is in excellent shape and superb operation condition.
The EPH5101A features 210 channels that are wideband / narrowband capable on a per channel basis. It covers 144 - 170 mhz and is field programmable or computer programmable or radio to radio clonable. It has a numeric lcd display and dtmf / programming keypad, hi/lo power, scan and priority switches. This radio is a favorite with wildland firefighters and many other agencies. It is known for its super tough durability and reliability.
It is the perfect choice for the ham radio operator who is also in the public safety field whether it is firefighter, paramedic, police officer, search and rescue or many other fields.
This radio gives you the ability to operate in the han band and the public safety band with one radio.
It comes with radio, antenna, rechargable battery, speaker mic and charger. The battery seems to hold a charge but I really don't know how much life is in it.
This package is for sale for $350 plus shipping.
Tim

From: Pete Buehner
Topic: 846 Message: 846

FS: Yaesu FT-757GX and FP757HD/Speaker Power Supply

Before I take it to eBay, I thought I would give make it available here. I have a Yaesu FT-757GX with the matching the FP-757HD (Heavy Duty)/Speaker Power Supply. Both the radio and power supply are in very clean condition, non-smoking environment. It works well in all modes (CW-N & CW-W, USB, LSB, AM & FM), 10 thru 160 and WARC bands ,also including the new 60 meter band (MARS modified), 100w output (25w AM), dual VFO, memories and much more. Looks and sounds great! I would rate both units 9 out of 10. Also included are the operator?s and service manuals, power cable, and the original handheld microphone with up/down buttons. Great looking combination. Selling both units as a set. Excellent adjunct to your existing station ? or even a new primary station. Asking $450.00. You pay shipping from Cleveland, Ohio. Please feel free to email me if you have any questions or would like additional info.

Thanks,
Pete, N8PB

848. TenTec Paragon 585 HF xcvr and accessories FS

Yahoo group: amatuerradioswapfest
Date: 2003-11-10 00:01:08 UTC
From: Ken Simpson, W8EK
Topic: 848 Message: 848

For Sale:

TenTec model 585 Paragon

This rig covers 160 thru 10 meters, including the
WARC bands, and the new 5 MHz band. It has a
general coverage receiver, so also makes a great
short wave receiver. It transmits SSB and CW, and
also has an AM receive mode. The receiver is fantastic,
and the transmitter is great also, with terrific audio.

Of course it has memories, scanning, and all of the
"bells and whistles" one expects. A speech processor
is built in, and it has full QSK on CW.

This particular unit is immaculate. I can not find a scratch
on it, although there is some wear (not scratches) on a
couple of the push button keypad switches, from use.
Of course it works 100%.

The original box, and original manual (with service
information) is included for $700.

TenTec model 961 power supply
This is a 20 amp, 13 V DC power supply, with speaker,
that matches the Paragon (above), plus other TenTec
rigs. It works great, and looks great also. No scratches
or wear that I can find. With paper work for $150.

TenTec hand microphone
I think it is model 700, although it is not written on the
mic. It is an electret condenser mic, with 4 pin plug
that matches any of the TenTec rigs using the 4 pin
plug. Works great, and looks like new. $ 30

All three items above (rig, power supply, and mic)
for $850.

Prices do not include shipping from Florida.

Thanks.

849. FS: Collins 51J3 / R388 Receiver

Yahoo group: amatuerradioswapfest
Date: 2003-11-10 12:55:28 UTC
From: Brian Carling
Topic: 849 Message: 849

Buyer reneged so this is once again available:

Collins R-388 Receiver

Military version of the 51J3 superheterodyne receiver. Has 18 tubes.
Collins R-388 is a 30 band receiver that covers 540 khz to 30.500 MHz
The receiver will readout out to 1 khz for extremely good dial accuracy.
The filter bandwidth ranges from 200 Hz to 6 kHz in 5 steps. The unit is extremely stable.
Linear tuning, divided into thirty 1 MHz tuning bands.
Built-in crystal calibrator (100 KHz)
Has convenient 4 ohm and 600 Ohm audio outputs.
Power: 85 W at 115 or 230 VAC, 45 to 70 Hz
This unit comes with the top cover and is in very good condition.

Available for $525.00 plus shipping.

850. FS: LOT of 8 ROUND Crystals

Yahoo group: amatuerradioswapfest
Date: 2003-11-10 16:28:17 UTC
From: Brian Carling
Topic: 850 Message: 850

FOR SALE:

Round BC3 Type Crystals - Some new in boxes.
These are all larger with standard 3/4" pin-spacing.
1775 kHz (slightly smaller case) New in Box
3581 kHz (slightly larger case)
3854 kHz new in box with data sheet.
7030 kHz
7039 kHz
7040 kHz
7283 kHz new in box
28776 kHz
These eight crystals are available for $12.00 each or I will sell all 8 of them for only $79.00 plus shipping.

First consideration will go to selling these as a group.

If not the whole thing then at least the page for the VCO board.
If you have anything, please email me at: clausont@...
Thanks

853. Larsen VHF and UHF antennas FS

Yahoo group: amatuerradioswapfest
Date: 2003-11-12 22:49:48 UTC
From: Ken Simpson, W8EK
Topic: 622 Message: 853

Larsen VHF and UHF mobile antennas For Sale:

UHF antennas:
LM-450 coil and whip - 5 db gain - new - $ 20

Two meter (VHF) antennas: (3 db gain, except for "Q")
NMO-150 coil only - new $ 16
MFJ NMO-150 equivalent - Black - like new - $12
LM-150 coil only - new $ 16
NLA-150 coil only - slightly used - $14
"Q" - quarter wave whip for LM mount - can be cut for
2 m, 220 MHz, or 440 MHz - $ 5

Antenna mounts:
LM-MM - use with any "LM" mount antenna - $20
Special LM-MM - This LM-MM was modified for use on top
of a mobile home. It has the regular coax replaced
with about 40 feet of RG-8 X coax. $ 30

Add a 49 inch whip available from Radio Shack. It is much easier
to get a whip locally than to ship the long box, but if you
need them, they are $8 each.

(LM is 5/16 inch stud, NMO is "Motorola" mount)

Other 2 meter mag mount antenna:
"Generic" 2 m mag mount $12

Prices do not include shipping from Florida.

Thanks.

859. coax antenna switches FS

Yahoo group: amatuerradioswapfest
Date: 2003-11-18 18:50:55 UTC
From: Ken Simpson, W8EK
Topic: 859 Message: 859

For Sale:

B & W Model 375 coax switch
This will switch up to 6 antennas, grounding all unused
antennas. It has SO-239 connectors, with the coax
going out the back.
This one is good condition. There is a spot on the face
plate where a bit of paint is off, under where a label was
removed. Of course if you put a label in the same spot,
you won't see it! It works 100%. $ 40

Daiwa CS-201
This is two position, with "microline" construction to keep
the impedance constant, and a heavy die cast enclosure.
SO-239 connectors. Unused position is NOT grounded.
This one works 100% and looks great also. $ 22

B & W Model 550 A coax switch
This model will switch up to 5 antennas, and does NOT
ground unused antennas. It has SO-239 connectors,
with the coax coming out like spokes of a wheel.
It is in good condition and works fine. $ 35

Gold Line Model 1042 A coax switch
It looks to be a clone of the B & W 550 A above.
Bracket included for wall mounting.
It works fine and looks fine. $ 25

Prices do not include shipping from Florida.

Thanks.

871. Expanded scale 120 Volt AC meter FS

Yahoo group: amatuerradioswapfest
Date: 2003-11-27 14:28:41 UTC
From: Ken Simpson, W8EK
Topic: 871 Message: 871

For Sale:

RCA WV-120 A meter

This is a fairly large (about 5.5 inch) analog meter
that is used to accurately read AC line voltage. It has
an expanded scale, so that the entire meter reads
from 100 to 140 volts AC, with a large red "120"
right in the middle. Being it is analog, it can show
line voltage variations when different pieces of
equipment (such as motors) are started.

This particular unit works 100%, and compares very
closely to my DMM for accuracy. It looks fine also.

$45 plus shipping from Florida.

Thanks.

881. TenTec digital readout and other accessories FS

Yahoo group: amatuerradioswapfest
Date: 2003-12-08 13:35:58 UTC
From: Ken Simpson, W8EK
Topic: 881 Message: 881

TenTec accessory items For Sale:

TenTec 244 Digital Readout
This is the accessory unit that can be added to many
TenTec analog rigs, to give a digital readout. It is styled
to match the Triton 540, but can be used with other rigs
as well. It has large (approx 3/4 inch high) digits. Paper
work is included for $100.

TenTec 245 CW filter.
Fits any of the Triton series (I, II, IV, 540, and 544), and
has up to 3 levels of filtering (as narrow as 150 Hz).
With the paper work for $50

TenTec 288 SSB crystal filter.
1800 Hz, used for narrow SSB, or wide CW, for the 6 MHz IF.
Used in the Paragon, newer Omnis, and others.
Like new, with paper work for $69.

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

884. FS: Shure 444

Yahoo group: amatuerradioswapfest
Date: 2003-12-11 11:38:14 UTC
From: Brian Carling
Topic: 884 Message: 884

Shure 444 Desk microphone - in good condition.
Highly rated by most hams. A great communications microphone with
increase in response around 2000-3000 Hz. Great intelligibility, along with
undeniable quality. Best mic for SSB. Top of the pack
for communications grade audio.
See:
http://www.eham.net/reviews/detail/9

Comes with instruction sheets.
Will sell for $40.00 plus shipping

Picture & details at:
http://s88932719.onlinehome.us/mics.htm

885. Touchtone (DTMF) microphones FS

Yahoo group: amatuerradioswapfest
Date: 2003-12-13 13:45:45 UTC
From: Ken Simpson, W8EK
Topic: 885 Message: 885

For Sale:

Touchtone (DTMF) microphones

Icom HM-23 touchtone microphone
This hand mic has the 16 digit touchtone pad on it,
and also has "up-down" switches. It has the round
8 pin connector, and will work with most Icom rigs
that use this connector. The HM-23 is the same as
the HM-14, but has a deeper nut on the connector,
so that it can be used on some of the rigs with recessed
connectors, such as the IC-27.
This particular mic is like new. It came from a rig that
is used for packet, so the mic was never used. $ 50

Kenwood MC-48 touchtone microphone.
Round eight pin connector. 16 digit TT Pad on the
back, with up - down switches on the top.
Often used on the 2 m and 440 MHz rigs that
do not have touchtone built in, but can also be
used on HF rigs for TT on 10 m FM.
This one is close to new condition. $ 55

Yaesu YM-23 touchtone microphone
This Yaesu condenser mic has a 16 digit touchtone
pad on it, and a 4 pin mic connector. Used, but
in nice shape. $ 45

Drake 1525 EM Touchtone Microphone
This is the mic that was used to add a touchtone
pad to a lot of rigs in the 70s and 80s. Normal
hand mic from the front, but has a touchtone pad
on the back. Four pin mic plug.
This particular unit has been used, but is in good
shape and includes paper work. $ 40

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

Motorola Radius GP300 UHF 438-470mhz, 16 channel, 4 watt portable with rapid
drop in charger.
The battery is about 60%, due to lack of use.
This was a 8 channel converted to 16 channels. I've had the radio over 10yrs
and have never had a problem. Also comes with heavy duty belt clip.
Asking $175.00 plus shipping. Cont. US Only.
I'm also looking for a late model dual band mobile for possible trade for the radio.
I would be interested in the following models:
Alinco
DR570
DR590
DR599
DR600
DR605TQ

Please email direct if interested.....

thnx

889. x military radios.

Yahoo group: amatuerradioswapfest
Date: 2003-12-15 16:19:44 UTC
From: goshawk
Topic: 889 Message: 889

hello list, I have a few x military radios here, but I don't know what
voltage they need
and they also need power cables.
what I am really looking for is somewhere preferably in the London or Essex
area that deals in this type of gear and that I could take it to in the hope
of getting a power cable and finding out this info.
I really need somewhere I can take it to as I am totally blind and don't
> have the make or moddle numbers of the radios available, and would also
like
> to get hold of a few more but hopefully from somewhere that will actually
know what voltage they need and info like that, and that will also have
things like the power leads with them or available for them.

892. Mobile antennas (HF, VHF, and UHF) FS

Yahoo group: amatuerradioswapfest
Date: 2003-12-24 19:56:40 UTC
From: Ken Simpson, W8EK
Topic: 892 Message: 892

Hustler HF and Larsen UHF and VHF mobile antennas For Sale:

Hustler 54 inch mast:
MO-2 (folds about 28 inches above ball) $22

"Standard" Hustler resonators:
12 meter resonator RM-12 $ 12
10 meter resonator RM-10 $ 12

80 meter "Super" high power resonator RM-80 S $ 38
can be used to convert 4 BTV vertical to 5BTV also

Larsen UHF and VHF mobile antennas:

UHF antennas:
LM-450 coil and whip - 5 db gain - new - $ 20

Two meter (VHF) antennas:
MFJ NMO-150 equivalent - Black - 3 db gain - like new - $12
LM-150 coil only - 3 db gain - new $ 16
Add a 49 inch whip available from Radio Shack. It is much easier
to get a whip locally than to ship the long box, but if you
need them, they are $8 each.

"Q" - quarter wave whip for LM mount - can be cut for
2 m, 220 MHz, or 440 MHz - $ 5

Antenna mounts:
LM-MM - use with any "LM" mount antenna - $20
Special LM-MM - This LM-MM was modified for use on top
of a mobile home. It has the regular coax replaced
with about 40 feet of RG-8 X coax. $ 30

Other 2 meter mag mount antenna:
"Generic" 2 m mag mount $12

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

894. looking for a decent low pass filter for a high power HF setup.

Yahoo group: amatuerradioswapfest
Date: 2003-12-31 01:42:31 UTC
From: goshawk
Topic: 894 Message: 894

hello list,
does anyone have or know where I can get a decent low pass filter for a high power HF setup?
I can find plenty of filters that say they can take up to 1000W but really I could do with one that can take up to 1600W and can't seem to find one anywhere.
if anyone has one or knows where I can get one then please! please! contact me,
you can phone me on 020 8478 5841,
or e-mail to,
goshawk.158@...

Simon

900. the EBAY note

Yahoo group: amatuerradioswapfest
Date: 2004-01-03 15:59:28 UTC
From: Oasis3223@aol.com
Topic: 900 Message: 900

Why would somebody list his stuff of EBAY, then send our list a note that if we want to buy it, we have to go to EBAY?
Why not list it here...?
Bob

911. FS: Amateur Radio Coils

Yahoo group: amatuerradioswapfest
Date: 2004-01-18 13:35:45 UTC
From: Brian Carling
Topic: 911 Message: 911

FOR SALE:

Two Ham Band Plug-in Coils - link coupled type.
Both use a 5-pin socket and have the same base as an 807 tube.
The first is a BUD 40m coil with link coupling, in
excellent condition with a beautiful porcelain base.
The second is a 20m coil marked '20JEL.'
It's nowhere near as pretty as the 40m coil and
the plastic support ribs are a little deteriorated.
However, it could be fixed up easily
I will sell the pair of coils for $15.00 plus shipping

Plug-in coil for 20 meter band.
This one has a standard 4-prong base. Same socket as 811A tube.
QTY 1 available for $5.00 plus shipping.

Ceramic Tank Coil - with variable tap.
18.5 uH final amplifier coil.
Very nice ribbed ceramic form - white and shiny.
Suitable for QRO final, antenna tuner, Hartley project etc.
Comes with a large plug-in 4 prong jack bar and socket.
24 turns of 14 gauge wire on a ceramic ribbed form.
Diameter is 2.5 inches and lenght 3.75 inches.
Pitch is 6 TPI. Form length is 6 inches.
Qty 1 available for $12.50 plus shipping.

Plate RF Choke rated for 2 Amps. QTY 1 only.
Will sell for $12.00 plus shipping

Pictures and details at:
http://s88932719.onlinehome.us/coils.htm

Date: 2004-01-22 02:20:36 UTC
From: Ken Simpson, W8EK
Topic: 915 Message: 915

For Sale:

Heath HM-102 wattmeter.

Covers 1.8 to 30 MHz, with 200 W and 2000 W full scale. It can also be used to check SWR, and has a remote sensor that can either be left inside the meter, or separated from the actual meter by about 3 feet. SO-239 connectors in and out. This particular meter is in very nice shape. It looks very close to new, with no scratches. Paper work included for $45 plus shipping from Florida.

Thanks.

I'm looking for YAESU FT-857 with DSP, PALSTAR AT4K or other stuff (in same condition, like new !) Let me know what you have... TNX, 73 & God bless de Rom.

920. FS: Heathkit SB-610

Yahoo group: amatuerradioswapfest
Date: 2004-01-24 12:38:07 UTC
From: Brian Carling
Topic: 920 Message: 920

For Sale:
Heathkit SB-610 Station Monitor Scope.
Design for use with the Heath SB-line of equipment
such as the SB-101, SB-102 etc., but will also work
with other ham equipment to monitor your modulation
envelope, test your station etc.
This one is in excellent condition electrically, and
it works fine, but the case is a little dirty.
and it needs cleaning.
Comes with the original manual
Priced to sell - at $79.00 plus shipping

Pictures and details at:
http://s88932719.onlinehome.us/radios.htm

921. FS: DX150A Receiver

Yahoo group: amatuerradioswapfest
Date: 2004-01-24 12:54:36 UTC
From: Brian Carling
Topic: 921 Message: 921

Radio Shack Realistic DX-150A Receiver
This is a general coverage shortwave receiver.
Has bandspread dial for the ham bands too.
Covers 530 kHz to 30 MHz. Receives SSB, AM and CW.
Runs on 120V AC or 13.8V DC.
Excellent condition all around. Looks great and
works great too. Comes with manual.
This is the later model with the built-in speaker
and the superior FET front end.
Many extra features.
Available for $85.00 plus shipping.

Picture and details at:
http://s88932719.onlinehome.us/radios.htm

922. FS: Nice Gonset Communicator 6m Rig, white

Yahoo group: amatuerradioswapfest
Date: 2004-01-24 20:15:37 UTC
From: Brian Carling
Topic: 922 Message: 922

FOR SALE:

GONSET Communicator III 6 meter AM transceiver
Comes with the manual and one crystal.
It has been used very little, and was in storage for many years.
This radio is in excellent condition - the best looking cabinet I have seen on one of these radios.
The rig transmits OK, but need minor work on the receiver.
All original knobs etc. No modifications.
Available for $85.00 plus shipping.

Shure 505C Microphone for the Gonset Comm III rig above.
This is a high impedance, controlled magnetic microphone with a PTT button. It is wired for the Gonset - used very little, and comes with original box.
Available for $35.00 or will sell with the Gonset for $25.00

Picture and details at:
http://s88932719.onlinehome.us/radios.htm

926. mega! cb clear out.

Yahoo group: amatuerradioswapfest
Date: 2004-01-29 09:55:20 UTC
From: goshawk
Topic: 926 Message: 926

hello list,
here are lodes of cb bargains that must! go!

Audioline 341 with power echo mic.
this radio only has the standard U.K 40 channels at the moment but can easily have the euro 40 added, this set is fm only, has mic/rf gain and high/low tone controls.
it is in very good condition and full working order and the power echo mic I am including with this has never been out of its box, only ?35.

12 band cobra.
this radio has 12 bands of channels and I believe covers most if not all of the 10-meter band as well as all the 11-meter channels plus some, has fm, cw, am, usb and lsb modes.
has variable power, mic/rf gain, roger bleep, course/fine tuning and I think even a built in swr meter.
radio is in excellent condition and seems to work just fine, only ?85.

pacific 4 band radio with power mic.
this set covers low, mids/euro 40, highs and the u.k band on fm, am, usb and lsb.
has built in swr meter, 2 power levels, course/fine tuning and roger bleep, has a connection on it, I believe for a selcall box or something, comes with almost new power mic and power cable.
both radio and mic are in very good condition and full working order, only ?40.

president basestation 80 channels.
this basestation set covers mids and highs on both fm and am, could probably have a u.k board added, has mic/rf gain knobs, fm/am and mid-high buttons, also has another one which doesn't seem to do anything, can be powered from mains or 12 volt dc.
in very good condition and full working order, only ?45.

midland porterpack x-6.
these 40 channel radios are fm only, can be used as portables with there battery cases, which take 10 AA batteries each and aerials or can be used with any standard mobile or base aerials as they have pl-259 sockets and can take external power at 12 volts dc. I have 6 of these radios and they all come with there original aerials and speaker-mics, 4 of them also have there original shoulder straps as well.
these can be used with other cb mics by adding an external speaker or earpiece, the radios have high or low power for long range or longer battery life and the cases have a facility for recharging rechargeable AA batteries.
all radios are in very good condition and full working order, only ?35 each.

midland porter pack, missing Arial, strap and mic.
same as above, but this radio has no Arial, strap or mic.
apart from that the radio is in full working order, only ?20.

desk power mic.
this desk mic has volume and tone sliders, an audio volume meter and a ptt
with lock switch, it is wired for Audioline/Cobra/Superstar radios.
in very good condition and full working order, only ?15.

all prices are excluding carriage if applicable, and discounts may be
available for multiple purchases.

if interested in any items please call on 020 8478 5841, or e-mail to,
goshawk.158@...
preferred payment methods are nochex, direct bank transfer or cash if you
are collecting your item/items, I will take paypal but please add another 5%
to final total to cover paypal charges.

929. FS: HALLICRAFTERS 'TO' KEYER

Yahoo group: amatuerradioswapfest
Date: 2004-02-02 14:18:24 UTC
From: Brian Carling
Topic: 929 Message: 929

```
Hallicrafters "TO" Keyer
Great for keying high voltage tube rigs.
High speed relay output can handle cathode keying
and grid block keying so it's ideal for the great
'Boatanchor' rigs of yesteryear!
Excellent condition. Comes with the ORIGINAL manual.
Will sell for $75.00 plus shipping
Picture and details at:
http://s88932719.onlinehome.us/radios.htm
```

930. looking for Dragon SS201 SSB Handheld radio.

Yahoo group: amatuerradioswapfest

From: goshawk
Topic: 930 Message: 930

hello list, saw this review and am looking for this radio and can't seem to find it anywhere, does anyone know where I can find it? or does anyone have one of these radios to sell? please let me know.
please call on 020 8478 5841, or e-mail to,
goshawk.158@...
here's the review.

Dragon SS-201 - SSB 10/11m Handheld
Review by Tony Langdon: tlang@...

Who would have thought it has SSB! The case design is the same as
some 2 metre transcievers.The Dragon SS-201 is a little different to
the run of the mill handheld. It operates on 10 metres, instead of
the more traditional 2m or 70cm, and it is capable of AM, FM and SSB
modes. The origins of this radio, like most of the 10m only radios
lie in the 27 MHz CB band, where there is a demand for "export"
radios. While this means there is an increased risk of piracy on 10
metres, it also means there is now no excuse for us amateurs not to
occupy this interesting band, as inexpensive gear such as the Dragon
is now readily available.
First Impressions:

The Dragon was packaged in a professional looking box which looked a
little more "flashy" than the usual bland boxes amateur gear comes
in. Inside was the radio, a battery case (where's the batteries?),
manual, carry strap and, as a nice touch, a 12V cigarette lighter
lead, so the unit is ready to run mobile (assuming you have an
antenna on the car). The manual is "dumbed down" and obviously
intended for those who intend to use the Dragon as a standard 40
channel CB transceiver. No mention is made of the "VFO mode",
repeaters or other amateur specific features, which are activated by
means of a special key sequence once the radio is powered up. It's

worth noting that the channelised mode of the radio, while
defaulting to the standard 40 (US/Australian) CB channels (plus
extra "in between" channels 3A, 7A, etc), actually can be set to
one
of 10 bands, which allows the radio to cover from 25.165 MHz to
29.695 Mhz in 10 kHz steps (eeeek!).

Speaking of powering up, a couple of annoying "features"
immediately
made their presence felt. Firstly, the radio powers up in
channelised mode, tuned to the CB emergency channel (channel 9)
and
in FM(!) mode. Hardly a useful combination for either CB or
amateur
operation. Secondly, a LOUD beep is emitted from the speaker
every
time a button is pressed. Unfortunately, the volume control has
no
effect on the loudness of the beep, which is highly annoying,
and if
you're using headphones, potentially damaging. Can we please
have
the beep before the volume control guys?

While speaking of niggles, two other issues spring to mind.
There is
no battery backup for the radio's memory, so all previously used
data is lost when the radio is turned off, and one has to go
through
the process of setting up VFO mode, the desired frequency,
repeater
offset, mode, etc, which typically requires a dozen keystrokes
and
associated beeping, before the rig is ready for use! Even
pinching a
few microamps from the main battery to keep the operating data
in
memory while the rig is turned off would have sufficed. The
other
annoyance is that setting the volume to minimum does not fully
quieten the radio. A minor quibble.

Back to the battery case. It was a surprise to discover that no
batteries were surprised with the Dragon. Instead, the battery
case
splits open to reveal spaces for 9 AA cells. However, while this
was
an obvious cost cutting measure by the manufacturer, it is an
advantage for the end user. Firstly, one can choose their
preferred
type of battery (I went for 1300 mAh NiMH cells), and secondly,

once
the cells wear out, it's only $30 - $40 for a replacement set of
cells, instead of $100 or more for a new pack. A trickle
charging
circuit is built in, so once the cells are loaded into the pack,
it's like a normal rechargeable battery pack to use.

Once the quirks of the Dragon were sorted out, operation of the
rig
is quite simple and the manual is not really needed, which is
just
as well, as it doesn't cover VFO mode at all. The SS-201 passed
the
"turn on and fly without RTFM" test with ease. However, I did
notice
that the pushbuttons don't seem to be properly debounced, which
can
result in multiple keypresses being registered if you press a
key
once lightly.
On air:

Due to antenna limitations and the home QTH not favouring the
centres of local 10 metre activity, initial operation was on
receive
only. I initially had a listen through the CB channels, and
quickly
found some of the usual loudmouths on 35 LSB. The resolved audio
was
excellent, and the receiver sensitivity seemed to be adequate.
In
addition, any signal above S1 sounded quite strong and clear.
Listening to truckies on AM and the VK3RHF 10 metre repeater
gave
similar results for AM and FM. The SS-201 also proved itself
capable
of easily receiving the beacon and transponder downlink of the
RS-13
satellite, using only a 1.8 metre long helical CB whip antenna
on a
magnetic mount. The receiver does include an RF gain control,
which
I haven't had to use so far, besides verifying that it does
work.
The only negative point about the receiver is that there is no
noise
blanker, which would be useful for mobile operation.
During my satellite tests, a quirk of the tuning system became
obvious. Like a number of other handhelds, the Dragon sports a
"step" button, which is to select the tuning steps (which are
1kHz,

10 kHz and 100kHz). However, unlike other radios, this function doesn't simply alter the tuning steps, but it is actually a 4 position toggle. The normal setting is to tune up and down the VFO range in 10 kHz steps. Pressing the step button drops the radio back to 1 kHz steps, but now, the up/down buttons affect only that digit of the frequncy. Pressing the step button again switches the focus to the 10 kHz digit, and a third press switches to the 100 kHz position. Again, only the highlighted digit can be changed. A fourth press of the step button puts the radio back into normal 10 kHz step tuning mode. This makes some small frequency changes a frustrating exercise, if you need to go from (say) 29.469 to 29.470 MHz. Such a QSY would take several keystrokes instead of the one you'd expect.

Perhaps the most disappointing aspect of the SS-201 is the alignment of the transmitter. The transmitter is obviously aligned with CB operators in mind. The modulation in all modes was set low, especially the FM deviation, which was so low that the transmitted audio is inaudible through the VK3RHF repeater, and barely audible on a scanner in the same room. AM and SSB were somewhat better (i.e. useable), but it still took a good shout to get a reasonably loud signal on AM. Apparently, this is how the Dragons are aligned in the factory, with the especially poor FM result being due to the Tx being conservatively aligned for 1.5 kHz deviation (as used on CB in European countries), instead of the 5kHz that our 10 metre repeaters use. However, at least one distributor will be realigning the radios before they're sold, so this may not be a problem in the future. It is worth noting that what audio that could be heard seemed to be of fairly high quality.

Conclusion:

The Dragon SS-201 is a unique radio with lots of potential and a number of annoying little quirks. For the portable 10 metre operator, it can't be beaten, as there is no other radio on the market with the same degree of portability and versatility (there is another 10m handheld on the market, but it doesn't include FM). If the quirks of the radio were to be addressed by the manufacturer, this could one very good 10 metre rig. Gone are the days where "10 metres pedestrian mobile" meant a converted CB, gell cell and a mobile whip on a golf buggy! The Dragon does it all in one neat package.

Wish List:
Non volatile memory, backup battery or CPU powered from main battery to preserve memory when radio is switched off.
Adjustable volume for keypress beeps.
True VFO operation for all step sizes (1 kHz to 100 kHz), and 100 Hz steps would be nice also.
Tuning knob.
Switchable XIT operation for SSB, to help fill in those annoying 1 kHz gaps.
Memories for popular frequencies (especially repeaters).
VFO operation from 24 to 30 MHz. Afterall, channelised operation starts at 25.165 MHz. It's only a short hop from there down to the 12 metre band (a dual bander, nice!).

Overall rating: 3 out of 5

931. FS: Gonset 6m AM Transceiver

Yahoo group: amatuerradioswapfest
Date: 2004-02-08 14:33:10 UTC
From: Brian Carling
Topic: 931 Message: 931

FOR SALE:

GONSET Communicator III 6 meter AM transceiver
Comes with the original manual and one crystal for 8400 kHz which
works for use at the popular 50.4 MHz AM frequency. It has
been used very little, and was in storage for many years.
This radio is in excellent condition. It is the best looking
cabinet I have seen on one of these radios.
The rig transmits OK, but needs minor work on the receiver.
All original knobs etc. No modifications.

Available for $85.00 plus shipping

Picture at:
http://s88932719.onlinehome.us/radios.htm

932. FS: Heathkit Power Supply

Yahoo group: amatuerradioswapfest
Date: 2004-02-08 22:08:28 UTC
From: Brian Carling
Topic: 932 Message: 932

Boatanchor Mobile Accessory!

Heathkit GP-11 Mobile Power supply.
The GP-11 is rated at 250 VDC @ 100 mils with 6 or 12 VDC input.
That makes it perfect for running a Heath lunchbox rig in the car!
This is a rare item. This power supply was made
to power the Benton Harbor Lunchbox Transceivers (Twoer, Sixer, etc.)
that were made in the 1960s for use on the 2m, 6m, 10m and 11m bands.
It would also work well with other low powered tube radios.
This supply works on 12 Volts and was made for use while mobile.

Has connector for 12v cigar lighter outlet

Available for $39.00 plus shipping

933. DELL FOR TRADE

Yahoo group: amatuerradioswapfest

From: kg4gaf
Topic: 933 Message: 933

FOR TRADE ..I have a Dell Dimension 8100 desktop computer for trade.
I have had the computer for about 3 years and have not had a single
problem with it. It is a 1.2gig, 512mb ram, 40gig HD, 64mb TNT pro
video, CD burner, Boston acustics speakers with subwoofer, Windows XP
home, 17 inch flat LCD monitor with a small place on top the got to
hot from the desk lamp but in no way damaged the screen.
I will consider all kinds of trades, 2m, UHF, 6m, HF, rigs and
amps. I really would like to have a MFJ-259-269 antenna analyzer. Let
me know what you have to trade and maybe we can work something out.

Simon,

After a couple minutes search this is what I came up with. You may have to
do a little digging but the last site below does list a cable.

From: Brian Carling
Topic: 936 Message: 936

FS: RME CONVERTERS ETC.

All of these would be great with a matching RME 4350 Receiver.
I do not have the receiver, just these three accessories.

RME DB-22A PRESELECTOR - covers HF bands
Fairly good condition, complete but untested.
Dial in nice shape. No dents or dings, but case could use paint.
Available for $35.00 plus shipping.

RME HF 10-20 CONVERTER - covers 20, 15, 11 and 10m Bands.
Fairly good condition, complete but untested.
Has output at nominal 7000 kc/s i.f. and a tunable front end.
Dial in nice shape. No dents or dings, but case could use paint.
Comes with ORIGINAL manual.
Available for $35.00 plus shipping.

RME VHF-152A - covers 2m, 6m, 10m and 11m bands.
Fairly good condition, complete but untested.
Has output at nominal 7000 kc/s i.f. and a tunable front end.
Dial in nice shape. No dents or dings, but case could use paint.
Comes with ORIGINAL manual.
Available for $35.00 plus shipping.

RME 4350 Manual Copy - very nice condx.
Will sell for $4.00 plus shipping

938. FS: James Millen Q5er Set

Yahoo group: amatuerradioswapfest
Date: 2004-02-16 15:16:41 UTC
From: Brian Carling
Topic: 938 Message: 938

Designed for Application.

James Millen Company Model 92101 Antenna Matching Preamplifier
Collector item in near mint condition. No scratches or marks.
Comes with plug-in modules for 20m, 15m and 10/11m ranges.
Tuning ranges:
Model 46920 covers 13.0 - 15.0 Mc.
Model 46915 covers 19.0 - 22.5 Mc.
Model 46910 covers 27.0 - 32.0 Mc.

The Millen 92101 is an impedance matching device and broad-band preamplifier which is placed between a receiver and antenna system. The design originally appeared in General Electric Ham News in 1946. This device was known as the R-9'er or Q5'er. Several articles on the R-9'er and its variants appeared in QST and CQ in the late 1940s and early 1950s.
The Millen 92101 uses a 6AK5 vacuum tube for the amplifier and has plug-in tuning units which contains input and output matching coils. Impedance matching is possible via front panel tuning capacitors, which form parallel resonant circuits with the plug-in tuning coils. This rare item is in immaculate condition.

Will sell for $65.00 plus shipping

939. FS: Crystal Calibrator and a Gonset 2m Converter

Yahoo group: amatuerradioswapfest
Date: 2004-02-17 14:20:46 UTC
From: Brian Carling
Topic: 939 Message: 939

FOR SALE:

Palomar Engineers Crystal Calibrator.
This unit has switchable outputs on 5 kHz, 10 kHz,
25 kHz, 50 kHz and 100 kHz.
It requires 4.5V to 5.0V DC for operation and has
screw terminal outputs. Good working condition.
Dimensions approx. 4" X 3" X 1"
Will sell for $26.00 plus shiping

Gonset 2m Converter - Excellent condition.
The tunable front end covers 144 - 148 Mc.
Comes with a copy of the manual, including the schematic.
Will sell for $25.00 plus shipping

940. MFJ 751 active audio filter FS

Yahoo group: amatuerradioswapfest
Date: 2004-02-19 14:09:26 UTC
From: Ken Simpson, W8EK
Topic: 940 Message: 940

For Sale:

MFJ 751 Active Audio Filter

This filter is very similar to the Autek QF-1 filter. It will peak, notch, or act as a low pass filter. The frequency is adjustable, as is the bandwidth. It runs off of 9 to 18 V DC, so power from your regular 13 V DC power supply will work fine. It has an RCA phone jack for input, and another for the speaker. There is also a 1/4 inch jack for headphones.

The unit is in a nice wood grain and eggshell white TenTec enclosure that looks just like new. Of course it works 100%. Paper work included for $40 plus shipping from Florida.

Thanks.

73,

Ken, W8EK

941. FS: Hallicrafters SX-110 and R-48

Yahoo group: amatuerradioswapfest
Date: 2004-02-20 13:28:42 UTC
From: Brian Carling
Topic: 941 Message: 941

FOR SALE:

Hallicrafters SX-110 and R-48

This is a single conversion superheterodyne receiver
with bands covering the 80m, 40m, 20m, 15m and 10m
meter amateur bands, 11 meters citizen's band,
broadcast band 540 - 1680 kc plus 3 shortwave bands
covering 1680 kc - 34 Mc.
Features include a slide rule bandspread dial calibrated
for the amateur bands, separate bandspread tuning,
crystal filter, antenna trimmer, S-meter, one r-f and
two i.f. stages. It has seven tubes plus one rectifier.
Includes crystal filter, variable selectivity and
tone control.

Dimensions: 18 3/4" x 8" x 10 1/4"

Both the radio and speaker are in fairly good working
condition. All original knobs, no dents or dings.
Cabinets have some minor surface pitting and rust here
and there. The R-48 speaker is a match for the
Hallicrafters HT-37 transmitter and the SX-110 / SX-111
receivers. It has an eliptical shaped cone and an
Alinco V magnet.
There is a fidelity switch for music or voice,
and it has 3.2 ohm input impedance.
The dimensions are 6 1/2 x 13 1/4 x 8 1/4 inches.

Will sell the SX-110 for $125.00 plus shipping.
Will sell the R-48 for $60.00 plus shipping.
Will sell both together for $175.00 plus shipping.

http://www.af4k.com/radios.htm

942. Swan 117X, 14C and VX-2 for sale

Yahoo group: amatuerradioswapfest
Date: 2004-02-20 13:56:01 UTC
From: Brian Carling
Topic: 942 Message: 942

FOR SALE: Swan 117X and 14C Power Supplies.

This are the universal Swan power supplies for
117V AC and 13.8V DC as follows:

These are mechanically linked together. Looks like they
could easily be seperated. I am not sure if it was
commonly interconnected this way, but here they are!
There are no cables with the power supplies.
The dual power supply is available for $79.00 plus shipping

I will seperate them if you wish.

Picture:
http://www.af4k.com/imag/ham/SWAN11B.jpg

Swan VX-2 VOX unit - can be used with the Swan 350, 400, 500 etc.
Plug-in unit attachjes to rear of transceiver and has three
variable controls for delay, gain etc. Excellent condition.
Available for $35.00 plus shipping

Picture:
http://www.af4k.com/imag/ham/vx2.jpg

This is older, used electronic equipment that may have
seen many owners. It works now, and it should not arrive DOA.
As such, no guarantee is either expressed or implied.
So don't infer one. I will insure for loss in transit.
If equipment fails to arrive a claim will be filed.

ALL SALES ARE FINAL. I DO NOT OFFER REFUNDS. Make sure
you are getting what you want BEFORE you agree to buy.
Please ask questions and look at the pictures if you are
uncertain. All equipment leaves here as described and is
packed very well.

948. basestation scanners.

Yahoo group: amatuerradioswapfest
Date: 2004-03-09 08:29:29 UTC
From: goshawk
Topic: 948 Message: 948

hello list,
I am looking for a basestation scanner, something with all the bells and whistles.
as far as coverage goes I would like as much as possible on all modes, but I am not really bothered about stuff under 30 MHZ as I have a receiver for all of that already.
one thing I am looking for though is that the scanner must! either be able to speak the frequency it is on or be able to have that option fitted.
I need this as I am totally blind and am getting sick of finding interesting stuff and then losing it as soon as I move on the one I have at the moment.
price is not an issue, I am looking for something top of the range if possible.
if anyone has such a unit that they no longer require, or has any info on where I can get such a unit please let me know either by phone or e-mail.
would prefer to purchase in the u.k if possible but will purchase from anywhere if not possible.
phone on 020 8478 5841, e-mail to,

949. Alinco DX-70, 160 thru 6 m xcvr FS

Yahoo group: amatuerradioswapfest
Date: 2004-03-13 11:40:38 UTC
From: Ken Simpson, W8EK
Topic: 949 Message: 949

For Sale:

Alinco DX-70, 160 thru 6 meter transceiver

The DX-70 covers 160 thru 6 meters, including the WARC bands, and also has a general coverage receiver. Modes include SSB, CW, FM, and AM. The narrow SSB filter is in it. Of course it has memories, scan, dual VFOs, etc. It is a small unit, ideal for mobile or use in a motor home, but its performance is fine for a base station as well.

This particular unit works 100% as best I can tell, and looks close to the same. It is in its original box, and includes all of the things that it came with originally -- hand microphone, power cord, manual, etc.

$450 plus shipping from Florida.

Thanks.

73,

Ken, W8EK

950. TenTec 544 digital Triton HF xcvr and accessories FS

Yahoo group: amatuerradioswapfest
Date: 2004-03-13 12:16:50 UTC
From: Ken Simpson, W8EK
Topic: 950 Message: 950

For Sale:

TenTec Triton IV (Model 544) Digital HF transceiver
Covers 80 thru 10 meters, but not the WARC bands.
Fully solid state, with approximately 100 Watts output power.
Of course it has the great QSK on CW that TenTec is famous for,
along with really great audio. Digital readout.
This one is in good shape. It works 100% as best I can tell.
Cosmetically, it is very, very good. No scratches that I can
find. All original knobs, as well as the tilt up front feet.
With paper work for $ 250

TenTec 262 G power supply, 20 amp, 13 V DC
Cosmetics match the Triton IV (Models 540 and 544), but
it can be used with almost any HF rig. It has a speaker and
VOX built in to it. It works fine, and looks fine.
With paper work for $100

TenTec 245 CW filter.
Fits any of the Triton series (I, II, IV, 540, and 544), and
has up to 3 levels of filtering (as narrow as 150 Hz).
With the paper work for $50

TenTec 700 hand microphone
This is the TenTec hand microphone that can use a 9 V
battery inside, to power the electret condenser microphone
element. This permits it to be used with the rigs that take
the 1/4 inch stereo plug (which is on it now), such as the
Argonaut, Triton, Argosy, early Omnis, etc. It works 100 %
and looks close to new. With paper work for $ 35

Prices do not include shipping from Florida.

Thanks.

952. Kenwood TM-231, 2 m FM xcvr FS

Yahoo group: amatuerradioswapfest
Date: 2004-03-20 11:50:50 UTC
From: Ken Simpson, W8EK
Topic: 952 Message: 952

For Sale:

Kenwood TM-231 A, 2 meter FM xcvr

This 2 m FM rig will receive from about 120 to
170 MHz, while transmitting on the entire 2 meter
band. It has 20 memories, as well as VFO and
"Call" channel. Subaudible tone (PL) encoder is
built in.

The microphone is an MC-44 DM, which includes
a touchtone pad, VFO and memory call, up-down
switch, and a programmable button.

Output power is up to 50 Watts, and is variable in
three steps.

This particular unit works 100%, and looks the same.
Not a scratch or defect of any sort on it. It is still in
its original box, and includes all of the things that
came with it new. It is a really nice unit.

$135 plus shipping from Florida.

Thanks.

953. Cushcraft 4 element 2 m beam FS

Yahoo group: amatuerradioswapfest
Date: 2004-03-20 12:41:23 UTC
From: Ken Simpson, W8EK
Topic: 953 Message: 953

For Sale:

Cushcraft 147-4, 4 element, 2 meter beam

This beam is relatively small (about a 4 foot boom), but still has about 10 db gain. It is made so that it can be attached to a tower by the back of the boom. This method permits easy side mounting for a fixed direction, if so desired. It is drilled so it can be mounted either vertically, or horizontally. It is wideband, and will cover most of 2 meter band with acceptable SWR.

I have two of these beams available.

One is almost like new. It has been in the garage and in the attic. It is $50.

The other has been outside, and is still in good shape, but not quite as nice as the first one. It is $45.

Prices do not include shipping from Florida.

Thanks.

2 meter mobile antennas For Sale:
-
Larsen LM-150 coil only - new $ 16
-
Add a 49 inch whip available from Radio Shack. It is much easier
to get a whip locally than to ship the long box, but if you
need them, they are $8 each.
-
"Q" - quarter wave whip for Larsen LM mount - can be cut for
2 m, 220 MHz, or 440 MHz - $ 5
-
Antenna mounts:
Special Larsen LM-MM - This LM-MM is special for use on top
of a mobile home. It has the regular coax replaced
with about 40 feet of RG-8 X coax. $ 30
-
"Generic" 2 m quarter wave mag mount $12
-
Prices do not include shipping from Florida.
-
Thanks. 73,

From: Ken Simpson, W8EK
Topic: 957 Message: 957

For Sale:

Electro Voice 621/Heath Desk Microphone
This is the brownish colored desk mic that matches fairly
late Heath equipment. Of course the microphone has a
silver colored screen on it. It looks like new, and is still
in its box with warranty card. I can not find a scratch
on it, nor does it have worn paint. $ 75

Turner 350 C hand microphone
This is a Hi Z ceramic hand microphone used on
many of the older rigs. It works fine, and looks
very nice. $35

Electro Voice 600 E hand microphone
This is a low Z hand microphone. It is quite sturdy and
substantial. It has a 1/4 inch stereo plug on it. This
particular mic looks like new, and may, in fact, not been
used. It is in its original box. $ 35

Prices do not include shipping from Florida.

Thanks.

959. Coaxial dipole antennas FS

Yahoo group: amatuerradioswapfest
Date: 2004-04-10 11:56:07 UTC
From: Ken Simpson, W8EK
Topic: 959 Message: 959

For Sale:

Coaxial dipole antennas

These antennas are made from RG-8 X coax cable, instead for regular wire. This makes them more broadbanded, than regular dipoles. They have about twice the bandwidth compared to a dipole made with #14 wire. In addition, they have about 100 feet of RG-8 X coax cable feedline attached, with a PL-259 on the end. They will handle full legal power.

This means these antennas are complete, ready to go. You put them in the air, and are all set.

75 meter version - $ 50

40 meter version - $ 40

Prices do not include shipping from Florida.

Thanks.

963. Dayton Hamvention and GE Mastr Exec II Base stations

Yahoo group: amatuerradioswapfest
Date: 2004-04-20 17:09:17 UTC
From: Paul Finch
Topic: 963 Message: 963

Hello,

I still have some of these UHF Mastr Exec II Base Station radios for sale, my problem is
shipping. These things are heavy! I have no shipping material, if you guys want one of these radios I am going to have them professionally packed for shipment. I think I can get a pretty good deal through a local store here on multiple shipments, let me know.

I am asking $100.00 each or $75.00 for two or more, Less in larger quantities.

Also, I am going to be at Dayton, I will be in spaces 1121 and 1122. If you want one and you or a friend can pick it up there that will be fine, save some shipping cost that way. I will take cash, check with ID or cashiers check.

I will be traveling from Fort Worth, Texas up to Meadville PA. on the 11th and 12th to deliver some other equipment, if you are along that route I can drop a radio or two or three or four (the more the better) off that way also!

There you have it! Several ways to get one or more of these radios, just let me know.

Laid off, just trying to make a living,
Paul

965. Dayton

Yahoo group: amatuerradioswapfest
Date: 2004-05-02 20:17:39 UTC
From: Paul Finch
Topic: 965 Message: 965

Hello,

New items/info below, please check.

Because this stuff is heavy I would prefer not to ship them unless the buyer is willing to pay for professional packing plus the shipping. The two I shipped ran almost $40.00 each for the shipping cost. I would prefer either local pickup or pickup at Dayton or somewhere in between.

While at Dayton, I will be in Flea Market spaces 1121 and 1122. If you want anything listed and you or a friend can pick it up there that will be fine, save some shipping cost that way. I will take cash, check with ID or cashiers check. You can use one of my two-wheel dollies to take the equipment to your vehicles, all I want is a security deposit to use the dollies.

I have to deliver some equipment to Meadville PA. on the 12th of May. I will leave Fort Worthless, Texas May 10th traveling East on I 30 to Little Rock Arkansas. East out of Little Rock on I 40 to Louisville Kentucky, I 71 North out of Louisville thru Cincinnati thru Columbus Ohio to Akron Ohio. I 76 East out of Akron Ohio to I 79 North to Meadville PA. I will return back to the Dayton Hamvention the same route. There will be two of us, both pulling trailers so we can't get to far off the Interstate. If you want any of this stuff before it goes to Dayton and you can meet us along the Interstate send me a email and lets make arrangements.

GE Mastr Exec II UHF base stations, combo number is F155LCS88A, Transmitter is KT125A and the receiver is ER90A. Includes one Tx, one Rx channel element, and Desk Microphone. Discounts on multiple purchases. I have checked out all of these radios and all meet GE's original specifications but refer to disclaimer at bottom of email.

GE Master Pro Voters, clean and full of cards,

GE Mastr II style 6 foot cabinets (empty)

GE Master II Voter Audio Interface racks

GE Master II Repeater controller racks

Motorola 110 watt UHF repeater very clean in 4 foot cabinet with casters, frequency 444.85/449.85 with controller.

Motorola 110 Watt VHF base station on 152.01 MHz very clean.

Motorola Speakers (New in box)

GE Speakers (New in box)

GE Speakers (Used)

800-900 MHz cavities (Wacom)

800-900 MHz cavities (DB Products)

Standard UHF 25 Watt Repeater with duplexer

Standard UHF Synthesized repeater (no duplexer) (Built by Canadian Marconi)

Federal PA 200 and 300 sirens

Whalen Sirens

4-Unipage M-15 Paging terminals (Plus Spare cards)

1 Motorola PURC 5000 test set

RCA Desktop Bases and Repeater (Repeater on 444.85 TX/449.85 RX)

2 Micor VHF exciters

1 Micor VHF 110 Watt PA

Cushman CE-24 RF voltmeter

IFR Front cover

Phillips Wattmeter/Integrated Dummy load, 300 Watt

100 Watt DB Products dummy loads

All equipment is sold-as-is, no warranty expressed or implied although all equipment is in working order or good repairable condition.

Laid off, just trying to make a living,
Paul

974. Roller inductor antenna tuner, 160 thru 6 m, FS

Yahoo group: amatuerradioswapfest
Date: 2004-05-29 12:09:20 UTC
From: Ken Simpson, W8EK
Topic: 974 Message: 974

For Sale:

MFJ 969 roller inductor antenna tuner

Covers 160 thru 6 meters continuously with
the roller inductor, so is ideal for MARS as
well as normal ham use. This tuner will
handle 300 watts, and includes a "cross
needle" SWR/Wattmeter with a nice back light
feature. It also has a built in antenna switch
that allows for switching of up two coaxial
fed antennas, a balanced antenna, or the
internal dummy load. It also allows for
bypassing the tuner. The wattmeter will read
either peak or average power. A 4:1 balun
is included inside.

This particular tuner is like new, still in its box.
It was removed once from the box for testing
purposes. There is not a mark on it. Of course
the paper work is included. You can pay about
$200 from MFJ, or buy this one for $150 plus
shipping from Florida.

Thanks.

Dear members.

I have another thriving group that is in the process of building home built aircraft for up to 2 people.

http://groups.yahoo.com/group/sportplane

they use everything from 2 strokes to vw to subaru to honda to motocycle engines to model A and lastly the corvair flat 6 engine.

The planes are built of either the following materials :

wood, aluminum, 4130 tubing, composite and dope and fabric.

The flight instruments an avionics should be a breeze for you guys to scrounge up and install.

For Sale:

Alinco DR-110 T, 2 meter FM transceiver

This is a small transceiver that features all of the things one would expect in a 2 meter rig these days -- memories, scan features, subaudible tones, odd offsets, touchtone microphone, etc.

I have two of these available. Both work fine, and include the owners manual and service manual. Both also include power cord and touchtone hand microphone.

One has its original box, and includes the misc. hardware that came with it originally, and looks very nice. There are no scratches on the face, or on the top, but a couple on the bottom where they are not visible. This one is $100.

The other one does not have the original box or misc hardware, and has a few scratches on it -- mostly on the bottom. It is $95.

Prices do not include shipping from Florida.

Thanks.

For Sale:

HyGain 3806, 2 meter HT
This is an older HT that is built like a tank. Very
rugged construction and reliability. This particular
unit looks very close to new. It includes the telescoping
antenna that came with it originally, and a battery
tray that takes 8 AA batteries. $25

Protective Case for 3806 HT $10

Antenna adapter cable to go from HT to standard
PL-259 $15

Stubby rubber duck for 3806 $10

Regular length rubber duck for 3806 $10

Prices do not include shipping from Florida.

Thanks.

Whoops -- I cut and pasted too fast! Here is the correct info.

For Sale:

Data Signal "Data Coder 5" DTMF (Touchtone) Hand Microphone

This has a normal Low Z microphone with a 12 digit touchtone pad on the front of the mic. It presently has a 4 pin mic connector on it, but of course this could be changed to whatever would fit your rig. It is in good shape.

$35 plus shipping from Florida.

Thanks.

I am also looking for heatkit multiband HF tube type rigs.

I am trying to set up a good solid tube type Cub, Boy and Eagle Scout and emergency acessible station.

I will take anything on transmitters even if they need cosmetic touch- ups.

I am not able at this time to take in stuff with blown power transfomers as I am doing this for my son, nephew and their two troops as well as any other's troops that want to come in on the weekends and hang out.

I am also looking for 10uh rf chockes like the ones radio shack used to sale and finish Sardine Sender's and Tuna Tin two's.

Also any unfinished hf radio kits to allow the boy's to learn electronics hands on.

The MFJ kits would be great.

All help appreciated.

1000. TenTec Paragon HF xcvr and accessories FS

Yahoo group: amatuerradioswapfest
Date: 2004-08-07 11:23:13 UTC
From: Ken Simpson, W8EK
Topic: 1000 Message: 1000

For Sale:

TenTec 585 Paragon HF transceiver
This rig covers 160 thru 10 meters, including the WARC bands. It has a general coverage receiver, and includes SSB, CW, and AM. An optional FM adapter is available for it. Of course it has digital readout, memories, scan, dual VFOs, PBT, notch filter, etc. 100 Watts output. This particular unit works 100% and looks really great also. Front panel is great. It does have a scratch on the heat sink in the rear. Big inch thick manual is included, as is the original box. TenTec sells these used for $795. This one is just as nice for $650.

Giehl Chip Firmware upgrade for Paragon 585.
This is a new EPROM that essentially upgrades the 585 Paragon to a Paragon II. $60

TenTec 961 Power Supply / Speaker
This matches the Paragon, and also the Corsair II and other TenTec rigs. 13 V DC at 20 amps. This one is in great shape, and includes manual and original box. $160

TenTec 214 desk microphone with stand
This is the "banana" electret microphone with 4 pin connector. Good shape, with paper work, for $70.

TenTec 251 power supply
This is the power supply that was made to go with the Argonaut when used with the 405 linear amp. It is somewhat rare. The 251 will supply 13 V DC at up to 9 amps. It was also used with the Triton I (the 50 W output model), and could be used with any rig needing 13 V DC at up to 9 amps. This styling matches the 505 or 509 Argonaut, the 405 amp, the Triton I and II and others that are the walnut wood grain and eggshell white. This particular one works fine and includes the paper work for $65.

Prices do not include shipping from Florida.

Thanks.

Date: 2004-08-26 22:30:03 UTC
From: Ken Simpson, W8EK
Topic: 1005 Message: 1005

For Sale:

Cushcraft Ten-3 beam

This is a 3 element, 10 meter single band beam.
The manual says it has 6 db gain over a dipole,
but it would seem to me it should have a bit more
than that. The beam breaks down into a package
just over 4 feet long, so it is UPS shippable.

This antenna has been up, and has some normal
weathering; all parts including hardware seem
to be in good usable shape. The entire antenna is
either aluminum or stainless steel, so no rust.
Manual included for $75 plus shipping from Florida.

Thanks.

1020. Vintage meters FS

Yahoo group: amatuerradioswapfest
Date: 2004-10-02 11:46:43 UTC
From: Ken Simpson, W8EK
Topic: 1020 Message: 1020

I have a couple of vintage meters for sale.

The first is a DC only voltmeter. It has 3 scales on
it -- 5, 10, and 25 volts. It says it is a Niehoff Voltmeter,
Chicago, Model T-2. It looks like maybe 1930s vintage.
It is in very good shape, but I do not have the manual for
this one. $ 35

The second is a Weston Model 980 Mark II Analyzer
This is a VOM that appears to be similar to a Simpson 260.
It has ohm scales from R X 1 to R x 10 K, and current
scales from 80 microamps to 800 ma. The voltage scales
go from 1.6 V to 800 V. There are also separate jacks
for 8 amps and for 4000 V DC and 1600 V AC.
I would estimate this to be 50's vintage. $50

Prices do not include shipping from Florida.

Thanks.

1023. Kenwood TW-4000 dual band mobile xcvr FS

Yahoo group: amatuerradioswapfest
Date: 2004-10-10 13:18:01 UTC
From: Ken Simpson, W8EK
Topic: 1023 Message: 1023

For Sale:

Kenwood TW-4000 dual band mobile FM transceiver

Covers 2 m and 440 MHz FM. 25 Watts output, or 5 W
in low power. Of course it has memories, scan, etc.
It has a GASFET front end, giving it a really great
receiver. This would make a great packet rig,
which is what it has been used for. All solid state
switching makes silent packet operation. Since it has
been used on packet, it does not have a mic or mobile
bracket with it, although it takes a standard 8 pin
round mic connector, like most Kenwood rigs. It
needs 13 V DC at 7 or 8 amps to operate. It works
fine, and is good cosmetically, although there are a
few scratches. Manual is included for $125 plus
shipping from Florida.

Thanks.

73,

Ken, W8EK

1024. FS: Alinco DR590T dual band mobile! $150.00

Yahoo group: amatuerradioswapfest
Date: 2004-10-15 18:01:48 UTC
From: PottsLadd13
Topic: 1024 Message: 1024

I have for sale a Alinco DR590T dual band mobile. It is complete with power cable, mic, mounting bracket and manual.
It is 35 watts UHF, 50 watts VHF.
It has two issues:
1. When transmitting with the mic, it has a hum! However it does not do it over crossband repeat.
2. The battery for the memory channels needs to be replaced.

The radio shows its years, but does operate just fine. If interested please email direct.

I'm asking $150.00 plus shipping. Cont. US only.

Lou

1025. Trade, offer or for sale

Yahoo group: amatuerradioswapfest
Date: 2004-10-16 17:34:41 UTC
From: Rev. Johnny Shepherd
Topic: 1025 Message: 1025

This is a commercial Repeater made by Transworld Electronics - RM101 Receiver and TM101 Transmitter with duplexor Transmits on 153.140 and receives on 158.310 with a 67 Hz PL that can be turned on/off. The Transmit audio is low but I think it's a simple fix. Looking for a good cross band repeat radio to trade or what have you? Or make $ offer.

Also have a IC T90A handheld not working - has audio but does not transmit or receive. Looks pretty beat up but will be good for a parts radio. Comes with new battery, original antenna, wall charger and manual. In Orginal box make offer.

Please send all requests to kd5lwu2@...

1032. TenTec Pegasus 550 HF xcvr FS

Yahoo group: amatuerradioswapfest
Date: 2004-10-31 12:19:17 UTC
From: Ken Simpson, W8EK
Topic: 1032 Message: 1032

For Sale:

TenTec Pegasus Model 550 HF transceiver

Covers 160 thru 10 meters, although it can be used
with a transverter for 6 and 2 meters, and will display
the 6 or 2 meter frequency on the screen.

It will transceive SSB, CW, FM, or AFSK, and receive
AM. Of course it is also ideal for digital modes such
as PSK31, pactor, etc. It has 2 VFOs and 1000s of
Memories, and full break-in on CW.

This rig is very close to a "software definable" rig, in
that most of the rig is controlled from the computer and
computer program. There are no knobs on the rig.
Everything is on the computer screen. It makes for
a rig that can be changed by changing the software.
DSP filtering is provided, that is quite effective, so
no crystal filters are needed. Bandwidths go from
300 Hz to 8 KHz, with 1.5 to 1 shape factors, or better.

This particular unit is in excellent condition, with latest
firmware. It looks and performs almost like new. No
scratches, dents, or dings. TenTec operating control
software is included in both 16 bit and 32 bit operating
systems, so you can use an older version of Windows
or the latest version. Of course it has the power cord
and complete manual with it. It needs 13 V DC at
about 20 amps to operate.

$600 plus shipping from Florida.

Thanks.

1037. Vectronics cross needle 160-6 m wattmeter FS

Yahoo group: amatuerradioswapfest
Date: 2004-11-13 12:56:26 UTC
From: Ken Simpson, W8EK
Topic: 1037 Message: 1037

For Sale:

Vectronics PM-30 Wattmeter

This meter has the dual cross needle meter that
will read both forward and reverse power at the
same time. It covers from 1.8 to 60 MHz, so it
is great for the newer rigs that cover from 160 thru
6 meters. It will read either peak or average power
with 300 or 3000 Watts full scale, and is powered
by 12 V DC. Input and output connectors are
SO-239, with a 2.5 mm coaxial connector for the
12 V DC.

This particular meter works 100% and looks very
close to new.

Manual is included for $60 plus shipping from Florida.

Thanks.

1038. Low Pass (TVI) Filters FS

Yahoo group: amatuerradioswapfest
Date: 2004-11-19 00:23:57 UTC
From: Ken Simpson, W8EK
Topic: 1038 Message: 1038

For Sale:

MFJ 702 low pass filter

This filter is made to go on the output of your rig to
help get rid of TVI and harmonic interference. It
is rated at 200 Watts, and is in a very study metal
case with SO-239 connectors on each end. Operating
frequency is listed as 1.5 to 30 MHz. It is a 50 ohm
filter.

This one works fine and looks very close to new.
These are $25 new, but you can have this one for $18

Bencher YA-1, high power, low pass filter

If you need a more heavy duty filter for the output of
your amplifier, this one is ideal. It will take full legal
power, and has at least 80 db signal attenuation at
TV channel 2. It is also in a very sturdy metal case
with SO-239 connectors on each end, and is a 50
ohm filter.

This one works great, and looks almost like new.
These are over $85 new, but this one is only $60.

10 meter bandpass filter For Sale:

TVI filter, made by Communications Power, Inc in the USA.
This appears to be a bandpass filter for use on 10 (or 11)
meters, and is rated at 600 watts. It has provisions for tuning
the input and output for maximum TVI reduction. SO-239
connector on each end. $ 30

Prices do not include shipping from Florida.

Thanks.

1042. Restricted space HF antenna FS

Yahoo group: amatuerradioswapfest
Date: 2004-11-20 12:27:57 UTC
From: Ken Simpson, W8EK
Topic: 1042 Message: 1042

For Sale:

MFJ 1786 Super High-Q Loop Antenna

Ideal for restricted spaces. This antenna is a loop about
3 feet in diameter that can be mounted outside on a pole,
or put in an attic, or other restricted places. It works from
10 thru 30 MHz (that means it covers 30, 20, 18, 15, 12,
an 10 meter bands), and handles 150 watts. A "Super
Remote Control" (MFJ's name for it) is in the shack and
controls the antenna. This controller includes a cross
needle wattmeter/SWR bridge. It will not perform like a
big beam, but is fairly efficient for small spaces.

MFJ sells these for about $380. This one is in good shape
and includes both the loop and controller. The controller
looks close to new. The antenna itself shows some minor
weathering, but is really in quite good shape. The
aluminum even shines in places.

With the paper work for $280 plus shipping from Florida.
Of course pick up would be even better.

Thanks.

From: PottsLadd13
Topic: 1045 Message: 1045

2-Radio Shack VHF handhelds(Mot.SP10's). They are complete with
chargers,
antenna's, and batteries. These are dip switch programmable. I
believe I
have the paper work for the settings, I'll have to dig it up.They
haven't
been used in a while, so batteries may not be at 100% $65.00 for the
pair
plus shipping.

1046. For Trade

Yahoo group: amatuerradioswapfest
Date: 2004-11-27 07:17:28 UTC
From: Rodger
Topic: 1046 Message: 1046

Hello my name is Rodger Severns and I am a new ham operator in Texas and I am looking to trade two radios for one mobile and one handheld. I have a icom ic-207 and an icom ic-v8000 that I would like to trade for a dr-620t , ft-8800r , kenwood tm-g707, or a ic2720h and either a vertex vx-150 or
akenwood th-k2at. Or I may except some other stuff just email me. If interested please email me at
fireman_191@i... or at this email fireman_690@y.... These radios are in good shape the display has been replaced in the ic-v8000 and is in very good shape, plus I have an extra display that I will send with it. I have made a modification to the hm-133 for the ic-v8000 I put a mike hanger piece on the back of it so that it would fit perfect in the mike holder, but does not hamper the performance of the mike. I am very honest I am not trying to rip anyone off. The radios are in good condition and have worked very good for me. I have the ic-v8000 on a shelf and the ic-207 in the truck and I would just like to find one that will do what I want it to do I really want a dual-bander that has alphanumaric display but if not I will settle for one with-out it. I can send pics if you like but my digital cam is not a very good one. Please if anyone can part with there rig and hanheld for two rigs let me know.

Thanks and 73's
Rodger Severns KE5BNV

1047. "Stripline" coax switches FS

Yahoo group: amatuerradioswapfest
Date: 2004-11-28 22:57:58 UTC
From: Ken Simpson, W8EK
Topic: 1047 Message: 1047

For Sale:

"Stripline" 2 position coaxial antenna switches

Both of these coaxial antenna switches are in a heavy
diecast housing that utilizes "stripline" construction
to keep the impedance very close to 50 ohms. It also
permits good operation at higher frequencies.

Both of these switches have SO-239 connectors, with
the common coming out of the front, and the switched
antennas coming out of the back.

Diawa CS-201 Coax Switch
Switches 2 antennas. Unused position is NOT grounded.
This one works 100% and looks great also. $ 22

MFJ 1702 B Coax Switch
This is MFJ's clone of the Diawa CS-201. Unused position
IS grounded, and there is also a third, center position that
grounds both antennas, but not the common. This one
works fine, but cosmetically has some "crud" where the
positions were labeled. $ 18

Also available --
Generic 3 position Coax Switch
This is not stripline construction. It is a small rectangular
box, with the 3 switched SO-239 connectors coming out
the rear, and the common coming out the front. Unused
positions are NOT grounded. It is in very nice condition
for $ 14.

Prices do not include shipping from Florida.

Thanks.

1050. looking for a few bits/spares.

Yahoo group: amatuerradioswapfest
Date: 2004-12-09 13:14:17 UTC
From: goshawk
Topic: 1050 Message: 1050

hello list,
first, I am looking for a good 24V-DC power unit, this is to run some x-army kit I have, and possibly in the future a 24V amp,
I am looking for something with a quite high output, say 20A at least, preferably more if I can get it.
it must be able to run on UK mains voltage, as its input, that's 240V-AC.
second, I am looking for the bottom part of a Sem35 radio, this is the part that the battery box fits in to.
third, am looking for 2X aerials, also for Sem35 radios.
would prefer to pay by either paypal, nochex, or direct bank transfer, as I am totally blind, and can't write cheques or the addresses to send them to, however, if I have enough notice, and you fancy delivering in person, I may be able to get cash, but am making no promises.

if you have any or all of the items that I am looking for, or know where I can get them from, please either call on 020 8478 5841, or e-mail to, goshawk@...
if e-mailing, please do use the above e-mail address, as I have had messages either go missing or get delayed for days through the NTL address, thanks.

Simon

1052. MFJ HF and VHF wattmeter / SWR bridges FS

Yahoo group: amatuerradioswapfest
Date: 2004-12-11 21:03:45 UTC
From: Ken Simpson, W8EK
Topic: 1052 Message: 1052

For Sale:

MFJ HF and 2 meter wattmeter / SWR Bridges

MFJ 816 for HF - (1.8 to 30 MHz)
This unit measures forward power, reverse power,
and SWR from 1.8 thru 30 MHz. It uses a toroid coil
for uniform frequency response across the HF bands,
and features a 2 color meter. SO-239 connectors on
the back for both input and output.
This one works fine and looks close to new. With the
paper work for $25.

MFJ 812 B for VHF - (144 to 230 MHz)
This is similar to the MFJ 816 above, except for VHF,
However, it can be used with reduced sensitivity down
to 21 MHz. It will also serve as a field strength meter
from 1 thru 220 MHz.
This one works fine, and looks like it just came out of
the box. With paperwork for $25.

Buy the matching pair for $45.

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

1053. Many Low Pass (TVI) Filters FS

Yahoo group: amatuerradioswapfest
Date: 2004-12-12 21:30:10 UTC
From: Ken Simpson, W8EK
Topic: 1053 Message: 1053

Low Pass Filters For Sale:

Prevent TVI by putting one of these on your transmitter

Drake TV-3300-LP Low Pass Filter
This is a modern 50 ohm low pass filter to go between your transmitter and antenna, and has been optimized to have more attenuation in the 40 MHz region, where many TVs have their IF. It is good for 1000 Watts "average" according to the manual, and has over 80 db attenuation at 41 MHz. SO-239 connectors on each end. This one looks close to new, and also has the single page "manual" with it. $ 30

Drake TV-1000-LP Low pass filter
This is the filter that is in the copper case, and may also be used on the low end of six meters, as well as HF. It is a 50 ohm filter and is good for 1000 W below 30 MHz, and about 200 W up to 52 MHz. $ 30

Bencher YA-1, high power, low pass filter
If you need a more heavy duty filter for the output of your amplifier, this one is ideal. It will take full legal power, and has at least 80 db signal attenuation at TV channel 2. It is also in a very sturdy metal case with SO-239 connectors on each end, and is a 50 ohm filter. This one works great, and looks almost like new. These are over $85 new, but this one is only $60.

B & W FL-10/1500 (425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters, and will handle 1500 Watts. SO-239 connector on each end. It is in very nice condition for $ 30.

Johnson 250-0020 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut off frequency of 45 MHz and 75 db of attenuation. It is rated to take 1000 Watts of AM, or 5000 Watts PEP SSB. It has SO-239 connectors on each end. This particular unit is in nice shape for $30.

MFJ 702 low pass filter
This filter is made to go on the output of your rig to help get rid of TVI and harmonic interference. It is rated at 200 Watts, and is in a very study metal case with SO-239 connectors on each end. Operating

frequency is listed as 1.5 to 30 MHz. It is a 50 ohm
filter. This one works fine and looks very close to new.
These are $25 new, but you can have this one for $18

TVI bandpass filter, made by Communications Power,
Inc in the USA. This is a bandpass filter for use on 10 (or 11)
meters, and is rated at 600 watts. It has provisions for tuning
the input and output for maximum TVI reduction. SO-239
connector on each end. $ 30

Prices do not include shipping from Florida.

Thanks.

1056. Military PRC-25 / Prc-77 RF Amplifiers For Sale

Yahoo group: amatuerradioswapfest
Date: 2004-12-27 23:29:53 UTC
From: gypsyfever
Topic: 1056 Message: 1056

I offer these to the amateur radio (Military Radio Interest Group) before they are posted on e-bay. I have WORKING units that I have acquired with there battery boxes. These are NOT to be found anywhere else that I know of. A sales person at Fair Radio said they never heard of any ever being produced. They excite with the RF power of the prc-25, or prc-77. They have two output settings, 6 watts, and 30 watts. You can make up a 24 volt battery tray (home brew), or you can provide 24 volts from a power supply. They work great. If you are interested enough to e-mail me for pic's I'll provide what I have for now. These will NOT last I guarantee it. Once they hit e-bay they will disappear in a hurry.
Serious inquires ONLY.
gypsyfever.
PS: These are MILITARY AMPLIFIERS (RF) they look like a small prc-77. One Problem, I have at this time NOT been able to get any documentation on the amps. I am working hard on getting at least a schematic on the unit.

1057. looking for Kenwood ts440 radio please.

Yahoo group: amatuerradioswapfest
Date: 2004-12-29 15:03:03 UTC
From: goshawk
Topic: 1057 Message: 1057

hello list,
am looking for a Kenwood TS440S please.
I am looking for a version with the auto ATU, and if possible the voice readout board, this would be preferable, as I am totally blind.
if possible, I am looking to pay as little as possible for it, as the main reason I want it is as a temporary set, as I can't find the button on my TS-870 to get it to speak the frequency to me, and don't know when I will be able to find this button, I also can't seem to find a tape manual for the 870 either, and I am just sick and tired of having nothing that I can use on HF.
before I got the 870 I had a 440S, so I know where all the controls are, and still have a tape manual for it.

if anyone has one of these radios, or has any ideas on where I can get one on the cheep, please either call me on 02084785841, or e-mail to, goshawk.158@...
thanks in advance.

Simon

Hello
I have a Yaesu FT817 for sale!

This radio was used very little and is in excellent condition ☐
no
blown finals on this radio whatsoever.

Rig comes with both Collins filters and the handy pocket manual. No mods. Does not have 60 Meters.

Asking $535 or trade for an Elecraft K2 with SSB module.

From: PottsLadd13
Topic: 1059 Message: 1059

I have two Radio Shack VHF handhelds, these are the same as the
Radius SP10 radio's. Only difference is the Radio Shack name on the
case. All accessories are the same. They are currently on 154.600.
They come with chargers, batteries and antenna's.
I also have the programming sheets.
They are dip-switch programmable.
These are in very good condition and ready to be used.
$75.00 for the pair plus shipping.
Cont US only.
USPS money orders only

pottsladd13@...

1060. FS: Motorola,Radio Shack, & Nextel

1-Motorola MT1000 Low band portable, 30-36mhz, 99 channel with
battery, charger, and antenna.
Model#-H41GCJ7130AN
This radio is in very good condition. I have pics available if your
interested.
No manual.
$475.00 plus shipping

2-Motorola Radius SP10 1 watt VHF portables. These actually carry the
Radio Shack name, but they are the SP10.
Model#-HUD3171B
These come with chargers, batteries, and antenna's.
I also have the service manual for these units. These are also in
very condition.
$65.00 for the pair, another $10.00 for the manual.

I have for sale 4 i500's and one i700plus. They were all working when
they were removed from service three months ago.
There are two cases and 3 wall chargers.
Although they will need batteries, most are at least 2-3yrs
old.(batteries).Phones were purchased in 2000.
I also have the software and com cable for the above units.
$40.00

Shipping is NOT included in above prices.
Cont. US only.
USPS money orders only!!

I have two dualband radios I would like to trade. First I have a icom ic-207 in real good shape comes with hm-133 mic, Then I have a kenwood tm-v7a in working condition the screen has lines in it but I was told you could send it to kenwood and have it repaired for close to nothing. I am looking for a yaesu ft-8900r in fair condition it can have scratches on it . Please let me know what you think. I will through in a midland handheld 16channel vhf with charger and battery just needs programming battery is not garenteed.
Thanks,
KE5BNV

1063. Yaesu "Landliner" speaker / phone patch FS

Yahoo group: amatuerradioswapfest
Date: 2005-01-29 12:26:34 UTC
From: Ken Simpson, W8EK
Topic: 1063 Message: 1063

For Sale:

Yaesu "Landliner" speaker and phone patch

This is a nice speaker that has a phone patch added
to it. Its styling matches the FT-101 line, but it looks
nice with most any rig. It has a VU meter on it, as
well as controls for both transmit and receive gain.

This particular unit works fine, and looks very nice
as well. $75 plus shipping from Florida.

Thanks.

1066. Forsale Yeasu FT-857B, RF Applications 3KW digital watt meter, Comnet Ericsson VHF HT

Yahoo group: amatuerradioswapfest
Date: 2005-01-31 00:00:27 UTC
From: Carl Walthall
Topic: 1066 Message: 1066

I have the following radio equipment for sale:

1: Panther 625P GP625HSX 136-174 MHz VHF Comnet Ericsson HT with smart desktop charger. Currently programmed for 2 meter ham band, purchaser will need to get programming. There are no scratches on the radio, in like new condition. Specs on radio can be found at this site http://www.vicmobile.com/products/macom/625p.html

$250.00 OBO plus shipping.

2: RF Applications 3KW digital watt meter in like new condition. I purchased the unit when I was thinking about a amplifier, but never purchased one.

$150.00 OBO plus shipping.

3: Yeasu FT-857B HF/VHF/UHF 100, 50, 20 watt output, ATAS 100 Screw driver antenna and four magnet mobile mount.

The unit is working without any problems and was mobile for two months only. I have the box, manual, mike, head seperation kit and mounting hardware. There are some scratches created when first installing in car by the mounting bracket and some glue on the bottom of the head unit. The power cord was also shorten during mounting, and I have lost the original cables for connecting the head unit to the radio. I used the radio at home with the mobile separation cables instead without problems. The ATAS 100 screw driver antenna was removed when the mobile was parked and spent very little time outside so it is in very good condition.

$575.00 OBO plus shipping

I am a motivated seller so please make a reasonable offer if interested.

Thanks Carl

From: PottsLadd13
Topic: 1069 Message: 1069

I have 7 Keynote pagers VHF and one model#D06AHC4411, not sure of exact
model, but also VHF.

All the pagers turn on and were taken of service about 2 yrs ago. These are
all used but do turn on and activate.
They are on 152.720 and I believe 158.100 is what's marked on the pager.

7- Keynotes A03CJB2568AA
1-D06AHC4411

The first $75.00 plus shipping takes them all.

email off group if interested

1070. For Trade

Yahoo group: amatuerradioswapfest
Date: 2005-02-07 09:22:16 UTC
From: Rodger
Topic: 1046 Message: 1070

I have a kenwood dualband tm-v7a that I would like to trade for parts for my laptop. I have a gateway solo 2300 that I need a harddrive and caddy for and a battery. I will trade this mobile for those few things. The only thing wrong with the radio is it has lines through the display but over all you can still read what it says. The first number in the display for the vhf side is not showing up. I don't think it would cost alot to get it fixed but I rreally don't want to deal with it. I just got my ham ticket last year and I already want to get out of the hobby. There is not alot of activity on vhf or uhf in my area of texas. I may trade for other stuff just let me know what you have and I will consider it. But the first person to have the stuff for my laptop will get the radio.

Thanks,
KE5BNV

1071. Ham radio items for sale

Yahoo group: amatuerradioswapfest
Date: 2005-02-07 21:00:52 UTC
From: nickheiniger
Topic: 1071 Message: 1071

Ham radio items for sale;

My father passed away about a year ago, he left me quite a collection of electronic gear and radios.
I never really had too much of an interest in the radio or electronics thing like my father did, so I never was licenced and now I really have no use for the items. On top of things, the company that I work for is promoting me but I have to re-locate. Rather than haul this equipment across the country, stuff I dont use anyways, I've decided to sell it to lighten the load. I had a yard sale, sold a pile of the little items like mobile and hand held radios, tuners antennas - even the tower sold. Some of the people that came by told me to post the stuff on E-Bay, others mentioned yahoo groups and others mentioned newsgroups. Since E-Bay charges an arm and a leg, and I need to get this stuff out of here ASAP, I'll try the "groups".

To make this stuff go quick because I don't have much time to mess around with it, I've priced the stuff cheap to make a quick sale. Also, I'm prefering to use Paypal rather than Money orders, just because of the time issue.

As an added bonus, All items SHIP FREE with insurance and a tracking number. You pay just the amount of the item(s) you want.

So with that said, here is the list of items.

=== Yaesu FT-1000MP Mark V HF tranceiver ===
Beautiful condition, not a scratch, no dust, even comes with a velvet like dust cover that my mother made, includes the manuals, original box, a MD-200 desk microphone and other goodies
Shipped for $1300

=== Icom IC-706MKIIG HF tranceiver ===
This radio is also in good condition. This was used in his car, it had some scratches where the mounting bracket attached. Includes the main unit mounting bracket, remote head mount bracket, the cable, a long power cable, original manuals and paperwork, hand microphone and original box.
Shipped for $500

=== Kenwood TM-V7A FM dual band mobile radio ===
This radio has a huge blue backlit display. Very nice looking not a scratch on it. It was used as a base radio - not mobile. Includes the power cord, manual, mounting bracket original box and hand microphone.
Shipped for $200

=== Kenwood TM-742A multiband FM radio ===
This radio was used in his car also. It has a couple scratches along the sides where the mounting bracket attached. This radio includes the 2 meter, 220 MHZ and 440Mhz modules. It also has the CTCSS module installed. It includes the manuals, original box, long power cord and mounting bracket.
Shipped for $500

=== SGC 500 HF amplifier ===
WOW, this this is built. reminds me of something military built. This 500 Watt HF amplifier was in my fathers car. includes the original box, manual and cables to use it with the ICOM IC-706MKIIG.
Shipped for $750

=== Motorola Radius R100 UHF repeater ===
Model number Q2904B. 25 watt, UHF. Programmed for 442.350. Includes the service manual, programming cable and a disk with software.
Shipped for $200

=== Kenwood TK-880 UHF mobile radios ===
There is 6 of them available. Each has a long power cord, a push button hand microphone, alpha LCD display, can be used for everything from HAM to business to GMRS etc. Maybe even use 2 of them to make a repeater.
Shipped for $200 each === pair shipped for $375 === 4 units for $700 === all 6 for $1000

=== Kenwood TK-380 UHF handheld radios ===
There is 6 of them available. Each has 2 batteries, a drop in charger, a short antenna, a hand microphone, a belt clip, alpha display and can be used for everything from HAM to GMRS to business etc. They can do LTR trunking as well as conventional.
Shipped for $175 each === pair shipped for $325 === 4 units for $600 === all 6 for $900

=== IFR 1500 Comminications Service Monitor ===
I had some help identifing this unit from a person who stopped by the yard sale.
Its a radio tester - 300khz to 1000Mhz, has a signal generator, tracking generator, ocilloscope, spectrum analyzer, power meter and lots more. It has some scratches and wear on the outer case. the front panel is clean and shows little wear. Both of the displays are bright and clear and comes with a AC power cord and a dc power cord and a big manual.
Shipped for $1600

=== Ramsey COM3 Service monitor ===
I had some help identifing this unit from a person who stopped by the yard sale.
Its another radio tester. This one is just your basic service monitor. 100Khz to 1000Mhz, has a power meter, 7 LED digit display, frequency counter and more. Show a lot of wear on the outer case. The front panel is good though. No manual.

Shipped for $500

I can be reached at nickheiniger@...

Thanks

Nick

1072. FS/or Trade: Laptop Computers for Radio Equipment Etc

I have the Following Items Available for Sale. . or for Trade for the following list of items.

I have 3 Dell Inspiron 3800 Notebook Computers. With Windows XP Pro installed. They have mix and matched parts, and specs, so please email for further info. I am selling these for $175 a piece (regular $250 used, Anywhere you go) due to the lack of certain items IE: AC Adapter ($15 online) CD-RW Drives ($30 online) SD Ram ($30 online for 256mb SD RAM) Etc. as said, mix and matched.

I also have the following Notebook computers that can be used for parts, or easy builds. None of them have AC adapters, however, I have used friends AC Adapters for most and have tested all of the to working condition with the exception of a few minor parts.

Dell Inspiron 3500 : needs Battery, AC Adapter, SD Ram
2X ☐ Dell Inspiron 3200. Needs AC Adapter and that is it.
Toshiba Satellite 4080XCDT: Needs Memory and AC Adapter: $75 obo, or trade for one of the items in the list
Toshiba Satellite 4030CDT: Needs Memory and AC Adapter: $65 obo, or trade for one of the items in the list
Toshiba Satellite Pro 415CS: Needs AC Adapter: $35 obo or trade for one of the items in the list
Toshiba Satellite Pro 445CDX: Needs AC Adapter: $35 obo or trade for one of the items in the list
Compaq Armada 110: Needs Memory and a New OS: $75 obo or trade for one of the items in the list

The Following is a list of items I will be willing to trade any of the following items for, just let me know if you are interested in a trade and we will work out details. Most items following are radio equipment or like items.

Scanner Radios:
Uniden BC780XLT
Uniden BC785D
Radio Shack Pro 92,93,95 or 96
Radio Shack Pro 2053, or 2067

Amateur Equipment:
Kenwood TM-V7A Dual Band Transciever
Icom IC-2100H 2M Mobile
Icom IC-V8000 Mobile

Other Equipment:
JottoDesk style Mobile Vehicle Laptop Mount

Mapping Software: MS Mappoint 2k4, MS Streets and Trips 2k5
Motorola Two Way / or 1.7Way Alpha Pager to use with IPN
(www.incidentpage.net)

Also looking for a good Canon SLR Camera, Would like to have Digital
IE: EOS D30/D60/300D, would be willing to trade multiple items for
good photography equipment.

Also looking for a decent Digital Video Camera as well as a Dazzle
Digital Video Capture Device for PC/Notebook computers. Also willing
to trade multiple items for this.

If you are interested in any of the following, please contact me ASAP
as these items will most likely go fast.

From: PottsLadd13
Topic: 1073 Message: 1073

Uniden Bearcat BC780XLT mobile/base Trunk TrackerIII scanner. This is complete with box, manual, power supply, and mounting bracket. $215.00 plus shipping.

Uniden President HR2510 10/11 meter all mode mobile radio. Complete with box, power cable, mic and mounting bracket. $165.00 plus shipping.

7 Keynote pagers VHF and one model#D06AHC4411, not sure of exact model, but also VHF.
All the pagers turn on and were taken of service about 2 yrs ago. These are all used but do turn on and activate.
They are on 152.720 and I believe 158.100 is what's marked on the pager.
7- Keynotes A03CJB2568AA
1-D06AHC4411
The first $75.00 plus shipping takes them all.

Uniden Pro350XL 40 channel CB with scan, channel 9/19 selector,1-4 watt selectable, and weather service receive,(WX). Comes with manual. $35.00 plus shipping

All items are Cont. US only. USPS money orders only.

1074. TenTec Scout xcvr and other TenTec accessories FS

Yahoo group: amatuerradioswapfest
Date: 2005-02-13 20:05:06 UTC
From: Ken Simpson, W8EK
Topic: 1074 Message: 1074

TenTec equipment for sale:

TenTec 555 Scout transceiver
This is a 50 watt HF transceiver, primarily designed
for mobile use, but also nice inside the house. It
has the TenTec variable bandwidth "Jones filter" in
it that is really effective. CW keyer is built in.
This one has the 40 and 20 meter modules with it,
along with power cord and manual. It works fine, and
looks like it just came out of the box. I can not find a
scratch any where on it. $320

TenTec 296 Mobile mount for Scout 555 transceiver
Looks close to new. $30

TenTec hand microphone
4 pin plug used on most recent TenTec rigs.
The mic works fine, and looks like new. $30

TenTec 705 desk microphone
This electret desk mic has the 4 pin connector,
with PTT and "hold" buttons. It works great, and
looks like new. With paper work for $79

TenTec 252 MO power supply, 20 amp, 13 V DC supply.
Matches the Omni series of transceivers. It has an
ammeter on front. It works 100% and looks very good.
No scratches or imperfections. With manual for $ 110

TenTec 280 power supply, 20 amps at 13 V DC.
This supply is one that is not as fancy as some (no speaker)
but is quite heavy duty electrically. It has 2 pass transistors,
instead of the one that some have. It does have an ammeter
on it, but is usually used where the supply is put on the floor,
out of the way. This one works fine, and looks very nice as
well. With paper work for $125.

Prices do not include shipping from Florida.

Thanks.

1075. Bird wattmeter elements and leather cases FS

Yahoo group: amatuerradioswapfest
Date: 2005-02-14 00:05:52 UTC
From: Ken Simpson, W8EK
Topic: 1075 Message: 1075

For Sale:

Bird Model 43 wattmeter elements and leather cases

All work fine and are in very nice condition.

Element 10 B - 10 Watts - 50 to 125 MHz
Element 5 C - 5 watts - 100 to 250 MHz
Element 25 C - 25 watts - 100 to 250 MHz
Element 50 C - 50 watts - 100 to 250 MHz
Element 100 C - 100 watts - 100 to 250 MHz
All of the above are $60 each.

Element 430-107 - 100 mW - 800 to 900 MHz
Element 800-1 - 1 Watt - 800 to 950 MHz
These elements are $85 each

CC-1 BLACK (or Dark Gray, if your prefer)
leather case holds Model 43 wattmeter
and 6 slugs - nice silver lettering - $110

EC-1 - Brown leather case holds 12 slugs - $35

RFDC - Dummy Load with "N" connector
I can not find specs on these, but basically they
are terminations. They look to be good for
maybe 3 watts, but look like they should be
good up into the UHF frequencies. $20

Prices do not include shipping from Florida.

Thanks.

Topic: 1078 Message: 1079

Selling my mosely tri-band beam , i have not used it for some time and maybe someone else can get use out of it. It works excellent and is on a 30 ft tower, rotor does not go with it, i beleive i have the manaul not sure, you take down for $100.00 , im in the massillon, ohio area near canton, ohio, the tower is bolted to my garage so it is only about 10 ft from the garage roof. please e mail me at wc8i@... thanks, Bill

1080. Rigblaster M8 FS

Yahoo group: amatuerradioswapfest
Date: 2005-02-26 13:29:52 UTC
From: Ken Simpson, W8EK
Topic: 1080 Message: 1080

Rigblaster M8 for sale:

I have a Rigblaster with the modular mic connector available. This unit is made to interface the sound card on you computer to your transceiver, especially for using PSK 31 and other digital modes. Your regular microphone plugs into the Rigblaster, so you can switch between the mic and the computer sound card.

It includes the Rigblaster unit itself, the wall wort power supply, manual, and many cables.
It works fine, and looks almost like new. $75 plus shipping from Florida.

Thanks.

1081. Desk Microphones FS

Yahoo group: amatuerradioswapfest
Date: 2005-02-26 23:10:43 UTC
From: Ken Simpson, W8EK
Topic: 1081 Message: 1081

Desk Microphones For Sale:

Shure 444 desk microphone.
The Shure 444 has voice shaping built in to it, with PTT switch on the base. Under the base is a switch for VOX or PTT. This mic is the gray color, works fine, and is in very good shape. It has paper work with it for $ 50.

Astatic D-104 desk microphone
This is the nice chrome "lollipop" microphone that has been used with many rigs over the years. This one has the T-UG8 gray hammertone base with it. It works fine and is in very nice shape. $60

Heath Desk Microphone
This is the brown Heath desk microphone that was sold with the later Heath rigs. I think it is an HDP-121, but I do not find the number on it any place. It has the black Heathkit label, and a PTT bar.
The actual stand is 100% OK, and is in almost perfect condition. No scratches, dings, or even paint wear on this part of it. The actual mic cartridge is good, as it puts out a nice pattern on a scope. The cord is fine, although there is presently no connector on it. There is very slight wear on the Heathkit name plate. $ 75

TenTec 705 desk microphone
This electret desk mic has the 4 pin connector, with PTT and "hold" buttons. It works great, and looks like new. With paper work for $79

Prices do not include shipping from Florida.

Thanks.

1092. Coaxial antenna switches FS

Yahoo group: amatuerradioswapfest
Date: 2005-03-19 14:11:15 UTC
From: Ken Simpson, W8EK
Topic: 1092 Message: 1092

Coaxial antenna switches for sale:

B & W Model 550 A coax switch
This model will switch up to 5 antennas, and does NOT
ground unused antennas. It has SO-239 connectors,
with the coax coming out like spokes of a wheel.
It is in good condition and works fine. $ 30

B & W 593 coax switch
This one switches 3 antennas, and is in a rectangular
Box with all 4 SO-239 connectors coming out the
back of the box. Unused antennas ARE grounded.
This one works fine and is in very nice condition. $30

Generic 3 position Coax Switch
This is in a small rectangular box, with the
3 switched SO-239 connectors coming out
the rear, and the common coming out the front. Unused
positions are NOT grounded. It is in very nice condition
for $ 14.

Coaxial antenna transfer relay for sale:

This is not the normal SPDT DowKey antenna transfer relay,
but it serves the same function. This is an Allied Controls
relay. It says 55476 K-101 on it, and has a 24 Volt DC
coil, although it picks up fine at 18 Volts. It will not pick
up at 12 V DC. It is relatively small, so I doubt it would
handle a KW, but would be fine for 100 or 200 watts.
Its construction looks like it should be good at VHF.

This relay has two SO-239 connections (one is the
common), and a length of RG-58 for the third connection.
It is a bit different than the DowKey relays, but if you
need an antenna transfer relay for the separate transmitter
and receiver in your vintage station, this should do the
job nicely. $30

Prices do not include shipping from Florida.

Thanks.

1097. FS: sets of vhf & uhf radios.

Yahoo group: amatuerradioswapfest
Date: 2005-03-31 08:22:02 UTC
From: goshawk
Topic: 1097 Message: 1097

hello list,
I have 2 sets of handheld radios to clear out as follows.

set of 6 Icom 2 channel VHF handheld radios, plus a single charger, 1 case, and 1 spare battery.
5 of these radios talk to each other, the other 1 doesn't.
can't remember the model of these radios, so will try and include as much other info on them as possible.
they can take headset or speaker mics, and there aerials use a standard BNC fitting, so that you can use other aerials or hook them up to vehicle aerials if required, and spare or replacement aerials should be really easy to get.
these radios are christol controlled, so changing there frequency is not as easy as just getting them programmed, this is why one of them doesn't talk to the other 5, and why the price for all this kit is so low.
I will also include 2 spare aerials for the radios, and a headset & mic.
only asking £95 for this whole lot of kit.

set of 6X SMC 10 channel UHF radios, all with aerials, batteries and cases.
also included are 6X extra batteries, and a mains charger which can take up to 6 batteries, and can be wall mounted.
these radios have seen very little use, and are in extremely good condition.
the aerials have BNC connecters, so can be changed easily, or radios can be connected to mobile aerials if you so wish, and spare or replacement aerials should be very easy to get.
I have never used these radios, so don't really know any more about them, and can't remember the model number of them.
batteries seem to hold charge quite well, don't know about the 6 extra ones, but as the ones on the radios were ok they should be as well.
I also don't know if these radios are programmable or christol controlled, at a guess, I would say programmable, but please don't quote me on that.
this is why the price for all this kit is so low, at only £145 for this whole lot of kit.

if someone wants to take both sets of radios off my hands, I will let them go for only £200.
all prices given do not include carriage if applicable, preferred payment methods are paypal, nochex, direct bank transfer, and cash is also fine if collecting your purchase.

if interested in one or both sets of radios, please either call,
02084785841, or e-mail to,
goshawk@...on.co.uk

Simon

1099. FS: 706MKIIG(reduced), Icom R1 receiver, two base antenna's

Icom IC-706MKIIG w/FL223 SSB filter, and remote installation kit.
Never mobile, non-smoker, no mods!!! Like the day it came out of the
box.
$850.00 shipped! Cont. US Only. USPS money orders only.

Icom R1 handheld comm. receiver in mint condition with original box,
manual, charger and good internal battery. 100khz-1.3ghz no gaps.
$150.00 plus shipping.

Cushcraft AR-6 6 meter base antenna. I believe it is around 3db gain.
$40.00

Diamond X510MA 144/440mhz dual-band base antenna. 8.6db gain
VHF/11.4db gain UHF. $125.00
(Both antenna's won't be taken down until it warms up. They are still
in use at the moment. These are for pickup only.)

All equipment is shipped in cont. US only. USPS money orders only.

Lou

Topic: 1101 Message: 1101

Accessories for Kenwood TS-120/130 and other
Kenwood HF transceivers For Sale:

Kenwood VFO-120 remote VFO
This adds split operation to the TS-120 or TS-130
transceivers. It is in nice shape, works fine, and
includes the cable to plug in to the rig, and the paper
work for $95.

Kenwood AT-120 antenna tuner
Matches the TS-120 or TS-130 cosmetically, but could
be used with any HF transceiver in the 100 Watt class.
It has provisions for "straight thru" operation, and includes
a nice lighted meter. With paper work for $80.

Kenwood MC-50 desk microphone
This is the desk microphone that was used on many
different rigs. It has both high and low impedance
output, so will match most any rig. It has a 4 pin
plug wired for Kenwood, but of course that can be
changed. This one works fine and looks fine.
It includes paper work for $55.

Kenwood MC-35 S hand microphone
This hand microphone is used with most all of the
older Kenwood rigs - TS-120, TS-180, TS-520, TS-820,
etc. It has a four pin plug on it to match these rigs.
Good shape for $40

Small Kenwood hand microphone
This is like the small hand mic that came with the
Kenwood TR-7400. It has the standard 4 pin plug
wired for Kenwood. It is a 500 ohm dynamic mic.
No model number on it, but it looks close to new,
and works fine. If you like a smaller mic, compared
to the MC-35 or MC-30, this is it. $35

YK-88 C, CW filter for Kenwood TS-120/130/430/440, and
many others.
This is a 500 hertz CW filter for the 8.8 MHz IF used in many
of the Kenwood rigs. Actual center frequency is 8830.7 MHz.
It is the solder in type filter, with steep skirts. $70

Kenwood YK-88 SN, narrow SSB filter.
Crystal filter for Kenwood TS-120, TS-130, TS-180,
TS-430, TS-440 and others. 1800 Hz bandwidth. $ 70

Kenwood SP-230 speaker
This speaker has a switch so that it can be used with two rigs.
It also has filtering built in to it to help clear QRM, noise, etc.
It matches the TS-830 and TS-530, as well as other rigs.
This one works 100%, and looks about as close to new as
one can find. It is in its original box, with paper work for $100.

Kenwood heavy DC power cord
This is the actual Kenwood cord, and not a third party
make over. It fits all of the Kenwood (and Icom) rigs
that take the standard 6 pin power plug. $ 20

Prices do not include shipping from Florida.

Thanks.

Low Pass (TVI) filters For Sale:

B & W FL-10/1500 (Also know as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. It is in very nice condition for $ 30.

B & W FL-10/100 low pass filter
Similar to FL-10/1500 above, except power rating is
only 100 Watts. Use this one after your rig, and before
your amplifier. Nice shape for $ 15.

Para Dynamics Corp PDC-98 low pass filter
This filter is a really heavy duty, high power filter.
It starts to cut off just above 10 meters, and
has a notch about 90 db deep on TV channel 2
and 3, and then about 80 db above that. SO-239
connectors on each end. Great condition for $40.

Prices do not include shipping from Florida.

Thanks.

1108. TenTec items FS

Yahoo group: amatuerradioswapfest
Date: 2005-05-14 15:56:18 UTC
From: Ken Simpson, W8EK
Topic: 1108 Message: 1108

TenTec items for sale:

Ten-Tec Pegasus Model 550 HF transceiver

Covers 160 thru 10 meters, although it can be used
with a transverter for 6 and 2 meters, and will display
the 6 or 2 meter frequency on the screen.

It will transceive SSB, CW, FM, or AFSK, and receive
AM. Of course it is also ideal for digital modes such
as PSK31, pactor, etc. It has 2 VFOs and 1000s of
Memories, and full break-in on CW.

This rig is very close to a "software definable" rig, in
that most of the rig is controlled from the computer and
computer program. There are no knobs on the rig.
Everything is on the computer screen. It makes for
a rig that can be changed by changing the software.
DSP filtering is provided, that is quite effective, so
no crystal filters are needed. Bandwidths go from
300 Hz to 8 KHz, with 1.5 to 1 shape factors, or better.

This particular unit is in excellent condition, with latest
firmware. It looks and performs almost like new. No
scratches, dents, or dings. TenTec operating control
software is included in both 16 bit and 32 bit operating
systems, so you can use an older version of Windows
or the latest version. Of course it has the power cord
and complete manual with it. It needs 13 V DC at
about 20 amps to operate. In its original box for $625

TenTec 555 Scout transceiver
This is a 50 watt HF transceiver, primarily designed
for mobile use, but also nice inside the house. It
has the TenTec variable bandwidth "Jones filter" in
it that is really effective. CW keyer is built in.
This one has the 40 and 20 meter modules with it,
along with power cord and manual. It works fine, and
looks like it just came out of the box. I can not find a
scratch any where on it. $320

TenTec 705 desk microphone
This electret desk mic has the 4 pin connector,
with PTT and "hold" buttons. It works great, and
looks like new. With paper work for $75

TenTec 252 MO power supply, 20 amp, 13 V DC supply.
Matches the Omni series of transceivers. It has an
ammeter on front. It works 100% and looks very good.
No scratches or imperfections. With manual for $ 105

TenTec 280 power supply, 20 amps at 13 V DC.
This supply is one that is not as fancy as some (no speaker)
but is quite heavy duty electrically. It has 2 pass transistors,
instead of the one that some have. It does have an ammeter
on it. This one works fine, and looks very nice as well.
With paper work for $125.

Prices do not include shipping from Florida.

Thanks.

1109. Kenwood HF xcvrs FS

Yahoo group: amatuerradioswapfest
Date: 2005-05-21 13:02:10 UTC
From: Ken Simpson, W8EK
Topic: 1109 Message: 1109

Kenwood HF transceivers for sale:

Kenwood TS-180 HF transceiver
This rig covers 160 thru 10 meters. It can include the
WARC bands with a "kit", but this one does not. It is
all solid state, with digital readout, and is a terrific rig.
This one has the DFC in it, and works great. It includes
the extra SSB filter which does two things. It improves
the receive with sharper bandwidth, but it also enables
use of an extremely effective RF speech processor that
is much better than the processor in most of the newer
rigs. The added "punch" is almost like adding a linear
amplifier. This one looks almost like new. It includes
the power cord, and the paper work for $275.

Kenwood TS-120 HF transceiver
This is an 80 thru 10 meter rig solid state CW and SSB
rig with digital readout. It is relatively small, so can be
used mobile. It is your basic "work horse" rig. It works
well, and does a nice job, but does not have a lot of extra
bells and whistles on it to complicate its use. This one is
in nice shape, and includes the power cord and paper
work for $195.

Small Kenwood hand microphone
This is like the small hand mic that came with the
Kenwood TR-7400. It has the standard 4 pin plug
wired for Kenwood., and is a 500 ohm dynamic mic.
It can be used on an HF rig, or a VHF or UHF rig.
No model number on it, but it looks close to new,
and works fine. If you like a smaller mic, compared
to the MC-35 or MC-30, this is it. $30

I have a cable that is used to go between a Kenwood
transceiver, and a linear amplifier, to switch the amp
from transmit to receive. One end has a DIN connector
on it, as is used with most Kenwood rigs. The other end
has an RCA phono plug on it, as used by most linear
amplifiers. Before using this cable, please check to be
certain that the voltages and currents needed by your
amplifier match the switching capabilities of your transceiver.
This cable has a coax between the rig and amp to provide
the relay control. $12

Prices do not include shipping from Florida.

Thanks.

1-Cushcraft AR6, 3db gain 6mtr vertical antenna.
Universal Radio price $74.95

$35.00 for pickup in SE, Pa. only.

pottsladd13@...

AR6 Specifications
Frequency: 50-54 MHz
Gain: 3 dBi
VSWR 2:1 Bandwidth: >2 MHz
Power: 1000 watts FM
Height: 10.1 Feet (3.1 m)
Ring Diameter: 13 inches (33 cm)
Mast Size: 1-1.25 inches (2.6-3.2 cm)
Wind Surface: 0.37 sq. feet
Connector: UHF
Weight: 2.5 Lbs (1.1 kg)
Specifications are subject to change without notice.

1-DiamondX510MA (UHF connector)

The Diamond X510NA was designed for strength and performance and is
pre-tuned to achieve maximum gain in both the 2m and 70cm amateur
bands.
(2m: 3 x 5/8 and 70cm: 8 x 5/8). It has a 3 section fiberglass radome
with
overlapping outer shells for added strength. It comes with stainless
steel
mounting hardware and radials and strong-waterproof joint couplings.

X510NA Specifications
Frequency: 2M/70CM (144-148 and 440-450 MHz)
Gain: 8.3/11.7 dB
Power: 200 watts
Connector: N
Height: 17.2 feet
Weight: 5 Lbs.
Wind Rating: 90 MPH
We also carry the Diamond X510M which is the same antenna, but with
an UHF
(SO239) connector instead of an N connector.

Universal Radio price $188.95.00 new.

$115.00 for pickup or meeting in Se, Pa. only.

From: Ken Simpson, W8EK
Topic: 1112 Message: 1112

For Sale:

Azden PCS-5000 FM transceiver for 2 meters

This 2 meter rig has all the bells and whistles that most modern 2 meter transceivers have -- memories, scan, subaudible (PL) tones, extended band coverage for things like weather frequencies, etc. It has a GASFET front end, for a really great receiver. It includes the DTMF (touchtone) microphone with up-down switches, power cord, and manual.

This unit works well, and looks very close to new.

$90 plus shipping from Florida.

Thanks.

1113. CES 700 touchtone (DTMF) microphone FS

Yahoo group: amatuerradioswapfest
Date: 2005-05-30 13:26:37 UTC
From: Ken Simpson, W8EK
Topic: 1113 Message: 1113

For Sale:

CES Model 700 Touchtone (DTMF) microphone

This is much more than your normal touchtone mic. Although is has the standard touchtone pad on it, it also has an automatic mode, so that up to 8 pre-programmed numbers can be dialed. This has an obvious advantage in mobile use. The keypad also has a nice soft back light for illumination. It needs from 10 to 15 volts DC to function, which makes it great for 13 V DC systems.

This particular unit is unused. It is still in the plastic bag from CES. There is no connector on it at the present time, just like it came from the factory. This means a connector for most any rig can be added. Detailed manual is included for $50 plus shipping from Florida.

Thanks.

Date: 2005-05-30 22:22:48 UTC
From: Ken Simpson, W8EK
Topic: 1114 Message: 1114

For Sale:

Bird Model 43 wattmeter elements and leather case

All work fine and are in very nice condition.

Element 10 B - 10 Watts - 50 to 125 MHz
Element 5 C - 5 watts - 100 to 250 MHz
Element 25 C - 25 watts - 100 to 250 MHz
Element 50 C - 50 watts - 100 to 250 MHz
Element 100 C - 100 watts - 100 to 250 MHz
All of the above are $50 each.

Element 430-107 - 100 mW - 800 to 900 MHz
Element 800-1 - 1 Watt - 800 to 950 MHz
These elements are $75 each

CC-1 BLACK (or Dark Gray, if your prefer)
leather case holds Model 43 wattmeter
and 6 slugs - nice silver lettering - $100

RFDC - Dummy Load with "N" connector
I can not find specs on these, but basically they
are terminations. They look to be good for
maybe 3 watts, but look like they should be
good up into the UHF frequencies. $18

Prices do not include shipping from Florida.

Thanks.

Topic: 1116 Message: 1116

Extremely nice Icom-751A. I am the only owner of this rig. I purchased it new in late 80's. I love the Icom 751A so much that, as you can see from the picture I have two. I thought, years ago, I needed a back up rig. But neither of my 751a's has ever given me a moments trouble. So I am selling one of them. The rig has the--ICOM Prom Non Volatile RAM module for IC-751(A)installed so no more batteries to change to maintain the function memory. I would rate the rig a 9.5, only because there are a couple of scuffs on the paint along the bottom of the rig. Display is bright, calibration was done by Icom a few years ago and is still perfect. All knobs are perfect as is panel lettering. Just a very nice example of the 751A. I also have the matching power supply, "PS-55" for sale with the radio. Comes with the original microphone, owners service manuals for both and all original bills and paperwork. If you have your own power supply no need to purchase this one. Icom 751A is $575.00 + shipping. Power supply is $100.00 additional if you want it. I am experienced in packing this type of equipment, so it will arrive double boxed and safe. No extra charge for packing. You can also see a 3 kw antenna tuner at my web page...

1120. Questions about my homemade 20 meter dipole

Yahoo group: amatuerradioswapfest
Date: 2005-06-09 14:51:52 UTC
From: flyhappy
Topic: 1120 Message: 1120

I built a dipole antenna in my back yard and its for 20 meters. I put poles at both ends that are about 15 feet high and my dipole is a "V" type and its lowest feed area is about 10 feet. What would you think my radiation pattern be. I read that most dipoles are inverted "V"'s but my is a normal "V" type. Does that matter? I don't have more than about 30 degrees between feed and the ends. I get about a 1.4 to 1 swr reading. Do you have any comments or ideas about my antenna?

1121. Re: [Amatuer Radio Swapfest] Questions about my homemade 20 meter dipole

From: Oasis3223@aol.com
Topic: 1121 Message: 1121

I'm no antenna expert, but i think you would be better off stretching the thing tight, and going with a flot top dipole, 15 feet high all the way across. I see no advantage in having the feed point 10 feet off the ground.
Bob

1122. 2m and 440 MHz mobile antennas FS

Yahoo group: amatuerradioswapfest
Date: 2005-06-11 12:49:23 UTC
From: Ken Simpson, W8EK
Topic: 1122 Message: 1122

Larsen Mobile Antennas For Sale:

All of these work fine. There are different degrees of
cosmetics, which is why they are priced differently. All
of a same type function the same electrically.

Coils for 5/8 wave VHF (2 meter) antennas:

Larsen NLA-150 coil only
These fit the Larsen NLA mount and have about 3 db gain.
Appear to be unused - $14
Used, but in very good shape - $12
Used, but weathered more - $10

The whips for these are hard to ship, and it is best to pick
up a whip at your local Radio Shack, or similar store. I do
have some whips. They are $5 each if you need them.

Larsen NLA-450 coil and "stacked" whip combination
These fit the Larsen NLA mount, and have about 5 db gain
on the 70 cm band.
Appear to be unused - $18
Used, but nice shape - $16
Used, but weathered more - $14

Larsen "OM" coils and mounts
These are made to mount on a flat surface, and require 3
mounting bolts, plus a hole in the center for the coax.
OM-150 - For 2 meters - requires 5/8 wave whip for 3 db gain -
used - $15
OM-450 - For 70 cm band - includes "stacked" whip for 5 db gain -
used - $20

Larsen "Q", quarter wave whip for Larsen LM mount.
Can be cut for 2 m, 220 MHz, or 440 MHz
Includes mounting nut for LM mount.
Close to new condition - $ 5

Mobile antenna mounts for sale:

Hustler TLM Trunk Lip Mount
Takes a standard 3/8 inch 24 thread antenna
Ball will tilt, if needed. With coax for $18

Prices do not include shipping from Florida.

Thanks.

1124. Roller inductor antenna tuner FS

Yahoo group: amatuerradioswapfest
Date: 2005-06-12 11:43:03 UTC
From: Ken Simpson, W8EK
Topic: 1124 Message: 1124

For Sale:

MFJ 969 roller inductor antenna tuner

Covers 160 thru 6 meters continuously with
the roller inductor, so is ideal for MARS as
well as normal ham use. This tuner will
handle 300 watts, and includes a "cross
needle" SWR/Wattmeter with a nice back light
feature. It also has a built in antenna switch
that allows for switching of up two coaxial
fed antennas, a balanced antenna, or the
internal dummy load. It also allows for
bypassing the tuner. The wattmeter will read
either peak or average power. A 4:1 balun
is included inside.

This particular tuner is like new. There is not
a mark on it. Of course the paper work is
included. You can pay about $200 from MFJ,
or buy this one for $145 plus shipping from Florida.

Thanks.

From: PottsLadd13
Topic: 1125 Message: 1125

I have a Vertex Standard VXA-210 Pilot w/SU-1 sensor for sale. It is in very good condition with very little use. The battery is in great shape
and the radio is ready to be put into service.
I have pics available if for those that are interested.
$225.00 plus shipping Cont. US only.

Includes the following:

Ni-Cad Battery Pack FNB-64 (7.2V 700 mAh)
Overnight Charger NC-77B/C
Helical Antenna ATV-7
Headset Cable Adapter CT-60
Operating Manual
Belt Clip

Also included is the SU-1** Barometric Pressure Sensor. ($40.00 option)

--

General Specifications
VXA-210

Number of Channels
150 Channels

Frequency Range TX Com:
118.000 - 136.975 MHz
Frequency Range RX NAV:
108.000 - 117.975 MHz
Frequency Range RX Com:
118.000 - 136.975 MHz
Frequency Range WX:
(WX-01 - WX-10) : USA version only
Channel Spacing 25 KHz
Emission Type TX: AM
Emission Type RX: AM & FM
Power Supply Voltage
6.0 - 15.0 VDC
Current Consumption (approx.) 65 mA (squelch on)
190 mA (receive)
1 A (transmit 1.5 W Carrier)

Ambient Temperature Range +14° F to + 140° F (-10° C to + 60° C)

RF Input-Output Impedance 50 Ohms

Dimensions (WxHxD): 2.3" x 4.3" x 1.18" w/FNB-64 (58 x 109 x 30 mm)

Weight (approx.) 12 oz (340 g) with FNB-64, antenna, and belt clip

Receiver Specifications Measurements made per EIA standard TIA/EIA-603

Circuit Type Double Conversion Super-heterodyne

IFs 35.4 MHz and 450 KHz

Sensitivity < 0.8 u V (for 6 dB S/N with 1 kHz, 30 % modulation)
Selectivity < 8 kHz/-6 dB

Adjacent Channel Selectivity < 25 kHz/-60 dB

Audio Output 400 m W @ 8 Ohms, 10 % THD

Transmitter Specifications Measurement made per EIA standard TIA/EIA-603

Power Output (@7.2 V): 5.0 W PEP / 1.5 W (Carrier Power)

Frequency Stability Better than ±10 ppm (+14 °F to +140 °F)

Modulation System Low Level Amplitude Modulation

Spurious Emission > 60 dB below carrier

Int. Microphone Type Condenser

Ext. Mic Impedance 150 Ohms

1126. Heath SB-303 receiver FS

Yahoo group: amatuerradioswapfest
Date: 2005-06-12 15:18:40 UTC
From: Ken Simpson, W8EK
Topic: 1126 Message: 1126

For Sale:
-
Heath SB-303 receiver
-
This is the solid state receiver, with solid state LMO that
covers 80 thru 10 meters (no WARC bands), plus 15 MHz
for WWV. It matches all of the Heath SB line, and can be
used with a Heath SB-400 or SB-401 to transceive together.
-
This particular unit works, but it could stand some cleaning.
Apparently it was stored in the garage of a silent key, and
has a fair amount of dust. The xtal calibrator gives a good
solid S 9 signal, which has always been a good means of
indicating that the receiver was working OK. Some of the
controls are dirty; a bit of "deoxit" would probably improve
it considerably.
This is the SB-303 receiver only, with no accessories.
$110 plus shipping from Florida.
-
Thanks. 73,
Ken Simpson, W8EK

1137. Large 2 meter beams FS

Yahoo group: amatuerradioswapfest
Date: 2005-07-02 12:37:16 UTC
From: Ken Simpson, W8EK
Topic: 1137 Message: 1137

Large 2 meter beam antenna for sale:

Cushcraft 147-22 beam

This is a pair of 11 element 2 meter beams stacked
to give a total of 22 elements.

Each 11 element beam is about 12 feet long, and the
two are separated by a 5 foot boom. To put it another
way, the antenna occupies a 12 by 5 foot rectangle.

Because of the size, this is pickup only in the Ocala, FL
area. For transportation, it can easily be disassembled
into each beam by itself, and the boom, and then easily
carried on top of a minivan, or whatever.

Paper work and all hardware, coax phasing lines, etc.
are included for $200.

Thanks.

1138. TenTec Pegasus HF xcvr FS

Yahoo group: amatuerradioswapfest
Date: 2005-07-04 23:01:13 UTC
From: Ken Simpson, W8EK
Topic: 1138 Message: 1138

Ten-Tec Pegasus Model 550 HF transceiver

Covers 160 thru 10 meters, although it can be used
with a transverter for 6 and 2 meters, and will display
the 6 or 2 meter frequency on the screen.

It will transceive SSB, CW, FM, or AFSK, and receive
AM. Of course it is also ideal for digital modes such
as PSK31, pactor, etc. It has 2 VFOs and 1000s of
Memories, and full break-in on CW.

This rig is very close to a "software definable" rig, in
that most of the rig is controlled from the computer and
computer program. There are no knobs on the rig.
Everything is on the computer screen. It makes for
a rig that can be changed by changing the software.
DSP filtering is provided, that is quite effective, so
no crystal filters are needed. Bandwidths go from
300 Hz to 8 KHz, with 1.5 to 1 shape factors, or better.

This particular unit is in excellent condition, with latest
firmware. It looks and performs almost like new. No
scratches, dents, or dings. TenTec operating control
software is included in both 16 bit and 32 bit operating
systems, so you can use an older version of Windows
or the latest version. Of course it has the power cord
and complete manual with it. It needs 13 V DC at
about 20 amps to operate. In its original box for $625

Other TenTec items:

TenTec 705 desk microphone
This electret desk mic has the 4 pin connector,
with PTT and "hold" buttons. It works great, and
looks like new. With paper work for $75

TenTec 255 Deluxe Power Supply
Matches the early Omni series, and includes ammeter
and speaker, and trim ring. Dual pass transistors similar
to the heavy duty 280 power supply. Good for 20 amps
at 13 V DC. This one looks fine, and works the same.
With manual for $ 145.

Prices do not include shipping from Florida.

Thanks.

1143. Keithley 169 bench type DMM FS

Yahoo group: amatuerradioswapfest
Date: 2005-07-17 11:33:59 UTC
From: Ken Simpson, W8EK
Topic: 1143 Message: 1143

For Sale:

Keithley 169 Lab Quality Digital Multi Meter

This is a bench type DMM, with good accuracy.

3 1/2 digit LCD display
Voltage ranges are protected to 1400 volts
Resistance ranges are protected to 300 V RMS
(This means you can accidentally apply up to 300 V
RMS when measuring resistance, and the meter
will survive.)
Voltage ranges from 200 mv to 1000 V
Current ranges from 100 microamps to 2 amps
Resistance ranges from 200 ohms to 20 Meg

It is in very nice condition, both electrically and cosmetically.
Manual included for $100 plus shipping from Florida.

Thanks.

1145. TenTec desk mics and power supply FS

Yahoo group: amatuerradioswapfest
Date: 2005-07-23 12:07:17 UTC
From: Ken Simpson, W8EK
Topic: 1145 Message: 1145

TenTec items For Sale:

TenTec 215 desk microphone
This is the "banana" mic with stand, that was used on
the earlier TenTec equipment. It is a Hi Z microphone.
Actually, this is earlier than the TenTec 215, in that it says
"Model 729 SR ceramic" on the mic, and "Model 417" on
the stand, with the EV address. As most of you know, Al
Kahn who started TenTec was CEO of EV, and brought
the mic design with him to TenTec. This one is the grayish
color, and would be a great match for the Triton IV (540 and
544) series, but will work well where ever a Hi Z mic is
needed. With paper work for $55.

TenTec 705 desk microphone
This electret desk mic has the 4 pin connector,
with PTT and "hold" buttons. It works great, and
looks like new. With paper work for $75.

TenTec 255 Deluxe Power Supply
Matches the early Omni series, and includes ammeter
and speaker, and trim ring. Dual pass transistors similar
to the heavy duty 280 power supply. Good for 20 amps
at 13 V DC. This one looks fine, and works the same.
With manual for $ 145.

Prices do not include shipping from Florida.

Thanks.

1146. TVI filters FS

Yahoo group: amatuerradioswapfest
Date: 2005-08-17 19:37:27 UTC
From: Ken Simpson, W8EK
Topic: 382 Message: 1146

TVI filters For Sale:

Low Pass filters for the transmitter:

Johnson 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut
off frequency of 45 MHz and 75 db of attenuation.
It is rated to take 1000 Watts of AM, or 5000 Watts
PEP SSB. It has SO-239 connectors on each end.
$30.

B & W FL-10/1500 (Also know as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. It is in very nice condition for $ 30.

B & W FL-10/100 low pass filter
Similar to FL-10/1500 above, except power rating is
only 100 Watts. Use this one after your rig, and before
your amplifier. Nice shape for $ 15.

B & W 415 low pass filter
This is a very heavy duty filter. It is almost twice the size of
most 1500 Watt low pass filters. It appears to be an older
filter, in a copper enclosure that has been painted at the
factory. $30

B & W Low Pass filter
Designed for 75 ohm systems. Very heavy duty. $30

Drake TV-5240-LP low pass filter
This number is correct; it is not a TV-5200. This filter is
different than the typical low pass filter. It has an SO-239
connector on each end, but instead of being long and skinny,
the enclosure is about 5 inches square. I think this is a
fairly old filter. It has brownish/gray paint over the copper
colored case. I have not been able to find any specs on
this filter. It does say "For use in 52 ohm line of transmitters
operating below 30 Mc." printed on it. $30

Drake TV-1000-LP Low pass filter
This is the filter that is in the copper case, and may also
be used on the low end of six meters, as well as HF. It is
a 50 ohm filter and is good for 1000 W below 30 MHz, and
about 200 W up to 52 MHz. With paper work for $ 30

Drake TV-100-LP low pass filter
This is for lower power -- up to 100 watts.
It has the copper case. It is approaching antique status,
as I would guess it must be 30 years old, but still works
fine. Basically it is the same as the TV-1000-LP above,
but with one tenth of the power ratings. $ 15

Alinco ELP-60 D LX low pass filter
For 50 ohm systems, with up to 500 watts of power.
This one has an SO-239 on one end, and about a 2 foot
Length of coax and PL-259 on the other end. $30

Nye Viking Low Pass Filter Model 020-001
Eliminate the harmonics going out your feed line,
and reduce TVI. It is rated at 2000 watts, with
over 65 db of attenuation above 57 MHz.
This one is in very nice shape for $30.

Kenwood LF-30 A
This is Kenwood's low pass filter, with a cut off of
about 30 MHz, and more than 90 db of attenuation
between 90 and 300 MHz. It will handle 1000 watts,
and has an SO-239 connector on each end. It is in
extremely nice condition, with paper work for $35.

Drake TV-300-HP
High Pass filter for the TV for 300 ohm twin lead.
This filter is collectable, and is unused as best I can
determine. It is still in its original box (not the newer
blister pack), with an "RLD" logo on it, and says
"NEW TV-300 HP High Pass Filter, Attenuates
0-52 MHz". A grounding strap is also attached.
$ 15

Prices do not include shipping from Florida.

Thanks.

1147. Roller inductor antenna tuner FS

Yahoo group: amatuerradioswapfest
Date: 2005-08-26 21:17:34 UTC
From: Ken Simpson, W8EK
Topic: 1124 Message: 1147

For Sale:

MFJ 969 roller inductor antenna tuner

Covers 160 thru 6 meters continuously with
the roller inductor, so is ideal for MARS as
well as normal ham use. This tuner will
handle 300 watts, and includes a "cross
needle" SWR/Wattmeter with a nice back light
feature. It also has a built in antenna switch
that allows for switching of up two coaxial
fed antennas, a balanced antenna, or the
internal dummy load. It also allows for
bypassing the tuner. The wattmeter will read
either peak or average power. A 4:1 balun
is included inside.

This particular tuner is like new. There is not
a mark on it. Of course the paper work is
included. You can pay about $200 from MFJ,
or buy this one for $145

Other MFJ items For Sale:

MFJ 285 speaker microphone
This speaker mic is the smaller "slim line", and
has the 2.5 mm and 3.5 mm plugs on it, so it fits
most Icom and Yaesu HTs that have the 2 plugs,
plus some others. It works fine and is in nice
shape. $17

MFJ 286 speaker microphone
This speaker mic can be used on most Kenwood
HTs. It is a standard size speaker mic -- not one
of the little sub-miniature types. It has not been
used. With paper work for $15.

MFJ 1305 "wall cube"
This produces 6 V DC at up to 200 ma, and is used
to power such things as keyers, lights on tuners, and
many other misc. applications. Of course it can power
many things other than MFJ items, but this one is an
actual MFJ. $10

Prices do not include shipping from Florida.

Thanks.

Date: 2005-08-27 11:50:53 UTC
From: Ken Simpson, W8EK
Topic: 1148 Message: 1148

CW items for sale:

Autek MK-1 programmable keyer
This keyer has four programmable memories, with the ability to link the last two to make a larger memory. The speed and the volume of the sidetone are controlled from the front panel. It can be power by either 120 V AC or from 12 V DC. This one looks nice, and works fine. $60

MFJ 422 electronic keyer.
This is the keyer that uses the Curtis chip as the keyer, includes sidetone, and has adjustments for volume, tone frequency, and weighting, as well as speed. Can be used in fully automatic mode, or semi-automatic like a bug. It will key either positive or negative voltages, and is powered by an internal 9 V battery, or external 5 to 9 volt supply. It is made to go on the back of a Bencher Paddle. $ 40

Bencher BY-1 Paddle
Standard Bencher with black base, with chrome parts. In very nice condition for $ 65.

Generic straight key
This is a generic CW straight key with a plastic base. The key is nothing fancy, however, it is mounted on a very nice piece of Oak wood, that makes it look very nice. Cable included for $30.

"Knock off" J-38 key on nice base
This is one of the J-38 "clones". It really looks great on a nice plexiglass base, complete with cable. $40

MFJ 557 code practice oscillator
with straight key. Just like new. $ 20

Prices do not include shipping from Florida.

Thanks.

1149. FS: Diamond X510MA dual band base antenna (used) $115.00

Yahoo group: amatuerradioswapfest
Date: 2005-08-27 18:59:37 UTC
From: PottsLadd13
Topic: 1149 Message: 1149

1-DiamondX510MA (UHF connector)

The Diamond X510NA was designed for strength and performance and is pre-tuned to achieve maximum gain in both the 2m and 70cm amateur bands.
(2m: 3 x 5/8 and 70cm: 8 x 5/8). It has a 3 section fiberglass radome with
overlapping outer shells for added strength. It comes with stainless steel
mounting hardware and radials and strong-waterproof joint couplings.

X510NA Specifications
Frequency: 2M/70CM (144-148 and 440-450 MHz)
Gain: 8.3/11.7 dB
Power: 200 watts
Connector: N
Height: 17.2 feet
Weight: 5 Lbs.
Wind Rating: 90 MPH
We also carry the Diamond X510M which is the same antenna, but with an UHF
(SO239) connector instead of an N connector.

Universal Radio price $188.95.00 new.

$115.00 for pickup or meeting in Se, Pa. only.

From: bcarling@cfl.rr.com
Topic: 1155 Message: 1155

Heathkit HW-16 Transceiver - with manual
This is a 3 band CW transceiver, which was manufactured from 1967 to 1976.
It actually has a transmitter, crystal controlled, and receiver in the same case.
Features FULL BREAK-IN on CW which is very helpful. It was supposed to be THE novice station,
and really did meet the requirements. The receiver covers the lower 250hz of 80, 40, and 15 meters,
with an adjustable power of 50 to 90 watts.
Comes with original manual and two crystals for 7028 kHz and 7045 kHz.
Available for $105.00 plus shipping.
[Non-text portions of this message have been removed]

1156. FS: Heathkit HW-101 Transceiver

Date: 2005-08-30 01:20:13 UTC
From: bcarling@cfl.rr.com
Topic: 1156 Message: 1156

FOR SALE:

Heathkit HW-101 Transceiver - very good condition.

The HW-101 is an HF (80 to 10 meter) amateur band
SSB transceiver. Transmitter finals are a pair of
6146 tubes.
Power input 180 watts p.e.p. with up to 100 watts
output.
The HW-101 was one of the most successful of all
the Heathkit amateur products. It was manufactured
from 1970 to 1983, and it seemed that in those
days, almost everyone was running a "HOT WATER
101.
It has an excellent receiver and enough power to
do what most amateurs need.
It is packaged very attractively, compact and user
friendly. Comes with the interconnect cable for
HP23B.

Heath HW-101 - $125.00 plus shipping.
HP23B Power Supply - $65.00 plus shipping.
Manual - $15.00 plus shipping.

All of the above for $175.00 plus shipping

1157. FS: EXCEPTIONAL YAESU FTDX560 TRANSCEIVER

Yahoo group: amatuerradioswapfest
Date: 2005-08-30 01:54:37 UTC
From: bcarling@cfl.rr.com
Topic: 1157 Message: 1157

FOR SALE:

YAESU FTDX560 IN EXCELLENTCONDITION.
Comes with the original manual and Yaesu Desk
Microphone.
This is a heavy duity radio and is in
exceptionally fine condition.
This is the Star of the old-time Yaesu rigs with
plenty of power.
Collector quality. I have never seen one that is
in this clean of a condition.
Has a whopping 560 watts p.e.p. input power on SSB
on the ham bands from 80 through 10m.

The Yaesu FTdx560 is a 20 tube transceiver with
the exception of 4 transistors used in the vfo
and the crystal calibrator circuits and a solid
state AC power supply.
The AC power supply is built in and not seperate
like some of the early transceivers making it
a favorite for portable and field day operations.
It is rated at 560 watts input on SSB and 500
watts on CW.
It uses two 6KD6's as the final amplifiers. The
bands covered are 80 through 10 meters (no warc
bands)
as well as WWV and two aux positions which could
be used for CB or addition of a warc band.
The rig features 100khz and 25khz calibrators as
well as R.I.T. and the capability to use an
external vfo (FV400) for crossband operation.
These transceivers were manufactured in Japan
in the early 1970s.

Yeasu FTDX560 Transceiver - $345.00 plus shipping.
Original Yaesu FTdx560 Manual - $25.00 plus
shipping.
UD-844 Desk Microphone - $85.00 plus shipping.

From: Ken Simpson, W8EK
Topic: 1165 Message: 1165

Desk microphones For Sale:

Heath HDP-21 desk microphone
This is the older style desk microphone with more
chrome color and no brown on it, like was used
with the earlier SB line (SB-100, 101, 400, 401).
With paper work for $65.

EV Desk Microphone
Basically this is the same as the Heath brown desk
microphone (HDP-121), but it does not have the Heath
name on it. It says EV. Hi Z. One small paint spec off,
about the size of a pin head. Works fine. $65

Shure 450 desk microphone
This desk mic looks like a Shure 444, and functions
basically the same. There is a switch on the bottom
for high or low impedance, so it can be used with most
any rig. This one works fine and looks fine also. $50

Dynamic Desk Microphone
This microphone is still in its original box, and unused
as far as I can tell. It is 600 ohm impedance, and is
the "gooseneck" type mic. It looks very similar to the
Icom SM-6, although the head is just a bit bigger. It has
unidirectional pickup, so background noise is reduced.
In its original box, with paperwork, for $55.

Prices do not include shipping from Florida.

Thanks.

1166. Keyer and Bencher paddle FS

Yahoo group: amatuerradioswapfest
Date: 2005-09-04 11:36:41 UTC
From: Ken Simpson, W8EK
Topic: 1166 Message: 1166

For Sale:

MFJ 422 B electronic keyer complete with Bencher Paddle

This is the keyer that uses the Curtis chip as the keyer,
but includes sidetone, and has adjustments for volume,
tone frequency, and weighting, as well as speed. It can
be used in fully automatic mode, or semi-automatic like
a bug. It will key either positive or negative voltages,
and is powered by an internal 9 V battery, or external
5 to 9 volt supply.

Included with it is a Bencher paddle. This is a true Bencher,
and is not the MFJ clone.

The keyer is mounted on the back of the Bencher paddle, so
it makes one nice single compact unit.

This particular unit works 100% and looks great as well.
It is in its original box, with paper work for $110 plus
shipping from Florida.

Thanks.

1167. Coaxial antenna relay and antenna switches FS

Yahoo group: amatuerradioswapfest
Date: 2005-09-04 18:00:20 UTC
From: Ken Simpson, W8EK
Topic: 1167 Message: 1167

Coaxial antenna switches For Sale:

Dow Key type antenna relay
This is similar to the antenna relay like we used
in the 1960's to switch between transmit and receive.
It has a 120 V coil, but no auxiliary contacts. It is not
DowKey, but functions the same. It seems slightly
heavier than a Dow Key. $35

2 position coax switch
These are a bit odd. They look close to what a Dow Key
antenna relay looks like, but no relay coil to switch. It is a
manual switch instead. There is a SO-239 connector at the
top coming out of each side, with the common at the bottom.
In the middle is a bar that slides back and forth to select the
antenna. It is in a very rugged sealed metal box. Three
switches available for $25 each.

Workman CX-3, 3 position Coax Switch
This is in a small rectangular box, with the 3 switched
SO-239 connectors coming out the rear, and the
common coming out the front. Unused positions are
NOT grounded. Rated at 1000 watts. It is in very nice
condition for $ 14.

Goldline 2 position Coax Switch
Small rectangular box, with SO-239 connectors on the
end and the back. Rated at 1000 watts. $10

Prices do not include shipping from Florida.

Thanks.

1168. Low Pass TVI filters FS

Yahoo group: amatuerradioswapfest
Date: 2005-09-04 18:17:35 UTC
From: Ken Simpson, W8EK
Topic: 1102 Message: 1168

TVI filters For Sale:

Low Pass filters for the transmitter:

Drake TV-100-LP low pass filter
This is for lower power -- up to 100 watts.
It has the copper case. It is approaching antique status,
as I would guess it must be 30 years old, but still works
fine. Basically it is the same as the TV-1000-LP,
but with one tenth of the power ratings. $ 15

Drake TV-1000-LP Low pass filter
This is the filter that is in the copper case, and may also
be used on the low end of six meters, as well as HF. It is
a 50 ohm filter and is good for 1000 W below 30 MHz, and
about 200 W up to 52 MHz. With paper work for $ 30

Drake TV-5240-LP low pass filter
This number is correct; it is not a TV-5200. This filter is
different than the typical low pass filter. It has an SO-239
connector on each end, but instead of being long and skinny,
the enclosure is about 5 inches square. I think this is a
fairly old filter. It has brownish/gray paint over the copper
colored case. I have not been able to find any specs on
this filter. It does say "For use in 52 ohm line of transmitters
operating below 30 Mc." printed on it. $30

Johnson 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut
off frequency of 45 MHz and 75 db of attenuation.
It is rated to take 1000 Watts of AM, or 5000 Watts
PEP SSB. It has SO-239 connectors on each end.
$30.

Alinco ELP-60 D LX low pass filter
For 50 ohm systems, with up to 500 watts of power.
This one has an SO-239 on one end, and about a 2 foot
Length of coax and PL-259 on the other end. $30

Nye Viking Low Pass Filter Model 020-001
Eliminate the harmonics going out your feed line,
and reduce TVI. It is rated at 2000 watts, with
over 65 db of attenuation above 57 MHz.
This one is in very nice shape for $30.

Kenwood LF-30 A
This is Kenwood's low pass filter, with a cut off of

about 30 MHz, and more than 90 db of attenuation
between 90 and 300 MHz. It will handle 1000 watts,
and has an SO-239 connector on each end. It is in
extremely nice condition, with paper work for $35.

Drake TV-300-HP
High Pass filter for the TV for 300 ohm twin lead.
This filter is collectable, and is unused as best I can
determine. It is still in its original box (not the newer
blister pack), with an "RLD" logo on it, and says
"NEW TV-300 HP High Pass Filter, Attenuates
0-52 MHz". A grounding strap is also attached.
$ 15

Prices do not include shipping from Florida.

Thanks.

FOR SALE:
HEATHKIT HW-16 TRANSCEIVER
This is a 3 band tube CW transceiver, which was manufactured from 1967 to 1976.
Features FULL BREAK-IN on CW which is very helpful.
Built-in sidetone.
It was one of the most poplular NOVICE stations in the 1960s and 1970s.
The receiver covers the lower 250 Hz of 80, 40, and 15 meters.
Transmitter has an adjustable power level of up to 90 watts.
It actually has a transmitter, crystal controlled, and receiver in the same case.
Comes with ORIGINAL manual and two crystals.
Available for $105.00 plus shipping.

Picture and details at:
http://www.af4k.com/radios.htm

1176. TenTec items FS

Yahoo group: amatuerradioswapfest
Date: 2005-09-10 10:34:26 UTC
From: Ken Simpson, W8EK
Topic: 1108 Message: 1176

TenTec items for sale:

TenTec 255 Deluxe Power Supply
Matches the early Omni series, and includes ammeter
and speaker, and trim ring. Dual pass transistors similar
to the heavy duty 280 power supply. Good for 20 amps
at 13 V DC. This one looks fine, and works the same.
With manual for $ 145.

Power cable for Hercules 444 linear amplifier
This is the heavy cable that goes from the power
supply to the amp. It has a heavy duty 9 pin molex
type connector on it, and either #12 or #14 wire,
and is about 6 feet long. It is in good shape. $18

Prices do not include shipping from Florida.

Thanks.

1177. Lab quality DMM FS

Yahoo group: amatuerradioswapfest
Date: 2005-09-10 10:54:04 UTC
From: Ken Simpson, W8EK
Topic: 1177 Message: 1177

For Sale:

Keithley 169 Lab Quality Digital Multi Meter

This is a bench type DMM, with good accuracy.

3 1/2 digit LCD display
Voltage ranges are protected to 1400 volts
Resistance ranges are protected to 300 V RMS
(This means you can accidentally apply up to 300 V
RMS when measuring resistance, and the meter
will survive.)
Voltage ranges from 200 mv to 1000 V
Current ranges from 100 microamps to 2 amps
Resistance ranges from 200 ohms to 20 Meg

It is in very nice condition, both electrically and cosmetically.
Manual included for $100 plus shipping from Florida.

Thanks.

From: Ken Simpson, W8EK
Topic: 1178 Message: 1178

Wattmeters For Sale:

MFJ 815 B HF wattmeter
This wattmeter covers the entire HF bands, plus 6 meters with coverage from 1.8 to 60 MHz. This means it is great for some of the newer HF rigs where 6 meters is included. It has a large 3 inch cross needle meter that reads 200/2000 Watts forward and 50/500 Watts reverse. It will read either peak or average power.
This particular meter works fine, and looks great. The manual is included, if one can call a single sheet of paper a manual. $60

Daiwa CN-540
This cross needle meter is good for 50 to 150 MHz, so it covers the 6 and 2 meter bands. It is 200W or 20 W for forward power, and 40 W or 4 W on reflected. It is in very nice condition for $45.

ParaDynamics PDC-1
This HF wattmeter / SWR bridge will read forward and reflected power with either 100 W or 10 W full scale. It is relatively small, making it great for mobile operation. Of course with a 10 W scale, it would be useful for QRP operation as well. $18

Prices do not include shipping from Florida.

Thanks.

Date: 2005-09-11 22:53:41 UTC
From: bcarling@cfl.rr.com
Topic: 1180 Message: 1180

FOR SALE:
600 Watt HF Linear (Military Conversion) in a TU-5B Tuner Case.
This is one beautiful amp, MASTERFULLY built into a
NEAR MINT
General Electric Company TU-5B made of the U.S. Army
Signal Corps
BC-191 transmitters of WW2.
Everything inside this cabinet is wonderful. The wiring is all
done
with silver-plated copper busbars. It was done by a pro, silent-
key
op who clearly took great care building it.
Grounded grid circuit, with a bifilar choke on the filaments.
Has three SO-239 connectors. Reduction drive tuning.
Covers 4 bands 80, 40, 20, and 15m. Has variable antenna
coupling
and plate tuning controls which have very nice vernier
reduction drive and 0-100 scale for logging purposes.
Requires 1500V DC at 200 mA (400 mA peak) for the plate
supply and 6.3v AC at 8 amps for the filament supply.
Dimensions: 19" X 7.5" X 9" deep.
Available for $150.00 plus shipping.

Pictures and details at:
http://www.af4k.com/radios.htm

Heath items For Sale:

Heath HDP-21 desk microphone
This is the older style with more chrome and no
brown on it, like was used with the earlier SB line
(SB-100, 101, 400, 401). Of course it can be used
any place a high impedance microphone is needed.
With paper work for $65.

EV Desk Microphone
Basically this is the same as the Heath brown desk
microphone, but it does not have the Heath name
on it. It says EV. Hi Z. One small paint spec off,
about the size of a pin head. Works fine. $65

Heath IP-2728 bench power supply
This power supply is good for up to 15 V DC at up to
500 ma. The voltage is variable down to about half a
volt. It has current limiting that is adjustable as well.
It is really a very versatile power supply. It is in the
Heath blue color scheme. This one works fine, looks
great, and includes paper work for $45.

ORIGINAL Heath manuals. These are the manuals
only. They are all originals, and not copies, and all
are in very, very nice condition.

Heath HW-2021 Assembly manual - 1975
For 2 meter hand held transceiver
No check marks in book. $10

Heath HN-31 A "Cantenna" Dummy Load
This is the "A" model dated 1982
No check marks in book. $10

HD-15 Hybrid Phone patch - 1965
No check marks in book,
Schematic is part of book. $10

GD-600 Photoelectric Light Switch
Very nice condition. Schematic is
part of book. $6

These are original manuals only.

Prices do not include shipping from Florida.

Thanks.

1183. Larsen mobile antennas and mounts FS

Yahoo group: amatuerradioswapfest
Date: 2005-09-17 12:57:08 UTC
From: Ken Simpson, W8EK
Topic: 1183 Message: 1183

Larsen Mobile Antennas and Mounts For Sale:

All of these work fine. There are different degrees of
cosmetics, which is why they are priced differently. All
of a same type function the same electrically.

Coils for 5/8 wave VHF (2 meter) antennas:

Larsen NLA-150 coil only
These fit the Larsen NLA mount and have about 3 db gain.
Appear to be unused - $13
Used, but in very good shape - $11
Used, but weathered more - $10

The whips for these are hard to ship, and it is best to pick
up a whip at your local Radio Shack, or similar store. I do
have some whips. They are $5 each if you need them.

Larsen NLA-450 coil and "stacked" whip
These fit the Larsen NLA mount, and have about 5 db gain
on the 70 cm band.
Appear to be unused - $16
Used, but nice shape - $15
Used, but weathered more - $14

Larsen "OM" coils and mounts
These are made to mount on a flat surface, and require 3
mounting bolts, plus a hole in the center for the coax.
OM-150 - For 2 meters - requires 5/8 wave whip for 3 db gain -
used - $15
OM-450 - For 70 cm band - includes "stacked" whip for 5 db gain -
used - $20

Larsen "Q", quarter wave whip for Larsen LM mount.
Can be cut for 2 m, 220 MHz, or 440 MHz
Includes mounting nut for LM mount.
Close to new condition - $ 5

Mobile antenna mounts for sale:

HyGain TLM Trunk Lip Mount
This trunk lip mount has a 5/16 inch stud on it.
Ideal for 1/4 wave antenna. With coax for $14

Hustler TLM Trunk Lip Mount
Takes a standard 3/8 inch 24 thread antenna
Ball will tilt, if needed. With coax for $18

Larsen TLM Trunk Lip Mount
This is the LM series from Larsen. Any Larsen
LM series antenna or the "Q" above can be used.
5/16 inch stud. With coax for $18.

Prices do not include shipping from Florida.

Thanks.

Yahoo group: amatuerradioswapfest
Date: 2005-09-17 18:38:55 UTC
From: bcarling@cfl.rr.com
Topic: 1185 Message: 1185

FOR SALE: CUBIC 103 HF TRANSCEIVER
This is the last of the great radios made by SWAN ELECTRONICS
In Oceanside, CA
It is also the pinnacle of Swan engineering with more features than
any of their other radios.
Features dual PTOs, digital readout. Adjustable bandwidths for
each PTO with
digital indicators. Many extra features including:
True variable AGC, Notch filter, passband tuning, RF, IF and AF
gain.
Many extra-ordinary features, some found on no other radios.
This was the high point of Swan-Cubic engineering and was their
last
amateur radio transceiver built before going to a strictly military
format.
Also, there is the power supply/speaker unit, model PSU6 with
cables.
Unmodified other than the addition of the 400 Hz filter which may
or may not have been factory installed.
Comes with manual and service notes, schematics etc. etc.
Cubic 103 with manual for $450.00 plus shipping.
Power Supply available for $125.00 plus shipping
400Hz narrow CW filter $200.00
Will sell all above items together for $675.00 plus shipping.

Kenwood HT accessories For Sale:

W09-0334 Wall charger for TH-21 / 31 / 41 series HTs
Like about 95% of these chargers, this one has the "ear"
on it broken, but can be used fine with a rubber band. $12

Wrist strap for TH-21 / 31 / 41 and likely other HTs $ 2

RA-8 Stubby Rubber duck antenna
This is for a TH-21 series 2 meter HT, with the threaded
connector. Good condition for $10

Antenna adapter to fit the connector on the TH -
21 / 31 / 41, and adapt it to standard PL-259
antenna connector. $ 3

Antenna adapter as above, but goes to
BNC connector. $ 3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. $6

Kenwood EP-1 ear phone
Used on almost all Kenwood HTs. Like new. $4

Prices do not include shipping from Florida.

Thanks.

From: bcarling@cfl.rr.com
Topic: 1192 Message: 1192

REDUCED: CUBIC 103 HF TRANSCEIVER
This is the last of the great radios made by SWAN ELECTRONICS
In Oceanside, CA It is also the pinnacle of Swan engineering with
more features than any of their other radios.
Features dual PTOs, digital readout. Adjustable bandwidths for
each PTO with digital indicators. Many extra features including:
Narrow 400 Hz CW Crystal Filter (worth $200)
True variable AGC, Notch filter, passband tuning, RF, IF and
AF gain.
Many extra-ordinary features, some found on no other radios.
This was the high point of Swan-Cubic engineering and was
their last amateur radio transceiver built before going to a strictly
military format.
Also, there is the power supply/speaker unit, model PSU6 with
cables.
Comes with manual and service notes, schematics etc. etc.
Cubic 103 with manual for $595.00 plus shipping.
Power Supply available for $125.00 plus shipping.
Will sell both items together for $625.00 plus shipping.
Pictures and details at:
http://www.af4k.com/radios.htm

FOR SALE:

ANTRON A99 Vertical Antenna.
Designed for 10 meter band but can be used
on all HF bands with a remote tuner.
Fiberglass Omnidirectional Base Station Antenna.
Power handling capacity is up to 2000 watts.
The A99 is a half wave over a quarter wave.
Comes in three sections, easy to assemble
Entire antenna radiates - 9.9 dB Gain.
18 Foot Long Base Station Antenna.
Fiberglass construction with four small
radials. An excellent performer.

Available for $35.00 plus shipping.

Fiberglas Mast Sections.
These are UV protected 2" diameter mast sections
that connect end to end.
I have four sections, and each one is 4 feet long
for a total of 16 feet.
Great for mounting antennas, supporting wire
antenna
ends or other ham radio applications.
These are green in color and very strong.

QTY 4 available for $6.00 each.

1194. Outdoor Weatherproof Enclosure for sale

Yahoo group: amatuerradioswapfest
Date: 2005-09-24 01:17:19 UTC
From: Paul McInnish - Home
Topic: 1194 Message: 1194

Need a repeater enclosure? Need a cabinet at the base of your tower for remote systems?

Rittal outdoor weatherproof equipment housing, "CS" series, BRAND NEW, double walled, cooling fans, battery heater, Joslyn Load Center with surge suppressors, 8 breakers, GFI outlet, battery compartment, rack mounting flanges, exterior connector for generator, etc., etc.

This cabinet is used for remote commercial repeaters, cell phone repeaters, etc., etc.

Has 3 doors for access to equipment, load center and battery compartment. Very secure locking system, eyes on top for lifting if need be... weighs about 200 lbs.

This unit has NEVER had any equipment installed in it... 36" wide x 48" high x 24" deep.

I have photos (setting in bed of my truck) that I can e-mail.

Will deliver locally in metro Atlanta otherwise, you come & I'll help you load it. Setting on pallet in my p/u truck!

Here is a link to the literature for this series of cabinet... this is a 5.5meg file!

http://www.rittal-corp.com/literature/download.cfm?id=51&action=view

Cost, if purchased from Rittal would blow your mind - but all I want is enough to buy a Yaesu FT-857D with remote mounting kit and ATS120 antenna.

Paul - K4BET

1200. TenTec 1202 combo HF/VHF wattmeter and other wattmeters FS

Yahoo group: amatuerradioswapfest
Date: 2005-10-02 20:01:00 UTC
From: Ken Simpson, W8EK
Topic: 1200 Message: 1200

For Sale:

TenTec 1202 combination HF and VHF wattmeter

This wattmeter will permit a ham to connect both an HF rig
and a VHF rig to the wattmeter at the same time. A switch
on the front of the meter selects whether HF or VHF is being
measured. HF covers 1.8 to 54 MHz, so it includes 6 meters
as well as HF. VHF is really 2 meters, covering 140 to 150
MHz. Full scale reading is 200 W or 20 W. It can be powered
from an internal 9 V battery, or from external 9 to 14 volts DC.
Of course one can measure SWR as well as forward and
reflected power.

This particular unit looks very close to new. I can not find a
scratch on it. Of course it works fine also. Paper work is
included for $60.

Other Wattmeters For Sale:

Daiwa CN-540
This cross needle meter is good for 50 to 150 MHz, so it
covers 6 and 2 meters. It is 200/20 W for forward power,
and 40/4 W on reflected.
Very nice condition for $45.

ParaDynamics PDC-1
This HF wattmeter / SWR bridge will read forward and
reflected power with 100/10 W full scale. It is relatively
small, making it great for mobile operation. Of course
with a 10 W scale, it would be useful for QRP operation
as well. $18

Prices do not include shipping from Florida.

Thanks.

Keyers and other CW items For Sale:

Autek MK-1 programmable keyer
This keyer has four programmable memories, with the
ability to link the last two to make a larger memory. The
speed and the volume of the sidetone are controlled
from the front panel. It can be power by either 120 V AC
or from 12 V DC. This one looks nice, and works fine. $60

MFJ 422 B electronic keyer complete with Bencher Paddle
This is the keyer that uses the Curtis chip as the keyer,
includes sidetone, and has adjustments for volume,
tone frequency, and weighting, as well as speed. It can
be used in fully automatic mode, or semi-automatic like
a bug. It will key either positive or negative voltages,
and is powered by an internal 9 V battery, or external
5 to 9 volt supply.
Included with it is a Bencher paddle. This is a true Bencher,
and is not the MFJ clone.
The keyer is mounted on the back of the Bencher paddle, so
it makes one nice single compact unit.
This particular unit works 100% and looks great as well.
It is in its original box, with paper work for $105.

Bencher BY-1 Paddle
Standard Bencher with black base and chrome parts.
In very, very nice condition for $ 65.

Cover for Bencher Paddle
This is a plasic dust cover than is custom made for
the Bencher paddles. Most are plexiglass with square
corners, but this one is exceptional nice with rounded
corners. It looks like new, with no scratches. $15

Generic straight key
This is a generic CW straight key with a plastic base.
It is mounted on a very nice piece of Oak wood, that
makes it look very nice. Cable included for $28.

J-38 clone key on nice base
This is one of the J-38 "clones". It really looks great
on a nice plexiglass base, complete with cable. $38

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo
connector on the end, like used by most rigs. It looks
great. $8

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch
phone plug on it, as is used with a straight key. $5

MFJ 557 code practice oscillator
with straight key. Just like new. $ 20

Prices do not include shipping from Florida.

Thanks.

1214. FS: Tube Test Adapters

Yahoo group: amatuerradioswapfest
Date: 2005-10-16 11:31:38 UTC
From: bcarling@cfl.rr.com
Topic: 1214 Message: 1214

FOR SALE:
Test Adapters by CBS Hytron and GC Electronics.

These are three TUBE test socket adapters made for
troubleshooting electronic equipment. The first two
are for 9-pin and 7-pin tubes and they extend the
tube socket so that probes may be attached to
the side for measuring voltages or attaching an oscilloscope etc.
to each pin. One each for 7-pin miniature and 9-pin miniature
tube sockets. The third adapter is for testing NUVISTOR
tubes in older type tube testers. It provides a 5-pin
nuvistor socket oin top and has an OCTAL type plug on
the bottom. GC Part number 36-532.

For the three test adapters, I would like $15.00 plus shipping.

1215. Wattmeters FS

From: Ken Simpson, W8EK
Topic: 1178 Message: 1215

Wattmeters For Sale:

TenTec 1202 combination HF and VHF wattmeter
This wattmeter will permit a ham to connect both an HF rig and a VHF rig to the wattmeter at the same time. A switch on the front of the meter selects whether HF or VHF is being measured. HF covers 1.8 to 54 MHz, so it includes 6 meters as well as HF. VHF is really the 2 meter band, covering 140 to 150 MHz. Full scale reading is 200 W or 20 W. It can be powered from an internal 9 V battery, or from external 9 to 14 volts DC. Of course one can measure SWR as well as forward and reflected power.
This particular unit looks very close to new. I can not find a scratch on it. Of course it works fine also. Paper work is included for $60.

Daiwa CN-540
This cross needle meter is good for 50 to 150 MHz, so it covers the 6 and 2 meter bands. It is 200W or 20 W for forward power, and 40 W or 4 W on reflected. It is in very nice condition for $45.

ParaDynamics PDC-1
This HF wattmeter / SWR bridge will read forward and reflected power with either 100 W or 10 W full scale. It is relatively small, making it great for mobile operation. Of course with a 10 W scale, it would be useful for QRP operation as well. $18

Prices do not include shipping from Florida.

Thanks.

1216. TVI filters FS

Yahoo group: amatuerradioswapfest
Date: 2005-10-22 11:19:54 UTC
From: Ken Simpson, W8EK
Topic: 382 Message: 1216

TVI filters For Sale:

Low Pass filters for the transmitter:

Drake TV-1000-LP Low pass filter
This is the filter that is in the copper case, and may also
be used on the low end of six meters, as well as HF. It is
a 50 ohm filter and is good for 1000 W below 30 MHz, and
about 200 W up to 52 MHz. With paper work for $ 30

B & W FL-10/1500 (Also know as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. It is in very nice condition for $ 30.

Drake TV-5240-LP low pass filter
This number is correct; it is not a TV-5200. This filter is
different than the typical low pass filter. It has an SO-239
connector on each end, but instead of being long and skinny,
the enclosure is about 5 inches square. I think this is a
fairly old filter. It has brownish/gray paint over the copper
colored case. I have not been able to find any specs on
this filter. It does say "For use in 52 ohm line of transmitters
operating below 30 Mc." printed on it. $30

Drake TV-100-LP low pass filter
This is for lower power -- up to 100 watts.
It has the copper case. It is approaching antique status,
as I would guess it must be 30 years old, but still works
fine. Basically it is the same as the TV-1000-LP above,
but with one tenth of the power ratings. $ 15

Alinco ELP-60 D LX low pass filter
For 50 ohm systems, with up to 500 watts of power.
This one has an SO-239 on one end, and about a 2 foot
Length of coax and PL-259 on the other end. $30

Ameco LN-2 low pass filter
This filter is rated at 100 Watts, with an SO-239
connector on each end. $12

For the TV receiver:

Drake TV-300-HP
High Pass filter for the TV for 300 ohm twin lead.
This filter is collectable, and is unused as best I can
determine. It is still in its original box (not the newer

blister pack), with an "RLD" logo on it, and says
"NEW TV-300 HP High Pass Filter, Attenuates
0-52 MHz". A grounding strap is also attached.
$ 15

Prices do not include shipping from Florida.

Thanks.

1223. Coax antenna switches FS

Yahoo group: amatuerradioswapfest
Date: 2005-10-30 21:01:40 UTC
From: Ken Simpson, W8EK
Topic: 1223 Message: 1223

Coaxial antenna switches For Sale:

Waters 335 Coax switch
This is basically the same as the B & W Model 375
coax switch, except the unused antennas are NOT
grounded. This will switch up to 6 antennas, with
SO-239 connectors, with the coax going out the back.
This one is good condition, and works fine. $ 40

2 position coax switch
These are a bit odd. They look close to what a Dow Key
antenna relay looks like, but no relay coil to switch. It is a
manual switch instead. There is a SO-239 connector at the
top coming out of each side, with the common at the bottom.
In the middle is a bar that slides back and forth to select the
antenna. It is in a very rugged sealed metal box. Three
switches available for $22 each.

Workman CX-3, 3 position Coax Switch
This is in a small rectangular box, with the 3 switched
SO-239 connectors coming out the rear, and the
common coming out the front. Unused positions are
NOT grounded. Rated at 1000 watts. It is in very nice
condition for $ 14.

Prices do not include shipping from Florida.

Thanks.

Topic: 1231 Message: 1231

CW Keyer and code practice oscillator For Sale:

MFJ 422 B electronic keyer
This keyer includes sidetone, and has adjustments for volume, tone frequency, and weighting, as well as speed. It will key either positive or negative voltages, and is powered by an internal 9 V battery, or external 5 to 9 volt supply.
It is made to go on the back of a Bencher Paddle.
It works 100%, and looks great also. With paper work for $45.

MFJ 557 code practice oscillator
This is a traditional code practice oscillator, with adjustable volume and tone. It includes a straight key on a nice base. Just like new. It operates from a 9 volt battery. With paper work for $ 20.

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo connector on the end, like used by most rigs. It looks great. $8

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch phone plug on it, as is used with a straight key. $5

Prices do not include shipping from Florida.

Thanks.

From: Ken Simpson, W8EK
Topic: 1236 Message: 1236

TenTec items For Sale:

TenTec 255 Deluxe Power Supply
Matches the early Omni series, and includes speaker, ammeter, and trim ring. Dual pass transistors similar to the heavy duty 280 power supply. It is good for 20 amps at 13 V DC, and includes over voltage protection. This one looks fine, and works the same.
With manual for $ 135.

TenTec 252 MO power supply, 20 amp, 13 V DC supply. Has ammeter on front. Matches the Omni series, but of course can be used with any rig needing a 20 amp power supply, which includes most TenTec rigs. This unit has the optional over voltage protection unit mounted inside. It is in great condition, with manual for $ 110.

Power cable for Hercules 444 linear amplifier
This is the heavy cable that goes from the power supply to the amp. It has a heavy duty 9 pin molex type connector on both ends, and either #12 or #14 wire, and is about 6 feet long. It is in good shape. $18

Prices do not include shipping from Florida.

Thanks.

Heath items For Sale:

Heath AM-2 SWR bridge
This unit was made to match the older transmitters such as the DX-35 and DX-40. Everything is original. There are a few scratches on it. It works fine. A schematic is included for $18.

Heath IP-2728 bench power supply
This power supply is good for up to 15 V DC at up to 500 ma. The voltage is variable down to about half a volt. It has current limiting that is adjustable as well. It is really a very versatile power supply. It is in the Heath blue color scheme. This one works fine, looks great, and includes paper work for $45.

Heath parts For Sale:

Cover for Heath Wattmeter
This is the inverted "U" cover that fits the Heath HM-102 and HM-2102 wattmeters, and maybe other units. It is in nice shape, however, it has been painted black to match Drake gear. It is no longer Heath Green. $12

Lever type knob used on many units of the SB line, often to switch CW and SSB filters, or for loading control. $10

Heath SSB Crystal Filter
This came from an SB-400, but it can be used in any of the SB line. It is part number 404-200 and is 2.1 KHz wide. $20

Mu Metal shield for 3 inch CRT
>From the SB-614, but the same one is used for the SB-610, and other units. It should fit most 3 inch CRTs. $10

I still have a fair number of parts from an SB-614 monitor scope, including focus controls, position controls, and the main circuit board. Please let me know what you might need.

ORIGINAL Heath manuals. These are the manuals only. They are all originals, and not copies, and all are in very, very nice condition.

Heath HW-2021 Assembly manual - 1975
For 2 meter hand held transceiver
No check marks in book. $10

Heath HN-31 A "Cantenna" Dummy Load
This is the "A" model dated 1982
No check marks in book. $10

GD-600 Photoelectric Light Switch
Very nice condition. Schematic is
part of book. $6

These are original manuals only.

Prices do not include shipping from Florida.

Thanks.

From: Ken Simpson, W8EK
Topic: 1239 Message: 1239

Larsen Mobile Antennas and Mounts For Sale:

All of these work fine. There are different degrees of
cosmetics, which is why they are priced differently. All
of a same type function the same electrically.

Coils for 5/8 wave VHF (2 meter) antennas:

Larsen NLA-150 coil only
These fit the Larsen NLA mount and have about 3 db gain.
Appear to be unused - $13
Used, but in very good shape - $11
Used, but weathered more - $10

The whips for these are hard to ship, and it is best to pick
up a whip at your local Radio Shack, or similar store. I do
have some whips. They are $5 each if you need them.

Larsen NLA-450 coil and "stacked" whip
These fit the Larsen NLA mount, and have about 5 db gain
on the 70 cm band.
Appear to be unused - $16
Used, but nice shape - $15
Used, but weathered more - $14

Larsen "OM" coils and mounts
These are made to mount on a flat surface, and require 3
mounting bolts, plus a hole in the center for the coax.
OM-150 - For 2 meters - requires 5/8 wave whip for 3 db gain -
used - $15
OM-450 - For 70 cm band - includes "stacked" whip for 5 db gain -
used - $20

Mobile antenna mounts for sale:

HyGain TLM Trunk Lip Mount
This trunk lip mount has a 5/16 inch stud on it.
Ideal for 1/4 wave antenna. With coax for $14

Hustler TLM Trunk Lip Mount
Takes a standard 3/8 inch 24 thread antenna
Ball will tilt, if needed. With coax for $18

Larsen TLM Trunk Lip Mount
This is the LM series from Larsen. Any Larsen
LM series antenna or the "Q" above can be used.
5/16 inch stud. With coax for $18.

Prices do not include shipping from Florida.

Thanks.

FOR SALE:

Box of NINE (9) Selenium Rectifiers - various
types.
Some new, some used. One is new and still in the
Radio Shack box!
Will sell for $3.00 total, plus shipping.

E.F. Johnson Co. flexible coupling - NEW IN BOX.
Made for joining two 1/4" shafts. Part number 104-
0250-001.
Dimensions 1.25" square X 1-3/16" deep.
Shiny new condition, in the box.
QTY 1 available for $6.00 plus shipping.

BOX of 80 FT241 Crystals, NEW
Available for $20.00 plus shipping.

Solenoid Valve - 24V DC, actuator movement of
about 7/16" throw.
Metal encased. Dimensions are 3-1/8" long by 1-
1/8" diameter.
Like new condition. Will actuate on anything from
12V DC to 28V DC.
Very powerful electromagnet.
QTY 1 available for $4.00 plus shipping.

U.S. Navy Surplus Accessories Case
CV-1973/UPM-70 for radio and test equipment
accessories. Battelship Gray.
Available for $16.00 plus shipping.

Reduction Drive / Knob Assembly - bakelite, 1930s.
Classic look for homebrew equipment. This includes
a knob and would be used
for a small receiver or VFO. Has 2:1 reduction
drive.
Dial scale is numbered 0-100 through 180 degree of
dial sweep.
Black bakelite with 2" knob and 4" diameter skirt.
Available for $10.00 plus shipping.

1241. Radios for sale

Yahoo group: amatuerradioswapfest
Date: 2005-11-17 05:59:58 UTC
From: Marysf208@aol.com
Topic: 330 Message: 1241

Hi all,

Several radio scanners for sale. P.S. if we are too high on the prices, let me know please. We found most listed on the net in newsgroups or ebay and went lower from those prices hoping we'd be in the going range. Or make an offer, if you'd like as well. We've finally agreed that it's time to clean up all the non-used stuff sitting around and hopefully someone else can find use in this stuff.

1.
CHANNELS= 300, Plus extra talkgroup entry slots per bank

RANGE(S)=
25mhz-54mhz,108mhz-174mhz, 406mhz-512mhz, 806Mhz-960mhz(does 'not' include wireless phone band), 1240 to 1300mhz

AM/FM

Channel Alphanumerical Tagging

Attenuator

Weather Scan with priority tone alert function and S.A.M.E.

Priority channel

Trunking monitoring

Service Search:
Includes CB band, Police/Fire bands, Ham bands(above 28mhz). Marine radio band search as well.

Excellent condition, little use. When he purchased this unit new the trunked radio system he bought it for switched formats several months later and it has sat in a hall closet ever since. The antenna is included, a black telescoping, appears several segments that it extends upward. Also the indoor DC power supply too. No manual or original box.
Asking: $150

2.
CHANNELS= 20 (capable of a mod for well over a hundred channels)

RANGE(s)= VHF-LOW TO 512MHZ (does not include Mil-Air band(225-400mhz)

AM/FM

Frequency Search

Priority montior

does 'not 'do any trunk tracking, it's a basic VHF/UHF scanner, but does have
a very good VHF receiver. Much better than anything current for picking up
distant VHF signals. Is in excellent condition. Also includes a metal mounting
bracket and DC plug.
Asking $60

3.
CHANNELS= 300, PLUS
extra talkgroup slots per bank

RANGE(s)= 29MHZ-54mhz,108mhz-512mhz(does include Mil-Air 225mhz to 400mhz
band), 806mhz-956mhz(does 'not' include the wireless phone band)

AM/FM

Trunk monitoring

Priority Montioring (up to 10 channels)

Tone Squelch Decode & Search

Weather Scan and Alerting Tone

Automated Search and store

Frequency Send option(allows one to transfer one frequency
to another available slot in the radio)

search step sizes of 5, 12.5, 25khz.

VFO knob for tuning

Light dimmer:
Bright, Dim, and off

Remote or computer
interface control

Data skip feature(works o.k on data signals. Works well on stuck carriers to
resume scanning once scanner stops on a non-voice noise frequency)

Signal strength meter

This one is in excellent condition except for the SRC,
search button on the left hand side, the bottom
part of the R has been rubbed off, but the S and C are all there. Just
the R has the bottom part of the paint on the
R gone. Button still works fine, it's hard plastic, but just the
paint has rubbed off on it. Other buttons still have their paint intact and
work fine. Radio has been just sitting
in the closet as well since upgrading.

Asking $150

4.
CHANNELS= 500

RANGE= 25-760, 760-1300mhz (excluding wireless phone band)

AM/FM/WFM

5khz, 12.5khz, 25khz, 50khz

Data Discriminator tap output

Light dimmer:
Bright, Dim, and off

Alphanumerical tagging of channels

Attenuator

Channel hit counter

Data skip

Priority Monitoring (up to 10 channels)

Bank memory feature

Highcut Audio Feature

VFO tuning knob

Frequency send feature

Tone Squelch Decode

Automated frequency search and store

TV stations audio monitoring ability

Is in excellent condition as well.
Asking $230

5.
CHANNELS= 200

RANGE(s) 29mhz-54mhz,108mhz-174mhz, 406mhz-512mhz,806mhz-965mhz

AM/FM

Priority Monitor

Data Discriminator tap output

Frequency Search

NOTE PLEASE READ about this radio (#5)
This one has a weird problem all of a sudden from just sitting in the closet. Some of the buttons on the keypad do not connect all the time once pressed for some odd reason. Sometimes you have to press the button in hard to have it register. Seems button number three is the only one that is still not connecting after playing with it though now. This radio, as well as all the others have been sitting in a hall closet each in it's own plastic bag titely knotted. The only thing that he could guess is the rubber keypad has gone out since it's a few years old. So, we'll say this one needs a new keypad most likely, but most buttons do work fully like normal after having the radio out and pressing them. Other than that the radio works fine. New DC adapter and plug included.
Asking: $100

6.
CHANNELS= 10
RANGE(S)= VHF/UHF
FM/AM
DC plug included
Excellent condition
Asking: $45

7.
CHANNELS= 150

RANGE(s)= VHF-LOW, VHF-high, UHF, 800mhz, 900mhz,

Frequency search

Trunk monitoring

Service Searches (CB, highway patrol, police/fire, ham(above 28mhz)

Priority Monitoring

Weather search

Excellent condition. ALso this one was very little used. This was also purchased new and quickly retired after a newer model came out.
Asking $150

Thank you all for allowing me to post this long message. Please e-mail me at Marysf208@... for any questions or if anyone is interested in any of these.
Thanks,
Mary

FOR SALE:

STUDIO TYPE 4" VU METER by WESTON - Excellent Condition.
Unit is lighted by two lamps inside it.
Available for $25.00 plus shipping.

VU Meter - Micronta 22-053 - Made in Japan.
Has overall dimensions of 2=7/8" X 2-1/4".
QTY 1 Available for $6.00 plus shipping.

E.F. Johnson 4-PIN CERAMIC TUBE SOCKET
Made for tubes with a 1-1/8" or 1-1/4" diameter base.
Pin diameters approximately 3/16" - has screwtype terminals.
Overall dimensions: 3-1/2" X 2-5/8"
QTY 1 Available for $10.00 plus shipping.

Vintage Knob With Reduction Drive. CROWE - Made in USA. 3" diameter knob with 4" diameter skirt.
Has 0-100 scale over a 180 degree arc. Also has small 0-5-10 Marker Scale for attachment to nearby panel for accurate tuning. 5:1 reduction ratio.
QTY 1 Available for $16.00 plus shipping.

VERNIER KNOB - Military Surplus type - with 0-100 scale.
Includes ceramic coupler & reduction 4:1 ratio.
Knob is 2" diameter and dial skirt is 2-1/2" diameter.
QTY 1 available for $10.00 plus shipping.

Reduction Drive / Knob Assembly - bakelite, 1930s.
Classic look for homebrew equipment. This includes knob & has 2:1 reduction drive.
Dial scale is numbered 0-100 through 180 degree of arc.
Black bakelite with 2" knob and 4" diameter skirt.
Available for $10.00 plus shipping.

Power ON-OFF Swith / Circuit Breaker
Rated 7.5 amps at up to 250V AC. DPDT configuration.
Uses a 1-3/8" X 1-3/8" hole with simple press-fit mount.
For panels up to 12 gauge thickness.

QTY 1 Available for $3.00 plus shipping

REDUCED: Rechargeable batteries. These are sealed lead-acid batteries
and do not require any kind of fancy charging system. Great for field day
or operating ham gear etc. These are lightly used but have plenty of life
left in them. Shipping additional.
QTY 1 - Ohmeda - 12V at 2.3 AH - $5.00
QTY 2 - UNIPOWER 6 V at 2.8 AH - $4.00 each
QTY 1 - UNIPOWER 12 V at 7.5 AH - $8.00
QTY 4 - Werker - 12 V at 5 AH - $6.00 each

Military Surplus U.S. Navy Case, CV-1973/UPM-70 Accessories Case.
Used for storing radio accessories and/or test equipment onboard ship.
Battleship gray. Approximate dimensions: 17.5" X 14.5" X 5.5"
In very good condition with latch. No dents or rust.
Reduced to $16.00 plus shipping.

1243. Re: [Amatuer Radio Swapfest] Radios for sale

Yahoo group: amatuerradioswapfest
Date: 2005-11-18 05:24:14 UTC
From: Marysf208@aol.com
Topic: 1243 Message: 1243

Hi,

Sorry, we thought putting the functions would be more helpful than just listing the model number. Here are the model numbers:

#1 is a PRO-2053 RadioShack, actually it's GRE.
#2 is a RadioShack PRO-2020
#3 is a Uniden Bearcat 895XLT
#4 is a Uniden Bearcat 9000xlt
#5 is a RadioShack (he doesn't remember the manufacturer off the top of his head, but thinks it's GRE) PRO-62
#6 is a RadioShack(unknown manufacturer) PRO-31
#7 is a RadioShack (Uniden Made) PRO-2066

Thanks,
Mary

FOR SALE:

100 pF at 3000V transmitting variable capacitor.
Excellent for linear amplifier or tuner project.
Dimensions 5" X 5" X 4" and has standard 1/4"
shaft 1.375" long.
Available for $25.00 plus shipping.

E.F. Johnson 100pF + 100 pF at 2500V transmitting
variable capacitor.
Split stator type. Comes with nice traditional
knob like Collins.
Dimensions 6.5" X 3" X 3" with standard 1/4"
shaft.
Available for $25.00 plus shipping.

Unusual Dual Variable Capacitor with padders.
This is a 2 X dual section cap with nice ceramic
standoffs.
Seems to be about 25 pF X 4 sections. Will require
coupling to the shaft for control.
Available for $2.00 plus shipping.

Dual Section 70 pF 2 KV Transmitting Capacitor -
Wide Spaced.

35pF + 35 pF Split stator variable cap.
Dimensions: 6.5" X 3" X 2.5"
Excellent condition.
Available for $12.00 plus shipping.

Topic: 1247 Message: 1247

For Sale:

Electronic "Cross Reference" Data Books

These books are detailed reference books listing 1000's
and 1000's of different transistors, diodes, ICs and other
solid state devices, and crossing them to NTE or EGC
devices. They also include base diagrams and other
pertinent information. Obviously, different years have
different devices. All are in extremely good physical
condition, and are 8 1/2 x 11 inch paperbacks.

Sylvania ECG - 1976 - 241 pages - $ 8

Sylvania ECG - 1979 - 352 pages - $10

EGC Industrial MRO - 1980 - 207 pages - $8

ECG Master Replacement Guide - 1987 -
700 pages - $12

NTE Technical Guide and Cross Reference
1988 - 604 pages - $10

NTE Semiconductors - 6th edition - 1992
675 pages - $10

Archer Semiconductor Reference Guide
1988 - 290 pages - $7

RCA SK Series - Spring 1972 - 96 pages - $10

RCA SK series - 1981 - 409 pages - $10

Semiconductors by GE - 1974 - 74 pages - $ 6

Prices do not include shipping from Florida.
Media Mail shipping is quite inexpensive.

Thanks.

FOR SALE:
Beautiful Homebrew 4-400A Pair Linear Amplifier -
excellent shape.
Here is a self-contained desktop 2000 watt linear amplifier for
80-10m.
Uses the tried and true combination of TWO 4-400A EIMAC
tubes.
Comes with complete documentation and the original article
from which it was built.
Has VACUUM VARIABLE plate capacitor. Full metering of
BOTH TUBES grid current
(switchable.) Also has meters for 3000V Plate Supply Voltage,
plate current,
and RF output. Needs AC fuse holder replaced and one
resistor is broken.
Everything else checks good and the power supply is tested
OK.
Cabinent is thoroughly shielded inside and out. Hinged lid for
easy access.
Comes with a schematic, notes, and the complete, detailed
construction article.
Wired for 120V AC operation and comes with locking power
cord.
Spare (NEW) Eimac 4-400A available with amplifier purchase
for $50.00
New tube alone for $75.00 plus shipping.
Available for $350.00 plus shipping (Heavy)

See:
http://www.af4k.com/radios.htm
Additional photos on request.

1249. FS: DENTRON GLA1000 HF LINEARS

Yahoo group: amatuerradioswapfest
Date: 2005-11-20 21:11:31 UTC
From: Brian Carling
Topic: 1249 Message: 1249

FOR SALE:

DENTRON GLA1000 LINEAR AMPLIFIERS - Have
Two For Sale.
1000 Watts p.e.p. desktop linear amplifier is self-contained,
and
covers the ham bands from 80 through 10 meters. Great for
SSB and CW.
Outer cosmetic condition is excellent. Both may need minor
attention.
Both have good working power supplies, and good tested
tubes. All of the RF
components are there and look fine. No major damge to
anything - should be
easy to restore. I just don't have the time. One has an
intermittent contact on
the T-R relay during receive. Probably just needs a relay. Has a
tiny switch added to
front panel, easy to remove and fill. One looks better outside
and its tubes look newer.
Other is a little dirty inside. Both are untested and sold as-is,
but I have every
reason to believe they can be easily made to work 100%. Four
good tested finals
in each amplifier. These are bringing $350.00 to $375.00 or
more on eBay.
Each amplifier will be sent with the schematic and a copy of
the manual.
QTY 2 Available for $175.00 and $150.00 each plus shipping.

See:
http://www.af4k.com/radios.htm

Additional pictures available on request.

1255. HF SWR Bridges and wattmeter FS

Yahoo group: amatuerradioswapfest
Date: 2005-11-28 00:10:06 UTC
From: Ken Simpson, W8EK
Topic: 1255 Message: 1255

HF SWR Bridges and HF wattmeter For Sale:

Vintage SWR meter
E. F. Johnson Model 250-849 "Antenna Meter"
Even though it says "Antenna Meter" on it, it is really just a normal HF SWR bridge. It is in a black box about 5 inches long, 3 inches high, and 2 inches deep, with an SO-239 connector out each side. The actual meter movement is an edgewise meter movement. It is interesting to note that the front panel is marked "Waseca, Minn. U.S.A" with no zip code given, so that should give some indication of its vintage. This unit is in very nice condition. I can not find a scratch on it, and the paint is very good, except for some very slight wear on the heads of the screws on the bottom of it, due to the fact that there are no feet on the bottom. $30

Dual meter HF SWR Bridge:
Swan SWR-1 A
This unit has two meters on it. The meter on the left reads forward power and the meter on the right reads reflected power. It is in a heavy metal enclosure with two SO-239 connectors coming out of the back. It works fine and looks like new. $ 20

Other HF meters:

ParaDynamics PDC-1
This HF wattmeter / SWR bridge will read forward and reflected power with either 100 W or 10 W full scale. It is relatively small, making it great for mobile operation. Of course with a 10 W scale, it would be useful for QRP operation as well. $18

SWR Bridge
This is the standard HF SWR bridge in a gray crinkle box about 6 inches long and a couple inches square, with SO-239 connectors coming out of each end. It works fine. $12

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

1266. looking for Kenwood TMD700

Yahoo group: amatuerradioswapfest
Date: 2005-12-10 12:35:01 UTC
From: goshawk
Topic: 1266 Message: 1266

hello list,
I am looking for a Kenwood TMD700 radio please.
am looking for this radio as it is about the only one of its type that the menu can be made to speak on, this is a feature I need, as I am totally blind.
would prefer one with the voice board already fitted, but will take one with out if not possible.
would prefer to get it in the UK, as that is where I am.
please call or email if you have one to sell, or know where there is one going for a reasonable price, please don't say ebay, as stuff on there tends to go for very high prices in my experience, and as I am not working, I don't have that sort of money.

call on 02084785841, or email to,
goshawk@...

Simon

1267. Kenwood SP-820 filtered speaker and other Kenwood items FS

Yahoo group: amatuerradioswapfest
Date: 2005-12-11 13:12:13 UTC
From: Ken Simpson, W8EK
Topic: 1267 Message: 1267

Kenwood Items For Sale:

Kenwood SP-820 speaker with filters
This speaker will take an input from up to two rigs,
and has a built in filter in it. It can be set for low, high,
High 2, or combinations. If desired, the bandpass of
the speaker can be narrowed to about 500 to 1000 hz,
which means that it is in effect a CW filter. Of course
it can be broader, if desired.
Although this speaker was designed to physically match
the TS-820, it can be used any place an 8 ohm speaker
is desired. Electrically, it is the same as the SP-230,
SP-930, SP-950, and others with the filters built in.
This particular speaker is in excellent shape. It works
fine, and I can not find a scratch on it. $ 75

Kenwood MC-47 Hand Microphone
This is the microphone that came with the TS-50, but can
be used on other rigs.. It has a round 8 pin connector, has
up and down buttons, plus 4 "extra" buttons on the front.
This one works fine, and is very nice shape for $45.

Kenwood MB-13 mobile bracket
This is the "quick disconnect" mobile bracket used for the
TS-50 transceiver and also the AT-50 antenna tuner.
This one is in nice shape for $35.

Kenwood MC-30 S hand microphone
This hand microphone is used with most all of the
older Kenwood rigs - TS-120, TS-180, TS-520, TS-820,
etc. This is a noise canceling mic. It has a four pin
plug on it to match these rigs. Good shape for $35

Small hand mic that came with the Drake TR-72
and TR-2200 A. It has the standard 4 pin plug wired
for Drake/Kenwood, and is a 500 ohm mic. This one says
Drake on it, but it is the same as the Kenwood microphone.
No model number on it, but it looks close to new, and
works fine. $30

Kenwood SMC-25 speaker mic
Fits TR-2500 series of HTs, and maybe others. $20

Kenwood DC-21
This unit is used on the TH-21 / 31 / 41 series of HTs. It has
an adapter that slides on in place of the battery, plus a
conversion unit that plugs into the cigarette lighter on one end

and the battery adapter on the other. $25

W09-0334 Wall charger for TH-21 / 31 / 41 series HTs
Like about 95% of these chargers, this one has the "ear"
on it broken, but can be used fine with a rubber band. $12

Wrist strap for TH-21 / 31 / 41 and likely other HTs $ 2

RA-8 Stubby Rubber duck antenna
This is for a TH-21 series 2 meter HT, with the threaded
connector. Good condition for $10

Kenwood full size 2 meter rubber duck antenna
BNC connector $10

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. $5

Kenwood EP-1 ear phone
Used on almost all Kenwood HTs. Like new. $4

Prices do not include shipping from Florida.

Thanks.

VE1YZ did a fair job on mine after I burned it pretty much to a
crisp operating RTTY at 50w (make 25w your limit and make sure
your fan doesn't fail). Sold it, and it has had three owners
since me, all of whom got some use out of it. I have an old FT-
One now.

1280. FS: CRYSTAL SOCKETS

Yahoo group: amatuerradioswapfest
Date: 2005-12-27 11:30:43 UTC
From: Brian Carling
Topic: 1280 Message: 1280

FOR SALE:

NEW CERAMIC HC6/U CRYSTAL SOCKETS.
These are for the metal can crystals with pins
spaced
about 1/2" apart. These are new, ceramic sockets
usable
all the way up to VHF. Single screw mount, with
solder terminals.
Great for amateur radio homebrew or repairs.
They have 0.486" pin spacing. Smaller diameter
pins than FT243.
These mount with a single hole. Dozens available
as follows:
Reduced from $3.00 each.
Dozens available for $1.50 each or 10 for $10.00
plus shipping.

1281. TVI filters FS

Yahoo group: amatuerradioswapfest
Date: 2005-12-27 17:37:14 UTC
From: Ken Simpson, W8EK
Topic: 382 Message: 1281

Low Pass filters for the transmitter for sale:

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your
transmitter and antenna, and has been optimized to
have more attenuation in the 40 MHz region, where
many TVs have their IF. According to the manual it is
good for 1000 Watts "average", which would be about
2000 watts PEP, and has over 80 db attenuation at
41 MHz. SO-239 connectors on each end. This one
looks close to new, and also has the single page
"manual" with it. $ 30

Drake TV-1000-LP Low pass filter
This is the filter that is in the copper case, and may also
be used on the low end of six meters, as well as HF. It is
a 50 ohm filter and is good for 1000 W AM below 30 MHz
(which would be over 3000 Watts PEP SSB), and
about 200 W up to 52 MHz. With paper work for $ 30

Johnson Nye Viking 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut
off frequency of 45 MHz and 75 db of attenuation.
It is rated to take 1000 Watts of AM, or 5000 Watts
PEP SSB. It has SO-239 connectors on each end.
$30.

Nye Viking Low Pass Filter Model 020-001
Eliminate the harmonics going out your feed line,
and reduce TVI. It is rated at 2000 watts, with
over 65 db of attenuation above 57 MHz.
This one is in very nice shape for $30.

Drake TV-5240-LP low pass filter
This number is correct; it is not a TV-5200. This filter is
different than the typical low pass filter. It has an SO-239
connector on each end, but instead of being long and skinny,
the enclosure is about 5 inches square. I think this is a
fairly old filter. It has brownish/gray paint over the copper
colored case. I have not been able to find any specs on
this filter. It does say "For use in 52 ohm line of transmitters
operating below 30 Mc." printed on it. $25

Drake TV-100-LP low pass filter
This is for lower power -- up to 100 watts AM.
It has the copper case. It is approaching antique status,

as I would guess it must be 30 years old, but still works
fine. Basically it is the same as the TV-1000-LP above,
but with one tenth of the power ratings. $ 15

Alinco ELP-60 D LX low pass filter
For 50 ohm systems, with up to 500 watts of power.
This one has an SO-239 on one end, and about a 2 foot
length of coax and PL-259 on the other end. $30

Ameco LN-2 low pass filter
This filter is rated at 100 Watts, with an SO-239
connector on each end. $12

For the TV receiver:

Drake TV-300-HP
High Pass filter for the TV for 300 ohm twin lead.
This filter is collectable, and is unused as best I can
determine. It is still in its original box (not the newer
blister pack), with an "RLD" logo on it, and says
"NEW TV-300 HP High Pass Filter, Attenuates
0-52 MHz". A grounding strap is also attached.
$ 12

Prices do not include shipping from Florida.

Thanks.

1285. FS: Ladderline (Real open wire)

Yahoo group: amatuerradioswapfest
Date: 2005-12-31 01:22:14 UTC
From: Brian Carling
Topic: 1285 Message: 1285

FOR SALE:

Two rolls of 600 ohm ladder line. This is the real feedline that has coppper wire and plastic spacers, unlike the plastic twinlead stuff with windows that is 450 ohm and cracks etc. This feedline can take it.

Each roll is approximately 100 feet long. I am not going to unroll them and measure, but it is 60 turns coiled up and each is about 8" diameter average - so I figure there must be at least 100 feet here on each roll.

I will sell the two rolls for $40.00 plus $8.50 for shipping

1286. Cushcraft ARX-2, omnidirectional 2 meter vertical antenna FS

Yahoo group: amatuerradioswapfest
Date: 2005-12-31 15:34:00 UTC
From: Ken Simpson, W8EK
Topic: 1286 Message: 1286

Two meter omnidirectional vertical antenna for sale:

Cushcraft ARX-2 Ringo Ranger Antenna

For 2 meters, although it can be tuned to cover commercial
frequencies either side of the amateur 2 meter band (about
130 to 170 MHz). It is rated to have 6 db gain.
This one is in very good shape. Of course the paper work
is included. $45 plus shipping from Florida.

Thanks.

1288. For Trade

Yahoo group: amatuerradioswapfest
Date: 2006-01-02 14:07:01 UTC
From: Rodger
Topic: 1046 Message: 1288

Hello I am looking to trade a radio shack 800mhz trunking scanner for a kenwood and icom programing cables. I have a radio shack pro-2067 I donot have the power cor or antenna for this scanner but I do know that it does work. I can make a cable for it but it will not look to pretty, or I will send the pigtail I have with it and you could build on. I am looking for a kenwood kpg-46 kpg-22 that is the 2in1 cable and a icom opc-478 cable. If you are interested please email me at fireman_690@.... I also have 2 programming cable I do not need anymore and I would trade them for a cable. One is for a efjohnson avenger radio and the other is for the midland xtr, syntec2 radios I have the software for the cables to.

Thanks

FOR SALE - Quantity 30 plus RF coils. Including AIRDUX air core
and military surplus ceramic core types.
From $2.00 to $14.00 - great for homebrew transmitters, receivers,
linear amplifiers and crystal sets.

Examples:

Group of smaller Airdux coils. New in Boxes.
4 boxes, three coils. If I can find the fourth
coil
I will throw it in at no additional charge.
816T - 1" diameter X 3". Has 25 turns of 18
gauge
wire - 4.8 uH
508T - 5/8" diameter X 2" long. 16 turns of 18
gauge
wire - 1.5 uH
416T or 432T - 5/8" diameter X 2" has 32 turns of
20 gauge wire - 3.4 uH
Will sell all of these small coils for $10.00 plus
shipping.

Wilcox ceramic core transmitting coil.
2-1/2" diameter X 3-3/4" long coil on a 5" long
form.
Has 26 turns of 14 gauge wire. Inductance is 21.1
uH.
Available for $9.00 plus shipping.

I will be adding more coils as time permits.

1291. Palomar antenna noise bridge FS

Yahoo group: amatuerradioswapfest
Date: 2006-01-04 23:29:33 UTC
From: Ken Simpson, W8EK
Topic: 1291 Message: 1291

For Sale:

Palomar R - X Antenna Noise Bridge

This unit is used to find the resistance and reactance of your antenna. It measures from 1 to 100 MHz, so it is good for HF and six meter measurements, but not 2 meters. The resistive component will measure between 0 and 250 ohms, and reactance from 0 to 70 ohms. It will also show if the reactance is inductive or capacitive. You can also determine the length of feedline, and many other things. It is powered by a 9 volt battery.

This particular unit works fine and appears to never have been used. It is in its original box, and has the paper work with it.

$50 plus shipping from Florida.

Thanks.

Topic: 1294 Message: 1294

Drake items for sale:

Case for Drake TR-22 C
This is the black case that fits the Drake TR-22 C, and has a pocket for the microphone, plus cutouts in the back for antenna, power, etc. It is good shape, except that the Drake Logo is not near as brilliant as it once was. $12

Drake 1525 EM Touchtone Microphone
This is the mic that was used to add a touchtone pad to a lot of rigs in the 70s and 80s. Normal hand mic from the front, but had a touchtone pad on the back. Four pin mic plug. This particular unit has been used, but is in good shape and includes paper work. $ 40

Drake hand microphone
This is like the hand mic that came with the Drake TR-72 and TR-22 C. It has the standard 4 pin plug wired for Drake/Kenwood, and is a 500 ohm mic. No model number on it, but it looks close to new, and works fine. $30

Cover for Heath Wattmeter - Drake color
This is the inverted "U" cover that fits the Heath HM-102 and HM-2102 wattmeters, and maybe other units. It is in nice shape. It has been painted black to match Drake gear. It is no longer Heath Green. $12

I have a NOS 6JB6 available. I only have one, but that may be enough to help someone. $20

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter and antenna, and has been optimized to have more attenuation in the 40 MHz region, where many TVs have their IF. According to the manual it is good for 1000 Watts "average", which would be about 2000 watts PEP, and has over 80 db attenuation at 41 MHz. SO-239 connectors on each end. This one looks close to new, and also has the single page "manual" with it. $ 30

Drake TV-5240-LP low pass filter
This number is correct; it is not a TV-5200. This filter is different than the typical low pass filter. It has an SO-239 connector on each end, but instead of being long and skinny, the enclosure is about 5 inches square. I think this is a

fairly old filter. It has brownish/gray paint over the copper
colored case. I have not been able to find any specs on
this filter. It does say "For use in 52 ohm line of transmitters
operating below 30 Mc." printed on it. If anyone has any
additional information on it, I would appreciate hearing. $30

Drake TV-300-HP high pass filter
High Pass filter for the TV for 300 ohm twin lead.
This filter is collectable, and is unused as best I can
determine. It is still in its original box (not the newer
blister pack), with an "RLD" logo on it, and says
"NEW TV-300 HP High Pass Filter, Attenuates
0-52 MHz". A grounding strap is also attached. $ 15

Prices do not include shipping from Florida.

Thanks.

1303. REDUCED: Powercon Vibrator Power Supply

Yahoo group: amatuerradioswapfest
Date: 2006-01-13 19:12:23 UTC
From: Brian Carling
Topic: 1303 Message: 1303

REDUCED:

POWERCON Vibrator Power Supply - Converts 12V DC
to 110V AC.

This is how we did it in the old days before
transistors!
Could probably be easily set up with a bridge
rectifier,
fullwave, doubler or whatever to produce
something useful like 400-700V DC for your
boatanchor projects.

Comes in a heavy duty metal case with handle.
It has output voltage selector
settings for LOW-MED-HIGH-MAX!
It is designed to produce 110V AC from 12V DC
at 300 Watts continuous.

If anyone would enjoy experimenting with
vibrator power supplies this is just
what you would enjoy a lot. May be easily
adapted to providing higher DC voltage for
tube plate supply by using diode doubler circuit.

Available for $8.00 plus shipping

Picture and details at:
http://www.af4k.com/miscpart.htm

1304. Coax connectors and adapters FS

Yahoo group: amatuerradioswapfest
Date: 2006-01-14 14:16:59 UTC
From: Ken Simpson, W8EK
Topic: 1304 Message: 1304

```

Prices are per connector. Several of each are available.
-
-
UHF series (standard PL-259 and SO-239 as used by most hams)
-
PL-259 male UHF connectors $1
.......used, but good $.75
-
Reducing adapters for PL-259 connectors
UG-175/U for RG-58, 52 ohm coax $.25
UG-176/U for RG-59, 75 ohm coax $.25
-
Right angle UHF (basically SO-239 on one end,
and PL-259 on the other end) $3
-
UHF double female (two SO-239 together) $4
-
UHF double male (two PL-259 together) $5
-
"T" connector with two female (SO-239) and one male
(PL-259) connection - $8
-
Chassis mount SO-239 connectors $1
-
UHF female (SO-239) to type "F" Male (as used on cable TV) $6
-
-
BNC connectors and adapters
-
Chassis mount BNC female - $4
-
Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5
-
UHF Male (PL-259) to BNC female (opposite of above) $5
-
BNC "T" - two female and one male - $6
-
Type "F" (cable TV) female to BNC male - $6
-
-
Type N right angle connector $ 8
-
```

-
Prices do not include shipping from Florida, which
should be inexpensive via first class mail.
-
Thanks.

1313. FS: Curtis EK-38 KEYER

Yahoo group: amatuerradioswapfest
Date: 2006-01-21 14:35:49 UTC
From: Brian Carling
Topic: 1313 Message: 1313

FOR SALE:

Curtis EK-38 Keyer - Great for working CW with
paddles.
It looks like a good one. Adjustable from 8 to 50
wpm.
Very stylish, wrap-around cabinet. Has controls
for
sidetone volume, speed in WPM, tune switch for
key-down.
On the rear there are jacks for your paddles,
xmtr,
straight key in, and a fuse. Importantly - it also
has
a SWITCH for RELAY - TRANSISTOR, so that you can
use it
to key TUBE TRANSMITTERS!
Requires 120V AC. Power cord is missing but easily
replaced. Sold as-is and untested. May work fine.
Available for $25.00 plus shipping.

Picture and details at:
http://www.af4k.com/miscpart.htm

1314. REDUCED: Collins & Hallicrafters knobs etc.

Yahoo group: amatuerradioswapfest

From: Rodger
Topic: 1316 Message: 1316

I have a kenwood tm-v7a that I would like to trade. The radio works fine but the screen has lines through it it is a common problem with the tm-v7a tha was built in 1998. I am looking to trade for either a icom ic-v8 or a vertex vx-150. Or I will consider other handhelds. If anyone is enterested please email me at fireman_690@...

1317. Wattmeters and SWR Bridges FS

Yahoo group: amatuerradioswapfest
Date: 2006-01-24 13:37:41 UTC
From: Ken Simpson, W8EK
Topic: 1317 Message: 1317

SWR Bridges and Wattmeters For Sale:

HyGain Model 412 B, HF wattmeter
This meter will measure your HF power in three ranges --
2000 Watts, 200 Watts, and 20 Watts. Of course it will
measure forward and reflected power, and SWR. It is
in nice shape, and works fine. $ 50

Dual meter SWR Bridge
Swan SWR-1 A
This unit has two meters on it. The meter on the left
reads forward power and the meter on the right reads
reflected power. It is in a heavy metal enclosure with
two SO-239 connectors coming out of the back. It
works fine and looks like new. $ 20

ParaDynamics PDC-1
This HF wattmeter / SWR bridge will read forward and
reflected power with either 100 W or 10 W full scale. It
is relatively small, making it great for mobile operation.
Of course with a 10 W scale, it would be useful for QRP
operation as well. $18

SWR Bridge
This is the standard HF SWR bridge in a gray crinkle box
about 6 inches long and a couple inches square, with SO-239
connectors coming out of each end. It works fine. $12

Prices do not include shipping from Florida.

Thanks.

Orlando Hamcation Boatanchor Bash / Lunch Eyeball QSO

Last year we did it at 12 noon Saturday at the Golden Corral
which is JUST WEST of the hamfest site on Route 50.
It's about 2.4 miles down on the right as you head west.

The hamfest address is:
4603 West Colonial Drive, Orlando, FL 32808-8158

The Golden Corral is at:
7251 W Colonial Drive, Orlando, FL 32818
(407) 297-1920

DIRECTIONS:
Start out going WEST on W COLONIAL DR / FL-50 W...

Directions:
Start out going WEST on W COLONIAL DR / FL-50 W
End at 7251 W Colonial Drive.
It will be on your right... just after HIawassee Road.

The place gets crowded, so if you are coming you are
advised to look for someone in the group that you know,
OR I can wear a floppy green hat of that will help!

EVERYONE WELCOME, but especially if you love old tube radios!
PASS THE WORD!

Yahoo group: amatuerradioswapfest
Date: 2006-02-01 21:34:02 UTC
From: Brian Carling
Topic: 1327 Message: 1327

FOR SALE:
Jones Micromatch MM563 QRP SWR System.
This is an exceptionally nice VHF/UHF type reflectometer
in excellent shape.
One of the nicest I have seen. Comes with N type
connectors and BNC adapters.
RANGES: 4 Watts, 12 Watts and SWR. Also has
continuously variable CAL adjustment and FORWARD
range adjustment so that SWR is read accurately
at any power. The coupler is made of solid brass and
is still shiny and new looking. Has gold letters raised
up on the name plate.

Available for $45.00 plus shipping.

Picture and details at:
http://www.af4k.com/miscpart.htm

1329. Heath items FS

Yahoo group: amatuerradioswapfest
Date: 2006-02-04 12:46:33 UTC
From: Ken Simpson, W8EK
Topic: 1182 Message: 1329

Heath items for sale:

Heath HM-102 wattmeter
Covers 1.8 to 30 MHz, with 200 W and 2000 W full
scale. It can also be used to check SWR, and has a
remote sensor that can either be left inside the meter,
or separated from the actual meter by about 3 feet.
SO-239 connectors in and out. This particular meter
is in nice shape. Paper work included for $40.

Heath hand microphone
This is not the GH-12 hand mic. It is slightly smaller,
but it does say "Heath" on the front of it. The most
important part is that it is high impedance, and that
it has the 2 pin Amphenol connector on it, as used
by the HW and SB lines, and most other Heath rigs.
To put it another way, it is ready to use by plugging
it in to your HW-100, SB-100, or whatever. It works
fine, although its original white color is somewhat
faded in some places. $ 30

Heath HD-15 phone patch
This is the unit with the VU meter on the left and 3 knobs
that match the SB series to the middle and right. Low or
high Z output to the transmitter. It can also be used as an
interface for PSK31, etc. It is in good shape.
Paper work included for $ 25.

Heath parts For Sale:

Heath Knobs for SB line
These are the knobs used on most all of the SB line, and
are the size with the 1 1/8 inch skirt. They are not perfect,
but are in good shape. Three available for $4 each.

Heath Knobs for HW-2036, HW-202, etc.
These are all "push on" knobs, with no set screw.
Larger, 3/4 inch skirt. Six available for $2 each.
Smaller, 1/2 inch skirt. Two available for $2 each.

Cover for Heath Wattmeter
This is the inverted "U" cover that fits the Heath HM-102
and HM-2102 wattmeters, and maybe other units.
No scratches, dents, or dings that I can find.
It has been painted black to match Drake gear.
It is no longer Heath Green. $12

Mu Metal shield for 3 inch CRT
>From the SB-614, but the same one is used for
the SB-610, and other units. It should fit most
3 inch CRTs. $10

I still have a fair number of parts from an SB-614
monitor scope, including focus controls, position
controls, etc. I do NOT have the power transformer
or high voltage caps. Please let me know what
you might need.

ORIGINAL Heath manuals. These are the manuals
only. They are all originals, and not copies, and all
are in very, very nice condition.

Heath IP-2728 Regulated Power Supply
1 to 15 volt regulated power supply - 1976
Schematic included. $12

Heath HW-2021 Assembly manual - 1975
For 2 meter hand held transceiver
No check marks in book. $10

Heath HN-31 A "Cantenna" Dummy Load
This is the "A" model dated 1982
No check marks in book. $10

GD-600 Photoelectric Light Switch
Very nice condition. Schematic is
part of book. $6

These are original manuals only.

Prices do not include shipping from Florida.

Thanks.

From: Ken Simpson, W8EK
Topic: 1330 Message: 1330

Kenwood items for sale:

Kenwood MB-13 mobile bracket
This is the "quick disconnect" mobile bracket used for the
TS-50 transceiver and also the AT-50 antenna tuner.
Maybe others. This one is in nice shape for $35.

Kenwood PB-15
This is the battery pack for the TR-2200 A, 2 meter rig.
Actually, it is two battery packs, that pop in to the rig.
It is still in its original box, unused. $20

Small hand mic that came with the Kenwood TR-7200
and TR-2200 A. It has the standard 4 pin plug wired
for Drake/Kenwood, and is a 500 ohm mic. This one says
Drake on it, but it is the same as the Kenwood microphone.
No model number on it, but it looks close to new, and
works fine. $30

Special Rubber Duck antennas for Kenwood TH-21 / 31 / 41
series HTs with the threaded connector
Aftermarket stubby, 3.3 inches long $10
Kenwood RA-8 Stubby, 4 inches long $10
Kenwood regular, 6.6 inches long $10

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. $5

Prices do not include shipping from Florida.

Thanks.

Topic: 1334 Message: 1334

FOR SALE: SEMCON RC115 CAPACITANCE / IMPEDANCE METER - very nice. This is a combined Capacitor Analyzer, impedance bridge and transformer analyzer. This is the most comprehensive capacitor analyzer I have ever seen. Checks capacitor value, leakage etc. at up to 600 Volts DC. It is also an impedance meter. Analyzes transformers. Measures POWER FACTOR, etc. etc. Also works as a megger to check insulation resistance. Excellent working condition. For 120V AC 60 Hz operation. Available for $59.00 plus shipping.
CORNELL-DUBILIER CDA-5 Decade Capacitance Box. - excellent
This substitution box is in a beautiful bakelilte case, and it covers 0.0001 uF to 0.0199 uF.
All capacitance setting rated for up to 600V DC. A great addition to any shack or experimenter's lab. Excellent condition.
Available for $20.00 plus shipping. ME-82/U Wattmeter and Dummy Load VHF-UHF, military surplus. Measures power from 50 to 600 MHz. Load is 52 ohms. Meter movement is the same as on Jones Micromatch equipment. Wattmeter scale shows RF power in the range of 0 - 120 Watts. Has Type N connector. Handy carrying handle swings out of the top. Has large heatsink. Excellent working condition. Available for $45.00 plus shipping. Pictures and details at: http://www.af4k.com/testgear.htm

1337. Autek QF-1 A filter FS

Yahoo group: amatuerradioswapfest
Date: 2006-02-14 22:59:59 UTC
From: Ken Simpson, W8EK
Topic: 378 Message: 1337

Audio Filter For Sale:

Autek QF-1 A Audio Filter
This is an audio filter that goes between your rig and speaker.
It runs off of 110 V AC, and will peak, notch, or become a low
pass or high pass filter. Selectivity (bandwidth) and frequency
are adjustable from the front panel. This is the "A" model that
also has an additional notch filter added. The input is an 1/4 inch
phone plug, and the output is a 1/4 inch jack on the rear panel.
This particular unit looks very close to new, and works 100%.
With paper work for $ 50 plus shipping from Florida.

Thanks.

From: Brian Carling
Topic: 1339 Message: 1339

FOR SALE:

6 Band QRO COIL - 2 to 4 KW final tank inductor.
Silver plated copper tubing.
3" diameter X 10" long. Extra Heavy Duty for
the most demanding RF final.
Has 19 turns. Approximately 11.0 uH PLUS an end-on
coil with 5.5 more turns 2.5" diameter.
Total inductance = 12.5 uH. Mounted on heavy
lucite support bracket
with 4 mounting holes. The tubing is 1/4" and
3/16" diameter tubing.
Has 5 taps for six of the ham bands when using
a 250 pF variable.
With a 550 pF plate capacitor it can go down
to 160m.
Available for $39.00 plus shipping.

1341. FS: Heathkit HD-15 Patch

Yahoo group: amatuerradioswapfest
Date: 2006-02-18 13:09:13 UTC
From: Brian Carling
Topic: 1341 Message: 1341

FOR SALE: Heath HD-15 Phone Patch - top notch.

This is the patch that has the VU meter on
the left and 3 knobs that match the SB series
radios. Looks great with HW series too. HI or
LO Z audio output to transmitter. It can be
used as an interface to your computer for
digital modes like PSK31, MT63, RTTY etc.

This unit is in excellent condition. Comes
with schematic.
Available for $20.00 plus shipping.

Picture and details at:
http://www.af4k.com/miscpart.htm

1342. TenTec items FS

Yahoo group: amatuerradioswapfest
Date: 2006-02-18 14:46:46 UTC
From: Ken Simpson, W8EK
Topic: 1108 Message: 1342

TenTec items For Sale:

TenTec 546 Omni D, series C, HF CW / SSB xcvr.
All solid state, with up to 100 W output. The ALC can
also be turned back with a front panel control for QRP
operation. Covers 160 through 10 meters, including the
10 MHz WARC band. Full QSK on CW, and a fantastic
receiver. Terrific audio quality on SSB also. Built in audio
CW filter. Digital read out. This one is in good shape,
but has some wear around the audio gain control. With
manual for $275.

25 amp switching power supply
This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel
around it. It is in a case that is the same size as a 243
remote VFO. It has an ammeter on the front, along with
Switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,
but says "Switcher/25" on it. It is very quiet, and well
shielded, and does not produce any electrical noise that
I could find. I am not positive if TenTec made this, or if it
is homebrew to look like TenTec. If it is homebrew, it
certainly is very professionally done. $120

TenTec 299 Voice synthesized frequency counter
This unit is used with the TenTec Omni 546 series A, B, C,
some Argonauts, Corsair, and others. It will work with
other rigs (such as the Triton), with minor mods to get
the right connections.
The 299 is used primarily for blind hams who can not read the
frequency readout on the transceiver. By pushing a button, it
will "speak" the frequency (to tenth of a KHz). A front panel
switch permits selection of the entire frequency, or you can
eliminate the MHz, and give only the KHz. There is also a
volume control on the front panel.
Of course it can also be used to give a "voice digital readout"
to a rig with an analog dial.
This particular unit is in great shape electrically. Cosmetically
it has some wear, especially close to the button that is pushed
to activate it. $ 190

WARC band crystal for 24.5 MHz for Omni C $20

TenTec 289 noise blanker for the Delta 580 transceiver
This very effective noise blanker can be added the 580 Delta

to help get rid of ignition noise, and is especially effective for mobile use. It is a rare item! $100

TenTec 225 power supply
This supply is made to match the Argosy transceiver. It supplies 13.8 volts at up to 9 amps. This one is in very nice shape. I can not find a scratch on it. Paper work included for $95.

Prices do not include shipping from Florida.

Thanks.

1343. TVI filter FS

Yahoo group: amatuerradioswapfest
Date: 2006-02-18 23:25:48 UTC
From: Ken Simpson, W8EK
Topic: 1343 Message: 1343

Low Pass TVI filters For Sale:

B & W 425 low pass filter
B & W TVI filter, 52 ohm. It cuts off just above 10 meters, and will handle 1500 Watts. SO-239 connector on each end. This is the older 425, which is much heavier, and has the copper case. This one has just enough of the paint coming off to show the copper case underneath.
With paper work for $ 30.

Drake TV-1000-LP Low pass filter
This is the filter that is in the copper case, and may also be used on the low end of six meters, as well as HF. It is a 50 ohm filter and is good for 1000 W AM below 30 MHz (which would be over 3000 Watts PEP SSB), and about 200 W up to 52 MHz. With paper work for $ 30

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter and antenna, and has been optimized to have more attenuation in the 40 MHz region, where many TVs have their IF. According to the manual it is good for 1000 Watts "average", which would be about 2000 watts PEP, and has over 80 db attenuation at 41 MHz. SO-239 connectors on each end. This one looks close to new, and also has the single page "manual" with it. $ 30

Nye Viking Low Pass Filter Model 020-001
Eliminate the harmonics going out your feed line, and reduce TVI. It is rated at 2000 watts, with over 65 db of attenuation above 57 MHz. $30.

Drake TV-5240-LP low pass filter
This number is correct; it is not a TV-5200. This filter is different than the typical low pass filter. It has an SO-239 connector on each end, but instead of being long and skinny, the enclosure is about 5 inches square. I think this is a fairly old filter. It has brownish/gray paint over the copper colored case. I have not been able to find any specs on this filter. It does say "For use in 52 ohm line of transmitters operating below 30 Mc." printed on it. $30

Alinco ELP-60 D LX low pass filter
For 50 ohm systems, with up to 500 watts of power.
This one has an SO-239 on one end, and about a 2 foot

length of coax and PL-259 on the other end. $30

Ameco LN-2 low pass filter
This filter is rated at 100 Watts, with an SO-239
connector on each end. $12

High Pass TVI filter for the TV set:
Drake TV-300-HP
High Pass filter for the TV for 300 ohm twin lead.
This filter is collectable, and is unused as best I can
determine. It is still in its original box (not the newer
blister pack), with an "RLD" logo on it, and says
"NEW TV-300 HP High Pass Filter, Attenuates
0-52 MHz". A grounding strap is also attached. $ 15

Prices do not include shipping from Florida.

Thanks.

i need the cable for the pc to the radio for a syntor 9000 model rigs
i have the rigs and pc so i can start to program them and any mods
needed for this as well

1356. FS: HE80 / KT340 Lafayette

Yahoo group: amatuerradioswapfest
Date: 2006-02-24 03:13:10 UTC
From: Brian Carling
Topic: 1356 Message: 1356

Lafayette fans:

Guys - I am open to trades or offers on this beautiful KT340, the same as an HE80 only kit built. This one is excellent in every way.

This is as nice a Lafayette receiver as you will ever see.
Excellent in every way. Covers 550 kHz to 30 MHz in
several bands including a logging scale and bandspread
tuning. Receives AM, CW and SSB. Has 455 kHz i.f.
Has many extra nice features, including Q Multiplier,
RF and AF Gain controls. Also has controls for BFO,
selectivity, S-meter etc. etc. Smooth sounding tube audio.
It was recently in regular use.
It is complete, original and unmodified. All the
original knobs etc. Good working condition.

Available for $235.00 plus shipping or best offer.

Picture and details at:
http://www.af4k.com/radios.htm

1357. Wattmeters and SWR Bridge FS

Yahoo group: amatuerradioswapfest
Date: 2006-02-25 15:35:01 UTC
From: Ken Simpson, W8EK
Topic: 1357 Message: 1357

Wattmeters and SWR Bridges For Sale:

HyGain Model 412 B, HF wattmeter
This meter will measure your HF power in three ranges --
2000 Watts, 200 Watts, and 20 Watts. Of course it will
measure forward and reflected power, and SWR. It is
in nice shape, and works fine. $ 50

ParaDynamics PDC-1
This HF wattmeter / SWR bridge will read forward and
reflected power with either 100 W or 10 W full scale. It
is relatively small, making it great for mobile operation.
Of course with a 10 W scale, it would be useful for QRP
operation as well. $18

SWR Bridge
This is the standard HF SWR bridge in a gray crinkle box
about 6 inches long and a couple inches square, with SO-239
connectors coming out of each end. It works fine. $12

Prices do not include shipping from Florida.

Thanks.

From: Ken Simpson, W8EK
Topic: 1148 Message: 1358

CW items for sale:

Bencher BY-1 Iambic Paddle.
True Bencher, and not the MFJ clone. This has the
black base, with chrome parts. It looks great, and
works the same. $65

J-38 Japanese copy
This is not a real J-38, but is a Japanese copy.
It has a shorting switch and ball bearings and works
great. $18

Generic key
This is a generic CW straight key with a plastic
(phenolic ??) base. It is nothing fancy, but it will do
the job. $12

Cable for straight key
It has a mono 1/4 inch phone plug on it, as is used
with most rigs with a straight key. $5

Prices do not include shipping from Florida.

Thanks.

1359. FS: Small Audio Transformers

Yahoo group: amatuerradioswapfest
Date: 2006-03-02 22:55:23 UTC
From: Brian Carling
Topic: 1359 Message: 1359

FOR SALE:

Audio Driver Transformers - 15K to 60K CT.
Suitable for a small modulator up to 15 or 25 watt
class or may be used as an interstage or
input transformer. Frequency response is
200 Hz - 6000 Hz.
These are new and they are round, potted type.
Dimensions approx. 2" tall by 7/8" diameter.
QTY 8 available for $12.00 each.

ALSO:

Audio Driver Transformer - 50K to 50K CT.
Suitable for a small modulator up to 15 or
25 watt class or may be used as an interstage
or input transformer. Frequency response
200 Hz - 6000 Hz.
These are new and they are round, potted type.
Dimensions approx. 2" tall by 7/8" diameter.
QTY 8 available for $12.00 each.

I also have some small 600 ohm to 600 ohm
transformers available if anyone would like some.

1360. FS: Large VU Meters

Yahoo group: amatuerradioswapfest
Date: 2006-03-02 23:26:31 UTC
From: Brian Carling
Topic: 1360 Message: 1360

FOR SALE: Large VU Meters.

I have two of these large, really neat 4" VU
meters
for sale. One is an ALTEC and the other has no
name
brand, buit looks to be the same size. Four inches
square
with rounded corners.

These are the kind of meters that were used in old
audio consoles for radio broadcasting, recording
studios
etc.

Available for $24.00 each plus shipping.

Pictures and details at:
http://www.af4k.com/meters.htm

1362. FS: 150 Watt RF Tank Coil 80m thru 6m

Yahoo group: amatuerradioswapfest
Date: 2006-03-04 03:49:51 UTC
From: Brian Carling
Topic: 1362 Message: 1362

FOR SALE:

RF Final Tank Coil for KNIGHT T150 TRANSMITTER.
Bandswitching 80 through 6m bands.
Would work well for any 150-200 watt class RF final.
Excellent condition with standoffs.
Available for $18.00 plus shipping.

Picture and details:
http://www.af4k.com/coils.htm

1363. FS: $9.00 Shortwave Receiver

Yahoo group: amatuerradioswapfest
Date: 2006-03-04 13:15:34 UTC
From: Brian Carling
Topic: 1363 Message: 1363

FOR SALE:Longines Symphonette Portable Transistor
Radio Receiver.

This Model 4597-B Receiver has AM, FM and two shortwave
bands, 1.7 to 4.9 MHz and 4.9 to 12 MHz.
Has built-in telescopic antenna in good shape.Dual
rate tuning for bandspread, with all original knobs.
Lighted slide rule type dial with on/off switch.
Volume and tone controls. Earphone jack for quiet listening.
Operates on internal batteries or external power source
(not included) I was told that this works but
I have not tested it.

Reduced to $9.00 plus shipping

Picture and details at:
http://www.af4k.com/radios.htm

1364. FS: TEMPO ONE HF TRANSCEIVER

Yahoo group: amatuerradioswapfest
Date: 2006-03-04 13:55:46 UTC
From: Brian Carling
Topic: 1364 Message: 1364

TEMPO ONE HF TRANSCEIVER. With Power Supply.

The Tempo is a 5 band 80m thru 10m HF transceiver rated
300 watts SSB and 240 watts CW input. Features VOX, AGC,
built-in calibrator and RIT. LOOKS GREAT.
These were imported by HENRY RADIO in the late 1970s
and feature tubes in the RF final amplifier.
Many advanced features. Highly stable VFO.
Comes with the matching power supply - speaker unit and
all necessary cables.
Has had VERY little use, and the protective plastic was
just recently removed off the face panel to reveal an
immaculate black front panel! Works fine on all bands.
The only thing this rig needs is there uis a slight
scratch sound in the function switch. Simply spray it
and you have a showroom condition radio.
Looks almost like new. No scratches or dents etc.
All original with no modifications.
Comes with the power supply and a copy of the manual.

Will sell for $225.00 plus shipping.

Pictures and details at:
http://www.af4k.com/radios.htm

1365. 2 meter mobile gain antenna FS

HT speaker microphones For Sale:

Pryme Speaker mic
Fits Yeasu VX-1, 2, 5, 6, 7, FT-60, and others that take the
single pin connector with 4 conductors.
Close to new condition for $25.

Speaker microphone for HT
It says Densei SM-505 on it, but appears to be the same as
the Icom HM-46 speaker-mic. It fits Icom, Yaesu, and others
that take the 2.5 mm and 3.5 mm connectors. Very nice
condition for $18.

Yaesu MH19A2B ear bud and mini-mic.
With 2.5 mm and 3.5 mm connections.
It works fine and looks fine. $18

MFJ 286 speaker microphone
This speaker mic can be used on most Kenwood
HTs. It is a standard size speaker mic -- not one
of the little sub-miniature types. It has not been
used. With paper work for $15.

Prices do not include shipping from Florida.

Thanks.

From: Ken Simpson, W8EK
Topic: 1367 Message: 1367

Hand Microphones For Sale:

Drake hand microphone
This is like the hand mic that came with the Drake TR-72
and TR-22 C. It has the standard 4 pin plug wired for
Drake/Kenwood, and is a 500 ohm mic. $30

Kenwood MC-53 DTMF and control microphone
This mic has the touchtone pad, but also has an additional
four buttons for tasks such as VFO or memory selection,
memory recall, calling a priority frequency, and a programmable
button, along with up and down buttons. It has the modular
connector. This one is in very nice shape, and works fine. $50

Data Signal "Data-Coder 5" touchtone mic
This mic has a 12 digit touchtone (DTMF) pad on it, plus a
normal low impedance microphone. Like new. $40

Prices do not include shipping from Florida.

Thanks.

1368. Drake items FS

Yahoo group: amatuerradioswapfest
Date: 2006-03-05 14:08:21 UTC
From: Ken Simpson, W8EK
Topic: 1294 Message: 1368

Drake items for sale:

Case for Drake TR-22 C
This is the black case that fits the Drake TR-22 C, and has a pocket for the microphone, plus cutouts in the back for antenna, power, etc. It is good shape, except that the Drake Logo is not near as brilliant as it once was. $12

Drake hand microphone
This is like the hand mic that came with the Drake TR-72 and TR-22 C. It has the standard 4 pin plug wired for Drake/Kenwood, and is a 500 ohm mic. No model number on it, but it looks close to new, and works fine. $30

Cover for Heath Wattmeter - Drake color
This is the inverted "U" cover that fits the Heath HM-102 and HM-2102 wattmeters, and maybe other units. It is in nice shape. It has been painted black to match Drake gear. It is no longer Heath Green. $12

Drake TV-1000-LP Low pass filter
This is the filter that is in the copper case, and may also be used on the low end of six meters, as well as HF. It is a 50 ohm filter and is good for 1000 W AM below 30 MHz (which would be over 3000 Watts PEP SSB), and about 200 W up to 52 MHz. With paper work for $ 30

Drake TV-5240-LP low pass filter
This number is correct; it is not a TV-5200. This filter is different than the typical low pass filter. It has an SO-239 connector on each end, but instead of being long and skinny, the enclosure is about 5 inches square. I think this is a fairly old filter. It has brownish/gray paint over the copper colored case. I have not been able to find any specs on this filter. It does say "For use in 52 ohm line of transmitters operating below 30 Mc." printed on it. If anyone has any additional information on it, I would appreciate hearing. $30

Drake TV-300-HP high pass filter
High Pass filter for the TV for 300 ohm twin lead. This filter is collectable, and is unused as best I can determine. It is still in its original box (not the newer blister pack), with an "RLD" logo on it, and says "NEW TV-300 HP High Pass Filter, Attenuates 0-52 MHz". A grounding strap is also attached. $ 15

Prices do not include shipping from Florida.

Thanks.

From: Ken Simpson, W8EK
Topic: 1375 Message: 1375

Astron power supplies For Sale:

Astron RS-35 M
This supply produces 13.8 V DC at 25 amps continuous,
and 35 amps intermittent. It has both an ammeter and a
voltmeter, and is very heavy duty. This one works 100%
and looks like it just came out of the box. $140

Astron VS-20 M
This supply is variable. One can adjust the voltage, and
set the current limit with front panel controls. At 13.8 V DC
it is rated at 16 amps continuous and 20 amps intermittent,
however the current limit can be set, which is useful to
protect the finals on many solid state rigs. It has both an
ammeter and a voltmeter, although the ammeter has been
replaced. Of course it works fine. $95

Astron RS-12 A
This supply is a 13.8 V DC supply, rated up to 12 amps
intermittent duty. It works fine and looks fine also. $60

Prices do not include shipping from Florida.

Thanks.

Hustler HF mobile antennas for sale:

80 meter "Super" high power resonator RM-80 S
This is the "high power" resonator for 80 meters that
can be used mobile to give larger bandwidth, or can
also be used on top of a Hustler 4BTV to make it in
to a 5BTV vertical. Almost like new for $ 38

"Standard" Hustler resonators:
40 meter resonator RM-40, still in original packaging $22
20 meter resonator RM-20 $ 15
.....RM-20 still in the original packaging $20
15 meter resonator RM-15 $ 14

"Super" Hustler resonators (high power version):
80 meter RM-80 S $ 38
40 meter RM-40 S $ 25
20 meter RM-20 S $ 20
15 meter RM-15 S $ 18
10 meter RM-10 S $ 16

Hustler mobile mast:
MO-3 straight, 54 inch long standard length mast $ 20
MO-4 Short mast (22 inches) $15

Prices do not include shipping from Florida.

Thanks.

From: Rodger
Topic: 1046 Message: 1381

I have a new vertex vx-150 that I am looking to trade for a cable for my motorola spectra or a vhf radio that will do narrow band. If you have any thing you would like to trade please email me at [EMAIL=fireman1829@eastex.net.]fireman1829@....[/EMAIL] The vertex is in perfect shape I have a lapel mic for it and the manual and box. I even have the invoice from where it was bought. Please email me if you would like to trade. I will also through in the motorola if someone would like to trade for another vhf mobile. I have everything but the control cable for this radio. I even have the siren/pa unit with cable. I would really like a icom f100 series radio or a kenwood tk-780. I have a lot of radio equipment I will trade all of it for one of these radios. On the icom I am really looking for a f121 or simular radio. I have a efjohnson viking radio in almost new condition with no ecc and I have a midland 70-440a with all ecc. I have a alinco dj-180 with charger the radio does work but the battery latch is broken and the battery is taped on the radio. Please email me for the other radio equipment.

1385. TVI filters FS

Yahoo group: amatuerradioswapfest
Date: 2006-03-26 20:51:36 UTC
From: Ken Simpson, W8EK
Topic: 382 Message: 1385

Low Pass TVI filters For Sale:

B & W 425 low pass filter
B & W TVI filter, 52 ohm. It cuts off just above 10 meters, and will handle 1500 Watts. SO-239 connector on each end. This is the older 425, which is much heavier, and has the copper case. This one has just enough of the paint coming off to show the copper case underneath.
With paper work for $ 30.

Nye Viking Low Pass Filter Model 020-001
Eliminate the harmonics going out your feed line, and reduce TVI. It is rated at 2000 watts, with over 65 db of attenuation above 57 MHz. $30.

Drake TV-5240-LP low pass filter
This number is correct; it is not a TV-5200. This filter is different than the typical low pass filter. It has an SO-239 connector on each end, but instead of being long and skinny, the enclosure is about 5 inches square. I think this is a fairly old filter. It has brownish/gray paint over the copper colored case. I have not been able to find any specs on this filter. It does say "For use in 52 ohm line of transmitters operating below 30 Mc." printed on it. $30

Alinco ELP-60 D LX low pass filter
For 50 ohm systems, with up to 500 watts of power.
This one has an SO-239 on one end, and about a 2 foot length of coax and PL-259 on the other end. $30

Ameco LN-2 low pass filter
This filter is rated at 100 Watts, with an SO-239 connector on each end. $12

High Pass TVI filter for the TV set:
Drake TV-300-HP
High Pass filter for the TV for 300 ohm twin lead.
This filter is collectable, and is unused as best I can determine. It is still in its original box (not the newer blister pack), with an "RLD" logo on it, and says "NEW TV-300 HP High Pass Filter, Attenuates 0-52 MHz". A grounding strap is also attached. $ 15

Prices do not include shipping from Florida.

Thanks.

1386. FS: icom R10 scanner with accessories

Yahoo group: amatuerradioswapfest
Date: 2006-03-28 14:58:47 UTC
From: goshawk
Topic: 1386 Message: 1386

hello list,
I have an Icom R10 handheld scanner to sell.
The Icom IC-R10 is a compact, rugged and high performance receiver.
All mode (FM, WFM, SSB, CW, AM) receiver
Newly designed 'busy catch scan'
Wide-band coverage with all mode receive capability (0.5 MHz to 1300 MHz)
Real-time bandscope
(a first for handhelds) making it easy to bind busy frequencies and see the propogation conditions of frequency bands.
Ample memory channels with memory name function
1000 memory channels are available in the IC-R10, and 8-character memory names are storable for each channel and each bank for easy recognition. In addition, a maintenance free EEPROM is employed for memories.
Improved receiver characteristics
Tuneable bandpass filters are employed in the IC-R10 to provide good image and intermodulation
rejection characteristics, these are Programmable from a PC as well as receiver
Useful scanning functions
Scan types include programmed, memory, bank, modes as well as a new scan type, 'BUSY CATCH'
scan for FM mode. The 'BUSY CATCH' scan searches for the next busy frequency using a 'para' receiver circuit while the actual receiver circuit is detecting a signal (scan pauses) Then, the actual receive frequency jumps to the next busy frequency when scan resumes. This speeds up the total scan speed.
VSC Function
Icom's original VSC (Voice Scan Control) is available - the first time on a handheld receiver. This function pauses during scan only when modulated signals are received.
Multi function dot-matrix LCD
A multi function dot-matrix LCD is employed in the IC-R10 to display a great variety of information, such as receive frequency, mode, real-time band scope and memory names, etc.
Full computer access capability
The IC-R10 can be connected to your home computer for cloning, downloading and receiver control. With an optional CS-R10, memory contents, frequency, mode and memory names, etc. can be programmed or downloaded quite simply. The receiver control system, Cl-V, is employed in the IC-R10 to control receive frequency, mode and signal strength, etc. In addition, the IC-R10 has 2 separate connectors for cloning and Cl-V connection.
EDIT
switch provides easy editing or revision of memory contents.
Memory copy
Auto Mode and Tuning Step for simplified operation.
36 mm internal speaker for ample power output and clear audio.
AA Battery Power
4 AA size dry cells (or Ni-Cad batteries) can be installed or a 4.5-16V external power supply can be connected.

100 Hz frequency resolution.
Built-in 20 dB attenuator.
AFC function
Noise blanker and Auto Noise limiter
Receiving System
SSB, CW, FM Triple superheterodyne
IF Frequencies
1st - 266.70MHz / 429.10MHz
2nd - 10.7MHz

Dimensions
48.5(w) x 130(h) x 31.3(d) mm

as well as the scanner and mains unit, I also have the computer cable and software, these have never been used, but that is not all!
I will also include an all purpose preamp, this is brand new, and has never been out of its box, it is fitted with BNC connections, so just right for the scanner. I will top this package off by including a portable desktop aerial, this has 2 telescopic aerials, 4 sucker feet, and a good length of cable with BNC plug, so is also just right for the scanner and preamp, again, the aerial has seen no actual use at all.
the actual scanner has only seen about 20 mins of use.
am looking for £200 for this whole package, but will consider sensible offers.
if interested, either call on 02084785841, or email,
goshawk@...

Simon

1392. Heath HD-1410 keyer for parts, plus other Heath parts and manuals FS

Yahoo group: amatuerradioswapfest
Date: 2006-04-01 13:50:14 UTC
From: Ken Simpson, W8EK
Topic: 1392 Message: 1392

For Sale:

Heath HD-1410 keyer

This unit is a parts unit. It does not work. It appears to key continuously when it is powered up. Solid sidetone. All of the electronic parts are there, but the front panel and the cabinet are missing. It has been years since I tried to repair it, and I can not find the cabinet parts. The ICs are socketed, so it could be an easy repair, but it is being sold as a parts unit. $10.

Other Heath parts For Sale:

Heath Knobs for SB line
These are the medium size knobs used on most all of the SB line (1 1/8 inch skirt). These are in very good shape. Three available for $4 each.

Cover for Heath Wattmeter
This is the inverted "U" cover that fits the Heath HM-102 and HM-2102 wattmeters, and maybe other units. It is in good shape. $12

Mu Metal shield for 3 inch CRT
From the SB-614, but the same one is used for the SB-610, and other units. It should fit most 3 inch CRTs. $10

I still have some parts from an SB-614 monitor scope, including focus controls, position controls, etc. I do NOT have the power transformer or high voltage caps.
Please let me know what you might need.

ORIGINAL Heath manuals. These are the manuals only. They are all originals, and not copies, and all are in very, very nice condition.

Heath IP-2728 Regulated Power Supply
1 to 15 volt regulated power supply - 1976
Schematic included. $12

Heath HW-2021 Assembly manual - 1975
For 2 meter hand held transceiver
No check marks in book. $10

Heath HN-31 "Cantenna" Dummy Load
No check marks in book. $8

Heath HN-31 A "Cantenna" Dummy Load
This is the "A" model dated 1982
No check marks in book. $10

GD-600 Photoelectric Light Switch
Very nice condition. Schematic is
part of book. $6

These are original manuals only.

Prices do not include shipping from Florida.

Thanks.

1393. Spider and other HF mobile antennas FS

Yahoo group: amatuerradioswapfest
Date: 2006-04-01 14:38:56 UTC
From: Ken Simpson, W8EK
Topic: 1393 Message: 1393

For Sale:

Spider HF mobile antenna resonators
I have the resonators for 40, 20, 15, and 10 meters that are made to screw into a plate that goes on top of a mobile mast. The only problem is that I can not find the mast, nor the plate that these resonators screw into. It is possible to use them with the Hustler MO-3 mast, and adapter plate, but it is not as nice looking as the original. The four resonators using the sliding collar that Spider has a patent on. All are in very nice condition. They look close to new. Set of four resonators for $50.

Other HF mobile items:

"Standard" Hustler resonators:
40 meter resonator RM-40, still in original packaging $22
20 meter resonator RM-20 $ 15
.....RM-20 still in the original packaging $20
15 meter resonator RM-15 $ 14

"Super" Hustler resonators (high power version):
80 meter RM-80 S $ 38
40 meter RM-40 S $ 25
20 meter RM-20 S $ 20
15 meter RM-15 S $ 18
10 meter RM-10 S $ 16

Hustler mobile mast:
MO-3 straight, 54 inch long standard length mast $ 20
MO-4 Short mast (22 inches) $15

Adapter plate to use 3 or 4 resonators simultaneously $ 12

80 meter "Super" high power resonator RM-80 S
This is the "high power" resonator for 80 meters that can be used mobile to give larger bandwidth, or can also be used on top of a Hustler 4BTV to make it in to a 5BTV vertical. Almost like new for $ 38

Prices do not include shipping from Florida.

Thanks.

1397. FS/FT Averatec 5400 Athlon 64 1.6 2800+ Laptop

Yahoo group: amatuerradioswapfest
Date: 2006-04-02 12:48:35 UTC
From: Chris Fox NI4L
Topic: 1396 Message: 1397

Averatec 5400 Athlon 64 1.6 2800+ 512 DVD Burner Win XP
It has a AMD Athlon 64 XP-M 2800+ processor 1.6Ghz 40gb hard drive
512mb of ram
15 inch LCD with no dead pixels
a DVD-RW / CD-RW burner
Lithium ion battery
a second monitor port
4 USB 2.0 ports
a PC Card slot
a 56K modem built in
10/100mbps wired ethernet nic built in
the Windows XP home restore disks
a LiteOn 115 ac power supply
It needs to be taken apart and have some heat grease put between the
processor and heatsink. When it gets hot it shuts off, checked AMD Processor
forums common problem they didn't put any grease on the processor. This
would make someone who is into laptops a good one. make me an offer loot or
trade what do you have? I figure value to be 4-500 bucks.There are some on
ebay listed for over 700.00
Thanks for looking.

1398. Astron power supplies FS

From: Ken Simpson, W8EK
Topic: 1375 Message: 1398

Astron power supplies For Sale:

Astron RS-35 M
This supply produces 13.8 V DC at 25 amps continuous,
and 35 amps intermittent. It has both an ammeter and a
voltmeter, and is very heavy duty. This one works 100%
and looks like it just came out of the box. $135

Astron VS-20 M
This supply is variable. One can adjust the voltage, and
set the current limit with front panel controls. At 13.8 V DC
it is rated at 16 amps continuous and 20 amps intermittent,
however the current limit can be set, which is useful to
protect the finals on many solid state rigs. It has both an
ammeter and a voltmeter, although the ammeter has been
replaced. Of course it works fine. $90

Astron RS-12 A
This supply is a 13.8 V DC supply, rated up to 12 amps
intermittent duty. It works fine and looks fine also. $55

Prices do not include shipping from Florida.

Thanks.

Date: 2006-04-08 13:38:51 UTC
From: Ken Simpson, W8EK
Topic: 1399 Message: 1399

Dipole antenna for 20 meters for sale:

This is a standard 20 meter dipole (about 33 feet long), complete with the heavy duty HyGain center insulator, which is worth about $20 in itself, the wire making up the dipole, and end insulators. Also included is about 50 feet of RG-58 coax cable, with a PL-259 attached to the radio end. It is in good shape. $35 plus shipping from Florida.

Thanks.

1403. FS: microset 13.8V 50A power supply.

Yahoo group: amatuerradioswapfest
Date: 2006-04-11 00:31:18 UTC
From: goshawk
Topic: 1403 Message: 1403

here is a Microset PT-50A 13.8V 50 Amp Power Supply. In excellent condition and fully
working, the 50A output is continuous, not peak as on some other units. is quite
large, dimentions are, 180 x 240 x 380mm. Cost new was ?250. the unit has seen only
a bit of use, but has only ever had 100W output radios used with it, so has not been
totally hammered, has a set of connections for the 50A output, and a cigarette lighter
type socket, which I think has a 15A output. the high output of this supply makes
it ideal for a lot of applications. This is a very heavy item at 15kg (not switch
mode) and has a large heatsink, so if possible I would recommend collection, as the
postage is going to be ?20 with proper ensurance cover. if possible, I am looking
for ?150 for this, but will consider sensible offers.
I will not post outside the UK, as it would be far too expensive.

if interested, please either call on 02084785841, or email to,
goshawk@...

Topic: 1404 Message: 1404

Magnetic and trunk lip antenna mounts for sale:

Magnetic mount with coax
Standard 3/8 inch 24 thread, about 3 inches in diameter, and black in color. Suitable for 2 meter, 440 MHz, or 6 meter antenna. Very good condition. $15

HyGain TLM Trunk Lip Mount
This trunk lip mount has a 5/16 inch stud on it. Ideal for 1/4 wave antenna. With coax for $14

Larsen "OM" coil and mount
This is made to mount on a flat surface, and requires 3 mounting bolts, plus a hole in the center for the coax. OM-450 - For 70 cm band - includes "stacked" whip for 5 db gain - Very good condition for $20

5/8 wave trunk lip antenna for 2 meters - complete
This looks similar to the Hustler BBLT-144. It is quite heavy duty, and includes the trunk lip mount with coax, loading coil, spring, and whip. Good condition. $25

Prices do not include shipping from Florida.

Thanks.

1412. Motorola Service Manuals

Yahoo group: amatuerradioswapfest
Date: 2006-04-22 03:20:47 UTC
From: Paul Finch
Topic: 1411 Message: 1412

Hello,

I just bought out a old bankrupt Motorola Service shop, I now have just about every kind of manual from HT-200's (yes I said HT-200!) to the latest radio Motorola sold up until about 5 years ago. I got two huge file cabinets full of manuals as well as several boxes full of the same thing. Also got three drawers of GE LBI manuals but unsure what's in there. If you need a manual let me know what radio/band and I will check stock, <grin>.

Also got some Sentor XX 800 MHz radios, multi-meter test sets, control cables, microphones, parts, as well as several other radios. One surprise, a brand new in the box Mostar radio that I think is 800 MHz LTR trunking radio.

If you ask for it I probably have it, this was a working Motorola Shop up until about 2 to 5 years ago.

Please respond directly back to me at wb5idm@... if interested.

Paul

Hello All,

Paul, you mentioned buying a bankrupt mobile two-way radio service shop. I am wondering if you are trying to make a go of the shop. The reason for my curiosity is because last summer, I met some people at a local hamfest who mentioned two-way radio shops going out of business. Has the industry changed so much, that it is not longer economical to repair the current radios?

Best Wishes
Richard

Yahoo group: amatuerradioswapfest
Date: 2006-04-23 02:41:24 UTC
From: Paul Finch
Topic: 1411 Message: 1415

Richard,

As a matter of fact I own a two way radio shop now, it is just a very small operation. I only have three real customers. The industry is very depressed. All of my main customers are municipalities. My greatest money maker is my tower business, I make twice as much with the towers as I do the two-way stuff.

There is still a need for two-way radio, it will never go away totally. It is different now than it was when I got into the business in the early 70's and will continue to change in the future. The greatest change now is the progression toward digital communications, at this point none of my customers need that but before long they will.

The shop that went bankrupt had started a wireless internet division and thought they were going to blow AOL out of the industry, they thought wrong.

I am a Icom dealer and repair some Kenwood stuff for my customers. I have very little use for this Motorola stuff I just could not let it go in the dumpster. I got the stuff at a really good price because I am essentially cleaning the new owners shop in the process trading him a little tower rent.

As far as repairing the radios, it is almost cheaper to buy a new one with a two year warranty than repair the old ones. I have an understanding with my customers, if the repair gets above a certain point I let them know and they decide if it's time for a new radio.

Paul

FT241 CRYSTALS FOR SALE:

These are the LF crystals in the 300 - 500 kHz range.

I got more of these than I needed... so:
Will sell 25 for $10.00 untested - some will work, and
it's possible that some will not.

CHANNELS - 14, 19, 60, 68, 317, 320
For example, Channel 68 = 496.3 kc.

There used to be the N4JVP calculator online but
I can't get it to work now. It was at:
http://www.subdevo.com:82/FT241/FT241.aspx

Picture and details at:
http://www.af4k.com/FT241_crystals.htm

From: Ken Simpson, W8EK
Topic: 376 Message: 1426

TenTec accessory items for sale:

TenTec 256 FM module
This module adds FM (both transmit and receive)
to the Paragon 585 and the Omni V 562, and maybe
others. It works fine, and includes all cables and
paper work for $85.

TenTec 258, RS-232 interface for Paragon
This option adds a DB-25 connector on the rear of
the Paragon, along with a board inside, and some
cabling, so that it can "talk" to a computer via an
RS-232 serial link. This is an extremely rare option.
It works 100%. Paper work included for $100.

Giehl Chip Firmware upgrade for Paragon 585.
This is a new EPROM that essentially upgrades the
585 Paragon to most of the features of a Paragon II.
With paper work for $50.

Prices do not include shipping from Florida.

Thanks.

From: Ken Simpson, W8EK
Topic: 1148 Message: 1428

CW keys for sale:

Birnal Electric Manufacturing Co. solid brass key
This key has a rectangular base, similar to the Nye Viking Speed-X 320-001, but somewhat larger, thicker, and heavier duty. It is all brass, in every part, except for the nice Navy Knob. The contacts are about 3/16 inches in diameter, instead of just points as some keys have. The action on this key is the finest I have ever used. Really superb. Cosmetically, I have not cleaned it, as I do not want to destroy the "patina" of the brass. It is in nice, 100% working condition. $100

Speed-X chrome key with rectangular base
I can not find the Nye Viking model number for this one. It looks like the Nye Viking 320-001, except it is chrome plated, instead of black crinkle. It might be the 320C-003 as shown at http://www.goofus.org/kk4dw3.html#MASTER except this one does not have a shorting switch. It is similar to the key at the extreme right shown at http://hedspeth.home.mindspring.com/cwkey.jpg except it is chrome on both the base and mechanism. It has a nice Navy knob, and very nice action. Being chrome plated, it looks very nice. $75

Military J-38 key
This is the "standard" straight key that has been used by the military for years and years. Shorting switch is included, along with many adjustments, so it can suit your fist. The black bakelite base is in good shape, as is the key itself. Everything works fine for $38.

Speed-X Nye-Viking 310-003 with Navy Knob and base
The Speed-X 310-003 is the classic oval design (similar to a J-38), in black crinkle. It has a shorting switch. It looks really great, and of course works fine. $35

Generic straight key
This is a generic CW straight key with a plastic base. The key is nothing fancy, however, it is mounted on a very nice piece of Oak wood, that makes it look very nice. Cable included for $30.

Generic brass colored, oval base key
This is similar to a J-38 (without the bakelite base), but is a Japanese copy. It is brass colored, but is not real brass.

No shorting switch. It works fine and looks fine. $15

Other CW items:

Bencher BY-1 Paddle
Standard Bencher with black base and chrome parts.
In very, very nice condition for $ 65.

MFJ 422 B-X electronic keyer
This keyer includes sidetone, and has adjustments for
volume, tone frequency, and weighting, as well as speed.
It will key either positive or negative voltages, and is
powered by an internal 9 V battery, or external 5 to 9
volt supply.
It is made to go on the back of a Bencher Paddle.
It works 100%, and looks great also. With paper
work for $45.

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo
connector on the end, like used by most rigs. It looks
great. $8

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch
phone plug on it, as is used with a straight key. $5

Prices do not include shipping from Florida.

Thanks.

1438. 2 meter and 440 MHz mobile antennas and mounts FS

Yahoo group: amatuerradioswapfest
Date: 2006-05-13 14:20:03 UTC
From: Ken Simpson, W8EK
Topic: 1438 Message: 1438

VHF and UHF Mobile Antennas and Mounts For Sale:

VHF (2 meter) antennas:

Larsen NLA-150 coil only
For use with a 5/8 wave (approx 4 foot) antenna
Fits the Larsen NLA mount and has about 3 db gain when
used with a 5/8 wave whip. In very good shape. $11

Larsen NMO-150 coil only
Fits the NMO mount made by many different companies
(including Larsen), and provides about 3 db gain, when
used with a 5/8 wave (about 4 foot) whip. $18

The whips for these are hard to ship, and it is best to pick
up a whip at your local Radio Shack, or similar store. I do
have some whips. They are $6 each if you need them.

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave (about 19
inch) antenna. Good condition for $7

Larsen Q
Fits a 5/16 inch stud, such as the Larsen LM mount, and others.
The whip can be cut for 2 meters, 220 MHz, or 450 MHz bands. $6

Antennas for 450 MHz:

Larsen NLA-450 coil and "stacked" whip
These fit the Larsen NLA mount, and have about 5 db gain on
the 70 cm band. Stacked whip is included. In nice shape. $14

Larsen "OM" coil and mount
This is made to mount on a flat surface, and requires 3
mounting bolts, plus a hole in the center for the coax. It does
not require a ground plane, so is useful on sailboats, and
other places where a ground plane is not available.
OM-450 - For 70 cm band. Includes "stacked" whip for 5 db gain.
Good condition for $20.

Mobile antenna mounts for sale:

Larsen NLA-MM
Magnetic mount for use with Larsen NLA mount antennas, such
as the NLA-Q, NLA-150, and NLA-450. It includes coax with a
PL-259 connector, and is in good shape. $22

Larsen NMO-MM
Magnetic mount for use with MNO-Q, NMO-150, and NMO-450
antennas made by Larsen and others. Coax is included, with a
PL-259 connector. Very nice condition for $25

Magnetic mount with coax
Standard 3/8 inch 24 thread, about 3 inches in diameter, and
black in color. Suitable for 2 meter, 440 MHz, or 6 meter antenna.
Very good condition. $15

HyGain TLM Trunk Lip Mount
This trunk lip mount has a 5/16 inch stud on it.
Ideal for 1/4 wave antenna. With coax for $14

Prices do not include shipping from Florida.

Thanks.

Astron power supplies For Sale:

Astron RS-35 M
This supply produces 13.8 V DC at 25 amps continuous,
and 35 amps intermittent. It has both an ammeter and a
voltmeter, and is very heavy duty. This one works 100%
and looks like it just came out of the box. $135

Astron VS-20 M
This supply is variable. One can adjust the voltage, and
set the current limit with front panel controls. At 13.8 V DC
it is rated at 16 amps continuous and 20 amps intermittent,
however the current limit can be set, which is useful to
protect the finals on many solid state rigs. It has both an
ammeter and a voltmeter, although the ammeter has been
replaced. Of course it works fine. $90

Astron RS-12 A
This supply is a 13.8 V DC supply, rated up to 12 amps
intermittent duty. It works fine and looks fine also. $55

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

Hi Brian,
Yes I will take the key, I sent you an email to your address but thought I should make sure your getting my emails. You had mention to respond a.s.a.p so I did...

$6.50 shipping
$6.00 key
total $12.50 let me know if this is correct..

I can send you a money order but it maybe Wednesday before I can get it out. Please send me some pictures of the key and damaged area to ke4cij@... I can pick up what I'll need to repair it. I don't care if I can't repair it, I can use the parts for it on another key.So no worries...hopefully I can at least make it look and work correctly.

Let me know if you agree and I can make arrangement to travel...I have an injury and its difficult for me to get around at this time..

Thanks

Chuck

1446. Kenwood TS-130 HF xcvr FS

Yahoo group: amatuerradioswapfest
Date: 2006-05-14 17:52:18 UTC
From: Ken Simpson, W8EK
Topic: 1446 Message: 1446

For Sale:

Kenwood TS-130 S, HF transceiver.

Operates SSB and CW, on 80 thru 10 meters and
includes the WARC bands. Effective speech
processor is also built in, as is the fan on the
solid state finals. It is a fairly small unit that would
work great for mobile use. Nominal 100 Watts
out, with digital readout. This one is as close to
100% electrically as I can tell, and looks OK also.

Manual included for $325 plus shipping from Florida.

Thanks.

1447. ITEMS FOR SALE - CLEANING OUT. MAKING PREPARATIONS FOR RETIREMENT

Yahoo group: amatuerradioswapfest
Date: 2006-05-15 01:20:14 UTC
From: Paul McInnish - Home
Topic: 1447 Message: 1447

List is 5 pages long... too long to list in an e-mail. If you would like to see the list, drop me a reply & I'll e-mail it as an attachment. I have it in Word or Adobe format... your choice.

This list is still "evolving", more items being added weekly... will re-post every 1-3 weeks as I add 'stuff' & 'stuff' is sold.

I am very serious... starting the 'down sizing process' to get ready for retirement in a few months.

If you are interested in any item and you think it is priced too high... heck, you ain't gonna hurt my feelings... make an offer!

Thanks!

Paul - K4BET

PS: Contact info is on the list.

Also, if you are looking for a nice larger home (4000 sq. ft.) in the metro Atlanta area & you have a small 2-3 BR low maintenance home WAY out of the Atlanta area (mountains, country, small town, with or without acreage, etc.) and it is paid for & want to trade your home for a healthy equity, contact me off line.

1453. FS: NEW Rackmount Chassis

Yahoo group: amatuerradioswapfest
Date: 2006-05-20 17:18:22 UTC
From: Brian Carling
Topic: 1453 Message: 1453

FOR SALE:

Homebrewer's 19" Rack-mount Chassis, Brand New...

This is a top quality 17" X 11" X 3" aluminum box chassis
and includes the bottom cover plate. All parts of it are
brand new and in excellent shape.

It comes with the mounting hardware brackets already
attached for mounting it with four screws to a set of
standard 19" rack brackets.

The chassis ALSO comes with a used set of side brackets
for mounting it in a standard 19" rack. These brackets are
6" high but will accomodate this chassis and one other
rack mount item just fine. They are painted black and are
in excellent, used condition. Great for any homebrew project!

Available for $24.00 plus shipping.

1454. FS laptop.

Yahoo group: amatuerradioswapfest
Date: 2006-05-21 21:35:29 UTC
From: goshawk
Topic: 1454 Message: 1454

hello list,
up for grabs is my laptop, it has seen some use, but has never been travelled, so hardware wise, should be in very good condition.
specs are, 2.6GHZ processor, 512MB memory, 30GB hd, (partitioned in to a 10GB C and a 20GB d drive) dvd reader/cd writer drive, 2 USB ports (not sure if 2.0 or 1.1), both modem and Ethernet ports, parallel port, PS2 port, monitor port, and another one that I don't know what it is for.
at the moment it is running win98SE, with all available security updates, and an older version of window-eyes, I think it is 4.2.
unfortunately, this machine does tend to lock up quite a bit, but can work well when it feels like doing so, it could probably benefit from a good reformat, and should be able to cope with XP ok, but as I have never run it on this machine, please don't quote me on that, also battery may need replacing.
comes with case, driver cd, power supply and modem lead with UK phone line plug, those are just the basics, but that is far from all!
I will also include the following kit with this package,
PS2 trackball (this will also work from serial port), USB number keypad with built in 2 port hub, 3 fan USB powered cooler pad, extra USB cd rom drive (with its software and manual), USB to serial converter (has single 9pin serial port and appears to also have a PS2 port), 2 powered 4 port USB hubs, and a new unopened original windows 2000pro sp4 disk.
will leave this open to sensible offers, and will only ship to the UK.
this could be a very nice machine when setup properly.
if interested or for anymore info, please either call on 02084785841, or email, goshawk@...
but please do not ask for the make or model, as I do not know.

Simon

1455. FS: POWER SUPPLY FOR KENWOOD TS511s

Yahoo group: amatuerradioswapfest
Date: 2006-05-22 10:08:19 UTC
From: Brian Carling
Topic: 1455 Message: 1455

Hello TRIO fans... I have FOR SALE:

500 Watt Kenwood PS-510 AC Power Supply. - very
nice condx.

This husky 120V AC supply matches the Trio-Kenwood
TS511S
HF Transceiver. As featured on Page 5 of QST for
September 1972. Has built-in speaker.
Great condition - Very sharp looking. This supply
puts
out 800V DC at 625 mA P.E.P. along with all of the
filament, bias and other lower voltages needed.
This is a pretty hard piece to find nowadays.
Complete, untested and sold as-is, but will
guarantee
the transformer is OK. Great for other rigs or
even for homebrew projects. Excellent condition.

Available for $150.00 plus shipping

Picture and details at:
http://www,af4k.com/radios.htm

1460. TenTec items FS

Yahoo group: amatuerradioswapfest
Date: 2006-05-27 11:35:28 UTC
From: Ken Simpson, W8EK
Topic: 1108 Message: 1460

TenTec Items For Sale:

TenTec Delta 580 HF transceiver
This transceiver will cover from 160 thru 10 meters with 100 Watts output. It has a nice red LED digital readout. Notch filter is built in. Of course it has the CW QSK that TenTec is famous for. It needs 13 V DC at about 20 amps to operate.
This particular Delta works 100%, and looks very good also. The PTO has been rebuilt in the last couple years, so it works really great. Original manual is included for $300.

TenTec 299 Voice synthesized frequency read out
This unit is used with the TenTec Omni 546 series A, B, C, some Argonauts, Corsair, and others. It will work with other rigs (such as the Triton), with minor mods to get the right connections.
The 299 is used primarily for blind hams who can not read the frequency readout on the transceiver. By pushing a button, it will "speak" the frequency (to tenth of a KHz). A front panel switch permits selection of the entire frequency, or you can eliminate the MHz, and give only the KHz. There is also a volume control on the front panel.
Of course it can also be used to give a "voice digital readout" to a rig with an analog dial.
This particular unit is in great shape electrically. Cosmetically it has some minor wear. $ 190

"Switcher / 25" 25 amp switching power supply
This is a 25 amp switching power supply in a case that matches the early Omni series case, with the metal bezel around it. It is in a case that is the same size as a 243 remote VFO. It has an ammeter on the front, along with Switch, TenTec logo, and output bulb. The front panel basically looks like a 280 power supply with a metal bezel, but says "Switcher/25" on it. It is very quiet, and well shielded, and does not produce any electrical noise that I could find. I am not positive if TenTec made this, or if it is homebrew to look like TenTec. If it is homebrew, it certainly is very professionally done. $150

Prices do not include shipping from Florida.

Thanks.

1462. Wattmeter and SWR Bridges FS

Yahoo group: amatuerradioswapfest
Date: 2006-05-27 12:05:27 UTC
From: Ken Simpson, W8EK
Topic: 1462 Message: 1462

Wattmeter / SWR Bridges For Sale:

Daiwa CN-520 "Cross needle" Wattmeter
This wattmeter does it all. It covers from 1.8 to 60 MHz, which means this one meter will measure power on all HF ham frequencies, plus six meters. It would be ideal for some of the new multiband rigs that have 1.8 to 55 MHz coming from one antenna connector, and 2 meters and 440 MHz from a separate connector. It has 2 power scales of 2000, and 200 watts on forward power, and 400 or 40 watts reflected, and uses a nice cross needle meter to read both forward and reflected power at the same time, with a cross scale for SWR. It works fine, and looks fine also. With paper work for $65.

Dual meter SWR Bridge:
Calrad 65-287 (same as Swan SWR-1 A)
This unit has two meters on it. The meter on the left reads forward power and the meter on the right reads reflected power. It is in a heavy metal enclosure with two SO-239 connectors coming out of the ends. It covers all HF frequencies, plus six meters, and also 2 meters with reduced accuracy and power. It works fine and looks like new. Not a scratch on it. It even still has the protective caps on the coax connectors. $ 25

ParaDynamics PDC-1
This HF wattmeter / SWR bridge will read forward and reflected power with either 100 W or 10 W full scale. It is relatively small, making it great for mobile operation. Of course with a 10 W scale, it would be useful for QRP operation as well. $18

Prices do not include shipping from Florida.

Thanks.

Yahoo group: amatuerradioswapfest
Date: 2006-06-01 13:39:39 UTC
From: Brian Carling
Topic: 1464 Message: 1464

FOR SALE:

NEW SSB Crystal Filters. 1650 kHz center frequency.
I have no technical data on these.
They are brand new and in great shape. Simple connection with IN, OUT and
SHIELD. Labelled as NETCOM Center Frequency 1650 kHz MDL. 1435.
Will sell for $5.00 each or 5 for $20.00 plus shipping.

http://www.af4k.com/miscpart.htm

1465. FS: VERNIER REDUCTION DRIVES

Yahoo group: amatuerradioswapfest
Date: 2006-06-01 13:51:56 UTC
From: Brian Carling
Topic: 1465 Message: 1465

FOR SALE:

REDUCTION DRIVES by JACKSON BROTHERS.
Brand new dial drives for 1/4" shaft. Extra nice brass construction.
These appear to be Jackson Brothers units with a 5:1 or 6:1 tuning ratio.
These are the same as used in the Heathkit HW-101, some Swan models and other rigs.
Two hole mounting for front panel is on 1-1/4" centers.
The brass shaft is 1" long and overall dimensions are:
1-1/2" across the mounting ears. Drive body is 1" diameter.
Accomodates any normal 1/4" shaft on tuning device.
Several are available for $13.00 each plus shipping.

Picture and details at:
http://www.af4k.com/miscpart.htm

1466. FS: REALISTIC DX150 and DX160 RECEIVERS

Yahoo group: amatuerradioswapfest
Date: 2006-06-01 13:44:18 UTC
From: Brian Carling
Topic: 1466 Message: 1466

FOR SALE:

REALISTIC DX150 and DX160 SHORTWAVE RECEIVERS.

This is a general coverage Shortwave and AM band
receiver covering
535 kHz to 30 MHz in several bands, with
bandspread tuning for the
ham bands etc. Single conversion design produces
extra clean signals.

The DX160 model includes the 150-400 kHz LF
(longwave) band.
The DX150 does not. Made in Japan 1975-1980,
Voltages: 120 V AC OR 12 VDC.
Coverage: 150-30000 kHz Readout: Analog, Modes:
AM, SSB & CW,
Selectivity 4 kHz, Single Conversion Superhet.
Bands: 150 - 400 kHz,
535 - 1600 kHz, 1550 - 4500 kHz, 4.5 - 13 MHz,
and 13 - 30 MHz.
Bandspread bands: 3.5-4, 7-7.3, 14-14.35, 21-
21.4 and
28-29.7 MHz plus CB channels 1-23. Headphone jack,
S-Meter, Mute Line
ANL, Dial Lamp, Standby, Bandspread, Antenna
Trimmer, AVC.
New Price: $160 Used Price: $90 - 145
Dimensions: 14.5" wide X 6" high X 9" deep.

I have several of these receivers available for
sale. Three are DX150 models.
The rest are all DX160 models. Some of them have
all of the original knobs.
Some have one or two that are different. All of
the receivers are being sold
as-is. They are complete unless otherwise noted.
At this point they are all
untested and might work fine. Most of these need a
new AC line cord.
The antenna connections have all been changed to
BNC receptacles but that is
no big deal and it's very easy to change one of
these to an SO-239 if desired.
Some of these may have an extra sticker or two.

Most of these sets look a little used, and show
some wear, but they would
be great for a restoration project or to use as is
if you are not looking for
a collector's model, beauty queen receiver.

First come, first served means you will get the
best choice up front if you
buy now. I do not know if they work. I have not
tested them,but since they
were all removed from service from an active
company when they were shut down,
there is good reason to think that most of them
work fine as-is. If you want
them tested, then the price is going to go up a
little, naturally.

These sets typical sell used in the range of
$95.00 to $125.00.

I have ONE with no case for $25.00 plus shipping.
I have one with a slightly dented case for $30.00
plus shipping.
The others are all available for $45.00 each plus
shipping.

1467. HT speaker microphones FS

Yahoo group: amatuerradioswapfest
Date: 2006-06-03 13:50:11 UTC
From: Ken Simpson, W8EK
Topic: 1366 Message: 1467

HT speaker microphones For Sale:

Pryme Speaker mic
Fits Yeasu VX-1, 2, 5, 6, 7, FT-60, and others that take
the single pin connector with 4 conductors.
Close to new condition for $25.

Speaker microphone for most HTs
It says Densei SM-505 on it, but appears to be the same
as the Icom HM-46 speaker-mic. It fits Icom, Yaesu, and
others that take the 2.5 mm and 3.5 mm connectors.
Very nice condition for $18.

Yaesu MH19A2B ear bud and mini-mic.
With 2.5 mm and 3.5 mm connections.
It works fine and looks fine. $18

Santec SM-3 speaker microphone
It has the small round plug (about 3/8 inch) with 6 pins,
as used on most Santec HTs, and many Wilson and
Yaesu HTs. $20

Santec ST-HA-1 boom mic / headset
Can be used with ST-144 and most other Santec HTs.
It uses the small 6 pin plug. Separate PTT switch will
mount on your belt, if desired. $22

Prices do not include shipping from Florida.

Thanks.

1468. FS: A Batch of 9 cool old CR1A Ham Crystals

Yahoo group: amatuerradioswapfest
Date: 2006-06-09 23:42:22 UTC
From: Brian Carling
Topic: 1468 Message: 1468

FOR SALE: NINE ham band CR1A etc. crystals

Time to dust off those WW2 rigs and put them on the air.
Or homebrew something. I may even have a socket for these.

These are CR1A crystals with 1/2" [pin spacing, and pin diameter
is slightly larger than an FT243. I may even have a socket
or an adapter for these.

Frequencies:
7017.6, 7038.9, 7270.0, 7270.0, 7280.0, 10125.0 kHz
10141.7, 10208.3 kHz, 24.833 MHz

So, a kind of random mix of 40m and 30m and 12 meter
rocks. Fun for homebrewing.

One has the pins slightly squeezed in but it still works fine...
All are CR1A rocks (8) except for the 7038.9 crystal which
is in a DC35 holder from :Silver Cut Crystal Co." and has
one slightly munged pin. Kind of a mongrel group, so
the price is low, he he...

The first $18.00 plus $6.00 shipping takes them home.
E-mail me if you would like them. 73 - Brian, AF4K

1473. For Sale: TUBE RF FINAL PARTS

Yahoo group: amatuerradioswapfest
Date: 2006-06-11 12:00:57 UTC
From: Brian Carling
Topic: 1473 Message: 1473

For Sale: TUBE RF FINAL PARTS

Pair of EIMAC 4-125A Tubes with ceramic sockets
and plate caps.

Rated for maximum plate voltage of 3000V at
200 mA each. Great for a homebrew 600-800 Watt
class linear amplifier. These are good,
used RF power tubes that look like they have
very low hours. The paint is still red.
Will sell the pair for $50.00 plus shipping.

RFC plate choke - special pile-wound choke,
great for the ham bands, and just right for
these tubes, although it wlll handle up to
1 amp plate current. Available for $22.00

TRIAD 120V filament transformer for these two
tubes - first quality. $20.00

Barker & Williamson FC15 filament choke for these
tubes $20.00

See PICTURE and more details at:

From: Ken Simpson, W8EK
Topic: 1182 Message: 1476

Heath items for sale:

Heath HD-15 phone patch
This is the unit with the VU meter on the left and 3 knobs
that match the SB series to the middle and right. Low or
high Z output to the transmitter. It can also be used as an
interface to your sound card for PSK31, etc. It is in good
shape. Paper work included for $ 25.

ORIGINAL Heath manuals. These are the manuals
only. They are all originals, and not copies, and all
are close to new condition.

Heath HW-2021 Assembly manual - 1975
For 2 meter hand held transceiver
No check marks in book. $10

Heath HN-31 A "Cantenna" Dummy Load
This is the "A" model dated 1982
No check marks in book. $10

GD-600 Photoelectric Light Switch
Very nice condition. Schematic is
part of book. $6

These are original manuals only.

Heath parts For Sale:

Parts from Heath HW-202, 2 meter crystal control transceiver
Note: These parts may also work with an HW-2036 transceiver
Front Panel - $5
Chrome bezel for front - $ 5
Rear panel w/ heat sink, and final PC Board assembly $10
S meter - $ 5

SB-400 meter switch - $5

Mu Metal shield for 3 inch CRT
From the SB-614, but the same one is used for the SB-610,
and other units. It should fit most 3 inch CRTs. $10

I still have a few parts from an SB-614 monitor scope,
including focus controls, position controls, etc. I do NOT
have the power transformer, high voltage caps, or
chassis parts. Please let me know what you might need.

Prices do not include shipping from Florida.

Thanks.

1477. Phone Patches FS

Yahoo group: amatuerradioswapfest
Date: 2006-06-17 14:38:57 UTC
From: Ken Simpson, W8EK
Topic: 1477 Message: 1477

Phone Patches For Sale:

Johnson Viking Phone Patch - Model 250-46

This phone patch is made to be mounted vertically
beside the rig. It is about 6 inches high, 2 inches
wide and 3 inches deep. It is possible that the face
plate can be removed, and it made to be mounted
horizontally, but I have not done that. The reason I
say this is that there are feet on the bottom, and on
the left side. Maybe the feet on the left side are to
protect the rig. In any case, it has 3 pots on the
front for Null, Receive Volume, and transmit gain,
along with a switch for phone patch or microphone.
On the back is a terminal strip for speaker and
phone line. The microphone input has the 2 pin
Amphenol connector like used by Johnson and
many others in that era.

Cosmetically, it is extremely good. Paint is nice
and lettering close to perfect. The only scratch is
a very, very minor scratch near the switch that
switches between mic and phone patch. $45

Heath HD-15 phone patch
This is the unit with the VU meter on the left and 3 knobs
that match the SB series to the middle and right. Low or
high Z output to the transmitter. It can also be used as an
interface to your sound card for PSK31, etc. It is in very
good shape. Paper work included for $ 25.

Prices do not include shipping from Florida.

Thanks.

1478. FS - Radio DIALS / Verniers

Yahoo group: amatuerradioswapfest
Date: 2006-06-20 12:13:31 UTC
From: Brian Carling
Topic: 1478 Message: 1478

FOR SALE: Vernier reduction drives etc.
(Pictures - see below)

First is a silver plated 5:1 ratio vernier drive with knob.
It has a scale of 0-200 on a 360 circle. Dimensions are
4-1/8" diameter with comfortable 2" diameter fluted knob.
Accepts standard 1/4" shaft.
Available for $10.00 plus shipping

Large, newer style 9:1 ratio vernier drive with knob.
It has a scale of 0-100 on a 180 degree arc.
Dimensions are 4" diameter with comfortable
2" diameter fluted knob. Accepts standard 1/4" shaft.
Available for $10.00 plus shipping

NATIONAL Velvet Vernier Reduction Drive.
This is the standard velvet vernier reduction drive
with 4 mounting screws. Has 0 - 150 scale on
270 degrees of vernier skirt which is 3" in diameter.
Accepts standard 1/4" shaft. Excellent shape.
Has paint on the unused side - works fine.
Available for $10.00 plus shipping

JACKSON BROTHERS VERNIERS
Brand new dial drives for 1/4" shaft. Extra nice brass construction.
These appear to be Jackson Brothers units with a 5:1 or 6:1
tuning ratio. These are the same as used in the Heathkit
HW-101 transceiver and other rigs.
Two hole mounting for front panel is on 1-1/4" centers.
The brass shaft is 1" long and overall dimensions are:
1-1/2" across the mounting ears. Drive body is 1" diameter.
Accomodates any normal 1/4" shaft on tuning device.
A few left at $13.00 each plus shipping.

http://www.af4k.com/miscpart.htm

1479. FS: Pair of CR1A 40m CW Crystals

Yahoo group: amatuerradioswapfest
Date: 2006-06-20 21:01:48 UTC
From: Brian Carling
Topic: 1479 Message: 1479

FOR SALE:

Two type CR-1A/AR military crystals for 40m CW.
For use with military or homebrew rigs etc.

7010 kHz and 7105.5 kHz
These are working fine and have the thicker pins
spaced 1/2 inch apart and about 1/8" diameter.

Will sell the pair for $15.00 plus $6.00 shipping.

1480. 2 m and 440 MHz mobile antennas and mounts FS

Yahoo group: amatuerradioswapfest
Date: 2006-06-24 11:38:36 UTC
From: Ken Simpson, W8EK
Topic: 1480 Message: 1480

VHF and UHF Mobile Antennas and Mounts For Sale:

VHF (2 meter) antennas:

Larsen NLA-150 coil only
For use with a 5/8 wave (approx 4 foot) antenna
Fits the Larsen NLA mount and has about 3 db gain when
used with a 5/8 wave whip. In very good shape. $11

Larsen NMO-150 coil only
Fits the NMO mount made by many different companies
(including Larsen), and provides about 3 db gain, when
used with a 5/8 wave (about 4 foot) whip. $18

The whips for these are hard to ship, and it is best to pick
up a whip at your local Radio Shack, or similar store. I do
have some whips. They are $6 each if you need them.

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna
(about 19 inches on 2 meters, but can be cut for 220 or 440
MHz). Good condition for $7

Larsen Q
Fits a 5/16 inch stud, such as the Larsen LM mount, and others.
The whip can be cut for 2 meters, 220 MHz, or 450 MHz bands. $6

Antennas for 450 MHz:

Larsen NLA-450 coil and "stacked" whip
These fit the Larsen NLA mount, and have about 5 db gain on
the 70 cm band. Stacked whip is included. In nice shape. $14

Larsen "OM" coil and mount
This is made to mount on a flat surface, and requires 3
mounting bolts, plus a hole in the center for the coax. It does
not require a ground plane, so is useful on sailboats, and
other places where a ground plane is not available.
OM-450 - For 70 cm band. Includes "stacked" whip for 5 db gain.
Good condition for $20.

Mobile antenna mounts for sale:

Larsen NLA-MM
Magnetic mount for use with Larsen NLA mount antennas, such
as the NLA-Q, NLA-150, and NLA-450. It includes coax with a
PL-259 connector, and is in good shape. $22

Larsen NMO-MM
Magnetic mount for use with MNO-Q, NMO-150, and NMO-450
antennas made by Larsen and others. Coax is included, with a
PL-259 connector. Very nice condition for $25

Magnetic mount with coax
Standard 3/8 inch 24 thread, about 3 inches in diameter, and
black in color. Suitable for 2 meter, 440 MHz, or 6 meter antenna.
Very good condition. $15

HyGain TLM Trunk Lip Mount
This trunk lip mount has a 5/16 inch stud on it.
Ideal for 1/4 wave antenna. With coax for $14

Prices do not include shipping from Florida.

Thanks.

From: Brian Carling
Topic: 1482 Message: 1482

I have several give-away items and a large
plate transformer for sale.

FREE:
Realistic speaker switching box - let's you connect
your stereo, computer or other sound systems to
multiple speakers. Will connect the left and right
channel of stereo amplifier to THREE different sets of
stereo speakers. Free for shipping.

FREE:
Language Lab Communications console.
5 way intercom with switching and speaker built into a
high quality sloping front cabinet. Free for shipping.

FREE:
300 OHM Clip-on Connectors. These are the ones
you use to connect 300 ohm twinlead to antenna
terminals, or to quickly conect any cable to
a dual screw-terminal type connection.
QTY 5 available free for shipping.

PLATE TRANSFORMER:
QRO Plate transformer with 120V AC primary.
Secondary is 2500V CT at 500 mA. Terminals are on a
ceramic plate on top. Dimensions: 8" X 7 " X 10" tall
Quantity 1 only. I need the space, so it is
available for $20.00 plus shipping.

1487. CW key and cables FS

Yahoo group: amatuerradioswapfest
Date: 2006-07-08 13:47:14 UTC
From: Ken Simpson, W8EK
Topic: 1487 Message: 1487

CW key for sale:

Generic straight key
This is a generic CW straight key with a plastic base.
It is mounted on a very nice piece of Oak wood, that
makes it look very nice. Cable included for $30.

Other CW items:

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo
connector on the end, like used by most rigs. It looks
great. $8

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch
phone plug on it, as is used with a straight key. $5

Prices do not include shipping from Florida.

Thanks.

Digital LCR and VOM meter. TE model LCM1951.
Has many ranges / features. Only used very briefly since
new. Needs 9V battery and possible reset or repair.
I didn't have time to try to get it going again after
I got a B&K unit. Comes with test leads and protective case.
You pay shipping only.

James Millen book - Notes on Transmitter Design.
Bad condition. Maybe someone can find this relic useful.
About half of it is rotten and damaged. Parts may
possibly be useful. For postage it's yours.
You pay shipping only.

1490. 2 meter crystals FS

Yahoo group: amatuerradioswapfest
Date: 2006-07-15 13:18:40 UTC
From: Ken Simpson, W8EK
Topic: 1490 Message: 1490

Does anyone have an older two meter ham rig and need crystals?

Maybe I can help. I have some of both transmit and receive
2 meter xtals. Most are in the 146 and 147 MHz band segments,
with very, very few in the 145 MHz segment, and none in the
144 MHz segment. These are for ham rigs only, and not
commercial rigs.

These are all the small HC-25 xtals, like were used in most
of the solid state 2 meter mobiles and HTs. Please e-mail
the operating frequency you need. I have them listed by
operating frequency and rig, and not by actual xtal frequency.
Send the frequencies you need (transmit or receive), and
the rig that you have, and I will see if I can help. I have cross
references for the various rigs, so I will know what you need
if you give the rig.

I also have 224.94 xmt for Midland 13-509 and most other xtal rigs

Crystals are $5 each, plus shipping from Florida.

I have special crystals that are used in the Kenwood TS-700
to give crystal control when needed (more stability than the VFO)
146.19
146.64
These are special cut crystals, so they are $10 each.

Thanks.

1491. FS: $5 Ham Radio & Electronic items

Yahoo group: amatuerradioswapfest
Date: 2006-07-15 18:15:05 UTC
From: Brian Carling
Topic: 1491 Message: 1491

FOR SALE - E-MAIL ME PRIVATELY ABOUT THESE....

$5 Items to sell - most of these are new items

Mobile Antenna Ball Mount, used.

Two USA Cables

Two HDMI Cables

4 Classic Radio Knobs, some used.

100 Watt low pass filter, stops TVI, SO-239 connectors.

Antenna Relay with three SO-239 Connectors, used.

Twenty-five HC49 Crystals on 6.492 MHz

QTY 9 - New 2N6341 Power Transistors, TO3.

QTY 8 - New RCA 151-0112 Power Transistors, TO3.

Antique headset with boom microphone, brown cloth cord, used.

QTY 2 - Crystal ovens, octal 12V for HC6U crystals.

QTY 1 - Edison 115V Delay Relay, 45 seconds, N.O. contacts 3amps.

FT-243 Crystals for 1977.5 kHz
FT-243 Crystals for 7000 kHz 7106.6 kHz, 7140 kHz

120V AC circuit breaker ON/OFF power switch, 7.5 Amps

Audio Transformer 1:1, 600 ohms

10 turn wirewound potentiometer, 10 k-ohms, with 1/4" X 1/2" shaft.

Assortment of 10 high voltage ceramic capacitors, 3 to 6 kV.

Superstar mobile microphone, with good coil cord, 4-pin plug, used

FT101E style microphone with 8-pin connector. Not sure what rig, used.

Kenwood HT battery charger type WO9-0315, used.

Computer PCI card with one parallel and 1 serial port.

All of the above items are $5.00 each plus shipping.
Combine items to save on shipping.

1492. FS: E.F. Johnson 6N2 VFO

Yahoo group: amatuerradioswapfest
Date: 2006-07-15 18:21:58 UTC
From: Brian Carling
Topic: 1492 Message: 1492

FOR SALE:

E.F. Johnson 6N2 VFO. - very good condition.

This VFO unit comes with an 8-pin (octal) power
supply plug and a 1/4-inch phone jack
for the signal output. It was used until a few
years ago with an old AM rig on
the two meter band and it was very stable and
accurate, typical of wonderful
E.F. Johnson equipment from the old days.
This VFO will cover both the six and two meter
bands and will make a great addition
to your vintage station for these bands.
Available for $65.00 plus shippping.

For picture and details see:
http://www.af4k.com/radios.htm

Please reply only via private e-mail, not to the
list.

1498. FS: KNIGHT T50 Transmitter

Yahoo group: amatuerradioswapfest
Date: 2006-07-22 16:51:01 UTC
From: Brian Carling
Topic: 1498 Message: 1498

FOR SALE:

KNIGHT 50 Watt CW transmitter with 807 final.
With manual copy $75.00 plus shipping.

Picture and details at:
http://www.af4k.com/radios.htm

1499. FS: RADIO SHACK DX150A and DX150B Receivers

Yahoo group: amatuerradioswapfest
Date: 2006-07-22 22:37:07 UTC
From: Brian Carling
Topic: 1499 Message: 1499

FOR SALE: RADIO SHACK DX150A and DX150B Receivers
in fairly good condition
This is a general coverage Shortwave and AM band receiver
covering 535 kHz to
30 MHz in several bands, with bandspread tuning for the ham
bands etc.

Made in Japan, Voltages: 120 V AC OR 12 VDC.
Readout: Analog, Modes: AM, SSB & CW, Selectivity 4 kHz,
Single Conversion Superhet
Bands: 535 - 1600 kHz, 1550 - 4500 kHz, 4.5 - 13 MHz, and
13 - 30 MHz.
Bandspread bands: 3.5-4, 7-7.3, 14-14.35, 21-21.4 and 28-29.7
MHz plus CB channels 1-23
Headphones jack, S-Meter, Mute Line, ANL, Dial Lamp, Standby,
Bandspread, Antenna Trimmer, AVC.
New Price: $160 Used Price: $75 - 95
Dimensions: 14.5" wide X 6" high X 9" deep.

I have three of these receivers available for sale.
There are 2 DX150A models, ONE DX150B (with mechanical
filter.)
Some have one or two knobs that are different. A couple of these
have the AF gain pot removed. All of the receivers are being sold
as-is.
They are complete unless otherwise noted.
Each of these needs an AC line cord. The antenna connections
have been
changed to BNC receptacles but that is no big deal and it's very
easy to change one
of these to an SO-239 if desired. Some of these may have an extra
sticker or two.

Most of these sets look a little used, and show some wear, but they
would
be great for a restoration project or to use as is if you are not
looking for a
collector's model, beauty queen receiver.

I do not know if they work. I have not tested them.
They will need an AC cord and some need a volume pot.

NOTES:
DX-150A manufactured 1969 - 1971 - has FET front-end.
DX-150B manufactured 1972 - 1974 - has Five FETs AND
mechanical filter.

I will supply a copy of the operators manual AND the service manual with each
of these radios. The manuals include the schematic diagrams etc.

The DX150B receiver is available for $45.00 plus shipping.
Two radios (DX150A) are available for $39.00 each plus shipping

1500. looking for some items please.

1501. Coaxial cable FS

Yahoo group: amatuerradioswapfest
Date: 2006-08-05 15:59:08 UTC
From: Ken Simpson, W8EK
Topic: 1501 Message: 1501

Coaxial cable for sale:

I have some lengths of coaxial cable available. Most have PL-259 connectors on each end. Most are either 50 or 100 feet long. The coax is mainly Belden 8214, which is RG-8 low loss foam. Some lengths may be other equivalent brands. All will be checked for loss before shipping, and will be within 10% of published specs (that is as close as I can check).

100 feet, with PL-259 on each end - $44

50 feet with PL-259 on each end - $ 24

Other lengths may be available, and I have a few with a PL-259 on only one end. Most of the shorter lengths are now gone, but I do have a few left. Please le me know what you need, and I will see what I can do.

Prices do not include shipping from Florida.

Thanks.

73,

1502. FS: Isolation Transformer

Yahoo group: amatuerradioswapfest
Date: 2006-08-07 00:46:57 UTC
From: Brian Carling
Topic: 1481 Message: 1502

FOR SALE:

1000 watt Isolation Transformer. for 120V AC.
by Northlake Engineering Co.

Has four IEC outlets and heavy duty industrial
power cable. Heavy gauge, light gray metal case
with rubber feet. Like new condition.

Has a nice breaker switch for power ON/OFF.

Available for $45.00 plus shipping

1503. FS: Military Radio Crystals

Yahoo group: amatuerradioswapfest
Date: 2006-08-09 22:05:46 UTC
From: Brian Carling
Topic: 1503 Message: 1503

FOR SALE:

Military radio collector items.

FT243 crystals designated for Military Radios such
as the BC-620, BC-721, BC745 and BC-1335 etc.

Includes PAIRS of BC-611 T-R crystals.
Includes a few in the ham bands.

Examples: 2310, 4930, 5385, 6125, 7250, 8450 kHz

I also have the larger FT171B crystals for the BC610.

To see the complete list, see web page:
http://www.af4k.com/MilitaryFT243Crystals.htm

1504. 2 m and 440 MHz mobile antennas and mounts FS

Yahoo group: amatuerradioswapfest
Date: 2006-08-12 15:22:46 UTC
From: Ken Simpson, W8EK
Topic: 1480 Message: 1504

VHF and UHF Mobile Antennas and Mounts For Sale:

VHF (2 meter) antennas:

Larsen NLA-150 coil only
For use with a 5/8 wave (approx 4 foot) antenna
Fits the Larsen NLA mount and has about 3 db gain when
used with a 5/8 wave whip. In very good shape. $11

Larsen NMO-150 coil only
Fits the NMO mount made by many different companies
(including Larsen), and provides about 3 db gain, when
used with a 5/8 wave (about 4 foot) whip. $18

The whips for these are hard to ship, and it is best to pick
up a whip at your local Radio Shack, or similar store. I do
have some whips. They are $6 each if you need them.

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave (about 19
inch) antenna. Good condition for $7

Larsen Q
Fits a 5/16 inch stud, such as the Larsen LM mount, and others.
The whip can be cut for 2 meters, 220 MHz, or 450 MHz bands. $6

Antennas for 450 MHz:

Larsen NLA-450 coil and "stacked" whip
These fit the Larsen NLA mount, and have about 5 db gain on
the 70 cm band. Stacked whip is included. In nice shape. $14

Larsen "OM" coil and mount
This is made to mount on a flat surface, and requires 3
mounting bolts, plus a hole in the center for the coax. It does
not require a ground plane, so is useful on sailboats, and
other places where a ground plane is not available.
OM-450 - For 70 cm band. Includes "stacked" whip for 5 db gain.
Good condition for $20.

Mobile antenna mounts for sale:

Larsen NMO-MM
Magnetic mount for use with NMO-Q, NMO-150, and NMO-450
antennas made by Larsen and others. Coax is included, with a
PL-259 connector. Very nice condition for $25

Magnetic mount with coax
Standard 3/8 inch 24 thread, about 3 inches in diameter, and
black in color. Suitable for 2 meter, 440 MHz, or 6 meter antenna.
Very good condition. $15

HyGain TLM Trunk Lip Mount
This trunk lip mount has a 5/16 inch stud on it.
Ideal for 1/4 wave antenna. With coax for $14

Prices do not include shipping from Florida.

Thanks.

1511. Heath items FS

Yahoo group: amatuerradioswapfest
Date: 2006-08-19 11:28:59 UTC
From: Ken Simpson, W8EK
Topic: 1182 Message: 1511

Heath items for sale:

Heath PS-23 power supply
This power supply can be used with most all of the Heath SB and HW line of transceivers. It is equivalent to an HP-23 C, although this one has higher rated capacitors, and possibly a slightly larger transformer. It furnishes 800 V DC for the finals and either 300 V DC or 250 V DC for B+, in addition to the bias and filaments voltages. It has a 3 wire power cord, and a circuit breaker on the 115 V AC input, instead of fuses. This particular unit works fine, and has no hum, indicating the capacitors are in fine shape. Cosmetically, there is not a scratch on it. It looks like the kit was just completed yesterday. The protective "cage" is included, and looks like new. With paper work for $75.

Heath CW crystal filter 404-284-1
This is the better CW filter that is the smaller size. It has 400 Hz bandwidth, with a better shape factor. It can be used in most any of the SB or HW line that accepts a CW filter, such as the SB-101, SB-102, SB-300, SB-301, SB-303, HW-101, and maybe others. Great shape. $35

Heath "Riser" Feet for SB line
This is a set of four feet for the SB line. It includes the two "riser" feet, plus the two regular feet. The long screws are included. Original Heath. $15

I found a small supply of the scarce power cords used on some of the Heath gear.
These are two conductor cords that are similar to "TV cheater" cords. My memory says these should fit an SB-300/301/400/401, etc. $ 4 each

Prices do not include shipping from Florida.

Thanks.

1514. Ham Antenna rotors FS

Yahoo group: amatuerradioswapfest
Date: 2006-08-20 17:56:52 UTC
From: Ken Simpson, W8EK
Topic: 1514 Message: 1514

Ham Rotors and accessories For Sale:

Ham IV Rotor and Control Box
The Ham IV is rated for 15 square feet of antenna, up to a 40 foot boom, and has a newer, heavier duty brake. It has a turning power of 800 lbs and a brake power of 5000 pounds. There are 96 dual race ball bearings. It has the newer black control box. This one is in very nice shape, and includes all of the stainless steel hardware, along with the paper work. These go for about $550 new. Get this one for half price -- $275.

Ham III Rotor and Control Box
The Ham III is similar to the Ham IV, but an earlier version. It is for up to a 30 foot boom on the antenna. Other specs are similar to the Ham IV. The control box has a metal enclosure. This one is in good shape, with all of the stainless steel hardware, for $ 200.

Ham M Rotor and Control Box
The Ham M is a bit older than the Ham IV, but still a very healthy rotor. It is rated for up to a 24 foot boom antenna. This one is in good shape, but has had a couple modifications to the control box, to make it similar to the Ham II and Ham III control box. Two knobs have been added at the lower left and lower right, below the meter. One is an on-off switch, and the other is the calibration control, brought out to the front so one does not need to reach behind the control box, as was done originally. In addition, a zener diode has been added to stabilize the voltage for the position indicator. With paper work and stainless steel hardware for $185.

Ham M control box only
This is a series 4 control box only, and is in nice condition. Paper work is included for $70.

Lower mast support
Heavy duty type, made to go with the Ham IV. I do not think this one has been used, as it is still in the plastic. It includes all of The stainless steel hardware. New, these go for about $90. Get this one for $50.

Lower mast support
This is also the heavy duty type, as used on a Tail Twister rotor. It is heavier duty than the Ham IV lower mast bracket. This one has been used. It includes the clamps to clamp to the mast, and one stainless steel U bolt and hardware. One U bolt is

missing, but can easily be obtained locally. $45

Prices do not include shipping from Florida.

Thanks.

Yahoo group: amatuerradioswapfest
Date: 2006-08-26 09:29:40 UTC
From: Brian Carling
Topic: 1516 Message: 1516

FOR SALE:
DVI to DVI DUAL LINK Video Cable
DVI is one of the latest interconnection technologies which provides one of the highest quality
Digital Video connections available. Because the signal remains digital from source to display
there is no loss from analog conversion.

When used with compatible equipment this cable will give you the best possible picture from your
Projector, Plasma etc. Suitable for High Definition image resolutions such as 480p, 480i, 720p and 1080i.

These are Very High Quality DVI Cables. Compare our prices and shipping rates with the competition,
These are the best value around! These high quality DVI cables offer the best quality cable and features
at the best value.

These cables are used with some of the newer flat panel monitors and were never used.
Use a DVI cable to connect your computer to a digital monitor or LCD/Plasma television.
This item is a brand new standard DVI to DVI video cable. Connect that DVI input on your monitor to your
DVI video card output. This cable will do the trick... Guaranteed to work.

Color: Black
Length: 6 feet
Condition: Brand new

Check around, you'll find it hard to get a DVI cable with Ferrite chokes for such a low price.
The stores like Office Depot and Staples sell them for $65.00 or so.
I have plenty of these available for $4.00 each plus shipping

Picture and details, see:
http://www.af4k.com/miscpart.htm

1517. FS: Reduction drives

Yahoo group: amatuerradioswapfest

From: Ken Simpson, W8EK
Topic: 1518 Message: 1518

Yaesu MH-31 B 8 dynamic hand microphone for sale

This is the Yaesu hand microphone that has the round
8 pin connector on it. It will go with virtually any Yaesu
rig that uses the round 8 pin connector. It has up, down,
and fst switches, and well as a locking switch, in addition
to the PTT switch.

This particular unit is unused, still in its original box, with
the mounting bracket.

Normal prices for these are about $50, but you can have
this one for $35, plus shipping from Florida.

Thanks.

HT speaker microphones For Sale:

Pryme Speaker mic
Fits Yaesu VX-1, 2, 5, 6, 7, FT-60, and others that take
the single pin connector with 4 conductors.
Close to new condition for $25.

Icom HM-9 speaker microphone
At one time, this speaker mic was used on almost
all of the Icom HTs. It has the 3.5 mm and the 2.5 mm
connectors about half an inch apart.
This one works fine, and looks very nice.
These are about $58 new. This one is $20.

Wilson speaker-microphone
The color matches the Mark II and Mark IV Wilson HTs, but
it can be used on others as well. Stripped and tinned leads.
It works fine, and looks very, very nice. $18

Yaesu MH19A2B ear bud and mini-mic.
With 2.5 mm and 3.5 mm connections.
It works fine and looks fine. $18

Prices do not include shipping from Florida.

Thanks.

1521. Astron power supplies FS

Yahoo group: amatuerradioswapfest
Date: 2006-09-02 13:21:29 UTC
From: Ken Simpson, W8EK
Topic: 1375 Message: 1521

Astron power supplies For Sale:

Astron VS-20 M
This supply is variable. One can adjust the voltage, and set the current limit with front panel controls. At 13.8 V DC it is rated at 16 amps continuous and 20 amps intermittent, however the current limit can be set, which is useful to protect the finals on many solid state rigs. It has both an ammeter and a voltmeter. Of course it works fine. Cosmetically, I can not find a scratch on it. $90

Astron RS-12 A
This supply is a 13.8 V DC supply, rated up to 12 amps intermittent duty. It works fine and looks fine also. $55

Prices do not include shipping from Florida.

Thanks.

1522. Coaxial cable FS

Yahoo group: amatuerradioswapfest
Date: 2006-09-02 19:40:56 UTC
From: Ken Simpson, W8EK
Topic: 1501 Message: 1522

Coaxial cable for sale:

I have some lengths of coaxial cable available. Most have PL-259 connectors on each end. The coax is mainly Belden 8214, which is RG-8 low loss foam. Some lengths may be other equivalent brands. All lengths over 25 feet will be checked for loss before shipping, and will be within 10% of published specs (that is as close as I can check). Lengths shorter than 25 feet are almost impossible to measure loss accurately, but they will be checked with an ohmmeter.

Lengths vary from about 5 feet to over 100 feet, and I have a few with a PL-259 on only one end. Please let me know what you need, and I will see what I can do.

Belden 8214 is presently selling for about $1.35 a foot in 500 foot coils. My price is basically 40 cents a foot, plus $2 per installed PL-259 connector.

Coaxial cable jumpers with N connectors

These jumper cables are made with solid (not foam) dielectric RG-213 type cable, and were intended to be used at the top of the tower to connect the antenna.

Two feet long, Male N to Female N. Female end has a weatherproof rain boot. $8

Ten feet long, with Male N connector on each end. $10

Eight feet long, with Male N on one end, and an SO-239 connector on the other end, with rain boot. $12

Prices do not include shipping from Florida.

Thanks.

Date: 2006-09-08 14:14:27 UTC
From: gvastianos
Topic: 1527 Message: 1527

EUROPEAN AMPLITUDE MODULATION AMATEUR RADIO GROUP

NEW YAHOO GROUP: http://groups.yahoo.com/group/eamarg/

This is a group for licenced amateur radio operators (HAMs) who are interested in the AMPLITUDE MODULATION (AM) mode of communications. The group exists to promote the AM operation in the HAM bands and provide information about operating events and technical matters.

EAMARG encourages regional AM activity insuring there is AM available somewhere on the amateur bands. Based on the fact that the majority of the AM calling frequencies in USA belong outside the european HF bandplans... one of the EAMARG main goals is to help in the establishment of AM calling frequencies that will be compatible with the HF bandplans of the european countries.

EAMARG future plans including the sponsorship of operating events and contests that will promote the use Amplitude Modulation.

In order to join this group you must be a licenced radio amateur.

1528. MFJ 862 wattmeter SWR bridge for 2m, 220 MHz, and 440 MHz FS

Yahoo group: amatuerradioswapfest
Date: 2006-09-12 11:06:17 UTC
From: Ken Simpson, W8EK
Topic: 1528 Message: 1528

For Sale:

MFJ 862 VHF/UHF Wattmeter/SWR Bridge

This MFJ Cross Needle SWR/Wattmeter covers 144MHz, 220 MHz and 440 MHz bands. The MFJ-862 Cross-Needle meter reads forward and reflected power and SWR simultaneously. It features separate directional couplers, each with its own SO-239 connectors. This lets you connect all of your rigs at the same time. You can then monitor SWR and power of either transceiver at the flick of switch.

Power ranges are 30/300 Watts forward and 6/60 watts Reflected. Each power range for each band is individually calibrated. Single knob operation makes it easy to use; the meter is lighted if 12 V DC is applied.

This particular unit is in its original box, with original paper work. It has only been used a couple times, and is in virtually new condition. It works 100% and there is not a scratch on it. $50 plus shipping from Florida.

Thanks.

1529. FS: Terminal Boards

Yahoo group: amatuerradioswapfest
Date: 2006-09-13 23:06:09 UTC
From: Brian Carling
Topic: 743 Message: 1529

FOR SALE:

Terminal Boards, new.
Excellent fiberglass boards for homebrewing radios
or guitar amps etc. Each section has ten solder turrets in
two rows of five. There are five sections but these can
easily be broken down into five pieces each with four
mounting holes and measuring 2.625" X 1.5"
Overall dimensions: 13.125" X 1.5"
Have QTY 6 available for $5.00 each plus shipping.

FIVE-way turret type terminal strips - great for homebrewing.
Has two mounting holes and 5 turrets for mounting parts.
2.6" long. Multiple wires may be soldered directly to each turret.
These are top quality, new stock bakelite strips, great for building
classic homebrew tube radio or audio equipment etc.
Selling for $1.25 each or buy 10 or more for $1.00 each.
Shipping additional.

SIX-way terminal strips - great for homebrewing.
Has center mounting tab for ground connection. 2.6" long.
These are top quality, new stock bakelite tag strips, for
constructing homebrew tube radio and audio equipment etc.
Other sizes available. Inquire.
Selling for $1.25 each or buy 10 or more for $1.00 each.

Screw Terminal Board.
Excellent fiberglass board for homebrewing radios, test
equipment etc.Single terminal strip has a row of 8 screw terminals
with solder tags on the inside. Brand new, and never was used.
Dimensions: 4.25" X 0.625"
Have QTY 1 available for $5.00 plus shipping

1530. Vectronics VS-300 DLP antenna tuner FS

Yahoo group: amatuerradioswapfest
Date: 2006-09-14 20:51:43 UTC
From: Ken Simpson, W8EK
Topic: 1530 Message: 1530

For Sale:

Vectronics VS-300 DLP HF antenna tuner

This is NOT the Viewstar VS-300 antenna tuner, but is a
much more sophisticated unit. The VS-300 DLP has a
fairly large cross needle meter for reading both forward
and reverse power simultaneously, and hence the SWR.
It will read either average or peak power, with scales of 30
Watts and 300 Watts. In addition, a dummy load is included
inside, as is a 4 to 1 balun. The meter can be back lighted
if you apply 12 V DC. The tuner also has an antenna switch
build in, that will switch between "tuned" and "straight thru"
operation. It will tune 160 thru 10 meters.

These units sell for about $170 new. This one is in extremely
nice condition, both electrically and cosmetically. The
manual is included for $135, plus shipping from Florida.

Thanks.

1531. Preparing for retirement; Major downsizing For Sale list

Yahoo group: amatuerradioswapfest
Date: 2006-09-16 15:38:52 UTC
From: Paul McInnish - Home
Topic: 1531 Message: 1531

OK, some of you had seen my earlier list... of a few months ago... that sucker has grown to 13 pages! I know, some of you wanted the updated list & I promised to send it to you but in the interim, I have had some serious hospital stays and just did not have the drive or energy to update the list... pls accept my apologies!

The stuff that was sold or traded has been removed and tons of other stuff added... includes ham gear, antennas, tower, collectables, tools, misc. and so on and so on.

I am very serious about "down sizing"; have started the process to get myself retired, sell the house, buy a much, smaller one, etc. so I have got to rid myself of a lot of "stuff".

Entirely too much to list here (13 pages)... send me an e-mail, off line, with your e-mail address and I'll send you the list. Please specify which version you want... Word (doc) or Adobe PDF (the PDF is a much smaller file but looks exactly the same as the Word document).

This list is still "evolving", more items being added constantly... will re-post periodically as I add 'stuff' & 'stuff' is sold.

If you are interested in any item and you think it is priced too high... heck, you ain't gonna hurt my feelings... make an offer!

My detailed contact info is on the list.

Paul McInnish
K4BET
k4bet@...

PS: Also, if you are looking for a nice larger home (4000 sq. ft.; realtors call it a mid-level executive home) in the metro Atlanta area & you have a small 2-3 BR low maintenance home WAY out of the Atlanta area (mountains, country, small town, with or without acreage, etc.) and it is paid for & want to trade your home for a healthy equity, contact me off line.

Believe it or not... I am in the market for a few things... but very few! Please see the last pages of the list for the items I am looking for. BUT, it you have something that you think there is no way I can survive without it... heck, lets take a look see!

1532. looking for Icom IC-F4 radios and accessories please.

Yahoo group: amatuerradioswapfest
Date: 2006-09-18 13:54:44 UTC
From: goshawk
Topic: 1532 Message: 1532

hello list,
I am looking for Icom IC-F4 radios please.
these must be the version with the full keypad, and must be in good condition and full working order.
I am also looking for accessories for the same radios, such as cases, belt clips, extra batteries, chargers, and particularly multi chargers.
if possible, I would really also like to get hold of the software to program the radios, I already have the cable, but just can't get hold of the software anywhere!
I would prefer to buy from with in the UK, but will consider offers from outside the UK, as long as the items are sent by fast, insured, and trackable delivery services.

if anyone out there can help, please either call on 02081417811, or email to, goshawk@...
thanks in advance.

Simon

1536. Hand microphones FS - regular and touchtone

Yahoo group: amatuerradioswapfest
Date: 2006-09-22 22:25:48 UTC
From: Ken Simpson, W8EK
Topic: 1536 Message: 1536

Hand microphones for sale:

All work 100%, look very nice, and have stripped and tinned leads, unless stated otherwise.

Touchtone (DTMF) mics

Drake 1525 EM Touchtone Microphone
This is the mic that was used to add a touchtone pad to a lot of rigs in the 70s and 80s. Normal hand mic from the front, but has a touchtone pad on the back. Four pin mic plug.
This particular unit has been used, but is in good shape and includes paper work. $ 40

Icom HM-8 touchtone microphone
The HM-8 has a 12 digit touch tone (DTMF) pad on the front of it, along with an on-off switch for the tones. Of course it also has the normal PTT switch.
This particular microphone works fine, and looks close to new. $35

Data Signal "Data-Coder 5" touchtone mic
This mic has a 12 digit touchtone (DTMF) pad on it, plus a normal low impedance microphone. Like new. $40

Regular hand microphones:

Kenwood MC-42 S hand microphone
This is the "standard" microphone that came with many of the rigs such as the TS-430, 440, 930, 940, 950, etc. that take the round 8 pin mic connector that this one has on it. It has "up" and "down" switches, as well as the normal PTT switch. This particular MC-42 is in very nice condition. $ 35

Small Kenwood hand microphone
This is like the small hand mic that came with the Kenwood TR-7400. It is a 500 ohm dynamic mic.
No model number on it, but it looks close to new, and works fine. If you like a smaller mic, compared to the MC-35 or MC-30, this is it. $30

Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing voltage. $25

Prices do not include shipping from Florida.

Thanks.

1541. TenTec Paragon HF xcvr FS

Yahoo group: amatuerradioswapfest
Date: 2006-09-30 13:24:55 UTC
From: Ken Simpson, W8EK
Topic: 1541 Message: 1541

TenTec items for sale:

TenTec 585 Paragon HF transceiver
This rig covers 160 thru 10 meters, including the WARC
bands. It has a general coverage receiver, and includes
SSB, CW, and AM. An optional FM adapter is available
for it. Of course it has digital readout, memories, scan,
dual VFOs, PBT, notch filter, etc. Up to 100 Watts output,
that can be adjusted down to mw. This particular unit works
100% and looks fine also. Big inch thick manual is included.
TenTec sells these used for $795. This one is $650.

TenTec 299 Voice synthesized frequency read out
This unit is used with the TenTec Omni 546 series A, B, C,
some Argonauts, Corsair, and others. It will work with
other rigs (such as the Triton), with minor mods to get
the right connections.
The 299 is used primarily for blind hams who can not read the
frequency readout on the transceiver. By pushing a button, it
will "speak" the frequency (to tenth of a KHz). A front panel
switch permits selection of the entire frequency, or you can
eliminate the MHz, and give only the KHz. There is also a
volume control on the front panel.
Of course it can also be used to give a "voice digital readout"
to a rig with an analog dial.
This particular unit is in great shape electrically. Cosmetically
it has some very minor wear. $ 190

Prices do not include shipping from Florida.

Thanks.

From: Ken Simpson, W8EK
Topic: 1545 Message: 1545

For Sale:

Heath SB-200 HF linear amplifier

The SB-200 uses a pair of 572B tubes, and operates on
80 thru 10 meters. It may be used on SSB, CW, or digital
modes.

This particular amplifier puts out about 750 watts on 20 meters,
and has been tested for operation on all bands. Info on power
output on each band is available.

Cosmetically, it is in extremely nice condition. I can not find a
scratch on the case, although there is some slight wear near
the on-off switch.

Paper work is included for $370, plus shipping from Florida.

Thanks.

1554. Mirage B23, two meter power amplifier FS

Yahoo group: amatuerradioswapfest
Date: 2006-10-21 13:36:22 UTC
From: Ken Simpson, W8EK
Topic: 1554 Message: 1554

For Sale:

Mirage B 23 Two meter amplifier

This two meter power amplifier is designed to increase
the power from an HT up to the level of many mobile rigs.
It will automatically sense when RF is present, so no
additional switching is needed. The amplifier is a linear
amplifier, so it can be used on SSB as well as FM.

This particular amplifier will increase power by a factor
of 10. In other words, if you drive it with 1/2 watt, you will
get 5 watts out; 1 W in will give 10 W out; 3 W in will give
30 W out, etc. up to about 40 W output. There is a switch
to select FM or SSB operation. This one was made prior
to when MFJ purchased Mirage, so it is a real Mirage amp.

This one works 100% and looks very nice also.

$30 plus shipping from Florida.

Thanks.

1556. Low Pass TVI filters FS

Yahoo group: amatuerradioswapfest
Date: 2006-10-28 12:29:36 UTC
From: Ken Simpson, W8EK
Topic: 1102 Message: 1556

Low Pass TVI filters For Sale:

Kenwood LF-30 A
This is Kenwood's low pass filter, with a cut off of about 30 MHz, and more than 90 db of attenuation between 90 and 300 MHz. It will handle 1000 watts, and has an SO-239 connector on each end. It is in extremely nice condition. These are $65 new; get this one, with paper work for $35.

Nye Viking Low Pass Filter Model 020-001
This filter is rated at 2000 watts, with over 65 db of attenuation above 57 MHz. These are about $60 new; this one is close to new for only $35.

Johnson 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut off frequency of 45 MHz and 75 db of attenuation. It is rated to take 1000 Watts of AM, or 5000 Watts PEP SSB. It has SO-239 connectors on each end. $30.

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter and antenna, and has been optimized to have more attenuation in the 40 MHz region, where many TVs have their IF. According to the manual it is good for 1000 Watts "average", which would be about 2000 watts PEP, and has over 80 db attenuation at 41 MHz. SO-239 connectors on each end. This one looks close to new, and also has the single page "manual" with it. $ 30

Drake TV-1000-LP Low pass filter
This is the filter that is in the copper case, and may also be used on the low end of six meters, as well as HF. It is a 50 ohm filter and is good for 1000 W below 30 MHz, and about 200 W up to 52 MHz. With paper work for $ 30

B & W model 425 (Also know as FL-10/1500) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters, and will handle 1500 Watts. SO-239 connector on each end. It is in very nice condition for $ 25.

MFJ 704 low pass filter
This filter is made to go on the output of your rig to help get rid of TVI and harmonic interference. It is

rated at 1500 Watts, even with a 2:1 SWR, and is
in a very study black metal case with SO-239
connectors on each end. Operating frequency is
listed as 1.5 to 30 MHz. It is a 50 ohm filter. This
one works fine and looks very close to new. These
are $50 new, but you can have this one for $35

Alinco ELP-60 D LX low pass filter
For 50 ohm systems, with up to 500 watts of power.
This one has an SO-239 on one end, and about a 2 foot
length of coax and PL-259 on the other end. $30

Ameco LN-2 low pass filter
This filter is rated at 100 Watts, with an SO-239
connector on each end. $12

Prices do not include shipping from Florida.

Thanks.

1557. Code Practice Oscillators FS

Yahoo group: amatuerradioswapfest
Date: 2006-10-28 13:12:31 UTC
From: Ken Simpson, W8EK
Topic: 1557 Message: 1557

Code practice oscillators for sale:

Nye Viking code practice oscillator
This includes the Nye 310-001 oval key on a nice base, with a tone oscillator mounted on the same base. It is powered by a 9 volt battery. Suggestion: Get the entire code practice oscillator, then when you get your code speed up, and need a nice key, remove the key from the base (2 screws), and use it on the air.
This one works 100%, and looks really great. Not a scratch on it. Just the key normally sells for $40 used, but get the entire unit for only $50.

MFJ 557 code practice oscillator
This is a traditional code practice oscillator, with adjustable volume and tone. It includes a straight key on a nice base. Just like new. It operates from a 9 volt battery. With paper work for $ 25.

Prices do not include shipping from Florida.

Thanks.

1559. FS: DIAL REDUCTION DRIVES

Yahoo group: amatuerradioswapfest
Date: 2006-10-28 16:48:18 UTC
From: Brian Carling
Topic: 1559 Message: 1559

FOR SALE:
REDUCTION DRIVES by JACKSON BROTHERS.
Brand new dial drives for 1/4" shaft. Extra nice brass
construction.These are Jackson Brothers units with a
5:1 or 6:1 tuning ratio. These are the same as used in
the Heathkit HW-101 transceiver and other rigs.
Two hole mounting for front panel is on 1-1/4" centers.
The brass shaft is 1" long and overall dimensions
are:1-1/2" across the mounting ears.
Drive body is 1" diameter.
Accomodates any normal 1/4" shaft on tuning device.
Will sell for $12.00 each plus shipping.

1562. Icom R-71 A Communications Receiver FS

Yahoo group: amatuerradioswapfest
Date: 2006-10-29 13:23:05 UTC
From: Ken Simpson, W8EK
Topic: 1562 Message: 1562

For Sale:

Icom R-71 A communications receiver

The R-71 A is a deluxe communications receiver covering
100 KHz to 30 MHz. Of course it is all solid state, and has
a 6 digit digital read out. The power supply is built in. It has
a 10 key pad for entering frequency, if you do not want to use
the normal knob. There are 32 memories that can be scanned
if desired. It will also scan the entire band, and has wide and
narrow filters, Pass Band Tuning, and many other features.

This particular R-71 A works 100% and looks very close to
new. No scratches, dent, or dings.

Paper work and the original box are included for $350 plus
shipping from Florida.

Thanks.

1563. MFJ switches and other misc items FS

Yahoo group: amatuerradioswapfest
Date: 2006-10-29 17:45:23 UTC
From: Ken Simpson, W8EK
Topic: 1563 Message: 1563

MFJ items for sale:

MFJ 1272 switches to transfer between microphone and TNC

MFJ made these so it would be easy to use a TNC such as the
AEA PK-232, or the Kantronics KAM, etc. The small box has
a socket to plug your microphone into on the front, along with a
switch to switch between mic or TNC. There are two cables
coming out of the back, with one going to the mic jack on your
rig, and other going to your TNC. There is also provisions for
receive audio in, and an external speaker. No power is required.
Inside the box is a series of jumpers, so that it can be configured
for any rig. Paper work is included that shows how to set the
jumpers for most of the common rigs (Kenwood, Yaesu, Icom,
Alinco, etc.).

I have three of these boxes available. All are in A-1 shape, and
work 100%. They are $30 each.

MFJ 1272 MX - Designed for the newer 8 pin RJ-45 mic
connectors (like on a computer network) and the AEA PK-232

MFJ 1272 BX - Designed for the round 8 pin microphone connector
and the AEA PK-232

MFJ 1272 BYV - Designed for the round 8 pin microphone connector
and the Kantronics TNCs (with DB-9 connector)

MFJ 557 code practice oscillator
This is a traditional code practice oscillator, with adjustable
volume and tone. It includes a straight key on a nice base.
It operates from a 9 volt battery. Just like new, with paper
work for $ 25.

MFJ 1305 "wall cube"
This produces 6 V DC at up to 200 ma, and is used to
power such things as keyers, lights on tuners, and many
other misc. applications. Of course it can power many
things other than MFJ items, but this one is an actual MFJ. $10

MFJ 704 low pass filter
This filter is made to go on the output of your rig to help get
rid of TVI and harmonic interference. It is rated at 1500
Watts, even with a 2:1 SWR, and is in a very study black
metal case with SO-239 connectors on each end. Operating
frequency is listed as 1.5 to 30 MHz. It is a 50 ohm filter.
This one works fine, includes paper work, and looks very

close to new. These are $50 new, but you can have this one
for $35.

Prices do not include shipping from Florida.

Thanks.

From: Ken Simpson, W8EK
Topic: 1431 Message: 1568

CW keys for sale:

Military J-37 "Mae West" key with cord
This J-37 key is mounted on an "I" shaped bakelite board, such that the approximate 8 foot long cord can be wrapped around the middle of the key. This particular key looks as perfect as can be. The only "defect" is the fact that some of the knurled nuts are not as shinny as they were 60 years ago. There is no paint missing. $50

Military J-37 "Leg Key"
This J-37 leg key has the hinge on it so that it can be used on a regular table, or on the leg. The actual key is a Winslow Tele-tronics, Inc., 64150. Although this seems hard to believe, it looks very close to new. There are no defects. All paint looks like new. $75

J-38 Japanese copy
This is not the real thing, but is a Japanese copy. The metal is simply brass colored , but it does have a shorting switch and ball bearings. $20

Prices do not include shipping from Florida.

Thanks.

Heath miscellaneous parts and original manuals for sale:

Heath Parts:

Heath "Riser" Feet for SB line
This is a set of four feet for the SB line. It includes the two "riser" feet to raise the front, plus the two regular feet for the back. Hardware, including the long screws, is included.
Original Heath. $15

Front panel from SB-630 Station Console
Panel includes silver and black "Heathkit SB-630" label.
It is in very nice shape with no scratches or defects. $15

Meter from SB-630
This is the same size meter that is used on almost all of the SB line, including the SB-100, 300, 400, etc. The scale on this meter reads "VU" and "SWR", but the scale could be changed with your present meter if you have one that is burned out. The meter works fine, and it fine cosmetically as well. $10

I have other SB-630 parts as well. Please let me know what you need.

Parts from SB-400 xmtr (likely will also work with SB-401)
meter switch - $5
Mic/CW level control (dual pot) - $ 7
Pilot bulb mounting hardware, w/#47 bulb - $2

Parts from Heath HW-202, 2 meter crystal control transceiver
Note: Some of these parts may also work with an HW-2036 transceiver
Front Panel - $5
Chrome bezel for front - $ 5
Rear panel w/ heat sink, and final PC Board assembly $10
S meter - $ 5

I still have a few parts from an SB-614 monitor scope, including position and other controls. I do NOT have the power transformer, high voltage caps, or chassis parts. Please let me know what you might need.

ORIGINAL Heath manuals. These are the manuals only. They are all originals, and not copies, and all are close to new condition.

Heath HW-2021 Assembly manual - 1975
For 2 meter hand held transceiver
No check marks in book. $10

Heath HN-31 A "Cantenna" Dummy Load
This is the "A" model dated 1982
No check marks in book. $10

GD-600 Photoelectric Light Switch
Very nice condition. Schematic is
part of book. $6

Heath IM-5284 Multimeter
Large schematic only - $ 3

These are original manuals only.

Prices do not include shipping from Florida.

Thanks.

From: Ken Simpson, W8EK
Topic: 1438 Message: 1575

VHF and UHF Mobile Antennas and Mounts For Sale:

VHF (2 meter) antennas:

Larsen NLA-150 coil only
Fits the Larsen NLA mount and has about 3 db gain when
used with a 5/8 wave whip. In very good shape. $11

Larsen LM-150 coil only
Fits the Larsen LM mount, and provides about 3 db gain,
when used with a 5/8 wave (about 4 foot) whip. $16

The four foot whips for these are hard to ship, and it is best
to pick up a whip at your local Radio Shack, or similar store.
If you need them, they are $6 each.

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave (about 19
inch) antenna. It can be cut for 2 meters, 220 MHz, or 450
MHz bands. Good condition for $7

Larsen ""Q" Quarter wave whip
Fits a 5/16 inch stud, such as the Larsen LM mount, and others.
The whip can be cut for 2 meters, 220 MHz, or 450 MHz bands. $6

Antennas for 450 MHz:

Larsen NLA-450 coil and "stacked" whip
These fit the Larsen NLA mount, and have about 5 db gain on
the 70 cm band. Stacked whip is included. In nice shape. $14

Larsen "OM" coil and mount
This is made to mount on a flat surface, and requires 3
mounting bolts, plus a hole in the center for the coax. It does
not require a ground plane, so is useful on sailboats, and
other places where a ground plane is not available.
OM-450 - For 70 cm band. Includes "stacked" whip for 5 db gain.
Good condition for $20.

Mobile antenna mounts for sale:

Magnetic mount with coax
Standard 3/8 inch 24 thread, about 3 inches in diameter, and
black in color. Suitable for 2 meter, 440 MHz, or 6 meter antenna.
Very good condition. $15

HyGain TLM Trunk Lip Mount
This trunk lip mount has a 5/16 inch stud on it.

Ideal for 1/4 wave antenna, such as "Q" above. With coax for $14

Prices do not include shipping from Florida.

Thanks.

1576. Vectronics VC-300 DLP antenna tuner FS

Yahoo group: amatuerradioswapfest
Date: 2006-11-18 19:21:24 UTC
From: Ken Simpson, W8EK
Topic: 1576 Message: 1576

For Sale:

Vectronics VC-300 DLP HF antenna tuner

This is NOT the Viewstar VS-300 antenna tuner, but is a
much more sophisticated unit. The VC-300 DLP has a
fairly large cross needle meter for reading both forward
and reverse power simultaneously, and hence the SWR.
It will read either average or peak power, with scales of 30
Watts and 300 Watts. In addition, a dummy load is included
inside, as is a 4 to 1 balun. The meter can be back lighted
if you apply 12 V DC. The tuner also has an antenna switch
built in, that will switch between "tuned" and "straight thru"
operation, in addition to various antennas. It will tune 160
thru 10 meters.

These units sell for about $170 new. This one is in extremely
nice condition, both electrically and cosmetically. The
manual is included for $135, plus shipping from Florida.

Thanks.

1577. Kenwood PC-1 A phone patch, SMC-24 speaker microphone, and other Kenwood accessories FS

Yahoo group: amatuerradioswapfest
Date: 2006-11-26 17:42:19 UTC
From: Ken Simpson, W8EK
Topic: 1577 Message: 1577

Kenwood items For Sale:

Kenwood PC-1 A phone patch.
This is the model with the 8 pin connectors, although
they can be changed, if needed. It includes a nice meter
for adjusting the null so VOX will work OK. This particular
unit looks like new. It is in its original box, with paperwork
for $ 50.

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Small Kenwood hand microphone
This is like the small hand mic that came with the
Kenwood TR-7400. It is a 500 ohm dynamic mic.
No model number on it, but it looks close to new,
and works fine. If you like a smaller mic, compared
to the MC-35 or MC-30, this is it. $30

Kenwood MJ-68 microphone connector adapter
Converts a round 6 pin Kenwood mic connector, so it can
be plugged into a Kenwood rig with the round 8 pin
connector. Like new. $20

Kenwood TU-4 C
Subaudible (PL) encoder for Kenwood TW-4000
This unit provides separate tones for the VHF (2 m) portion
and the UHF (440 MHz) portion. It plugs in to the TW-4000
to provide the tones. No adjustments are normally needed.
This one is in its original box with paper work, hardware, etc.
$60

Power cord for many of the newer 2 meter and 440 MHz rigs
that take the "T" 2 pin connector. This fits many rigs other
than Kenwood rigs. $12

Kenwood PB-21 battery pack for TH-21 / 31 / 41 series HTs
This battery pack does not hold a charge well. Physically it is
fine, but it needs a new "insert" in it. $15

Antenna adapter for Kenwood TH-21 / 31 / 41 HTs
This adapts the antenna connector found on these HTs to a
standard BNC connector. $3

Special Rubber Duck antennas for Kenwood TH-21 series HTs
with the threaded connector
Aftermarket stubby, 3.3 inches long $10
Kenwood RA-8 Stubby, 4 inches long $12
Kenwood regular, 6.6 inches long $10
Combo set of long 11.5 inch "gain" antenna and 4 inch stubby - $22

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached. $5

Belt clip for TR-2400 HT, complete with hardware - $8

Wrist strap - I think it fits most Kenwood (and maybe other) HTs - $4

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the
Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually,
one must have the battery inside the HT, but this lets you charge
a second battery outside of the HT. The original charger is used.
It is in good shape, and works fine. $3

Service manual for Kenwood TR-2600 HT - $10

Operators manual for Kenwood TW-4000 - $15

Prices do not include shipping from Florida.

Thanks.

1578. Bill Orr Books FS

Yahoo group: amatuerradioswapfest
Date: 2006-12-10 12:20:48 UTC
From: Ken Simpson, W8EK
Topic: 1578 Message: 1578

For Sale:

Books by Bill Orr, W6SAI

Radio Handbook, published by Editors and Engineers
This is a very large hard bound book, similar to the ARRL Handbook, but written by Bill Orr. It contains much of the same info as the ARRL Handbook, but in a different form.

1956 - 14th edition
Tape on spine, but pages are in good shape, with everything intact and very readable. $22

1975 - 20th edition
Close to new condition $ 25

W6SAI HF Antenna Handbook - 1996
Large 8 1/2 x 11 inch paper back
Extremely nice condition $ 15

Beam Antenna Handbook - 1976 - 5th edition
Smaller format book, in very nice condition. $7

Simple low cost wire antennas - 1972
Smaller format, in very good shape. $7

Prices do not include shipping from Florida.

Thanks.

From: goshawk
Topic: 1581 Message: 1581

hello list,
I am looking for a scanner with a coverage range of at least 25 to 1300MHZ, with no gaps please. would like either a basestation or mobile unit, not a handheld one, it should be in good condition, and full working order.
with in UK only please.

please either call me on 02081417811, or email to,
goshawk@...
if you either have one to clear out, or know of anyone or place that does, I am not looking to pay new price, thanks.

Simon

ARRL Handbooks for sale:

These are in the smaller format (6 1/2 by 9 1/2 inch size).

1964 - 41st edition
Extremely good condition. Close to new. Pages are NOT yellowed,
cover and spine are in great shape, and all pages are intact. $35

1969 - 46th edition
Spine taped, and cover is worn. Pages are intact and good. $18

1971 - 48th edition
Spine is faded, pages are intact, and cover is good. Some
pages have yellowed, and some have not. $ 15

1973 - 50th edition
Very nice condition throughout; some pages have yellowed. $ 15

1977 - 54th edition
Slight crease on cover $ 13

1978 - 55th edition
Extremely nice condition. $ 15

The following are in the larger 8 1/2 by 11 inch format:

1981 - 58th edition
Spine is faded, and there is a bit of dirt on the cover.
Otherwise it is in great shape. $14

1983 - 60th edition
Great condition; no problems. $ 16

1985 - 62nd edition
Like new. $18

1986 - 63rd edition
Close to new condition, although some pages have
yellowed slightly. $18

1988 - 65th edition - Hardbound

1584. Coaxial antenna switches FS

Yahoo group: amatuerradioswapfest
Date: 2006-12-17 00:54:55 UTC
From: Ken Simpson, W8EK
Topic: 1092 Message: 1584

Coaxial antenna switches for sale:

B & W 595 coax switch
This one switches 6 antennas, and is in a rectangular box with all 7 SO-239 connectors coming out the back of the box. Unused antennas ARE grounded.
It works fine. With paper work for $40

B & W ??? Coax switch
This coax switch will switch up to 5 antennas. It is round, and has six SO-239 connectors on the back, so the coax comes out the back in a large bundle. Unused connections are not grounded. Face plate was an optional extra that I did not get, as I had it mounted in a panel. Sorry, but I do not remember the model number.
It is in a round sealed can for excellent shielding, with a very large black knob. It is in great condition for $35.

B & W Model 550 A coax switch
This model will switch up to 5 antennas, and does NOT ground unused antennas. It has SO-239 connectors, with the coax coming out like spokes of a wheel.
It is in good condition and works fine. $ 35

AmComm JV-104 coax switch
Switches 3 antennas, with SO-239 connectors. It is in a nice black rectangular box about 4 x 3 x 3 inches in size. Very nice condition. $25

B & W 591 A Coax "Transfer" Switch
This switch is designed to switch an auxiliary piece of equipment in and out (For example, bypass a linear amplifier, transverter, preamp, etc.). It has four SO-239 connectors. It works fine and is in great shape for $ 35.

Prices do not include shipping from Florida.

Thanks.

1585. TenTec HF transceiver FS

Yahoo group: amatuerradioswapfest
Date: 2006-12-17 21:42:26 UTC
From: Ken Simpson, W8EK
Topic: 1585 Message: 1585

TenTec items for sale:

TenTec 585 Paragon HF transceiver
This rig covers 160 thru 10 meters, including the WARC
bands. It has a general coverage receiver, that includes
SSB, CW, and AM. An optional FM adapter is available
for it. Of course it has digital readout, memories, scan,
dual VFOs, PBT, notch filter, etc. Up to 100 Watts output,
that can be adjusted down to milliwatts. This particular unit
works 100% and looks really great. Big inch thick manual
is included. TenTec sells these used for $795. This one
is just as nice, but is only $650.

TenTec 299 Voice synthesized frequency read out
This unit is used with the TenTec Omni 546 series A, B, C,
some Argonauts, Corsair, and others. It will work with
other rigs (such as the Triton), with minor mods to get
the right connections.
The 299 is used primarily for blind hams who can not read the
frequency readout on the transceiver. By pushing a button, it
will "speak" the frequency (to tenth of a KHz). A front panel
switch permits selection of the entire frequency, or you can
eliminate the MHz, and give only the KHz. There is also a
volume control on the front panel.
Of course it can also be used to give a "voice digital readout"
to any rig with an analog dial, or used a normal frequency counter.
This particular unit is in great shape electrically. Cosmetically
it looks nice, but has some very minor wear. $ 190

Prices do not include shipping from Florida.

Thanks.

1587. Daiwa CN-460, VHF/UHF Wattmeter FS

Yahoo group: amatuerradioswapfest
Date: 2006-12-23 18:06:23 UTC
From: Ken Simpson, W8EK
Topic: 1587 Message: 1587

For Sale:

Daiwa CN-460 M wattmeter

This cross needle wattmeter is rated to operate in the
VHF and UHF bands from 140 to 450 MHz, so it covers
2 meters, 220 MHz and 440 MHz ham bands. It has full
scale readings of 15 W and 150 Watts in forward power,
and 5 W or 50 W in reverse. It also will accept 13 V DC
to give a very nice soft backlight to the meter.

This particular meter has a few scratches. It works fine in
forward power, and seems to be very accurate. However,
in reverse power it does not read at all. All of my antennas
can not be that good! This could be a diode or a broken
wire. I don't know.

$20 plus shipping from Florida.

Thanks.

1596. 2 meter mast mount preamplifier FS

Yahoo group: amatuerradioswapfest
Date: 2006-12-31 23:10:06 UTC
From: Ken Simpson, W8EK
Topic: 1596 Message: 1596

For Sale:

Microwave Modules Ltd MMG 144 V Preamplifier

The preamplifier is designed for 2 meter use, covering
144 to 148 MHz. The preamp is made to be mast mounted,
although it can be used inside as well. It typically has 12 db
gain with a noise figure better than 1.3 db from the GASFET
circuit. It needs 12 V DC at about 75 ma to operate, and has
SO-239 connectors in and out, plus a 5 pin DIN connector
(included) for power.

The unit can handle up to 100 Watts thru it, and can either be
switched by RF activation, or switched by a wire thru the 5 pin
DIN connector.

This particular unit is still in its original box, with paper work.
I don't think I ever used it, although I might have hooked it up
once inside for testing.

$40 plus shipping from Florida.

Thanks.

1606. Many HT rubber duck and telescoping antennas FS

Yahoo group: amatuerradioswapfest
Date: 2007-01-13 14:08:23 UTC
From: Ken Simpson, W8EK
Topic: 1606 Message: 1606

For Sale:

Rubber Duck and telescoping antennas for your HT.
All are for 2 meters, with BNC connectors, unless
stated otherwise.

Larsen "Half Wave" KulDuck Gain antenna
Rubber duck antennas do not really have gain, but
compared to a standard rubber duck, this one has
about 3 db gain. About 10 inches long. $15

Larsen KD4-VHF2 Standard KulDuck antenna
Regular size about 7 inches long. $14

AEA "Hot Rod" Full 1/2 wave telescoping antenna
Actual gain antenna. It has a very good SWR, and
really appreciable gain. $18

AEA "Hot Rod" as above for 440 MHz. $18

5/16 inch threaded, like used by Motorola and others - $10 each
Regular - 6.7 inches long
Regular - 5.7 inches long
Stubby - 4 inches long

Type F connector - 6.5 inches long - $10

PL-259 connector - 6.5 inches long - $10
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long - $10
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Aftermarket stubby, 3.5 inches long - $10
Kenwood RA-8 stubby, 4 inches long - $12
Kenwood regular, 6.6 inches long - $10
Combo set of long 11.5 inch "gain" antenna and 4 inch stubby - $25

Prices do not include shipping from Florida.

Thanks.

1607. Low Pass TVI filters FS

Yahoo group: amatuerradioswapfest
Date: 2007-01-13 22:40:59 UTC
From: Ken Simpson, W8EK
Topic: 1102 Message: 1607

Low Pass TVI filters for the transmitter For Sale:

B & W model 425 (Also know as FL-10/1500) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end.
I have two of these available. One is a fairly new model and
is in nice condition for $25.
The second is a much older model that seems much heavier
duty. It weighs almost twice as much, and looks like it would
take more power. It likely was made in the days that plate
modulated AM was the rule. $35

Kenwood LF-30 A
This is Kenwood's low pass filter, with a cut off of
about 30 MHz, and more than 90 db of attenuation
between 90 and 300 MHz. It will handle 1000 watts,
and has an SO-239 connector on each end. It is in
extremely nice condition. With paper work for $35.

Nye Viking Low Pass Filter Model 020-001
This filter is rated at 2000 watts, with over 65 db of
attenuation above 57 MHz. This one is close to new
for only $35.

Johnson 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut
off frequency of 45 MHz and 75 db of attenuation.
It is rated to take 1000 Watts of AM, or 5000 Watts
PEP SSB. It has SO-239 connectors on each end.
$30.

MFJ 704 low pass filter
This filter is made to go on the output of your rig to
help get rid of TVI and harmonic interference. It is
rated at 1500 Watts, even with a 2:1 SWR, and is
in a very study black metal case with SO-239
connectors on each end. Operating frequency is
listed as 1.5 to 30 MHz. It is a 50 ohm filter. This
one works fine and looks very close to new. $30

Alinco ELP-60 D LX low pass filter
For 50 ohm systems, with up to 500 watts of power.
This one has an SO-239 on one end, and about a 2
foot length of coax and PL-259 on the other end. $30

Ameco LN-2 low pass filter
This filter is rated at 100 Watts, with an SO-239
connector on each end. $12

Prices do not include shipping from Florida.

Thanks.

1608. SignaLink SL-1+ For Sale

Yahoo group: amatuerradioswapfest
Date: 2007-01-14 02:21:33 UTC
From: robert goodman
Topic: 1608 Message: 1608

SignaLink SL-1+ For Sale

The SL-1+ connects to your computer's sound card and to your radio's Mic, Data or Accy Port. It is designed to work with ALL computer sound cards, and with ALL radios. The SignaLink SL-1+ is compact, low powered and fully isolated for optimum performance. It supports ALL sound card Digital and Voice modes, and does NOT use a serial or USB port!

I have been using this unit for PSK-31 on both my FT-897D and my FT-857D. Very well engineered...works perfectly. Can be jumpered for most any other radio.

Full details and pricing at my website: http://aa5fr.com/signalink.htm

73,

Robert AA5FR

Also includes RT-841 set.

All complete and in good condition...
Available for $10.00 plus shipping

1610. Larsen 2 m and 440 MHZ mobile antennas FS

Yahoo group: amatuerradioswapfest
Date: 2007-01-21 23:56:43 UTC
From: Ken Simpson, W8EK
Topic: 1610 Message: 1610

VHF and UHF Mobile Antennas and Mounts For Sale:

VHF (2 meter) antennas:

Larsen NLA-150 coil only
Fits the Larsen NLA mount and has about 3 db gain when
used with a 5/8 wave whip. In very good shape. $11

Larsen LM-150 coil only
Fits the Larsen LM mount, and provides about 3 db gain,
when used with a 5/8 wave (about 4 foot) whip. $16

The four foot whips for these are hard to ship, and it is best
to pick up a whip at your local Radio Shack, or similar store.
If you need them, they are $6 each.

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave (about 19
inch) antenna. It can be cut for 2 meters, 220 MHz, or 450
MHz bands. Good condition for $7

Larsen ""Q" Quarter wave whip
Fits a 5/16 inch stud, such as the Larsen LM mount, and others.
The whip can be cut for 2 meters, 220 MHz, or 450 MHz bands. $6

Antennas for 450 MHz:

Larsen NLA-450 coil and "stacked" whip
These fit the Larsen NLA mount, and have about 5 db gain on
the 70 cm band. Stacked whip is included. In nice shape. $14

Larsen "OM" coil and mount
This is made to mount on a flat surface, and requires 3
mounting bolts, plus a hole in the center for the coax. It does
not require a ground plane, so is useful on sailboats, and
other places where a ground plane is not available.
OM-450 - For 70 cm band. Includes "stacked" whip for 5 db gain.
Good condition for $20.

Mobile antenna mounts for sale:

Magnetic mount with coax
Standard 3/8 inch 24 thread, about 3 inches in diameter, and
black in color. Suitable for 2 meter, 440 MHz, or 6 meter antenna.
Very good condition. $15

HyGain TLM Trunk Lip Mount
This trunk lip mount has a 5/16 inch stud on it.

Ideal for 1/4 wave antenna, such as "Q" above. With coax for $14

Prices do not include shipping from Florida.

Thanks.

1614. Crystals for 80m AM low end of band...

Yahoo group: amatuerradioswapfest
Date: 2007-01-28 15:44:07 UTC
From: Bry Carling
Topic: 1614 Message: 1614

I have been asked what frequencies might become popular
on 80m for those choosing to operate their rigs with crystal
control. This is because I can supply FT243 crystals for those
who need them. One guy suggested that I get 3675 kHz and
three or four other spots in the lower reaches.

Can you please come up with 4 frequencies that you think
will be popular enough to warrant my making up some crystals?

If there is enough interest, I will plan to get this done over the
next few weeks.

ARRL Handbooks for sale:

These are in the smaller format (6 1/2 by 9 1/2 inch size).

1947 - 24th edition
This one is very used, as it should be at 60 years old. The spine is taped, and the cover is partially loose from the binding. This is a very good, usable handbook, but it is not collector quality. There are 150 pages of ads in the back, which show a lot of vintage equipment, tubes, parts, etc. $20

1964 - 41st edition
Extremely good condition. Close to new. Pages are NOT yellowed, cover and spine are in great shape, and all pages are intact. Collectible quality for sure. $35

1968 - 45th edition
Cover is worn, and spine is taped. It shows use, but all pages are intact and good. $10

1971 - 48th edition
Spine is faded, pages are intact, and cover is good. Some pages have yellowed, and some have not. $ 15

1973 - 50th edition
Very nice condition throughout; some pages have yellowed. $ 15

1977 - 54th edition
Slight crease on cover $ 13

1978 - 55th edition
Extremely nice condition. $ 15

The following are in the larger 8 1/2 by 11 inch format:

1981 - 58th edition
Spine is faded, and there is a bit of dirt on the cover. Otherwise it is in great shape. $14

1983 - 60th edition
Great condition; no problems. $ 16

1985 - 62nd edition
Like new. $18

1986 - 63rd edition
Close to new condition, although some pages have yellowed slightly. $18

1993 - 70th edition - Hardbound
Like new, with a very slight yellowing of some pages. $ 20

1996 - 73rd edition
Like new, with disk. $18

2000 - 77th edition
Like new. $20

Prices do not include shipping from Florida.

Thanks.

1636. TenTec HF xcvr and other items FS

Yahoo group: amatuerradioswapfest
Date: 2007-03-10 13:18:54 UTC
From: Ken Simpson, W8EK
Topic: 1636 Message: 1636

TenTec items for sale:

TenTec 561 Corsair II, HF transceiver
Some people consider the Corsair II to be the best rig that
TenTec made, prior to the Orion. It is not a synthesized rig,
so phase noise is basically nonexistent. This means that it
has a really superb receiver that is far better than most of the
Japanese rigs. It covers 160 thru 10 meters, including the
WARC bands, and features such things as pass band tuning,
Jones filter, variable band pass filtering, notch filter, etc. A
keyer is built in for CW, and of course it has the great QSK
that TenTec is famous for.
This particular unit is about as nice as you will find. Electrically,
everything works 100%. It had the PTO rebuilt about a year ago.
It was back to the factory for a complete health check up about
a year ago as well. Cosmetically, it is close to perfect. There
is a very small scratch on the top near the plastic end trim. No
other scratches that I can find. Manual is included for $550.

TenTec 299 Voice synthesized frequency read out
This unit is used with the TenTec Omni 546 series A, B, C,
some Argonauts, Corsair, and others. It will work with
other rigs (such as the Triton), with minor mods to get
the right connections.
The 299 is used primarily for blind hams who can not read the
frequency readout on the transceiver. By pushing a button, it
will "speak" the frequency (to tenth of a KHz). A front panel
switch permits selection of the entire frequency, or you can
eliminate the MHz, and give only the KHz. There is also a
volume control on the front panel.
Of course it can also be used to give a "voice digital readout"
to any rig with an analog dial, or used a normal frequency counter.
This particular unit is in great shape electrically. Cosmetically
it looks very nice, but has some very minor wear. $ 190

TenTec hand microphone
There is no model number on this mic, but I think it is a model
700 C; at least that is what the paper work says. It has the 4 pin
connector on it, works fine, and looks like new. $35

Prices do not include shipping from Florida.

Thanks.

1638. Yaesu VX-2 compact dual band HT and accessories FS

Yahoo group: amatuerradioswapfest
Date: 2007-03-17 14:12:02 UTC
From: Ken Simpson, W8EK
Topic: 1638 Message: 1638

For Sale:

Yaesu VX-2 dual band HT
This is a very nice, small HT that will transmit on the 2 meter and 440 MHz bands, and receive almost "DC to light". Obviously there are a few holes in the DC to light receive coverage, but it will receive AM on the AM broadcast band, up thru 30 MHz (so it covers the short wave bands), 6 meters, aircraft, VHF and UHF TV bands, commercial FM band, and most everything else up to 999 MHz, with cell phone frequencies blocked. Transmit power can be up to 3 W, depending on power source. It is about 1.5 W with the internal Lithium Ion battery.

This HT also has lots of memories. It has 900 "standard" memories, 100 "Frequency skip memories", plus several other special types, for a total of something like 1200 memories. You will not run out of memories with this HT! Subaudible (PL) tones are included, as is several scan modes. This HT will do a lot, all in a very small package.

This particular unit is in very nice condition. I can not find a scratch on it, and all lettering is very nice, and LCD display is clear with no defects. Basically, it looks very close to new. Everything works 100%. I never received a belt clip with it, so it does not have one, but one is not needed, as it slips easily into your shirt pocket. Wrist strap is included.

It includes the rubber duck antenna, a good Lithium Ion battery, wall wart charger which charges the battery in about 2.5 hours, wrist strap, paper work, and of course the HT itself. $120

Accessory items for the VX-2:

Yaesu CSC-90 protective case - like new - $18

Yaesu FNB82LI - spare Lithium Ion battery pack
1000 mahr capacity. It holds a charge fine and works like new. $25

"Aftermarket" spare Lithium Ion battery pack
1000 mahr capacity. It also holds a charge fine and works like it was new. $15

"Aftermarket" desk charger
This permits one to charge a spare battery outside of the HT, while the HT is in use. It still takes about 2 hours to

charge a battery, but gives added flexibility. It includes a separate wall wart supply which plugs in to the desk charger. It works fine, and looks close to new. $20

Accessory for Yaesu VX-1 HT:

Yaesu FBA-20 "Battery case" for use with Yaesu VX-1 HT
This unit permits one to use a single AA battery (alkaline, NiCad, NiMH, or whatever) in the VX-1 HT. It has smart circuitry in it to increase the voltage to 3.8 V as required by the HT. It is idea for use as an emergency spare. This one has been tested, and then put back in to its blister package, so it is basically new. $18

Prices do not include shipping from Florida.

Thanks.

1641. TenTec 560 Corsair HF transceiver FS

Yahoo group: amatuerradioswapfest
Date: 2007-03-24 13:28:32 UTC
From: Ken Simpson, W8EK
Topic: 1641 Message: 1641

TenTec 560 Corsair, HF transceiver for sale

Many consider the Corsair to be the best rig that TenTec ever made, before the Orion. It is not a synthesized rig, so phase noise is virtually nonexistent. This means that it has a really superb receiver that is far better than most of the Japanese rigs. It covers 160 thru 10 meters, including the WARC bands, and has such things as band pass tuning, notch filter, QSK, noise blanker, etc. This one has the optional 8 pole model 220 filter in the 9 MHz IF, for additional selectivity. It has up to 100 watts output, with front panel adjustment for QRP, and is all solid state.

Electrically, everything works 100%. It is an exceptional performing unit. The PTO is smooth and works great. Cosmetically, it is not quite as good. A previous owner spilled some solvent on the left side. This resulted in some plastic melting. The TenTec logo is distorted, and the plastic on the end cap was partially dissolved, so I removed the end caps. There are some scratches, especially on the top bezel. This is strictly cosmetic, and does not effect operation at all. Electrical performance is first class.

Manual is included for $395.

TenTec 299 Voice synthesized frequency read out
This unit is used with the TenTec Omni 546 series A, B, C, some Argonauts, Corsair, and others. It will work with other rigs (such as the Triton), with minor mods to get the right connections.
The 299 is used primarily for blind hams who can not read the frequency readout on the transceiver, but it can obviously be used by anyone. By pushing a button, it will "speak" the frequency (to tenth of a KHz). A front panel switch permits selection of the entire frequency, or you can eliminate the MHz, and have it give only the KHz. There is also a volume control on the front panel. Of course it can also be used to give a "voice digital readout" to any rig with an analog dial, or used a normal frequency counter. This particular unit is in great shape electrically. Cosmetically it looks very nice, but has some very minor wear. $ 190

Prices do not include shipping from Florida.

Thanks.

1647. EBC 2 meter FM transceiver FS

Yahoo group: amatuerradioswapfest
Date: 2007-03-31 12:15:03 UTC
From: Ken Simpson, W8EK
Topic: 1647 Message: 1647

For Sale:

EBC 144 Jr., 2 meter FM transceiver

This Emergency Beacon Corporation 2 meter FM transceiver was considered to be the "Cadillac" of 2 meter rigs in the 1970 and 80's. It has two sets of thumbwheel switches for frequency selection, covering the entire 2 meter band. There are provisions for odd splits, although the rig automatically selects the correct offset for repeaters. Of course it can be used on simplex also. Scan provisions are included, along with a priority channel watch. The receiver sensitivity is exceptional. Power output is rated at 20 watts, and it uses real transistors, instead of a "module."

This particular unit works fine, and looks very, very good -- very close to new. Along with the regular paper work, an advertising brochure is included. This one has a subaudible tone (PL) module added, as well as a touchtone (DTMF) pad in a separate enclosure that plugs in to the EBC. The EBC sold for about $500 in the 70's, so you know they were the real "Cadillac."

$115 plus shipping from Florida.

Thanks.

1648. Low Pass TVI filters FS

Yahoo group: amatuerradioswapfest
Date: 2007-03-31 13:49:16 UTC
From: Ken Simpson, W8EK
Topic: 1102 Message: 1648

Low Pass TVI filters For Sale:

Add one of these filters to your transmitter to prevent TVI or RFI.

B & W model 425 (Also know as FL-10/1500) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. Paper work included.
This is a much older model that seems much heavier
duty. It weighs almost twice as much, and looks like it
Would take more power. It likely was made in the days
that plate modulated AM was the rule. $35

Nye Viking Low Pass Filter Model 020-001
This filter is rated at 2000 watts, with over 65 db of
attenuation above 57 MHz. In extremely nice condition
for only $35.

Johnson 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut
off frequency of 45 MHz and 75 db of attenuation.
It is rated to take 1000 Watts of AM, or 5000 Watts
PEP SSB. It has SO-239 connectors on each end.
$30.

MFJ 704 low pass filter
This filter is made to go on the output of your rig to
help get rid of TVI and harmonic interference. It is
rated at 1500 Watts, even with a 2:1 SWR, and is
in a very study black metal case with SO-239
connectors on each end. Operating frequency is
listed as 1.5 to 30 MHz. It is a 50 ohm filter. This
one works fine and looks very close to new. $30

Alinco ELP-60 D LX low pass filter
For 50 ohm systems, with up to 500 watts of power.
This one has an SO-239 on one end, and about a 2 foot
length of coax and PL-259 on the other end. $30

Ameco LN-2 low pass filter
This filter is rated at 100 Watts, with an SO-239
connector on each end. $12

Prices do not include shipping from Florida.

Thanks.

Heath items for sale:

Cover for Heath HM-102 or HM-2102 wattmeters
This is the inverted U shaped cover, in very nice condition.
It may fit other units as well. $10

Switch from HM-102 or HM-2102 wattmeter
This three position switch is used to select power range
or SWR, and is located on the bottom left side of the
wattmeters. $4

Knob for SB line
This is the smaller knob with the 1 1/8 inch skirt that is
used on almost all of the SB line, plus some other Heath
gear. No defects that I can find. $5

I have many SB-630 parts as well. Most of the chassis
parts are available, but no clock. Front panel and outer
case are gone, but reflectometer assembly, transformer,
switches, etc. are still available.
Please let me know what you need.

Parts from SB-400 xmtr (likely will also work with SB-401)
Mic/CW level control (dual pot) - $ 7
Pilot bulb mounting hardware, w/#47 bulb - $2
Meter switch - $5

Front Panel for HW-202, 2 meter rig - $5
Chrome bezel for front of HW-2036 or HW-202 - $ 5

Heath Amateur Radio Novice License Training Course
This is really great for nostalgia. Course includes study
material and code tapes to get up to 5 WPM.
All in a large 2 inch notebook. $15

ORIGINAL Heath manuals. These are the manuals
only. They are all originals, and not copies, and all
are close to new condition.

Heath HM-2102 VHF Wattmeter Assembly Manual
1972 - Looks very close to new, but does have check
marks in the book. Schematic included. $10

Heath HW-2021 Assembly manual - 1975
For 2 meter hand held transceiver
No check marks in book. $10

Heath HN-31 A "Cantenna" Dummy Load
This is the "A" model dated 1982
No check marks in book. $10

GD-600 Photoelectric Light Switch
Very nice condition. Schematic is
part of book. $6

Heath IM-5284 Multimeter
Large schematic only - $ 3

These are original manuals only.

Prices do not include shipping from Florida.

Thanks.

1657. Coaxial antenna switches FS

Yahoo group: amatuerradioswapfest
Date: 2007-04-17 15:36:19 UTC
From: Ken Simpson, W8EK
Topic: 1092 Message: 1657

Coaxial antenna switches for sale:

MFJ 1702 B Coax Switch
Switches 2 antennas. Unused position IS grounded.
A third position grounds both antennas.
This coaxial antenna switch is in a heavy diecast
housing that utilizes "stripline" construction to keep
the impedance very close to 50 ohms. It also
permits good operation at higher frequencies.
This one works 100% and looks great also. $ 20

B & W Model 550 A coax switch
This model will switch up to 5 antennas, and does NOT
ground unused antennas. It has SO-239 connectors
on the sides, with the coax coming out like spokes of
a wheel. It works fine. $ 28.

B & W Model 550 A coax switch
As above, but includes a mounting bracket for $ 30.

B & W Model 55 A - 2
This is a 2 position coax switch, similar to the 550 A
(above), but only switches 2 antennas. The unused
position is not grounded. SO-239 connectors come
out like spokes of a wheel. It works fine and looks
fine also. $20

AmComm JV-104 coax switch
Switches 3 antennas, with SO-239 connectors. It is in
a nice black rectangular box about 4 x 3 x 3 inches in
size. Unused antennas are not grounded. Very nice
condition. $20

Pace 5621, 4 position Coax Switch
This is in a 4 x 3 x 2 rectangular box, with 4 switched SO-239
connectors. Unused positions are NOT grounded. It works
fine, but cosmetically is not as nice as some. $8

Prices do not include shipping from Florida.

Thanks.

1659. Several different microphones FS

Yahoo group: amatuerradioswapfest
Date: 2007-04-21 13:09:09 UTC
From: Ken Simpson, W8EK
Topic: 1659 Message: 1659

Microphones for sale:

All work 100% and look very nice unless stated otherwise.

Touchtone (DTMF) mics

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone (DTMF) pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $40

"Touchmatic" touch tone microphone
Regular low Z mic, with a 12 digit touch tone pad and an
8 pin plug wired for Kenwood. Nice condition. $40

CES Model 630 touch tone microphone
This mic has a 12 digit touch tone pad on the front, with a
regular Low Z hand microphone. Round 6 pin mic plug. $40

CES "Micropad" touch tone microphone
No model number on this one, but it has a 12 digit pad on the
back. Round 8 pin connector wired for Kenwood. $40

CES "Micropad" similar to the one above, except this one
appears to have not been used. It is still in the plastic bag,
and includes an unused velcro mic hanger. Round 8
pin connector wired for Kenwood. $45

Regular hand microphones:

Yaesu YM-40, 600 ohm impedance hand microphone
This one has a round 8 pin connector, and has up and
down buttons on it, in addition to a lock button on the
back, and the normal PTT switch.
It works fine and looks fine also. $35

Azden PCM-463 A hand microphone
This hand mic had up down buttons on the top, with an M1
call and PTT button on the side. It works with the Azden
PCS-5000, and maybe others. It has a round 8 pin connector
wired for Azden, and is in nice shape. $30

Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

HT speaker microphones For Sale:
All work 100% and look fine also.

Icom HM-9 speaker microphone
This is the speaker mic that was used with all of the early Icom HTs, including the IC-2 AT, IC-02-AT, IC-2G AT, and many others. It also works with many non Icom HTs. It has a 2.5 mm and 3.5 mm plug. $18

Radio Shack 19-310 speaker microphone
Has 3.5 mm and 2.5 mm plug; fits most Radio Shack HTs, but also many Icom, Kenwood and Yaesu HTs. $18

Kenwood SMC-30 speaker mic
Fits the TH-21/31/41 series of HTs, plus some others. It has a 3 conductor 3.5 mm plug, and a 2 conductor 2.5 mm plug. $18

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HTs. $18

AEA "HTM" microphone
This is an external microphone to use with the AEA series of HTs. It is in nice shape for $25

Kenwood MJ-68 microphone connector adapter
Converts a round 6 pin Kenwood mic connector, so it can be plugged into a Kenwood rig with the round 8 pin connector. Like new. $20

Prices do not include shipping from Florida.

Thanks.

Control Box for 8 wire CDE and HyGain "Ham" rotors for sale:

This is the control box only that can be used on any of the 8 wire Ham M, Ham II, Ham III, Ham IV, Ham V, or Tailtwister rotors. It can also be used on the smaller CD-44, etc. This particular box is the one with the meter on the left, and three buttons on the right for rotor control. It has a metallic colored front panel with a light goldish or bronze cast to it. The top of the box is black, and the bottom is off white.

This particular control box works fine, and looks fine as well.

Paper work is included for $75 plus shipping from Florida.

Thanks.

1670. major radio clear out, MANY BARGAINS!

Yahoo group: amatuerradioswapfest
Date: 2007-04-28 02:11:16 UTC
From: goshawk
Topic: 1670 Message: 1670

hello list,
well, I have decided to have a mega clear out of radio equipment, and am selling the following items.

120A psu, has seen very little use since new, has variable voltage, from 12 to 16V, duel fans, and carry handle, comes with mains lead. this was £350 new, would like £250 +carriage which will be about £15, or will consider sensible offers.

yaesu ft736r, this radio has had the extra modules fitted, so covers 4 bands, 6 and 2 meters, and both 70 and 23CM. it has had the speech readout fitted, has seen no use at all, and there is also a tape manual. I am not sure what to ask for this set, so I will consider any sensible offers, when I purchased it, it was around the £700 mark. as this is a large radio, carriage will be about £15

Kenwood tmg707, this is a vhf and uhf mobile set, but it has been opened up, so rather than just doing the 2 meters and 70 cm, it will now both receive and transmit from 136 to 176MHZ, and from 400 to 500MHZ, and will receive a lot more. this means that as well as for ham radio, this set can be used on marine band, UK-general, 446 licence free, pmr, and a lot of other frequencies. this set does 50W on high power, and has seen less than 30mins of use, it has also had the VS3 speech readout fitted. last known price was £240 with out the speech, which was an
extra £45, would like £150, or will consider sensible offers.

Kenwood ts570, hf set, with full transmit and receive from 0 to 30MHZ, at 100W, has had the speech readout fitted, £380 +carriage of about £15, or sensible offers.

Kenwood tmd700, another vhf/uhf mobile set, which has also had its transmit and receive opened up, so like the 707 above, can be used for a lot more than ham radio. this set also features duel receive, a few more connections than the 707, and the cable for putting the control head part of the radio somewhere else to the rest of it comes as standard. speech has also been fitted, and will also include a DTMF hand mic. last known price was £350 with out speech, £45 extra, and with out the DTMF mic, £45 extra. this set has both, and would like £280, or sensible offers.

ldg tw1 and tw2 talking swr/power meters, the TW1 is for hf, and the TW2 is for vhf and uhf.
these have seen no use at all since new, and were £110 each, would like £70 each, or sensible offers.

Kenwood speaker, can't remember the model of this, it has 3 built in filters, line and headphone out sockets, and can be used with 2 radios, has a good sound. £40 or sensible offers.

Watson desk mic, think the model is wm2000. this desk mic can be used with 3 radios, as it has 3 outputs, a yaesu, a Kenwood, and an Icom 1. it has up/down, 4 Kenwood buttons, 4 graphic eq controls, volume, compressor low/mid/high, eq on/off, as well as the transmit and

lock buttons. £50 or sensible offers.

mfj desk mic, this is the same as the Watson mic above, unfortunately, this has developed a fault, it won't power up, but did, so apart from that, which is probably just a wire come off somewhere inside, it should be fine. £30 or sensible offers.

Morse keys, I have at least 5 Morse keys, £10 each.

934 radios, I have the following 934MHZ radios, as far as I know, they all work, but as I can't test them properly, they are sold as is. 2 comtell sets, 5 cybernet sets, all of these
for £20 per radio, or sensible offers.

if interested, please either call, on 07957880038
skype to, dj-goshawk
or email,
goshawk@...

important, please note,
1, I will only ship these items with in the UK.
2, prices where possible include standard carriage, some of the larger/heavier items have additional carriage because of this. insured carriage is available, please
ask if you would prefer this, and I will give you the price.
3, if insured carriage is not used, I will take no responsibility for items lost or damaged in transit.
4, preferred payment methods are either paypal, nochex, direct bank
transfer, or cash if collecting, or sent at purchaser's own risk.
5, cheques are accepted, but any that are for less than £150 are subject
to an additional £15 cab charge, to cover the cost of going to and from
the bank in order to put them in.

Simon

FOR SALE:

STANCOR P-4004 upright power transformer with 6" flying leads.
Color code chart atttached to end bell.
400 - 400V AC rated for 175 mA DC
50V bias winding
5V CT at 3A
QTY 2 X 6.3V CT at 2.5A
2.5V at 1.75A
Primary has 107 and 117V AC taps

Available for $22.00 plus shipping.

1677. HyGain BN-86 antenna balun FS

Yahoo group: amatuerradioswapfest
Date: 2007-05-05 19:33:52 UTC
From: Ken Simpson, W8EK
Topic: 1677 Message: 1677

For Sale:

HyGain BN-86 Balun

A balun is made to convert the unbalanced coaxial
cable to a balanced antenna, such as a beam or dipole.
The BN-86 is a 1:1 balun, which means that it will preserve
the impedance, instead of acting like a transformers (some
baluns do act as transformers also). It will handle full legal
power.

The case of the BN-86 is constructed so that one can use it
to hang a dipole or inverted V, or a U-bolt can be added to
attach it to the boom of an HF beam antenna.

This particular balun is in good shape. They currently sell for
about $80 new. This one includes the paper work for $40
plus shipping from Florida.

Thanks.

1678. FS: Signal Corps Crystal Case

Yahoo group: amatuerradioswapfest
Date: 2007-05-05 23:53:44 UTC
From: Bry Carling
Topic: 1678 Message: 1678

FOR SALE:

Military Crystal case type CS-137 - olive color with locking,
swing-open covers, one on each side. Each side holds 60 crystals.
Holds a total of 120 type FT243 crystals.

Great for protecting and storing your FT243 crystals.
Excellent condition.

Available for $29.00 plus shipping.

1679. FS: Tube Power Supplies

Yahoo group: amatuerradioswapfest
Date: 2007-05-07 02:25:12 UTC
From: Bry Carling
Topic: 1679 Message: 1679

FOR SALE: Power Supplies

I had thought I was going to use these in some projects last year,
but eventually made other plans - so they are both being sold now:

1) Nice homebrew tube tuype power supply - 120V AC primary.
Outputs: 400V DC at 250 mA
Also has 6.3V AC at 3A, 5V at 1A
Uses an excellent Thordarson upright power transformer with
gray end bells. Also included are some large dropping and
bleeder resistors, on/off switch, fuse etc.
Has a 5U4GB rectifier tube and a large Thordarson choke.
The filter capacitor needs to be mounted (FP Tab type)
Dual 40 uF at 450WV DC rating.
Otherwise it is all complete and is in working condition.

Power transformer is about 50% larger than the ones in the
Heath power supplies, so no doubt this is good for 100-200 watts.
Dropping resistor taps marked for other outputs of:
300V DC, 180V DC, 135V DC, 75V DC - but these may still
need to be connected.

Available for $36.00 plus shipping.

2) G.E. Commercial Plate supply Model 4EPGB1
Output 3400V DC at up to 1 amp ICAS. Has 120V AC primary.
This is a heavy AC supply built for continuous duty
FM Service. Will deliver the goods for a QRO linear amplifier
in AM, CW, FM or SSB amateur service.
Large SNC type P5789 plate transformer with bridge rectifiers
produces 2500V AC at 1 Amp. and is made in Oshkosh, WI.
Has large filter choke model P5060. Filter capacitors were
mounted externally and are not included.
Dimensions: 19" X 7" standard rack mounting space by 8" deep.

Available for $145.00 plus shipping

> $500 obo by Sunday.

You really DON'T want to run a 4CX250R at 900 watts output for long. I had a pair of them on two meters for a long while and 600 watts was about par for TWO of 'em if I wanted the amp to stay linear.

1689. 2 meter crystals FS

Yahoo group: amatuerradioswapfest
Date: 2007-05-18 19:53:40 UTC
From: Ken Simpson, W8EK
Topic: 1490 Message: 1689

Does anyone have an older two meter ham rig and need crystals?

Maybe I can help. I have some of both transmit and receive
2 meter xtals. Most are in the 146 and 147 MHz band segments,
with very, very few in the 145 MHz segment, and none in the
144 MHz segment. These are for ham rigs only, and not
commercial rigs.

These are all the small HC-25 xtals, like were used in most
of the solid state 2 meter mobiles and HTs. Please e-mail
the operating frequency you need. I have them listed by
operating frequency and rig, and not by actual xtal frequency.
Send the frequencies you need (transmit or receive), and
the rig that you have, and I will see if I can help. I have cross
references for the various rigs, so I will know what you need
if you give the rig.

Crystals are $5 each, plus shipping from Florida.

Thanks.

1700. Several low pass TVI filters FS

Yahoo group: amatuerradioswapfest
Date: 2007-06-12 20:49:30 UTC
From: Ken Simpson, W8EK
Topic: 1700 Message: 1700

Low Pass TVI filters For Sale:

Add one of these filters to your transmitter to prevent TVI or RFI.
All filters have an SO-239 connector for input and output.

Bencher YA-1, high power, low pass filter
If you need a more heavy duty filter for the output of
your amplifier, this one is ideal. It will take full legal
power, and has at least 80 db signal attenuation at
TV channel 2. It is also in a very sturdy metal case
with SO-239 connectors on each end, and is a 50
ohm filter.
This one works great, and looks almost like new.
These are over $85 new, but this one is only $60.

Drake TV-1000-LP Low pass filter
This is the filter that is in the copper case, and may also
be used on the low end of six meters, as well as HF. It is
a 50 ohm filter and is good for 1000 W below 30 MHz, and
about 200 W up to 52 MHz. With paper work for $ 30

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your
transmitter and antenna, and has been optimized to
have more attenuation in the 40 MHz region, where
many TVs have their IF. It is good for 1000 Watts
"average" according to the manual, and has over
80 db attenuation at 41 MHz. SO-239 connectors
on each end. This one looks great, and also has
the single page "manual" with it. $ 30

B & W model 425 (Also know as FL-10/1500) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each end.
Maximum attenuation is at 52 MHz, with at least 70 db across
the band.
This is an older model that seems much heavier duty. It weighs
almost twice as much as the newer model, and looks like it
would take more power. It likely was made in the days that
plate modulated AM was the rule. Paper work included. $35

B & W Model 427 (also known as FL-6/1500) low pass filter
This filter can be used on six meters, plus the HF bands. It is
similar to the 425 filter, except it cuts off at 55 MHz, and has
at least 70 db attenuation, with maximum attenuation at 64
MHz. It is a 50 ohm filter and will handle 1500 watts.

This particular filter is still in its original box. I do not think it was ever used. $40

Drake TV-5240-LP low pass filter
This filter is different than the typical low pass filter. Instead of being long and skinny, the enclosure is about 5 inches square. It says "For use in 52 ohm line of transmitters operating below 30 Mc." printed on it. It is rated for 1 KW AM, so should be good for 3000 watts PEP SSB. $30

Nye Viking Low Pass Filter Model 020-001
This filter is rated at 2000 watts, with over 65 db of attenuation above 57 MHz. In extremely nice condition for only $35.

Johnson Nye Viking 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut off frequency of 45 MHz and 75 db of attenuation.
It is rated to take 1000 Watts of AM, or 5000 Watts PEP SSB. It has SO-239 connectors on each end. $35

Alinco ELP-60 D LX low pass filter
For 50 ohm systems, with up to 500 watts of power.
This one has an SO-239 on one end, and about a 2 foot length of coax and PL-259 on the other end. $30

Ameco LN-2 low pass filter
This filter is rated at 100 Watts, with an SO-239 connector on each end. $12

Prices do not include shipping from Florida.

Thanks.

From: Ken Simpson, W8EK
Topic: 1702 Message: 1702

Two meter multimode transceiver for sale:

Yaesu FT-480 R

This 2 meter rig will produce FM, CW, USB, and LSB. It
has a nice receiver with digital readout. Of course it has
memories, scan, and dual VFOs. To put it another way, it
has the things a ham would want in a multimode 2 meter rig!

This particular rig works 100% in all modes. Cosmetically
it is very good, but does have a couple of very minor scratches.
It includes the chrome bail to tilt it for base station operation,
along with a YM-40 microphone, and power cord.

Extensive paper work is included for $170 plus shipping from
Florida.

Thanks.

1704. Many Heath Parts FS

Yahoo group: amatuerradioswapfest
Date: 2007-06-23 15:12:58 UTC
From: Ken Simpson, W8EK
Topic: 1704 Message: 1704

Heath items for sale:

Heath Parts:

I found a non working HW-202 in my assortment of stuff.
I do not feel that it is worth repairing. There is no power
output, meaning that the final board does not work. Other
parts appear to work OK.

Most of the cabinet parts will also work with the HW-2036.

Top cabinet for HW-202 / 2036.
This is in extremely nice condition, with no scratches. Paint is
extremely good, with no fading. Included with it are the 2 large
aluminum "knobs" for attaching to the mobile mounting bracket,
along with the cork washers. $15

Bottom cabinet panel for HW-202 / 2036
Similar condition as top cabinet (above) $ 8

Front Panel for Heath HW-202, 2 meter crystal control transceiver - $3

Chrome bezel for front of HW-202 or HW-2036 - $ 3

Small aluminum colored knob used for volume and squelch - $1 each

Amphenol chassis mount 2 pin mic connector, as used on most
Heath gear in the 1960's and 70's, with mounting hardware. $5

E-mail for internal parts for the HW-202 that you might need.

Knobs for SB line
These are the smaller knobs with the 1 1/8 inch skirt that are
used on almost all of the SB line, plus some other Heath
gear. Really great condition. No defects that I can find.
Two available. $5 each

Cover for Heath HM-102 or HM-2102 wattmeters
This is the inverted U shaped cover, in very nice condition.
No scratches, dents, or dings. It may fit other units as well. $10

Switch from HM-102 or HM-2102 wattmeter
This three position switch is used to select power range
or SWR, and is located on the bottom left side of the
wattmeters. $4

I have many SB-630 parts as well. Most of the internal
parts are available, but no clock. Front panel and outer

case are gone, but reflectometer assembly, transformer,
switches, etc. are still available.
Please let me know what you need.

Parts from SB-400 xmtr (likely will also work with SB-401)
meter switch - $5
Mic/CW level control (dual pot) - $ 7
Pilot bulb mounting hardware, w/#47 bulb - $2

Heath Amateur Radio Novice License Training Course
This is really great for nostalgia. Course includes study
material and code tapes to get up to 5 WPM.
All in a large 2 inch notebook. $15

ORIGINAL Heath manuals. These are the manuals
only. They are all originals, and not copies, and all
are close to new condition.

Heath HM-2102 VHF Wattmeter Assembly Manual
1972 - Looks very close to new, but does have check
marks in the book. Schematic included. $10

Heath HW-2021 Assembly manual - 1975
For 2 meter hand held transceiver
No check marks in book. $10

Heath HN-31 A "Cantenna" Dummy Load
This is the "A" model dated 1982
No check marks in book. $10

GD-600 Photoelectric Light Switch
Very nice condition. Schematic is
part of book. $6

Heath IM-5284 Multimeter
Large schematic only - $ 3

These are original manuals only.

Prices do not include shipping from Florida.

Thanks.

From: Ken Simpson, W8EK
Topic: 1708 Message: 1708

For Sale:

Kenwood TW-4000 dual band mobile FM transceiver

Covers 2 m and 440 MHz FM. 25 Watts output, or 5 W
in low power. Of course it has memories, scan, etc. It
has a GASFET front end, giving it a really great receiver.
This would make a great packet rig, which is what it has
been used for. All solid state switching makes silent
packet operation. Since it has been used on packet, it
does not have a mic or mobile bracket with it, although
it takes a standard 8 pin round mic connector, like most
Kenwood rigs. It needs 13 V DC at 7 or 8 amps to
operate. It works fine. Manual and power cord are
included for $95 plus shipping from Florida.

Thanks.

1713. To all members - was: Re: Kenwood dual band transceiver FS

Yahoo group: amatuerradioswapfest
Date: 2007-07-02 16:15:14 UTC
From: Paul
Topic: 1708 Message: 1713

All new members are placed in "Moderated" status until they post a message. If their first message is "on topic" their status will be changed to "Unmoderated".

It was necessary to do this (about 2 years ago) to eliminate the 20-25/day porn postings.

This means I have to review all pending messages from new members. We still get a lot of porn but you'll never see it. Sometimes it may take a day or two for me to get a chance to review the new member messages.

Please be patient; it's the price of keeping this group porn and spam free.

Regular hand microphones For Sale:

Azden PCM-463 A hand microphone
This hand mic had up down buttons on the top, with an M1 call and PTT button on the side. It works with the Azden PCS-5000, and maybe others. It has a round 8 pin connector wired for Azden, and is in nice shape. $30

Azden PCM-463 A hand microphone for Kenwood
Mic as above, but is wired for Kenwood round 8 pin connector. $30

Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing voltage. $25

Kenwood MJ-68 microphone connector adapter
Converts a round 6 pin Kenwood mic connector, so it can be plugged into a Kenwood rig with the round 8 pin connector. Like new. $20

Touchtone (DTMF) microphones:

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone (DTMF) pad on it, plus a normal low impedance microphone. With 4 pin plug.
Like new. $40

"Touchmatic" touch tone microphone
Regular low Z mic, with a 12 digit touch tone pad and an 8 pin plug wired for Kenwood. Nice condition. $40

CES Model 630 touch tone microphone
This mic has a 12 digit touch tone pad on the front, with a regular Low Z hand microphone. Round 6 pin mic plug. $40

CES "Micropad" touch tone microphone
No model number on this one, but it has a 12 digit pad on the back. Round 8 pin connector wired for Kenwood. $40

HT speaker microphones:

Kenwood SMC-30 speaker mic
Fits the TH-21/31/41 series of HTs, plus some others.
It has a 3 conductor 3.5 mm plug, and a 2 conductor 2.5 mm plug. $18

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HTs. $18

AEA "HTM" microphone
This is an external microphone to use with the
AEA series of HTs. It is in nice shape for $25

Prices do not include shipping from Florida.

Thanks.

AEA items For Sale:

AEA PK-232 MBX, multi-mode digital controller.
More than just a TNC. It will handle packet, RTTY, Amtor, ASCII, CW, etc. This is a late one with the multi-colored LEDs, and newer circuit board. I think it has the latest firmware, as it includes Pactor in it. It works fine, and looks very close to new. The large, inch plus thick manual is included for $120.

Cable to connect AEA packet interface to computer
Originally used with the AEA CP-1, to interface it to a Commodore computer. One end has the 5 pin plug on it that AEA uses. The other end has an edge connector with 12 positions on each side. It is in close to new condition. $10

AEA "HTM" microphone
This is an external microphone to use with the AEA series of HTs. It is in nice shape for $25

Prices do not include shipping from Florida.

Thanks.

Many Ham Publications For Sale:

ARRL Handbooks:

These are in the smaller format (6 1/2 by 9 1/2 inch size).
They are vintage, and contain tube tables, vintage ads,
and other vintage information not in the newer handbooks.

1947 - 24th edition
This one is very used, as it should be at 60 years old. The spine
is taped, and the cover is partially loose from the binding. This is
a very good, usable handbook, but it is not collector quality. There
are 150 pages of ads in the back, which show a lot of vintage
equipment, tubes, parts, etc. $20

1969 - 46th edition
Cover is loose, but is there. Cover is also worn, and handbook has
been well used. All pages are intact, and all data present. $12

1971 - 48th edition
Spine is faded, pages are intact, and cover is good. Some
pages have yellowed, and some have not. $ 12

1973 - 50th edition
Very nice condition throughout; some pages have yellowed. $13

1977 - 54th edition
Slight crease on cover $12

1978 - 55th edition
Extremely nice condition. $13

The following are in the larger 8 1/2 by 11 inch format:

1981 - 58th edition
Nice shape. $14

1982 - 59th edition
Good condition. $12

1983 - 60th edition
Great condition; no problems. $ 16

1985 - 62nd edition
Like new. $18

1986 - 63rd edition
Close to new condition, although some pages have

yellowed slightly. $18

1993 - 70th edition - Hardbound
Like new, with a very slight yellowing of some pages. $ 20

Other publications:

ARRL "Specialized Communications Techniques
for the Radio Amateur" - 1975 - First Edition - $7

ARRL "RFI Book"
1999 - First Edition - like new - $12

ARRL "Understanding Amateur Radio"
1977 - $5

ARRL "Satellite Anthology"
1999 - 5th edition - like new - $11

ARRL "Weather Satellite Handbook"
1990 - 4th edition - like new - $11

ARRL "Your Gateway to Packet Radio"
1989 - 2nd edition - $6

ARRL Operating an Amateur Radio Station
1983 - 61st edition - $3

FCC "Interference Handbook"
1986 edition - $4

ARRL "Radio Amateurs Operating Manual"
1985 - 2nd edition - $8

ARRL FCC Rule book
1988 - seventh edition - $3
1989 - eighth edition - $3
2004 - 13th edition - $10

RSGB "Amateur Radio Operating Manual"
1982 - 2nd edition - $8
1991 - 3rd edition - like new - $10

ARRL Public Service Communications
1985 - Ninth edition - $3
1990 - no edition number listed - $3

ARRL Amateur Radio Field Resources Directory
1986-87 - First edition - $ 8

FCC "Interference Handbook"
1986 edition - $4

Nostalgic ham licensing materials for sale:
All books are in very good, or better, condition.

General Class Amateur License Study Guide
By W0XI; published by Sams
First Edition - 1979 - $ 3

Amateur Radio Advanced Class License Study Guide
By Jim Kyle and Ken Sessions; Tab Publishing
1975 - 2nd edition - $ 3

Amateur Radio General Class License Study Guide
By Jim Kyle and Ken Sessions; Tab Publishing
1975 - 2nd edition - $ 3

ARRL License Manuals
1979 - 77th edition - $3
1984 - 79th edition - $3
1984 - 80th edition - $3
Technician - 1989 - First edition - $3
General - 1989 - First edition - $3
General - 1997 - Second edition - $6
Advanced - 1985 - First edition - $3
Extra - 1988 - Third edition - $3

ARRL Technician Class Exam course
1993 - First Edition - $5

1981 Foreign Callbook - Good condition - $ 4

Electronic "Cross Reference" Data Books

These books are detailed reference books listing 1000's
and 1000's of different transistors, diodes, ICs and other
solid state devices, and crossing them to NTE or EGC
devices. They also include base diagrams and other
pertinent information. Obviously, different years have
different devices. All are in extremely good physical
condition, and are 8 1/2 x 11 inch paperbacks.

RCA SK Series - Spring 1972 - 96 pages - $9

Semiconductors by GE - 1974 - 74 pages - $ 5

Sylvania ECG - 1976 - 241 pages - $ 7

Sylvania ECG - 1979 - 352 pages - $9

EGC Industrial MRO - 1980 - 207 pages - $7

RCA SK series - 1981 - 409 pages - $9

ECG Master Replacement Guide - 1987 -
700 pages - $11

NTE Technical Guide and Cross Reference
1988 - 604 pages - $9

Archer Semiconductor Reference Guide
1988 - 290 pages - $6

The following Texas Instrument Data Books are available.

BiCMOS Bus Logic Interface - 1988 - $ 2

Boundary-Scan Logic IEE Std 1149.1 (JTAG)
5V and 3.3 V Bus interface and scan support Products
1994 - $ 3

LVDS Application and Data Handbook - 2003 - $ 3

The Voltage Regulator Handbook - 1977 - $ 6

Prices do not include shipping from Florida.
"Media Mail" is inexpensive.

Thanks.

1720. ***FOR SALE --- Kenwood FM Dual Bander TW4000A ***

Yahoo group: amatuerradioswapfest
Date: 2007-07-13 23:19:57 UTC
From: scribler_22
Topic: 1720 Message: 1720

I have a dual band radio at a GOOD PRICE !
"Kenwood FM Dual Bander TW4000A".
GOOD BUY at $120.00 PLUS UPS shipping to your door. Insurance included.

This rig works like new, and transmits and receives perfectly on both 2 meter and 70 cm. I have signed off the air on this radio today for the final time. All functions worked perfectly today Friday 7/13/07 as it has for several years.
There are NO known issues with this rig.

My wife and daughter bought me a new 3 band mobile radio so I am looking for a new home for this one.Photocopy of instructions included.
I DO NOT LIKE E-BAY, SO I AM OFFERING IT HERE FIRST.
THIS IS A GOOD RADIO.

1721. Wattmeters / SWR Bridges FS

Yahoo group: amatuerradioswapfest
Date: 2007-07-14 14:10:39 UTC
From: Ken Simpson, W8EK
Topic: 1721 Message: 1721

Wattmeters / SWR Bridges For Sale:

All have SO-239 connectors and are designed for 50 ohm systems.

Diawa CN-101 L Peak reading cross needle wattmeter
It covers from 160 thru 2 meters, so band coverage is more than many of them. It also reads either peak or average power, switch selected. It has 3 scales of 15, 150, or 1500 watts. Of course it reads SWR at the same time, since it has a cross needle meter. It can be back lighted, if you apply 12 V to it. This one works 100%, and looks like it just came out of the box. Of course paper work is included. $80

Micronta Peak Reading HF wattmeter
This HF wattmeter will read either average or peak power. Full scale readings are 20, 200, and 2000 watts. Of course it will also read SWR.
It works fine, and looks close to new, with no scratches or blemishes. $40

Archer Field Strength / SWR meter
This is a fairly generic HF SWR Bridge. It is in a nice sloping panel enclosure with a wood grain finish. $10

Prices do not include shipping from Florida.

Thanks.

From: Bry Carling
Topic: 1722 Message: 1722

FOR SALE: Ham Band Crystals at reduced prices.

Great for experimenting or regular comms. Combine with other
crystals at regular prices to save on shipping.

More than one is available for some of these frequencies.

FT-243 CRYSTALS:
1977.5, 3915, 3935, 3940, 3943, 3959, 3993, 3995, 3996 kHz
7000, 7106.7, 7125, 7140, 7150, 7170, 7173, 7175, 7200 kHz
7225, 7243.75, 7300 kHz
28616, 28670 kHz

HC6/U CRYSTALS:
3600, 3680, 3742, 3800, 21053.5, 21103.5, 21105.5, 21153.5
kHz
21203.5, 21253.5, 21303.5 kHz
28444, 29011 kHz

HC33/U (like HC6/U but wire leads)
1940, 3549, 3564 kHz

Prices for all of the above - $5.00 each or QTY 5 for $20.00

USA shipping is $5 additional, for any quantity.

My other crystals may be found at:
http://www.af4k.com/crystals.htm

1723. Antenna tuner, wattmeter, dummy load, and coax switch in one package FS

Yahoo group: amatuerradioswapfest
Date: 2007-07-21 14:01:01 UTC
From: Ken Simpson, W8EK
Topic: 1723 Message: 1723

For Sale:

Vectronics VC-300 DLP HF antenna tuner, peak reading
wattmeter, coax switch and dummy load, all in one box

The VC-300 DLP has a fairly large cross needle meter
for reading both forward and reverse power simultaneously,
and hence the SWR. It will read either average or peak
power, with scales of 30 Watts and 300 Watts. In addition,
a dummy load is included inside, as is a 4 to 1 balun. The
meter can be back lighted if you apply 12 V DC. The tuner
also has an antenna switch built in, that will switch between
"tuned" and "straight thru" operation, in addition to various
antennas. It will tune 160 thru 10 meters. To put it another
way, this tuner will do everything!

This one is in extremely nice condition, both electrically
and cosmetically. The manual is included for $135, plus
shipping from Florida.

Thanks.

1724. FS: Hallicrafters SX-101 - Excellent

Yahoo group: amatuerradioswapfest
Date: 2007-07-27 12:23:18 UTC
From: Bry Carling
Topic: 1724 Message: 1724

FOR SALE:

COLLECTOR QUALITY Hallicrafters SX-101 Receiver
Beautiful shape....
Linear horizontal scale - covers 160m through 10m ham bands.
Has many luxury features - extra filters, AGC, 100 kHz Calibrator.
Variable bandwidth with selectivity settings of 5 kHz, 3 kHz, 2 kHz,
1 kHz and 500 Hz.
A really good notch filter with frequency and depth controls.
Mode settings for CW, AM, LSB and USB. Great sounding audio.
Collector quality. Has only a minor scuff on the right side that will
easily polish out.
All original parts including the knobs. Main tuning dial has been
replaced.
Wonderful performance for the ham bands only - I prefer this to the
SX-62 I used to own.
The manual is available for an additional cost of $25.00
Absolutely beautiful - and it performs flawlessly. You won't find a
nicer one at any price.It could be shipped too though, and I can
pack it well, using heavy foam support.

Available for $375.00 plus shipping
Manual available for an additional $15.00 with the radio.

Picture and details at:
http://www.af4k.com/radios.htm

From: Bry Carling
Topic: 1729 Message: 1729

Revealing The Truth Behind Z = R + jX

You all remember that AC circuits formula... the one we memorized and used, being convinced that it was "real."

Z = R +jX

Have you ever QUESTIONED that mathematical "imaginary component" known as "j" and which they attach to the reactance? Perhaps it is FAR MORE imaginary than we all have been led to think!! Discover the truth about electronics and electricity! How REAL do you think the square root of MINUS ONE really is? I think you will find that it is not even correct to call it "IMAGINARY!"

Allow Hubert J. Ohmsberg and his pals to help you make sense of it all!

1739. 2 m and 440 MHz mobile antennas and mounts FS

Yahoo group: amatuerradioswapfest
Date: 2007-09-01 14:35:07 UTC
From: Ken Simpson, W8EK
Topic: 1480 Message: 1739

For Sale:

VHF (2 meter) and UHF (440 MHz) mobile antennas and mounts:

Larsen NLA-150 coil only for 2 meters
For use with a 5/8 wave (approx 4 foot) antenna.
Fits the Larsen NLA mount for 3 db gain. $11
-
The whips for these are hard to ship, and it is best to pick
up a whip at your local Radio Shack, or similar store. I do
have some whips, if you need them. $6

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
The whip can be cut for 2 meters, 220 MHz, or 450 MHz
bands. Good condition for $7.
-
Larsen Q
Fits a 5/16 inch stud. The quarter wave whip can be cut
for 2 meters, 220 MHz, or 440 MHz bands. Great condition. $6

Larsen NMO-Q
Precut for 450 MHz. New, still in bag. $8

Larsen NLA-450 coil and "stacked" whip
This fits the Larsen NLA mount, and has about 5 db gain
on the 70 cm band. It includes the coil, and the high gain
stacked whip. Nice condition. $14

Larsen OM-450 whip, coil and mount
This is made to mount on a flat surface, and requires 3
mounting bolts, plus a hole in the center for the coax.
Includes "stacked" whip for 5 db gain on 450 MHz. $20

Mobile antenna mounts for sale:

NMO-MM Magnetic Mount
Magnetic mount for any of the NMO antennas (Larsen, Motorola,
and many others). Includes coax. Very good condition. $18

Magnetic mount with coax
Standard 3/8 inch 24 thread, about 3 inches in diameter, and
black in color. Suitable for 2 meter, 440 MHz, or 6 meter antenna.
Very good condition. $15

HyGain TLM Trunk Lip Mount
This trunk lip mount has a 5/16 inch stud on it.

Ideal for 1/4 wave antenna. With coax for $14

Prices do not include shipping from Florida.

Thanks.

1740. New to group, need info on best radio to start out

Yahoo group: amatuerradioswapfest
Date: 2007-09-08 00:53:31 UTC
From: Mark
Topic: 1740 Message: 1740

Hey group, I'm new to the group and to ham radio as well. I'm
studying for my tech lic now. Want to purchase a radio to get
listening in on. I know after I get the tech lic that I'm restricted
to talking on 10m and higher (2m, etc.) I keep finding many radios
for sale at the 2m area but not much at the 10m area. I don't want to
spend alot at first but want to get something that will satisfy what I
would like for a while anyway. Any suggestions on what to get?
Also, was into the cb field back in the 70's and 80's and see that
there is not much traffic on those channels these days. What are the
heavier used bands on the ham side the works with my tech area?
Thanks for any help here.
Mark

1741. FOR SALE: ICOM IC-756 PRO AS NEW, Among Last Made

Yahoo group: amatuerradioswapfest
Date: 2007-09-18 01:31:39 UTC
From: Anthony
Topic: 1741 Message: 1741

It pains me to put my IC-756 PRO on the market, but my TS-2000 has been a better fit for me so the ICOM just isn't being used. This IC-756PRO was purchased as a closeout and is one of the last produced. The serial number is 04192. I have no idea what the last serial number was with the 756PRO, but I have never seen another one above 04XXX. A notable point about this transceiver, when sitting side-by-side with another IC-756PRO of lower serial number (which I just sold), I found that this newer PRO has a much more brilliant and clear display--more like the PROII or III. Besides this, it is simply in the same condition as it was when taken out of the box and is complete with mic, manual, original box and power cord. IT HAS NEVER BEEN AROUND SMOKE. I will sell it for $1250 shipped. For now this price is pretty firm. Thanks, Anthony AA9OC

1742. Vintage Shure 333 Ribon Microphone For Sale Or Trade

Yahoo group: amatuerradioswapfest
Date: 2007-09-13 19:25:55 UTC
From: Rich
Topic: 1742 Message: 1742

Hi,
I have a beautiful Shure 333 Microphone for sale or trade.
It comes in the original case and looks great. The Mic works
perfectly and sound fantastic. The felt lined case is in great
condition too with the hinges and latches working fine.
I have posted some info in the files section on it and will
be trying to get actuall pics of it soon. These are very rare
microphones and it is even more rare to find one in this condition
with the original Shure case. I would like to trade for ham gear
like newer recievers, transievers or what have you. Please email
me off list at copake12516 at fairpoint dot net.
Thanks,
Rich

1747. FS: HALLLICRAFTERS RECEIVER

Yahoo group: amatuerradioswapfest
Date: 2007-10-06 11:47:38 UTC
From: Bry Carling
Topic: 1747 Message: 1747

FOR SALE: HALLLICRAFTERS 5R10 RADIO RECEIVER

Here's a great little Hallicrafters set. Model 5R10 - looks similar to the other
S38 series receivers.

Here is a nice 5 tube shortwave set, AC-DC superhet design
for excellent reception. Has ALL NEW TUBES: 12SA7, 12SK7,
12SQ7, 50L6,
35Z5 and is in great working condition.
Covers 540 kHz to 31 MHz in 4 bands. Has main dial and
bandspread tuning.
This is an AM broadcast mode receiver and has no BFO. It has a
nice 5" PM speaker built-in.
Also, there is a headphone-speaker switch and headphone socket.
105-125V AC operation at 0.25 amps. It looks great, and
everything works
as it should. All of the tubes are brand new, and the radio has been
recently checked out and aligned. The cabinet has no dents or
dings and the back is in excellent shape too.
AC power cord in excellent shape. Comes with a good manual
copy and the
SAMS PHOTOFACT. Back is in good shape too. Photo does not
do it justice.
Available for $125.00 plus shipping

Pictures and details at:
http://www.af4k.com/radios.htm

E-mail me to arrange purchase... regards, Brian

1748. FS: Shure 444 Microphone

Date: 2007-10-07 10:21:49 UTC
From: goshawk
Topic: 1750 Message: 1750

hello list,
I am looking for either of the following 2 receivers please,
these are the Icom Ic-R7000
and the Icom IC-R8500

I am not looking to purchase new, so please don't just come back to me with
details of shops, unless they are likely to have some second hand ones at
reasonable prices, thanks.
am looking for them in the UK only.

please either call me on 02082200261,
skype me at dj-goshawk (voice or chat),
or e-mail me at:
dj.goshawk@...
if you can help me find either or both of these receivers, or have either of
them that you want to part with, thanks.

Simon Wilkes,
e-mail or windows messenger,
dj.goshawk@...
skype,
dj-goshawk

1751. FS: YAESU RADIO PARTS

1756. RE-OFFERED DX-200 receiver

Yahoo group: amatuerradioswapfest
Date: 2007-10-18 00:49:16 UTC
From: Bry Carling
Topic: 1756 Message: 1756

Buyer reneged so this radio is again offered for sale:

Realistic DX200 receiver.

Here is an excellent shortwave receiver with Dual tuning dials. It is all checked out thoroughly and
in excellent shape.

The Radio Shack DX-200 has good shortwave reception performance. The receiver has an analog frequency readout.
The use of analog type tuning eliminates noisy digital
synthesizers so common with inexpensive shortwave receivers.

The controls on the front panel includes Antenna trim,
AGC fast/slow, BFO pitch with USB/LSB indication, Bandswitch (5 bands), RF gain, AF gain, Mode switch
with SSB/CW-Standby-AM-AM/ANL.
Has the calibrator, main tuning and bandspread tuning.
The front panel includes a headphone jack.

The bands as displayed on the upper drum type dial have LED indicators. Both drum type dials have an adjustable line to align the frequency readout.
Using the frequency calibrator assists in alignment.
The radio is very sensitive. The DX200 has a product detector
for SSB and the modes include:
AM, SSB and CW. The antenna input is a two terminal type.
You can simply use an end fed random wire antenna to
one terminal. The automatic noise limiter is effective
on most noise and it does not distort the audio.
The radio is superior to the new handheld and portable
type SW receivers.

Included AC power cord in excellent shape.
Everything
works on this radio as it should.
This receiver comes with a decent copy of both the
service manual and the operators manual.

Available for $125.00 plus shipping.

1759. SBE Desk Microphone FS

Yahoo group: amatuerradioswapfest
Date: 2007-10-21 17:04:01 UTC
From: Ken Simpson, W8EK
Topic: 1759 Message: 1759

For Sale:

SBE Desk Microphone

This is a very nice desk microphone. It says SBE on it, but of course can be used with any rig. It is a 600 ohm, low impedance mic, and has a very heavy die cast base, making it stay in place very well. There are two push to talk switches. One is momentary and one is locking. The bottom has a switch for PTT or VOX.

This mic works fine and looks fine also. It presently has a round 8 pin plug on it, wired for Yaesu, but that can be changed easily, if desired.

$65 plus shipping from Florida.

Thanks.

73,

Ken, W8EK

1760. Antenna tuner, peak wattmeter, dummy load, ant switch all in one unit

Yahoo group: amatuerradioswapfest
Date: 2007-10-27 13:31:47 UTC
From: Ken Simpson, W8EK
Topic: 1760 Message: 1760

For Sale:

Vectronics VC-300 DLP HF antenna tuner, dummy load,
peak reading wattmeter, and coax switch - all in one unit

The VC-300 DLP has a fairly large cross needle meter
for reading both forward and reverse power simultaneously,
and hence the SWR. It will read either average or peak
power, with scales of 30 Watts and 300 Watts. In addition,
a dummy load is included inside, as is a 4 to 1 balun. The
meter can be back lighted if you apply 12 V DC. The tuner
also has an antenna switch built in, that will switch between
various antennas, in addition to "tuned" and "straight thru"
operation. It will tune 160 thru 10 meters. To put it another
way, this tuner will do everything!

This one is in extremely nice condition, both electrically
and cosmetically. It looks like it is new! The manual is
included for $135, plus shipping from Florida.

Thanks.

73,

Ken, W8EK

Have some radio fun this winter...

FOR SALE:

Hallicrafters Model HT-17 Transmitter.
Here is a really nice, and rare transmitter - Comes with two 5-pin, plug-in coils for 80m and 40m.
The HT-17 is a crystal controlled transmitter designed to operate from a 105-125 volt 50/60 cycle AC power source.
The power input is 25 watts, on all bands from 3.5 to 30 Mcs.
Tubes used are a 6V6 Crystal oscillator, an 807 power amplifier
and a 5U4 rectifier.

The transmitter comes with two different coils for 80m and 40m. Also has some crystals and an adapter which allows the use of smaller crystals. The adapter is removable if you have the larger sized crystals. May need some minor repair. Top cover and dial pointer are sticking slightly. Comes with a copy of the manual.

Available for $135.00 plus shipping
= = =

National SW-54 Receiver.
5 Tube shortwave receiver has 12BA6, 12BE6, 12AV6, 50C5,
35Z5 and covers 540 kHz to 30 MHz.
This 4 band hammertone gray SW radio is in nice shape,
and in very good working condition. It does have a little hum but that can easily be fixed. The case has no dents or dings, and the back is in great shape too.
Built in PM speaker is working just fine. AC power cord is in excellent shape. Comes with a copy of the complete
manual with schematic and alignment instructions etc.

Available for $115.00 plus shipping.
= = =

Yaesu FRG7700 General Coverage Receiver.

Mint, collector quality example of this fine desktop receiver from Yaesu.

The Yaesu FRG-7700 is a multi-mode receiver covering
150 kHz to 30 MHz in 1 MHz bands to include all
longwave,
medium wave (AM) and shortwave frequencies.
Modes of reception include LSB/CW, USB, AM and FM.
An analog dial supplements the 1 kHz yellow LED
digital display. The built in clock-timer includes
remote activation terminals on the rear panel.
Convenience features include: Variable RF Attenuator,
S-Meter, Dimmer, AGC Fast/Slow, Squelch, Tone
Control
and Noise Blanker.
The rear panel has dual antenna inputs, remote timer
activation jacks and speaker output.

The receiver features many extra items such as tone
control, switchable AGC, and a very nice sounding
front speaker unit.

This receiver has a high serial number - 21-200289

120V AC operation with a good, original AC cable.
Comes with a copy of the manual.

This excellent receiver available for $300.00 plus
shipping
= = =

Yaesu FRT-7700 Antenna Tuner.
Mint, collector quality example of this rare antenna tuner
from
Yaesu. It is the matching tuner for the FRG7700
receiver
above.

The Yaesu FRT-7700 Antenna Tuner covers the range
of
150 kHz to 30 MHz in six bands.
It features a variable gain control. The rear panel and
has
two antenna inputs. One is for wire antennas and one
is
for coaxial fed antenna. There is a hardwired output
cable
to connect to the receiver.

Available for $150.00 plus shipping

1769. CW keyer and keyer cables FS

Yahoo group: amatuerradioswapfest
Date: 2007-11-10 01:29:13 UTC
From: Ken Simpson, W8EK
Topic: 1769 Message: 1769

CW Keyer and keyer cables For Sale:

MFJ 422 C electronic keyer
This keyer includes sidetone, and has adjustments for volume, tone frequency, and weighting, as well as speed. It will key either positive or negative voltages, and is powered by an internal 9 V battery, or external 5 to 9 volt supply.
It is made to go on the back of a Bencher Paddle.
It works 100%, and looks great also. With paper work for $45.

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo connector on the end, like used by most rigs. It looks great. $8

As above, but with 1/8 inch stereo connector on end. $8

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch phone plug on it, as is used with a straight key. $5

As above, but with 1/8 inch mono connector. $5

Prices do not include shipping from Florida.

Thanks.

1771. FS: CS-137 Military Surplus Crystal Case

Yahoo group: amatuerradioswapfest
Date: 2007-11-12 13:37:59 UTC
From: Bry Carling
Topic: 1771 Message: 1771

FOR SALE:

I have one more really nice CS-137 MIlitary Crystal Case available if someone would like it. This case holds QTY 120 type FT-243 crystals as used in many military radios and amateur radios.

This one is in excellent shape with the felt liners and outer case all looking superb.

Available for $29.00 plus shipping

Regards - Brian Carling
http://www.af4k.com/miscpart.htm

1772. New Heathkit 2.1 kc. Filter for SB-HW-series

Yahoo group: amatuerradioswapfest
Date: 2007-11-12 14:12:47 UTC
From: Bry Carling
Topic: 1772 Message: 1772

Brand new HEATHKIT SSB FILTER 2.1 kc. for the HW-series
and SB-series radios.

Here is a new-in-the-box Heathkit filter for your HW-series
or SB-series radio.

Used typically in rigs like the SB-101 and SB-301 but
will fit others.

Has never been used in a radio, and is brand new in the box.
Center frequency is 3395 kHz as in most of those
Heathkit radios. 2.1 kHz bandwidth, perfect for SSB....
Model 404-283.
Available for $39.00 plus shipping.

Picture and details available at:
http://www.af4k.com/miscpart.htm

[Non-text portions of this message have been removed]

1773. FS: NATIONAL SW-54 RECEIVER

Yahoo group: amatuerradioswapfest
Date: 2007-11-16 13:39:33 UTC
From: Bry Carling
Topic: 1773 Message: 1773

FOR SALE: NATIONAL SW-54 RECEIVER

This is a nice tube type shortwave receiver in good
working condition.

5 Tube receiver has 12BA6, 12BE6, 12AV6, 50C5, 35Z5
Covers 540 kHz to 30 MHz in 4 bands...
Hammertone gray radio in nice shape, and in very good working
condition.

No dents or dings, back in great shape too.
Built in PM speaker working just fine.
AC power cord is in excellent shape.

Comes with a copy of manual with schematic.

Available for $115.00 plus shipping

Picture and details at:
http://www.af4k.com/radios.htm

1774. HF Wattmeter / SWR Bridges FS

Yahoo group: amatuerradioswapfest
Date: 2007-11-17 13:13:50 UTC
From: Ken Simpson, W8EK
Topic: 1774 Message: 1774

HF wattmeter / SWR Bridges For Sale:

Micronta 21-520 A, HF wattmeter with large dual meters

This is an HF wattmeter that covers from 3 to 30 MHz, with
full scale power readings of 10, 100, and 1000 watts.
LARGE dual meters -- one reads forward power and one
reads reflected power -- both at the same time.
It has a remote sensor, with about 3 feet of cable to connect
to the meter itself.

This particular meter works fine, and looks very, very nice.
I can not find a scratch on it, and it is in its original box. $50

Micronta 21-521 A, SWR Bridge, coax switch combination

This unit is a standard HF SWR Bridge, but in addition,
it also has a built in 2 position coax antenna switch.
If you only have two antennas, or one antenna and a
dummy load, this unit would be ideal for you, eliminating
the need for separate units.

This particular unit is in extremely nice condition.
It includes the paper work, and the original box, although
the box is not in as good condition as the meter.
Of course it works fine. $20

Archer Field Strength / SWR meter
This is a fairly generic HF SWR Bridge. It is in a nice
sloping panel enclosure with a wood grain finish, and
works fine. $10

Prices do not include shipping from Florida.

Thanks.

1776. BALANCED LINE ANTENNA TUNER - TWIN ROLLER INDUCTORS

Yahoo group: amatuerradioswapfest
Date: 2007-11-26 02:08:56 UTC
From: rehandel
Topic: 1776 Message: 1776

This item is for sale on e-bay, auction ends
Sunday 12/2 at 19:00 Z

Item number: 290185692713

A magnificently built, balanced output antenna tuner for use with
ladder line, open wire line.

Highlights & Features of this tuner:

The twin inductor/current balun design provides a truly balanced
output.

(2) 14 uH roller inductors, coupled to a WW II vintage dial with 25
turns, 1/100 turn markings.

High/Low Impedance Switching: Switches the capacitor bank to
tuner's input or output. "HI" position is used for impedances above
50 ohms; "LO" is used for impedances below 50 ohms.

Variable and fixed capacitance controls - continuous range is from 25
to 1250pf @ 4500 Vpk.

Variable capacitor dial is the classic 4-inch National Velvet Vernier.

Beautiful, real wood venier over aluminum front panel.

Dimensions: H,W,D = 8 X 19 x 15 inches, approximate weight = 30 lbs

From: Randal Jarrett
Topic: 1786 Message: 1786

I have an AL-811H and the companion MFJ-962D that for financial reasons I need to sell.

http://www.ameritron.com/products.php?prodid=AL-811H ($850 at HRO)

http://www.mfjenterprises.com/Product.php?productid=MFJ-962D ($299 new price)

This pair has very low operational hours on them. I do mainly VHF/UHF and very little HF. The amp has very good output, 800+ watts.

I'm asking $700 for the pair and I won't sell the amp separately unless someone buys the MFJ-962D first ($100)

1789. 2.4Ghz Notebook PC for Antenna Analyzer TRADE

Yahoo group: amatuerradioswapfest
Date: 2007-12-12 03:14:48 UTC
From: kc7fys
Topic: 1789 Message: 1789

I want to trade a Toshiba Satellite A15-S129 notebook computer for an antenna analyzer.

The Computer:
Celeron 2.4 GHz 400 MHz system bus clock speed
13 by 11.5 by 1.5 inches
6.3 pounds
40 GB hard disk
15-inch active-matrix display (1024x768 maximum resolution
DVD/CD-RW
two USB ports
integrated 56K modem
RJ-45 LAN network port
PCMCIA port (1)

The system fan buzzes when it starts up and after about 3-5 minutes quiets to normal and functions normally. There are about a dozen weird pixels where the screen has touched the touchpad over time all within a 1cm spot, and one 1-pixel-wide vertical line on the monitor. (Photographs show this.)
This would make an excellent PC for portable digital ops, and is a fine general-purpose second machine.
Photos:<http://www.flickr.com/photos/jonathancharles/sets/72157603433021393/>
I am looking for an MFJ antenna analyzer, or one of another type if you wish to suggest one.
Thanks,
KC7FYS

1792. FS: Power Tube Sockets

Yahoo group: amatuerradioswapfest
Date: 2007-12-13 00:40:40 UTC
From: Bry Carling
Topic: 1792 Message: 1792

FOR SALE: 8 Power Tube Sockets

These are all good, used tube sockets in excellent shape, and
ready to be put to use again!

Pair of 4-pin ceramic sockets with recessed base, for
tube base that is about 1-1/4" diameter with two pins larger
than the other two. They fit 811A tubes.

Pair of 4-pin bayonet based ceramic sockets. At least they
LOOK like they have four pins.... For 1-1/4" diameter tube bases...
but they are designed for rectifiers so just have TWO pins!

One National 7-pin ceramic tube base as used with 1625 etc.

One larger Amphenol plastic octal socket with 8 screw terminals.

One CEI 7-pin ceramic tube socket as used with the 832 or 829B
tubes.

One large, flat E.F. Johnson ceramic socket - 4 pins. Two are
larger diameter pins, two smaller. 2-5/8" X 2-5/8" - pretty
standard large EFJ socket.
Maybe for a 210 tube or something like that...

So - 8 tube sockets - for $25.00 plus shipping.

Who would like them?

Regards - Brian, AF4K

1794. AEA PK-232 MBX digital controller FS

Yahoo group: amatuerradioswapfest
Date: 2007-12-16 00:39:41 UTC
From: Ken Simpson, W8EK
Topic: 1715 Message: 1794

AEA PK-232 MBX For Sale:

AEA PK-232 MBX, multi-mode digital controller.
More than just a TNC. It will handle packet, RTTY, Amtor,
ASCII, CW, etc. This is a late one with the multi-colored
LEDs, and newer circuit board. I think it has the latest
firmware.

It works fine, and looks very close to new.
This one is in its original box, has the original manual
about an inch thick, and an assortment of cables for
$120 plus shipping from Florida.

Thanks.

73,

Ken, W8EK

1795. Gordon West Code Tapes FS

Yahoo group: amatuerradioswapfest
Date: 2007-12-16 18:18:25 UTC
From: Ken Simpson, W8EK
Topic: 1795 Message: 1795

For Sale:

Gordon West "Radio School" code tapes

This is a set of four cassette tapes to take a person
up thru 13 WPM. It was originally designed for use
when the General test was 13 WPM, and to make
one proficient at that speed.

This set is in nice shape, complete with its original
"binder" enclosure. $12 plus shipping from Florida, which
would likely be about $3 via "Media Mail".

Thanks.

1796. WTB: Alinco DJ-280T Charger

Yahoo group: amatuerradioswapfest
Date: 2007-12-19 19:21:13 UTC
From: Jeffrey
Topic: 1796 Message: 1796

Hello,
I recently picked up an Alinco DJ-280T HT however, it came w/o a charger and need something or soon the battery will be dead. Anyome have anything that will charge this battery? Stock charger or aftermarket doesn't matter as long as it charges the battery.

Please let me know...

Jeffrey

1798. Kenwood Dual Band FM transceiver FS

Yahoo group: amatuerradioswapfest
Date: 2007-12-21 14:37:53 UTC
From: Ken Simpson, W8EK
Topic: 1798 Message: 1798

For Sale:

Kenwood TW-4000 A dual band mobile FM transceiver

First buyer says he sent money about 3 weeks ago, but
no $$ here, and no answer to e-mail, so it is available again.

The TW-4000 A covers 2 m and 440 MHz FM. It has 25
Watts output, or 5 W in low power. Of course it has
memories, scan, etc. It has a GASFET front end,
giving it a really great receiver.

This would make a great packet rig, which is what it has
been used for. All solid state switching makes silent
packet operation. Since it has been used on packet, it
does not have a mic or mobile bracket with it, although
it takes a standard 8 pin round mic connector, like most
Kenwood rigs.

It needs 13 V DC at 7 or 8 amps to operate. It works fine.
Manual and power cord are included for $95 plus shipping
from Florida.

Thanks.

Trac Electronics CMOS Memory Keyer For Sale:

This CW keyer has two very large memories built in to it.
Either can be selected independently.
Of course it works fine as a plain CW keyer if you do not need
the memories.
It can be powered by a 9 Volt battery or wall wort.

This one works fine, and looks very good also.

$45 plus shipping from Florida.

Thanks.

1807. FS: Box of 29 Panel Meters and Gauges

Yahoo group: amatuerradioswapfest
Date: 2008-01-02 02:15:18 UTC
From: Bry Carling
Topic: 1807 Message: 1807

FOR SALE:
Box of 29 Useful Panel Meters and Gauges for less
than $2.00 each!

General Electric 0 - 500 uA DC.
Dimensions: 2-5/8" diameter.

Weston RF Meter Type 2521 reads 0 - 5KW.
Ruggedized type. FSD = 200 uA DC.
Dimensions: 2-5/8" diameter.

RF Carrier Power meter Model 321.
Scales for 0 - 200 Watts and 0 - 100% Modulation.
Ruggedized type. FSD = 200 uA DC.
Dimensions: 2-5/8" diameter.

Burlington 0-1 mA DC square meter.
Dimension - 3" square. Needs approx. 2-3/4" diameter hole.
Loose inside.

Lambda Instruments 0 - 10 Amps DC.
Clear face. Dimensions: 1-3/4" square.

Marion dBm Measurements. Like most dBm meters,
displays signal levels above and below the Zero
dBm point. 2.5" Diameter.

Marion Electrical Instruments -100 / 0 / +100 mA DC.
FSD = 1mA DC. Center zero.
Dimension: 3-1.2" diameter.

DC Voltmeter with scales for 300V DC and 600V DC.
Requires series shunt of 400K-ohms for 300V and 800K-ohms
for 600V scales. Slight chip

Panel Meter - Milliwatts and dBm - by Roller Smith Co.
Meter is 2.5" diameter, and has dual scales.

Burlington 0 - 10V DC. FSD = 1V DC.
Dimension: 3" square.

Burlington 0 - 10V AC. Glass loose, works OK.
Dimensions: 3-1/2" diameter

Triplett 0 - 1 mA DC round panel meter. Great for homebrew.
Dimension: 2-5/8" diameter.

Triplett Type #232 0 - 10V AC.
Dimension: 2-1/2" diameter.

0 - 50V AC WACLINE panel meter.
Excellent shape. Dimension: 2-5/8" diameter.

Weston Type #301 0 - 2 Amps DC.
Dimensions: 3-1/4" diameter.

Weston Type #506 -50 / 0 / +50 uA DC.
Dimensions: 2-5/8" diameter.

Westinghouse Meter with 0 - 10 scale and marked 'FILAMENT.'
Measures 4" square with rounded corners. Very classy looking.
Unsure whether this is amps or volts, AC or DC.

Quantity TWO: Weston Type #506 0 - 1 mA DC
Dimension: 2-5/8" diameter.

A&M Instruments Type #265-108 reads 0-100 Watts.
and 0 - 1000 Watts on two scales. FSD = 200 uA DC.
Ruggedized type. Dimensions: 2-5/8" diameter.

Westinghouse 0 - +/- 3V DC Center zero meter.
Type SX-33 protruding design for surface mount.
Slightl crack. Dimensions 2-1/2" diameter.

Pressure Gauges - used for measuring gas pressures.
I have two with the following ranges. One is 0 - 50 P.S.I.
Other one is 0 to 15 P.S.I.

Vectron Panel Meter - Center Zero - Current meter.
Neat little round meter about 1.5" diameter.

Small VU meter for easuring audio levels.

Will sell ALL of the above meters for a total of $55.00 plus shipping

Date: 2008-01-05 15:13:16 UTC
From: Ken Simpson, W8EK
Topic: 801 Message: 1810

13 Volt DC power supplies For Sale:

Pyramid PS-35
This supply is good for 32 Amps Constant or 35 Amps Surge.
The output voltage is adjustable over a 12 to 15 volt range
with a multi turn pot. It has crowbar over voltage protection,
short circuit & thermal protection and features a pair of nice
large edgewise meters to measure output voltage and output
current. There is an internal fan. This is a very healthy, heavy
duty supply!
This particular unit works 100% and looks very close to new.
$135

Astron RS-4 A power supply for sale:
This 4 amp, 13.8 V DC power supply is well regulated.
My DMM says 13.80 V DC with no load, or with a full load.
This particular unit, obviously works well, but it also looks
like new. I can not find a scratch or defect on it. In its original
box for $25.

12 Volt DC power supply / charger / battery eliminator
Lafayette "Charger / Eliminator"
This unit produces 12 V DC to either charge a battery (25 ma
max) or eliminate a battery (act as a power supply) at 300 ma
max. The "Eliminator" portion has a 2.1 mm coaxial plug on it.
It works fine and looks fine also. $13

Prices do not include shipping from Florida.

Thanks.

1814. Icom HTs and accessories FS

Yahoo group: amatuerradioswapfest
Date: 2008-01-13 20:33:33 UTC
From: Ken Simpson, W8EK
Topic: 1814 Message: 1814

Icom HTs and related accessories For Sale:

Icom IC-2 AT, 2 meter HT
The Icom IC-2 AT is a fairly generic HT for the 2 meter band.
It is fully synthesized, with the frequency controlled by thumbwheel
switches on the top, and has a 16 digit touchtone pad on the front.
As some may recall, the IC-2 AT originally came with a 12 digit
touch tone pad on it, but some people needed the 16 digit pad
for control operations, so they ordered a new "front" for the 220 or
440 versions of this HT, which had a 16 digit pad on it, and replaced
this front on the 2AT. This is what has been done with this unit. The
label says Icom IC-3AT but it is really an IC-2AT, with the changed
front. The rubber has deteriorated on the 16 digit pad, so it looks
ugly. Even though it looks ugly, all of the 16 digits seem to work
fine.
The HT has about 3 watts output in high power and just under a watt in
low. A rubber duck antenna, belt clip, and wrist strap are included,
along
with a battery charger. This HT works fine. If you want an expensive,
easy to operate HT, this is it. Paper work included for $35.

Icom IC-4 AT, 440 MHz HT
The Icom IC-4 AT is a fairly generic HT for the 440 MHz band.
It has a 16 digit touch tone pad on the front, and is fully synthesized,
with the frequency controlled by thumbwheel switches on the top.
It has about 3 watts output in high power and just under a watt in low.
A stubby duck antenna, belt clip, and wrist strap is included, along
with a battery charger.
This HT works fine, and looks fine also.
Paper work included for $55.

Icom BC-35 Desk Charger.
It will charge these batteries:
BP-2, BP-3, BP-4 (w/NiCads), BP-5, BP-5A, BP-7, BP-8, BP-70,
CM-2, CM-2G, CM-3, CM-3G, CM-5, CM-5G, CM-5A, CM-5AG,
CM-7, CM-7G, CM-8, CM-8G, CM-96. To put it another way, it
charges all of the batteries used on Icom HTs from about 20
years ago.
This one works fine and looks very close to new.
It is in its original box, with paper work for $25.

Icom DC-1, 13 V DC adapter for many Icom HTs
This adapter slides on the HT, in place of the battery pack. If 13 V
DC is applied, it converts the voltage to the proper voltage for the
HT. It can be used with the IC-2, IC-3, IC-4, IC-02, IC-03, IC-04,
and others. This one works fine, and looks very nice.

With paper work for $12.

Icom BP-4 / CM-4 battery case
This is the "empty" battery case, that one may add six AA cells
for extra long battery life. It will take either rechargable or alkaline

AA batteries. When used with rechargable batteries, it can be
charged on a BC-35 desk charger. This will work on the 2GAT,
02AT, 2AT, 4GAT, 04AT, 12GAT or 03AT, plus many of Icom's
commercial radios. This unit is in very nice condition. No
scratches. With paper work for $15.

"Empty" Battery pack for alkaline cells
This is not the actual Icom BP-4, but is a Mr NiCd clone, with a
value added addition. It is both a pack for AA cells, but it is also
a 13.8 V DC adapter. It can be used on the IC-2, IC-3, IC-4 and
that series of HTs, as well as the IC-02 AT series of HTs.
It is similar to a DC-1 and a BP-4 in one unit.
This particular unit works fine and looks like new. $ 30

Selectone ST-131 Subaudible PL tone encoder
If you need subaudible tones, this unit will add them to the Icom
IC-2AT, 3AT, 4AT, and others of that series that lacked the tones
originally. It is a postage stamp size unit. This one has never been
used, and is still in its original plastic bag, with the instructions.
$20

Prices do not include shipping from Florida.

Thanks.

FS: Set of FOUR Military Shock Mounts... type 780-10G

These are brand new BARRY MOUNT units from Barry Electronics.
Great for mounting any kind of electronic equipment.

Dimensions approx 2-3/8" square with large threaded hexnut
on top, these are new and clean units.

Set of 4 available for $30.00 plus shipping.

1818. Antennas for your HT FS

Yahoo group: amatuerradioswapfest
Date: 2008-01-19 19:10:23 UTC
From: Ken Simpson, W8EK
Topic: 1818 Message: 1818

Two meter antennas for your HT for sale:

All antennas are for two meters, work fine, and are in good condition.

VoCom 5/8 wave gain antenna for 2 meters
This antenna is about 4 feet long when extended, so it is unwieldy on an HT, but it really has gain when you need it. It has 3 db gain over a quarter wave antenna which likely has about 6 db gain over a rubber duck. To put it another way, this antenna likely has about 9 db gain over a rubber duck. It telescopes to about 9 inches long. In that position it is still usable, with about the same gain as a rubber
duck. This antenna is idea for parades, walk-a-thons, and other events where you need a gain antenna on your HT. It has a BNC connector on it. $18

Telescoping quarter wave antenna
This antenna extends to a full 19 inches, but telescopes down to about 4 inches. It has about 6 db gain over the typical rubber duck antenna. It has a BNC connector. $12

Quarter wave telescoping antenna
As above, but with PL-259 connector. $12

Quarter wave telescoping antenna
As above, but with a right angle bend in it, and PL-259 connector. $15

Standard rubber duck antenna
With BNC connector, about 7 inches long. $10

PL-259 connector - 6.5 inches long $10
HyGain 275, in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, in original package - $10

5/16 inch threaded, like used by Motorola and others
Regular - about 6 inches long - $10
Stubby - 4 inches long - $10

Type F connector - 6.5 inches long - $10

Special Rubber Duck antennas for Kenwood TH-21 series
2 meter HTs with the threaded connector
Aftermarket stubby, 3.3 inches long - $10
Kenwood RA-6 regular, 6.6 inches long - $10

BNC stubby for 440 MHz - 3 inches long - $10

Prices do not include shipping from Florida.

Thanks.

1834. Low Pass TVI filters FS

Yahoo group: amatuerradioswapfest
Date: 2008-02-13 13:11:39 UTC
From: Ken Simpson, W8EK
Topic: 1102 Message: 1834

Low Pass TVI filters For Sale:

Low Pass for your transmitter
Add one of these filters to your transmitter to help prevent
TVI or RFI.
All filters have an SO-239 connector for input and output,
and are designed for 52 ohm systems.

Johnson Nye Viking 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut off
frequency of 45 MHz and 75 db of attenuation.
It is rated to take 1000 Watts of AM, or 5000 Watts
PEP SSB.
Filter only $35
Filter with mounting bracket $40

B & W model 425 (Also know as FL-10/1500) low pass filter
It cuts off just above 10 meters, and will handle 1500 Watts.
Maximum attenuation is at 52 MHz, with at least 70 db across
the band.
This is an older model that seems much heavier duty. It weighs
almost twice as much as the newer model, and looks like it
would take more power. It likely was made in the days that
plate modulated AM was the rule. Paper work included. $35

B & W FL-10/1500 Low Pass Filter
This is the more modern, current, latest version of the 425 filter
as listed above. Like new condition. With paper work $40

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter
and antenna, and has been optimized to have more attenuation
in the 40 MHz region, where many TVs have their IF. It is good
for 1000 Watts "average" according to the manual, and has
Over 80 db attenuation at 41 MHz. This one looks great, and
also has the single page "manual" with it. $ 35

Alinco ELP-60 D LX low pass filter
For 50 ohm systems, with up to 500 watts of power.
This one has an SO-239 on one end, and about a 2 foot
length of coax and PL-259 on the other end. $30

Prices do not include shipping from Florida.

Thanks.

Date: 2008-02-24 01:36:29 UTC
From: Ken Simpson, W8EK
Topic: 1841 Message: 1841

For Sale:

Autek QF-1 audio filter

This is an audio filter that goes between your rig and
speaker. It runs off of 110 V AC, and will peak, notch,
or become a low pass filter. Selectivity (bandwidth)
and frequency are adjustable from the front panel.
The input is a 1/4 inch phone plug, and the output is
a 1/4 inch jack on the front panel. This particular unit
looks very good, and works the same. Paper work
is included for $40 plus shipping from Florida.

Thanks.

This supply is good for 32 Amps Constant or 35 Amps Surge.
The output voltage is adjustable over a 12 to 15 volt range
with a multi turn pot. It has crowbar over voltage protection,
short circuit & thermal protection and features a pair of nice
large edgewise meters to measure output voltage and output
current. There is an internal fan. This is a very healthy, heavy
duty, deluxe supply!
This particular unit works 100% and looks very close to new.
$130

Arista Model 477, 4 amp 13 V DC power supply
This power supply is regulated, with an internal adjustment
for fine tuning the output voltage.
It has a red lamp on the front with the switch, and binding
posts on the rear panel for the output voltage.
It works fine and looks good also. $15

Prices do not include shipping from Florida.

Thanks.

1843. Dual Band and 2 meter FM transceivers FS

Yahoo group: amatuerradioswapfest
Date: 2008-03-02 13:45:44 UTC
From: Ken Simpson, W8EK
Topic: 1843 Message: 1843

For Sale:

Kenwood TW-4000 dual band mobile FM transceiver

This is a really great dual band radio, but being I am not
doing packet any more, I don't need all of them.

The TW-4000 covers 2 m and 440 MHz FM with 25 Watts
output, or 5 W in low power. Of course it has memories,
scan, etc. It has a GASFET front end, giving it a really
great receiver. It also has a "tight" front end with helical
resonators, to keep alot of out of band "crud" out of it.
This makes it a great packet rig, which is what it has
been used for. All solid state switching makes silent
packet operation. Since it has been used on packet,
it does not have a mic or mobile bracket with it, although
it takes a standard 8 pin round mic connector, like most
Kenwood rigs.
It works great and looks good also.
Manual and power cord are included for $95.

KDK FM-2030, Two meter FM transceiver, with tones

This transceiver covers two meters with 26 W in high
power and 6 W in low power. A PL (CTCSS subaudible)
tone encoder is built in. The microphone has a touchtone
(DTMF) pad on it. Of course it has memories and scan
capabilities. It is very easy to operate.
This one looks fine, and works fine.

Included with the radio is the power cord, touchtone
microphone, mobile bracket and paperwork, all in the
original box for $75.

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

1846. Several HTs (2 m, 440, and dual band) and accessories FS

Yahoo group: amatuerradioswapfest
Date: 2008-03-23 13:24:44 UTC
From: Ken Simpson, W8EK
Topic: 1846 Message: 1846

For Sale:

A variety of HTs (both 2 m and 440 MHz) and associated
accessories

Realistic HTX-202 for 2 meters
This HT has about 5 W output, or 1 W in low power. It
has an exceptional receiver on it, with extremely good
front end characteristics. Of course it has memories,
scan, and all the normal bells and whistles, including a
very readable LCD display. A touchtone DTMF pad is
included on it, as are PL (subaudible) tones.
This particular unit works fine, and looks very close to new.
It includes a good battery, charger, belt clip, carrying strap,
rubber duck antenna and paper work for $70.

Realistic HTX-404 for 440 MHz
Similar to the HTX-202 above, but for the 440 MHz band.
It also works fine, and looks really great. It includes a good
battery, charger, belt clip, rubber duck antenna and paper
work for $70.

Radio Shack 119-310 speaker microphone
Can be used on either of the above HTs, or on many others
such as Icom, Yaesu etc. It works fine, and looks good also.
$18

Radio Shack 19-300 Battery pack for HT-202 and HTX-404
This is a good battery pack for the Realistic HTs. It also fits
some of the Icom HTs such as the IC-2 AT, IC-02 AT, IC-4 AT,
etc. This is the 7.2 volt, 600 ma hour NiCad pack.
It works fine and looks great. $25

Alinco DJ-191, 2 meter HT
This unit has about everything except the kitchen sink in it. It
has a very large, readable LCD display that I can read without
my glasses! It has about 7 watts max output, and the receiver
is great. It covers from 136 to 174 MHz, so it covers all of the
weather and VHF public service frequencies. Of course it has
memories and all sorts of scan features. Touchtones (DTMF)
and PL (subaudible) tones are included.
This unit works 100% and looks extremely nice. It includes a
good battery pack, belt clip, rubber duck, and paper work for $100.

Kenwood TH-41 AT HT for 440 MHz.
This compact HT has thumbwheel switches to select the operating
frequency. The HT has about 1.5 watts output, and a decent receiver.

It has a touchtone pad on it, and is very simple to operate. You likely will not need to read to manual to use this one!
It includes a good battery (new insert a couple months ago), charger, rubber duck, carrying strap, and paper work for $60.

Alinco DJ-G5 dual band 2 meter and 440 MHz HT
I said earlier that the Alinco DJ-191 2 meter HT has about everything except the kitchen sink in it. I think they must have included the kitchen sink in this one! It has all of the features of the DJ-191 above, but also works on the 440 MHz band. It will even cross band repeat, if you talk to it right. But I am certain you will need to read the manual on this one! It has three power levels of about 6, 3.5 and 1 watts.
The receiver covers from 108 to 174 MHz, and then from 420 to 480 MHz. This means it covers the AM aircraft band, as well as the VHF public service, weather frequencies, and UHF public service. I can not think of anything a ham would want it to do that it will not do.
This particular unit works fine, and looks extremely nice. It includes a good battery, belt clip, rubber duck antenna, and paper work for $250.

Speaker microphone for Alinco HTs above.
I thought it was actually an Icom HM-9, but I can not find that written on it any place. I do know that it works fine with the Alinco HTs.
It looks OK also. $18

BNC to PL-259 antenna adapter
For use with the Realistic HTX-202 and HTX-404 HTs and also Alinco DJ-191 and DJ-G5 HTs above, or any other HT with BNC connector. It will convert the BNC connector on the HT, so that you can use a normal antenna with a PL-259 connector. Like new. $5

Prices do not include shipping from Florida.

Thanks.

1847. Vibroplex Iambic Paddle and other CW items FS

Yahoo group: amatuerradioswapfest
Date: 2008-04-05 00:12:50 UTC
From: Ken Simpson, W8EK
Topic: 1847 Message: 1847

CW items For Sale:

Vibroplex "Blue Racer Iambic" CW Paddle

The Brass Racer Iambic is unique in that there are no
springs in the design. Tension on the paddle is infinitely
adjustable through the use of magnets. The Brass Racer
Iambic is a convenient, keyer paddle unit crafted from
solid brass with a lacquer coated brushed finish
mounted on a hardwood base.
This one works great, is in very nice condition, and includes
cord and paper work for $110.

MFJ 411 "Code Tutor"
This unit is designed to send CW, so that one can get their
code speed up easily. Of course it is QRM free! One can
select the speed, and tone, and whether it will send groups,
plain text, and various advanced modes. It can be powered
by a 9 V battery, or an external power source. A digital display
tells you the speed, plus other operating characteristics.
This one works fine, looks fine, and includes paper work for $40.

Cables for CW paddles and keys:

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo
connector on the end, like used by most rigs. It looks
great. $8

As above, but 1/8 inch plug. $8

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch
phone plug on it, as is used with a straight key. $5

As above, but 1/8 inch plug. $5

Prices do not include shipping from Florida.

Thanks.

1855. Extensive list of Ham Publications FS - Vintage and Modern

Yahoo group: amatuerradioswapfest
Date: 2008-04-19 16:45:50 UTC
From: Ken Simpson, W8EK
Topic: 1855 Message: 1855

Ham Publications For Sale (Both Vintage and Modern):

I realize this is a long list; I have tried to group the books
as much as possible. All are in good condition or better.

ARRL Handbooks:

These are in the smaller format (6 1/2 by 9 1/2 inch size).
They include tube charts and ads for vintage equipment,
which are not in the newer handbooks.
1958 - 35th edition - Actual book is in very good condition
.....Cover has been repaired by laminating. $15
1967 - 44th edition - Very nice condition $15
1973 - 50th edition - Very nice condition throughout $12
1977 - 54th edition - Good condition $10
1978 - 55th edition - Extremely nice condition $12

More modern, larger 8 1/2 by 11 inch format:
1981 - 58th edition - Nice shape $13
1982 - 59th edition - Good condition $11
1983 - 60th edition - Great condition; no problems $15
1985 - 62nd edition - Like new $17
1986 - 63rd edition - Close to new condition $17
1993 - 70th edition - Hardbound - Like new $20
2006 - 83rd edition - with CD, like new $35

Radio Physics Course - An Elementary Text Which
Explains the Principles of Electricity and Radio
By Alfred Ghirardi - Published 1932 by Murray Hill Books
This is a book just under 1000 pages that is very detailed.
It has many interesting topics.
This book is in fairly good shape, although certainly not
new! $15

Electrical Engineering by Dawes
Volume 1 - Direct Currents
Third Edition - 1937
I would call this a basic text. 750 pages. It includes
a separate insert that has the answers to the problems.
Book is in nice shape, but does have a name on the
inside cover with a 1938 date. $15

Direct and Alternating Currents
By Oppenheimer and Borchers
1963 - McGraw Hill - 392 pages of "Modern" info,
compared to the 1930's books
Very nice shape, with name in front cover. $12

Unit Outlines in Physics by Colen and Newman
Paperback (I didn't know they made paperbacks then!)
Revised edition, 1940
Some wear, and writing. $ 12

Modern Electronic Communication by Gary Miller
This text book is used in many community colleges, and is an exceptionally thorough, yet easy to understand book covering all aspects of communications, from Ohm's Law on up.
Hardback in very nice condition. $18

Books about Operating an Amateur Radio Station:

ARRL "Stealth Amateur Radio - Operate from Anywhere"
By Kirk Kleinschmidt, NT0Z - like new - $25

RSGB "Amateur Radio Operating Manual"
1982 - 2nd edition $8
1991 - 3rd edition - like new $10

ARRL "Radio Amateurs Operating Manual"
1985 - 2nd edition $8
2000 - 7th edition - Inch thick with "Ham Desktop
.....Reference" included - Like New - $18

ARRL "Operating an Amateur Radio Station"
1983 - 61st edition $3
1984 - 62nd edition $3

ARRL "Public Service Communications Manual"
1985 - 9th edition - $3
No date listed, but appears to be about 1990-1992 $3

ARRL "Specialized Communications Techniques
for the Radio Amateur" - 1975 - First Edition $7

ARRL "Practical Packet Radio"
By Stan Horzepa, WA1LOU
First Edition - 1998 - Like new - $10

"Digital Communications with Amateur Radio"
By Radio Shack, Jim Grubbs, K9EI
1988 - $4

ARRL "FM and Repeaters for the Radio Amateur"
By W1XZ - 1978 - Second edition - $5

ARRL "Radio Frequency Interference"
1981 - 2nd edition - like new - $10

FCC Interference Handbook
Published by the FCC - 1986 edition - $3

ARRL "Your Ham Antenna Companion"
A guide to understanding and building antennas

1995 - First edition - $8

ARRL "Understanding Basic Electronics"
By WR1B - inch thick course - $12

ARRL "Weekend Projects for the Radio Amateur"
1979 - First Edition - $8

Sears "Simplified Electric Wiring Handbook"
1962 - Lots of diagrams - $3

Archer "Getting Started in Electronics"
By Forrest Mims - many diagrams - 9th edition - $4

Radio Shack "Basic Digital Electronics"
By Alvis Evans - water stain on back - 1996 - $3

ARRL Amateur Radio Field Resources Directory
1986-87 - First Edition - About an inch thick - $5

Ham Price Guide - 2nd Edition
Lists prices of used ham gear - $5

Radio Amateur's World Atlas
Published by Callbook - 12th edition - $8

Radio Amateur's World Atlas
Published in Germany - $8

National Geographic World Map
As seen from the satellites - $1

ARRL DXCC Countries List
Sept 1997 - marks in it - $2

FCC Interference Handbook
Published by the FCC - 1986 edition - $3

ARRL "FCC Rulebook"
Eighth Edition - 1989 - $4
As above, but "Newly Revised to include Codeless
.....Technician" - 1989, updated to 1991 - Like New - $6

W5YI "Rules and Regulations - Part 97 Amateur Radio Service"
1993 - Fourth Edition - $3
2002 - 17th Revised Edition - $4

Tab Books: "Oscar: The Ham Radio Satellites"
by Dave Ingram, K4TWJ - 1979 - First Edition
Hardback - Like new - $15

ARRL "Weather Satellite Handbook"
1990 - 4th edition - like new - $10

General and Technician License Study Material:

To the best of my knowledge, this is current material.

ARRL Ham Radio License Manual - Technician Level
This is the book you need to get your first license, or to
get someone started in ham radio. It is used by most
of the Tech licensing classes. Like new for $18

ARRL General Class License Manual - 5th edition
This book has not only the questions, but also an
explanation of the theory behind the questions.
Like new for $12

ARRL General Q & A Manual - 2nd edition
This book has the questions and a brief explanation. It
is not nearly as thorough as the actual License Manual
above. Like new for $10

General Class License Manual by Gordon West, WB6NOA
Second Edition - Like New - $3
Fifth Edition - Like new - $5

Upgrade to General Class by Don Stoner, W6TNS
1992 - $4

Advanced Class License Manual by Gordon West, WB6NOA
"New Edition" - Second Edition - 1995 - $4

Extra Class Test Guide - The Final Exam, by Disk Bash, KL7IHP
This is the book that started it all, with the first publication
of the actual exam questions.
Second Edition - 1990 - well used - $6

Ameco "Mastering the Morse Code" by Martin Schwartz
First Edition - 1957 - $8

Ameco "Radio Amateur License Guide" by Schwartz
Covers Novice, Tech, and General questions with diagrams
and tube info needed for the tests - 1956 - $5

Ameco "Novice License Radio Amateur FCC Test Manual"
By Martin Schwartz - 1984 - like new - $4

Ameco "Amateur Radio Novice Class Theory Course"
By Martin Schwartz. Far more in depth than the test manual.
First Edition - 1978 - $5

Ameco "Complete Technician Radio Amateur FCC Test Manual"
By Martin Schwartz - 1992 - $3

Ameco "General Class Radio Amateur FCC Test Manual"
By Martin Schwartz - 1984 - Like new - $4
As above, but includes 1988 questions and answers - $4

Ameco "Advanced Class Radio Amateur License Guide"
By Martin Schwartz - First Edition - 1981 - like new - $5

Ameco "Advanced Class Radio Amateur FCC Test Manual"
By Martin Schwartz - Copyright 1987, with added 1991 material
First Edition - Like New - $6

Vintage ARRL Licensing material:

ARRL License Manuals - $3 each
1979 - 77th edition - All classes
1984 - 79th edition - All classes
1984 - 80th edition - All classes
Technician Class - 1989 - First edition
General Class - 1989 - First edition
.....1997 - Second Edition
Advanced Class - 1985 - First edition
.....1990 - Third Edition
Extra Class - 1988 - Third edition

Sam, Tab Publishing, and Hayden Vintage Licensing material:

General Class Amateur License Study Guide
By Phil Anderson, W0XI; published by Sams
First Edition - 1979 - $3

Amateur Radio General Class License Study Guide
By Jim Kyle and Ken Sessions; Tab Publishing
1975 - 2nd edition - $3

Amateur Radio Advanced Class License Study Guide
By Jim Kyle and Ken Sessions; Tab Publishing
1975 - 2nd edition - $3

Hayden "Radio Operator's License Q & A Manual" by Kaufman
For commercial tests - Eighth Edition - 1976
About 1 1/2 inches thick - $5

Sams Photofact "Master Index"
Lists what is in the various Sam's Aug 1960 - Good condition - $8

Sams Tube Substitution Manual
1970 It looks like cover has been replaced, but it is in nice shape.
$4

"Basic Technology for the Amateur Radio Enthusiast"
By Alpha Delta Communications, Don Tyrrell, W8AD - $5

"Installing your Own Telephones"
By Radio Shack - 3rd edition - 1989 - $3

Repeater Directories - $3 each
1982-83
1983-84

1987-88
1989-90
2000-01

US Repeater MapBook
Includes Repeater Directory, with maps showing their location
For US, Canada, and Mexico - Sixth Edition - $5

Original Operating Manuals for Kenwood Rigs:

All manuals are original, in very nice condition, for
Kenwood radios.
All are operating manuals, and not service manuals.

Operating manual for TH-21 A / AT HT for 2 meters $8

Operating manual for TH-41A/BT/E, TH-31A/BT, TH-21A/BT/E
HTs for 440 MHz, 220 MHz and 2 meters $10

Operating manual for TM-221/421 2 m mobile $15

Operating manual for TM-231 / 331 / 431 / 531 mobile FM
transceivers for 2 meters, 220 MHz, 440 MHz, and 1200 MHz. $12

Operating manual for TR-2200, 2 meter "portable"
This is very similar to the Drake TR-22. $15

Operating manual for TR-2400, 2 meter HT $12

Operating manual for TR-2500, 2 meter HT $14

Operating manual for TR-2600, 2 meter HT $12

Operating manual for TW-4000 dual bander $15

ORIGINAL Heath manuals. These are manuals
only. They are all originals, in exceptionally
good condition, and are not copies.

Heath CO-1 Code Practice Oscillator
1959 - Extremely nice condition, with NO check marks
in the book. Separate pictorials included. $7

HD-15 Hybrid Phone patch - 1965
Check marks in book,
Schematic is part of book. $8

Heath HN-31 A "Cantenna" Dummy Load
For the "A" model dated 1982
No check marks in book. $10

Heath HW-2021 Assembly manual - 1975
2 meter hand held transceiver
No check marks in book. $10

GD-600 Photoelectric Light Switch
Schematic is part of book. $6

Heath IM-5284 Multimeter
Large schematic only - $ 3

These are original manuals only.

The following Texas Instrument Data Books are available.
All are in very nice, close to new, condition, with very little use.

Analog Applications Journal - $2 each
August 1999
Nov 1999
Feb 2000
May 2000
August 2000
Nov 2000

AHC/AHCT Designer's Guide - June 1999 $2

Mixed-Signal and Analog Products Designer's Guide
And Reference w/CD - January 1999 $4

Analog and Mixed Signal Products Designer's Guide
And Reference - August 1999 $3

Analog/Mixed-Signal Products Designer's Guide
With CD - February 2000 $5

Logic Selection Guide - August 1998 $4

BiCMOS Bus Logic Interface - 1988 $2

Boundary-Scan Logic IEE Std 1149.1 (JTAG)
5V and 3.3 V Bus interface and scan support Products
1994 $2

LVDS Application and Data Handbook - 2003 $2

The Voltage Regulator Handbook - 1977 $5

Prices do not include shipping from Florida.
Shipping via "Media Mail" is relatively inexpensive.

Thanks.

1856. Stuff going to Dayton.....

Yahoo group: amatuerradioswapfest
Date: 2008-04-19 16:57:39 UTC
From: Paul Finch
Topic: 1855 Message: 1856

Below is a list of items going to Dayton with me. Any of the heavy items will not go unless prior arrangements are made with a $50.00 deposit. On the cabinets you will receive $25.00 back once you pick up the cabinet(s) in Dayton. Not all of the stuff going to Dayton is listed so come by the spaces and check it out. I will let everyone know what the spaces are when/if the Dayton crew gets in touch with me, they have had the credit card number for about two months and so far no response.

If interested in something email me directly at dpaulfinch@... .
1-Motorola T74SRA6800AK
Lots-Vacuum Tubes (sold separately or together, you chose)
2-Motorola R1100A Code Synthesizer (Generates CTCSS, two tone and DCS codes)
4-Glenayre 6' Cabinets
3-GE 6" Cabinets
?-Assorted Motorola Test Cables for Test Bench Panel
?-Assorted Glenayre PA Decks and exciters
15-GE Mastr Exec II UHF Desktop Base Stations (450-460 Split)
1-GE Ericsson N8A209 Pole Mount Base Station (Great weatherproof cabinet)
1-Motorola Mocom Compa Base Station UHF
1 Motorola Mitrek Compa Base Station UHF
1-Motorola Micor Base Station 100 Watt UHF Non-Unified
1-Motorola Micor Base Station 75 Watt UHF Unified
1-Motorola MSR 2000 Base PA and some parts missing
2-GE Mastr II 800 MHz TXRX Rack mount package (No PA)
Assorted NOS Motorola Parts
1-Glenayre 900 MHz RX to 72 MHz Paging Link Repeater (Hot Standby TX and RX)
1-Motorola 6 Gang Charger Model NTN 4668A
1-GE Mastr II Combo D176RAU66A ET-43A ER-64A 30 Cabinet
1-BBL System 6A Plus Spare Cards (Yes I know, how needs it but the cabinet is good and lot's of useable parts)
3-Best 3KVA UPS (Need batteries, on 208 AC, instructions to move to 220) ((Heavy, will take to Dayton only if prior arrangements made)
3-GE Mastr II D174TCN33A 47 MHz 110 watt KT-60A-ER-63A in 30" cabinet
3-Motorola HMN3008A NIB Mobile Mic W/LED
1-Motorola HMN3413A NIB GM300 Mic
1-Zetron Sentri Max Model 1550 (3-Small boards, 1 Main board and cabinet/Power Supply) This is SCADA and don't know much about it.
9-GE Mastr II Mobile Combo MC74AU33A 47MHz (KT-31A/ER-63A)
3-Motorola Syntor Xx X45VBA7100BK
1-Motorola Radius M120 M44GMC20A3AA
2-Motorola Mocom 70's (Unknown band-high on shelves, if interested before Dayton email for info)
3-Motorola Micors (Unknown band-high on shelves, if interested before

Dayton email for info)
7-Motorola Mitreks (48 MHz Low Band, 75 Watt I think)
2-Motorola TLN2418A Test Sets
?-Eagle/Microlink/PPI (Various transmitters, PA's receivers and one new Link 20 Base and remote unit)
Lots of Motorola Service Manuals, too many to list (Over two file cabinets)(Micors, Mitreks and a bunch of other "M's"

Thanks,
Paul

Yahoo group: amatuerradioswapfest
Date: 2008-04-28 23:46:34 UTC
From: Bob Donnell
Topic: 1862 Message: 1863

Beware of dealing with Mark Helinski, a.k.a
mailto:marksbuffalobills@.... My recent experience with him:

1) It took about 2 months before I got the Drake TR-7 and PS-7 I paid for, via a postal money order, and only after threatening to open a postal fraud case - once for each piece.
2) The TR-7 was inadequately packed - the bottom chassis panel was bent, and it wasn't the fault of the post office.
3) Mark asked for additional funds to ship the power supply - I'd already paid $100 above the radio cost, for shipping. Mark had spent about $30 to ship the TR-7.
4) In subsequent communications, I asked Mark to do a better job of packing the PS-7, which he didn't do. The power supply ended up with its feet broken into pieces, and the case bottom pushed up where the feet had been. In neither case were any standard packing materials beyond cardboard used, and the cardboard wasn't fitted to support the equipment other than by way of its feet. So no bubble wrap or packing peanuts were harmed in shipment, because they were not used, in spite of my request.

If you can't deal with Mark in person, I'd recommend against doing so.

73, Bob Donnell, KD7NM

1868. CW Tuning Device FS

Yahoo group: amatuerradioswapfest
Date: 2008-05-10 16:52:33 UTC
From: Ken Simpson, W8EK
Topic: 1868 Message: 1868

CW Tuning Device For Sale:

With some of the newer "do everything" rigs, that have
fairly broad filters for CW, it is often hard to get tuned in
so that you are zero beat with the signal you want to work.

This device will help you. It plugs into the external speaker
jack of your rig, and then the external speaker plugs in to it.
There is an LED on the top that lights when you have the
correct tone (and hence are zero beat). It is powered by
an internal 9 V battery.

This is a home built unit, constructed from published plans.
It is in a very nice metal "Whitman Sampler" enclosure that
looks nice.

This one has a 1/8 inch (3.5 mm) plug and jack on it. It works
fine, and looks nice.

Paper work included for $20 plus shipping.

Thanks.

1869. Mobile HF antennas and related items FS

Yahoo group: amatuerradioswapfest
Date: 2008-05-13 16:01:03 UTC
From: Ken Simpson, W8EK
Topic: 1869 Message: 1869

Mobile HF antennas and antenna related items for sale:

Outbacker Perth HF Mobile antenna
The PERTH antenna covers 80-75-40-30-20-17-15-12-10m,
which means all of the HF bands, including the WARC bands.
The length is about 7 feet long (fully extended) with a 3 foot tip.
The Outbacker is constructed of fiberglass with pre-tuned copper
helical windings and covered with smooth epoxy-resin and a
coating of polyurethane for strength, and durability. The mounting
ferrule is nickel-plated brass with industry standard 3/8x24 threads.
Frequency coverage is broadband but the top of the antenna is
adjustable which allows tuning for the lowest possible VSWR even
on 75 meters and 10 meters. Tap points are clearly engraved for
each band. Changing bands is accomplished manually by plugging
the exclusive Outbacker "Wander Lead" into the proper tap.
The Outbacker antennas have a beautiful, shiny black finish.
This antenna works well and is in good shape. Included is a
package of "Penetrox" which should be used on the "Wander
Lead" to prevent corrosion, and make good contact. $250

Hamstick HF mobile antennas:

These are the original honest to goodness Hamsticks,
made by Lakeview, and are not one of the clones.

Each antenna, when fully assembled and tuned, is about
7 feet long, in a slim design that does not catch much wind.
Each has a 3/8 inch, 24 thread stud on the base, so they
fit a standard ball mount.

Two are available -- one for 20 meters and one for 40 meters.

These antennas are new, still in their original package, unused.

They are $30 each.

Hustler mobile antennas:

All work fine and are in good mechanical condition.

"Standard" Hustler resonators:
40 meter resonator RM-40 $17
20 meter resonator RM-20 $15
15 meter resonator RM-15 $14
10 meter resonator RM-10 $12

Hustler mobile masts:
MO-2 (folds about 27 inches above ball) $22

MO-1 mast that has a start of a split where it folds
.....over. It can be used as an MO-3 (non tilt mast)
.....or needs care when tilting. $ 15

RSS-2, Stainless steel resonator spring $10

Wattmeter/SWR Bridges:

Micronta 21-520 A wattmeter with large dual meters
This meter is designed primarily for HF operation, although
it still functions well on 6 and 2 meters. It has SO-239
connectors, and is designed for 52 ohm antenna systems.
This wattmeter has full scale power readings of 10, 100, and
1000 watts. LARGE dual meters -- one reads forward power
and one reads reflected power -- both at the same time.
It has a remote sensor, with about 3 feet of cable to connect
to the meter itself.
This particular meter works fine, and looks very, very nice.
I can not find a scratch on it. It is still in its original box. $55

Diamond SX-100 Wattmeter / SWR Bridge
This meter has scales of 30 W, 300 W, and 3000 W.
It is for use from 1.6 thru 60 MHz, so is ideal for some
of the modern HF rigs that include 6 meters on them.
It has a fairly large meter that can be backlit if 12 V DC is
applied. It will also read either peak or average power,
and even includes an off switch.
This particular meter works fine, and looks like new.
Not a scratch on it. It is in its original plastic in the
original box, with paper work for $90.

Coax connectors and adapters:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Prices do not include shipping from Florida.

Thanks.

1870. 2 m and 440 MHz HTs and related items FS

Yahoo group: amatuerradioswapfest
Date: 2008-05-17 12:55:59 UTC
From: Ken Simpson, W8EK
Topic: 1870 Message: 1870

For Sale:

A variety of HTs (2 meter and 440 MHz) and associated accessories:

I know this is a long list, but I have tried to group items.

Kenwood TH-41 AT HT for 440 MHz.
This compact HT has thumbwheel switches to select the operating frequency. The HT has about 1.5 watts output, and a decent receiver. It has a touchtone pad on it, and is very simple to operate. You likely will not need to read to manual to use this one! It includes a good battery (new insert a couple months ago), charger, rubber duck, carrying strap, and paper work for $60.

Yaesu FT-26, 2 meter HT
This HT has a nice LCD display, with memories, scan, and subaudible tones. Basically, all the things one would expect in an HT. This unit comes with the desk charger, and not a wall charger. The battery seems to hold a charge OK, but seems somewhat weak, so it may need an "insert" soon. It works 100%, and looks very nice.
Rubber duck and paper work included for $75.

Radio Shack 19-300 Battery pack for HT-202 and HTX-404
This is a good battery pack for the Realistic HTs. It also fits some of the Icom HTs such as the IC-2 AT, IC-02 AT, IC-4 AT, etc.
This is the 7.2 volt, 600 ma hour NiCad pack.
It works fine and looks great. $25

BNC to PL-259 antenna adapter
For use with the Realistic HTX-202 and HTX-404 HTs and also Alinco DJ-191 above, or any other HT with BNC connector.
It will convert the BNC connector on the HT, so that you can use a normal antenna with a PL-259 connector. Like new. $5

Antenna adapter for Kenwood TH-21 / 31 / 41 HTs
This adapts the antenna connector found on these HTs to a standard BNC connector. $5

Antenna adapter to fit the antenna connector on the TH-21/31/41 series of HTs and provide an SO-239 connector that will permit a regular PL-259 to be attached. $5

Rubber Duck and telescoping antennas for your HT.
All are for 2 meters, are in good condition, and are $10 each, unless stated otherwise.

5/16 inch threaded, like used by Motorola and others - $10 each
Regular - 5.7 inches long
Stubby - 4 inches long

Type F connector - 6.5 inches long - $10

PL-259 connector - 6.5 inches long - $10
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long - $10
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Aftermarket stubby, 3.5 inches long - $10
Kenwood RA-6 regular, 6.6 inches long - $10

Telescoping quarter wave antenna
This antenna extends to a full 19 inches, but telescopes down
to about 4 inches. It has about 6 db gain over the typical rubber
duck antenna, and has a BNC connector. $12

Quarter wave telescoping antenna
As above, but with PL-259 connector. $12

Quarter wave telescoping antenna
As above, but with a right angle bend in it, and PL-259
connector. $15

HT speaker microphones:

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HTs. $16

Belt Clips for various HTs:
Motorola, with hardware - $8
Kenwood TR-2400, with hardware - $8
Radio Shack HTX-202/404, with hardware - $10
Yaesu FT-209, with hardware - $8

Icom BP-3 battery packs
I found four of the BP-3 battery packs that are all dead.
These packs were used on the IC-2 AT, 3 AT, 4 AT,
02 AT, 03 AT, 04 AT, and maybe some others. They can
also be used on the Radio Shack HT-202 and HTX-404,
and maybe others.
All of these are dead, but if you need a battery shell, to
put a new "insert" in to, they would be ideal. $8 each

Santec HT Accessories For Sale:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case

includes a built in belt clip, plus a removable leather
shoulder strap.
The case itself is in very nice shape. The leather
shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a
service pack. It has schematics, circuit explanations,
voltages, etc. $18

Accessories for Yaesu FT-209:

Belt clip with mounting screws - $8

Carrying strap (likely fits other HTs as well) $4

Accessories for Kenwood TR-2400 HT:

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HTs. $16

Belt clip for TR-2400 HT, complete with hardware - $8

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the
Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually,
one must have the battery inside the HT, but this lets you charge
a second battery outside of the HT. The original charger is used.
It is in good shape, and works fine. $3

Wrist strap - I think it fits most Kenwood (and maybe other)
HTs - $4

Original Kenwood Operating Manuals For Sale:

All are original operating manuals in very nice, close to new
condition, for Kenwood radios, unless stated otherwise.

Operating manual for TW-4000 dual bander $15

Operating manual for TH-41A/BT/E, TH-31A/BT, TH-21A/BT/E
HTs for 440 MHz, 220 MHz and 2 meters $10

Operating manual for TH-225, 2 meter HT - Good condition $12

Operating manual for TM-221/421 2 m mobile $15

Operating manual for TR-2200, 2 meter "portable"
This is very similar to the Drake TR-22. $15

Operating manual for TR-2400, 2 meter HT $12

Operating manual for TR-2500, 2 meter HT $14

Operating manual for TR-2600, 2 meter HT $12

Service manual for Kenwood TR-2600 HT - $10

Prices do not include shipping from Florida.

Thanks.

General Electric crystal oven, octal - switchable 6V or 12V
Holds two HC6U crystals. QTY 1.
Available for $5.00 plus shipping

REL crystal oven 6.3V with 11-pin "octal" style base.
Holds three HC6U crystals. Some beautiful engineering/machining.
Available for $5.00 each plus shipping

LINK Radio 4-pin adjustable crystal - round metal case
Nominal 1121.875 kHz. QTY 1.
Available for $4.00 plus shipping

Photos available for any of these items.

1876. FS: FT-241 CRYSTALS

Yahoo group: amatuerradioswapfest
Date: 2008-06-02 11:46:57 UTC
From: Bry Carling
Topic: 1876 Message: 1876

FOR SALE:

Quantity of 20 FT241 Crystals on random
LF frequencies. Same pins and spacing as FT243.

All in excellent condition. Mostly appear to
be unused.

20 available for a total of $9.00 plus shipping.

1877. Maldol of Railbeam Antennas

Yahoo group: amatuerradioswapfest
Date: 2008-06-09 16:56:12 UTC
From: Ron
Topic: 1877 Message: 1877

I, N3KFV Ron, have been searching for a beam made by either company. Both made two element beams for 10, 15, 20,and 6 meters. I need a 10m one to set up at our Boy Scout Council summer camp. There is usually a ham or two in camp throughout the sommer. Weare working towards a club station. Maldols 10m version was 28HS-2HB. I do not remember the other. Please post back to me or send me an E-Mail to n3kfv@...

1878. FS: "PARTS IS PARTS"

Yahoo group: amatuerradioswapfest
Date: 2008-06-13 15:43:35 UTC
From: Bry Carling
Topic: 1878 Message: 1878

FOR SALE:

They used to always say ""PARTS IS PARTS" - I have no idea
why!

Bag of diodes: All for $10.00
QTY 50 - 1N752A , new
QTY 16 - Motorola MR2360, new
Motorola Bridge Rectifier MDA970-1

Filament transformer 120V to 6.3V at 8 amps
in a nice metal cabinet, approx 4" X 4" X 4" with
cables. QTY 1 available for $12.00

Savoy Electronics 1:1 balun for dipole or beam $15.00

Yaesu FT-101EE black plastic panel for front panel
8" wide - covers meter and dial, like new $5.00

Warning sign "WARNING - DO NOT CLIMB" for your tower
etc. 10.5" X 3" New, weatherproof reflective yellow on black.
Several available for $2.50 each.

Ceramic center insulator for antennas - Bernback #46
4-1/2" X 1" with center hole for rope. $6.00

Box of goodies - 8:1 Reduction Vernier Dial Drive
2" diameter with 0-100 marked on 180
degrees. For standard 1/4" shaft...
UTC Variductor HVC-8 new in box. 1.2 to 8 Henries.
Two Torotel 600 ohm 1:1 audio transformers, One is
4 watts, the other is 1 watt.
T-5 I.F. Transformer in can with air trimmers.
JW Miller I.F.T. style wave trap in similar can with
adjustable trimmer for 75 to 150 MHz.
EVERYTHING IN THE BOX for $15.00

Pair of military radio crystals for 455 kHz split.
5500 kHz and 5955 kHz for use on 5500 kHz typically.
These look brand new, from Monitor CO. Pasadena.
Available for $22.00

Set of JAN 455 kHz filter crystals
FT-241A crystals - 455.350 kHz, 455.450 kHz, 456.350 kHz
and one HC6U crystal on 455.000 kHz
The set for $39.00 plus shipping (sockets available)

General Electric crystal oven, octal - switchable 6V or 12V
Holds two HC6U crystals. QTY 1.
Available for $5.00 plus shipping

REL crystal oven 6.3V with 11-pin "octal" style base.
Holds three HC6U crystals. Some beautiful engineering/machining.
Available for $5.00 each plus shipping

LINK Radio 4-pin adjustable crystal - round metal case
Nominal 1121.875 kHz. QTY 1.
Available for $4.00 plus shipping

Shipping is additional on everything above.

Topic: 1879 Message: 1879

FOR SALE:

SAVOY ELECTRONICS 1:1 BALUN

For dipole or beam. this is a 52 ohm balun for
1:1 ratio...
Very good working condition with terminals for
RG8 co-ax and two wires.
QTY 1 available for $15.00 plus shipping

TRIAD ULTRA C-36X CHOKE - New in box.
0.5 Henry at 300 mA DC. Great for experimental
regen etc.
Approx 1.5" X 1.5" X 2"
Available for $5.00 plus hsipping

Group of Collins, JAN 455 kHz filter crystals...
from the CW Crystals estate. FT-241A crystals -
455.350 kHz,
455.450 kHz, 456.350 kHz and one added HC6U
crystal on 455.000 kHz
The entire set of four for $45.00 plus shipping
(sockets available)

New old stock REL crystal ovens. These have
11 pin bases. Each unit holds 3 seperate crystals
in 3 separate compartments. They accomodate
HC6U crystals with standard 1/2 inch pin
spacing. These are very nice quality built
units. Designed for 75 degrees C with 6.3V
heater power.
QTY 10 available for $8.00 each plus shipping.

FT241 Crystals on random LF Frequencies.
All in excellent condition. Most appear to be
unused.
QTY 20 for $9.00 plus shipping.

Linear amplifier AMPLIFIER BAND SWITCH
NEW 6-position ceramic rotary switch.
Dimensions approx. 2" square.
Has heavy duty contacts, 1/4" shaft and
positive detent.
Great for building or repairing a linear amp
or antenna tuner.
QTY 1 available for $10.00 each plus shipping.

CS-137 MILITARY CRYSTAL CASE for 120 FT243
CRYSTALS.
Drab olive, with carrying handle and two locking
drawer latches.
Felt liners which cushion and hold the crystals
safely, are in excellent shape too.
Holds 120 FT-243 crystals. Very good condition.
(does NOT include the crystals.)
QTY 3 Available for $35.00 each plus shipping.

1880. CW items and many other misc accessories FS

Yahoo group: amatuerradioswapfest
Date: 2008-06-28 14:03:58 UTC
From: Ken Simpson, W8EK
Topic: 1880 Message: 1880

For Sale:

I know this is a long list; I have tried to group similar items
together.

CW items:

Vibroplex "Brass Racer Iambic" CW Paddle
The Brass Racer Iambic is unique in that there are no
springs in the design. Tension on the paddle is infinitely
adjustable through the use of magnets. The Brass Racer
Iambic is a convenient, keyer paddle unit crafted from
solid brass with a lacquer coated brushed finish
mounted on a hardwood base.
This one works great, is in very nice condition, and
includes cord and paper work for $110.

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo
connector on the end, like used by most rigs. It looks
great. $8

As above, but 1/8 inch plug. $8

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch
phone plug on it, as is used with a straight key. $5

As above, but 1/8 inch plug. $5

Micronta 21-520 A, HF wattmeter with two large meters
This is an HF wattmeter that covers from 3 to 30 MHz, with
full scale power readings of 10, 100, and 1000 watts.
Two LARGE meters -- one reads forward power and one
reads reflected power -- both at the same time. This gives
the same info as some of the cross needle meters, but many
people find it is easier to read.
It has a remote sensor, with about 3 feet of cable to connect
to the meter itself.
This particular meter works fine, and looks like new. It is
still in its original box. $55

Heavy duty power supply
Pyramid PS-35
This supply is good for 32 Amps Constant or 35 Amps Surge.
The output voltage is adjustable over a 12 to 15 volt range
with a multi turn pot. It has crowbar over voltage protection,

short circuit & thermal protection and features a pair of nice
large edgewise meters to measure output voltage and output
current. There is an internal fan. This is a very healthy, heavy
duty supply!
This particular unit works 100% and looks very close to new.
$135

Expanded Scale AC Voltmeter
This is an AC Voltmeter with an expanded scale. It reads
from 0 to 150 volts AC, but the scale is expanded so that
one can read in the 120 V area easier. The middle of the
scale is about 95 volts. It is ideal to have in line constantly,
to check your line voltage. This is a Weston Model 476,
and is about 2 1/2 inches in diameter, with 3 mounting holes.
Of course it works fine, and looks fine also. $18

Keithley 169 Lab Quality Digital Multi Meter
This is a bench type DMM, with good accuracy.
3 1/2 digit LCD display
Voltage ranges are protected to 1400 volts
Resistance ranges are protected to 300 V RMS
..... (This means you can accidentally apply up to 300 V
..... RMS when measuring resistance, and the meter
..... will survive.)
Voltage ranges from 200 mv to 1000 V
Current ranges from 100 microamps to 2 amps
Resistance ranges from 200 ohms to 20 Meg
It is in very nice condition, both electrically and cosmetically.
Manual included for $80.

Variac
General Radio Model W5MT3
This variac is designed for 115 V AC lines, and will vary
the line voltage from zero to about 120 percent of the line
voltage. It is very useful for slowly bring the line voltage
up on older rigs.
The General Radio W5MT3 is in a very nice case, with a
3 wire cord, and 3 wire receptacle. Of course it has General
Radio quality. This one is rated at 5 amps.
In checking prices of used units on the internet, they seem
to go for anywhere from $170 to $400. This one works fine,
and is in excellent cosmetic condition as well. You can have
it for $125.

Microphones:

High Impedance Heath Hand Microphone
This mic came with Heath gear. It is Hi Z, and has 1/4 inch
stereo plug on it, as used by Swan, TenTec, and others.
It can be used on any rig needing a Hi Z mic.
It works fine, and is in good shape. $30

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing voltage. $25

Touch tone (DTMF) microphones for sale:

Kenwood MC-45 DM, DTMF mic plus other functions
In addition to the touch tone pad and PTT switch, this mic has up-down switches, plus a row of four switches above the touch tone pad. They are used for "Call Button", VFO key, Memory recall key, and the fourth one is programmable. The back has a lock switch. It has an RJ-45 connector (like a computer LAN).
This particular mic works fine, and looks fine also. It is still in its original box, with paper work for only $60.

Kenwood MC-48, touch tone (DTMF) microphone.
Round, 8 pin connector, will go with any Kenwood rig taking this kind of connector. Has UP and DOWN switches, along with 16 digit touchtone pad. It is often used on the 2 m and 440 MHz rigs that do not have touchtone built in, but can also be used on HF rigs for touchtone on 10 m FM. It works fine and looks great also.
With paper work for $ 55.

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, along with a low impedance microphone. This one has the 8 pin modular plug (like a computer LAN) on it. This mic has not been used, so it is in really great condition.
Paper work included for $40.

Drake 1525 EM Touchtone Microphone
This is the mic that was used to add a touchtone pad to a lot of rigs in the 70s and 80s. Normal hand mic from the front, but has a touchtone pad on the back. Four pin mic plug. This particular unit has been used, but is in good shape and includes paper work. $ 38

KDK Model TM-2
With touch tone pad and up-down switches. It presently has a 6 pin connector for the KDK 2030, but that can be changed. Nice condition. $40

CES "Micropad" touch tone mic
No model number on it, but it has a 12 digit pad on the back. Low Z mic element with round 8 pin connector wired for Kenwood. $38

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a normal low impedance microphone. With 4 pin plug.

Like new. $38

Icom HM-8 hand mic with Touch Tone (DTMF) Pad
This mic is being sold for parts only. The dynamic element in it is open. A part of the plastic holding the PTT button does not seem quite right, but the actual touch tone pad and electronics is OK. So if you have an HM-8 with bad electronics or actual touch tone pad, this unit will get you up and going again. Actually, the unit probably can be repaired and used. $10

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HTs. $18

Kenwood MJ-68 microphone connector adapter
Converts a round 6 pin Kenwood mic connector, so it can be plugged into a Kenwood rig with the round 8 pin connector. Like new. $20

Kantronics Cable
This cable is made to plug in to the 9 pin DB-9 connector that is on the back of many of Kantronics TNCs and other digital units (KAM, KPC-3, and others), and is made to interface it to the radio.
It has a DB-9 connector on one end, and is in extremely good condition. The connectors are labeled "1" and "2", with "1" having a red 3.5 mm plug, a white 3.5 mm plug, and a black 2.5 mm plug. The "2" is the same as "1" except it does not have the white 3.5 mm plug. It is $20

Phone patches or digital interfaces:

Although designed to be used as a phone patch, to connect your rig on both transmit and receive to a telephone line, these can also be used to interface your rig to a sound card. There is an internal audio transformer inside, just like on some of the "interface boxes" being sold today.

Johnson Viking Phone Patch - Model 250-46
This phone patch is made to be mounted vertically beside the rig. It is about 6 inches high, 2 inches wide and 3 inches deep. It is possible that the face plate can be removed, and it made to be mounted horizontally, but I have not done that. The reason I say this is that there are feet on the bottom, and on the left side. Maybe the feet on the left side are to protect the rig. In any case, it has 3 pots on the front for Null, Receive Volume, and transmit gain, along with a switch for phone patch or microphone. On the back is a terminal strip for speaker and phone line. The microphone input has the 2 pin

Amphenol connector like used by Johnson, Heath,
Hallicrafters, and many others in that era.
It works fine and looks OK also. $30

Kenwood PC-1 phone patch/digital interface
This is the model with the 4 pin connectors, although
they can be changed, if needed. It includes a nice meter
for adjusting the null so VOX will work OK.
This particular unit works fine, and looks very, very good.
No scratches. With paperwork for $ 40

Original Kenwood Operating Manuals For Sale:

All are original operating manuals in very nice, close to new
condition, for Kenwood radios, unless stated otherwise.

Operating manual for TW-4000 dual bander $15

Operating manual for TH-41A/BT/E, TH-31A/BT, TH-21A/BT/E
HTs for 440 MHz, 220 MHz and 2 meters $10

Operating manual for TH-225, 2 meter HT - Good condition $12

Operating manual for TM-221/421 2 m mobile $15

Operating manual for TR-2200, 2 meter "portable"
This is very similar to the Drake TR-22. $15

Operating manual for TR-2400, 2 meter HT $12

Operating manual for TR-2500, 2 meter HT $14

Operating manual for TR-2600, 2 meter HT $12

Service manual for Kenwood TR-2600 HT - $10

Prices do not include shipping from Florida.

Thanks.

1882. FS: PAIR of Military Radio Crystals

Yahoo group: amatuerradioswapfest
Date: 2008-07-04 11:27:34 UTC
From: Bry Carling
Topic: 1882 Message: 1882

FOR SALE:

Some folks find these useful - I have a pair of LIKE NEW,
original type FT243 crystals made by Monitor Co. of Pasadena,
CA.
They are on 5500 kHz and 5955 kHz for the 455 kHz offset.

Please contact me off the list if interested.

Regards - Brian

1883. FS: Lacing Cord

Yahoo group: amatuerradioswapfest
Date: 2008-07-04 11:33:54 UTC
From: Bry Carling
Topic: 1883 Message: 1883

FOR SALE:

Lacing Cord for wiring harnesses in radio and other
electronic equipment. For a professional finish, you get
that wonderful, professional, "original equipment" appearance.
Great for homebrew and repairs.

A spool should last a long time.... two types available...

These are natural color (cream) and around 1/8" wide.

250 yard spool of unwaxed lacing cord - $12.00

300 yards of WAXED lacing cord - $15.00

Shipping additional.

1884. Many ham items FS

Yahoo group: amatuerradioswapfest
Date: 2008-07-05 13:59:18 UTC
From: Ken Simpson, W8EK
Topic: 1884 Message: 1884

I know this is a long list; I have tried to group similar items
together.

High Power Antenna Tuner

This TenTec high power antenna tuner will do it all!
It uses an "L" network instead of the "T" network.
This means that there is only one correct match. With the "T"
network, there are many places that will give a 1:1 SWR, but
only one of these positions is best. With the "L" network, this
is not a problem, and results in a tuner that is much more efficient.

It will easily handle full legal power, and has a roller inductor
so one can get an exact match over any of the HF bands,
including WARC bands.
It also has a balun for use with twin lead.

This is not only a tuner. It also has a four position antenna
switch built in, plus an illuminated wattmeter with 200 and
2000 watt positions, and an SWR bridge.

This particular tuner works 100%, and looks close to new.
I can not find a scratch on it.

With paper work for $325.

Band Modules for TenTec 555 Scout HF transceiver
These also work in the 556 Argo QRP rig.
I have band modules for
160 meters - 1.8 to 2.0 MHz
30 meters - 10 to 10.5 MHz
10 meters - 28 to 29 MHz.
All work fine. With paper work for $65 each.

TenTec 296 mobile mount for 555 Scout HF transceiver
Nice clam shell type of mount in very good condition.
With paper work (in case you need it to install a mobile
bracket !) for $30.

Alinco DJ-191, 2 meter HT
This unit has about everything except the kitchen sink in it. It
has a very large, readable LCD display that I can read without
my glasses! It has about 7 watts max output, and the receiver
is great. It covers from 136 to 174 MHz, so it covers all of the
weather and VHF public service frequencies. Of course it has
memories and all sorts of scan features. Touchtones (DTMF)
and PL (subaudible) tones are included.

This unit works 100% and looks extremely nice. It includes
a good battery pack, belt clip, rubber duck, and paper work
for $100.

Radio Shack 19-300 Battery pack for HT-202 and HTX-404
This is a good battery pack for the Realistic HTs. It also fits
some of the Icom HTs such as the IC-2 AT, IC-02 AT,
IC-4 AT, etc.
This is the 7.2 volt, 600 ma hour NiCad pack.
It works fine and looks great. $25

HF wattmeter / SWR Bridge:

Micronta 21-520 A, HF wattmeter with two large meters
This is an HF wattmeter that covers from 3 to 30 MHz, with
full scale power readings of 10, 100, and 1000 watts.
Two LARGE meters -- one reads forward power and one
reads reflected power -- both at the same time. This gives
the same info as some of the cross needle meters, but many
people find it is easier to read.
It has a remote sensor, with about 3 feet of cable to connect
to the meter itself.
This particular meter works fine, and looks like new. It is
still in its original box. $55

Headphones:

Kenwood HS-5 headphones
These deluxe communications headphones are engineered
and tuned for radio communications to provide distinctive
voice sound (150-4000 Hz).
With ¼ inch mono plug; 8 ohms, and 6 foot cord.
In very nice shape. With paper work for $55.

Generic headphones
Similar to the HS-5 above, but with plastic ear pads.
"Made in USA" stamped on them. About 100 ohm impedance,
With 1/4 inch mono plug, and about 5 foot cord.
Nice shape. $25.

Single headphone
Keep one ear clear, so you can hear what is going on
in the room! With 1/8 inch mono plug; 32 ohm impedance.
Good condition. $20

Generic headset
Smaller ear pieces than those above. These are just over
an inch in diameter, so they do not completely cover your ear.
With 1/4 inch mono plug; 16 ohm impedance.
Good condition. $18

Vibroplex "Brass Racer Iambic" CW Paddle
The Brass Racer Iambic is unique in that there are no springs in the design. Tension on the paddle is infinitely adjustable through the use of magnets. The Brass Racer Iambic is a convenient, keyer paddle unit crafted from solid brass with a lacquer coated brushed finish mounted on a hardwood base.
This one works great, is in very nice condition, and includes cord and paper work for $110.

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo connector on the end, like used by most rigs. It looks great. $8

As above, but 1/8 inch plug. $8

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch phone plug on it, as is used with a straight key. $5

As above, but 1/8 inch plug. $5

Microphones:

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed. Stripped and tinned leads.
It works fine, and looks good also. $25

Touch tone (DTMF) microphones:

Kenwood MC-45 DM, DTMF mic plus other functions
In addition to the touch tone pad and PTT switch, this mic has up-down switches, plus a row of four switches above the touch tone pad. They are used for "Call Button", VFO key, Memory recall key, and the fourth one is programmable. The back has a lock switch. It has an RJ-45 connector (like a computer LAN).
This particular mic works fine, and looks fine also. It is still in its original box, with paper work for only $60.

Kenwood MC-48, touch tone (DTMF) microphone.
Round, 8 pin connector, will go with any Kenwood rig taking this kind of connector. Has UP and DOWN switches, along with 16 digit touchtone pad. It is often used on the 2 m and 440 MHz rigs that do not have touchtone built in, but can also be used on HF rigs for touchtone on 10 m FM. It works fine and looks great also.

With paper work for $ 55.

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, along with a low impedance microphone. This one has the 8 pin modular plug (like a computer LAN) on it. This mic has not been used, so it is in really great condition. Paper work included for $40.

Drake 1525 EM Touchtone Microphone
This is the mic that was used to add a touchtone pad to a lot of rigs in the 70s and 80s. Normal hand mic from the front, but has a touchtone pad on the back. Four pin mic plug. This particular unit has been used, but is in good shape and includes paper work. $ 38

KDK Model TM-2
With touch tone pad and up-down switches. It presently has a 6 pin connector for the KDK 2030, but that can be changed. Nice condition. $40

CES "Micropad" touch tone mic
No model number on it, but it has a 12 digit pad on the back. Low Z mic element with round 8 pin connector wired for Kenwood. $38

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a normal low impedance microphone. With 4 pin plug. Like new. $38

Icom HM-8 hand mic with Touch Tone (DTMF) Pad
This mic is being sold for parts only. The dynamic element in it is open. A part of the plastic holding the PTT button does not seem quite right, but the actual touch tone pad and electronics is OK. So if you have an HM-8 with bad electronics or actual touch tone pad, this unit will get you up and going again. Actually, the unit probably can be repaired and used. $10

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HTs. $18

Kenwood MJ-68 microphone connector adapter
Converts a round 6 pin Kenwood mic connector, so it can be plugged into a Kenwood rig with the round 8 pin connector. Like new. $20

Heavy duty power supply
Pyramid PS-35
This supply is good for 32 Amps Constant or 35 Amps Surge. The output voltage is adjustable over a 12 to 15 volt range

with a multi turn pot. It has crowbar over voltage protection,
short circuit & thermal protection and features a pair of nice
large edgewise meters to measure output voltage and output
current. There is an internal fan. This is a very healthy, heavy
duty supply!
This particular unit works 100% and looks very close to new.
$135

Expanded Scale AC Voltmeter
This is an AC Voltmeter with an expanded scale. It reads
from 0 to 150 volts AC, but the scale is expanded so that
one can read in the 120 V area easier. The middle of the
scale is about 95 volts. It is ideal to have in line constantly,
to check your line voltage. This is a Weston Model 476,
and is about 2 1/2 inches in diameter, with 3 mounting holes.
Of course it works fine, and looks fine also. $18

Keithley 169 Lab Quality Digital Multi Meter
This is a bench type DMM, with good accuracy.
3 1/2 digit LCD display
Voltage ranges are protected to 1400 volts
Resistance ranges are protected to 300 V RMS
..... (This means you can accidentally apply up to 300 V
..... RMS when measuring resistance, and the meter
..... will survive.)
Voltage ranges from 200 mv to 1000 V
Current ranges from 100 microamps to 2 amps
Resistance ranges from 200 ohms to 20 Meg
It is in very nice condition, both electrically and cosmetically.
Manual included for $80.

Variac
General Radio Model W5MT3
This variac is designed for 115 V AC lines, and will vary
the line voltage from zero to about 120 percent of the line
voltage. It is very useful for slowly bring the line voltage
up on older rigs.
The General Radio W5MT3 is in a very nice case, with a
3 wire cord, and 3 wire receptacle. Of course it has General
Radio quality. This one is rated at 5 amps.
In checking prices of used units on the internet, they seem
to go for anywhere from $170 to $400. This one works fine,
and is in excellent cosmetic condition as well. You can have
it for $125.

Kantronics Cable
This cable is made to plug in to the 9 pin DB-9 connector
that is on the back of many of Kantronics TNCs and other digital
units (KAM, KPC-3, and others), and is made to interface it to
the radio.
It has a DB-9 connector on one end, and is in extremely good condition.

The connectors are labeled "1" and "2", with "1" having a red 3.5 mm plug, a white 3.5 mm plug, and a black 2.5 mm plug. The "2" is the same as "1" except it does not have the white 3.5 mm plug. It is $20

Phone patches or digital interfaces:

Although designed to be used as a phone patch, to connect your rig on both transmit and receive to a telephone line, these can also be used to interface your rig to a sound card. There is an internal audio transformer inside, just like on some of the "interface boxes" being sold today.

Johnson Viking Phone Patch - Model 250-46
This phone patch is made to be mounted vertically beside the rig. It is about 6 inches high, 2 inches wide and 3 inches deep. It is possible that the face plate can be removed, and it made to be mounted horizontally, but I have not done that. The reason I say this is that there are feet on the bottom, and on the left side. Maybe the feet on the left side are to protect the rig. In any case, it has 3 pots on the front for Null, Receive Volume, and transmit gain, along with a switch for phone patch or microphone. On the back is a terminal strip for speaker and phone line. The microphone input has the 2 pin Amphenol connector like used by Johnson, Heath, Hallicrafters, and many others in that era.
It works fine and looks OK also. $30

Kenwood PC-1 phone patch/digital interface
This is the model with the 4 pin connectors, although they can be changed, if needed. It includes a nice meter for adjusting the null so VOX will work OK.
This particular unit works fine, and looks very, very good. No scratches. With paperwork for $ 40

BNC to PL-259 antenna adapter
For use with any HT that has a BNC connector (such as the DJ-191 above, but many others). It will convert the BNC connector on the HT, so that you can use a normal antenna with a PL-259 connector. Like new. $5

Antenna adapter for Kenwood TH-21 / 31 / 41 HTs
This adapts the antenna connector found on these HTs to a standard BNC connector. $4

Avanti / Antenna Specialists "On Glass" antennas

These antennas were made by Avanti, and then later by Antenna Specialists, to mount on a windshield, or other

glass. They do not require a ground plane, as they are
1/2 wave antennas, rated to have 3 db gain. They are
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.

Antenna for 2 meters
This one is in extremely nice condition, with a new packet
of the special mounting glue that is furnished by Antenna
Specialists. $28

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Rubber Duck and telescoping antennas for your HT.
All are for 2 meters, are in good condition, and are $10
each, unless stated otherwise.

5/16 inch threaded, like used by Motorola and others - $10 each
Regular - 5.7 inches long
Stubby - 4 inches long

Type F connector - 6.5 inches long - $10

PL-259 connector - 6.5 inches long - $10
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long - $10
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Aftermarket stubby, 3.5 inches long - $10
Kenwood RA-6 regular, 6.6 inches long - $12

BNC stubby for 440 MHz - 3 inches long - $10

Telescoping quarter wave antenna
This antenna extends to a full 19 inches, but telescopes down
to about 4 inches. It has about 6 db gain over the typical rubber
duck antenna, and has a BNC connector. $12

Quarter wave telescoping antenna
As above, but with PL-259 connector. $12

Quarter wave telescoping antenna
As above, but with a right angle bend in it, and PL-259
connector. $15

Belt Clips for various HTs
$8 each
Motorola, with hardware
Kenwood TR-2400, with hardware

Radio Shack HTX-202/404, with hardware
Yaesu FT-209, with hardware

Wrist Straps for various HTs
$4 each
Kenwood TR-2400
Kenwood TH-21/31/41
Yaesu FT-209

Icom BP-3 battery packs
I found four of the BP-3 battery packs that are all dead.
These packs were used on the IC-2 AT, 3 AT, 4 AT,
02 AT, 03 AT, 04 AT, and maybe some others. They can
also be used on the Radio Shack HT-202 and HTX-404,
and maybe others.
All of these are dead, but if you need a battery shell, to
put a new "insert" in to, they would be ideal. $8 each

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the
Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually,
one must have the battery inside the HT, but this lets you charge
a second battery outside of the HT. The original charger is used.
It is in good shape, and works fine. $3

Santec HT Accessories For Sale:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap.
The case itself is in very nice shape. The leather
shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a
service pack. It has schematics, circuit explanations,
voltages, etc. $18

Original Kenwood Operating Manuals For Sale:

All are original operating manuals in very nice, close to new
condition, for Kenwood radios, unless stated otherwise.

Operating manual for TW-4000 dual bander $15

Operating manual for TH-41A/BT/E, TH-31A/BT, TH-21A/BT/E
HTs for 440 MHz, 220 MHz and 2 meters $10

Operating manual for TH-225, 2 meter HT - Good condition $12

Operating manual for TM-221/421 2 m mobile $15

Operating manual for TR-2200, 2 meter "portable"
This is very similar to the Drake TR-22. $15

Operating manual for TR-2400, 2 meter HT $12

Operating manual for TR-2500, 2 meter HT $14

Operating manual for TR-2600, 2 meter HT $12

Service manual for Kenwood TR-2600 HT - $10

Prices do not include shipping from Florida.

Thanks.

1887. A variety of very miscellaneous ham items FS

Yahoo group: amatuerradioswapfest
Date: 2008-07-13 17:52:57 UTC
From: Ken Simpson, W8EK
Topic: 1887 Message: 1887

A variety of very miscellaneous ham items for sale:

Amateur Radio License Plate Frames For Sale:

I have a pair of Amateur Radio License Plate Frames
available. They are black, nonmetalic. I am not sure if
they are fiberglass or plastic, but they are not metalic,
so they will not rust.
They say "Amateur Radio" across the top, with an antenna
tower in each corner, and nothing at the bottom.

These have never been used. Since our call letter plates
say "Amateur Radio" on them, these would be redundant.

$10 for the pair.

Ironworks "Connect Quick" CQ-1 Antenna Mount For Sale:

Connect Quick Antenna Mount is a mounting plate system
that provides a rapid and secure means of attaching items
such as antenna booms to masts, solar panels to posts,
sound and lighting installations, and other similarly mounted
devices. Installation and removal are accomplished in a snap!

It is designed primarily for use in emergency communications /
portable antenna systems. More details can be found at
http://www.connectquick.net/
The unit appears to be heavy aluminum and stainless steel.

This one is new, still sealed in the original packing. They are
$35 from the web site. This one is only $25.

Ameco OCM-2 Code Practice Oscillator For Sale:

This is a very nice code practice oscillator, with a fairly large
(approx 3 inch) speaker, volume control, and tone control.
It operates from a 9 volt battery. There are provisions to use
headphones. It has a metal front panel, in a bakelite box.

This particular unit is new. It came from the estate of a silent
key who had bought it in kit form, and assembled about 2/3 of
it. I finished it, tested it, and all works as it should. Of
course this means that there are no scratches on it, and it
looks just like new.

With paper work for $20.

Kenwood Microphone and Antenna Adapters For Sale:

Kenwood MJ-68 microphone connector adapter
Converts a round 6 pin Kenwood connector on the microphone, so it can be plugged into a Kenwood rig with the round 8 pin connector. Like new. $20

Antenna adapter to fit the BNC connector on an HT and provide an SO-239 connector that will permit a regular PL-259 to be attached. This can be used on any HT (not just Kenwood) that has a BNC connector on it. $5

Antenna adapter to fit the antenna connector on the Kenwood TH-21/31/41 series of HTs and provide an SO-239 connector that will permit a regular PL-259 to be attached. $5

RAM Memory for notebook computer

256 Meg, PC-2700 DDR SODIMM memory module
This is "small outline" DIMM for notebook computers, and not for desktop PCs. PC-2700 is sometimes called 333 MHz. This will fit many modern laptop computers. Please check your manual to make certain it fits yours. $20

1 GB RAM Computer Memory
Is it time for you to upgrade the memory in your computer?
This is DDR-2 RAM as used by most modern desktop computers.
It is labeled DDR-2 - 5300, which is also sometimes called 667 MHz.
It has both a Samsung and Lenovo (formerly IBM) label on it, and is in the form of a pair of 512 M sticks. 240 pin.
Like new, removed when I upgraded. $25 for the pair.

Do You have RF getting into your computer cables and messing everything up?
I have a supply of shielded hoods that can be used on DB-25 connectors to provide strain relief, but also to shield for stray RF, etc.

These fit the 25 pin connectors used on many computers for serial or parallel port connections. If you have RF getting into these lines, these hoods might help.

These hoods are brand new, still in the sealed plastic bags, complete with all of the hardware.
I have a fair supply of them. 50 cents each

LARGE Analog meters:

Weston Model 741 DC ammeter
50 ua movement with scales of 2.5, 5, and 10
This is a large, approx 4 inch meter. $15

Weston Model 741 DC ammeter
Similar to above, but 100 ua movement, with a single 0 to 100 scale. Approx 4 inch meter. $15

General Electric Edgewise DC ammeter
0-100 ma scale - Edgewise meter with scale 5+ inches
long and 1.7 inches high. White scale, w/ silver/gray mounting
This is a very nice meter that can be read across the room. $30

LabVolt AC ammeter
0-1 amp scale, 4 inch square meter, New, unused $18

LabVolt DC ammeter
0-1 amp scale, 4 inch square meter, New, unused $18

DC voltmeter has 3 scales on it - 5, 10, and 25 volts.
It says it is a Niehoff Voltmeter, Chicago, Model T-2.
It looks like 1930s vintage, and is in very nice shape. $28

Expanded Scale AC Voltmeter For Sale:
This is an AC Voltmeter with an expanded scale. It reads
from 0 to 150 volts AC, but the scale is expanded so that
one can read in the 120 V area easier. The middle of the
scale is about 95 volts. It is ideal to have in line constantly,
to check your line voltage. This is a Weston Model 476,
and is about 2 1/2 inches in diameter, with 3 mounting holes.
Of course it works fine, and looks fine also. $18

Belt Clips for various HTs
$8 each
Motorola, with hardware
Kenwood TR-2400, with hardware
Yaesu FT-209, with hardware

Wrist Straps for various HTs
$4 each
Kenwood TR-2400
Kenwood TH-21/31/41
Yaesu FT-209

Prices do not include shipping from Florida.

Thanks.

1888. FS: Box of power resistors

Yahoo group: amatuerradioswapfest
Date: 2008-07-15 21:34:14 UTC
From: Bry Carling
Topic: 1888 Message: 1888

FOR SALE: Box of mixed power resistors
Some new, some used. A good mix of DALE,
OHMITE, MALLORY, DAVOHM, SPRAGUE, IRC etc.

There must be a couple hundred resistors here, just enough
to fit handily into a Flat Rate Priority Mail box for shipping.

Examples:
1000 ohms 100 watts
250 ohms 5 watts
1 ohm 50 watts
1200 ohms 10 watts
10 ohms 10 watts
10000 ohms 10 watts
8000 ohms 5 watts
1000 ohms 10 watts
2000 ohms 20 watts
25 ohms 25 watts
2500 ohms 5 watts
1200 ohms 50 watts
7500 ohms 10 watts
56 ohms 10 watts
2000 ohms 10 watts
150 ohms 10 watts

Many many more. I am not going to count all of these but there
is a lot!

Will sell the boxful for $22.00 plus shipping.

1889. FS: Some more power resistors

Yahoo group: amatuerradioswapfest
Date: 2008-07-16 12:17:45 UTC
From: Bry Carling
Topic: 1889 Message: 1889

FOR SALE: Power Resistors

All new or in excellent shape:

I have one or two of each of these...

4 ohms 20 watts - $5.00
4 ohms 50 watts - $6.00
7.5 ohms 50 watts - $8.00
50 ohms 50 watts - $4.00
50 ohms 75 watts - $6.00
56 ohms 75 watts - $6.00
75 Ohms 100 watts - $8.00
500 ohms 75 watts - $6.00
500 ohms 100 watts - $8.00
510 ohms 53 watts - $5.00
600 ohms 60 watts - $8.00
11K - 68 watts - $6.00
12K - 30watts - $4.00
12K - 55 watts - $5.00
12K - 68 watts - $6.00
12K - 75 watts - $6.00
12.5K - 25 watts - $4.00
14K - 50 watts - $5.00
16K - 50 watts - $5.00
24K - 78 Watts - $6.00
25k - 50 watts - $6.00
25K - 100 Watts - $8.00
25K - 110 Watts - $8.00
26K - 70 watt - $6.00

Shipping additional.

FOR SALE:

MFJ SW/MW/LW ANTENNA TUNER - MODEL MFJ-956
150 kHz to 30 MHz. Comes with the manual copy.
Available for $65.00 plus shipping.
Picture and details at:
http://www.af4k.com/radios.htm

JAN 1AD4 PENCIL TUBES - New in Boxes.
Data sheets available - pentode types.
QTY 2 available for $5.00 each plus shipping.

Dipole Center Insulator - white ceramic
Birnbach. Number 458 - 4.5" long.
QTY 1 Available for $5.00 plus shipping.

45 second Delay Relay Octal, NOS.
Normally open contacts, by Edison. New in Box.
Qty 1 Available for $9.00 plus shipping.

Dual 500 PF VARIABLE CAPACITOR new in box, with
knob. Excellent - Qty 2 Available for $9.00 each

455 kHz crystals, HC6/U wire leads, new - $16.00
each.

Knob with Dial Skirt - military with 0-100 scale.
2" diameter with the skirt...
Qty 1 Available for $5.00

5 watt RF Dummy Load built into a PL-259 plug.
Qty 1 Available for $4.00

3700 uF at 200V DC Computer Grade Capacitor.
With screw terminals... Qty 1 Available for $5.00

CS-137 MILITARY CRYSTAL CASE for 120 FT243
CRYSTALS - $35.00 each.

Waxed Lacing Cord - large spool, new, 300 yards
for $15.00

3-way Adapter for 12V Outlets for cigarette
lighter, like new - $3.00

NEW CRYSTAL OVENS by REL. Hold QTY 3 HC6U
Crystals.
6.3V heater - QTY 10 available for $8.00 each.

QTY of 20 FT241 Crystals on random LF Frequencies
for $9.00 plus shipping.

LOAD RESISTORS for testing audio amplifiers.
Heavy Duty 3 ohms 500 watts.
QTY 2 available for $19.00 each plus shipping.

PICTURES and DETAILS for ALL ABOVE ITEMS at:

1892. Extensive list of HT and HT accessories FS

Yahoo group: amatuerradioswapfest
Date: 2008-07-25 23:39:53 UTC
From: Ken Simpson, W8EK
Topic: 1892 Message: 1892

Extensive list of HT and HT related accessories For Sale:

I know this is a long list; I have tried to group similar items
together.

Alinco DJ-191, 2 meter HT
This unit has about everything except the kitchen sink in it. It
has a very large, readable LCD display that I can read without
my glasses! It has about 7 watts max output, and the receiver
is great. It covers from 136 to 174 MHz, so it covers all of the
weather and VHF public service frequencies. Of course it has
memories and all sorts of scan features. Touchtones (DTMF)
and PL (subaudible) tones are included.
This unit works 100% and looks extremely nice. It includes
a good battery pack, belt clip, rubber duck, and paper work
for $100.

Radio Shack 19-300 Battery pack for HT-202 and HTX-404
This is a good battery pack for the Realistic HTs. It also fits
some of the Icom HTs such as the IC-2 AT, IC-02 AT,
IC-4 AT, etc.
This is the 7.2 volt, 600 ma hour NiCad pack.
It works fine and looks great. $25

Icom BP-3 battery packs
I found four of the BP-3 battery packs that are all dead.
These packs were used on the IC-2 AT, 3 AT, 4 AT,
02 AT, 03 AT, 04 AT, and maybe some others. They can
also be used on the Radio Shack HT-202 and HTX-404,
and maybe others.
All of these are dead, but if you need a battery shell, to
put a new "insert" in to, it would be ideal. $8 each

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HTs. $18

Hustler SF-2 antenna for 2 meters
This is a 5/8 wave antenna with about 3 db gain over a
quarter wave antenna. It is about 4 feet long, and is made
to screw into a standard 3/8 inch 24 thread mount.
It works fine and looks fine. $15

Hustler RSS-2 stainless steel resonator spring
Recommended by Hustler to go at the top of the masts
used with HF resonators, and below the resonator, to
prevent breakage, in case the resonator hits a tree limb.
This one looks very close to new. $10

Larsen VHF and UHF Mobile Antennas:

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 m; includes whip. $16
As above, but without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on the
70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
Can be cut for 2 m, 220 MHz, or 440 MHz. $7

Larsen Q
Fits a 5/16 inch stud, such as the Larsen LM mount, and others.
It can be cut for 2 meters, 220 MHz, or 450 MHz bands. $6

Larsen NMO-Q
Precut for 450 MHz. New, still in bag. $8

Larsen OM-450 coil, mount, and whip for 440 MHz
Made to mount on a flat surface
Includes "stacked" whip for 5 db gain on 450 MHz. $18

Avanti / Antenna Specialists "On Glass" antennas:

These antennas were made by Avanti, and then later by
Antenna Specialists, to mount on a windshield, or other
glass. They do not require a ground plane, as they are
1/2 wave antennas, rated to have 3 db gain. They are
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.

Antenna for 2 meters
This one is in extremely nice condition, with a new packet
of the special mounting glue that is furnished by Antenna
Specialists. $28

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Rubber Duck and telescoping antennas for your HT.
All are for 2 meters, are in good condition, and are $10
each, unless stated otherwise.

5/16 inch threaded, like used by Motorola and others - $10 each
Regular - 5.7 inches long
Stubby - 4 inches long

Type F connector - 6.5 inches long - $10

PL-259 connector - 6.5 inches long - $10
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long - $10
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Aftermarket stubby, 3.5 inches long - $10
Kenwood RA-6 regular, 6.6 inches long - $12

Telescoping quarter wave antenna
This antenna extends to a full 19 inches, but telescopes down
to about 4 inches. It has about 6 db gain over the typical rubber
duck antenna, and has a PL-259 connector. $12

Quarter wave telescoping antenna
As above, but with a right angle bend in it, and PL-259
connector. $15

Belt Clips for various HTs
$8 each
Motorola, with hardware
Kenwood TR-2400, with hardware
Yaesu FT-209, with hardware

Wrist Straps for various HTs
$4 each
Kenwood TR-2400
Kenwood TH-21/31/41
Yaesu FT-209

Santec HT Accessories For Sale:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap.
The case itself is in very nice shape. The leather
shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a
service pack. It has schematics, circuit explanations,
voltages, etc. $18

Kantronics Cable
This cable is made to plug in to the 9 pin DB-9 connector
that is on the back of many of Kantronics TNCs and other digital
units (KAM, KPC-3, and others), and is made to interface it to
the radio.
It has a DB-9 connector on one end, and is in extremely good condition.
The connectors are labeled "1" and "2", with "1" having a red 3.5

mm plug, a white 3.5 mm plug, and a black 2.5 mm plug. The "2" is the same as "1" except it does not have the white 3.5 mm plug. It is $20

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually, one must have the battery inside the HT, but this lets you charge a second battery outside of the HT. The original charger is used. It is in good shape, and works fine. $3

BNC to PL-259 antenna adapter
For use with any HT that has a BNC connector (such as the DJ-191 above, but many others). It will convert the BNC connector on the HT, so that you can use a normal antenna with a PL-259 connector. Like new. $5

Antenna adapter for Kenwood TH-21 / 31 / 41 HTs
This adapts the antenna connector found on these HTs to a standard BNC connector. $4

Coax connectors and adapters:
Prices are per connector. Several of each are available. These are NOS (have not been used).

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male (PL-259) connection - $5

Original Kenwood Operating Manuals For Sale:

All are original operating manuals in very nice, close to new condition, for Kenwood radios, unless stated otherwise.

Operating manual for TH-41A/BT/E, TH-31A/BT, TH-21A/BT/E
HTs for 440 MHz, 220 MHz and 2 meters $10

Operating manual for TH-225, 2 meter HT - Good condition $12

Operating manual for TM-221/421 2 m mobile $15

Operating manual for TR-2200, 2 meter "portable"
This is very similar to the Drake TR-22. $15

Operating manual for TR-2400, 2 meter HT $12

Operating manual for TR-2500, 2 meter HT $14

Operating manual for TR-2600, 2 meter HT $12

Service manual for Kenwood TR-2600 HT - $10

Operating manual for TW-4000 dual bander $15

Heavy duty power supply
Pyramid PS-35
This supply is good for 32 Amps Constant or 35 Amps Surge.
The output voltage is adjustable over a 12 to 15 volt range
with a multi turn pot. It has crowbar over voltage protection,
short circuit & thermal protection and features a pair of nice
large edgewise meters to measure output voltage and output
current. There is an internal fan. This is a very healthy, heavy
duty supply!
This particular unit works 100% and looks very close to new.
$135

Prices do not include shipping from Florida.

Thanks.

1894. Antenna tuner and other HF related items FS

Yahoo group: amatuerradioswapfest
Date: 2008-08-03 22:22:43 UTC
From: Ken Simpson, W8EK
Topic: 1894 Message: 1894

Antenna tuner and other HF related items For Sale:

I know this is a long list; I have tried to group similar items
together.

Antenna tuner For Sale:

MFJ 941 E antenna tuner for 160 thru 10 meters

This is the latest "E" version of this popular tuner.

This tuner has a "cross needle" SWR bridge built into it,
so you can read both forward power and SWR at the
same time. The meter has a back light, assuming 12
Volts is applied to the tuner. The wattmeter portion will
read either 30 W or 300 W full scale.

An antenna switch will switch between either balanced line,
two coax antennas, or a dummy load. Antennas can be
operated thru the tuner, or the tuner can be bypassed.

This tuner will operate on 160 thru 10 meters, including the
WARC bands.

This particular unit works 100%. It looks very close to new.
Almost like it just came out of its box; maybe that is because
it is still in its original box.

Manual is included for $100

Band Modules for TenTec 555 Scout HF transceiver
These also work in the 556 Argo QRP rig.
I have a band module for 10 meters - 28 to 29 MHz.
It works fine. With paper work for $65.

TenTec 296 mobile mount for 555 Scout HF transceiver
Nice clam shell type of mount in very good condition.
With paper work for $30.

TenTec 306 power adapter
The 555 Scout and several other TenTec rigs take a 2
pin power connector. Most of the TenTec power supplies
have a 4 pin plug with larger conductors. This adapter
adapts the 4 pin power connector, so it can be used on
a radio with the 2 pin power plug. Like new, with paper
work (all half page of it!). $10

HF wattmeter / SWR Bridge:

Micronta 21-520 A, HF wattmeter with two large meters
This is an HF wattmeter that covers from 3 to 30 MHz, with
full scale power readings of 10, 100, and 1000 watts.
Two LARGE meters -- one reads forward power and one
reads reflected power -- both at the same time. This gives
the same info as some of the cross needle meters, but many
people find it is easier to read.
It has a remote sensor, with about 3 feet of cable to connect
to the meter itself.
This particular meter works fine, and looks like new. It is
still in its original box. $55

Headphones:

Generic headphones
Similar to the Kenwood HS-5 headphones, but with plastic
ear pads. "Made in USA" stamped on them.
With 1/4 inch mono plug, and about 5 foot cord.
Nice shape. $25.

Single headphone
Keep one ear clear, so you can hear what is going on
in the room! With 1/8 inch mono plug; 32 ohm impedance.
Good condition. $20

Generic headset
Smaller ear pieces than those above. These are just over
an inch in diameter, so they do not completely cover your ear.
With 1/4 inch mono plug; 16 ohm impedance.
Good condition. $18

Vibroplex "Brass Racer Iambic" CW Paddle
The Brass Racer Iambic is unique in that there are no
springs in the design. Tension on the paddle is infinitely
adjustable through the use of magnets. The Brass Racer
Iambic is a convenient, keyer paddle unit crafted from
solid brass with a lacquer coated brushed finish
mounted on a hardwood base.
This one works great, is in very nice condition, and
includes cord and paper work for $110.

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo
connector on the end, like used by most rigs. It looks
great. $8

As above, but 1/8 inch plug. $8

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch
phone plug on it, as is used with a straight key. $5

As above, but 1/8 inch plug. $5

Microphones:

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic
mic is needed. Stripped and tinned leads.
It works fine, and looks good also. $25

Touch tone (DTMF) microphones:

Kenwood MC-45 DM, DTMF mic plus other functions
In addition to the touch tone pad and PTT switch, this mic
has up-down switches, plus a row of four switches above
the touch tone pad. They are used for "Call Button", VFO
key, Memory recall key, and the fourth one is programmable.
The back has a lock switch. It has an RJ-45 connector (like
a computer LAN).
This particular mic works fine, and looks fine also. It is still
in its original box, with paper work for only $60.

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, along with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
Paper work included for $40.

Drake 1525 EM Touchtone Microphone
This is the mic that was used to add a touchtone pad to
a lot of rigs in the 70s and 80s. Normal hand mic from
the front, but has a touchtone pad on the back. Four
pin mic plug. This particular unit has been used, but is
in good shape and includes paper work. $ 38

KDK Model TM-2
With touch tone pad and up-down switches. It presently
has a 6 pin connector for the KDK 2030, but that can
be changed. Nice condition. $40

CES "Micropad" touch tone mic
No model number on it, but it has a 12 digit pad on the
back. Low Z mic element with round 8 pin connector
wired for Kenwood. $38

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $38

Icom HM-8 hand mic with Touch Tone (DTMF) Pad
This mic is being sold for parts only. The dynamic element in it is open. A part of the plastic holding the PTT button does not seem quite right, but the actual touch tone pad and electronics is OK. So if you have an HM-8 with bad electronics or actual touch tone pad, this unit will get you up and going again. Actually, the unit probably can be repaired and used. $10

Kenwood MJ-68 microphone connector adapter
Converts a round 6 pin Kenwood mic connector, so it can be plugged into a Kenwood rig with the round 8 pin connector. Like new. $20

Hamstick HF mobile antenna for 20 meters

This is the original honest to goodness Hamstick, made by Lakeview, and are not one of the clones.

This antenna, when fully assembled and tuned, is about 7 feet long, in a slim design that does not catch much wind. Each has a 3/8 inch, 24 thread stud on the base, so it fits a standard ball mount.

This antennas is new, still in their original package, unused. $27

Hustler RSS-2, Stainless steel resonator spring $10

Phone patches or digital interfaces:

Although designed to be used as a phone patch, to connect your rig on both transmit and receive to a telephone line, these can also be used to interface your rig to a sound card. There is an internal audio transformer inside, just like on some of the "interface boxes" being sold today.

Kenwood PC-1 phone patch/digital interface
This is the model with the 4 pin connectors, although they can be changed, if needed. It includes a nice meter for adjusting the null so VOX will work OK.
This particular unit works fine, and looks very, very good. No scratches. With paperwork for $ 40

LARGE Analog meters

Weston Model 741 DC ammeter
50 ua movement with scales of 2.5, 5, and 10
This is a large, approx 4 inch meter. $15

General Electric Edgewise DC ammeter
0-100 ma scale - Edgewise meter with scale 5+ inches long and 1.7 inches high. White scale, w/ silver/gray mounting

This is a very nice meter that can be read across the room. $30

LabVolt AC ammeter
0-1 amp scale, 4 inch square meter, New, unused $18

LabVolt DC ammeter
0-1 amp scale, 4 inch square meter, New, unused $18

DC voltmeter has 3 scales on it - 5, 10, and 25 volts.
It says it is a Niehoff Voltmeter, Chicago, Model T-2.
It looks like 1930s vintage, and is in very nice shape. $28

Coax connectors and adapters:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Prices do not include shipping from Florida.

Thanks.

FOR SALE - RADIO PARTS:

QTY 4 - 455 kHz filters with 8 kHz BW - small ceramic
filters suitable for solid state work. $6.00 for all four.

QTY 4 - 400V 220 uF at 400v DC. Electrolytic capacitors,
New 105 degree radial types. Put them in seriies for
55 uF at 1600v DC. $12.00 for all four.

QTY 1 CRYSTAL - Tall HC6U type (HC13) on 153.6 kHz
Great for LF experiments - QTY 1 for $10.00

QTY 4 - Large Toroid Ferrite Donuts - Each is 2-3/8" O.D.
and 1-3/8" I.D. - QTy 4 for $6.00 plus shipping.

QTY 2 - Crystal Oscillator on 32.000 Mhz in 4-pin DIP
package. Qty 2 for $4.00 total.

QTY 1 - 24K at 72 watts - $6.00
QTY 1 - 25K at 50 watts - $5.00
QTY 3 - 50K at 50 watts - $5.00 each

MILITARY CS-137 CRYSTAL CASE - holds QTY 120
type FT243 crystals (not included) - $35.00

QTY 1 - DELAY RELAY - OCTAL 115V AC - 45 seconds,
N.O. Contacts - New In Box - $10.00

SHIPPING ADDITIONAL WITH ALL OF THE ABOVE ITEMS.

FOR SALE: NATIONAL NCX3 Transceiver.

This is the nicest one I have seen in years.

Complete coverage of the 80, 40 and 20 phone and CW bands.
National NCX-3 Transceiver:
Complete coverage of the 80, 40 and 20 phone and CW bands.
RF Power Out: SSB 120 Watts PEP, CW 120 Watts, AM 30 Watts.
2.5 KHz Filter, VOX/PTT, SSB/CW AGC, 3480 to 4020 KHz, 6980
to 7310 KHz,
13880 to 14420 KHz
All desirable operating features including built-in VOX/PTT,
SSB/CW AGC, AM detection
in the AM mode, and break-in CW with adjustable release time.

Variable pi-network final amplifier uses parallel 6GJ5 pentodes for
conservative
200 watts PEP on SSB, 200 watts DC input on CW and 100 watts
input on AM.

High frequency 2.5 kc crystal lattice filter for both transmit and
receive, with
RCA 7360 balanced modulator provides 50 db carrier suppression
and 40 db unwanted sideband suppression.

National "high-zero" VFO for maximum mechanical and electrical
stability provide
simultaneous transmit and receive frequency adjustment.

Combination illuminated meter automatically switches between
signal strength and PA cathode current.

Extruded aluminum front panel for maximum stability, anodized
instead of painted for resistance to wear and scratches.

External relay control for use with high power linear amplifier.

Full Specifications here:
http://www.io.com/~nielw/nat_list/ncx3.htm

NCX3 Transceiver available for $250.00 plus shipping..

1897. FS: Drake 2A receiver

Yahoo group: amatuerradioswapfest
Date: 2008-08-09 22:58:36 UTC
From: Bry Carling
Topic: 1897 Message: 1897

FOR SALE: Drake 2A Receiver with the Drake 100 kHz calibrator.

This good working Drake 2A receives AM, USB, LSB (SSB) and CW signals. It is set up for the 80-10m ham bands but could easily be crystaled up for the shortwave bands as well. The unit can also be crystaled to support any of WARC bands or expanded 10 meter coverage in 500 khz increments. This rig was affectionately known as 'The Poor Man's Collins' and/or 'Black Box'. VERY similar to the Drake 2B.

Has many extra features, BFO, AGC, CAL, NB, etc. The Drake 2A is an analog tube receiver covering: 3.5-4.1, 6.9-7.5, 13.9-14.5, 20.9-21.5 and 28.5-29.1 MHz bands plus seven additional empty ranges. The bandwidth values are: 4.8, 2.4 kHz - 6dB. Features include: ¼ inch Headphone Jack, S-Meter, RF Gain, AVC SLOW/FAST, Preselector, Mute Line, Sidetone Jack, Speaker Terminals, BFO, Dial Set, Diode/Product Detector, Dial Lamp, NL and Socket for optional Q-Multiplier. This radio requires a speaker. Has a power cord that is in excellent shape. Measurements of the unit are 12" wide x 7" high x 9" deep.

Runs on 120 VAC 60 Hz 40 watts.

Available for $200.00 plus shipping.

Pictures available on request.

1898. CW items FS - Keys, etc.

Yahoo group: amatuerradioswapfest
Date: 2008-08-17 12:57:27 UTC
From: Ken Simpson, W8EK
Topic: 1898 Message: 1898

CW Items For Sale:

I have two extremely nice CW straight keys available. Both
are made by Nye-Viking. You can see pictures by going to
http://www.nyeviking.com/productsaccess.htm

One is the Nye Viking "Master Key" Model 330-001 CW Straight Key

From their web page:
The perfect straight key. Complete with cord and plug --
ready to use! Isolated contact assembly separates keying
circuit from hardware. Includes gold-plated copper contacts,
adjustable key arm, Navy knob and heavy die-cast base.

This is a top of the line straight key. These are about $85 new.
This one works like new, and looks like new. It is only $55.

The other is The Classic Oval Speed-X Key, Model 310-001.
This Speed-X key has a crinkle-finish black oval base and
elegant hardware. The key action is fully adjustable, with nickel
hardware. This one is in very nice shape and works great. $35

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo
connector on the end, like used by most rigs. It looks
great. $8
As above, but 1/8 inch plug. $8

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch
phone plug on it, as is used with a straight key. $5
As above, but 1/8 inch plug. $5

CW Related books:

ARRL "Learning the Radiotelegraph Code"
1970 - 13th edition
This is the older black and red colored ARRL book,
designed to help one learn the code. This particular one is
in very nice shape. $7

Ameco Code Course
This book looks like it might be made to go with the Ameco
Code records. There is general information about the code,
but portions of the book list what is being sent by the code
records. There is also a diagram about how to make a code
practice oscillator from a 50C5 and 35W4. There is no date

or edition on it, but the tube type CPO somewhat dates it! $5

ARRL Code Kit - 1976
This is the booklet only, that originally went with a kit of cassette tapes. This has the info that is contained on the tapes listed in it. If you have the tapes, and need the booklet to go with it, this is for you. If you just want to read about it, is great also. $2

The ARRL Training Program - Official Novice Student Workbook
No date or edition, but it is designed for a 10 week course, leading to a novice license. $3

Radio Shack "From 5 watts to 1000 watts" 1974
Designed to take a CBer to a novice license, in a spiral bound book. It includes theory and learning the code. $4

ARRL "Operating an Amateur Radio Station"
1976 - 57th edition $3
1983 - 61st edition $3
1984 - 62nd edition $3

ARRL "Public Service Communications Manual"
1985 - 9th edition - $3
No date listed, but appears to be about 1990-1992 $3

RSGB "Amateur Radio Operating Manual"
1982 - 2nd edition $8
1991 - 3rd edition - like new $10

ARRL "Radio Amateurs Operating Manual"
1985 - 2nd edition $8
2000 - 7th edition - Inch thick with "Ham Desktop Reference" included - Like New - $18

Prices do not include shipping from Florida.

Thanks.

1904. FOR SALE: Hallicrafters HA-1 "TO" Keyer in excellent condition.

Yahoo group: amatuerradioswapfest
Date: 2008-08-29 10:57:07 UTC
From: Bry Carling
Topic: 1904 Message: 1904

FOR SALE: Hallicrafters HA-1 "TO" Keyer in excellent condition.

Excellent for cathode-keying older rigs, or for homebrew stations.
I would say that this is a 9.5 out of 10. All original knobs.
Cabinet is immaculate. Works fine.
Interior looks like new above and below chassis.
Operates on 105 to 125V AC. 10-65 wpm. Adjustable sidetone
and internal speaker for monitoring your sending.

Uses six tubes. The Hallicrafters HA-1 "TO Keyer" - will work
just great with those older rigs that need direct cathode keying.
Most of today's solid state keyers will not do the job.
The Hallicrafters TO-Keyer was the first commerial digital
keyer to be widely marketed. The TO has self-completing dits
and dahs, adjustable weighting and speed controls and
a monitor speaker. The TO-Keyer was manufactured in
the early 1960s.

This one is in mint condition and comes with cables and
a copy of the manual.

Picture and details at:
http://www.af4k.com/radios.htm#tokeyer

Will sell for $85.00 plus shipping.

From: Ken Simpson, W8EK
Topic: 1806 Message: 1906

Two meter FM Transceiver For Sale:

KDK FM-2033 mobile FM transceiver for 2 meters

This rig produces just over 25 Watts in high power and
about 7 watts in low power. The rig is fully synthesized,
has memories, scan, subaudible PL tone, and all the
things that one expects in a 2 meter rig. It has a touchtone
microphone with it. It sounds great, and hears well.
It needs 13 V DC at about 7 amps.

This particular rig is in very nice condition. There is one
paint spot missing, about the size of a pin head. It includes
the touchtone microphone, mobile mounting bracket, power
cord, and paper work. The original box is also included,
although the box looks much worse than the radio. Even
the mic clip, and a bag of screws are included, as is the
original multicolored sales brochure.

$90 plus shipping from Florida.

Thanks.

FOR SALE: CONAR 400 TRANSMITTER

Here is a near mint CONAR 400 transmitter from National Radio Institute.

The Conar 400 covers 80/40/15 meters. This fun, novice CW transmitter has 25 watts input.

It is crystal controlled. One crystal comes with the transmitter.

All original knobs, clean cabinet and front panel and I see no modifications.

Has a built in power supply for 120V AC operation. Everything including the cabinet is in beautiful shape. Schematic included.

This Collector Quality CONAR 400 is available for $225.00 plus shipping.

Picture and details at:
http://www.af4k.com/radios.htm#conar400

1915. REDUCED: EXC. National NCX3 Transceiver

Yahoo group: amatuerradioswapfest
Date: 2008-09-24 17:19:10 UTC
From: Bry Carling
Topic: 1915 Message: 1915

FOR SALE:

Excellent National NCX-3 Transceiver. Collector Quality.
No power supply...

Complete coverage of the 80, 40 and 20 phone and CW bands.

RF Power Out: SSB 120 Watts PEP, CW 120 Watts, AM 30 Watts.

2.5 KHz Filter, VOX/PTT, SSB/CW AGC, 3480 to 4020 KHz, 6980 to 7310 KHz and 13880 to 14420 KHz

All desirable operating features including built-in VOX/PTT, SSB/CW AGC, AM detection
in the AM mode, and break-in CW with adjustable release time.

Variable pi-network final amplifier uses parallel 6GJ5 pentodes for conservative
200 watts PEP on SSB, 200 watts DC input on CW and 100 watts input on AM.

High frequency 2.5 kc crystal lattice filter for both transmit and receive, with
RCA 7360 balanced modulator provides 50 db carrier suppression and 40 db unwanted sideband suppression.

National "high-zero" VFO for maximum mechanical and electrical stability provide
simultaneous transmit and receive frequency adjustment.

External relay control for use with high power linear amplifier.

Full Specifications here:
http://www.io.com/~nielw/nat_list/ncx3.htm
A manual is included.

The NCX3 Transceiver is available for $155.00 plus shipping.

Picture and details at:

http://www.af4k.com/radios.htm

From: Ken Simpson, W8EK
Topic: 1918 Message: 1918

meter FM transceiver, plus many accessories For Sale:

Two meter FM Transceiver:

KDK FM-2033 mobile FM transceiver for 2 meters

This rig produces just over 25 Watts in high power and
about 7 watts in low power. The rig is fully synthesized,
has memories, scan, subaudible PL tone, and all the
things that one expects in a 2 meter rig. It has a touchtone
microphone with it. It sounds great, and hears well.
It needs 13 V DC at about 7 amps.

This particular rig is in very nice condition. There is one
paint spot missing, about the size of a pin head. It includes
the touchtone microphone, mobile mounting bracket, power
cord, and paper work. The original box is also included,
although the box looks much worse than the radio. Even
the mic clip, and a bag of screws are included, as is the
original multicolored sales brochure. $90

Accessory items for sale:

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.

Similar to the HM-102, but for VHF frequencies, with
250 and 25 watt scales. It can also be used to check
SWR, and has a remote sensor that can either be left
inside the meter, or separated from the actual meter
by about 3 feet. SO-239 connectors in and out. This
particular meter works great, looks fine and includes
paper work for $ 40.

Kenwood PG-3 E Cord
This cord plugs into the cigarette lighter to provide 12 V DC to the
TH-215, TH-225, TH-415, and other Kenwood HTs. It has a filter
built in, and permits high power operation of the HTs. $20

Kenwood SMC-30 Speaker Microphone
Fits TH-21, TH-41, TH-215, TH-225, TH-415, TR-2600, and many
other Kenwood HTs. It has 3.5 mm and 2.5 mm plugs molded
together. It works fine, and is in good condition. $25

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HTs and maybe others. $18

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the

Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually, one must have the battery inside the HT, but this lets you charge a second battery outside of the HT. The original charger is used. It is in good shape, and works fine. $3

Belt Clips for various HTs
$8 each
Motorola, with hardware
Kenwood TR-2400, with hardware
Yaesu FT-209, with hardware

Wrist Straps for various HTs
$4 each
Kenwood TR-2400
Kenwood TH-21/31/41
Yaesu FT-209

Santec HT Accessories:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200, ST-142, ST-144, ST-440, etc. The real leather case includes a built in belt clip, plus a removable leather shoulder strap.
The case itself is in very nice shape. The leather shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a service pack. It has schematics, circuit explanations, voltages, etc. $18

Heavy duty power supply
Pyramid PS-35
This supply is good for 32 Amps Constant or 35 Amps Surge. The output voltage is adjustable over a 12 to 15 volt range with a multi turn pot. It has crowbar over voltage protection, short circuit & thermal protection and features a pair of nice large edgewise meters to measure output voltage and output current. There is an internal fan. This is a very healthy, heavy duty supply!
This particular unit works 100% and looks very close to new.
$125

Rubber Duck and telescoping antennas for your HT.
All are for 2 meters, have been used, but are in good condition, and are $10 each, unless stated otherwise.

5/16 inch threaded, like used by Motorola and others - $10 each
Regular - 5.7 inches long
Stubby - 4 inches long

Type F connector - 6.5 inches long - $10

PL-259 connector - 6.5 inches long - $10
HyGain 275, still in original package from when I bought it
20 or 25 years ago

PL-259 connector - Stubby - 4.6 inches long - $10
Centurion, still in original package from when I bought it
20 or 25 years ago

Special for Kenwood TH-21 HT threaded connector
Aftermarket stubby, 3.5 inches long - $10
Kenwood RA-6 regular, 6.6 inches long - $10

Larsen VHF and UHF Mobile Antennas:

These antennas are used, but are in very good condition.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 m; includes whip. $16
As above, but without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on the
70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
Can be cut for 2 m, 220 MHz, or 440 MHz. $7

Larsen Q
Fits a 5/16 inch stud, such as the Larsen LM mount, and others.
It can be cut for 2 meters, 220 MHz, or 450 MHz bands. $6

Larsen NMO-Q
Precut for 450 MHz. New, still in bag. $8

Larsen OM-450 coil, mount, and whip for 440 MHz
Made to mount on a flat surface
Includes "stacked" whip for 5 db gain on 450 MHz. $18

Avanti / Antenna Specialists "On Glass" antennas:

These antennas were made by Avanti, and then later by
Antenna Specialists, to mount on a windshield, or other
glass. They do not require a ground plane, as they are
1/2 wave antennas, rated to have 3 db gain. They are
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.

Antenna for 2 meters
This one is in extremely nice condition, with a new packet
of the special mounting glue that is furnished by Antenna

Specialists. $28

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Kantronics Cable
This cable is made to plug in to the 9 pin DB-9 connector
that is on the back of many of Kantronics TNCs and other digital
units (KAM, KPC-3, and others), and is made to interface it to
the radio.
It has a DB-9 connector on one end, and is in extremely good condition.
The connectors are labeled "1" and "2", with "1" having a red 3.5
mm plug, a white 3.5 mm plug, and a black 2.5 mm plug. The "2"
is the same as "1" except it does not have the white 3.5 mm plug.
It is $20

"Dead" Icom Battery Pack:
Icom BP-3 battery pack
I found a BP-3 battery pack that is dead. This pack is used on
the IC-2 AT, 3 AT, 4 AT, 02 AT, 03 AT, 04 AT, and some others.
It will also fit some of the Radio Shack / Realistic HTs such as
the HTX-202 and HTX-404.
This one is dead, but if you need a battery shell, to put a new
"insert" in to, or for some project, it would be ideal. Adding one
of the newer high capacity inserts will give you a very inexpensive
new battery, or build a regulator in for use from 12 V DC. $8

BNC to PL-259 antenna adapter
For use with any HT that has a BNC connector. It will
convert the BNC connector on the HT, so that you can use
a normal antenna with a PL-259 connector. Like new. $5

Antenna adapter for Kenwood TH-21 / 31 / 41 HTs
This adapts the antenna connector found on these HTs to a
standard BNC connector. $4

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Original Kenwood Operating Manuals For Sale:

All are original operating manuals in very nice, close to new
condition, for Kenwood radios, unless stated otherwise.

Operating manual for TH-41A/BT/E, TH-31A/BT, TH-21A/BT/E
HTs for 440 MHz, 220 MHz and 2 meters $10

Operating manual for TH-225, 2 meter HT - Good condition $12

Operating manual for TM-221/421 2 m mobile $15

Operating manual for TR-2200, 2 meter "portable"
This is very similar to the Drake TR-22. $15

Operating manual for TR-2400, 2 meter HT $12

Operating manual for TR-2500, 2 meter HT $14

Operating manual for TR-2600, 2 meter HT $12

Service manual for Kenwood TR-2600 HT - $10

Operating manual for TW-4000 dual bander $15

Service manual for TW-4000 dual bander $20

Prices do not include shipping from Florida.

Thanks.

1924. Icom HT and other Icom items FS

Yahoo group: amatuerradioswapfest
Date: 2008-10-16 15:15:38 UTC
From: Ken Simpson, W8EK
Topic: 1924 Message: 1924

Icom items For Sale:

Icom IC-04 HT for 440 MHz
This is the 440 MHz version of the popular IC-02 AT. It has about 7 watts out if used with the larger battery pack, or powered from 12 V DC. About 5 Watts with the standard battery pack, or about 1 watt in low power.

Of course it has memories, scan features, and the things one normally expects in an HT. The keyboard functions as a DTMF pad, and it has adjustable PL (subaudible) tones in it as well.

This particular unit works 100% and looks very good. There is some slight wear, but it is minor.

Rubber duck antenna, belt clip, and paper work are included for $75.

Icom BC-35 desk charger
The BC-35 will fast charge the BP-2, BP-5, BP-7, and BP-8 battery packs. It will also charge the BP-3 and BP-4, but these take 12 to 15 hours. It works 100% and looks fine as well. $35

Icom BP-7 battery pack
This pack can be used on the Icom IC-02 AT, IC-03 AT, IC-04 AT, and other Icom HTs.
It can also be used on the Radio Shack HTX-202 and HTX-404, and maybe others.
This is a 13 V DC at 450 mahr battery pack.
It holds a charge and looks fine. With paper work for $25.

Icom HM-8 touch tone DTMF Microphone
This mic has a touch tone pad on it, with a switch to turn the pad on or off. There is also a preamp built in to the mic, so that it can be used with the Icom 25A , 245, 290, 402, 202S, 451, 471A and maybe others. It has a round 8 pin connector on it. Paper work is included for $45.

Icom HM-12 hand mic with up/down switches
This electret mic is used with most of the modern Icom rigs that use a round 8 pin mic plug, including the Icom 25A, 28H, 38, 45A, 48, 77, 78, 120, 229H, 271, 275, 290, 375, 451, 471/A, 475, 505, 575, 707, 718, 725, 728, 729, 735, 736, 737/A, 745, 746, 751/A, 756/PRO, 761, 765, 775, 781, 820H, 821H, 900, 901, 970, 1201, 1271, 1275, 2400, 3200, 3210

and maybe others. It has an up and a down switch for changing
frequencies, changing memories, etc.
This one works 100% and looks like new. It has lived most of
its life in a drawer!
With paper work for $40.

Icom HM-56 A, DTMF touchtone microphone w/up-down sw
This electret mic has a 16 digit DTMF touchtone pad on it
along with other special buttons. It also has 14 memories
included in it for remembering phone numbers to dial. It works
with the Icom 28, 38, 228, 229, 449, 901, 1201, 2330, 2400,
2410, 2500 and others. This mic also has an up and a down
switch on it. Basically, it is like an HM-12, but with DTMF pad
and memories added. These are about $170 new, so that
gives some idea of its sophistication!
This one is still in its box, with paper work. I do not think it
has ever been used. $95

Prices do not include shipping from Florida.

Thanks.

1927. THREE General Radio VARIACS $16.67 each.

Yahoo group: amatuerradioswapfest
Date: 2008-10-18 21:04:05 UTC
From: Bry Carling
Topic: 1927 Message: 1927

YUP - THREE General Radio VARIACS currently at $16.67 each...

It's a challenge keeping up with which groups welcome auction notices and which ones don't, so if moderators don't want these posted, please let me know.

I have three genuine VARIAC variable tranformers literally being offered at $50 for all three - no catch - a bargain for someone if there aren't many bidders. (So far none has bid!)

These are standard 120V AC 60 Hz units rated for 5 Amps.

1930. FA: TUBE SOCKET INLINE ADAPTOR TESTERS

Yahoo group: amatuerradioswapfest
Date: 2008-10-25 12:32:47 UTC
From: Bry Carling
Topic: 1930 Message: 1930

Here is a set of TUBE SOCKET INLINE ADAPTER TESTERS
- 7 pin, 9-pin and OCTAL.

These adapters go in between the tube and the chassis so that
you can attach test points and make adjustments to equipment.
There is a test point for each pin.

For the Octal adapter you would use it for connecting
to any normal 8-pin tube like a 6L6GC.

The 9-pin miniature adapter is great for connecting in-circuit
to a 12AX7 or similar.

The 7-pin miniature adapter is suite dto working with tunes like a
6AU6.

Great for working on guitar amps, amateur radio equipment,
military equipment, test equipment etc. that uses tubes.

I sent them to auction and hope someone can use them for
working on their tube type equipment.

Here is the link if you are interested. If not, please delete this
message.

1931. FA: Vernier Dial and Antique Knobs

Yahoo group: amatuerradioswapfest
Date: 2008-10-25 13:17:05 UTC
From: Bry Carling
Topic: 1931 Message: 1931

Here is a really nice Vernier Dial and four Antique Knobs

The vernier dial has the knob and scale and 5:1 reduction ratio. Great for homebrew radios, and the knobs are the nice knurled black kind, one of them has the 0-100 dial skirt. Wonderful stuff!

Currently $8.00 for the whole bunch...

Thanks for looking and 73 - Bry

1932. Several Microphones and Headphones FS

Yahoo group: amatuerradioswapfest
Date: 2008-10-26 16:18:39 UTC
From: Ken Simpson, W8EK
Topic: 1932 Message: 1932

Several Microphones and Headsets For Sale:

Kenwood MC-50 desk microphone.
This is the popular mic that is made to match the TS-120, TS-130, TS-180, TS-520, TS-820, TS-530, TS-830 and others of that vintage.
It has both high and low Z output, and a 4 pin connector.
This one is in extremely nice shape. All paint is good, the buttons are not faded, and I can not find a scratch on it.
Of course both cords are included, as is the paper work for $75.

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed. Stripped and tinned leads.
It works fine, and looks good also. $25

Heil "Traveler" Headset / Boom Microphone For Sale:
To quote the Heil Sound Web Site,
"The Heil Traveler is a unique, high-performance single-sided headset that's ideal for portable and emergency operation. Compatible with over 100 different radios, the Traveler provides unmatched versatility for a wide variety of Amateur Radio applications."
This is a combination of a headphone and a boom microphone. Of course it is engineered to obtain exceptional specs, as only Heil can do.
This particular unit has the Heil HC-5 mic element, which is considered the "rag chew" high fidelity element.
The unit works fine and looks very close to new.
$65

Headphones:

These are all communications headphones with appropriate frequency response. They are not stereo "Hi Fi" headphones.

Generic headphones
Similar to the Kenwood HS-5, with plastic ear pads.
"Made in USA" stamped on them. With 1/4 inch mono plug, and about 5 foot cord. Nice shape. $23

Generic headset
Smaller ear pieces than those above. These are just over
an inch in diameter, so they do not completely cover your ear.
With 1/4 inch mono plug; 16 ohm impedance.
Good condition. $16

Kenwood MJ-68 microphone connector adapter
Converts a round 6 pin Kenwood connector on the microphone,
so it can be plugged into a Kenwood rig with the round 8 pin
connector. $20

Touch tone (DTMF) microphones for sale:

Icom HM-8 touch tone DTMF Microphone
This mic has a touch tone pad on it, with a switch to turn the
pad on or off. There is also a preamp built in to the mic, so
that it can be used with the Icom 25A , 245, 290, 402, 202S,
451, 471A and maybe others. It has a round 8 pin connector
on it. Paper work is included for $45.

Icom HM-56 A, DTMF touchtone microphone w/up-down switch
This electret mic has a 16 digit DTMF touchtone pad on it
along with other special buttons. It also has 14 memories
included in it for remembering phone numbers to dial. It works
with the Icom 28, 38, 228, 229, 449, 901, 1201, 2330, 2400,
2410, 2500 and others. This mic also has an up and a down
switch on it. Basically, it is like an HM-12, but with DTMF pad
and memories added. These are about $170 new, so that
gives some idea of its sophistication!
This one is still in its box, with paper work. I do not think it
has ever been used. $95

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
With paper work for $40.

Drake 1525 EM Touchtone Microphone
Normal hand mic from the front, but has a touchtone pad
on the back. Four pin mic plug. Used, but in good shape.
Includes paper work. $35

CES "Micropad" touch tone mic
No model number on it, but it has a 12 digit pad on the
back. Low Z mic element with round 8 pin connector
wired for Kenwood. $38

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $38

Prices do not include shipping from Florida.

Thanks.

1934. FS: Classic Novice Homebrew Transmitter

Yahoo group: amatuerradioswapfest
Date: 2008-11-06 20:33:19 UTC
From: Bry Carling
Topic: 1934 Message: 1934

Here is a CLASSIC HOMEBREW NOVICE TUBE TRANSMITTER

A beautifully built little MOPA rig, using a 6C4
and 5763 tube.

This quality rig is complete with a 120V AC Power
supply.
Has beautiful wiring underneath the chassis!

Includes two brand new tubes 6C4 OSC and 5763 P.A.
- AND comes with two FT243 crystals.
The crystals are switch selectable from the front
panel,
in a very neat arrangement with a toggle switch.
Includes the popular Glowbug and QRP frequencies
7030 kHz
and 7050 kHz. Produces about 15 watts on 40m CW.
Connection for your key is made via the binding
posts
on the front panel. Also has a relative power
output
indicator lamp for tuning. The tuning and loading
controls have beautiful antique Hallicrafters
knobs.
AC power cord is included but not shown in the
photos.

Available for $65.00 plus shipping.

Pictures and details at:

From: Paul McInnish
Topic: 1935 Message: 1935

IoTech ChartScan/1400 Portable 16 channel data recorder. New... never been used commercially, used at one trade show to demo temperature changes and chart the changes on a notebook computer. Used a ham rig to demo the heat changes between transmit, standby and receive (very simplistic demo but it was neat). You can set it up to monitor over the internet!

Here is the link to the IoTech web site to review the recorder:
http://www.iotech.com/catalog/temp/chartscan.html

The one I have has different connectors than those shown on the IoTech web site... each channel has different connectors (BNC & two other styles for easy mating).

When you go to the web site, scroll down and look at the price on the logger and the modules!!! The first two modules listed under the basic unit is included. Make me a reasonable offer and its yours!

I have one thermal probe for one channel, software, etc. Updated software is free from IoTech and updated manuals also available from IoTech web site (free).

Had it sold but buyer backed out... no reasonable offer refused!

Yahoo group: amatuerradioswapfest
Date: 2008-11-08 21:14:39 UTC
From: Bry Carling
Topic: 1937 Message: 1937

FOR SALE: Tube Type 120v AC Power Supply

Has STANCOR PC8410 transformer rated 360-0360V AC
at 120 mA and also 6.3V AC at 5A. 720V CT at 120mA goes
to a full wave rectifier and a choke input filter.
Produces about 500V DC at 120mA.

Meter on front panel shows 0 to 100 mA DC.

Great for a medium size homebrew transmitter. There
are some dropping resistors inside too, and not sure what
they produce.

Built on a neat little aluminum chassis that is 6" X 4" X 3"
Overall height is 7-5/8" with handle. Has both cables.

Available for $25.00 plus shipping.

1943. Rockmite-20 and HB Buddipole for sale

Yahoo group: amatuerradioswapfest
Date: 2008-11-11 23:45:39 UTC
From: kc7fys
Topic: 1943 Message: 1943

I have listed my HB Buddipole and Rockmite 14.060 in a blue Mitybox
for sale on a popular auction site.
130268374486 Rockmite
130268377732 Buddipole
The Rockmite shows about 850mA into my WM-2 meter and works great. The
Mitybox is a nice touch.
The Buddipole was purchased from another ham and overhauled by me.
20/15 meter coils and all new shrinktubing and connections. Coax and
bead balun included.
Please contact me for further information on either of these items.
Regards,
Jonathan KC7FYS/7J1AWL

1944. FS: 455 kHz CW filter Partial Kit $30.00

Yahoo group: amatuerradioswapfest

HF and related items For Sale:

TenTec Scout 555 and Argo 556 accessories:

TenTec Scout 555 / Argo 556 Band Modules
These are the modules that plug in to either the TenTec Scout or Argo, to give additional band coverage.
Band modules are available for 40, 30, 20, 17, 15, and 10 meters.
Non-WARC band modules are $65 each.
WARC band modules (30 and 17 meters) are $70 each.

TenTec 296 mobile mount for 555 Scout
Nice clam shell type of mount in extremely good condition.
With paper work for $50.

Power Supply:

Triplite Phase III, PR-12 Power Supply

This power supply will furnish 13.8 V DC at up to 12 amps. This means it is just right for most 2 meter or dual band rigs in the 50 Watt range, or lower powered HF rigs.

This supply is surge protected, over voltage protected, and has an internal control to adjust the current limiting. This means that the current limit can be adjusted so that it cuts off if your rig sees a high SWR.

This particular supply works fine, and looks very nice also. $40

CW items:

MFJ 422 B electronic keyer
This keyer includes sidetone, and has adjustments for volume, tone frequency, and weighting, as well as speed.
It will key either positive or negative voltages, and is powered by an internal 9 V battery, or external 5 to 9 volt supply.
It is made to go on the back of a Bencher Paddle.
It works 100%, and looks great also. With paper work for $45.

Generic Code Key
This is a very generic code key. It is mounted on a nice
wood base that is finished and looks very nice. $15

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch
phone plug on it, as is used with a straight key. $5
As above, but 1/8 inch plug. $5

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo
connector on the end, like used by most rigs. It looks
great. $8
As above, but 1/8 inch plug. $8

Code Practice Key / Buzzer:

Herald Electronics Co. Model SW-12 A
"Telegraph Key with Buzzer"

This is a very vintage unit. It is in its original
box, with the paper work, with an address of simply
"Chicago, Ill", with no zip code, and not even a zone.
I would guess 1950's vintage, but of course that is a guess.

The unit consists of a code key built into a base that
appears to be bakelite. The key is somewhat similar to
a J-38 (without a shorting bar), with shiny nickel plated
knurled nuts. The key has a regular knob, and not a navy
knob. Behind the key is a round cover over the buzzer,
and behind that is a place for a single D cell battery.

The unit is complete with the original instruction sheet,
in the original box. $40

Cassette Code tapes:

Radio Shack "Novice Class"
This set of two cassettes starts at the Introduction and
Learning the Code, up thru preparing for the 5 WPM test.
These are original tapes in good condition.
Two tapes for $9

CW Related books:

Ameco "Mastering the Morse Code"
First Edition, 1957 $8

Ameco Code Course
This book looks like it might be made to go with the Ameco
code records. There is general information about the code,
but portions of the book list what is being sent by the code
records. There is also a diagram about how to make a code
practice oscillator from a 50C5 and 35W4. There is no date

or edition on it, but the tube type CPO somewhat dates it! $5

ARRL Code Kit - 1976
This is the booklet only, that originally went with a kit of cassette tapes. This has the info that is contained on the tapes listed in it. If you have the tapes, and need the booklet to go with it, this is for you. If you just want to read about it, this is great also. $2

Microphones:

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed. Stripped and tinned leads.
It works fine, and looks good also. $25

Touch tone (DTMF) microphones:

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, along with a low impedance microphone. This one has the 8 pin modular plug (like a computer LAN) on it. This mic has not been used, so it is in really great condition.
Paper work included for $40.

Drake 1525 EM Touchtone (DTMF) Microphone
This is the mic that was used to add a touchtone pad to a lot of rigs in the 70s and 80s. Normal hand mic from the front, but has a touchtone pad on the back. Four pin mic plug. This particular unit has been used, but is in good shape and includes paper work. $38

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently has a 6 pin connector for the KDK 2030, but that can be changed. Nice condition. $40

CES "Micropad" touch tone mic
No model number on it, but it has a 12 digit pad on the back. Low Z mic element with round 8 pin connector wired for Kenwood. $38

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a normal low impedance microphone. With 4 pin plug.
Like new. $38

Icom HM-56 A, DTMF touch tone microphone w/up-down switch
This electret mic has a 16 digit DTMF touchtone pad on it along with other special buttons. It also has 14 memories included in it for remembering phone numbers to dial. It works with the Icom 28, 38, 228, 229, 449, 901, 1201, 2330, 2400, 2410, 2500 and others. This mic also has an up and a down switch on it. Basically, it is like an HM-12, but with DTMF pad and memories added. These are about $170 new, so that gives some idea of its sophistication!
This one is still in its box, with paper work. I do not think it has ever been used. $95

Headphones:

Generic headset
Smaller ear pieces just over an inch in diameter, so they do not completely cover your ear.
With 1/4 inch mono plug; 16 ohm impedance.
Good condition. $18

Phone patches or digital interfaces:

Although designed to be used as a phone patch, to connect your rig on both transmit and receive to a telephone line, these can also be used to interface your rig to a sound card. There is an internal audio transformer inside, just like on some of the "interface boxes" being sold today.

Kenwood PC-1 phone patch/digital interface
This is the model with the 4 pin connectors, although they can be changed, if needed. It includes a nice meter for adjusting the null so VOX will work OK.
This particular unit works fine, and looks very, very good. No scratches. With paperwork for $40

Heath HD-15 Phone Patch / Digital Interface
This is the unit with the VU meter on the left and 3 knobs that match the SB series to the middle and right. Low or high Z output to the transmitter. It can also be used as an interface to the computer for PSK31, etc. It is in good shape. Paper work included for $25.

Low Pass TVI Filters:

Nye Viking Low Pass Filter Model 020-001
This filter is rated at 2000 watts, with over 65 db of attenuation above 57 MHz. These are about $60 new; this one is close to new for only $35.

Johnson 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut off frequency of 45 MHz and 75 db of attenuation.

It is rated to take 1000 Watts of AM, or 5000 Watts
PEP SSB. It has SO-239 connectors on each end.
$35.

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter
and antenna, and has been optimized to have more attenuation
in the 40 MHz region, where many TVs have their IF. It is good
for 1000 Watts "average" according to the manual, and has
over 80 db attenuation at 41 MHz. This one looks great, and
includes the paper work. $ 35

B & W model 426 low pass filter
B & W TVI filter, cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each end.
This is an older model that seems much heavier duty. It weighs
almost twice as much as the newer model, and looks like it
would take more power. It likely was made in the days that
plate modulated AM was the rule. $30

B & W FL-10/1500 (Formerly known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. This is the latest model B & W filter. It is in very nice
condition; it looks very close to new. $ 40.

Hustler HF mobile high power antennas:

"Super" high power resonators (good for 2 KW PEP):
15 meter RM-15 S $18
10 meter RM-10 S $16

All work fine and are in great cosmetic condition.

Antenna Mount:

Ironworks "Connect Quick" CQ-1 Antenna Mount

Connect Quick Antenna Mount is a mounting plate system
that provides a rapid and secure means of attaching items
such as antenna booms to masts, solar panels to posts,
sound and lighting installations, and other similarly mounted
devices. Installation and removal are accomplished in a snap!

It is designed primarily for use in emergency communications /
portable antenna systems. More details can be found at
http://www.connectquick.net/
The unit appears to be heavy aluminum and stainless steel.

This one was won at a hamfest, so it is new, still sealed in the
original packing. They are $35 from the web site. This one is
only $24.

Coax connectors and adapters:
Prices are per connector.

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Crystals:

FT-243 Crystals for 80, 40, and 10 meter ham bands
3825, 3838, 3850, 3980, 3990

7081 (HC-6), 7094 (HC-6), 7160, 7174 (HC-6), 7175, 7186,
7189, 7198.5 (HC-6), 7200 (HC-6), 7200, 7207, 7225,
7236.2 (HC-6), 7248, 7261 (FT-243 & HC-6), 7283.33 (HC-6)

7325 (29.3), 7375 (29.5), 7395 (29.58), 7400 (29.6),
7404 (29.616), 7410 (29.64)

HC-6 Crystals
These may be used as heterodyning crystals in many
Collins, Drake, Heath, Yeasu, and other rigs.
Freq of crystal in MHz.
7.98, 9.5, 11.5, 12.0, 12.545, 15.0, 16.0, 17.0, 24.7, 29.0,
30.75, 32.5, 39.0, 41.9, 42.7, 44.5, 46.0, 46.7, 49.9, 51.1,

1000.00 KHz for crystal calibrator

All crystals are $8 each.

I also have many 2 meter crystals in HC-25 holders.
Your needs?

Prices do not include shipping from Florida.

Thanks.

FOR SALE: Set of FOUR Military Shock Mounts... type 780
10G

These are excellent BARRY MOUNT units from Barry
Electronics.
Great for mounting any kind of electronic equipment.
Typically used with military or aircraft radios etc.

Dimensions approx 2-3/8" square with large threaded
hexnut on top, these look new and are clean units.

Set of 4 available for $25.00 plus shipping.

1948. FS: Service Manuals and Tubes Available for Sale

Yahoo group: amatuerradioswapfest
Date: 2008-11-24 02:33:44 UTC
From: Norm Freidin VE3CZI
Topic: 1948 Message: 1948

Have a quantity of Radio Communications Service Manuals, both Commercial & Amateur that I have rescued from the Dumpster. Most of them are in Like New Condition.
I recently came across a quantity of Tubes that I have started listing on my webpage.

Please check my site: www.rodemi.com for what is available.
Look under MANUALS or TUBE LISTING
I am updating the site as time allows.
I recently retired from the Commercial 2-way radio business

Thanks for looking....Norm VE3CZI
Email me Directly: <insert Call Sign> at arrl.net ....<call sign> is ve3czi

1949. Antenna rotors FS

Yahoo group: amatuerradioswapfest
Date: 2008-11-26 00:40:37 UTC
From: Ken Simpson, W8EK
Topic: 1949 Message: 1949

Antenna rotors for sale:

Alliance, U-100 Antenna Rotor:

This rotor can be used for a 2 meter, 6 meter, or a 440 MHz beam.
It was designed to handle TV antennas, and should be fine up to
about 5 sq ft wind load. In addition to azimuth, it can also be
used for elevation control in a satellite system.

This package includes the control box, the actual rotor itself,
and the paper work.

Four wire rotor cable is required. I do have some cable available.
If you need it, please inquire.

It works fine, and looks OK as well.

Paper work is included for $60.

Channel Master Antenna Rotor:

This is a 3 wire, relatively light duty, antenna rotor by
Channel Master. It would be appropriate for a 2 meter beam,
440 MHz beam, or small 6 meter beam.

This is the rotor only. It came from a silent key estate,
and we can not find the control box, or the paper work.
It appears that either this rotor was used inside, in a
garage/attic, or was used for a very short period outside.
The paint on it is still fresh, and is not faded. $20

Prices do not include shipping from Florida.

Thanks.

FOR SALE: TWO HF MOBILE RADIOS

1) SBE SIDEBANDER radio for 10m Ham Band . Beautiful
chrome trim on the front panel.
Has controls for VOLUME, SQUELCH, AM / USB / LSB select,
Noise Blanker, CLARIFIER, Channel Select. Frequency coverage:
approximately 28.800 - 29.100 MHz - great for both AM and SSB.
Excellent condition. Comes with the original SBE microphone.
Power required: 12v DC - the fuse-protected DC power
cable is included. Fully working and checked out.
Available for $49.00 plus shipping.

Pictures and details at:
http://www.af4k.com/radios.htm

2) COBRA 148GTL - A top notch chrome faced radio. Has
controls for VOLUME, SQUELCH, RF GAIN, DYNAMIKE,
SWR CAL, METER S / RF / CAL / SWR, MODE LSB/USB/AM,
VOICELOCK (clarifier) , CHANNEL SEL, NB/ANL/ANL-OFF,
CB / PA, TONE, BRIGHT / DIM etc. Also has RX/TX
indicator lamp. Covers the 11m band from Channels 1 thru
23 and would be an easy candidate for conversion to
10m amateur service. Comes with the original Cobra microphone.
EXCELLENT condition. Fully working and checked out.
Power required: 12v DC - the fuse-protected DCpower
cable is included.

Available for $39.00 plus shipping.

1955. FS: "EFJ Style" Receiver Cabinet project

Yahoo group: amatuerradioswapfest
Date: 2008-12-24 16:03:18 UTC
From: Bry Carling
Topic: 1955 Message: 1955

FOR SALE: "EFJ Style" Receiver Cabinet project.

Here's a really cool looking cabinet with a thick front panel, great cabinet painted in the EFJ colors, and a chassis alreay cut for tubes, PLUS a dynamic reduction-drive, dial mechanism. complete with a 4 gang (looks like) 0-500 pF variable capacitor. There are other components too, like a second reduction drive capacitor under the chassis and two sealed Allen-Bradley pots with knobs.

Available for $35.00 plus shipping.

For pictures and complete details, see:

http://www.af4k.com/miscpart.htm

1956. TenTec items FS

Yahoo group: amatuerradioswapfest
Date: 2008-12-26 17:59:41 UTC
From: Ken Simpson, W8EK
Topic: 1108 Message: 1956

TenTec items For Sale:

TenTec 256 FM module
This module adds FM to the Paragon 585 and the
Omni V 562, and maybe others. It works fine, and
includes cables and all paper work for $75

TenTec 285, 500 Hz filter
500 hz for CW or digital use
Fits Corsairs, Paragons, Omni V and VI, and others.
This one has its paperwork and looks like new. $70

TenTec Scout 555 / Argo 556 Band Modules
Band modules for 40, 30, and 20 meters.
All work fine, and look fine as well.
Non-WARC band modules are $65 each.
WARC band module (30 meters) is $70.

"Switcher / 25" 25 amp switching power supply
This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel
around it. It is in a case that is the same size as a 243
remote VFO. It has an ammeter on the front, along with
Switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,
but says "Switcher/25" on it. It is very quiet, and well
shielded, and does not produce any electrical noise that
I could find. I am not positive if TenTec made this, or if
it is homebrew to look like TenTec. If it is homebrew, it
certainly is very professionally done. $150

Heavy duty power supply Pyramid PS-35
This supply is good for 32 Amps Constant or 35 Amps Surge.
The output voltage is adjustable over a 12 to 15 volt
range with a multi turn pot. It has crowbar over voltage
protection, short circuit & thermal protection and features
a pair of nice large edgewise meters to measure output
voltage and output current. There is an internal fan. This
is a very healthy, heavy duty supply!
This particular unit works 100% and looks very close to new.
$135

Power cable for Hercules 444 linear amplifier
This is the heavy cable that goes from the power supply
to the amp. It has a heavy duty 9 pin molex type
connector on both ends, and multiple runs of either

#12 or #14 wire, and is about 6 feet long.
It is in good shape. $18

Prices do not include shipping from Florida.

Thanks.

1957. Extensive list of HF and related items FS

Yahoo group: amatuerradioswapfest
Date: 2009-01-01 14:25:37 UTC
From: Ken Simpson, W8EK
Topic: 1957 Message: 1957

Extensive list of HF and related accessories For Sale:

Micronta 21-525B Field Strength and SWR Meter
Covers 3 to 30 MHz, to check your SWR or to use to check your field strength.
This meter works fine and looks close to new, with no scratches.
It is in its original box, with the paper work for $25.

Ameco Model BIU, SWR Bridge
This is apparently an older unit that matches much of the boat anchor gear, except this one looks very close to new. Of course it works fine also.
The meter unit is in a very nice light gray / dark gray enclosure, with a remote sense unit which has copper plating (still shiny).
There are provisions for using a second remote sensor and switching between the two. This sensor is model SWB, and says it is good to 225 Mc. Of course it is for 50 ohm systems, and has an SO-239 on each end of the sensor. $50

Model CX-3 Coax Switch
This switch will switch 3 antennas, with unused positions NOT grounded. Rectangular with three connectors out the back, and the common out the front.
It works fine and looks great. $15

Heavy duty power supply Pyramid PS-35
This supply is good for 32 Amps Constant or 35 Amps Surge.
The output voltage is adjustable over a 12 to 15 volt range with a multi turn pot. It has crowbar over voltage protection, short circuit & thermal protection and features a pair of nice large edgewise meters to measure output voltage and output current.
There is an internal fan. This is a very healthy, heavy duty supply!
This particular unit works 100% and looks very close to new.
$125

MFJ 260 dry dummy load
Rated at 300 watts by MFJ, but it has the derating curve on the enclosure which shows that it is only good for 300 watts for about 30 seconds. It is good for 100 Watts for about 1 and a half minutes, which is likely the way most of us would use it. It is good for 25 watts for about 6 minutes.
Although most of us would likely use it for HF rigs, it can be used on VHF rigs as well. It is rated for under 1.1 to 1 SWR to 30 MHz and usable up to 650 MHz with under 1.3 to 1 SWR.
PL-259 connector.

I measured the actual value, and it shows 50.6 ohms. It is
hard to get much closer to 50 ohms that that!
With paper work for $30.

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed.
Stripped and tinned leads.
It works fine, and looks good also. $25

Headphones:

These are all communications headphones with appropriate frequency
response. They are not stereo "Hi Fi" headphones.

Generic headset
Smaller ear pieces than those above. These are just over
an inch in diameter, so they do not completely cover your ear.
With 1/4 inch mono plug; 16 ohm impedance.
Good condition. $16

CW items:

Special Deluxe CW Key
This first key is extremely nice, and is special in its
mounting. The key itself is a Nye Viking Speedex oval base
310-001 key, which sells new for $58 by itself, and has
very nice action. What separates this key from any others
is the base it is mounted on. It is solid metal about 6
inches long and 5 inches wide and 3/4 inch thick. It
weighs about 6 pounds, so it will not move across the
desk when you use it. There is a nice beveling around
the top. To put it another way, this is a specially
machined base, made for the key. The metal appears
to be copper, although it is not shiny copper, but
instead has a "patina" to it like antique items. A
layer of cork covers the bottom to protect your operating
table. There is a cable with a metallic shielded 1/4 inch
plug on it. This is certainly a one of a kind key. $100

TenTec KR-2 A Keyer Paddle For Sale:
The KR-2 A is the same paddle assembly used in the KR-5
and KR-20 A keyers, but does not have any electronics inside.
It also has a small button on the top of the case that
can be used as a straight key, but can also be used as an
aid to tune up your rig.
It is designed to be used with your own keyer, but many
people have put an electronic keyer inside the shielded
aluminum case which is about 4 x 4 x 2 inches in size,

plus the paddle itself.
The KR-2 A is the woodgrain top / egg shell white color
that matches the early Triton series of rigs, plus the
Argonaut 509, and others.
This particular unit is in good condition.
The paper work is included (a single sheet). $25

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo
connector on the end, like used by most rigs. It looks
great. $8
As above, but 1/8 inch plug. $8

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch
phone plug on it, as is used with a straight key. $5
As above, but 1/8 inch plug. $5

Code Practice Key / Buzzer:

Herald Electronics Co. Model SW-12 A
"Telegraph Key with Buzzer"

This is a very vintage unit. It is in its original
box, with the paper work, with an address of simply
"Chicago, Ill", with no zip code, and not even a zone.
I would guess 1950's vintage, but of course that is a guess.

The unit consists of a code key built into a base that
appears to be bakelite. The key is somewhat similar to
a J-38 (without a shorting bar), with shiny nickel plated
knurled nuts. The key has a regular knob, and not a navy
knob. Behind the key is a round cover over the buzzer,
and behind that is a place for a single D cell battery.

The unit is complete with the original instruction sheet,
in the original box. $40

TenTec Accessories:

TenTec 285, 500 Hz filter
500 hz for CW
Fits Corsairs, Paragons, Omni V and VI, and others.
This one has its paperwork and looks like new. $70

Scout 555 / Argo 556 Band Modules
Band modules for 40, 30, and 20 meters.
Non-WARC band modules are $65 each.
WARC band module (30 meters) is $70 each.

Low Pass TVI Filters:

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter and antenna, and has been optimized to have more attenuation in the 40 MHz region, where many TVs have their IF. It is good for 1000 Watts "average" according to the manual, and has over 80 db attenuation at 41 MHz. This one looks great, and includes the paper work with it. $ 35

Drake TV-1000 Low Pass TVI filter
This is the low pass TVI filter that is in the copper case, and may also be used on the low end of six meters, as well as HF.
It is a 50 ohm filter and is good for 1000 W below 30 MHz, and about 200 W up to 52 MHz.
This one works fine and looks good also.
With paper work for $30.

Nye Viking Low Pass Filter Model 020-001
This filter is rated at 2000 watts, with over 65 db of attenuation above 57 MHz. These are about $60 new; this one is close to new for only $35.

Johnson 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut off frequency of 45 MHz and 75 db of attenuation. It is rated to take 1000 Watts of AM, or 5000 Watts PEP SSB. It has SO-239 connectors on each end.
$35.

B & W model 426 low pass filter
B & W TVI filter, cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each end. This is an older model that seems much heavier duty. It weighs almost twice as much as the newer model, and looks like it would take more power.
It likely was made in the days that plate modulated AM was the rule.
$30

B & W FL-10/1500 (Formerly known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters, and will handle 1500 Watts. SO-239 connector on each end. This is the latest model B & W filter. It is in very nice condition; it looks very close to new. $ 40.

Prices do not include shipping from Florida.

Thanks.

1958. FS: Pair of 80m Crystals

Yahoo group: amatuerradioswapfest
Date: 2009-01-06 12:25:32 UTC
From: Bry Carling
Topic: 1958 Message: 1958

For sale:

PAIR OF 80m CRYSTALS - one for you and one for
a friend. On 3618.33 KC. These fit in standard FT243 sockets
but are slightly larger. Made by General Electric and both are
in excellent condition. Fully tested.

Will sell for $2.50 each or $5.00 for the pair.

1959. FS: Ham Parts etc. #1

FOR SALE: (GROUP #1)

Military Radio Shock Mounts... type 780-10G
QTY 4 for $24.00 plus shipping

Reduction Drive - right angle type with dual shafts.
120:1 reduction - Qty 1 available for $12.00

CS-137 Military CRYSTAL CASE for 120 FT243 crystals $25.00

250 Hz CW filter kit for 455 kHz I.F. - $30.00

Frequency Counter probe. BNC to Clip hook - $10.00

12-pin Cinch Jones connectors - as used for AC power cable
on SWAN radios, Yaesu FT-101 series radios, Kenwood radios etc.
Available $6.00 - or buy two or more at $5.00 each.

Tower Warning Signs: "WARNING DO NOT CLIMB" - $4.00 each

QTY 2 - 500K Potentiometers - standard 2 watt panel type mount
type with 1/4 inch shaft. Available for $4.00 each.

QTY 2 - Allen Bradley 50K Potentiometers - Type J - standard
2 watt panel type mount type with 1/4 inch shaft.
Available for $4.00 each.

SIX HC50/U CRYSTAL SOCKETS.
Use for HC-25/U and other small plug-in crystals.
5mm pin spacing = 5/32" spacing. Same as used in almost all
1970 - 1985 era ham rigs. 6 available for $10.00 (FOR ALL SIX!)
plus shipping.

QTY 2 Ohmite Power resistors - 3 ohms at 500 Watts each.
Available for $12.00 each.

QTY 11 New NON-INDUCTIVE RESISTORS, 10 ohms 100 Watts
Available for $6.00 each or buy all eleven for $56.00

QTY 6 NON-INDUCTIVE RESISTORS, 175 ohms at 75 watts
Available for $5.00 each or buy all 6 for $24.00

1 Megohm 1/4W 5% Carbon Film Resistor - 5 cents each.

BC-610 CRYSTALS - large (Type FT-171B)
Normally $19.00 each... Packages of three for $25.00

GROUP #1 OF 3 X FT171B CRYSTALS
2630, 3550, 3580 kHz

GROUP #3 OF 3 X FT171B CRYSTALS
3705, 3945, 3955 kHz

GROUP #4 OF 3 X FT171B CRYSTALS
3835, 3945, 3955 kHz

ROTARY SWITCHES - QTY of 6 assorted rotary wafer switches.
All 6 for $12.00 total plus shipping.

Quantity 4 H.V. Variable Capacitors - 250 pF, 50 pF and two 30 pF
spilt stator. Buy all four for $12.00 plus shipping

11-pin plugs and sockets for Heathkits - $3.00 each

1N21BR Microwave Diode - QTY 1 available for $10.00

Straight Key for CW Morse fun - needs knob - $5.00

Group of 5 old radio knobs - $5.00

AC transformer - 115V AC to 36V CT at 4A with 120V AC primary.
Qty 1 available for $6.00

CHOKE 5.5H at 250 mA model 6742-1.
Not sure of brand, but looks like the typical Stancor etc.
Qty 1 Available for $10.00 plus shipping

FT243 crystal for 7000 kHz - $5.00
FT243 crystal for 7010 kHz - $12.00
FT243 crystal for 7040 kHz - $12.00
FT243 crystal for 7050 kHz - $12.00
FT243 crystal for 7140 kHz - $12.00
FT243 crystal for 7300 kHz - $5.00

Waxed Lacing Cord - 500 Yard spool $15.00
Waxed Lacing Cord - 200 Yard spool $10.00
Unwaxed Lacing Cord - 500 Yard spool $8.00

CRYSTAL OVENS - made by REL - 11-pin types
similar to Octal socket. (sockets available!)
these hold up to three HC6U crystals, and run
at 75 degrees C with 6.3V heater power.
Available for $5.00 each

QTY of 20 FT241 Crystals on random LF Frequencies.
All in excellent condition. Most appear to be unused.
Buy 20 for a total of just $9.00 plus shipping.

New 1000pF 2KV Ceramic Disc Capacitor - 40 cents each or 30c
each if you buy 10 or more.

1961. Orlando Hamcation, Feb 12, 13, 14, 15

Yahoo group: amatuerradioswapfest
Date: 2009-01-22 13:32:50 UTC
From: Ken Simpson, W8EK
Topic: 1961 Message: 1961

Information about the Orlando Hamcation, February 12, 13, 14, 15:

If you have never been to the Orlando Hamcation, you need to think about attending. It is now the second largest hamfest in the country, fast approaching the size of Dayton. While Hamcation is technically Friday, Saturday, and Sunday, the fun really gets started with most tailgaters moving in on Thursday. It seems you can find most anything you would want with 100's of vendors -- maybe even approaching 1000. Everything from the most ancient boatanchor to the most modern rig will be there.

In addition, Florida is the place to be in February, as opposed to the "Cold North". There are plenty of activities for the family as well, in the central Florida area.

Swap tables at the Orlando Hamcation are still available at the present time.

If you would like a table in the swap building, you can contact Mort, WA2ARS, or Roberta at hamcation@..., and make your reservation. Remember if it is cold or rainy outside in the tailgate section, it will be warm and dry inside the swap building.

More information is available at
http://www.hamcation.com/

See you there.

Thanks.

LCR-100 Inductance, Capacitance, Resistance Meter =NEW=

Red/green alligator clip leads
9V battery req.
3.5" LCD
Dimensions 72mm×120mm×37mm
Sensitivity
Capacitance 1pF, 10pF, 100pF, 1nF, 10nF, 100nFL
Inductance 1uH, 10uH, 100uH, 1mH, 10mHR
Resistance 0.1ohm, 1ohm, 10ohm, 100ohm, 1Kohm, 10Kohm Range
Capacitance 2nF, 20nF, 200nF, 2uF, 20uF, 200uFL
Inductance 2mH, 20mH, 200mH, 2H、, 20HR
Resistance 200ohm, 2Kohm, 20Kohm, 200Kohm, 2Mohm, 20Mohm
Sampling rate 2.5X/sec

This meter has never been used. Will sell for 60$/OBO+shipping, or
will trade for any QRP gear or antenna/camping gear.
Best 73,
Jonathan KC7FYS

1967. 2 meter rigs and accessories FS

Yahoo group: amatuerradioswapfest
Date: 2009-02-01 14:14:07 UTC
From: Ken Simpson, W8EK
Topic: 1967 Message: 1967

Two meter rigs and accessories For Sale:

Two meter FM Transceiver:

KDK FM-2033 mobile FM transceiver for 2 meters

This rig produces just over 25 Watts in high power and
about 7 watts in low power. The rig is fully synthesized,
has memories, scan, subaudible PL tone, and all the things
that one expects in a 2 meter rig. It has a touchtone
microphone with it. It sounds great, and hears well.
It needs 13 V DC at about 7 amps.

This particular rig is in very nice condition. There is
one paint spot missing, about the size of a pin head. It
includes the touchtone microphone, mobile mounting bracket,
power cord, and paper work. The original box is also included,
although the box looks much worse than the radio. Even the
mic clip, and a bag of screws are included, as is the
original multicolored sales brochure. $89

MFJ 810 VHF Wattmeter / SWR Bridge
Similar to the MFJ 816 listed above, but for the 2 meter
and 220 MHz VHF bands. A web site says it is the same as
the MFJ 812.
This particular unit works fine, and looks fine also.
With paper work for $25.

Ameco Model BIU, SWR Bridge
This is apparently an older unit that matches much of the boat
anchor gear, except this one looks very close to new. Of course
it works fine also.
The meter unit is in a very nice light gray / dark gray enclosure,
with a remote sense unit which has copper plating (still shiny).
There are provisions for using a second remote sensor and switching
between the two. This sensor is model SWB, and says it is good to
225 Mc. Of course it is for 50 ohm systems, and has an SO-239 on
each end of the sensor. $50

MFJ 260 dry dummy load
Rated at 300 watts by MFJ, but it has the derating curve on
the enclosure which shows that it is only good for 300 watts
for about 30 seconds. It is good for 100 Watts for about
1 and a half minutes, which is likely the way most of us
would use it. It is good for 25 watts for about 6 minutes.
Although most of us would likely use it for HF rigs, it can
be used on VHF rigs as well. It is rated for under 1.1 to 1

SWR to 30 MHz and usable up to 650 MHz with under 1.3 to 1
SWR. PL-259 connector.
I measured the actual value, and it shows 50.6 ohms. It is
hard to get much closer to 50 ohms that that!
With paper work for $30.

DTMF Touch Tone Microphones:

Kenwood MC-46 DTMF Microphone
Touch tone DTMF microphone with 6 pin connector, as used
on TR-7730, TR-7800, TR-7850, TR-7930, TR-7950, TR-8400,
TR-9000, TR-9130, and others. Up-down switch on top. Of
course the connector could be changed to an 8 pin connector
to use on other rigs. This one works 100%, and includes
paper work in the original box for $45.

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently
has a 6 pin connector for the KDK 2030, but that can
be changed. Nice condition. $40

Drake 1525 EM Touchtone Microphone
Normal hand mic from the front, but has a touchtone pad
on the back. Four pin mic plug. Used, but in good shape.
Includes paper work. $35

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
With paper work for $40.

CES "Micropad" touch tone mic
No model number on it, but it has a 12 digit pad on the
back. Low Z mic element with round 8 pin connector
wired for Kenwood. $38

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $38

Regular (non DTMF) Microphones:

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires
polarizing voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic
mic is needed. Stripped and tinned leads.

It works fine, and looks good also. $25

Icom BC-35 desk charger
The BC-35 will fast charge the BP-2, BP-5, BP-7, and BP-8 battery packs. It will also charge the BP-3 and BP-4, but these take 12 to 15 hours. It works 100% and looks fine as well. $35

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine and works fine. $18

Accessories for several Kenwood HTs:

Kenwood PG-3 E DC Cord
This cord plugs into the cigarette lighter to provide 12 V DC to the TH-215, TH-225, TH-415, and other Kenwood HTs. It has a filter built in, and permits high power operation of the HTs. $20

Kenwood BH-2 Belt Clip for TH-215, TH-225, TR-2500, TR-2600, and others $8

Kenwood SC-12 Vinyl Case
For TH-215, TH-225 and others, with room for the standard PB-2 and PB-3 battery packs. Black color. In very nice condition. $15

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1 and PB-4 battery packs. It can also be used with the smaller PB-2 and PB-3 battery packs, by putting a filler in the case. Black color. In very nice condition. $15

Bianchi Real Leather Case for TH-215, TH-225, etc.
For use with the larger PB-1 and PB-4 batteries, but can be used with the smaller PB-2 and PB-3 batteries. This is real leather, tan in color, and is in very nice condition. $25

Accessories specific to the Kenwood TH-21 / 31 / 41 series HTs:

Kenwood PB-21 battery pack for TH-21/31/41 series HTs
This battery pack does not hold a charge well. Physically it is fine, but it needs a new "insert". With paper work for $10

Special rubber duck antenna for Kenwood TH-21 HT with threaded connector
Kenwood RA-6 regular, 6.6 inches long - $10
As above but for TH-41 HT, 440 MHz - Stubby - $15

Accessories specific to the Kenwood TR-2400 HT:

Belt clip for TR-2400 HT, complete with hardware - $8

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of
the Kenwood TR-2400, 2 meter HT, outside of the HT itself.
Usually, one must have the battery inside the HT, but this
lets you charge a second battery outside of the HT. The
original charger is used.
It is in good shape, and works fine. $3

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
This adapter can be used on any HT with a BNC connector. $5

Santec HT Accessories:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap.
The case itself is in very nice shape. The leather
shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a
service pack. It has schematics, circuit explanations,
voltages, etc. $18

Belt Clips for various HTs -- All include the hardware with
the belt clip
$8 each
Kenwood BH-2 for TH-215, TH-225, TR-2500, TR-2600, and others
Kenwood TR-2400
Motorola
Yaesu FT-209

Wrist Straps for various HTs - $4 each
Kenwood TR-2400
Kenwood TH-21/31/41
Yaesu FT-209

Antennas and antenna related items for sale:

Two meter mobile antenna:

Cushcraft Magnetic Mount 5/8 wave, 3 db gain antenna for 2 meters
Consists of a heavy duty mag mount, with coax, and the antenna
and spring.
It works fine and looks fine also. $50

Gain antenna coil, spring and whip
The antenna is a 5/8 wave antenna for 2 meters, which has a gain of about 3 db. The coil can be used with any of the NMO mounts (made by Motorola, Larsen, Cushcraft and many others). The antenna is approximately four feet long, and is in good condition. $30

As above, but without the whip.
The whips are hard to ship, so you might want only the coil and spring, and obtain a whip locally. $25

Larsen NMO-MM Mag Mount
This rectangular mag mount features an extremely strong magnet. Any of the NMO antennas made by Larsen, Motorola, Cushcraft, and many others will fit on it. It includes coax, with an N connector on it. It is in great condition for $22.

Cushcraft CSMG NMO Magnetic Mount
This is a strong, round, magnetic mount which can be used with any NMO antenna. Coax is included, with a PL-259 on the end. Nice condition for $20.

Larsen VHF and UHF Mobile Antennas:

Antennas are used, but in very good condition.
All fit the Larsen NLA mount, which is a mount that is proprietary to Larsen.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 m; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on the 70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna. Can be cut for 2 m, 220 MHz, or 440 MHz. $7

Larsen Q
Fits a 5/16 inch stud, such as the Larsen LM mount, and others. It can be cut for 2 meters, 220 MHz, or 450 MHz bands. $7

Larsen NMO-Q
Precut for 450 MHz. New, still in bag. $8

Avanti / Antenna Specialists "On Glass" antennas:

These antennas were made by Avanti, and then later by Antenna Specialists, to mount on a windshield, or other glass. They do not require a ground plane, as they are 1/2 wave antennas, rated to have 3 db gain. They are ideal for places where a ground plane is not available,

such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Rubber Duck Antennas for your HT:

All are for 2 meters, are in very nice condition, and
are $10 each, unless stated otherwise.

BNC Connector, 4.6 inches long

5/16 inch threaded, as used by Motorola and others
Regular, 5.7 inches long
Stubby, 4 inches long

Type F connector, 6.5 inches long

PL-259 connector, 6.5 inches long
HyGain 275, still sealed in original packaging
from when I bought it 20 or 25 years ago

PL-259 connector - Stubby, 4.6 inches long
Centurion, still sealed in original package
from when I bought it 20 or 25 years ago

Special Rubber Duck antennas for Kenwood TH-21 series
2 meter HTs with the threaded connector
Kenwood RA-6 regular, 6.6 inches long
As above but for TH-41 HT, 440 MHz, Stubby, $15

Alinco EA-0085 for 220 MHz
BNC connector, 5.6 inches long

Prices do not include shipping from Florida.

Thanks.

I'm looking for an Icom IC-22U for use at a repeater site as a remote base. Physical condition is not particularly important. I would prefer a working unit, but may consider one in repairable condition, depending on the fault.

73,

Mike
WM4B

1970. Trade for old receiver

Yahoo group: amatuerradioswapfest
Date: 2009-02-05 03:17:26 UTC
From: AD5VJ Bob
Topic: 1970 Message: 1970

I have an 80 meter dipole that works
really well and is made of very strong
flexible non-stretch cable that includes six conductors on the inside of the jacket along with four strain reliefs inside.

Made long enough so you can fold it over on itself at the ends and tune it for the portion of the band you want to work it in. Using
a ceramic insulator in the middle tying the two ends together to the coax.

Fully insulated at all connections with Dow Corning RTV Style 732 sealant for longer life.

Very strong antenna and good for maximum allowable power.
(comes with 50 foot of coax along with PL-259.)

Sell or Trade for older Receiver.
(Prefer Paypal for selling)

tnx Bob AD5VJ

1971. FS: AM Broadcast Band Crystals

Yahoo group: amatuerradioswapfest
Date: 2009-02-06 12:41:28 UTC
From: Bry Carling
Topic: 1971 Message: 1971

FOR SALE: New FT243 crystals for the AM Band (Medium Wave)

1000, 1005, 1010, 1015, 1016.375, 1016.875, 1020, 1025, 1030 kHz
1035, 1040, 1050, 1055, 1065, 1070, 1075, 1080, 1090, 1095, 1100 kHz
1110, 1120, 1129, 1140, 1145, 1150, 1160, 1170, 1180, 1190, 1195 kHz
1200, 1210, 1220, 1226.875, 1230, 1250, 1260, 1270, 1280, 1285 kHz
1290, 1295, 1300, 1305, 1310, 1315, 1320, 1325, 1330, 1335, 1340 kHz
1345, 1420, 1430, 1440, 1460, 1470, 1530, 1730 kHz

Price is $12.00 each plus shipping.

This is pretty much the last of these I have. When they are gone, they are gone. Some I have two or three on the same frequecy.

Thanks for reading & 73 - Bry, AF4K

1974. HF items and related accessories FS

Yahoo group: amatuerradioswapfest
Date: 2009-02-07 15:04:51 UTC
From: Ken Simpson, W8EK
Topic: 1974 Message: 1974

List of HF and related accessories For Sale:

Wattmeters and SWR Bridges:

MFJ 860 HF Wattmeter / SWR Bridge
This meter has the modern cross needle meter that will read
both forward and reverse power at the same time, and hence
SWR also. It is for 1.8 thru 60 MHz, and has scales for 300
Watts and 30 Watts full scale. If 12 V is applied, the meter
is back lighted.
This particular unit works fine, and looks fine also.
With paper work for $45.

Micronta 21-525B Field Strength and SWR Meter
Covers 3 to 30 MHz, to check your SWR or to use to check your
field strength.
This meter works fine and looks close to new, with no scratches.
It is in its original box, with the paper work for $25.

MFJ 260 dry dummy load
Rated at 300 watts by MFJ, but it has the derating curve on
the enclosure which shows that it is only good for 300 watts
for about 30 seconds. It is good for 100 Watts for about
1 and a half minutes, which is likely the way most of us
would use it. It is good for 25 watts for about 6 minutes.
Although most of us would likely use it for HF rigs, it can be
used on VHF rigs as well. It is rated for under 1.1 to 1 SWR
to 30 MHz and usable up to 650 MHz with under 1.3 to 1 SWR.
PL-259 connector.
I measured the actual value, and it shows 50.6 ohms. It is
hard to get much closer to 50 ohms that that!
With paper work for $30.

TenTec Accessories:

Scout 555 / Argo 556 Band Modules
Band modules for 40, 30, and 20 meters.
Non-WARC band modules are $65 each.
WARC band module (30 meters) is $70 each.

Microphones:

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed.
Stripped and tinned leads.
It works fine, and looks good also. $25

Kenwood MC-46 DTMF Microphone
Touch tone DTMF microphone with 6 pin connector, as used on
TR-7730, TR-7800, TR-7850, TR-7930, TR-7950, TR-8400, TR-9000,
TR-9130, and others. Up-down switch on top. Of course the
connector could be changed to an 8 pin connector to use on
other rigs. This one works 100%, and includes paper work in
the original box for $45.

CW items:

Special Deluxe CW Key
This first key is extremely nice, and is special in its
mounting. The key itself is a Nye Viking Speedex oval base
310-001 key, which sells new for $58 by itself, and has
very nice action. What separates this key from any others
is the base it is mounted on. It is solid metal about 6
inches long and 5 inches wide and 3/4 inch thick. It
weighs about 6 pounds, so it will not move across the
desk when you use it. There is a nice beveling around
the top. To put it another way, this is a specially
machined base, made for the key. The metal appears
to be copper, although it is not shiny copper, but
instead has a "patina" to it like antique items. A
layer of cork covers the bottom to protect your operating
table. There is a cable with a metallic shielded 1/4 inch
plug on it. This is certainly a one of a kind key. $100

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo
connector on the end, like used by most rigs. It looks
great. $8
As above, but 1/8 inch plug. $8

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch
phone plug on it, as is used with a straight key. $5
As above, but 1/8 inch plug. $5

Code Practice Key / Buzzer:

Herald Electronics Co. Model SW-12 A
"Telegraph Key with Buzzer"

This is a very vintage unit. It is in its original
box, with the paper work, with an address of simply
"Chicago, Ill", with no zip code, and not even a zone.
I would guess 1950's vintage, but of course that is a guess.

The unit consists of a code key built into a base that appears to be bakelite. The key is somewhat similar to a J-38 (without a shorting bar), with shiny nickel plated knurled nuts. The key has a regular knob, and not a navy knob. Behind the key is a round cover over the buzzer, and behind that is a place for a single D cell battery.

The unit is complete with the original instruction sheet, in the original box. $40

CW Related books and tapes:

Ameco Code Course
This book looks like it might be made to go with the Ameco code records. There is general information about the code, but portions of the book list what is being sent by the code records. There is also a diagram about how to make a code practice oscillator from a 50C5 and 35W4. There is no date or edition on it, but the tube type CPO somewhat dates it! $5

ARRL Code Kit - 1976
This is the booklet only, that originally went with a kit of cassette tapes. This has the info that is contained on the tapes listed in it. If you have the tapes, and need the booklet to go with it, this is for you. If you just want to read about it, this is great also. $2

The ARRL Training Program - Official Novice Student Workbook
No date or edition, but it is designed for a 10 week course, leading to a novice license. $3

These are original tapes, in their original container.

ARRL "Increasing Your Code Speed" 15 to 20 WPM
Two tape set with paper work included. $12

Gordon West "Radio School" code tape
"10 WPM Plateau Breaker" $8

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted in the coax line after the transmitter or transceiver) to reduce harmonic interference.

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter and antenna, and has been optimized to have more attenuation in the 40 MHz region, where many TVs have their IF. It is good for 1000 Watts "average" according to the manual, and has over 80 db attenuation at 41 MHz. This one looks great, and includes the paper work with it. $ 35

Drake TV-1000 Low Pass TVI filter
This is the low pass TVI filter that is in the copper case,
and may also be used on the low end of six meters, as well
as HF.
It is a 50 ohm filter and is good for 1000 W below 30 MHz,
and about 200 W up to 52 MHz.
This one works fine and looks good also.
With paper work for $30.

Nye Viking Low Pass Filter Model 020-001
This filter is rated at 2000 watts, with over 65 db of attenuation
above 57 MHz. These are about $60 new; this one is close to new
for only $35.

Johnson 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut off frequency
of 45 MHz and 75 db of attenuation. It is rated to take 1000 Watts
of AM, or 5000 Watts PEP SSB. It has SO-239 connectors on each end.
$35.

B & W model 426 low pass filter
B & W TVI filter, cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each end. This is
an older model that seems much heavier duty. It weighs almost twice
as much as the newer model, and looks like it would take more power.
It likely was made in the days that plate modulated AM was the rule.
$30

B & W FL-10/1500 (Formerly known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters, and will
handle 1500 Watts. SO-239 connector on each end. This is the latest
model B & W filter. It is in very nice condition; it looks very
close to new. $ 40.

Hustler HF mobile antenna resonators:

Standard 400 Watt Hustler resonators
15 meter resonator RM-15 $14
10 meter resonator RM-10 Still sealed in original package $15

"Super" high power resonators (good for 2 KW PEP)
80 meter RM-80 S
.....can be cut for CW or phone, and also used on 4BTV
.....Vertical to give 80/75 meter coverage $38
15 meter RM-15 S $18
10 meter RM-10 S $16

All work fine and are in great cosmetic condition.

Coax connectors and adapters:
Prices are per connector.

BNC male
standard type - $2

crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Prices do not include shipping from Florida.

Thanks.

From: Bry Carling
Topic: 1975 Message: 1975

FOR SALE:

Multivoltage power supply with schematic and description.
Medical Lab Grade power supply is superior to computer type
power supplies.
Employs bridge rectifiers and a low-profile toroidal style
transformer
AC Primaries: 100, 120, 220, 240V AC
5.0V DC at 3 Amps
+15V DC at 1 Amp
-15V DC at 1 Amp
24V DC at 1 amp
8V AC at 2 Amps
12V DC unregulated at 2 Amps.
Otherwise each DC voltage is regulated and is trimpot adjustable
Includes power switch and fuses, and uses standard computer type
AC power cable (included). Dimensions:

Available for $15.00 plus shipping.

FOR SALE:

HUMUNGOUS TRANSMATCH - Partially built kit...

Here is a really nice 3KW plus antenna tuner "kit"
that comes with everything you need to make
a better antenna tuner than just about anything
that you could buy commercially for 160m - 10m.

Heavy duty thick-wall aluminum chassis and cover,
fine quality large roller inductor, balun kit
with cores and glas tape. Also has a very
fancy turns counter, EF JOHNSON power/SWR meter
and three SO-239 connectors. There are also
three switches including a QRO 6-position
band switch, ceramic standoffs etc. etc.

See photos for details.

Available for $135.00 plus shipping.

Two meter rigs and many accessory items For Sale:

Two meter FM Transceiver:

KDK FM-2033 mobile FM transceiver for 2 meters

This rig produces just over 25 Watts in high power and
about 7 watts in low power. The rig is fully synthesized,
has memories, scan, subaudible PL tone, and all the things
that one expects in a 2 meter rig. It has a touchtone
microphone with it. It sounds great, and hears well.
It needs 13 V DC at about 7 amps.

This particular rig is in very nice condition. There is
one paint spot missing, about the size of a pin head. It
includes the touchtone microphone, mobile mounting bracket,
power cord, and paper work. The original box is also included,
although the box looks much worse than the radio. Even the
mic clip, and a bag of screws are included, as is the
original multicolored sales brochure. $89

MFJ 812 B VHF Wattmeter / SWR Bridge
This meter covers 144 and 220 MHz. You can read forward and
reflected power in 2 ranges - 30 or 300 Watts. It also reads
SWR from 144 thru 220Mhz.
The MFJ-812B also reads relative field strength from 1 to 220
MHz. It has a binding post for the field strength antenna.
It is in a nice eggshell white and black case.
This one works fine and looks great also.
With paper work for $30.

MFJ 817 Cross Needle VHF Wattmeter / SWR Bridge
The MFJ-817 covers 2 meters VHF and 440 MHz UHF. The extra large
3 inch Cross Needle Meter reads SWR and peak/average for forward
and reflected power. Power ranges: 200/2 Watts forward and 50/5
Watts reflected. Reads SWR from 1:1 and 8:1. SO-239 connectors.
There is a switch for dial illumination (requires 12 V DC).
This one works fine and looks nice with its black face.
These are over $100 new, but you can have this one for $60.

MFJ 860 HF Wattmeter / SWR Bridge
This meter has the modern cross needle meter that will read
both forward and reverse power at the same time, and hence
SWR also. It is for 1.8 thru 60 MHz, and has scales for 300
Watts and 30 Watts full scale. If 12 V is applied, the meter
is back lighted.
This particular unit works fine, and looks fine also.

With paper work for $45.

HyGain BN-86 Antenna Balun
The HyGain BN-86 Balun is a 1:1 balun that may be used on beam antennas or on dipoles. HyGain used it with the TH-6 Tribanders (plus many others), but it has many more uses on most any type of antenna between 3 and 30 MHz.
The spec sheet says it is good for 1500 W PEP, or 800 W average with less than 2:1 SWR. Power rating goes down with an increase in SWR.
It can be mounted directly to the boom of a beam with a U bolt, or it can be hung as an inverted V, or used as a straight dipole. To put it another way, it is very versatile.
This one works fine, and looks good also.
These are about $80 new. This one includes the paper work, for $40.

Antenna Switch:

B & W Model 550 A coax switch
This model will switch up to 5 antennas, and does NOT ground unused antennas. It has SO-239 connectors on the sides, with the coax coming out like spokes of a wheel.
This particular switch has the optional B & W plate installed that has the antennas labeled with 28, 21, 14, 7, and 3.5 on the dial.
Of course it works fine, and look OK also.
$40

DTMF Touch Tone Microphones:

Kenwood MC-46 DTMF Microphone
Touch tone DTMF microphone with 6 pin connector, as used on TR-7730, TR-7800, TR-7850, TR-7930, TR-7950, TR-8400, TR-9000, TR-9130, and others. Up-down switch on top. Of course the connector could be changed to an 8 pin connector to use on other rigs. This one works 100%, and includes paper work in the original box for $45.

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently has a 6 pin connector for the KDK 2030, but that can be changed. Nice condition. $40

Drake 1525 EM Touchtone Microphone
Normal hand mic from the front, but has a touchtone pad on the back. Four pin mic plug. Used, but in good shape. Includes paper work. $35

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with

a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
With paper work for $40.

CES "Micropad" touch tone mic
No model number on it, but it has a 12 digit pad on the
back. Low Z mic element with round 8 pin connector
wired for Kenwood. $38

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $38

Regular (nonDTMF) Microphones:

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires
polarizing voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic
mic is needed. Stripped and tinned leads.
It works fine, and looks good also. $25

Icom charger and battery:

Icom BC-35 desk charger
The BC-35 will fast charge the BP-2, BP-5, BP-7, and BP-8
battery packs. It will also charge the BP-3 and BP-4, but
these take 12 to 15 hours. It works 100% and looks fine
as well. $35

Speaker Microphones:

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Yaesu YM-24 A speaker mic.
Fits FT-207, 208, plus many others. It has the odd
little round connector on it like Yaesu, Wilson, Santec,
and others used in the 1970s and 80s. This particular
unit works fine, and looks great also. $20

Accessories for several Kenwood HTs:

Kenwood PG-3 E DC Cord
This cord plugs into the cigarette lighter to provide 12 V DC
to the TH-215, TH-225, TH-415, and other Kenwood HTs. It has
a filter built in, and permits high power operation of the HTs.

$20

Kenwood BH-2 Belt Clip for TH-215, TH-225, TR-2500, TR-2600,
and others $8

Kenwood SC-12 Vinyl Case
For TH-215, TH-225 and others, with room for the standard PB-2
and PB-3 battery packs. Black color. In very nice condition. $15

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1 and
PB-4 battery packs. It can also be used with the smaller PB-2 and
PB-3 battery packs, by putting a filler in the case. Black color.
In very nice condition. $15

Bianchi Real Leather Case for TH-215, TH-225, etc.
For use with the larger PB-1 and PB-4 batteries, but can be used
with the smaller PB-2 and PB-3 batteries. This is real leather,
tan in color, and is in very nice condition. $25

Accessories specific to the Kenwood TH-21 / 31 / 41 series HTs:

Kenwood SC-8 T, soft case for TH-21/31/41 series HTs
Protects the radio, and has a clear window in the front,
so one can see the touch tone pad.
This one looks close to new, with the Kenwood lettering
still perfect with no wear. $12

Special rubber duck antenna for Kenwood TH-21 HT with threaded
connector
Kenwood RA-6 regular, 6.6 inches long - $10
As above but for TH-41 HT, 440 MHz - Stubby - $15

Accessories specific to the Kenwood TR-2400 HT:

Belt clip for TR-2400 HT, complete with hardware - $8

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of
the Kenwood TR-2400, 2 meter HT, outside of the HT itself.
Usually, one must have the battery inside the HT, but this
lets you charge a second battery outside of the HT. The
original charger is used.
It is in good shape, and works fine. $3

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
This adapter can be used on any HT with a BNC connector. $5

Santec HT Accessories:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap.
The case itself is in very nice shape. The leather
shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a
service pack. It has schematics, circuit explanations,
voltages, etc. $18

Battery charge adapter for Azden PCS-300 HT
This is an adapter that permits one to charge the battery of the
Azden PCS-300, 2 meter HT, outside of the HT itself. Usually,
one must have the battery inside the HT, but this lets you charge
a second battery outside of the HT. The original charger is used.
If you have a PCS-300 HT, you need this adapter.
It works fine, and looks like new. $3

Belt Clips for various HTs -- All include the hardware with
the belt clip
$8 each
Kenwood BH-2 for TH-215, TH-225, TR-2500, TR-2600, and others
Kenwood TR-2400
Motorola
Yaesu FT-209

Wrist Straps for various HTs - $4 each
Kenwood TR-2400
Kenwood TH-21/31/41
Yaesu FT-209

Antennas and antenna related items for sale:

Two meter mobile antenna:

Cushcraft Magnetic Mount 5/8 wave, 3 db gain antenna for 2 meters
Consists of a heavy duty mag mount, with coax, and the antenna
and spring.
It works fine and looks fine also. $50

Gain antenna coil, spring and whip
The antenna is a 5/8 wave antenna for 2 meters, which
has a gain of about 3 db. The coil can be used with any
of the NMO mounts (made by Motorola, Larsen, Cushcraft
and many others). The antenna is approximately four feet
long, and is in good condition. $30

As above, but without the whip.
The whips are hard to ship, so you might want only the coil
and spring, and obtain a whip locally. $25

Larsen NMO-MM Mag Mount
This rectangular mag mount features an extremely strong magnet.
Any of the NMO antennas made by Larsen, Motorola, Cushcraft, and
many others will fit on it. It includes coax, with an N connector
on it. It is in great condition for $22.

Cushcraft CSMG NMO Magnetic Mount
This is a strong, round, magnetic mount which can be used with
any NMO antenna. Coax is included, with a PL-259 on the end.
Nice condition for $20.

Larsen VHF and UHF Mobile Antennas:

Antennas are used, but in very good condition.
All fit the Larsen NLA mount, which is a mount that
is proprietary to Larsen.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 m; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on the
70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
Can be cut for 2 m, 220 MHz, or 440 MHz. $7

Larsen Q
Fits a 5/16 inch stud, such as the Larsen LM mount, and others.
It can be cut for 2 meters, 220 MHz, or 450 MHz bands. $7

Larsen NMO-Q
Precut for 450 MHz. New, still in bag. $8

Avanti / Antenna Specialists "On Glass" antennas:

These antennas were made by Avanti, and then later by
Antenna Specialists, to mount on a windshield, or other
glass. They do not require a ground plane, as they are
1/2 wave antennas, rated to have 3 db gain. They are
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Rubber Duck Antennas for your HT:

All are for 2 meters, are in very nice condition, and
are $10 each, unless stated otherwise.

BNC Connector, 4.6 inches long

5/16 inch threaded, as used by Motorola and others
Regular, 5.7 inches long
Stubby, 4 inches long

Type F connector, 6.5 inches long

PL-259 connector, 6.5 inches long
HyGain 275, still sealed in original packaging
from when I bought it 20 or 25 years ago

PL-259 connector - Stubby, 4.6 inches long
Centurion, still sealed in original package
from when I bought it 20 or 25 years ago

Special Rubber Duck antennas for Kenwood TH-21 series
2 meter HTs with the threaded connector
Kenwood RA-6 regular, 6.6 inches long
As above but for TH-41 HT, 440 MHz, Stubby, $15

Alinco EA-0085 for 220 MHz
BNC connector, 5.6 inches long

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

1980. FS: 500 watt power transformer

Yahoo group: amatuerradioswapfest
Date: 2009-02-22 00:52:39 UTC
From: Bry Carling
Topic: 1980 Message: 1980

FOR SALE: 500 watt potted AC power transformer.
Gray, military style, above chassis mount.

Primary 115 - 125 V AC
Secondaries:
5V CT at 5A
880V CT at 360 mA continuous (720 mA ICAS)
180V at 60mA continuous (120 mA ICAS)
5V CT at 2.5 A
6.3V at 15 A
6.3V at 6 A
6.3V at 1 A

Type T-4818 made in Bloomfield, NJ by
"Prototype Transformer Corp."
Excellent potted design with dimensions:
5-1/8" X 4-5/8" X 6-1/2" tall.

Available for $22.00 plus $15.00 for continental USA shipping
(no Alaskuh or Hawaii etc.)

1981. FS: 20 RF Chokes for $25.00

Yahoo group: amatuerradioswapfest
Date: 2009-02-22 19:27:37 UTC
From: Bry Carling
Topic: 1981 Message: 1981

FOR SALE:
Here's a really nice assortment of 20 new and used RF chokes. Most are
new, a few used. There is a pair of plate suppresors, a large RF plate choke.
Several nice NEW RFCs.ALso nice variable LF/MF Loopstick with chassis mount.
Will sell the entire batch for $25.00 plus $6.00 shipping.

Picture and details here:

http://www.af4k.com/miscpart.htm

1982. Balun, Wattmeters, and other antenna related items FS

Yahoo group: amatuerradioswapfest
Date: 2009-02-28 13:14:34 UTC
From: Ken Simpson, W8EK
Topic: 1982 Message: 1982

Antennas and antenna related items for sale:

HyGain BN-86 Antenna Balun
The HyGain BN-86 Balun is a 1:1 balun that may be used on
beam antennas or on dipoles. HyGain used it with the TH-6
Tribanders (plus many others), but it has many more uses on
most any type of antenna between 3 and 30 MHz.
The spec sheet says it is good for 1500 W PEP, or 800 W
average with less than 2:1 SWR. Power rating goes down with
an increase in SWR.
It can be mounted directly to the boom of a beam with a U
bolt, or it can be hung as an inverted V, or used as a straight
dipole. To put it another way, it is very versatile.
This one works fine, and looks good also.
These are about $80 new. This one includes the paper
work, for $40.

Wattmeters and SWR Bridges:

MFJ 860 HF Wattmeter / SWR Bridge
This meter has the modern cross needle meter that will read
both forward and reverse power at the same time, and hence
SWR also. It is for 1.8 thru 60 MHz, and has scales for 300
Watts and 30 Watts full scale. If 12 V is applied, the meter
is back lighted.
This particular unit works fine, and looks fine also.
With paper work for $45.

MFJ 817 Cross Needle VHF Wattmeter / SWR Bridge
The MFJ-817 covers 2 meters VHF and 440 MHz UHF. The extra large
3 inch Cross Needle Meter reads SWR and peak/average for forward
and reflected power. Power ranges: 200/2 Watts forward and 50/5
Watts reflected. Reads SWR from 1:1 and 8:1. SO-239 connectors.
There is a switch for dial illumination (requires 12 V DC).
This one works fine and looks nice with its black face.
These are over $100 new, but you can have this one for $60.

Antenna Switch:

B & W Model 550 A coax switch
This model will switch up to 5 antennas, and does NOT
ground unused antennas. It has SO-239 connectors
on the sides, with the coax coming out like spokes
of a wheel.
This particular switch has the optional B & W plate
installed that has the antennas labeled with 28, 21,

14, 7, and 3.5 on the dial.
Of course it works fine, and look OK also.
$40

ARRL Antenna Book
1974, 13th edition, smaller size
pages show yellowing $8

W2AB's "Second Op"
This is the large (about a foot in diameter) "wheel"
that has a lot of DX information on it.
By turning the wheel to the call sign prefix, the continent,
zone, and country is shown, along with great circle beam
headings from different parts of the country. In another
area, postage rates are shown, but I am certain that info
is outdated.
This is the "New 7th Edition - Fully Computer Revised".
It is in good condition. $10

Two meter mobile antenna:

Cushcraft Magnetic Mount 5/8 wave, 3 db gain antenna for 2 meters
Consists of a heavy duty mag mount, with coax, and the antenna
and spring.
It works fine and looks fine also. $50

Gain antenna coil, spring and whip
The antenna is a 5/8 wave antenna for 2 meters, which
has a gain of about 3 db. The coil can be used with any
of the NMO mounts (made by Motorola, Larsen, Cushcraft
and many others). The antenna is approximately four feet
long, and is in good condition. $30

As above, but without the whip.
The whips are hard to ship, so you might want only the coil
and spring, and obtain a whip locally. $25

Larsen NMO-MM Mag Mount
This rectangular mag mount features an extremely strong magnet.
Any of the NMO antennas made by Larsen, Motorola, Cushcraft, and
many others will fit on it. It includes coax, with an N connector
on it. It is in great condition for $22.

Cushcraft CSMG NMO Magnetic Mount
This is a strong, round, magnetic mount which can be used with
any NMO antenna. Coax is included, with a PL-259 on the end.
Nice condition for $20.

Larsen VHF and UHF Mobile Antennas:

Antennas are used, but in very good condition.
All fit the Larsen NLA mount, which is a mount that
is proprietary to Larsen.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 m; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on the
70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
Can be cut for 2 m, 220 MHz, or 440 MHz. $7

Larsen Q
Fits a 5/16 inch stud, such as the Larsen LM mount, and others.
It can be cut for 2 meters, 220 MHz, or 450 MHz bands. $7

Larsen NMO-Q
Precut for 450 MHz. New, still in bag. $8

Avanti / Antenna Specialists "On Glass" antennas:

These antennas were made by Avanti, and then later by
Antenna Specialists, to mount on a windshield, or other
glass. They do not require a ground plane, as they are
1/2 wave antennas, rated to have 3 db gain. They are
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Rubber Duck Antennas for your HT:

All are for 2 meters, are in very nice condition, and
are $10 each, unless stated otherwise.

BNC Connector, 4.6 inches long

5/16 inch threaded, as used by Motorola and others
Regular, 5.7 inches long
Stubby, 4 inches long

Type F connector, 6.5 inches long

PL-259 connector, 6.5 inches long
HyGain 275, still sealed in original packaging
from when I bought it 20 or 25 years ago

PL-259 connector - Stubby, 4.6 inches long
Centurion, still sealed in original package
from when I bought it 20 or 25 years ago

Special Rubber Duck antennas for Kenwood TH-21 series
2 meter HTs with the threaded connector
Kenwood RA-6 regular, 6.6 inches long
As above but for TH-41 HT, 440 MHz, Stubby, $15

Alinco EA-0085 for 220 MHz
BNC connector, 5.6 inches long

Hustler HF mobile antenna resonators:

Standard 400 Watt Hustler resonators
15 meter resonator RM-15 $14
10 meter resonator RM-10 Still sealed in original package $15

"Super" high power resonators (good for 2 KW PEP)
80 meter RM-80 S
.....can be cut for CW or phone, and also used on 4BTV
.....Vertical to give 80/75 meter coverage $38
15 meter RM-15 S $18
10 meter RM-10 S $16

All work fine and are in great cosmetic condition.

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted
in the coax line after the transmitter or transceiver) to
reduce harmonic interference.

Nye Viking Low Pass Filter Model 020-001
This filter is rated at 2000 watts, with over 65 db of attenuation
above 57 MHz. These are about $60 new; this one is close to new
for only $35.

Johnson 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut off frequency
of 45 MHz and 75 db of attenuation. It is rated to take 1000 Watts of
AM, or 5000 Watts PEP SSB. It has SO-239 connectors on each end.
$35.

B & W FL-10/1500 (Formerly known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters, and will
handle 1500 Watts. SO-239 connector on each end. This is the latest
model B & W filter. It is in very nice condition; it looks very
close to new. $ 40.

Coax connectors and adapters:
Prices are per connector.
Several of each are available.

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Prices do not include shipping from Florida.

Thanks.

From: Bry Carling
Topic: 1983 Message: 1983

FOR SALE: Two Ham Radio Interfaces...

KANTRONICS "The Interface" RTTY - CW - Digital Modes interface.
Has connections for AUDIO IN, EXT SPKR, Loop Out, DEMOD Out,
Computer serial, KEY IN, KEY OUT, 4-pin mic line connector for PTT,
AFSK, GND etc.
Needs external DC power supply - not included.
Excellent condition - available for $8.00 plus shipping
As seen here:
http://www.biocomp.net/o33496.htm

Manuals are available on the web.

ALSO:

MFJ1272 TNC microphone switch.
Has connections for MIC IN, AUDIO IN, EXT. SPKR., OUTPUT
to RADIO, OUTPUT to TNC etc. Excellent condition.
Available for $5.00 plus shipping.

Similar to the one seen here:
http://www.mfjenterprises.com/pictures/MFJ-1272B.jpg

Manuals are available on the web.

1986. For Sale Custom Made Double Bazooka Antennas

Yahoo group: amatuerradioswapfest
Date: 2009-03-03 17:40:22 UTC
From: AD5VJ Bob
Topic: 1986 Message: 1986

These antennas are very broadbanded, very quiet antennas. They are well known for a improving your signal to noise ratio even for
the low bands. If you are tired of all the noise crashes on 80 and/or 40 meters do yourself a favor and try one out, you will love
the performance.

Made from almost total coax, the antennas are very rugged and do not have to be mounted very high compared to other types of
antennas to work well. The Government has used them for years, since around the 1940's and were first used as radar antenas (what
does that tell you)

Send me an email or call me at the number below and let me know what frequency you want it for, that will tell me how much coax I
will need to make it and I get back with you on your price including shipping to your address.

Old Fashioned - 30 day Satisfaction Guarantee or your money back!!!
Old fashioned means your satisfaction not mine.

817-629-3852
We do take paypal
Our paypal address is:

Tnx Bob AD5VJ

1987. FS: ELK 2M/440L5 5 element antenna

Yahoo group: amatuerradioswapfest
Date: 2009-03-04 05:10:00 UTC
From: kg4kbu
Topic: 1987 Message: 1987

65 dollars shipped OBO
go here for my contact info:
http://lexington.craigslist.org/ele/1059501783.html

Features:

* 2M Gain 6.8 dbd (8.9 dBi)
* 440 Gain 7 dBd (9 dBi)
* 20 +dB Front to Back Ratio
* 24 Inch Boom
* 1:1 SWR 144-148 Mhz, 440-450 Mhz
* 200W Max Power 2M, 100W 440
* Weighs 1.3 lbs.
* Corrosion resistant aluminum alloy boom
* Anodized aluminum elements
* Stainless steel hardware
* Designed for long life
* Super fast and easy assembly/disassembly (three minutes).
* Color-coded elements screw onto studs on the color-coded boom- just match the colors!
* Two bands with one coax fitting. Use your dual band HT for satellite contacts.
* No duplexer required, no duplexer loss, no duplexer power limit, no duplexer cost!
* Use all portions of the band without retuning.
* Change polarity easily, just twist the mounting assembly to change from vertical to horizontal polarity.
* Designed with the latest synthesis software to achieve highest gain and highest front to back ratio for its size.

1988. 2 m rig, plus various accessories FS

Yahoo group: amatuerradioswapfest
Date: 2009-03-14 13:50:14 UTC
From: Ken Simpson, W8EK
Topic: 1988 Message: 1988

Two meter rig and various accessories For Sale:

Two meter FM Transceiver:

KDK FM-2033 mobile FM transceiver for 2 meters
This rig is fully synthesized, has memories, scan, subaudible
PL tone, and all the things that one expects in a 2 meter rig.
It has a touchtone microphone with it. This rig produces just
over 25 Watts in high power and about 7 watts in low power.
It sounds great, and hears well.
It needs 13 V DC at about 7 amps.

This particular rig is in very nice condition. There is
one paint spot missing, about the size of a pin head. It
includes the touchtone microphone, mobile mounting bracket,
power cord, and paper work. The original box is also included,
although the box looks much worse than the radio. Even the
mic clip, and a bag of screws are included, as is the
original multicolored sales brochure. $89

Antenna Switch:

B & W Model 550 A coax switch
This model will switch up to 5 antennas, and does NOT
ground unused antennas. It has SO-239 connectors
on the sides, with the coax coming out like spokes
of a wheel.
This particular switch has the optional B & W plate
installed that has the antennas labeled with 28, 21,
14, 7, and 3.5 on the dial.
Of course it works fine, and looks OK also.
$40

MFJ 1272 BZ switch to transfer between microphone and TNC

MFJ made these so it would be easy to use a TNC such as the
AEA PK-88. The small box has a socket to plug your microphone
into on the front, along with a switch to switch between mic
or TNC. There are two cables coming out of the back, with one
going to the mic jack on your rig, and other going to your TNC.
There is also provision for receive audio in, and an external
speaker. No power is required. Inside the box is a series of
jumpers, so that it can be configured for any rig.

This model is made to switch between an AEA PK-88, and any rig
with the round 8 pin mic connector.

Paper work is included that shows how to set the jumpers for most of the common rigs (Kenwood, Yaesu, Icom, Alinco, etc.).

It is in A-1 shape, and works 100%. $30

DTMF Touch Tone Microphones:

Drake 1525 EM Touchtone Microphone
Normal hand mic from the front, but has a touchtone pad on the back. Four pin mic plug. Used, but in good shape. Includes paper work. $35

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently has a 6 pin connector for the KDK 2030, but that can be changed. Nice condition. $40

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with a low impedance microphone. This one has the 8 pin modular plug (like a computer LAN) on it. This mic has not been used, so it is in really great condition. With paper work for $40.

CES "Micropad" touch tone mic
No model number on it, but it has a 12 digit pad on the back. Low Z mic element with round 8 pin connector wired for Kenwood. $38

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a normal low impedance microphone. With 4 pin plug. Like new. $38

Regular (non DTMF) Microphones:

Drake hand microphone
This is like the hand mic that came with the Drake TR-72, TR-22 C, TR-33 C, and others. It has the standard 4 pin plug wired for Drake/Kenwood, and is a 500 ohm mic. Of course it could be used on an HF rig as well as a 2 m rig. It looks great and works fine. $30

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed. Stripped and tinned leads. It works fine, and looks good also. $25

Icom charger:

Icom BC-35 desk charger
The BC-35 will fast charge the BP-2, BP-5, BP-7, and BP-8 battery packs. It will also charge the BP-3 and BP-4, but these take 12 to 15 hours. It works 100% and looks fine as well. $35

Speaker Microphones:

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine and works fine. $18

Yaesu YM-24 A speaker mic.
Fits FT-207, 208, plus many others. It has the odd little round connector on it like Yaesu, Wilson, Santec, and others used in the 1970s and 80s.
This particular unit works fine, and looks great also. $20

Accessories for several Kenwood HTs:

Kenwood PG-3 E DC Cord
This cord plugs into the cigarette lighter to provide 12 V DC to the TH-215, TH-225, TH-415, and other Kenwood HTs. It has a filter built in, and permits high power operation of the HTs. $20

Kenwood BH-2 Belt Clip for TH-215, TH-225, TR-2500, TR-2600, and others $8

Kenwood SC-12 Vinyl Case
For TH-215, TH-225 and others, with room for the standard PB-2 and PB-3 battery packs. Black color. In very nice condition. $15

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1 and PB-4 battery packs. It can also be used with the smaller PB-2 and PB-3 battery packs, by putting a filler in the case. Black color. In very nice condition. $15

Bianchi Real Leather Case for TH-215, TH-225, etc.
For use with the larger PB-1 and PB-4 batteries, but can be used with the smaller PB-2 and PB-3 batteries. This is real leather, tan in color, and is in very nice condition. $25

Accessories specific to the Kenwood TH-21 / 31 / 41 series HTs:

Antenna adapter for Kenwood TH-21 / 31 / 41 HTs
This adapts the antenna connector found on these HTs to a standard BNC connector. $5

Special rubber duck antenna for Kenwood TH-21 HT with threaded connector
Kenwood RA-6 regular, 6.6 inches long - $10
As above but for TH-41 HT, 440 MHz - Stubby - $15

Accessories specific to the Kenwood TR-2400 HT:

Belt clip for TR-2400 HT, complete with hardware - $8

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of
the Kenwood TR-2400, 2 meter HT, outside of the HT itself.
Usually, one must have the battery inside the HT, but this
lets you charge a second battery outside of the HT. The
original charger is used.
It is in good shape, and works fine. $3

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
This adapter can be used on any HT with a BNC connector. $5

Santec HT Accessories:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap.
The case itself is in very nice shape. The leather
shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a
service pack. It has schematics, circuit explanations,
voltages, etc. $18

Belt Clips for various HTs -- All include the hardware with
the belt clip
$8 each
Kenwood BH-2 for TH-215, TH-225, TR-2500, TR-2600, and others
Kenwood TR-2400
Motorola
Yaesu FT-209

Wrist Straps for various HTs - $4 each
Kenwood TR-2400
Kenwood TH-21/31/41
Yaesu FT-209

Antennas and antenna related items for sale:

Two meter mobile antenna:

Cushcraft Magnetic Mount 5/8 wave, 3 db gain antenna for 2 meters
Consists of a heavy duty mag mount, with coax, and the antenna
and spring.
It works fine and looks fine also. $50

Gain antenna coil, spring and whip
The antenna is a 5/8 wave antenna for 2 meters, which
has a gain of about 3 db. The coil can be used with any
of the NMO mounts (made by Motorola, Larsen, Cushcraft
and many others). The antenna is approximately four feet
long, and is in good condition. $30

As above, but without the whip.
The whips are hard to ship, so you might want only the coil
and spring, and obtain a whip locally. $25

Cushcraft CSMG NMO Magnetic Mount
This is a strong, round, magnetic mount which can be used with
any NMO antenna. Coax is included, with a PL-259 on the end.
Nice condition for $20.

Larsen PO-MM Mobile Antenna Mag Mount
This rectangular mag mount features an extremely strong magnet.
The center of the mag mount has an SO-239 connector, which
means any antenna with a PL-259 can be used with it.
It includes coax, with a PL-259 connector on it.
It is in good condition for $17.

Larsen VHF and UHF Mobile Antennas:

Antennas are used, but in very good condition.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 m; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on the
70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
Can be cut for 2 m, 220 MHz, or 440 MHz. $7

Larsen Q
Fits a 5/16 inch stud, such as the Larsen LM mount, and others.
It can be cut for 2 meters, 220 MHz, or 450 MHz bands. $7

Larsen NMO-Q
Precut for 450 MHz. New, still in bag. $8

Avanti / Antenna Specialists "On Glass" antennas:

These antennas were made by Avanti, and then later by
Antenna Specialists, to mount on a windshield, or other
glass. They do not require a ground plane, as they are
1/2 wave antennas, rated to have 3 db gain. They are
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Rubber Duck Antennas for your HT:

All are for 2 meters, are in very nice condition, and
are $10 each, unless stated otherwise.

5/16 inch threaded, as used by Motorola and others
Regular, 5.7 inches long
Stubby, 4 inches long

Type F connector, 6.5 inches long

PL-259 connector, 6.5 inches long
HyGain 275, still sealed in original packaging
from when I bought it 20 or 25 years ago

PL-259 connector - Stubby, 4.6 inches long
Centurion, still sealed in original package
from when I bought it 20 or 25 years ago

Special Rubber Duck antennas for Kenwood TH-21 series
2 meter HTs with the threaded connector
Kenwood RA-6 regular, 6.6 inches long
As above but for TH-41 HT, 440 MHz, Stubby, $15

Alinco EA-0085 for 220 MHz
BNC connector, 5.6 inches long

Coax connectors and adapters:
Prices are per connector.

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Kantronics "Interface II" Terminal Unit
This unit is made to copy RTTY signals, and feed the output
to a computer. To quote the brochure that is included with it,
it is "designed by the Kantronics team to give the discerning
operator excellent performance."
It features 170, 425, and 850 shift on both transmit and receive.
An AFSK generator is built in, or FSK can be used. It has two
separate channels for use with 2 rigs. For optimum reception,
a six pole filter is changed as the shift is changed. It requires
12 V DC at about 200 ma to operate.
These were originally about $270. You can get this one with
the paper work for only $30.

Prices do not include shipping from Florida.

Thanks.

1992. Reduced 40m and 6m crystals

Yahoo group: amatuerradioswapfest
Date: 2009-03-21 11:20:56 UTC
From: Bry Carling
Topic: 1992 Message: 1992

FOR SALE: FT-243 crystals for the ham bands... CQ CQ CQ...
(temporary reduced prices) - these are normally $12.00 each.

40m is about to open up a whole new adventure with the high power
broadcasters moving out by the end of March. To celebrate, here
are some deals on crystals. (I have many others available)

Some of these are on already-popular AM spots - others encourage
exploration and of course you can operate AM and CW anywhere
that they are allowed.

40m - 10m

7000 kHz - $4.00 each
7025 kHz - $10.00 each
7075 kHz - $8.00 each
7100 kHz - $5.00 each
7106.7 kHz - $6.00 each
7122 kHz - $9.00 each
7123 kHz - $9.00 each
7125 kHz - $5.00 each
7135 kHz - $5.00 each
7136.25 kHz - $4.00 each
7140 kHz - $8.00 each
7143 kHz - $11.00 each (20m AM)
7146 kHz - $9.00 each
7150 kHz - $9.00 each
7152 kHz - $5.00 each
7155 kHz - $5.00 each
7156.25 kHz - $5.00 each
7159 kHz - $9.00 each
7161 kHz - $9.00 each
7162 kHz - $9.00 each
7165 kHz - $5.00 each
7170 kHz - $5.00 each
7172 kHz - $4.00 each
7173.3 kHz - $4.00 each
7174 kHz - $5.00 each
7175 kHz - $5.00 each
7176 kHz - $4.00 each
7177 kHz - $4.00 each
7179 kHz - $4.00 each
7180 kHz - $5.00 each
7185 kHz - $6.00 each
7187 kHz - $6.00 each
7188 kHz - $6.00 each

7190 kHz - $9.00 each
7195 kHz - $9.00 each
7200 kHz - $4.00 each
7205 kHz - $4.00 each
7225 kHz - $4.00 each
7250 kHz - $9.00 each
7275 kHz - $9.00 each
7300 kHz - $4.00 each

6m:

8350 = 50.100 MHz - $5.00 each
8375 kHz = 50.250 MHz - $4.00 each
8400 kHz = 50.4 MHz - $12.00 each
8425 kHz = 50.55 MHz - $4.00 each
8450 kHz = 50.7 MHz - $4.00 each
8475 kHz = 50.85 MHz - $4.00 each

Many other frequencies available. See web site below.

Prices are good while they last, and through March 30th only.
Shipping additional.

Yahoo group: amatuerradioswapfest
Date: 2009-03-28 23:43:14 UTC
From: Bob Donnell
Topic: 1995 Message: 1996

Beware of this seller, Mark Helinski.

About a year ago, on February 11th, 2008, I committed to buy a Drake TR-7 and PS-7 power supply pair from Mark Helinski. I mailed a postal money order for the full agreed-on amount on February 12th. Mark had specified $100 to ship the radio and power supply. I asked him to pack the equipment well, and figured that was would make the $100 price set well worthwhile, if well packed.

When Mark finally shipped the radio, on March 11th, he didn't ship the power supply with it, and after having the threaten to start a fraud investigation, he said he's ship the power supply but wanted more money. The TR-7 arrived with shipping damage, on March 20th. I don't know when the money order actually arrived, so it may not have been a whole month after I sent the money before the first shipment was made. I reiterated my intent to pursue a fraud investigation, and Mark did finally ship the power supply too, apparently on April 4th, 2008, and it arrived on April 7th, 2008, about two weeks after the transceiver was received.

Both the TR-7 and PS-7 arrived in damaged condition, because Mark used no cushioning materials in packing either one. The bottom panel of the TR-7 was bent, and only two feet survived the shipping. I asked Marc to do a better job of packing the power supply for shipment, but he didn't. For the power supply, the one foot that survived, probably probably only did so because the power supply bottom panel was dented in about the height of the foot, by the pressure put on it during handling.

After having made the complete specified payment for the radio and power supply, up front, it was about 2 months before I had all of the equipment I'd paid for in my posession.

Unless you can go pick up equipment from Mark, in-person, be very wary.

Mark: As I said, if I spotted you selling equipment, I'd warn others about how you treated me.

Regards,

Bob Donnell, KD7NM

PS: It also appears that Mark might operate a pirate shortwave station:

1999. Misc Ham Accessories FS

Yahoo group: amatuerradioswapfest
Date: 2009-04-03 19:57:09 UTC
From: Ken Simpson, W8EK
Topic: 1999 Message: 1999

Miscellaneous Ham Accessories For Sale:

MFJ 812 B VHF Wattmeter / SWR Bridge
This meter covers 144 and 220 MHz. You can read forward and reflected power in 2 ranges - 30 or 300 Watts. It also reads SWR from 144 thru 220Mhz.
The MFJ-812B also reads relative field strength from 1 to 220 MHz. It has a binding post for the field strength antenna.
It is in a nice eggshell white and black case.
This one works fine and looks great also.
With paper work for $30.

HyGain BN-86 Antenna Balun
The HyGain BN-86 Balun is a 1:1 balun that may be used on beam antennas or on dipoles. HyGain used it with the TH-6 Tribanders (plus many others), but it has many more uses on most any type of antenna between 3 and 30 MHz.
The spec sheet says it is good for 1500 W PEP, or 800 W average with less than 2:1 SWR. Power rating goes down with an increase in SWR.
It can be mounted directly to the boom of a beam with a U bolt, or it can be hung as an inverted V, or used as a straight dipole. To put it another way, it is very versatile.
This one works fine, and looks good also.
These are about $80 new. This one includes the paper work, for $40.

Two meter FM Transceiver:

KDK FM-2033 mobile FM transceiver for 2 meters

This rig produces just over 25 Watts in high power and about 7 watts in low power. The rig is fully synthesized, has memories, scan, subaudible PL tone, and all the things that one expects in a 2 meter rig. It has a touchtone microphone with it. It sounds great, and hears well.
It needs 13 V DC at about 7 amps.

This particular rig is in very nice condition. There is one paint spot missing, about the size of a pin head. It includes the touchtone microphone, mobile mounting bracket, power cord, and paper work. The original box is also included, although the box looks much worse than the radio. Even the mic clip, and a bag of screws are included, as is the original multicolored sales brochure. $89

MFJ 722 audio filter

This is an audio filter made to go between your rig
and speaker. It includes a bypass switch.

You can put it into a high pass mode, use it as a notch
filter, or as a narrow CW filter. It is great for both
SSB and CW, and appears to be similar to the Autek QF-1
audio filter, but is in a much nicer egg shell and
woodgrain enclosure.
It requires 12 V DC for operation.

For more info, please see
http://www.mfjenterprises.com/Produc...ductid=MFJ-722

This particular filter works fine, and looks OK also.
Paper work included for $45.

TenTec Accessories:

Scout 555 / Argo 556 Band Module
Band module to add 40 meters (7 MHz) to the Scout or Argo.
Extremely nice condition for $65.

Power cable for Hercules 444 linear amplifier
This is the heavy cable that goes from the power supply
to the amp. It has a heavy duty 9 pin molex type
connector on both ends, and multiple runs of either
#12 or #14 wire, and is about 6 feet long.
It is in good shape. $18

Accessories for several Kenwood HTs:

Kenwood PG-3 E DC Cord
This cord plugs into the cigarette lighter to provide 12 V DC
to the TH-215, TH-225, TH-415, and other Kenwood HTs. It has
a filter built in, and permits high power operation of the HTs.
$20

Kenwood BH-2 Belt Clip for TH-215, TH-225, TR-2500, TR-2600,
and others $8

Kenwood SC-12 Vinyl Case
For TH-215, TH-225 and others, with room for the standard PB-2
and PB-3 battery packs. Black color. In very nice condition. $15

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1 and
PB-4 battery packs. It can also be used with the smaller PB-2 and
PB-3 battery packs, by putting a filler in the case. Black color.
In very nice condition. $15

Bianchi Real Leather Case for TH-215, TH-225, etc.
For use with the larger PB-1 and PB-4 batteries, but can be used
with the smaller PB-2 and PB-3 batteries. This is real leather,
tan in color, and is in very nice condition. $25

Accessories specific to the Kenwood TH-21 / 31 / 41 series HTs:

Antenna adapter for Kenwood TH-21 / 31 / 41 HTs
This adapts the antenna connector found on these HTs to a standard BNC connector. $5

Special rubber duck antenna for Kenwood TH-21 HT with threaded connector
Kenwood RA-6 regular, 6.6 inches long - $10
As above but for TH-41 HT, 440 MHz - Stubby - $15

Accessories specific to the Kenwood TR-2400 HT:

Belt clip for TR-2400 HT, complete with hardware - $8

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine and works fine. $18

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually, one must have the battery inside the HT, but this lets you charge a second battery outside of the HT. The original charger is used.
It is in good shape, and works fine. $3

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. This adapter can be used on any HT with a BNC connector. $5

Santec HT Accessories:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case. It fits most of the Santec HTs, such as the HT-1200, ST-142, ST-144, ST-440, etc. The real leather case includes a built in belt clip, plus a removable leather shoulder strap.
The case itself is in very nice shape. The leather shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a service pack. It has schematics, circuit explanations, voltages, etc. $18

Belt Clips for various HTs -- All include the hardware with the belt clip
$8 each
Kenwood BH-2 for TH-215, TH-225, TR-2500, TR-2600, and others
Kenwood TR-2400
Motorola
Yaesu FT-209

Wrist Straps for various HTs - $4 each
Kenwood TR-2400
Kenwood TH-21/31/41
Yaesu FT-209

Yaesu Items:

Yaesu MH-12 A2B Speaker Microphone
This speaker microphone has a 3.5 mm and a 2.5 mm plug
on it, molded together, as is used on many, many HTs.
It will fit many Yaesu, Icom, Alinco, Radio Shack and
other HTs.
This one works fine, and looks very close to new.
I can not find any defects on it. $20

Yaesu YM-24 A speaker mic.
Fits FT-207, 208, plus many others. It has the odd
little round connector on it like Yaesu, Wilson, Santec,
and others used in the 1970s and 80s.
This particular unit works fine, and looks great also. $20

Yaesu Hat
This "Ball Cap" has Yaesu on the front of it in big letters.
Actually, I have two. One is white and says only "Yaesu".
The other is dark red and says "Yaesu Communications".
Both have never been used. Your choice for $6.

Icom charger:

Icom BC-35 desk charger
The BC-35 will fast charge the BP-2, BP-5, BP-7, and BP-8
battery packs. It will also charge the BP-3 and BP-4, but
these take 12 to 15 hours. It works 100% and looks fine
as well. $35

AEA Items:

AEA AC-1 Power Supply
"Wall wort" 12 V DC power supply at 1 amp.
Can be used with PK-232 or PK-88.
It plugs directly into these units, or any with
a 2.1 mm coaxial connector, center positive.
It works 100% and looks great. $15

AEA Software
The followings is legitimate AEA software, with the
original disks with serial numbers, and original documentation.
It is not copied or "bootleg" software.
Log Windows, Version 2.0 - $15

MFJ 1272 BZ switch to transfer between microphone and TNC

MFJ made these so it would be easy to use a TNC such as the
AEA PK-88. The small box has a socket to plug your microphone

into on the front, along with a switch to switch between mic
or TNC. There are two cables coming out of the back, with one
going to the mic jack on your rig, and other going to your TNC.
There is also provision for receive audio in, and an external
speaker. No power is required. Inside the box is a series of
jumpers, so that it can be configured for any rig.

This model is made to switch between an AEA PK-88, and any rig
with the round 8 pin mic connector.

Paper work is included that shows how to set the jumpers for
most of the common rigs (Kenwood, Yaesu, Icom, Alinco, etc.).

It is in A-1 shape, and works 100%. $30

Hand Microphones:

Drake hand microphone
This is like the hand mic that came with the Drake TR-72,
TR-22 C, TR-33 C, and others. It has the standard 4 pin plug
wired for Drake/Kenwood, and is a 500 ohm mic. Of course it
could be used on an HF rig as well as a 2 m rig. It looks
great and works fine. $30

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed.
Stripped and tinned leads.
It works fine, and looks good also. $25

Touch tone (DTMF) microphones:

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently
has a 6 pin connector for the KDK 2030, but that can
be changed. Nice condition. $40

Drake 1525 EM Touchtone Microphone
Normal hand mic from the front, but has a touchtone pad
on the back. Four pin mic plug. Used, but in good shape.
Includes paper work. $35

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
With paper work for $40.

CES "Micropad" touch tone mic
No model number on it, but it has a 12 digit pad on the
back. Low Z mic element with round 8 pin connector
wired for Kenwood. $38

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $38

Johnson Viking Phone Patch - Model 250-46
This phone patch is made to be mounted vertically beside the rig.
It is about 6 inches high, 2 inches wide and 3 inches deep. It
is possible that the face plate can be removed, and it made to
be mounted horizontally, but I have not done that. The reason
I say this is that there are feet on the bottom, and on the left
side. Maybe the feet on the left side are to protect the rig.
In any case, it has 3 pots on the front for Null, Receive Volume,
and transmit gain, along with a switch for phone patch or
microphone. On the back is a terminal strip for speaker and
phone line. The microphone input has the 2 pin Amphenol
connector like used by Johnson, Heath, Hallicrafters, and many
others in that era.
This one is in nice shape. Paint is original and nice and
lettering close to perfect. No scratches that I can find. $40

Johnson Nye Viking 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut off
frequency of 45 MHz and 75 db of attenuation. It is rated to
take 1000 Watts of AM, or 5000 Watts PEP SSB. $35

Vintage B & W model 426 low pass filter
B & W TVI filter, cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each end.
This is an older model that seems much heavier duty. It
weighs almost twice as much as the newer model, and looks
like it would take more power. It likely was made in the
days that plate modulated AM was the rule. $30

Special Deluxe CW Key
This key is extremely nice, and is special in its mounting.
The key itself is a Nye Viking Speedex oval base 310-001
key, which has very nice action.
What separates this key from any others is the base it is
mounted on. It is solid metal about 6 inches long and 5
inches wide and 3/4 inch thick. It weighs about 6 pounds,
so it will not move across the desk when you use it.
There is a nice beveling around the top. To put it another
way, this is a specially machined base, made for the key.
The metal appears to be copper, although it is not shiny
copper, but instead has a "patina" to it like antique items.
A layer of cork covers the bottom to protect your operating

table. There is a cable with a metallic shielded 1/4 inch
plug on it.
Certainly a one of a kind key! $99

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo
connector on the end, like used by most rigs. It looks
great. $8
As above, but 1/8 inch (3.5 mm) plug. $8

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch
phone plug on it, as is used with a straight key. $5
As above, but 1/8 inch (3.5 mm) plug. $5

Vintage Code Practice Key / Buzzer For Sale:
Herald Electronics Co. Model SW-12 A
"Telegraph Key with Buzzer"
This is a very vintage unit. It is in its original
box, with the paper work, with an address of simply
"Chicago, Ill", with no zip code, and not even a zone.
I would guess 1950's vintage, but of course that is a guess.
The unit consists of a code key built into a base that
appears to be bakelite. The key is somewhat similar to
a J-38 (without a shorting bar), with shiny nickel plated
knurled nuts. The key has a regular knob, and not a navy
knob. Behind the key is a round cover over the buzzer,
and behind that is a place for a single D cell battery.
The unit is complete with the original instruction sheet,
in the original box. $40

Code Tapes:

All are original tapes in great condition, in their
original containers.

ARRL "Increasing Your Code Speed" 15 to 20 WPM
Two tape set to take one from 15 WPM up thru 20 WPM;
Paper work is included. $10

Gordon West "Radio School" code tape
"10 WPM Plateau Breaker" $6

Hustler "Super" high power resonators (good for 2 KW PEP)
80 meter RM-80 S
.....can be cut for CW or phone, and also used on 4BTV
.....Vertical to give 80/75 meter coverage $38
15 meter RM-15 S $18
10 meter RM-10 S $16
All work fine and are in great cosmetic condition.

Prices do not include shipping from Florida.

Thanks.

2000. Quality Custom Made Bazookas & Dipoles

Yahoo group: amatuerradioswapfest
Date: 2009-04-05 15:19:00 UTC
From: AD5VJ Bob
Topic: 2000 Message: 2000

Order a Custom Made Double Bazooka Antenna or Dipole (your preference).

Length is determined by your band of operation
160mtr=244' 80 mtr=126' 40 mtr=85' approx.

These antennas are Hand Made and Tested For Performance

Bazookas not the imports found on eBay. No feedline radiation, are broadbanded, quiet antennas, well known for a improving your
signal to noise ratio for the low bands. Tired of all the noise crashes on 160/80/40/30 meters or any other band, do yourself a
favor and try one out, you will love the performance and quality.

Bazookas made from total coax, the antennas are very rugged and do not have to be mounted very high compared to other types of
antennas to work well. The Government has used them for years, since around the 1940's and were first used as radar antennas (what
does that tell you)

2001. Many Ham Publications FS

Yahoo group: amatuerradioswapfest
Date: 2009-04-11 21:49:32 UTC
From: Ken Simpson, W8EK
Topic: 2001 Message: 2001

Ham Publications For Sale:

Some are vintage, and some more modern.
All are in excellent condition, unless listed otherwise.

ARRL Antenna Book
1974, 13th edition, smaller size $8

W2AB's "Second Op"
This is the large (about a foot in diameter) "wheel"
that has a lot of DX information on it.
By turning the wheel to the call sign prefix, the continent,
zone, and country is shown, along with great circle beam
headings from different parts of the country. In another
area, postage rates are shown, but I am certain that info
is outdated.
This is the "New 7th Edition - Fully Computer Revised".
It is in good condition. $10

ARRL Hints and Kinks for the Radio Amateur
1974, smaller size, $8
1989, 12th edition, $8
1997, 14th edition, like new, $14

ARRL How to Become a Radio Amateur, 1970, 26th edition,
Extremely nice, close to new condition,
with many vintage ads in the back, $15

ARRL Understanding Amateur Radio
1977, no edition number listed, $8

Bash Book
This is the book that started it all, back in the 1970's.
"General Class Test Guide, The Final Exam" listing all of
the General Class questions and answers. Nice condition. $8

ARRL Handbooks:

These are in the smaller format (6 1/2 by 9 1/2 inch size).
They include tube charts and ads for vintage equipment,
which are not in the newer handbooks.
1977 - 54th edition - Good condition $10

More modern, larger 8 1/2 by 11 inch format:
1981 - 58th edition - Nice shape $13
1982 - 59th edition - Good condition $11

Code Tapes:

All are original tapes in great condition, in their
original containers.

ARRL "Increasing Your Code Speed" 15 to 20 WPM
Two tape set to take one from 15 WPM up thru 20 WPM;
Paper work is included. $10

Gordon West "Radio School" code tape
"10 WPM Plateau Breaker" $6

ARRL Operating an Amateur Radio Station
1976 - 57th edition $3
1978 - 58th edition $3
1983 - 61st edition $3
1984 - 62nd edition $3
1989 - 63rd edition $4

ARRL Radio Amateurs Operating Manual, 1985, 2nd edition, $8

Ham Price Guide - 2nd Edition
Lists prices of used ham gear - $5

Call Area Map of the World
33 x 24 inches in size $5

ARRL Call area map of the US
Approx 37 x 24 inches in size $8

ARRL DXCC Countries List
Sept 1997 - marks in it - $2

ARRL FCC Rule book
1988 - seventh edition - $3
1989 - eighth edition - $3
2004 - 13th edition - $10

RSGB "Amateur Radio Operating Manual"
1982 - 2nd edition - $8

ARRL Public Service Communications 1985 - Ninth edition - $3
1990 - no edition number listed - $3

ARRL Amateur Radio Field Resources Directory
1986-87 - First edition - $ 7

General Class License Manual by Gordon West, WB6NOA
Second Edition - Like New - $3
Fifth Edition - Like new - $5

Upgrade to General Class by Don Stoner, W6TNS
1992 - $4

Advanced Class License Manual by Gordon West, WB6NOA
"New Edition" - Second Edition - 1995 - $4

Ameco "Novice License Radio Amateur FCC Test Manual"
By Martin Schwartz - 1984 - like new - $4

Ameco "Amateur Radio Novice Class Theory Course"
By Martin Schwartz. Far more in depth than the test manual.
First Edition - 1978 - $5

Ameco "Complete Technician Radio Amateur FCC Test Manual"
By Martin Schwartz - 1992 - $3

Ameco "General Class Radio Amateur FCC Test Manual"
By Martin Schwartz - 1984 - Like new - $4
As above, but includes 1988 questions and answers - $4

Ameco "Advanced Class Radio Amateur License Guide"
By Martin Schwartz - First Edition - 1981 - like new - $5

Ameco "Advanced Class Radio Amateur FCC Test Manual"
By Martin Schwartz - Copyright 1987, with added 1991 material
First Edition - Like New - $6

Ameco Code Course
There is general information about the code, but portions
of the book list what is being sent by the code records.
There is also a diagram about how to make a code practice
oscillator from a 50C5 and 35W4. $5

ARRL Code Kit Book, 1976
This is the booklet only, that originally went with a kit
of cassette tapes. This has the info contained on the
tapes listed in it. $2

Vintage ARRL Licensing material:

ARRL License Manuals - $3 each
1977 - 76th edition - All classes
1979 - 77th edition - All classes
1984 - 79th edition - All classes
1984 - 80th edition - All classes
Technician Class - 1989 - First edition
General Class - 1989 - First edition
.....1997 - Second Edition
Advanced Class - 1985 - First edition
.....1990 - Third Edition
Extra Class - 1988 - Third edition

Tune in the World with Amateur Radio
1976 - First Edition - $3

Now You're Talking
1993 - 2nd edition - $10

Sam, Tab Publishing, and Hayden Vintage Licensing material:

General Class Amateur License Study Guide
By Phil Anderson, W0XI; published by Sams
First Edition - 1979 - $3

Amateur Radio General Class License Study Guide
By Jim Kyle and Ken Sessions; Tab Publishing
1975 - 2nd edition - $3

Amateur Radio Advanced Class License Study Guide
By Jim Kyle and Ken Sessions; Tab Publishing
1975 - 2nd edition - $3

Hayden "Radio Operator's License Q & A Manual" by Kaufman
For commercial tests - Eighth Edition - 1976
About 1 1/2 inches thick - $5

Sams Photofact "Master Index"
Lists what is in the various Sam's Photofacts as of
Aug 1960 - Good condition - $8

"Installing your Own Telephones"
By Radio Shack - 3rd edition - 1989 - $3

Prices do not include shipping from Florida.
Media Mail shipping is relatively inexpensive.

Thanks.

2002. 2 m and 440 MHz rigs and accessories FS

Yahoo group: amatuerradioswapfest
Date: 2009-04-12 23:06:55 UTC
From: Ken Simpson, W8EK
Topic: 2002 Message: 2002

For Sale:

VHF and UHF (2 meter and 440 MHz) transceivers and accessories

Dual Band HT

Radio Shack HTX-420, 2 meter / 70 cm Dual Band FM Transceiver

Transmits on the 2 m and 440 MHz band, and receives on 137 to 174 and 420 to 512 MHz on FM, plus 108 to 137 MHz AM for the aircraft band. It also has SAME alert for the weather radio portion. A compass is built in. Power output is adjustable with 3 levels of about 4 W, 1 W, and .2 W. Cross band operation is also possible. Of course it has the normal memories, scan, PL subaudible tones, and all the other things one expects in a modern HT.

A 7.2 V, 1200 mahr Lithium Ion Battery is included, as is a rubber duck, wall charger, and operating manual. In addition, it has a nice desk stand to make it easier to use at home. The HT works great, and looks very close to new. $200

Spare Battery for Radio Shack HTX-420 dual band HT:

W & W LC-343 L, Lithium Ion Battery for Radio Shack HTX-420 HT

This Lithium Battery is 7.2 volts at 1300 mahr, and is made to fit the HTX-420 dual bander. It can be charged with either a wall charger or desk charger.

This particular battery works great. My guess is that the now silent key used it only a couple times. It holds a charge well, and functions 100%. It looks very close to new. $32

Two meter FM Transceiver:

KDK FM-2033 mobile FM transceiver for 2 meters

This rig is fully synthesized, has memories, scan, subaudible PL tone, and all the things that one expects in a 2 meter rig. It has a touch tone microphone with it. This rig produces just over 25 Watts in high power and about 7 watts in low power. It sounds great, and hears well.
It needs 13 V DC at about 7 amps.

This particular rig is in very nice condition. It includes the touch tone microphone, mobile mounting bracket, power cord, and paper work. The original box is also included.

Even the mic clip, and a bag of screws are included, as is
the original multicolored sales brochure. $89

MFJ 812 B VHF Wattmeter / SWR Bridge
This meter covers 144 and 220 MHz. You can read forward and
reflected power in 2 ranges - 30 or 300 Watts. It also reads
SWR from 144 thru 220Mhz.
The MFJ-812B also reads relative field strength from 1 to 220
MHz.
This one works fine and looks great also.
With paper work for $30.

Touch tone (DTMF) microphones:

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently
has a 6 pin connector for the KDK 2030, but that can
be changed. Nice condition. $40

Drake 1525 EM Touchtone Microphone
Normal hand mic from the front, but has a touchtone pad
on the back. Four pin mic plug. Used, but in good shape.
Includes paper work. $35

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
With paper work for $40.

CES "Micropad" touch tone mic
No model number on it, but it has a 12 digit pad on the
back. Low Z mic element with round 8 pin connector
wired for Kenwood. $38

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $38

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed.
Stripped and tinned leads.
It works fine, and looks good also. $25

Icom BC-35 desk charger
The BC-35 will fast charge the BP-2, BP-5, BP-7, and BP-8 battery

packs. It will also charge the BP-3 and BP-4, but these take 12 to 15 hours. It works 100% and looks fine as well. $35

Accessories for Kenwood TH-215, 225, 235, etc. HTs:

PG-3 E DC Cord
This cord plugs into the cigarette lighter to provide 12 V DC to the TH-215, TH-225, TH-415, and others. It has a filter built in, and permits high power operation of the HTs. $20

SC-12 Vinyl Case
For TH-215, TH-225 and others, with room for the standard PB-2 and PB-3 battery packs. Black color. Very nice condition. $15

SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1 and PB-4 battery packs. It can also be used with the smaller PB-2 and PB-3 packs. Black color. Great condition. $15

Bianchi Real Leather Case for TH-215, TH-225, etc.
For use with the larger PB-1 and PB-4 batteries, but can be used with the smaller PB-2 and PB-3 batteries. This is real leather, tan in color, and is in very nice condition. $25

Accessory items for Kenwood TR-2400 and other HTs:

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and maybe others. This one looks fine and works fine. $16

Belt clip for TR-2400 HT
In great condition, complete with hardware - $8

Original Operators manual for Kenwood TR-2400 - $15

Wrist strap - I think it fits most Kenwood (and likely other) HTs - $4

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. This can be used with any HT that has a BNC connector. $5

Santec HT items:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case. It fits most of the Santec HTs, such as the HT-1200, ST-142, ST-144, ST-440, etc. The real leather case includes a built in belt clip, plus a removable leather shoulder strap.
The case itself is in very nice shape. The leather

shoulder strap has not been used. $22

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a
service pack. It has schematics, circuit explanations,
voltages, etc. $18

Belt Clips and Wrist Straps for various HTs:

Belt Clips for various HTs - All include hardware.
$8 each
Kenwood BH-2 for TR-2500, TR-2600, TH-215, TH-225 and others
Kenwood TR-2400
Motorola

Wrist Straps for various HTs
$4 each
Kenwood TR-2400
Kenwood TH-21/31/41
Yaesu FT-209

I have a Spanish version of the Operating Manual
for the Kenwood G-707 dual band transceiver available.
This is the original operating manual only, in Spanish.
It looks like it is quite extensive and detailed.
It is basically new, only being opened to observe that
it is in Spanish only. It is original from Kenwood. $10

Yaesu Items:

Yaesu MH-12 A2B Speaker Microphone
This speaker microphone has a 3.5 mm and a 2.5 mm plug
on it, molded together, as is used on many, many HTs.
It will fit many Yaesu, Icom, Alinco, Radio Shack and
other HTs.
This one works fine, and looks very close to new.
I can not find any defects on it. $20

Yaesu YM-24 A speaker mic.
Fits FT-207, 208, plus many others. It has the odd
little round connector on it like Yaesu, Wilson, Santec,
and others used in the 1970s and 80s.
This particular unit works fine, and looks great also. $20

Wrist Strap for Yaesu FT-209 - $4

Yaesu Hat
This "Ball Cap" has Yaesu on the front of it in big letters.
Actually, I have two. One is white and says only "Yaesu".
The other is dark red and says "Yaesu Communications".
Both have never been used. Your choice for $6 each.

Antennas for 2 meters, 220 Mhz, or 440 MHz:

Larsen VHF and UHF Mobile Antennas

Antennas are used, but in very good condition.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 m; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on the
70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
Can be cut for 2 m, 220 MHz, or 440 MHz. $7

Larsen PO-MM Mobile Antenna Mag Mount
This rectangular mag mount features an extremely strong magnet.
The center of the mag mount has an SO-239 connector, which
means any antenna with a PL-259 can be used with it.
It includes coax, with a PL-259 connector on it.
It is in good condition. $17

Cushcraft Magnetic Mount 5/8 wave, 3 db gain antenna for 2 meters
Consists of a heavy duty mag mount, with coax, and the antenna
and spring.
It works fine and looks fine also. $50

Gain antenna coil, spring and whip
The antenna is a 5/8 wave antenna for 2 meters, which
has a gain of about 3 db. The coil can be used with any
of the NMO mounts (made by Motorola, Larsen, Cushcraft
and many others). The antenna is approximately four feet
long, and is in good condition. $30

As above, but without the whip.
The whips are hard to ship, so you might want only the coil
and spring, and obtain a whip locally. $25

Cushcraft CSMG NMO Magnetic Mount
This is a strong, round, magnetic mount which can be used with
any NMO antenna. Coax is included, with a PL-259 on the end.
Nice condition for $22.

Avanti / Antenna Specialists "On Glass" mobile antennas

These antennas were made by Avanti, and then later by
Antenna Specialists, to mount on a windshield, or other
glass. They do not require a ground plane, as they are
1/2 wave antennas, rated to have 3 db gain. They are
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Rubber Duck Antennas for your HT:

All are for 2 meters, are in very nice condition, and
are $10 each, unless stated otherwise.

BNC Connector, 7 inches long

5/16 inch threaded, as used by Motorola and others
Regular, 5.7 inches long
Stubby, 4 inches long

Type F connector, 6.5 inches long

PL-259 connector, 6.5 inches long
HyGain 275, still sealed in original packaging
from when I bought it 20 or 25 years ago

PL-259 connector - Stubby, 4.6 inches long
Centurion, still sealed in original package
from when I bought it 20 or 25 years ago

Special Rubber Duck antennas for Kenwood TH-21 series
2 meter HTs with the threaded connector
Kenwood RA-6 regular, 6.6 inches long
As above but for TH-41 HT, 440 MHz, Stubby, $15

Alinco EA-0085 for 220 MHz
BNC connector, 5.6 inches long

Does anyone have an older two meter ham rig and need crystals?

Maybe I can help. I have some of both transmit and receive
2 meter crystals. Most are in the 146 and 147 MHz band segments,
with very, very few in the 145 MHz segment, and none in the
144 MHz segment. These are for ham rigs only, and not
commercial rigs.

These are all the small HC-25 crystals, like are used in most
of the solid state 2 meter mobiles and HTs. Please e-mail
the operating frequency you need. I have them listed by
operating frequency and rig, and not by actual xtal frequency.
Send the frequencies you need (transmit or receive), and
the rig that you have, and I will see if I can help. I have cross
references for the various rigs, so I will know what you need
if you give the rig. Crystals are $6 each.

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

FOR SALE: A Nice Stack of HAM RADIO books

Amateur Radio Handbook, Fred Collins 1940 341 pages, hard bound.

Beam Antenna Handbook by William Orr, W6SAI, 200 pages, soft cover

Software for Amateur Radio by Joe Kasser, G3ZCZ 284 pages, hard bound

AMECO Radio Theory Course 1973 - 315 pages, soft cover

Understanding Amateur Radio, ARRL 1977, 222 pages, soft cover

Understanding Solid State Electironics - Radio Shack, 272 pages, soft cover

Radio Amateurs License Manual, ARRL 1979, 168 pages, soft cover

ALL of the above - 7 books for only $29.00 plus media rate shipping

2005. WTB: 2 meter mobile

Yahoo group: amatuerradioswapfest
Date: 2009-05-04 01:34:52 UTC
From: John Murphy
Topic: 2005 Message: 2005

I am looking for a good working mobile 2 meter or dual band radio. It must be in real good shape and in great working condition. My current 2 meter gave up the ghost this afternoon (think the final died, but not sure). Anyway, I am not the richest ham (are there any really rich hams? LOL) so price is a major consideration. The radio should have max output 50-65 watts or higher. It will be used both as a mobile and a base in a very rural area.
Please email me with your offerings and I will at least consider all offers.
Thanks in advance to anyone who comes up with something to meet my needs

2007. RE: [Amateur Radio Swapfest] WTB: 2 meter mobile

Yahoo group: amatuerradioswapfest
Date: 2009-05-04 03:34:57 UTC
From: John Murphy
Topic: 2005 Message: 2007

Mike, depending on the radio and condition of course, but possibly in the neighborhood of 150-200. I know dual bands do run a little more, but I am interested in getting on if the price is right. I do a lot of traveling around the state and from ND to CO, so need one that will work in the rural areas as well as in metro areas. Again, the price is dependant on the radio. The radio that I had was an Alinco DR140 and I paid 50 for it from a private owner about 2 years ago while we were living in Sacramento. It lasted quite a while and I think a bad coax is what caused the final to go. I still need to check this out, but I do need a radio that I can hit the closest repeater (35 miles in a low spot) with, so this needs to have the 50-65 watts I am looking for. Thanks for your interest and hopefully a lead. the reason I posted here is I would rather money go to a ham that has a need rather go to a retail outlet, though I am not against buying new if I have to .

2011. FS: Parts

Yahoo group: amatuerradioswapfest
Date: 2009-05-17 02:54:28 UTC
From: Bry Carling
Topic: 1895 Message: 2011

FOR SALE - PARTS etc.

Group of three panel meters

0-200 mA DC meter - 3-1/2" diameter. GE
0-100 mA DC meter - 2-1/2" square. Burlington
0-10mA / 40 mA / 200 mA DC meter - 2-1/2" square. EF Johnson (Rear lighted)

Will sell the group of three for $12.00 plus shipping

= = =
Pittman gear motor 24V DC with 60:1 ratio gears and 1/4" X 3/4" long shaft
for output. Body dimensions - 3-1/2" long by 1-1/2" diameter.
Mount with three screws on froint face or with four screws in rear face.

Available for $5.00 plus shipping

= = =
VARIABLE CAPACITOR:
3-Gang variable cap - Brand New 650 pF per section. Ideal for linear amplifier
service.
1950 pF total capacitance. Stout construction - nickel plated frame, new old stock.
Dimensions: 3.25" X 2.75" X 4.75" deep.
It has a short 1/4" shaft about 3/8" long, so use with coupling or similar.
Available for $14.00 plus shipping

= = =
VARIABLE CAPACITOR:
Cardwell Dual gang variable capacitor ... Two sections each 1000 pF.
2000 pF total capacitance. It looks like it would handle a really powerful RF linear
amplifier
application with several KW. It appears to be new old stock, although you can see
that
a knob has been attached for testing. Hard to tell whether it has ever been used.
No soldering has occurred. Dimensions 13" X 4.5" X 3.5" and has a 1/4" shaft
QTY 1 available for $36.00

= = =
VARIABLE CAPACITOR:
NATIONAL: RADIO CO. Dual gang variable capacitor ... Two sections each 35
pF.
70 pF total capacitance. Very wide spaced. This one will be good for several KV.
Dimensions: 6.75" X 2.75" X 2.5"
Has 0.25" X 1.5" shaft.

QTY 1 available for $8.00 plus shipping

= = =
MCD 35-2 Dual gang variable capacitor ... Two sections each 35 pF.
70 pF total capacitance.
Heavy ceramic construction, nickel plated rock solid. Spacing
looks like it could easily handle 1200 - 1500 V.
Dimensions: 4" X 2.5" X 1.75"
Has 0.25" X 0.75" shaft.
QTY 1 available for $5.00 plus shipping

Thanks for looking & 73 de AF4K, Bry

From: Bry Carling
Topic: 2013 Message: 2013

FOR SALE: Ham Radio Parts:

Tower warning sign - "WARNING: "DO NOT CLIMB"
Professionally made with weatherproof and UV-proof finish.
Yellow and black in color... Four main mounting holes. Or us ethe
six smaller ones. Dimensions approx. 10" X 3"
QTY 2 available for just $2.00 plus shipping.

= = =

Pair of antenna traps for a trap dipole, with stout brass end fittings
for wires. Unknown brand and I have no specifications. Those
with good test equipment will know how to use these. $5.00 for the pair.

= = =

LINK Crystal unit - plug in with 4 pin base. 1121.875 KC with frequency
adjustment control in top. Unusual - $1.00

= = =

General Electric 30 pF at 450 V capacitor. Rated safe for 525 volt
surge. New - with axial leads. QTY 1 available for $3.00 plus shipping

= = =

Cornell Dubilier 90 pF at 500 Volts DC can capacitor FP style
with mounting hardware. New in box. Someone attached leads
to test it but it has not been used.
QTY 1 available for $5.00 plus shipping

= = =

Group of 6 HV doorknob capacitors.
1000 pF at 5 KV, 500 pF at 5 KV, 20 pF at 5KV, 180 pF at 5KV,
40 pF at 5 KV, 120 pF at 5KV...
Sell the whole group for $6.00 plus shipping.

= = =

Optoelectronics P-101 LO-PASS probe for use with their frequency
counters, or use as a scope probe. Looks new - BNC to clip-lead fitting,
and small alligator for ground. 3 feet long. QTY 1 for $2.00 plus shipping.

= = =

OHMITE non-inductive resistor - 10 ohms 5% at 100 watts. Brand new.
QTY 1 available for $2.00 plus shipping.

= = =

Radio dial - half moon style with white face numbered 0- 100, and has
weighted brass coupling in back. Nicely machined with two grub screws
for attachment to standard 1/4" shaft.
Available for $2.00 plus shipping.

= = =

Pair of OCTAL tube testing adapters / sockets - one has side pins
for testing. The other has tubular bakelite on the bottom for mounting
compoinents or testing, s terminals on one end and 6 on the other.
Great for homebrew construction. These both appear to be unused.
Will sell the pair for $6.00 plus shipping.

= = =

Pair of NEW old stock 500 K-ohm pots with ON-OFF switch. These are
full sized pots as used in the older tube radios and amplifiers. Not the
junk that is sold today. Will sell the pair for $5.00 plus shipping.

= = =

TUBES:

Not sure if these tubes are new or used. Some look used, so they're
all priced accordingly.

Philco 6L6G - $6.00
Sylvania 6L6G - $6.00

Cunningham C327 Tube $5..00
Philco 24 - $5.00

RCA 807 and socket - used, $5.00 plus shipping
Pair of 2E26 tubes - $3.00 each or both for $5.00

Pair of RCA 955 acorn tubes with one ceramic socket - all for $6.00

QTY 4 Western Electric 2C51 tubes - all for $8.00

RCA 6DJ8 - looks new $5.00

Now the stranger ones:

Western Electric 416B triode - gold metal case - $1.00

Group of 18 pencil tubes, such as GE and Sylvania types - JG-6C21,
5896, 6K4, 5902A, JG-6021, 5840A - all for $8.00
(Build a glowbug HT?)

RCA 12D2 - QTY 1 for $2.00

G.E. Engineering Sample Z-2143 - QTY for $1.00

= = =

Set of FOUR "Barry Mount" SHOCK MOUNTS for military radios
etc. Brand new with dimensions 2-3/8" X 2-3/8" X 1-1/4" tall.
Four mounting holes for a secure installation. Threaded fitting on
top for radio etc. 1/4" These are available for $20.00 plus shipping
(for all four.)

= = =

VARIABLE CAPACITORS:

QTY 2 Hammarlund RMC-325-S - new old stock.
These are 0-325 pF variables with ceramic frame, and
dimensions: 2" X 2" X 3" deep with a 1/4" shaft that is 1" long.
HAMMARLUND MFG. Co., New York.
QTY 2 available for $12.00 each plus shipping

= = =

VARIABLE CAPACITOR:

Type MC-200-M ceramic frame from Hammarlund
0 - 140 pF variable with ceramic frame.
Dimensions: 2" X 2" X 2-3/4" deep. Has standard 1/4" shaft
with antique black "knobby" 8-bump knob.1" diameter.
QTY 1 available for $7.00 plus shipping

= = =

VARIABLE CAPACITOR:
Hammarlund MTC-20-B new old stock, with box.
Has 0 - 20 pF capacitance beautifully built ceramic frame unit
with dimensions: 3" wide X 2" tall X 2-1/4" deep.
HAMMARLUND MFG. Co., New York.
QTY 1 available for $8.00 plus shipping

= = =

VARIABLE CAPACITOR:
Hammarlund MTC-50-C new old stock.
Has 0 - 50 pF capacitance beautifully built ceramic frame unit
with dimensions: 3" wide X 2" tall X 2-1/4" deep.
HAMMARLUND MFG. Co., New York.
QTY 1 available for $8.00 plus shipping

= = =

VARIABLE CAPACITOR:
NATIONAL: RADIO CO. Dual gang variable capacitor ... Two sections each
35
pF.
70 pF total capacitance. Very wide spaced. This one will be good for
several kV.
Dimensions: 6.75" X 2.75" X 2.5"
Has 0.25" X 1.5" shaft.

QTY 1 available for $8.00 plus shipping

= = =
MCD 35-2 Dual gang variable capacitor ... Two sections each 35 pF.
70 pF total capacitance.
Heavy ceramic construction, nickel plated rock solid. Spacing
looks like it could easily handle 1200 - 1500 V.
Dimensions: 4" X 2.5" X 1.75"
Has 0.25" X 0.75" shaft.
QTY 1 available for $5.00 plus shipping

= = =

PCI Fast Ethernet card. Network Interface NIC CARD with standard
RJ fitting for your CAT-5 connector. Uses any PCI slot.
Has link activity light... This is a model 18-1D-P200-B.
Very standard Taiwanese made unit. Works fine in any XP,
Vista environment, or download drives for WIN 95, WIN98 and
other older operating systems. Works fine.
Available for $1.00 plus shipping

VARIABLE CAPACITOR:

Type MC-200-M ceramic frame from Hammarlund
0 - 140 pF variable with ceramic frame.
Dimensions: 2" X 2" X 2-3/4" deep. Has standard 1/4" shaft
with antique black "knobby" 8-bump knob.1" diameter.
QTY 1 available for $7.00 plus shipping

= = =

VARIABLE CAPACITOR:
Hammarlund MTC-20-B new old stock, with box.
Has 0 - 20 pF capacitance beautifully built ceramic frame unit
with dimensions: 3" wide X 2" tall X 2-1/4" deep.
HAMMARLUND MFG. Co., New York.
QTY 1 available for $8.00 plus shipping

= = =

VARIABLE CAPACITOR:
Hammarlund MTC-50-C new old stock.
Has 0 - 50 pF capacitance beautifully built ceramic frame unit
with dimensions: 3" wide X 2" tall X 2-1/4" deep.
HAMMARLUND MFG. Co., New York.
QTY 1 available for $8.00 plus shipping

= = =

VARIABLE CAPACITOR:

NATIONAL: RADIO CO. Dual gang variable capacitor ... Two sections
each 35 pF. 70 pF total capacitance. Very wide spaced.
This one will be good for several kV.
Dimensions: 6.75" X 2.75" X 2.5" - Has 0.25" X 1.5" shaft.

QTY 1 available for $8.00 plus shipping

= = =

VARIABLE CAPACITOR:

MCD 35-2 Dual gang variable capacitor ... Two sections each 35 pF.
70 pF total capacitance.
Heavy ceramic construction, nickel plated rock solid. Spacing
looks like it could easily handle 1200 - 1500 V.
Dimensions: 4" X 2.5" X 1.75"
Has 0.25" X 0.75" shaft.
QTY 1 available for $5.00 plus shipping

= = =

ELECTROLYTIC CAPACITORS:

Group of QTY 4 - 82 uF at 400V DC - brand new - top
quality Nichicon rated 105 degree C components.
Will sell all four for $5.00 total, plus shipping

= = =

ELECTROLYTIC CAPACITORS:

Group of QTY 4 - 220 uF at 400V DC - brand new - top
quality Nichicon rated 105 degree C components.

Will sell all four for $7.00 total, plus shipping

= = =

ELECTROLYTIC CAPACITORS:

Group of QTY 4 - 270 uF at 400V DC - brand new - top
quality Nichicon rated 105 degree C components.
Will sell all four for $8.00 total, plus shipping

= = =

ELECTROLYTIC CAPACITOR:

General Electric 30 uF at 450 V capacitor. Rated safe for 525 volt
surge. New - with axial leads. QTY 1 available for $3.00 plus shipping

= = =

FP CAN ELECTROLYTIC CAPACITOR:

Cornell Dubilier 90 uF at 500 Volts DC can capacitor FP style
with mounting hardware. New in box. Someone attached leads
to test it but it has not been used.
QTY 1 available for $5.00 plus shipping

= = =

OHMITE non-inductive resistor - 10 ohms 5% at 100 watts. Brand new.
QTY 1 available for $2.00 plus shipping.

= = =

DC MOTOR (found one more!) -

Pittman gear motor 24V DC with 60:1 ratio gears and 1/4" X 3/4" long shaft
for output. Body dimensions - 3-1/2" long by 1-1/2" diameter.
Mount with three screws on froint face or with four screws in rear face.

Available for $5.00 plus shipping

= = =

NIC CARD:

PCI Fast Ethernet card. Network Interface NIC CARD with standard
RJ fitting for your CAT-5 connector. Works fine. Uses any PCI slot.
Has link activity light... This is a model 18-1D-P200-B.
Very standard Taiwanese made unit. Works fine in any XP,
Vista environment, or download drivers for WIN 95, WIN98 and
other older operating systems. Works great,,,
Available for JUST $1.00 plus shipping

Thanks for looking & 73 de AF4K, Bry

Yahoo group: amatuerradioswapfest
Date: 2009-05-28 18:21:59 UTC
From: Bry Carling
Topic: 2018 Message: 2018

FOR SALE:

Two 455 kHz I.F. Transformers - no brand on them, about 7/8" square
and 3" tall. PC -solder terminals. $5.00 for the pair

Group #1 of tube type items:
One ceramic 5 pin socket for 807 (NOS)
One octal socket phenolic (NOS)
Tube adapter for making tests. Octal type.
LINK plug-in crystal unit (adjustable) 1126 kHz
Pair of 2E26 tubes
One Philco Type 24 tube
One Cunningham C327 Tube
All of these items in Group #1 for $12.00 plus shipping

Group #2 of tube type items:
Tube pin straightener for 7 pin miniature tubes
Tube pin straightener for 7 pin AND 9 pin miniature tubes
Tube adapter for making tests. Octal type.
Four 2C51 tubes.
All of these items in Group #2 for $12 plus shipping

2019. FS: E.F. Johnson Viking II Transmitter

Yahoo group: amatuerradioswapfest
Date: 2009-06-01 13:21:36 UTC
From: Bry Carling
Topic: 2019 Message: 2019

FOR SALE: E.F. Johnson Viking II Transmitter

Runs about 120 watts out on AM and CW with two 6146 RF final tubes.
Covers 160m through 10m bands. Has a ten position crystal selector
switch or use with external VFO.

This fine old AM-CW transmitter is missing the top cover and needs
a new AC power cord. It has not been gone through or restored, but
will clean up very nicely. All the tubes are here. The main components
are all there and look to be in good condition. This rig is built like a tank.
It's also very simple to work on and understand.

Crystals available, or use with a VFO. Comes with a copy of the manual.

Available for $235.00 plus shipping

2024. FS: Homebrew Tube Transmitter

Yahoo group: amatuerradioswapfest
Date: 2009-06-29 12:21:33 UTC
From: Bry Carling
Topic: 2024 Message: 2024

FOR SALE: Homebrew Tube Transmitter
Has 807 final and Collins VFO built-in.

Looks like a Collins 310B or 310C is the VFO-exciter in
this rig.
This is obviously a homebrew project that used the
Collins PTO as the main control for the exciter.

Has a different front panel etc. from the typical
Collins equipment
Yet it clearly bears some resemblance. Has a built in
120V AC power supply.
Will sell for $125.00 plus shipping

Pictures and details at:
http://www.af4k.com/radios.htm

Thanks and 73 - Brian, AF4K

2025. FS: EF Johnson VALIANT XMTR - REDUCED...

Yahoo group: amatuerradioswapfest
Date: 2009-07-04 22:37:39 UTC
From: Bry Carling
Topic: 2025 Message: 2025

FOR SALE - E.F. Johnson VALIANT TRANSMITTER
(Now Reduced)

Specifications:
CW - 275 Watts, AM 200 Watts

Bands: 160m through 10m

1.75 MHz to 2.0 MHz (160 m)
3.5 MHz to 4.0 MHz (80/75 m)
7.0 MHz to 7.42 MHz (40 m)
14.0 MHz to 14.85 MHz (20 m)
21.0 MHz to 21.6 MHz (15 m)
26.9 MHz to 27.36 MHz (11 m)
28.0 MHz to 29.7 MHz (10 m)

Antenna loads 50 to 600 ohms. Well-shielded for TVI and RFI suppression.
Silver plated tank coil. Break in keying and PTT system built-in.
VFO dial moves smoothly, and all tuning caps and iron are in good shape.
Transformers and tubes have been tested.

Dimensions: 21-1/8" wide, 17-3/8" deep and 11-5/8" high. Weight 83
pounds.

Has not been recapped or restored, but everything is there, and in good
condition
and it has a new 3-way AC power cord that has been installed for safety.
Crystal cover is missing. Microphone connector was changed to a standard
1/4" style
plug instead of original 2-prong unshielded connector.
VFO, Band switch, loading switch, loading caps, meter etc. are all in good
shape.

Comes with a copy of the manual. The rig comes with all of the screws -
the four long cabinet screws, and the original rear apron screws - all in
clean shape. A couple of rub spots near the VFO dial can be repainted
easily.

This Valiant has no major issues, and it will make a great project and will
clean up very nicely. Just needs a little spit and shine - you could maybe
repaint
the cabinet, but it is really not bad as-is. I just saw one of these going for
$1395.00 fully restored.

I have experience packing and shipping these heavier rigs safely.
Now reduced to $375.00 plus shipping.

FOR SALE: USA made VARIABLE CAPACITORS - New and
used - from $1 to $25 each.

All have 1/4" diameter shaft unless otherwise stated.

Cardwell 100 pF + 100 pF large transmitting variable - Dimensions:
4-1/2" X 4" X 12" - clean $25.00

Cardwell 100 pF + 100 pF large transmitting variable - Dimensions:
4-1/2" X 4" X 12" - not quite clean $20.00

QTY 2 - Hammarlund RMC-325S Dimensions 2" X 2" X 3" deep.
extra nice 325 pF caps - $10.00 each

Cardwell 435 pF Model M7462676-1 built like a tank
Dimensions 4" X 3-1/4" X 2" deep - $10.00

QTY 8 ATWATER KENT original 500 pF variables in beautiful shape.
Dimensions 3-1/2" X 3" X 2-1/2" deep - $5.00 each

3 Section X 465 pF generic variable DImensions 2-1/2" 2-1/2" X 3-1/2"
deep. Great for loading cap - $8.00

New generic 4-section variable with 500 pF per section -
quality construction. Dimensions: 2" X 2-1/4" X 4-1/2" deep - has
a shaft that is 3/8" X 3/8" long. QTY 1 for 8.00

ARC-5 180 pF variable capacitor with 18:1 reduction drive gears and shaft.
Available for $4.00

2 section variable - 465pF plus 465 pF - dimensions 2-1/2" X 2-1/2" X 2-1/2"
deep $5.00

2 section variable - 85 pF + 85 pF - dimensions 2-1/2" X 2-1/2" X 2-1/2"
deep $4.00

2 section variable - 365 pF + 110 pF - Dimensions 1-1/2" X 2" X 2"
will sell for $3.00

2 section variable - 395 pF + 140 pF - Dimensions 1-1/2" X 2" X 2"
will sell for $3.00

Hammarlund 3 section - 270 pF per section. Total of 800 pF.
DImensions 2-3/4" X 2-1/4" X 6-1/2" deep. $10.00

Hammarlund MC-200M 200 pF variable - dimensions 1-3/4" X 2" X 2-/12"
with antique knob $5.00

H. I. Company large 0-25 pF variable 3" X 3" X 3-1/2" deep $4.00

QTY 2 - Made in USA (rotary arrow/cap symbol??) - 50pF + 50 pF
transmitting variables.Dimensions 3" X 2" X 4-1/2" deep.
One that has longer shaft 1-1/2" = $5.00
One that has longer shaft 1/2" = $3.00

National Radio Co. two section 35pF + 35 pF Dimensions 2-/34" X 2-3/4" X
6-1/2" deep - nice 1-1/2" shaft $5.00

Hammarlund two section with 35 + 35 pF type MDC-35-MAX
Dimensions 2-1/2" X 1-3/4" X 3-1/2" - $3.00

BUD two section 50 pF + 50 pF DImensions 1-1/2" X 1-1/4" X 2-3/4" deep.
Available for $5.00

Generic USA made 200 pF with locking shaft 3/16" X 3/16"
Overall Dimensions: 1-1/2" X 1" X 2" deep. $1.00

Sickles USA 60 pF variable. DImensions 1" X 1" X 1-1/2" - has
a 1/4" long shaft. $1.00

New Hammarlund 20 pF type MTC-20-B beautiful. Dimensions:
3" 2-/12" X 2-1/4" deep with 1-1/2" long shaft. $5.00

Nice Hammarlund 50 pF type MTC-50-C beautiful. Dimensions:
3" 2-/12" X 2-1/4" deep with 1-1/2" long shaft. $5.00

Shipping additional on all of the above.

2031. FS: Precision Resistors

Yahoo group: amatuerradioswapfest
Date: 2009-07-11 02:41:47 UTC
From: Bry Carling
Topic: 2031 Message: 2031

FOR SALE: Precision Resistors etc.

Here is a trove of about 250 - 300 mostly new precision resistors.
Most are made by IRC. There are a few extra used ones and
some good used specialty caps too. (details below)

Most of these are high quality 1/2 Watt and 1/4 Watt IRC resistors
of 1% tolerance. Most values have QTY 5 or 10 each...

Examples:
1300 ohms, 4000 ohms, 6200 ohms, 9500 ohms
10K ohms, 12K ohms, 47K ohms, 56K ohms
68K ohms, 100K, 125K, 200K, 250K, 270K
500K, 750K, 1 Megohms, 1.8 Megohms, 2 Megohms
2.3 Megohms

There are about 40 bags of resistors all told - each with several
of that value. At least 90% of these are new precision resistors.
Then there are capacitors - a bag of silver mica RF type capacitors
and a bag of Sprague Vitamin Q caps rated 0.01 uF at 600V DC.

Will sell this whole package for $8.00 plus shipping.

Thanks for reading & 73 - Brian "Bry" Carling

From: sjotrollet
Topic: 2034 Message: 2034

Prices not determined yet so if interested, make reasonable offer.
All plus postage from Florida. Much larger list available so email
me for a copy. Primarily VHF/UHF stuff.
---
520) 220 mhz Power Amplifier
Ramsey Electronics model PA-20. 2w in, 25w out. Std coax connectors.
12 vdc. Used, untested (from an estate) but good physical condition, no modifications. 6"W x 4"D x 1.25"H. With fused power cord w/4-pin Cinch-Jones plug. Few minor paint flecks on the case.

521) UHF Converter:
GRE Super Converter II. Converts 810 - 912 mhz to 450 mhz range for scanners without 800 mhz capabilities (allows monitoring of cellphone freqs). Female BNC (fits on receiver input) & male BNC (to antenna) coax connectors. Fits on top of a H/T if desired. 9 vdc power (adapter included). Used. Good condition.

523) Household Burgler Alarm:
RadioShack model 49-303 "Safe House" alarm. 110 vac input (or 12 vdc from external battery). Connections for remote switch, entry delay, external alarm and internal alarm. Has sensitivity control. Used, untested. From an estate.

525) 2m Transceiver
Motorola "Maxar 80". 136 - 174 mhz. 25w, dual channel. Presently set for 144.56 Tx/ 145.16 Rx and 146.325 TX/146.925 Rx mhz. With Motorola TMN-6134 mike. 12 vdc input. Used, untested, from an estate. With original manual.

526) 2m Transceiver
Motorola "Maxar". Dual channel. Presently on 154.085 & 154.445 mhz. With Motorola desk mike. Used. Untested. Seems in good condx.

524) Handi-Talkie Desk Mount
Sloped H/T holder for a desk. Padded non-skid bottom (that contacts the desk surface). New. Excellent condx. 9"L x 6"W x 4.5"H. Can accommadate different width H/T brackets

Jeffrey,

Just some thoughts that may help.. don't buy the TS-950S or the TS-950SD. hold out for the TS-950SDX (This is the one I have and would not sell it short of being destitute!) The "S" and "SD" series had quite a few bugs and problems. The "SDX" like I have is full digital.

Paul - K4BET

2039. WTB: Dualband Mobile 2M/70CM

Yahoo group: amatuerradioswapfest
Date: 2009-08-10 13:24:00 UTC
From: Jeffrey
Topic: 2039 Message: 2039

Hello,
Just wondering if anyone around here has a dual band mobile 2m/70cm mobile they wish to depart with?? Traded my base dual band D710A for IC-706MKIIG which went into the mobile. So, now I have nothing for 2M/70CM in the shack. Basically not looking for anything special just something dual band and 50 watts. So please email me if you have anything.

Thanks all

Jeffrey

Topic: 2040 Message: 2040

FOR SALE: Ham Parts & Goodies

50 ohm UHF dummy load 5 watts - with N connector - good to 2 GHz.
slightly used - $10.00

Load resistors: QTY 2 new - Each is 3 ohms at 500 watts Ohmite - $10 each

Load resistors: QTY 10 new - Each is 4 ohms at 50 watts - gold - $10 each

Load resistor: QTY 1 new - 7.5 ohms at 50 watts - gold - $10 each

Load resistor: QTY 1 new - 300 ohms at 50 watts - gold - $10 each

Tube pin straightener for 7-pin miniature tubes - $5.00

QTY1 - Microwave diode type 1N21BR - $5.00

UTC Choke type CG-48C - 75 H - Battleship gray potted.
Commercial Grade - as described on catalog page N-765:
http://www.the-planet.org/pdf/UTC.pdf
Ideal for making a superior REGEN receiver or other
authentic and fun AF-RF project. 2.6" Dia. x 3.2"High
New in Box - reduced to only $5.00

PAIR of BC-611 Crystals on 5500 and 5995 kHz - $20.00
PAIR of BC-611 Crystals on 3885 and 4340 kHz - $20.00

Metal Octal Tubes:
6AC7, 6AC7W, 6AG7, 6SQ7 plus a ZM1000 nixie - all for $5.00

ELECTROLYTIC CAPACITORS.
QTY 5 - 220 uF at 400V DC - put in series for 44 uF at 2000 KV DC.
Available for $2.00 each

Shipping additional on all of the above.

562) Dual Band VHF / UHF Handi-Talkie
Yaesu FT-727R protgrammable H/T. 144-148 & 430 - 450 mhz FM. 0.5w/5w
RF outputs. With rubber-duck antenna and wrist-strap. Used, fair condx
but untested . Uses 12v batt (4" long on this set) with connectors for external power
source, speaker, earplug and CAT

563). Dual Band VHF / UHF Handi-Talkie
Yaesu FT-727R protgrammable H/T. 144-148 & 430 - 450 mhz FM. 0.5w/5w
RF outputs. With rubber-duck antenna and wrist-strap. Used, fair condx
but untested . Uses 12v batt (2-3/4" long on this set) with connectors for external power
source, speaker, earplug and CAT

564) Handi-Talkie Belt Holster
Mfr by Leathermasters, Inc. Fits a H/T 7"L (can be longer) x 2-3/4"W x 1-5/8"D. Used
Very good condx. With top safety strap.

566) Handi - Talkie Batteries & Case:
Chargeability unknown but cases good:
1 ea WC-505-EBP-12N (replaces EBP-12N ?) 12v@1200 mah, NiCd,
3-3/8"L x 2-1/4"W x 1-1/4"D. W & W Manfacturing Co.
1 ea Icom BP-180, 7.2v@600mah, NiCd
1 ea Alinco EBP-10N, 7.2v@700mah, NiCd
1 ea Standard CBT-151. Case only (no battery)

566) Video RF Modulator:
Archer RF Modulator, model (Cat #) 15-1273A. have been told its used with TV games,
music or video cameras so as to record raw music/video, etc. onto a VCR by
modulating a Ch 3 or 4 RF carrier to input to VCR/DVR etc. 110 vac input, Ch 3/4 TV
channel outputs (selectable). Controls for CH 3 / 4, and 75 / 1K ohm outputs. RCA
connectors for video/audio inputs and "F" coax connector for RF OUT.

561) Radio Control / Intercomm Units:
Selectone model ST-30 "Micro-Mote". 4 units available. Exact usage unknown but
appears to be desktop remote control for either a dual-freq transmitter or two independent
transmitters plus an intercom unit. Input 110 vac and output is standard 4-wire telephone
connector. Has internal speaker/mike. Controls: MON, F1/F2, XMIT/IC, Volume and
indicator lights for ON/MON, LEVEL and TX. One unit is marked "for parts" so status
unknown. Used, untested.

2045. Low Pass TVI Filters FS

Yahoo group: amatuerradioswapfest
Date: 2009-08-27 12:22:34 UTC
From: Ken Simpson, W8EK
Topic: 2045 Message: 2045

Low Pass TVI Filters For Sale:

A low pass TVI filter is added to the transmitter (inserted in the coax line after the transmitter or transceiver) to reduce harmonic interference.

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter and antenna, and has been optimized to have more attenuation in the 40 MHz region, where many TVs have their IF. It is good for 1000 Watts "average" according to the manual, and has over 80 db attenuation at 41 MHz. This one looks great, and includes the paper work. $30

Drake TV-1000 Low Pass TVI filter
This is the low pass TVI filter that may also be used on the low end of six meters, as well as HF.
It is a 50 ohm filter and is good for 1000 W below 30 MHz, and about 200 W up to 52 MHz.
Two are available. One is new modern in the later Drake design and logo. The other is vintage with a much heavier copper case. Your choice, with paper work for $30.

B & W model 426 low pass filter
B & W TVI filter, cuts off just above 10 meters, and will handle 1500 Watts. SO-239 connector on each end. This is an older model that seems much heavier duty. It weighs almost twice as much as the newer models, and looks like it would take more power. It likely was made in the days that plate modulated AM was the rule. $30

B & W FL-10/1500 (Formerly known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters, and will handle 1500 Watts. SO-239 connector on each end. This is the latest model B & W filter. It is in very nice condition; it looks very close to new. With paper work $40.

Bud LF-601 low pass filter
This filter is adjustable for best attenuation in your particular situation, and also to more closely match your specific impedance. It cuts off just above 10 meters (if adjusted as such), and will handle 1500 watts.
In extremely nice condition for $35.

Prices do not include shipping from Florida.

Thanks.

2050. Johnson Items, plus Hi Z Mics FS

Yahoo group: amatuerradioswapfest
Date: 2009-09-05 14:28:46 UTC
From: Ken Simpson, W8EK
Topic: 2050 Message: 2050

Johnson Items plus High Impedance Hand Microphones For Sale:

Johnson SWR sensor 250-24

This unit is in its original box that says "S W R Bridge, Standing Wave Ratio Bridge, 52 ohms, Cat No 250-24".

However, this is only the sensor unit. There is no actual meter. It is the round, cylindrical sensor that can go with many of the Johnson Matchbox units. SO-239 connectors on each end, plus terminals to connect the wires to the meter.

This unit is in the original box, with the original paper work, and original packing material. It appears to be new, and certainly is quite collectible. $60

Johnson Viking Phone Patch - Model 250-46

This phone patch is made to be mounted vertically beside the rig. It is about 6 inches high, 2 inches wide and 3 inches deep. It is possible that the face plate can be removed, and it made to be mounted horizontally, but I have not done that. The reason I say this is that there are feet on the bottom, and on the left side. Maybe the feet on the left side are to protect the rig. In any case, it has 3 pots on the front for Null, Receive Volume, and transmit gain, along with a switch for phone patch or microphone. On the back is a terminal strip for speaker and phone line. The microphone input has the 2 pin Amphenol connector like used by Johnson, Heath, Hallicrafters, and many others in that era.

This one is in nice shape. Paint is original and nice and lettering close to perfect. No scratches that I can find. $40

Dow Key antenna relay
This is like the antenna relay like we used in the 1960's to switch between transmit and receive. It has a 120 V AC coil. $30

Collins Noise Canceling Hand Microphone:
Collins MM-281
Part Number 020-0260-020, with the Rockwell Label
This is a very nice noise canceling hand mic.
It has a real rubber coiled cord (not vinyl) that

is in great shape.
The mic has a PJ-068 plug on it, and is used with
the KWM-380, plus many other rigs.
This one works fine and looks like new.
These go for about $400 new. This one is only $100

Swan / Shure Hi Z hand microphone
The mic says Swan on the front, but it is actually a
Shure CM-4 AB with a Swan label added. It is of the
heavy gray construction, with coiled cord, and 1/4
inch stereo plug. Nice condition. $30

J 450 C, Ceramic Hand Microphone
Black/Dark Gray front, with brownish/light gray back.
Dark PTT button.
This is high impedance mic, presently with stripped and
tinned ends.
This particular mic works fine and looks like new. $30

Waters "Universal Hybrid Coupler II" Model 3002

Most of us would likely call this a phone patch, but it
is really much more than that. It does work as a phone
patch, but also will interface with a tape recorder, and
permit recording and play back of on-the-air QSOs. It
will also play the tape recording in to the phone line.
Of course nothing says that the tape recorder input must
be used with a tape recorder. Connect the sound card in
your computer in this position, and you have a very
effective interface.

This one is Model 3002, and also includes a speech compressor
powered by a 9 volt battery. The front panel is finished
on both sides, with one side having it set in a horizontal
position, and the other in a vertical position. It is
presently in the vertical position.

This was a "top of the line" unit years ago. One only found
them with top stations such as Collins. Of course it will
still do the job it did then.

This particular unit is in extremely nice condition.

With paper work for $100.

Prices do not include shipping from Florida.

Thanks.

METERS:
Pair of beautiful NEW IN THE BOX, RCA panel meters.
Matching pair for 0-300 mA DC and 0-300V DC
Classic RCA Type X-35 meters with very cool black background
and white markings on the dual scale. These are meters with
built-in shielding. IF you've ever seen these you know they are
simply the best. Send for a photo if in doubt.
Dimensions: 3" Square, and require a 2.75" diameter hole.
The pair is available for $30.00 plus shipping

LACING CORD: for wiring harnesses in radio and other
electronic equipment. For a professional finish, you get
that wonderful, professional, "original equipment" appearance.
Great for homebrew and repairs.

A spool should last a long time.... two types available...
These are natural color (cream) and around 1/8" wide.
250 yard spool of unwaxed lacing cord - $10.00
250 yards of WAXED lacing cord - $12.00

RESISTORS:
4 ohms - 50 watts - new, gold type - QTY 10 - $10.00 each
100 ohms - 100 watts, brown type - new - QTY 1 for $10.00

Many other 1/2 watt, 1 watt, 2 watt, 5 watt, 10 watt etc.
resistors available. Inquire.

Shipping additional.

From: Ken Simpson, W8EK
Topic: 2055 Message: 2055

Two meter rigs and many accessory items For Sale:

Two meter FM Transceiver:

KDK FM-2033 mobile FM transceiver for 2 meters

This rig produces just over 25 Watts in high power and
about 7 watts in low power. The rig is fully synthesized,
has memories, scan, subaudible PL tone, and all the things
that one expects in a 2 meter rig. It has a touchtone
microphone with it. It sounds great, and hears well.
It needs 13 V DC at about 7 amps.

This particular rig is in very nice condition. There is
one paint spot missing, about the size of a pin head. It
includes the touchtone microphone, mobile mounting bracket,
power cord, and paper work. The original box is also included,
although the box looks much worse than the radio. Even the
mic clip, and a bag of screws are included, as is the
original multicolored sales brochure. $89

DTMF Touch Tone Microphones:

Drake 1525 EM Touchtone Microphone
Normal hand mic from the front, but has a touchtone pad
on the back. Four pin mic plug. Used, but in good shape.
Includes paper work. $35

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
With paper work for $40.

CES "Micropad" touch tone mic
No model number on it, but it has a 12 digit pad on the
back. Low Z mic element with round 8 pin connector
wired for Kenwood. $38

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $38

Regular (nonDTMF) Microphones:

Generic Hand Microphone
This is a low impedance hand microphone, black in color.
It is presently has an 8 pin round connector, wired for
Kenwood. $25
As above, with no connector. $22

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires
polarizing voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic
mic is needed. Stripped and tinned leads.
It works fine, and looks good also. $25

Speaker Microphones:

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Yaesu YM-24 A speaker mic.
Fits FT-207, 208, plus many others. It has the odd
little round connector on it like Yaesu, Wilson, Santec,
and others used in the 1970s and 80s. This particular
unit works fine, and looks great also. $20

Speaker Mics for standard 2.5 mm and 3.5 mm connectors
This connection was used on the vast majority of HTs
until recently. If your HT has a 2.3 mm and 3.5 mm
connector, these will likely work for you.
Two are available.
One is a Prime, and the other is a Densei. Both work
fine and look very close to new. Your choice for $20.

Accessories for several Kenwood HTs:

Kenwood PG-3 E DC Cord
This cord plugs into the cigarette lighter to provide 12 V DC
to the TH-215, TH-225, TH-415, and other Kenwood HTs. It has
a filter built in, and permits high power operation of the HTs.
$20

Kenwood BH-2 Belt Clip for TH-215, TH-225, TR-2500, TR-2600,
and others $8

Kenwood SC-12 Vinyl Case
For TH-215, TH-225 and others, with room for the standard PB-2
and PB-3 battery packs. Black color. In very nice condition. $15

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1 and
PB-4 battery packs. It can also be used with the smaller PB-2 and

PB-3 battery packs, by putting a filler in the case. Black color.
In very nice condition. $15

Bianchi Real Leather Case for TH-215, TH-225, etc.
For use with the larger PB-1 and PB-4 batteries, but can be used
with the smaller PB-2 and PB-3 batteries. This is real leather,
tan in color, and is in very nice condition. $25

Accessories specific to the Kenwood TR-2400 HT:

Belt clip for TR-2400 HT, complete with hardware - $8

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of
the Kenwood TR-2400, 2 meter HT, outside of the HT itself.
Usually, one must have the battery inside the HT, but this
lets you charge a second battery outside of the HT. The
original charger is used.
It is in good shape, and works fine. $3

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
This adapter can be used on any HT with a BNC connector. $5

Santec HT Accessories:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap.
The case itself is in very nice shape. The leather
shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a
service pack. It has schematics, circuit explanations,
voltages, etc. $18

Battery charge adapter for Azden PCS-300 HT
This is an adapter that permits one to charge the battery of the
Azden PCS-300, 2 meter HT, outside of the HT itself. Usually,
one must have the battery inside the HT, but this lets you charge
a second battery outside of the HT. The original charger is used.
If you have a PCS-300 HT, you need this adapter.
It works fine, and looks like new. $3

Belt Clips for various HTs -- All include the hardware with
the belt clip
$8 each
Kenwood BH-2 for TH-215, TH-225, TR-2500, TR-2600, and others
Kenwood TR-2400
Motorola
Yaesu FT-209

Wrist Straps for various HTs - $4 each
Kenwood TR-2400
Kenwood TH-21/31/41
Yaesu FT-209

Antennas and antenna related items for sale:

Larsen VHF and UHF Mobile Antennas:

Antennas are used, but in very good condition.
Please see other postings for antenna mounts.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 m; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on
the 70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
Can be cut for 2 m, 220 MHz, or 440 MHz. $7

Larsen Q Quarter Wave Antenna
Fits a 5/16 inch stud, such as the Larsen LM mount,
and others. It can be cut for 2 meters, 220 MHz, or
450 MHz bands. $7

Larsen NMO-Q Quarter Wave Antenna
For two meters. $10
Precut for 450 MHz. New, still in bag. $8
For 450 MHz, used, but very good. $6

Larsen Magnetic Antenna Mounts For Sale:

Larsen NLA-MM Mobile Antenna Mag Mount
This rectangular mag mount features an extremely strong
magnet. The center of the mag mount takes an NLA type
antenna. It includes coax, with a PL-259 connector on it.
It is in good condition. $20

Larsen MNO-MM Mobile Antenna Mag Mount
Same as NLA-MM above, except it takes an NMO type of
antenna. In good condition for $22

Larsen PO-MM Mobile Antenna Mag Mount
Same as NLA-MM and NMO-MM above, except the center
of the mag mount has an SO-239 connector, which
means any antenna with a PL-259 can be used with it.
It is in good condition. $17

Avanti / Antenna Specialists "On Glass" antennas:

These antennas were made by Avanti, and then later by
Antenna Specialists, to mount on a windshield, or other
glass. They do not require a ground plane, as they are
1/2 wave antennas, rated to have 3 db gain. They are
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Rubber Duck Antennas for your HT:

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

5/16 inch threaded, like used by Motorola and others
Regular - 5.7 inches long
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15
Kenwood Stubby Duck for TH-21, 4 inches long - $15

Alinco Stubby w/BNC Connector, 4.6 inches long

Alinco 220 MHz, w/BNC, 6 inches long

BNC Stubby for 440 MHz, 3 inches long
BNC regular for 440 MHz, 6.5 inches long

Prices do not include shipping from Florida.

Thanks.

2056. FS: MANY ORIGINAL FT243 CRYSTALS

Yahoo group: amatuerradioswapfest
Date: 2009-09-08 18:47:43 UTC
From: Bry Carling
Topic: 2056 Message: 2056

FOR SALE: ORIGINAL W2-era FT243 CRYSTALS

For those who are interested in having the original
FT243
crystals with larger quartz stones inside - I offer the
following. These are all the older type crystals, with
nothing new inside of them. I am guessing that they all
date to around 1943 through 1958 or so.

For some of these frequencies I currently have multiples
on offer. E-mail me with a list of what you would like,
and I will see what is left.

All frequencies in Kc. = Kilocycles per sec.
(no Hertzes here...)

3614.1, 3762, 3765, 3885,
7000, 7006.7, 7025, 7050,
7073.7, 7075, 7100, 7106.7,
7125, 7140, 7150, 7150,
7150.7, 7152, 7155, 7156.25,
7159, 7162, 7165, 7167,
7170, 7172, 7173, 7173.3,
7174, 7175, 7175, 7177,
7179, 7180, 7185, 7188,
7192, 7193, 7199, 7200,
7203, 7204, 7205, 7205,
7206, 7206.7, 7207, 7209,
7211, 7212, 7213, 7214,
7215, 7217, 7220, 7221,
7222, 7224.4, 7225, 7226,
7229, 7232, 7233, 7237.5,
7238.9, 7240, 7241, 7242,
7243, 7243.75, 7246, 7248,

2057. Desk Microphones FS

Yahoo group: amatuerradioswapfest
Date: 2009-09-13 13:16:32 UTC
From: Ken Simpson, W8EK
Topic: 1081 Message: 2057

Microphones For Sale:

Astatic D-104 "Lollypop" Desk Microphone

The D-104 is the "Lollypop" microphone that matches many
of the older rigs, and is often seen pictured with them.
It looks somewhat like a giant chrome plated lollypop,
stuck into a black base. The chrome PTT switch is a bar
that is parallel to the "stick" of the lollypop. This
one also has a PTT switch on the base, in addition to
the one on the side.

This particular D-104 is in extremely nice condition.
Of course it works fine. Cosmetically, it is extremely
nice. The chrome seems perfect, with no scratches or
defects of any sort. The black base has a couple of very
minor wear marks, but they are very slight. It presently
has a 4 pin connector wired for TenTec, but that obviously
could be changed. $75

Yaesu YD-844 Desk Microphone

This is a 50 K impedance desk microphone that really looks
sharp. It has a standard PTT switch on it, and also a
locking PTT switch. The YD-844 dynamic base station microphone
is an optional accessory made by Yaesu. Made of a heavy cast
metal it uses a dynamic 50K ohm element.

A picture can be seen at
http://www.eham.net/data/classifieds/images/289870.jpg
or
http://www.foxtango.org/ft-library/FT-Library/Eighties/yd-844.jpg

This particular mic works fine and looks very close to new.
No scratches or imperfections. $100

Generic Hand Microphone
This is a low impedance hand microphone, black in color.
It is presently has an 8 pin round connector, wired for
Kenwood. $25
As above, with 4 pin round connector. $25

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed.
Stripped and tinned leads.
It works fine, and looks good also. $25

DTMF Touch Tone Microphones For Sale:

Drake 1525 EM Touchtone Microphone
Normal hand mic from the front, but has a touchtone pad
on the back. Four pin mic plug. Used, but in good shape.
Includes paper work. $35

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
With paper work for $40.

CES "Micropad" touch tone mic
No model number on it, but it has a 12 digit pad on the
back. Low Z mic element with round 8 pin connector
wired for Kenwood. $38

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $38

Speaker Microphones For Sale:

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks
fine and works fine. $18

Yaesu YM-24 A speaker mic.
Fits FT-207, 208, plus many others. It has the
odd little round connector on it like Yaesu, Wilson,
Santec, and others used in the 1970s and 80s.
This particular unit works fine, and looks great
also. $20

Speaker Mics for standard 2.5 mm and 3.5 mm connectors
This connection was used on the vast majority of HTs
until recently. If your HT has a 2.3 mm and 3.5 mm
connector, these will likely work for you.
Two are available.
One is a Prime, and the other is a Densei. Both work
fine and look very close to new. Your choice for $20.

Prices do not include shipping from Florida.

2059. FS: Hammarlund HQ-200

Yahoo group: amatuerradioswapfest
Date: 2009-09-14 02:21:21 UTC
From: Bry Carling
Topic: 2059 Message: 2059

FOR SALE: Hammarlund HQ-200 general coverage set
Tunes from 540 kc. to 30 Mc. in four ranges.
The amateur bands are all available on bandspread. A BFO
is included for SSB/CW tuning.
A Q-multiplier operates independently of the BFO.
Other enhancements include: antenna trimmer, noise limiter,
RF gain, S-meter, stand-by switch and AVC on/off.

This radio does not have a built in speaker. There are 3.2 ohm
speaker terminals and a headphone jack on the rear panel.

Runs on 117 / 230 VAC 50/60 Hz. 16.5 x 8 x 9.125 inches 22 Lbs.

It needs a bit of repair. Some of the knobs are not original. The radio
has some grime and minor surface rust but will clean up nicely.

Available for $115.00 plus shipping

2061. FS: Box of FT241 Crystals

Yahoo group: amatuerradioswapfest
Date: 2009-09-14 12:49:14 UTC
From: Bry Carling
Topic: 2061 Message: 2061

FOR SALE:

Quantity of 52 FT241 crystals. These are the LF range crystals as
used in the military BC620A tank radio set. Excellent condition.

During WWII these quartz crystals were manufactured for use in military
vehicle radios.

There are two series of these ft-241 crystals, those marked with "two digit"
channel numbers,
and those with "three digit" channel numbers. These crystals are marked for
frequencies
in the 20 - 40 mhz range, but the fundamental frequencies are much lower.

Some of the crystals fall in the 455 khz range, and were used by homebrew
radio builders
in the 1950's to make crystal filters, especially for SSB exciters (see early
50's ARRL
handbooks).

These are LF crystals in the 300 - 500 kHz range. Marked with channels
such as
14, 19, 60, 68, 317, 320 (sorry no specific choices offered) but for example,
Channel 68 = 496.3 kHz.

There used to be the N4JVP calculator online here:
http://www.subdevo.com:82/FT241/FT241.aspx - maybe ask Fritz, N4JVP
where it is now.

These can be used for experimenting and for use as a crystal lattice filter
since several
are on the same frequecies. (These have the same pins as the popular
FT243 crystals
and use the same socket but the body is slightly wider)

This box of 52 crystals is available for $16.00 plus shipping.

Pictures and details at:

http://www.af4k.com/FT241_crystals.htm

From: Ken Simpson, W8EK
Topic: 1148 Message: 2064

CW Items For Sale:

CMOS Iambic Keyer

This keyer features a build in set of HamKey Paddles.
The front has speed control, plus a volume control for
the sidetone volume. Of course that means that it can
also be used for code practice. Also on the front panel
is a 3 position switch that turns off the output to the
transmitter (for code practice), puts it in to "Keyer
mode", or locks it on for transmitter tune up.

The rear panel has provisions for an external speaker
(one is built in), external key, external paddles, plus
jacks for keying the transmitter. There is also a connector
for external 9 to 12 V DC power, although it can be powered
by a regular 9 V battery if desired.

It works fine and is in extremely nice condition. $50

Vectronics VEC-212 Code Practice Oscillator For Sale:
This appears to be the same as the MFJ 557 code practice
oscillator, but with the VEC label on it.
A picture can be seen at http://www.n4mw.com/cp100tn.jpg
It is a traditional code practice oscillator, with adjustable
volume and tone. It includes a straight key on a nice base.
It operates from a 9 volt battery, or from a wall wort power
supply.
With paper work for $22.

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo
connector on the end, like used by most rigs. It looks
great. $8
As above, but 1/8 inch plug. $8

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch
phone plug on it, as is used with a straight key. $5
As above, but 1/8 inch plug. $5

Prices do not include shipping from Florida.

Thanks.

From: Ken Simpson, W8EK
Topic: 2065 Message: 2065

Two meter FM Transceiver, plus many ham station accessory items For Sale:

Two meter FM Transceiver:

KDK FM-2033 mobile FM transceiver for 2 meters

This rig produces just over 25 Watts in high power and about 7 watts in low power. The rig is fully synthesized, has memories, scan, subaudible PL tone, and all the things that one expects in a 2 meter rig. It has a touchtone microphone with it. It sounds great, and hears well. It needs 13 V DC at about 7 amps.

This particular rig is in very nice condition. There is one paint spot missing, about the size of a pin head. It includes the touchtone microphone, mobile mounting bracket, power cord, and paper work. The original box is also included, although the box looks much worse than the radio. Even the mic clip, and a bag of screws are included, as is the original multicolored sales brochure. $89

TenTec items:

TenTec 285, 500 Hz filter
500 hz for CW or digital use
Fits Corsairs, Paragons, Omni V and VI, and others.
This one has its paperwork and looks like new. $75

TenTec 288, 1800 Hz filter
1800 hz for wide CW, narrow SSB or digital use
Fits Corsairs, Paragons, Omni V and VI, and others.
It looks like new, with paperwork. $75

"Switcher / 25" 25 amp switching power supply
This is a 25 amp switching power supply in a case that matches the early Omni series case, with the metal bezel around it. It is in a case that is the same size as a 243 remote VFO. It has an ammeter on the front, along with Switch, TenTec logo, and output bulb. The front panel basically looks like a 280 power supply with a metal bezel, but says "Switcher/25" on it. It is very quiet, and well shielded, and does not produce any electrical noise that I could find. $150

Heath VHF Wattmeter

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.
Similar to the HM-102, but for VHF frequencies, with
250 and 25 watt scales. It can also be used to check SWR,
and has a remote sensor that can either be left inside
the meter, or separated from the actual meter by about
3 feet. SO-239 connectors in and out.
This particular meter works great, looks fine and includes
paper work for $ 40.

Midland 23-126 SWR Bridge
This is an HF SWR Bridge, but it can be used up thru 2 meters,
with slightly reduced accuracy. It is also a field strength
meter. SO-239 connectors.
This one works fine, and looks extremely nice. I do not see
any scratches on it. $30

Astatic D-104 "Lollypop" Desk Microphone

The D-104 is the "Lollypop" microphone that matches many
of the older rigs, and is often seen pictured with them.
It looks somewhat like a giant chrome plated lollypop,
stuck into a black base. The chrome PTT switch is a bar
that is parallel to the "stick" of the lollypop. This
one also has a PTT switch on the base, in addition to
the one on the side.

This particular D-104 is in extremely nice condition.
Of course it works fine. Cosmetically, it is extremely
nice. The chrome seems perfect, with no scratches or
defects of any sort. The black base has a couple of very
minor wear marks, but they are very slight. It presently
has a 4 pin connector wired for TenTec, but that obviously
could be changed. $75

Yaesu YD-844 Desk Microphone

This is a 50 K impedance desk microphone that really looks
sharp. It has a standard PTT switch on it, and also a
locking PTT switch. The YD-844 dynamic base station microphone
is an optional accessory made by Yaesu. Made of a heavy cast
metal it uses a dynamic 50K ohm element.

A picture can be seen at
http://www.eham.net/data/classifieds/images/289870.jpg
or
http://www.foxtango.org/ft-library/F...ies/yd-844.jpg

This particular mic works fine and looks very close to new.
No scratches or imperfections. $100

Johnson SWR sensor 250-24

This unit is in its original box that says "S W R Bridge,
Standing Wave Ratio Bridge, 52 ohms, Cat No 250-24".

However, this is only the sensor unit. There is no actual meter. It is the round, cylindrical sensor that can go with many of the Johnson Matchbox units. SO-239 connectors on each end, plus terminals to connect the wires to the meter.

This unit is in the original box, with the original paper work, and original packing material. It appears to be new, and certainly is quite collectible. $60

CMOS Iambic Keyer

This keyer features a build in set of HamKey Paddles. The front has speed control, plus a volume control for the sidetone volume. Of course that means that it can also be used for code practice. Also on the front panel is a 3 position switch that turns off the output to the transmitter (for code practice), puts it in to "Keyer mode", or locks it on for transmitter tune up.

The rear panel has provisions for an external speaker (one is built in), external key, external paddles, plus jacks for keying the transmitter. There is also a connector for external 9 to 12 V DC power, although it can be powered by a regular 9 V battery if desired.

It works fine and is in extremely nice condition. $50

Cables for CW Straight Key and for CW Paddles For Sale:

Cable for straight key
About 3 feet long, with a mono 1/4 inch phone plug on it, as is used with a straight key. $5
As above, but 1/8 inch (3.5 mm) plug. $5

Cable for paddles
About 3 feet long, and with a 1/4 inch stereo connector on the end, like used by most rigs. $8
As above, but 1/8 inch (3.5 mm) plug $8

Vectronics VEC-212 Code Practice Oscillator For Sale:

This appears to be the same as the MFJ 557 code practice oscillator, but with the VEC label on it.

A picture can be seen at http://www.n4mw.com/cp100tn.jpg

It is a traditional code practice oscillator, with adjustable volume and tone. It includes a straight key on a nice base. It operates from a 9 volt battery, or from a wall wort power supply.

With paper work for $22.

Waters "Universal Hybrid Coupler II" Model 3002

Most of us would likely call this a phone patch, but it is really much more than that. It does that, but also will interface with a tape recorder, and permit recording and play back of on-the-air QSOs. Nothing says that the tape recorder input must be used that way. Connect the sound card in your computer in this position, and you have a very effective interface.

Model 3002 includes a speech compressor powered by a 9 volt battery. The front panel is finished on both sides, with one side having it set in a horizontal position, and the other in a vertical position.

This was a "top of the line" unit years ago. One only found them with top stations such as Collins.

This particular unit is in really great condition.

With paper work for $100.

Heath Phone Patch and SWR Bridge For Sale:

Both of these units match the Heath SB series.

Heath HD-15 Phone Patch
This is the unit with the VU meter on the left and 3 knobs that match the SB series to the middle and right. Low or high Z output to the transmitter. It can also be used as an interface to the computer for PSK31, etc. It is in good shape. Paper work included for $25.

Heath HM-15 SWR Bridge
It is an HF SWR Bridge, with SO-239 connectors on the back. The front has the meter on the left, and two knobs to the right. It is the same size as the HD-15 phone patch. This one works fine and is in nice cosmetic shape. Paper work included for $20.

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted in the coax line after the transmitter or transceiver) to reduce harmonic interference.

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter and antenna, and has been optimized to have more attenuation in the 40 MHz region, where many TVs have their IF. It is good for 1000 Watts "average" according to the manual, and has over 80 db attenuation at 41 MHz. This one looks great, and includes the paper work. $30

B & W model 426 low pass filter
B & W TVI filter, cuts off just above 10 meters,

and will handle 1500 Watts. SO-239 connector on each end.
This is an older model that seems much heavier duty. It weighs
almost twice as much as the newer models, and looks like it
would take more power. It likely was made in the days that
plate modulated AM was the rule. $30

B & W FL-10/1500 (Formerly known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. This is the latest model B & W filter. It is in very nice
condition; it looks very close to new. With paper work $40.

Bud LF-601 low pass filter
This filter is adjustable for best attenuation in your particular
situation, and also to more closely match your specific impedance.
It cuts off just above 10 meters (if adjusted as such), and will
handle 1500 watts.
In extremely nice condition for $35.

Alliance U-100 and U-110 antenna rotor control boxes

This is the control box only, and not the actual
rotor. This control box takes 4 conductor cable.
It was designed for large TV antennas, but is often
used as an elevation rotor for satellite arrays,
or for VHF beams.

Two are available. One is for a U-100 and one is for
a U-110.
Electrically they are interchangeable, but are styled
slightly different.

Both control boxes works fine, and look fine also.

Paper work included for $25 each.

AEA Items For Sale:

AEA AC-1
"Wall wort" 12 V DC power supply at 1 amp.
Can be used with PK-232, PK-88 or others. $15

AEA Software
The followings is legitimate AEA software, with the
original disks with serial numbers, and original documentation.
It is not copied or "bootleg" software.
Log Windows, Version 2.0 - $15

MFJ 1272 BZ switch to transfer between microphone and TNC

MFJ made these so it would be easy to use a TNC such as the
AEA PK-88. The small box has a socket to plug your microphone
into on the front, along with a switch to switch between mic

or TNC. There are two cables coming out of the back, with one going to the mic jack on your rig, and other going to your TNC. There is also provision for receive audio in, and an external speaker. No power is required. Inside the box is a series of jumpers, so that it can be configured for any rig.

This model is made to switch between an AEA PK-88, and any rig with the round 8 pin mic connector.

Paper work is included that shows how to set the jumpers for most of the common rigs (Kenwood, Yaesu, Icom, Alinco, etc.).

It is in A-1 shape, and works 100%. $30

Generic Hand Microphone
This is a low impedance hand microphone, black in color.
It is presently has an 8 pin round connector, wired for Kenwood. $25
As above, with no connector. $22

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed.
Stripped and tinned leads.
It works fine, and looks good also. $25

DTMF Touch Tone Microphones:

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with a low impedance microphone. This one has the 8 pin modular plug (like a computer LAN) on it. This mic has not been used, so it is in really great condition.
With paper work for $40.

CES "Micropad" touch tone mic
No model number on it, but it has a 12 digit pad on the back. Low Z mic element with round 8 pin connector wired for Kenwood. $38

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a normal low impedance microphone. With 4 pin plug.
Like new. $38

Speaker Microphones:

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks

fine and works fine. $18

Speaker Mics for standard 2.5 mm and 3.5 mm connectors
This connection was used on the vast majority of HTs
until recently. If your HT has a 2.3 mm and 3.5 mm
connector, these will likely work for you.
Two are available.
One is a Prime, and the other is a Densei. Both work
fine and look very close to new. Your choice for $20.

Belt Clips:
All include the hardware with the belt clip and are $8 each.
Yaesu FT-207
Yaesu FT-209

Wrist Strap for Yaesu FT-209 - $4

LARGE Analog Meters For Sale:

General Electric Edgewise DC ammeter
0-100 ma scale - Edgewise meter with scale 5+ inches
long and 1.7 inches high. White scale, w/ silver/gray mounting
This is a very nice meter that can be read across the room. $30

LabVolt AC ammeter
0-1 amp scale, 4 inch square meter, $20

LabVolt DC ammeter
0-1 amp scale, 4 inch square meter, $20

DC voltmeter has 3 scales on it - 5, 10, and 25 volts.
It says it is a Niehoff Voltmeter, Chicago, Model T-2.
It looks like 1930s vintage, and is in very nice shape. $28

Very heavy duty chokes, as used to filter ripple in high current
power supplies.
These chokes (inductors) weigh about 8 pounds each, and
are designed to be used in low voltage applications. They were both
removed from power supplies, and are in close to new condition.

One is from a 20 amp power supply. $13.

Another is from a 30 amp power supply. $15.

Prices do not include shipping from Florida.

Thanks.

From: sjotrollet
Topic: 2066 Message: 2066

159) Hallicrafters S-38C HF Receiver
Project model. Case needs refinishing & TLC. No dents, scratches, gouges, etc., just small rust spots & stains. Has all knobs, tubes, etc. Appears unmodified. Missing the rear cover. Dials (freq & bandspread) work OK. Knobs & sliding switches in good condition. Some rust spots on the chasis.

141) Hallicrafters SX-105 VHF Receiver
Project model or "Hangar Queen" (parts). Case needs refinishing. No dents, gouges, scratches, etc, just small rust spots & stains on case & chasis. Missing 4 knobs. Has all tubes. Appears audio output (output xfmr circuit) may have been modified.

Kenwood TH-215 HT, plus many accessory items for many HTs For Sale:

Kenwood TH-215, 2 meter HT (plus public service band on receive)
Covers the 2 meter band with up to 7 W output power. Of course
it has memories, scan features, and the things one expects in
an HT. Subaudible (PL, CTCSS) tones are built in and can be
adjusted from the keypad. A 16 digit touchtone (DTMF) pad is
built in. It can be powered by the PG-3 E cord from 13 V DC
to provide full 7 watt output. It also has about 1 W output
in low power.
This one is in very nice condition. It includes a PB-2 battery,
rubber duck antenna, and paper work for $70.

BC-7 Desk Charger
This unit will fast charge PB-1, PB-2, PB-3, PB-4, and maybe
other Kenwood battery packs. It works fine and is in good
shape. $50

PG-3 E Cord
This cord plugs into the cigarette lighter to provide 12 V
DC to the TH-215, TH-225, TH-415, and other Kenwood HTs.
It has a filter built in, and permits high power operation
of the HTs. $20

SC-12 Vinyl Case
For TH-215, TH-225 and others, with room for the standard
PB-2 and PB-3 battery packs. Black color. Very nice
condition. $15

SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1
and PB-4 battery packs. It can also be used with the smaller
PB-2 and PB-3 battery packs, by putting a filler in the case.
Black color. In very nice condition. $15

Bianchi Real Leather Case for TH-215, TH-225, etc.
For use with the larger PB-1 and PB-4 batteries, but can be
used with the smaller PB-2 and PB-3 batteries. This is real
leather, tan in color, and is in very nice condition. $25

Case for Drake TR-33C
This is the black case that fits the Drake TR-33C, and has
cutouts in the back for antenna, power, etc. It includes
the shoulder strap, and is in good shape. $12

Case for Drake TR-22
As above, but for the TR-22. No shoulder strap. $10

Belt Clips:
All include the hardware with the belt clip and are $8 each.
Kenwood BH-2 for TH-215, TH-225, TR-2500, TR-2600, and others
Kenwood TR-2400
Motorola
Yaesu FT-207
Yaesu FT-209

Wrist Straps for various HTs - $4 each
Kenwood TR-2400
Kenwood TH-21/31/41
Yaesu FT-209

Speaker Microphones:

Speaker Mics for standard 2.5 mm and 3.5 mm connectors
This connection was used on the vast majority of HTs
until recently. If your HT has a 2.3 mm and 3.5 mm
connector, these will likely work for you.
Two are available.
One is a Prime, and the other is a Densei. Both work
fine and look very close to new. Your choice for $20.

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks
fine and works fine. $18

Accessories specific to the Kenwood TR-2400 HT:

Belt clip for TR-2400 HT, complete with hardware - $8

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery
of the Kenwood TR-2400, 2 meter HT, outside of the HT itself.
Usually, one must have the battery inside the HT, but this
lets you charge a second battery outside of the HT. The
original charger is used. It is in good shape, and works
fine. $3

Wrist strap
I think it fits most Kenwood (and maybe other) HTs - $4

Antenna adapter to fit the BNC connector on the HT and
provide an SO-239 connector that will permit a PL-259 to
be attached. This adapter can be used on any HT with a
BNC connector. $5

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

5/16 inch threaded, like used by Motorola and others
Regular - 5.7 inches long
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15
Kenwood Stubby Duck for TH-21, 4 inches long - $15

Alinco Stubby w/BNC Connector, 4.6 inches long

Alinco 220 MHz, w/BNC, 6 inches long

BNC Stubby for 440 MHz, 3 inches long
BNC regular for 440 MHz, 6.5 inches long

Larsen Magnetic Antenna Mounts:

Larsen NLA-MM Mobile Antenna Mag Mount
This rectangular mag mount features an extremely strong
magnet. The center of the mag mount takes an NLA type
antenna. It includes coax, with a PL-259 connector on it.
It is in good condition. $20

Larsen PO-MM Mobile Antenna Mag Mount
Same as NLA-MM and NMO-MM above, except the center
of the mag mount has an SO-239 connector, which
means any antenna with a PL-259 can be used with it.
It is in good condition. $17

Larsen VHF and UHF Mobile Antennas:

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 m; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on
the 70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
Can be cut for 2 m, 220 MHz, or 440 MHz. $7

Larsen Q Quarter Wave Antenna
Fits a 5/16 inch stud, such as the Larsen LM mount,
and others. It can be cut for 2 meters, 220 MHz, or
450 MHz bands. $7

Larsen NMO-Q Quarter Wave Antenna
For two meters. $10
Precut for 450 MHz. New, still in bag. $8
For 450 MHz, used, but very good. $6

Avanti / Antenna Specialists "On Glass" antennas:

These antennas were made by Avanti, and then later by Antenna Specialists, to mount on a windshield, or other glass. They do not require a ground plane, as they are 1/2 wave antennas, rated to have 3 db gain. They are ideal for places where a ground plane is not available, such as a boat or motor home, in addition to cars. A special tuning box is included to match to your particular situation.

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Santec HT Accessories:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case. It fits most of the Santec HTs, such as the HT-1200, ST-142, ST-144, ST-440, etc. The real leather case includes a built in belt clip, plus a removable leather shoulder strap.
The case itself is in very nice shape. The leather shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a service pack. It has schematics, circuit explanations, voltages, etc. $18

"Dead" Icom Battery Pack:

Icom BP-3 battery pack
I have the equivalent of the BP-3 battery pack that is dead. This is actually a pack from a Radio Shack HT that uses the same batteries as the Icom. It looks like it will hold 6 AA battery cells. This pack is used on the IC-2 AT, 3 AT, 4 AT, 02 AT, 03 AT, 04 AT, and some others. It will also fit some of the Radio Shack / Realistic HTs such as the HTX-202 and HTX-404.
This one is dead, but if you need a battery shell, to put a new "insert" in to, or for some project, it would be ideal. Adding one of the newer high capacity inserts will give you a very inexpensive new battery, or build a regulator in for use from 12 V DC.
It looks very nice, and is not all scratched up. $10

Selectone ST-131 Subaudible PL tone encoder
If you need subaudible tones, this unit will add them to the Icom IC-2AT, 3AT, 4AT, and others of that series that lacked the tones originally. It is a postage stamp size unit. This one has never been used, and is still in its original plastic bag, with the instructions. $30

Battery charge adapter for Azden PCS-300 HT
This is an adapter that permits one to charge the battery of the Azden PCS-300, 2 meter HT, outside of the HT itself. Usually, one must have the battery inside the HT, but this lets you charge a second battery outside of the HT. The original charger is used. If you have a PCS-300 HT, you need this adapter. It works fine, and looks like new. $3

Original Kenwood Manuals:

All manuals are in very nice, close to new condition, for Kenwood radios, unless stated otherwise.

Operating manual for TW-4000 dual bander $15

Service manual for TW-4000 dual bander $20

Operating manual for TH-21 A / AT HT for 2 meters $8

Operating manual for TH-41A/BT/E, TH-31A/BT, TH-21A/BT/E HTs for 440 MHz, 220 MHz and 2 meters $10

Service manual for TH-21 series HTs $20

Operating manual for TH-215, 2 meter HT
Good condition, but has some writing on the covers $10

Operating manual for TH-225, 2 meter HT - Good condition $12

Operating manual for TM-221/421 mobile $15

Operating manual for TH-241 / 441 / 541 mobile FM transceivers
For 2 meters, 440 MHz, and 1200 MHz. $ 12

Operating manual for TR-2200, 2 meter "portable"
This is very similar to the Drake TR-22. $15

Operating manual for TR-2400, 2 meter HT $12

Operating manual for TR-2500, 2 meter HT $14

Operating manual for TR-2600, 2 meter HT $12

Service Manual for TR-2600, 2 meter HT $15

Manuals for Kenwood Accessories:

Operating manual for BC-5 DC charger/adapter $4

Operating manual for MC-30 and MC-35 hand microphone $5

Operating manual for MC-80 desk microphone $5

Operating manual for MC-85 desk microphone $4

Operating manual for PS-30 power supply $5

Operating manual for SMC-24 speaker mic $4

Operating manual for SMC-25 speaker mic $4

All of the above are in English.

Spanish version of the Operating Manual
for the Kenwood TM G-707 dual band transceiver
This is the original operating manual only, in Spanish.
It looks like it is quite extensive and detailed.
It is basically new, only being opened to observe that
it is in Spanish only. It is original from Kenwood. $10

ORIGINAL Icom operating manuals:
Please note that all of these are original Icom manuals
and are not copies.
All are in very good condition.
These are original manuals only.

BC-30 Desk Charger $7
BC-35 Desk Charger $7
BP-2, BP-3, BP-4, and BP-5 Batteries $3
BP-21, BP-22, BP-23, and BP-24 Batteries $3
IC-229, 2 meter mobile transceiver $15
IC-230, 2 meter mobile transceiver $15
IC-3 PA Power supply $10
UT-16 Voice Synthesizer $5

These are original manuals only.

Does anyone have an older two meter ham rig and need crystals?

Maybe I can help. I have some of both transmit and receive
2 meter crystals. Most are in the 146 and 147 MHz band segments,
with very, very few in the 145 MHz segment, and none in the
144 MHz segment. These are for ham rigs only, and not
commercial rigs.

These are all the small HC-25 crystals, like are used in most
of the solid state 2 meter mobiles and HTs. Please e-mail
the operating frequency you need. I have them listed by
operating frequency and rig, and not by actual xtal frequency.
Send the frequencies you need (transmit or receive), and
the rig that you have, and I will see if I can help. I have
cross references for the various rigs, so I will know what
you need if you give the rig. Crystals are $6 each.

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

From: Ken Simpson, W8EK
Topic: 2070 Message: 2070

Antennas and antenna related accessories For Sale:

HF 1 to 1 Baluns:

The Big Signal W2DU Balun
Model HF. 1 to 1 ratio. Stainless steel hardware.
A lightning arrester is included in this balun.
It is a current type balun, covering from 1.8 to 30 MHz.
This one works fine and looks very close to new. $25

Hi-Q Balun by VanGorden
This balun has a 1 to 1 ratio, and also includes a
lightning arrester built in to it. It also is for HF,
and can function as an antenna center insulator as well.
This one is still in its original packaging. $20

Antenna Traps for 17 meters (18.1 MHz)

Unadilla KW-17 Traps
17 Meter (18.118 MHz) Reyco Coils

W2VS traps are available for 80 meters and up. Rated for
2KW PEP. Built from stainless steel and aluminum hardware
to resist corrosion, these rugged traps have a pull strength
of over 600 lbs. Trap coils are waterproofed and condensers
are epoxy-sealed.

These are $46 from Unadilla. It appears that these have
never been used. Buy the pair for only $25.

Heath HM-15 SWR Bridge
It is an HF SWR Bridge, with SO-239 connectors on the back.
The front has the meter on the left, and two knobs to the
right. It is the same size as the HD-15 phone patch. This
one works fine and is in nice cosmetic shape. Paper work
included for $20.

Heath HM-2102 VHF Wattmeter
Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.
Similar to the HM-102, but for VHF frequencies, with
250 and 25 watt scales. It can also be used to check SWR,
and has a remote sensor that can either be left inside
the meter, or separated from the actual meter by about
3 feet. SO-239 connectors in and out.
This particular meter works great, looks fine and
includes paper work for $40.

Johnson SWR sensor 250-24

This unit is in its original box that says "S W R Bridge, Standing Wave Ratio Bridge, 52 ohms, Cat No 250-24".

However, this is only the sensor unit. There is no actual meter. It is the round, cylindrical sensor that can go with many of the Johnson Matchbox units. SO-239 connectors on each end, plus terminals to connect the wires to the meter.

This unit is in the original box, with the original paper work, and original packing material. It appears to be new, and certainly is quite collectible. $60

Two Position Coax Switch w/Lightning Protection
Alpha Delta "Delta 2" two position switch
This is the switch that has a lot of lightning protection built in, including a gas discharge tube. It also has a center position of the switch that grounds both antennas.
You can read more about it at
http://www.universal-radio.com/CATALOG/switch/2415.html
This one is in extremely nice condition.
Of course it works fine. $40

Hustler HF mobile high power resonators

All work fine and are in great cosmetic condition.

"Super" high power resonators (good for 2 KW PEP)
80 meter RM-80 S
.....can be cut for CW or phone, and also used on a 4BTV
.....Vertical to give 80/75 meter coverage $38
15 meter RM-15 S $18
10 meter RM-10 S $16

7 pin DIN Cable
This cable has a 7 pin DIN plug on each end, and is about 18 inches long. I think it is used for Icom HF transceivers to connect the HF rig to one of the automatic antenna tuners, such as the AT-150. It could have other uses. $20

Alliance U-100 and U-110 antenna rotor control boxes

This is the control box only, and not the actual rotor. This control box takes 4 conductor cable. It was designed for large TV antennas, but is often used as an elevation rotor for satellite arrays, or for VHF beams.

Two are available. One is for a U-100 and one is for a U-110.
Electrically they are interchangeable, but are styled slightly different.

Both control boxes works fine, and look fine also.

Paper work included for $25 each

Larsen VHF and UHF Mobile Antennas:

Antennas are used, but in very good condition.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 m; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on
the 70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
Can be cut for 2 m, 220 MHz, or 440 MHz. $7

Larsen Q Quarter Wave Antenna
Fits a 5/16 inch stud, such as the Larsen LM mount,
and others. It can be cut for 2 meters, 220 MHz, or
450 MHz bands. $7

Larsen NMO-Q Quarter Wave Antenna
For two meters. $10
Precut for 450 MHz. New, still in bag. $8
For 450 MHz, used, but very good. $6

Larsen Magnetic Antenna Mounts:

Larsen NLA-MM Mobile Antenna Mag Mount
This rectangular mag mount features an extremely strong
magnet. The center of the mag mount takes an NLA type
antenna. It includes coax, with a PL-259 connector on it.
It is in good condition. $20

Larsen PO-MM Mobile Antenna Mag Mount
Same as NLA-MM and NMO-MM above, except the center
of the mag mount has an SO-239 connector, which
means any antenna with a PL-259 can be used with it.
It is in good condition. $17

Avanti "On Glass" antenna for 440 MHz For Sale:

This antenna was made by Avanti to mount on a windshield,
or other glass. It does not require a ground plane, as
it is a 1/2 wave antenna, rated to have 3 db gain. It is
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

5/16 inch threaded, like used by Motorola and others
Regular - 5.7 inches long
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15
Kenwood Stubby Duck for TH-21, 4 inches long - $15

Alinco Stubby w/BNC Connector, 4.6 inches long

Alinco 220 MHz, w/BNC, 6 inches long

BNC Stubby for 440 MHz, 3 inches long
BNC regular for 440 MHz, 6.5 inches long

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted
in the coax line after the transmitter or transceiver) to
reduce harmonic interference.

B & W FL-10/1500 (Formerly known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. This is the latest model B & W filter. It is in very nice
condition; it looks very close to new. With paper work $40.

Bud LF-601 low pass filter
This filter is adjustable for best attenuation in your particular
situation, and also to more closely match your specific impedance.
It cuts off just above 10 meters (if adjusted as such), and will
handle 1500 watts. SO-239 connector on each end.
In extremely nice condition for $35.

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter
and antenna, and has been optimized to have more attenuation
in the 40 MHz region, where many TVs have their IF. It is good
for 1000 Watts "average" according to the manual, and has
over 80 db attenuation at 41 MHz. This one looks great, and

includes the paper work. $30

B & W model 426 low pass filter
B & W TVI filter, cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each end.
This is an older model that seems much heavier duty. It weighs
almost twice as much as the newer models, and looks like it
would take more power. It likely was made in the days that
plate modulated AM was the rule. $30

Coax connectors and adapters:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

Chassis Mount SO-239 connectors (square) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

UHF female (SO-239) to type "F" Male (as used on cable TV) $5

Type "F" (cable TV) female to BNC male - $5

Prices do not include shipping from Florida.

Thanks.

2071. FS: Large Tube Caddy

Yahoo group: amatuerradioswapfest
Date: 2009-10-06 21:35:14 UTC
From: Bry Carling
Topic: 2071 Message: 2071

FOR SALE: Large Tube Caddy...

This will hold hundreds of tubes as it has several large
internal compartments. There are no tubes in the caddy. It makes
for great storage, transportation and protection for your tubes.

Will hold every size tube from the sub-miniature ones to the larger
transmitting tubes, audio power tubes etc.

Covere din beige tolex, this tube caddy in very good condition.
Sturdy wood construction. The brand is "SUPER TUBE CADDY..."
This one has the usual compartments for storing tubes of various sizes.
This is a large, well-built tube caddy with dimensions: 24" X 16" X 9"
Available for $60.00 plus shipping.

Pictures and details available at:
http://www.af4k.com/miscpart.htm

All the best - Brian, AF4K

2072. FS: UHF Linear Amplifier 35 watts

Yahoo group: amatuerradioswapfest
Date: 2009-10-09 21:31:31 UTC
From: Bry Carling
Topic: 2072 Message: 2072

FOR SALE: KLM linear amplifier for 420-450 MHz band in very good condition.

This is a 35 watt all-mode amplifier for the 70 cm band

Model is PA 10-36CL
Input required is 5 to 10 watts for full output of 35 watts.

I used one of these years ago to work OSCAR satellites with 2 watts of drive from an ICOM IC402 portable SSB-CW rig and always got about 18 watts p.e.p. out.
Works fine and has type N connectors for low loss at UHF.

Picture and details at:
http://ww.af4k.com/radios.htm

2073. REDUCED: BC-221 Frequency Meters

Yahoo group: amatuerradioswapfest
Date: 2009-10-15 13:39:05 UTC
From: Bry Carling
Topic: 2073 Message: 2073

REDUCED: BC-221 Frequency Meters for sale...

I have two of these for sale. Both are standard unmodified Frequency
Meters
and each comes with the book. Appearance is excellent inside.
Each has a little surface rust on the catches on the outside of the case
but it's nothing serious at all. For their age they are in superior condition
compared to most of these that I have seen.

Two types avcailable - Model BC-221-AA and a Model BC-221-AF.
QTY 2 available now for $49.00 each plus shipping.

Pictures and details here:

http://www.af4k.com/miscpart.htm

Thanks for looking and 73 de AF4K, Bry

2074. HF Antenna related items FS

Yahoo group: amatuerradioswapfest
Date: 2009-10-17 11:49:42 UTC
From: Ken Simpson, W8EK
Topic: 2074 Message: 2074

HF Antenna related items for sale:

SWR Bridges:

Midland 23-126 SWR Bridge
This is an HF SWR Bridge, but it can be used up thru 2 meters, with slightly reduced accuracy. It is also a field strength meter. SO-239 connectors.
This one works fine, and looks extremely nice. I do not see any scratches on it. $30

Heath HM-15 SWR Bridge
It is an HF SWR Bridge, with SO-239 connectors on the back. The front has the meter on the left, and two knobs to the right. It is the same size as the HD-15 phone patch. This one works fine and is in nice cosmetic shape. Paper work included for $20.

HF 1 to 1 Antenna Baluns:

A balun is made to convert the unbalanced coaxial cable to a balanced antenna, such as a beam or dipole.
These are all 1:1 baluns, which means that they will preserve the impedance, instead of acting like a transformer. They will handle full legal power, and take a PL-259 connector.

Bencher ZA-1 A Balun
This 1:1 balun will handle full legal power, and can be used either with a dipole or a beam. It has strain relief for the dipole wire, and can be hung from the provided mounting hole.
This one works fine and looks great. $40.

The Big Signal W2DU Balun
Model HF. 1 to 1 ratio. Stainless steel hardware.
A lightning arrester is included in this balun.
It is a current type balun, covering from 1.8 to 30 MHz.
This one works fine and looks very close to new. $25

Hi-Q Balun by VanGorden
This balun has a 1 to 1 ratio, and also includes a lightning arrester built in to it. It also is for HF, and can function as an antenna center insulator as well.
This one is still in its original packaging. $20

Hustler HF mobile resonators:
All work fine and are in great cosmetic condition.
Regular (400 Watt PEP) Resonator:

40 meter, RM-40 $17
"Super" high power resonators (good for 2 KW PEP)
15 meter RM-15 S $18
10 meter RM-10 S $16

Alliance U-100 and U-110 antenna rotor control boxes

This is the control box only, and not the actual
rotor. This control box takes 4 conductor cable.
It was designed for large TV antennas, but is often
used as an elevation rotor for satellite arrays,
or for VHF beams.

Two are available. One is for a U-100 and one is for
a U-110.
Electrically they are interchangeable, but are styled
slightly different.

Both control boxes works fine, and look fine also.

Paper work included for $25 each.

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted
in the coax line after the transmitter or transceiver) to
reduce harmonic interference.

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter
and antenna, and has been optimized to have more attenuation
in the 40 MHz region, where many TVs have their IF. It is good
for 1000 Watts "average" according to the manual, and has
over 80 db attenuation at 41 MHz. This one looks great, and
includes the paper work. $30

B & W model 426 low pass filter
B & W TVI filter, cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each end.
This is an older model that seems much heavier duty. It weighs
almost twice as much as the newer models, and looks like it
would take more power. It likely was made in the days that
plate modulated AM was the rule. $30

B & W FL-10/1500 (Formerly known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. This is the latest model B & W filter. It is in very nice
condition; it looks very close to new. With paper work $40.

Bud LF-601 low pass filter
This filter is adjustable for best attenuation in your particular
situation, and also to more closely match your specific impedance.

It cuts off at about 52 MHz (if adjusted as such) so it can be
used on 6 meters, and will handle 1500 watts.
In extremely nice condition for $35.

Coax Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

Coax connectors and adapters:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

Chassis Mount SO-239 connectors (square) $1

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

UHF female (SO-239) to type "F" Male (as used on cable TV) $5

Type "F" (cable TV) female to BNC male - $5

CW Items:

TenTec KR-2 Paddles
The paddles are a single lever paddle, like is in the KR-5
keyer. They are housed in a nice eggshell white and wood
grain cabinet. There is also a separate button on top that
can be used as a straight key, or to tune up a rig or
antenna tuner. $40

Buy the paddles with one of the keyers below, and take $10
off of the pair.

MFJ 484 C "GrandMaster" Keyer with Memories
This keyer has a built in sidetone, with volume and tone

adjustable on the front panel. Speed and weighting are
also adjustable from the front panel.
It has 4 large memories. You may install a 9 volt battery
to preserve memory contents during a power failure. It can
be powered by either a 9 Volt battery, a 9 V DC wall wart,
or your station 12 V DC power supply.
It is a nice eggshell white and wood grain enclosure that
matches the TenTec KR-2 paddle. $55

Palomar Engineers IC Keyer
This keyer includes a sidetone with speaker built in. It
also will operate in either full automatic mode (like most
keyers), or in semiautomatic mode (like a bug). The 9 Volt
battery is external, so it can be changed easily. This one
works great. $45

Cables for CW Straight Key and for CW Paddles For Sale:

Cable for straight key
About 3 feet long, with a mono 1/4 inch phone plug on it,
as is used with a straight key. $5
As above, but 1/8 inch (3.5 mm) plug. $5

Cable for paddles
About 3 feet long, and with a 1/4 inch stereo connector
on the end, like used by most rigs. $8
As above, but 1/8 inch (3.5 mm) plug $8

Prices do not include shipping from Florida.

Thanks.

2076. ARRL and other ham publications, Original Manuals FS

Yahoo group: amatuerradioswapfest
Date: 2009-10-24 11:32:28 UTC
From: Ken Simpson, W8EK
Topic: 2076 Message: 2076

Electronic Publications For Sale:

Some are vintage, and some more modern.
All are in excellent condition, unless listed otherwise.

ARRL Handbooks:

These are in the smaller format (6 1/2 by 9 1/2 inch size).
They include tube charts and ads for vintage equipment,
which are not in the newer handbooks.
1977 - 54th edition - Good condition $10

More modern, larger 8 1/2 by 11 inch format:
1981 - 58th edition - Nice shape $13
1982 - 59th edition - Good condition $11
1992 - 66th edition - Hardback, like new $20

The ARRL RFI Book
Practical Cures for Radio Frequency Interference
1999, First Edition, Large 8 1/2 X 11 book, $12

The ARRL Antenna Book
1983, 14th Edition, Large 8 1/2 X 11 Book, $10

ARRL How to Become a Radio Amateur, 1970, 26th edition,
Extremely nice, close to new condition,
with many vintage ads in the back, $15

ARRL Understanding Amateur Radio
1977, no edition number listed, $8

ARRL Learning to work with Integrated Circuits
1977, First edition $12

ARRL Radio Frequency Interference
1978, First Edition, $10

ARRL The Satellite Experimenter's Handbook
1984, First Edition, $8
1990, Second Edition, $15

ARRL Radio Amateurs Operating Manual, 1985, 2nd edition, $8

RSGB "Amateur Radio Operating Manual"
1982 - 2nd edition - $8

CQ The Packet Radio Operators Manual
By Buck Rogers, K4ABT, 1995

Close to new condition, $14

The Radio Amateur's Digital Communications Handbook
By KR3T, J Mayo, Published by Tab
Hardback Book, Like New, 208 pages, 1992, $12

B & W "Filter Facts"
This booklet explains how low pass TVI filters work,
why they are needed, and why you should use one.
No date, but appears to be 1950 or 60's vintage. $5

Allied Dictionary of Electronic Terms
Fifth Edition, 1960, like new condition, $10

ARRL Operating an Amateur Radio Station
1976 - 57th edition $3
1978 - 58th edition $3
1983 - 61st edition $3
1984 - 62nd edition $3
1989 - 63rd edition $4

Ham Price Guide - 2nd Edition
Lists prices of used ham gear - $5

Call Area Map of the World
33 x 24 inches in size $5

ARRL Call area map of the US
Approx 37 x 24 inches in size $8

ARRL DXCC Countries List
Sept 1997 - marks in it - $2

ARRL FCC Rule book

2077. Microphones FS

Yahoo group: amatuerradioswapfest
Date: 2009-10-25 13:35:16 UTC
From: Ken Simpson, W8EK
Topic: 2077 Message: 2077

Microphones For Sale:

Yaesu YD-844 Desk Microphone

This is a 50 K impedance desk microphone that really looks
sharp. It has a standard PTT switch on it, and also a
locking PTT switch. The YD-844 dynamic base station microphone
is an optional accessory made by Yaesu. Made of a heavy cast
metal it uses a dynamic 50K ohm element.

A picture can be seen at
http://www.eham.net/data/classifieds/images/289870.jpg
or
http://www.foxtango.org/ft-library/F...ies/yd-844.jpg

This particular mic works fine and looks very close to new.
No scratches or imperfections. $100

Yaesu MH-31 B 8 dynamic hand microphone
This is the Yaesu hand microphone that has the round
8 pin connector on it. It will go with virtually any Yaesu
rig that uses the round 8 pin connector. It has up, down,
and fst switches, and well as a tone switch, in addition
to the PTT switch.
This particular unit works 100%, and is still unused in
its original box. It even includes the new shiny, chrome
mic holder for $40.

Icom HM-7 Hand Microphone
This low impedance dynamic hand microphone has an internal
preamp in it, and is used with Icom rigs such as the 245,
260, 290, 451, 490, 505, 560, 720, 730, 740, 22U, 25A, 251A,
and maybe others. It has a 4 pin plug on it.
This one works fine, and looks like it just came out of
the box. $30

Generic Hand Microphone
This is a low impedance hand microphone, black in color.
It is presently has an 8 pin round connector, wired for
Kenwood. $25
As above, with no connector. $22

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed.
Stripped and tinned leads.
It works fine, and looks good also. $25

DTMF Touch Tone Microphones:

Yaesu MH-15a8
Has 16 digit DTMF pad on the back with an Up-Down
switch on the top in addition to the PTT button.
8 pin round connector. $40

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with
a low impedance microphone. This one has the 8 pin
modular plug (like a computer LAN) on it. This mic has
not been used, so it is in really great condition.
With paper work for $40.

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a
normal low impedance microphone. With 4 pin plug.
Like new. $38

Speaker Microphones:

Yaesu MH-34 b 4 b speaker microphone
This is the one that fits the Yaesu VX-8, VX-7, VX-6,
VX-5, VX-3, VX-2, VX-1, and that series of HTs. I think
it also fits the FT-50 and FT-60, and maybe others. It
has a single 4 conductor, 3.5 mm plug on it. This one
is just like new. $30

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks
fine and works fine. $18

Yaesu YM-24 A speaker mic.
Fits FT-207, 208, plus many others. It has the
odd little round connector on it like Yaesu, Wilson,
Santec, and others used in the 1970s and 80s.
This particular unit works fine, and looks great
also. $20

Communications Speaker:
This 4 inch square speaker is optimized for communications
frequencies (300 to 3000 Hz). It is a Realistic Radio Shack
speaker in a black enclosure, and is an 8 ohm speaker. It
has a cord with a 1/8 inch (3.5 mm) mono plug on the end.
This one works fine and looks OK also. $15

Prices do not include shipping from Florida.

Thanks.

2078. BC221 Frequency Meter

Yahoo group: amatuerradioswapfest
Date: 2009-11-02 10:06:44 UTC
From: Bry Carling
Topic: 2078 Message: 2078

FOR SALE: BC221 Frequency Meter

Here is a standard unmodified BC-221 Frequency Meter and it comes with the book.
Beautifully built military spec equipment with a dial drive and tuning capacitor that are
ideal for a project like a VFO or a remote VFO or even a homebrew receiver or transceiver.

Appearance is excellent inside. There is minor surface rust on the catches on
the outside of the case, but it's nothing serious at all. For its age this instrument
is in superior condition compared to most of these that I have seen.
Available for $49.00 plus shipping.
Pictures and details at:
http://www.af4k.com/radios.htm

2079. FS: Bunch of FT241 Crystals

Yahoo group: amatuerradioswapfest
Date: 2009-11-02 11:07:34 UTC
From: Bry Carling
Topic: 2079 Message: 2079

FOR SALE: Group of 40 FT241 Crystals in new condition.

Quantity of 40 old FT241 crystals. These are the LF range crystals as used in the military BC620 and BC733 radios. Excellent condition. During WWII these quartz crystals were manufactured for use in military vehicle radios.

These crystals are marked for frequencies in the 20 - 40 mhz range, but the fundamental frequencies are much lower.
Some of the crystals fall in the 455 khz range, and were used by homebrew radio builders in the 1950's onward to make crystal filters, especially for SSB exciters (see early 50's ARRL handbooks).

These are LF crystals in the 300 - 500 kHz range. Marked with channels such as 14, 19, 60, 68, 317, 320 (sorry no specific choices offered) but for example, Channel 68 = 496.3 kHz.

Will sell the box of crystals for $15.00 plus shipping.

Pictures and details at:
http://www.af4k.com/FT241_crystals.htm

73 - Bry Carling, AF4K

2080. FS: Military Surplus CS-137 Crystal Case

Yahoo group: amatuerradioswapfest
Date: 2009-11-05 12:00:16 UTC
From: Bry Carling
Topic: 2080 Message: 2080

FOR SALE: Military Surplus CS-137 Crystal Case

Holds 120 type FT-243 crystals. This is an empty case.
Olive color box with two latches and carry handle.

I have four of these available for $25.00 each plus shipping.

Picture and details available at:
http://www.af4k.com/miscpart.htm

73 - Brian Carling, AF4K

2081. FS: Some more original FT243 Crystals

Yahoo group: amatuerradioswapfest
Date: 2009-11-08 20:51:43 UTC
From: Bry Carling
Topic: 2081 Message: 2081

FOR SALE More original FT243 Crystals

This time I have come up with a nice batch for the 20m ham band...

14020, 14215, 14219, 14230, 14235, 14247, 14275 kHz
14278, 14280, 14285, 14288, 14312, 14320, 14340, 14345 kHz

I have a few others with the newer crystals inside that are for
20m CW - on: 14042, 14058 and 14060 kHz

All available for $12.00 a piece plus shipping.

Complet listings for the original old WW2 era FT243 crystals I have
are found here:

http://www.af4k.com/FT243_CRYSTALS_Originals.htm

2082. FS: Nice 6L6G Tube AND some 2C51 Tubes

Yahoo group: amatuerradioswapfest
Date: 2009-11-08 22:30:37 UTC
From: Bry Carling
Topic: 2082 Message: 2082

FOR SALE:

PHILCO 6L6G Tube in excellent condition. ST "coke bottle" shape envelope...
Looks like it probably was never used. Tested good and works 100% fine. Black bnase has clean,mm new lookig paint unlike most of the original tubes of this type.

Also marked: "PHILCO reg. When renewing, insist on a GENUINE PHILCO TUBE."

I have seen these lately for typically $30 to $60 new or $15 to $35 used.
Two similar tubes just sold on eBay for $49.95

QTY 1 only - Available for $15.00 plus shipping.

= = =

ALSO: QTY 4 Western Electric Type 2C51 tubes
These are good used pulls in excellent tested, working shape.
Typically running around $8 to $15 each.

Will sell all four for $16.00 plus shipping.

E-mail me off the list to ask questions or arrange purchase.

73 - Brian, AF4K

2083. REDUCED: 35 watt UHF Amplifier

Yahoo group: amatuerradioswapfest
Date: 2009-11-14 12:16:59 UTC
From: Bry Carling
Topic: 2083 Message: 2083

FOR SALE:

KLM 35 Watt amplifier for the 70 cm band. Has N connectors
and for input and output, power cable etc. Switchable - for use with
AM-SSB-CW modes and for FM. Very clean and in good working
condition. 4 or 5 watts in produces 35 plus out.
Requires 12V DC and comes with the power cable.

35 watt all-mode amplifier Model PA 10-36CL
Input required is 5 to 10 watts for full output of 35 watts.
I used one of these years ago to work OSCAR satellites with
2 or 3 watts of drive from an ICOM IC402 portable SSB-CW rig
and got about 18 - 20 watts p.e.p. out.

Was asking $49.00
Now Available for $39.00 plus shipping

Picture and details at:
http://www.af4k.com/radios.htm

AM-2 Reflected Power Meter
(Also known as SWR Meter), 1960,
w/ schematic and pictorial, $8

GD-600 Photoelectric Light Switch
Schematic is part of book $5

HD-15 Hybrid Phone patch
1965, Schematic is part of book. $8

HD-1234 Coax Switch
1973, Four Position Coax Switch
Like new, no check marks $7

Heath HDP-21 Desk Microphone
1969, Great condition, $4

HM-15 Reflected Power Meter and SWR Bridge
1968, Schematic is in book, $8

HM-2102 VHF Wattmeter 1972
Very nice condition. No check marks.
Schematic is part of book. $15

HW-2021 Assembly manual - 1975
2 meter hand held transceiver
No check marks $9

IM-5284 Multimeter
Large schematic only $3

SB-102 HF Transceiver
Schematic Only, Large fold out page, $4

T-2 Signal Tracer
No date listed, but I would guess from the 1950's, $8

Brochure "Heathkit Specials" featuring the Twoer and Sixer,
SB series, HR-20, and others. $4

These are original manuals only.

Transistor Substitution Books For Sale:

All are in excellent condition.

Sams Transistor Substitution Handbook
Second Edition, 1961, 112 pages, $5

Sams Transistor Substitution Handbook No. 10
Tenth Edition, 1970, 160 pages, $6

Sams Transistor Substitution Handbook No. 14
14th Edition, 1974, Larger book, $8

Sylvania ECG Semiconductor replacement guide
1976, larger book, 276 pages, $8

Sylvania ECG Semiconductors Master Replacement Guide
1979, larger book, 360 pages, $10

Sylvania ECG Semiconductor Master Replacement Guide
1987, larger book, about 700 pages, $15

Archer Transistor Replacement Guide
62-1015, No date listed, 8000 substitutions, $5

Archer Transistor Substitution Guide
276-2000, 1972, 15,000 types, 96 pages, $5

The following Texas Instrument Data Books are available.
All are in very nice, close to new, condition, with
very little use.

Analog Applications Journal - $2 each
August 1999
Nov 1999
Feb 2000
May 2000
August 2000
Nov 2000

AHC/AHCT Designer's Guide - June 1999 $2

Mixed-Signal and Analog Products Designer's Guide
And Reference w/CD - January 1999 $4

Analog and Mixed Signal Products Designer's Guide
And Reference - August 1999 $3

Logic Selection Guide - August 1998 $4

BiCMOS Bus Logic Interface - 1988 $2

Prices do not include shipping from Florida.
Shipping via "Media Mail" is relatively inexpensive.

Thanks.

2085. Antennas and antenna related items FS

Yahoo group: amatuerradioswapfest
Date: 2009-11-14 18:25:33 UTC
From: Ken Simpson, W8EK
Topic: 2085 Message: 2085

Antennas and antenna related accessories For Sale:

Heath HM-2102 VHF Wattmeter
Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.
Similar to the HM-102, but for VHF frequencies, with
250 and 25 watt scales. It can also be used to check SWR,
and has a remote sensor that can either be left inside
the meter, or separated from the actual meter by about
3 feet. SO-239 connectors in and out.
This particular meter works great, looks very close to
new and includes paper work for $45.

Heath HM-15 SWR Bridge
It is an HF SWR Bridge, with SO-239 connectors on the back.
The front has the meter on the left, and two knobs to the
right. It is the same size as the HD-15 phone patch. This
one works fine and is in nice cosmetic shape. Paper work
included for $20.

Hustler HF mobile resonators:
All work fine and are in great cosmetic condition.
Regular (400 Watt PEP) Resonator:
40 meter, RM-40 $17
"Super" high power resonators (good for 2 KW PEP)
15 meter RM-15 S $18
10 meter RM-10 S $16

The ARRL Antenna Book
1983, 14th Edition, Large 8 1/2 X 11 Book, $10

Larsen VHF and UHF Mobile Antennas:

Antennas are used, but in very good condition.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 m; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on
the 70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
Can be cut for 2 m, 220 MHz, or 440 MHz. $7

Larsen Q Quarter Wave Antenna
Fits a 5/16 inch stud, such as the Larsen LM mount,
and others. It can be cut for 2 meters, 220 MHz, or
450 MHz bands. $7

Larsen NMO-Q Quarter Wave Antenna
For two meters. $10
For 450 MHz. $6

Larsen Magnetic Antenna Mounts:

Larsen NLA-MM Mobile Antenna Mag Mount
This rectangular mag mount features an extremely strong
magnet. The center of the mag mount takes an NLA type
antenna. It includes coax, with a PL-259 connector on it.
It is in good condition. $20

Larsen PO-MM Mobile Antenna Mag Mount
Same as NLA-MM and NMO-MM above, except the center
of the mag mount has an SO-239 connector, which
means any antenna with a PL-259 can be used with it.
It is in good condition. $17

Avanti "On Glass" antenna for 440 MHz:

This antenna was made by Avanti to mount on a windshield,
or other glass. It does not require a ground plane, as
it is a 1/2 wave antenna, rated to have 3 db gain. It is
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

5/16 inch threaded, like used by Motorola and others
Regular - 5.7 inches long
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15

Alinco Stubby w/BNC Connector, 4.6 inches long

Alinco 220 MHz, w/BNC, 6 inches long

BNC Stubby for 440 MHz, 3 inches long

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted in the coax line after the transmitter or transceiver) to reduce harmonic interference.

B & W FL-10/1500 (Formerly known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters, and will handle 1500 Watts. SO-239 connector on each end. This is the latest model B & W filter. It is in very nice condition; it looks very close to new. With paper work $40.

Bud LF-601 low pass filter
This filter is adjustable for best attenuation in your particular situation, and also to more closely match your specific impedance. It cuts off just above 6 meters (if adjusted as such), and will handle 1500 watts. SO-239 connector on each end.
In extremely nice condition for $35.

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter and antenna, and has been optimized to have more attenuation in the 40 MHz region, where many TVs have their IF. It is good for 1000 Watts "average" according to the manual, and has over 80 db attenuation at 41 MHz. This one looks great, and includes the paper work. $30

Coax connectors and adapters:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

Chassis Mount SO-239 connectors (square) $1

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

UHF female (SO-239) to type "F" Male (as used on cable TV) $5

Type "F" (cable TV) female to BNC male - $5

Prices do not include shipping from Florida.

Thanks.

2088. Kenwood HT and other Kenwood items FS

Yahoo group: amatuerradioswapfest
Date: 2009-11-21 14:50:51 UTC
From: Ken Simpson, W8EK
Topic: 2088 Message: 2088

For Sale:

Kenwood TH-21 AT 2 meter HT
This compact HT has thumbwheel switches to select the operating frequency. It has a touchtone pad on it, and is extremely simple to operate. You likely will not need to read to manual to use this one! The HT has about 1.5 watts output in high power and about 1/4 W in low, and a decent receiver.
This one has a battery case that has dead cells; a new insert is needed. I tested it with a battery pack from one of my other units.
This particular HT works fine. Cosmetically it is fairly good, but does have the "7" digit in the right most thumbwheel worn off. Other digits are fine.
It includes a rubber duck, and paper work for $35.

Accessories for Kenwood TH-21/31/41 series HTs:

Kenwood PB-21 battery pack for TH-21/31/41 series HTs
This battery pack does not hold a charge. Physically it is fine, but it needs a new "insert". Or use it to build a DC pack, or other project. With paper work for $8

Kenwood PB-21 H battery pack
As above, but heavy duty pack; needs insert.
With paper work for $12.

Kenwood BC-2 Wall wort charger for use with the PB-21 H Battery pack
With the 2.1 mm coaxial connector to charge the larger battery pack. $15

Antenna adapter for Kenwood TH-21/31/41 HTs
Adapts the antenna connector found on these HTs to a standard PL-259 connector. $6

Kenwood RA-6 Special 2 meter rubber duck antenna for Kenwood TH-21 HT with threaded connector, standard 6.6 inches long. $15

Kenwood BH-2 Belt Clip for the TH-21/31/41 series HTs
Complete with mounting hardware. $8

Original Service manual for TH-21 AT, plus most of the TH-21/31/41 accessories such as DC-21, EP-2, TU-6, etc. $20

Original Operating manual for TH-21 HT for 2 meters $8

Original Operating manual for TH-41A/BT/E, TH-31A/BT,
TH-21A/BT/E HTs for 440 MHz, 220 MHz and 2 meters $10

Other Kenwood Items For Sale:

Paper items with Kenwood Logo:

Kenwood Log Book
Completely unused, new condition. It has standard log
book pages, with a world map on the inside cover, and
a DXCC list (as of 1987) in the back. Cover is a
silver color with the Kenwood Logo. $8

World Map with Kenwood Logo
This map is laminated, and lists DXCC Countries, as
of 1985. Obviously, it is not completely up to date,
but still is a very nice map. Like new. $5

Kenwood MB-4000 Mobile Bracket
This mobile bracket is made to be used with the Kenwood
TW-4000 dual band transceiver, and possibly other rigs
as well.
This one is in good shape, with the paper work and hardware.
$15

Kenwood SC-13 Vinyl Case
For Kenwood TH-215, TH-225 and others, with room for the
larger PB-1 and PB-4 battery packs. It can also be used
with the smaller PB-2 and PB-3 packs. Black color. Great
condition. $15

Bianchi Real Leather Case for Kenwood TH-215, TH-225, etc. HTs
For use with the larger PB-1 and PB-4 batteries, but can be
used with the smaller PB-2 and PB-3 batteries. This is real
leather, tan in color, and is in very nice condition. $25

Belt Clips for various HTs
All include the hardware with the belt clip. $8 each
Kenwood BH-2 for Kenwood TH-21/31/41 series HTs
Kenwood TR-2400
Motorola
Yaesu FT-207

Wrist Straps for various HTs. $4 each
Kenwood TR-2400
Yaesu FT-209

Accessories specific to the Kenwood TR-2400 HT:

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually, one must have the battery inside the HT, but this lets you charge a second battery outside of the HT. The original charger is used.
It is in good shape, and works fine. $3

Belt clip for TR-2400 HT, complete with hardware $8

Wrist strap $4

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. This adapter can be used on any HT with a BNC connector. $5

Original Kenwood Manuals:

All manuals are original, in very nice, close to new condition, for Kenwood radios.

Operating manuals for Kenwood Accessories:
BC-5 DC charger/adapter $4
DC-21 adapter for 12 V DC for TH-21 series HTs $3
HS-5 Headphones $4
LF-30A Low Pass Filter $5
MC-30 and MC-35 hand microphones $5
MC-85 desk microphone $4
PB-1, PB-2, PB-3, and PB-4 battery packs $3
PB-21 or PB-21 H Battery Packs $2
PS-6 power supply $6
PS-30 power supply $5
SC-8 T, soft case for TH-21 series HTs $2
SMC-24 speaker mic $4
SMC-25 speaker mic $4
SP-430 speaker $4
YK-88SN Narrow SSB Filter $4

Operating manual for TW-4000 dual bander $15

Service manual for TW-4000 dual bander $20

Operating manual for TH-21 A / AT HT for 2 meters $8

Service manual for TH-21 series HTs, plus most accessories for this series HT $20

Operating manual for TH-41A/BT/E, TH-31A/BT, TH-21A/BT/E HTs for 440 MHz, 220 MHz and 2 meters $10

Operating manual for TH-225, 2 meter HT $12

Operating manual for TM-221/421 mobile $15

Operating manual for TM-241 / 441 / 541 mobile FM transceivers
For 2 meters, 440 MHz, and 1200 MHz. $ 12

Operating manual for TR-2200, 2 meter "portable"
This is very similar to the Drake TR-22. $15

Operating manual for TR-2400, 2 meter HT $12

Operating manual for TR-2500, 2 meter HT $14

Operating manual for TR-2600, 2 meter HT $12

Service Manual for TR-2600, 2 meter HT $15

Operating Manual for TR-9130 multimode 2 m $15

The above are all in English.

Spanish version of the Operating Manual
for the Kenwood G-707 dual band transceiver
This is the original operating manual only, in Spanish.
It looks like it is quite extensive and detailed.
It is basically new, only being opened to observe that
it is in Spanish only. It is original from Kenwood. $10

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

5/16 inch threaded, like used by Motorola and others
Regular - 5.7 inches long
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15

Alinco Stubby w/BNC Connector, 4.6 inches long

BNC Stubby for 440 MHz, 3 inches long

Prices do not include shipping from Florida.

Thanks.

2089. FS: ANTIQUE HAM XTALS less than $2.00 each.

Yahoo group: amatuerradioswapfest
Date: 2009-11-21 20:58:29 UTC
From: Bry Carling
Topic: 2089 Message: 2089

FOR SALE:

ANTIQUE HAM BAND CRYSTALS - for less than $2.00 each.

Military surplus crystals from the Golden era of radio. Build or restore something true to the period of the 1930s and 1940s. Three batches of crystals are currently available. See list below.

These large crystals are some of the earliest made for use with regular military radio equipment. There is not a lot of information about them available any more. Some were used in type SCR-522 radios, BC624, BC625, ARC3 etc., etc. However, these would make a great basis for a homebrew, old-style glowbug AM or CW transmitter since they are almost all on useful ham band frequencies. Enough here to share with a friend too on some requencies! Will be quite a conversation piece around the shack.

ANTIQUE CRYSTAL KIT #1

HC1/U crystals = H43 type with 3.4" pin spacing and thick pins.
3756, 3903, 7200, 7223, 7249, 7270 kHz

ALSO - CR-1/A Crystals with 1/2" spacing and thick pins.
7010 kHz (QTY 3), 7270 kHz, 7300 kHz, 10.0667 MHz, 29.520 MHz

Total of 14 excellent-looking crystals, PLUS two sockets of each type.
QTY 2 X Ceramic 3/4" crystal socket.
QTY 2 X plastic 1/2" crystal socket.

Complete kit as described above is available for $22.00 plus shipping.

= = =

ANTIQUE CRYSTAL KIT #2

All CR-1/A crystals or similar metal can crystals (2)
with same pins.

2637, 3522, 7000, 7010 (X2), 7200, 7220, 7230,
7250, 7270 kHz
7290, 7300 kHz (X2)

Total of 13 excellent-looking crystals PLUS two new
ceramic sockets.
QTY 2 X ceramic 1/2" crystal socket.

Complete kit as described above is available for $25.00
plus shipping.

= = =

ANTIQUE CRYSTAL KIT #3

These are all type CR-1/A crystals with the 1/2" pin
spacing, thick pins.
7000, 7010 (X3), 7110, 7140, 7145, 7170, 7210,
7270, 7300 kHz

Total of 11 excellent-looking crystals PLUS two new
ceramic sockets.
QTY 2 X ceramic 1/2" crystal socket.

Complete kit as described above is available for $22.00
plus shipping.

= = =

Details on the crystal types with photos and dimensions
may be found here:

http://www.af4k.com/crystal_holders.htm

Please reply off the l;isty to arrange purchase.

2090. FS: hc6/u Crystals for 160m and 80m ham band

Yahoo group: amatuerradioswapfest
Date: 2009-11-25 13:50:30 UTC
From: Bry Carling
Topic: 2090 Message: 2090

FOR SALE:

Older HC6/U Crystals for the Amateur Radio Bands, some
with
thicker pins (*) that will work in the same socket as an
FT243 crystal. These are original, unmodified older
crystals.

HC6/U 3510 kHz
HC6/U 3700 kHz
HC6/U 3742 kHz
HC6/U 3770 kHz
HC6/U 3900 kHz

(*) HC6/U with thicker pins like FT243 - 3705 kHz
(*) HC6/U with thicker pins like FT243 - 3711 kHz
(*) HC6/U with thicker pins like FT243 - 3727 kHz
(*) HC6/U with thicker pins like FT243 - 3743 kHz

These metal can crystals are each available for $12.00
plus shipping.

Some new additions to my original FT243 crystal
listings:
1790 kHz, 1896.5 kHz

For complete listings of the hc6/u and FT243 original
old crystals, see:

http://www.af4k.com/FT243_CRYSTALS_Originals.htm

From: Bry Carling
Topic: 2091 Message: 2091

WANTED TO BUY:

FT171B Crystals or Crystal cases.

Frequency does not matter. I could use quite a few of these crystals
if someone has some in good condition they would like to sell.

Please contact me off the list.

2092. Hustler HF and other mobile antennas FS

Yahoo group: amatuerradioswapfest
Date: 2009-12-01 14:22:33 UTC
From: Ken Simpson, W8EK
Topic: 2092 Message: 2092

For Sale:

Hustler HF mobile antennas:

All work fine and are in nice condition.

Standard" Hustler resonators (good for 400 Watts PEP):
80 meter resonator RM-80 $22
75 meter resonator RM-75 $22
40 meter resonator RM-40 $20
20 meter resonator RM-20 $17
15 meter resonator RM-15 $14
10 meter resonator RM-10 $12

"Super" high power resonators (good for 2 KW PEP):
80 meter RM-80 S
.....can be cut for CW or phone, and also used on a 4BTV
.....Vertical to give 80/75 meter coverage $40
75 meter RM-75 S $39

Larsen VHF and UHF Mobile Antennas:

Antennas are used, but in very good condition.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 meters; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on
the 70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
Can be cut for 2 meters, 220 MHz, or 440 MHz. $7

Larsen Q Quarter Wave Antenna
Fits a 5/16 inch stud, such as the Larsen LM mount,
and others. For either 220 MHz or 450 MHz.
Please specify. $7

Larsen NMO-Q Quarter Wave Antenna
For two meters. $10
For 450 MHz. $6

Larsen Magnetic Antenna Mount:

Larsen NLA-MM Mobile Antenna Mag Mount
This rectangular mag mount features an extremely strong magnet. The center of the mag mount takes an NLA type antenna. It includes coax, with a PL-259 connector on it. It is in good condition. $20

Avanti "On Glass" antenna for 440 MHz:

This antenna was made by Avanti to mount on a windshield, or other glass. It does not require a ground plane, as it is a 1/2 wave antenna, rated to have 3 db gain. It is ideal for places where a ground plane is not available, such as a boat or motor home, in addition to cars. A special tuning box is included to match to your particular situation.

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Coax connectors and adapters:
Prices are per connector. Several of each are available. These are NOS (have not been used).

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

Antenna adapter for Kenwood TH-21/31/41 HTs
Adapts the antenna connector found on these HTs to a standard PL-259 connector. $6

UHF double female "Barrel connector" (two SO-239 together) $3

UHF Right Angle 90 degree male to female $3

Chassis Mount SO-239 connectors (square) $1

UHF "T" connector with two female (SO-239) and one male (PL-259) connection - $5

Coax Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long.

It has a male type "N" connector on each end. $15

Prices do not include shipping from Florida.

Thanks.

FOR SALE: 7 Extra nice NOS panel meters - appear to be
unused but not sure.

QTY 2 WESTINGHOUSE: 0-200 MILLIAMPERES DC

QTY 2 WESTINGHOUSE: 0-500 MILLIAMPERES DC

QTY 1 WESTINGHOUSE: 0-150 VOLTS DC

All the above are the classic square face types with rounded corners.
Dimensions: 2-3/8" X 2-3/8" and require a 2" diameter hole.
These meters are available for $12.00 each

ALSO:

Two brand new DAYSTROM / WESTON Model 1521 panel meters
New In Boxes.... Beautiful round 0 - 1 mA meters with 2-1/2" outer
diameter and require a 2-1/4" mounting hole. These are the sealed,
"RUGGEDIZED," rear-shielded type meters.

QTY 2 available for $15.00 each plus shipping.

2094. FS: KW Isolation Transformer

Yahoo group: amatuerradioswapfest
Date: 2009-12-10 19:42:44 UTC
From: Bry Carling
Topic: 1725 Message: 2094

FOR SALE:

1000 watt Isolation Transformer. for 120V AC.
by Northlake Engineering Co. This is a 1:1 transformer.
120V AC in = 120V AC out. Very conservatively rated.
Have run 1400 watts through this and it didn't get hot.

Has four IEC outlets and heavy duty power cable.
Heavy gauge, light gray metal case with rubber feet.
Like new condition.

Has a nice breaker switch for power ON/OFF.

Available for $45.00 plus shipping

Picture available on request.

73 - Bry, AF4K

2095. FS: Antique Ham Band Crystals

Yahoo group: amatuerradioswapfest
Date: 2009-12-10 19:46:05 UTC
From: Bry Carling
Topic: 2095 Message: 2095

ANTIQUE HAM BAND CRYSTALS - for less than $2.00 each.

Military surplus crystals from the Golden era of radio. Build or restore something true to the period of the 1930s and 1940s. Three batches of crystals are currently available. See list below.

These large crystals are some of the earliest made for use with regular military radio equipment. There is not a lot of information about them available any more. Some were used in type SCR-522 radios, BC624, BC625, ARC3 etc., etc. However, these would make a great basis for a homebrew, old-style glowbug AM or CW transmitter since they are almost all on useful ham band frequencies. Enough here to share with a friend too on some requencies! Will be quite a conversation piece around the shack.

ANTIQUE CRYSTAL KIT #1

HC1/U crystals = H43 type with 3.4" pin spacing and thick pins.
3756, 3903, 7200, 7223, 7249, 7270 kHz

ALSO - CR-1/A Crystals with 1/2" spacing and thick pins.
7010 kHz (QTY 3), 7270 kHz, 7300 kHz, 10.0667 MHz, 29.520 MHz

Total of 14 excellent-looking crystals, PLUS two sockets of each type.
QTY 2 X Ceramic 3/4" crystal socket.
QTY 2 X plastic 1/2" crystal socket.

Complete kit as described above is available for $22.00 plus shipping.

= = =

ANTIQUE CRYSTAL KIT #2

All CR-1/A crystals or similar metal can crystals (2) with same pins.

2637, 3522, 7000, 7010 (X2), 7200, 7220, 7230,
7250, 7270 kHz
7290, 7300 kHz (X2)

Total of 13 excellent-looking crystals PLUS two new
ceramic sockets.
QTY 2 X ceramic 1/2" crystal socket.

Complete kit as described above is available for $25.00
plus shipping.

= = =

Details on the crystal types with photos and dimensions
may be found here:

http://www.af4k.com/crystal_holders.htm

Please reply off the list to arrange purchase.

2096. FS: Some hc6u and FT241 Crystals

Yahoo group: amatuerradioswapfest
Date: 2009-12-11 11:54:31 UTC
From: Bry Carling
Topic: 2096 Message: 2096

FOR SALE:

Older HC6/U Crystals for the Amateur Radio Bands,
some with thicker pins (*) that will work in the same socket
as an FT243 crystal. These are original, unmodified older
crystals.

HC6/U 3510 kHz
HC6/U 3700 kHz
HC6/U 3742 kHz
HC6/U 3770 kHz
HC6/U 3900 kHz

(*) HC6/U with thicker pins like FT243 - 3705 kHz
(*) HC6/U with thicker pins like FT243 - 3711 kHz
(*) HC6/U with thicker pins like FT243 - 3727 kHz
(*) HC6/U with thicker pins like FT243 - 3743 kHz

These metal can crystals are each available for $12.00
plus shipping.

Some new additions to my original FT243 crystal
listings: 1790 kHz, 1896.5 kHz

For complete listings of the hc6/u and FT243 original
old crystals, see:

http://www.af4k.com/hc6u_crystals.htm
http://www.af4k.com/FT243_CRYSTALS_Originals.htm

73 - Bry, AF4K

= = = = =

FOR SALE: Group of 40 FT241 Crystals in new condition.

Quantity of 40 old FT241 crystals. These are the LF range crystals as
used in the military BC620 and BC733 radios. Excellent condition.
During WWII these quartz crystals were manufactured for use in
military vehicle radios.

These crystals are marked for frequencies in the 20 - 40 mhz range,
but the fundamental frequencies are much lower.
Some of the crystals fall in the 455 khz range, and were used by
homebrew radio builders in the 1950's onward to make crystal
filters, especially for SSB exciters (see early 50's ARRL handbooks).

These are LF crystals in the 300 - 500 kHz range. Marked with channels such as 14, 19, 60, 68, 317, 320 (sorry no specific choices offered) but for example, Channel 68 = 496.3 kHz.

Will sell the box of crystals for $15.00 plus shipping.

Pictures and details at:
http://www.af4k.com/FT241_crystals.htm

2097. Antennas and antenna related items FS

Yahoo group: amatuerradioswapfest
Date: 2009-12-11 19:10:52 UTC
From: Ken Simpson, W8EK
Topic: 2085 Message: 2097

Antennas and antenna related items for sale:

B & W Coaxial Antenna Switches:

Both switches will handle full legal limit, and have
SO-239 connectors.

B & W CS-3 G Model 593 Coax Switch
This is the switch that is in a rectangular box about 6
inches long, with four SO-239 connectors coming out
of the back. It will switch 3 antennas, grounding the
antennas that are not in use. It works great. $35

B & W Model 550 A coax switch
This model will switch up to 5 antennas, and does NOT
ground unused antennas. It has the coax coming out the
sides like spokes of a wheel. This one has the optional
face place also.
This one works fine and looks fine as well. $40

HF Antenna Balun:

HyGain BN-86 Balun
The case of the BN-86 is constructed so that one can use
it to hang a dipole or inverted V, or a U-bolt can be added
to attach it to the boom of an HF beam antenna.

This particular balun works fine, but does show slight
physical use. It includes the paper work for $40.

Hustler HF mobile resonators:
All work fine and are in great cosmetic condition.

Standard" Hustler resonators (good for 400 Watts PEP):
80 meter resonator RM-80 $22
75 meter resonator RM-75 $22
40 meter resonator RM-40 $20

"Super" high power resonators (good for 2 KW PEP):
80 meter RM-80 S
.....can be cut for CW or phone, and also used on a 4BTV
.....Vertical to give 80/75 meter coverage $40
75 meter RM-75 S $39

VHF Cross Needle Wattmeter / SWR Meter:

The SX144-430 Cross-Needle SWR and RF Power meter is for use
on 140-160 MHz and 400-480 MHz. In other words 2 meters and

the ham 440 MHz bands are included. It is designed for 50 ohm systems, and has SO-239 connectors on the back. The cross needle meter measures 10 Watts, 100 Watts, or 1000 Watts full scale on forward and 2, 20 or 200 watts reverse power.

This particular meter works 100%, and looks like new. In fact it is still in its original box, with paper work, for $45.

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted in the coax line after the transmitter or transceiver) to reduce harmonic interference.

Bencher YA-1, high power, low pass filter
If you need a more heavy duty filter for the output of your amplifier, this one is ideal. It will take 1.5 KW output with 5 KW peaks, and has at least 80 db signal attenuation at TV channel 2. It is also in a very sturdy metal case.
Bencher sells these for $90.
This one works great and looks close to new, for only $60.

Nye Viking Model 020-001
This filter is rated at 2000 watts, with over 65 db of attenuation above 57 MHz. These are about $60 new; this one is close to new for only $35.

Drake TV-5200-LP
This is the more modern version of the Drake TV-1000 Low Pass Filter. This is the filter that may also be used on the low end of six meters, as well as HF. It is good for 1000 Watts average below 30 MHz, and about 200 W up to 52 MHz. It works fine, and is in very nice shape. $35

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter and antenna, and has been optimized to have more attenuation in the 40 MHz region, where many TVs have their IF. It is good for 1000 Watts "average" according to the manual, and has over 80 db attenuation at 41 MHz. This one looks great, and includes the paper work. $30

B & W FL-10/1500 (Formerly known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters, and will handle 1500 Watts. SO-239 connector on each end. This is the latest model B & W filter. It is in very nice condition; it looks very close to new. With paper work $40.

Bud LF-601 low pass filter
This filter is adjustable for best attenuation in your particular situation, and also to more closely match your specific impedance. It cuts off at about 52 MHz (if adjusted as such) so it can be used on 6 meters, and will handle 1500 watts.
In extremely nice condition for $35.

ParaDynamics PDC-5 Wattmeter
This unit has a wattmeter with scales of 100 W, 10 W, and 1 W. It has an SWR Bridge built in, with an antenna tuner. It was obviously made for 11 meter use, but it works well on other frequencies. The tuner portion works fine on 10 m, 12 m, and 15 m. The wattmeter seems accurate from 20 meters thru 10 meters.
It is physically small (only 5 X 3 X 1), so would be ideal for portable use.
The wattmeter and antenna tuner portion work fine, however, the SWR portion of this unit is inoperative. It looks fine. $12

The ARRL Antenna Book
1983, 14th Edition, Large 8 1/2 X 11 Book, $10

Larsen VHF and UHF Mobile Antennas:

Antennas are used, but in very good condition.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 m; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on the 70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna. Can be cut for 2 m, 220 MHz, or 440 MHz. $7

Larsen Q Quarter Wave Antenna
Fits a 5/16 inch stud, such as the Larsen LM mount, and others. It can be cut for 2 meters, 220 MHz, or 450 MHz bands. $7

Larsen NMO-Q Quarter Wave Antenna
For two meters. $10
For 450 MHz. $6

Larsen NLA-MM Mobile Antenna Mag Mount
This rectangular mag mount features an extremely strong magnet. The center of the mag mount takes an NLA type antenna. It includes coax, with a PL-259 connector on it. It is in good condition. $20

Avanti "On Glass" antenna for 440 MHz:

This antenna was made by Avanti to mount on a windshield, or other glass. It does not require a ground plane, as it is a 1/2 wave antenna, rated to have 3 db gain. It is ideal for places where a ground plane is not available, such as a boat or motor home, in addition to cars. A special tuning box is included to match to your particular situation.

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

5/16 inch threaded, like used by Motorola and others
Regular - 5.7 inches long
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15

BNC Regular length, 6 1/2 inches long
Alinco Stubby w/BNC Connector, 4.6 inches long

BNC Stubby for 440 MHz, 3 inches long

Coax Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

Coax connectors and adapters:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male
standard type - $2
crimp on type - $3

Chassis mount BNC female square mount (uses 4 screws) - $3
screw in type - $3

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

Chassis Mount SO-239 connectors (square) $1

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Prices do not include shipping from Florida.

Thanks.

2099. FS: The 60 Cent Fireball 80m Transmitter

Yahoo group: amatuerradioswapfest
Date: 2009-12-14 12:47:02 UTC
From: Bry Carling
Topic: 2099 Message: 2099

FOR SALE:

THE SIXTY CENT FIREBALL - SINGLE STAGE 80m CW
TRANSMITTER!

Here is a dual in-line package crystal oscillator
that will generate RF on the popular frequency
of 3.686 MHz in the 80m amateur band.

Add your 5 volt DC supply at about 20-50 mA,
a key and an anetnna and you will be on the air
with QRPp power and absolute minimum parts count!

Construction plans are available on line... see below.
Crystal stability means you will have no drift, chirp
or yoop with this tiny silver rig.
Even use it as a driver for a more powerful RF final.
Strictly speaking, you should add a PI network or
other matching circuit between the output pin
and antenna for correct antenna matching and
to attenuate the harmonics. Has approx. 10 to 20 mW
RF output. Add a few parts and you will have a fine
little QRP rig.
You will not be the first to have made real CW
contacts with a few milliwatts of power!
An experimenter's delight for the 80m ham band.

Available now for $1.00 each or TEN for just $6.00 plus
shipping!

Picture and details available at:
http://www.af4k.com/radios.htm

From: Ken Simpson, W8EK
Topic: 2100 Message: 2100

CW Tapes and other CW items For Sale:

Code Tapes:

Learning the Morse Code by Gordon West, WB6NOA
Published by Master Publishing / Radio Shack
This is a set of four cassette tapes to learn the code,
and up thru "General Class". To put it another way, it
starts from scratch and goes up thru about 15 WPM.
This set is in its original binder, and is in good
shape. $12

ARRL Code Tape
This cassette tape for the 15 WPM speed range.
It appears to be a copy of the original ARRL tape. $3

The ARRL Training Program - Official Novice Student Workbook
No date or edition, but it is designed for a 10 week course,
leading to a novice license. $3

ARRL Operating an Amateur Radio Station
1976 - 57th edition $3
1978 - 58th edition $3
1983 - 61st edition $3
1984 - 62nd edition $3
1989 - 63rd edition $4

ARRL Public Service Communications 1985 - Ninth edition - $3
1990 - no edition number listed - $3

ARRL Amateur Radio Field Resources Directory
1986-87 - First edition - $ 7

Cable for straight key
Similar to cable for paddles, but has a mono 1/4 inch
phone plug on it, as is used with a straight key. $5
As above, but 1/8 inch plug. $5

Cable for paddles
This cable is about 3 feet long, and has 1/4 inch stereo
connector on the end, like used by most rigs. It looks
great. $8
As above, but 1/8 inch plug. $8

Prices do not include shipping from Florida.

Thanks.

2102. WTB: Hatchback NMO Mount

Yahoo group: amatuerradioswapfest
Date: 2010-01-09 00:27:16 UTC
From: Jeffrey
Topic: 2102 Message: 2102

Hello,
I am looking for USED mount that will work on a HATCHBACK and also must be NMO so my Diamond antenna will work. I currently have a K400 mount but it only will support a 3/8" x 24 thread and my diamond antenna is NMO. So, if you have a Hatchback NMO mount laying around and wish to depart with please let me know. I know I can purchase a new mount from Diamond or Comet but looking looking to spend lots of $$$ for it. Want something used so I can save in the long run and I am sure people have mounts just laying around and want to clean house!

2103. Many different microphones FS

Yahoo group: amatuerradioswapfest
Date: 2010-01-09 18:09:02 UTC
From: Ken Simpson, W8EK
Topic: 2103 Message: 2103

Many different microphones for sale:

Heath High Impedance Hand Microphone
This is the black colored hand mic that was used on
the HW and SB series transceivers from 25 or 30 years ago.
It is a Hi Z mic. This particular mic is in good condition.
It works great, and looks fine cosmetically. It even includes
the mounting clip (which looks like it was never used).
This mic presently has stripped and tinned ends, but of
course a connector can easily be added.
I have paper work for a Heath GH-12 A hand microphone with
it, but am not certain that is what it is. My memory says
the GH-12 A was dark green in color, and this one is a
black color. $30

Shure 104 C, Low Z hand Microphone
This is a very heavy duty Shure mic. It appears to be new,
with stripped and tinned ends that have never been on a
connector. It is in its original box, with the original
instruction manual. $30

Generic Hand Microphone
This is a low impedance hand microphone, black in color.
It is presently has an 8 pin round connector, wired for
Kenwood. $25
As above, with no connector. $22

Regular hand microphone
Electret Condenser microphone
Generic Black mic, with gray PTT bar. Requires polarizing
voltage. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed.
Stripped and tinned leads.
It works fine, and looks good also. $25

DTMF Touch Tone Microphones:

Kenwood MC-48, DTMF Touch Tone Microphone
Round, 8 pin connector, will go with any Kenwood rig taking
this kind of connector (TM-201, TM-211, TM-221, TM-231,
TM-241, TM-2530, TS-50, TS-430, TS-440, TS-570, TS-850, TS-870,
TS-930, TS-940, TS-950, TW-4000, etc.). Has UP and DOWN
switches and PTT, along with 16 digit touch tone pad.
It works fine, and includes paper work for $50.

Kenwood MC-46 DTMF Touch Tone Microphone
Touch tone DTMF microphone with 6 pin connector, as used on TR-7730, TR-7800, TR-7850, TR-7930, TR-7950, TR-8400, TR-9000, TR-9130, and others. Up-down switch on top. 16 digit touch tone pad. This one works fine, and includes paper work for $45.

CES 655 L "Microdialer" DTMF Microphone
You can manual dial a number, or automatically have it stored in the mic, and "speed dial" with this mic. 12 digit touch tone pad on the front, with the microphone part above the pad. This one presently has a 4 pin plug on it, but of course that can be changed. $35

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with a low impedance microphone. This one has the 8 pin modular plug (like a computer LAN) on it. This mic has not been used, so it is in really great condition. With paper work for $40.

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a normal low impedance microphone. With 4 pin plug. Like new. $38

Speaker Microphones:

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. Has 3.5 mm and 2.5 mm plugs for Azden, Icom, some Yaesu, and others. $ 20

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine and works fine. $18

VoMax Speech Processor:

This unit was considered the absolute best speech processor available in the 80's. The VoMax splits the audio signal into discrete bands, processes each band, passes the separate signals through bandpass filters to eliminate distortion, and sums the signals in a phase-equalizing combiner. The result is superb audio you can feed to your transmitter that has low distortion and 10-12db power gain!

The VoMax added between your microphone and transmitter gives you extra punch that is equivalent to adding a linear amplifier. It is power by 12 V DC at about 100 ma.

This particular unit works fine, and looks very nice. Paper work is included for $75.

Communications Speaker
This 4 inch square speaker is optimized for communications frequencies (300 to 3000 Hz). It is a Realistic Radio Shack speaker in a black enclosure, and is an 8 ohm speaker. It has a cord with a 1/8 inch (3.5 mm) mono plug on the end. This one works fine and looks OK also. $15

Heath HD-15 Phone Patch
This is the unit with the VU meter on the left and 3 knobs that match the SB series to the middle and right. Low or high Z output to the transmitter. It can also be used as an interface to the computer for PSK31, etc. It is in extremely good condition. No scratches or imperfections. Paper work included for $25.

Two meter FM Transceiver:

Azden PCS-4000 FM transceiver for 2 meters

This is a nice small unit, which has 16 memories in 2 banks, scan capabilities (memories or band scan), priority channel, DTMF touchtone microphone with Up and Down switch and Memory 1 call, plus all sorts of other bells and whistles. It has 25 Watts or 5 Watts output power and an extremely good receiver.

This particular unit works fine, and looks very nice.

Microphone, mobile bracket, power cord, and manual are included for $70.

Prices do not include shipping from Florida.

Thanks.

2104. FS: Panel Meters

Yahoo group: amatuerradioswapfest
Date: 2010-01-11 12:55:06 UTC
From: Bry Carling
Topic: 2104 Message: 2104

FOR SALE: Quality Panel Meters

Several extra nice NOS panel meters - these appear to be
unused but not sure.

QTY 2 WESTINGHOUSE: 0-200 MILLIAMPERES DC

QTY 1 WESTINGHOUSE: 0-500 MILLIAMPERES DC

QTY 1 WESTINGHOUSE: 0-150 VOLTS DC

All the above are the classic square face types with rounded corners.
Dimensions: 2-3/8" X 2-3/8" and require a 2" diameter hole.
These meters are available for $12.00 each

ALSO:
Two brand new DAYSTROM / WESTON Model 1521 panel meters
New In Boxes.... Beautiful round 0 - 1 mA meters with 2-1/2" outer
diameter and require a 2-1/4" mounting hole. These are the sealed,
"RUGGEDIZED," rear-shielded type meters.

QTY 2 available for $15.00 each plus shipping.

2105. FS: Variable Capacitors

Yahoo group: amatuerradioswapfest
Date: 2010-01-11 14:01:40 UTC
From: Bry Carling
Topic: 1230 Message: 2105

FOR SALE: Several Medium-large Variable Capacitors.

All are ruggedly constructed and in very good condition.

#1 - 330 pF. USA Military surplus. "RC Company" with heavy duty bearings
Dimensions: 3.5" X 3" X 4.5" deep.
1/4" shaft approx. 1" long. Comes with mounting hardware and three
HD insulators.

#2 - 120 pF split stator. USA Military surplus. Ceramic frame has 60 pF plus
60pF
ceramic insulated, and has square 1-5/8" long ceramic standoffs for
mounting
Dimensions: 3.25" X 2.5" X 4" deep
1/4" shaft approx. 7/8" long.

#3 - 300 pF. Atwater Kent variable. Built like a tank. Extra clean condition.
Dimensions: 3.5" X 2.75" X 2.5" deep
1/4" shaft approx. 3/4" long.

Shipping additional. Please reply off-list and send your zip code
for calculation of S&H.

73 - Brian.

From: Ken Simpson, W8EK
Topic: 2085 Message: 2106

Antennas and antenna related items for sale:

ParaDynamics PDC-5 Wattmeter
This unit has a wattmeter with scales of 100 W, 10 W, and
1 W. It has an SWR Bridge built in, with an antenna tuner.
It was obviously made for 11 meter use, but it works well
on other frequencies. The tuner portion works fine on 10 m,
12 m, and 15 m. The wattmeter seems accurate from 20 meters
thru 10 meters.
It is physically small (only 5 X 3 X 1), so would be ideal
for portable use.
The wattmeter and antenna tuner portion work fine, however,
the SWR portion of this unit is inoperative. It looks fine. $12

Larsen VHF and UHF Mobile Antennas:

Antennas are used, but in very good condition.

Larsen NMO-Q Quarter Wave Antenna, fits any NMO mount
For two meters. $10
For 450 MHz. $6

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 m; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on
the 70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
Can be cut for 2 m, 220 MHz, or 440 MHz. $9

Larsen Q Quarter Wave Antenna
Fits a 5/16 inch stud, such as the Larsen LM mount,
and others. It can be cut for 2 meters, 220 MHz, or
450 MHz bands. $8

Trunk Lip Mount with 5/16 inch stud
Ideal for use with the "Q" above, or any other antenna
that requires a 5/16 inch stud. Very nice for $18.

Avanti "On Glass" antenna for 440 MHz:

This antenna was made by Avanti to mount on a windshield,
or other glass. It does not require a ground plane, as
it is a 1/2 wave antenna, rated to have 3 db gain. It is

ideal for places where a ground plane is not available, such as a boat or motor home, in addition to cars. A special tuning box is included to match to your particular situation.

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Heavy Duty Mobile/Portable Antenna Mount:

This is a very heavy duty antenna mount, designed to take any standard 3/8-24 threaded antenna. which includes just about any HF antenna and many other antennas as well.

The mount is made to be clamped around a vertical object, such as a pipe, tubing, or even a square channel. It would be ideal to attach to something like a chain link fence. It could also be used as a mirror mount on trucks. It will take up to 1 1/2 inch diameter objects. It has a very large screw type mechanism with a large handle to tighten to the vertical object. It could be placed in operation very quickly, so it is great for portable and emergency operation, where one would want to set up a mount quickly.

The bottom of it has an SO-239 connector, ready to take a standard PL-259 connector.

This unit is in good condition. $20

Hustler HF mobile resonators:
All work fine and are in good cosmetic condition.

Standard" Hustler resonators (good for 400 Watts PEP):
75 meter resonator RM-75 $22

"Super" high power resonators (good for 2 KW PEP):
80 meter RM-80 S
can be cut for CW or phone, and also used on a 4BTV
Vertical to give 80/75 meter coverage
(basically make it into a 5BTV) $38

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted in the coax line after the transmitter or transceiver) to reduce harmonic interference.

B & W FL-10/1500 (Also known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters, and will handle 1500 Watts. SO-239 connector on each end. This is the latest model B & W filter. It is in very nice condition; it looks very close to new. With paper work $40.

Drake TV-5200-LP
This is the more modern version of the Drake TV-1000 Low Pass Filter. This is the filter that may also be used on the low end of six meters, as well as HF. It is good for 1000 Watts average below 30 MHz, and about 200 W up to 52 MHz. It works fine, and is in very nice shape. $35

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter and antenna, and has been optimized to have more attenuation in the 40 MHz region, where many TVs have their IF. It is good for 1000 Watts "average" according to the manual, and has over 80 db attenuation at 41 MHz. This one looks great, and includes the paper work. $30

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC Regular length, 6 1/2 inches long
Alinco Stubby w/BNC Connector, 4.6 inches long

5/16 inch threaded, like used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15

BNC Stubby for 440 MHz, 3 inches long

Coax Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

Coax connectors and adapters:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male for coax cable
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $3

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Antenna adapter for Kenwood TH-21/31/41 HTs
Adapts the antenna connector found on these HTs to a
standard PL-259 connector. $6

Prices do not include shipping from Florida.

Thanks.

2107. 2 m rig, Coax switch, coax relay, speaker, SWR Bridge and much more FS

Yahoo group: amatuerradioswapfest
Date: 2010-01-18 13:45:37 UTC
From: Ken Simpson, W8EK
Topic: 2107 Message: 2107

Extensive List of Many Ham Items For Sale
2 meter FM Transceiver, Coax switch, SWR Bridge, Coax Relay, Communications Speaker, TVI filters, Microphones, TenTec Items, Hustler mobile resonator, Wattmeter, HT accessories, Phone Patches, and much more

Two meter FM Transceiver:

Azden PCS-4000 FM transceiver for 2 meters

This is a nice small unit, which has 16 memories in 2 banks, scan capabilities (memories or band scan), priority channel, DTMF touchtone microphone with Up and Down switch and Memory 1 call, plus all sorts of other bells and whistles. It has 25 Watts or 5 Watts output power and an extremely good receiver.

This particular unit works fine, and looks very nice.

Microphone, mobile bracket, power cord, and manual are included for $70.

Heath HD-1234 Coaxial antenna switch
This coax switch has SO-239 connectors arranged so the coax comes out like the spokes of a wheel. It will switch up to 4 antennas, and also ground all of the antennas. This particular switch works fine and looks fine also. With paper work for $35.

SWR Bridge

CalComm #9856 SWR Meter

The included paper work says this meter is good for 3 to 150 MHz, so one can use it on 2 meters, and on 6 meters as well as on the HF bands. It can also be used as a field strength meter.

It has an SO-239 connector on each end, and it made to be mounted in a vertical position, with the meter at the top, and the adjustment knob at the bottom.

This meter includes the paper work (and even the warranty info), and the original box, although the box has seen better days. The meter itself works fine, and is in extremely nice condition. The back of it has holes for mounting it to a wall. A former owner removed some of the paint from around these mounting holes, so that it would get a better electrical ground. $20

B & W 377 Coaxial Antenna Relay

I had never seen one of these before. Most of us are familiar with the Dow Key Antenna relays that many of us used 40 or 50 years ago. This unit serves the same function, but is somewhat unique.

The B & W 377 is housed in a hexagon box. It has three SO-239 connectors coming out three of the sides, a length of wire on one side that goes to the coil of the relay, and two sides that are blank.

The coil is rated to work on 48 to 130 volts AC. The original single page instruction sheet says that it is a unique relay design permitting this large variation in voltage. It is good to 150 MHz, and will handle 2000 Watts PEP, or 1000 watts continuous.

It appears that this unit has never been used. It has the original instruction sheet, and original box. The unit itself does not appear to have been used, and looks perfect. $75

Communications Speaker
This 4 inch square speaker is optimized for communications frequencies (300 to 3000 Hz). It is a Realistic Radio Shack speaker in a black enclosure, and is an 8 ohm speaker. It has a cord with a 1/8 inch (3.5 mm) mono plug on the end. This one works fine and looks OK also. $15

Microphones:

Shure 104 C, Low Z hand Microphone
This is a very heavy duty Shure mic. It appears to be new, with stripped and tinned ends that have never been on a connector. It is in its original box, with the original instruction manual. $30

Generic Hand Microphone
This is a low impedance hand microphone, black in color. Striped and tinned ends. $22

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed.
Stripped and tinned leads.
It works fine, and looks good also. $25

DTMF Touch Tone Microphones:

Icom HM-8 DTMF touchtone microphone
The HM-8 has a 12 digit touch tone (DTMF) pad on the front of it, along with an on-off switch for the tones. Of course it also has the normal PTT switch.
The HM-8 is used on the 25A Red LED, 245, 290, 402, 202S, 451, 471A, plus other rigs.
This particular microphone has an 8 pin round connector, works

fine, is in its original box, and includes paper work for $50

Kenwood MC-48, DTMF Touch Tone Microphone
Round, 8 pin connector, will go with any Kenwood rig taking this kind of connector (TM-201, TM-211, TM-221, TM-231, TM-241, TM-2530, TS-50, TS-430, TS-440, TS-570, TS-850, TS-870, TS-930, TS-940, TS-950, TW-4000, etc.). Has UP and DOWN switches and PTT, along with 16 digit touch tone pad. It works fine, and includes paper work for $50.

Kenwood MC-46 DTMF Touch Tone Microphone
Touch tone DTMF microphone with 6 pin connector, as used on TR-7730, TR-7800, TR-7850, TR-7930, TR-7950, TR-8400, TR-9000, TR-9130, and others. Up-down switch on top. 16 digit touch tone pad. This one works fine, and includes paper work for $45.

CES 655 L "Microdialer" DTMF Microphone
You can manual dial a number, or automatically have it stored in the mic, and "speed dial" with this mic. 12 digit touch tone pad on the front, with the microphone part above the pad. This one presently has a 4 pin plug on it, but of course that can be changed. $35

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with a low impedance microphone. This one has the 8 pin modular plug (like a computer LAN) on it. This mic has not been used, so it is in really great condition. With paper work for $40.

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a normal low impedance microphone. With 4 pin plug. Like new. $38

Speaker Microphones:

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. Has 3.5 mm and 2.5 mm plugs for Azden, Icom, some Yaesu, and others. $ 20

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine and works fine. $18

TenTec Items:

TenTec Model 280 power supply, 20 amps at 13 V DC.
This supply is quite heavy duty electrically.
It has 2 pass transistors, instead of the one that some have. It also has an ammeter on it.
This one works fine, and looks OK as well.

A previous owner removed the molded in TenTec power
cable on the back and added very heavy binding posts,
so that it can be used with many different rigs and
not just TenTec. It also has a couple RCA jacks for
lower power use.
With paper work for $100.

"Switcher / 25" 25 amp switching power supply
This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel
around it. It is in a case that is the same size as a 243
remote VFO. It has an ammeter on the front, along with
Switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,
but says "Switcher/25" on it. It is very quiet, and well
shielded, and does not produce any electrical noise that
I could find. $150

Hustler HF mobile antennas:

All work fine and are in nice condition.

"Super" high power resonators (good for 2 KW PEP):
80 meter RM-80 S
can be cut for CW or phone, and also used on a 4BTV
Vertical to give 80/75 meter coverage $38

ParaDynamics PDC-5 Wattmeter/Antenna Tuner
This unit has a wattmeter with scales of 100 W, 10 W, and
1 W. It has an SWR Bridge built in, with an antenna tuner.
It was obviously made for 11 meter use, but it works well
on other frequencies. The tuner portion works fine on 10 m,
12 m, and 15 m. The wattmeter seems accurate from 20 meters
thru 10 meters.
It is physically small (only 5 X 3 X 1), so would be ideal
for portable use.
The wattmeter and antenna tuner portion work fine, however,
the SWR portion of this unit is inoperative. It looks fine. $12

CW Items:

Vibroplex Brass Racer Triangular Iambic Paddle

The Brass Racer Paddles are unique in that there are no springs
in the design. Tension on the paddle is infinitely adjustable by
the use of magnets. It is a convenient, space saving portable
keyer paddle unit crafted from solid brass with a lacquer coated
brushed finish mounted on a hardwood base. Designed for use with
an external keyer or a keyer built into the radio. It has a long
shielded cord with a 1/4 inch stereo plug. It works fine and
looks good. $100

"Code Crash" by Jerome Mintz
This is a VHS video tape that teaches a person the code.
It is a very basic tape, with the assumption that one does
not know any of the code. $12

Cable for straight key
About 3 feet long, with a mono 1/4 inch phone plug on it,
as is used with a straight key. $5
As above, but 1/8 inch (3.5 mm) plug. $5

Cable for paddles
About 3 feet long, and with a 1/4 inch stereo connector
on the end, like used by most rigs. $8
As above, but 1/8 inch (3.5 mm) plug $8

Kenwood MB-4000 Mobile Bracket
This mobile bracket is made to be used with the Kenwood
TW-4000 dual band transceiver, and possibly other rigs
as well.
This one is in good shape, with the paper work and hardware.
$15

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted
in the coax line after the transmitter or transceiver) to
reduce harmonic interference. All will handle full legal power
at HF, have an SO-239 connector on each end, and are designed
for 50 ohm systems.

Bencher YA-1, high power, low pass TVI filter
If you need a more heavy duty filter for the output of
your amplifier, this one is ideal. It will take full legal
power plus, and has at least 80 db signal attenuation at
TV channel 2.
It is also in a very sturdy metal case.
This one works great, and looks close to new. Someone added some
felt to the bottom, so that it protects better. It is in its
original box, with paper work. Bencher currently sells these
for about $90. This one is only $65.

B & W FL-10/1500 (Also known as model 425)
This filter cuts off just above 10 meters, and is the latest
model B & W filter. It is in very nice condition; it looks very
close to new. With paper work $40.

Drake TV-5200-LP
This is the more modern version of the Drake TV-1000 Low Pass
Filter. This is the filter that may also be used on the low
end of six meters, as well as HF. It is good for about 200 W
up to 52 MHz, but full power on HF. It works fine, and is in
very nice shape. $35

Drake TV-3300-LP
This modern low pass filter has been optimized to have more attenuation in the 40 MHz region, where many TVs have their IF (over 80 db attenuation at 41 MHz). This one looks great, and includes the paper work. $30

Drake TV-42-LP Low pass filter
Rated for 100 W thru 30 MHz.
Similar characteristics as the TV-3300, but lower power rating. It works fine and looks like new. $ 15

HT accessories:

Lithium battery for Yaesu VX-2 or VX-3 HTs
Spare Lithium Ion battery pack for Yaesu VX-2 or VX-3.
It fits the new VX-3, as well as the earlier VX-2.
1200 mahr capacity. It holds a charge fine, and is basically new. $20

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1 and PB-4 battery packs. It can also be used with the smaller PB-2 and PB-3 battery packs, by putting a filler in the case. Black color. In very nice condition. $15

Case for Drake TR-33C
This is the black case that fits the Drake TR-33C, and has cutouts in the back for antenna, power, etc. It includes the shoulder strap, and is in good shape. $12

Case for Drake TR-22
As above, but for the TR-22. No shoulder strap. $10

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case. It fits most of the Santec HTs, such as the HT-1200, ST-142, ST-144, ST-440, etc. The real leather case includes a built in belt clip, plus a removable leather shoulder strap. $25

Accessories for the Kenwood TR-2400 HT

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine and works fine. $18

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. This adapter can be used on any HT with a BNC connector. $5

Belt clip for TR-2400 HT, complete with hardware - $8

Wrist strap for TR-2400, and most other HTs - $4

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually, one must have the battery inside the HT, but this lets you charge a second battery outside of the HT. The original charger is used. It is in good shape, and works fine. $3

Santec HT Accessories For Sale:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200, ST-142, ST-144, ST-440, etc. The real leather case includes a built in belt clip, plus a removable leather shoulder strap.
The case itself is in very nice shape. The leather shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a service pack. It has schematics, circuit explanations, voltages, etc. $18

Belt Clips:
All include the hardware with the belt clip and are $8 each.
Kenwood BH-2 for Kenwood TH-21 / 31 / 41 series HTs
Kenwood TR-2400
Motorola
Yaesu FT-207
Yaesu FT-209

Wrist Straps for various HTs - $4 each
Kenwood TR-2400
Yaesu FT-209

Service Manuals:

These are original service manuals in extremely good condition.

Service manual for Kenwood TH-21 series HTs (2 meter), plus most accessories for this series HT $20

Service manuals for Kenwood TH-41, 440 MHz HT, plus most accessories $20

Service manual for Kenwood TW-4000 dual bander $20

Service Manual for Kenwood TR-2600, 2 meter HT $15

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a service pack. It has schematics, circuit explanations, voltages, etc. $18

Communications Speaker
This 4 inch square speaker is optimized for communications frequencies (300 to 3000 Hz). It is a Realistic Radio Shack speaker in a black enclosure, and is an 8 ohm speaker. It has a cord with a 1/8 inch (3.5 mm) mono plug on the end. This one works fine and looks OK also. $15

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

Regular BNC, about 6.5 inches long
Alinco Stubby w/BNC Connector, 4.6 inches long

5/16 inch threaded, like used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

BNC Stubby for 440 MHz, 3 inches long

Battery charge adapter for Azden PCS-300 HT
This is an adapter that permits one to charge the battery of the Azden PCS-300, 2 meter HT, outside of the HT itself. Usually, one must have the battery inside the HT, but this lets you charge a second battery outside of the HT. The original charger is used. If you have a PCS-300 HT, you need this adapter.
It works fine, and looks like new. $3

3 pin mic plug
This is the small 3 pin mic plug that fits the Drake TR-22 mic jack. It is much smaller than most of the mic connectors. I thought these were completely gone, but one appeared from a silent key. This one has been used, but should still be usable some more. $12

Coax Cable with Type "N" Connectors
This cable is made of RG-8 coax and is about 6 feet long. It has a male type "N" connector on each end. $15

World Map with Kenwood Logo
This map is laminated, and lists DXCC Countries, as of 1985. Obviously, it is not completely up to date, but still is a very nice map. Like new. $5

Kenwood MB-4000 Mobile Bracket
This mobile bracket is made to be used with the Kenwood

TW-4000 dual band transceiver, and possibly other rigs
as well.
This one is in good shape, with the paper work and hardware.
$15

AEA Power Supply
AEA AC-1
"Wall wort" 12 V DC power supply at 1 amp.
Can be used with the AEA PK-232, PK-88 or others.
This unit has a 2.1 mm plug, with the center positive,
so it can be used on many different things that require
12 V DC at up to an amp, such as keyers, antenna tuners, etc.
$15

Phone Patches / Digital Interfaces:

Waters "Universal Hybrid Coupler II" Model 3002

Most of us would likely call this a phone patch, but it
is really much more than that. It does that, but also
will interface with a tape recorder, and permit recording
and play back of on-the-air QSOs. Nothing says that the
tape recorder input must be used that way. Connect the
sound card in your computer in this position, and you
have a very effective interface.

Model 3002 includes a speech compressor powered by a 9
volt battery. The front panel is finished on both
sides, with one side having it set in a horizontal
position, and the other in a vertical position.

This was a "top of the line" unit years ago. One only
found them with top stations such as Collins.

This particular unit is in really great condition.

With paper work for $100.

Heath HD-15 Phone Patch
This is the unit with the VU meter on the left and 3 knobs
that match the SB series to the middle and right. Low or
high Z output to the transmitter. It can also be used as
an interface to the computer for PSK31, etc. It is in
extremely good condition. No scratches or imperfections.
Paper work included for $25.

Weston Precision MilliVolt Meter Model 1
This is an extremely precision meter, with mirrored
scale about 6 inches long. It weighs about 5 1/2 pounds!
It has terminals for scales of 150, 1500, 15000, and
150000 millivolts.
Also included is the calibration information (from 1944)
indicating that it is "dot on" for calibration.

In addition, it is in an extremely nice protective case,
that appears to be real leather.
To put it another way, this is an extremely nice meter!
$80

Coax connectors and adapters:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male for coax cable
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $4

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $4

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

LARGE Analog Meters:

General Electric Edgewise DC ammeter
0-100 ma scale - Edgewise meter with scale 5+ inches
long and 1.7 inches high. White scale, w/ silver/gray mounting
This is a very nice meter that can be read across the room. $30

LabVolt AC ammeter
0-1 amp scale, 4 inch square meter, $20

LabVolt DC ammeter
0-1 amp scale, 4 inch square meter, $20

DC voltmeter has 3 scales on it - 5, 10, and 25 volts.
It says it is a Niehoff Voltmeter, Chicago, Model T-2.
It looks like 1930s vintage, and is in very nice shape. $28

Very heavy duty chokes, as used to filter ripple in high current
power supplies.
These chokes (inductors) weigh about 8 pounds each, and
are designed to be used in low voltage applications. They were both
removed from power supplies, and are in close to new condition.

One is from a 20 amp power supply. $13.

Another is from a 30 amp power supply. $15.

Prices do not include shipping from Florida.

Thanks.

2108. WTB: Antenna Tuner

Yahoo group: amatuerradioswapfest
Date: 2010-01-21 00:03:07 UTC
From: Bry Carling
Topic: 2108 Message: 2108

Wanted: Antenna Tuner

Hi - I am looking for a 1.5KW class tuner that covers at least 80m through 10m. Anything of good quality for 1000 watts and up will do.

160m or 6m band would also be a nice bonus.

Something like a PALSTAR or similar would be great. What do you have for sale? NO MFJ TUNERS PLEASE.

73 - Brian, AF4K

2111. Orlando FL Hamcation Info

Yahoo group: amatuerradioswapfest
Date: 2010-01-31 14:12:08 UTC
From: Ken Simpson, W8EK
Topic: 2111 Message: 2111

Orlando FL Hamcation Information:

The Orlando Hamcation is less than two weeks away. It will be held from February 12 thru February 14, but much of the activity starts on Thursday, February 11, when most of the tailgaters set up. If you have not made your plans to attend, you need to do so now. Florida is the place to be in February!

Info can be found at
http://hamcation.com/default.html
There is a lot of information at this web site, so be certain to check all of the special areas.

At the present time, there are a few tables still available in the swap building. All of the wall spaces and end caps have been taken. If you want more than one table together, get your reservation in NOW. Having a table inside the building, instead of outside in the tailgate area, protects you (and your equipment) from the weather, and only costs $10 more for the entire weekend. Please e-mail hamcation@... to make reservations or get more information.

Everyone knows that there are many other activities in the central Florida area, so be certain to bring the XYL. Hamcation will also have YL activities, and of course many are now hams, so will enjoy Hamcation as well. The bottom line is "Bring the entire family."

Advance registrations are running considerably ahead of last year, so this promises to be another large (10,000 plus hams) hamfest. To put it another way, don't stay home because you think attendance might be down due to the economy. It does not look that way.

See you there!

Thanks.

73,

Ken, W8EK

2114. Microphones, CW items, Filters, & more FS

Yahoo group: amatuerradioswapfest
Date: 2010-02-06 13:42:35 UTC
From: Ken Simpson, W8EK
Topic: 2114 Message: 2114

Desk and Hand Microphones, Speaker, CW Paddle and Cables,
Low Pass TVI Filters, and much more For sale:

Microphones:

All of these microphones have been tested and work well.

Shure 444 D Dual Impedance Desk Microphone
The 444 D has voice shaping built in to it, providing greater
articulation at communications frequencies. Of course it has
a PTT switch on the base, that can be used as a momentary
switch, or can be locked in position. Also under the base
are switches for High or Low Z.
This mic is the black color, and is in very nice shape,
with paper work for $75.

Johnson Hi Z Hand Microphone
This high impedance hand mic is a gray color, with the
Johnson logo with the Indian on it. It has a PTT switch and
coiled cord, and produces a nice pattern on the scope. It
looks good also. $30

Generic Hi Z Hand Microphone
This hand mic is black in color, and looks like it might
have come from a HyGain rig. It has a PTT switch and black
coiled cord. $25

Kenwood MC-43 S hand microphone
This is the "standard" microphone that came with many
of the rigs that take the round 8 pin mic connector that this
one has on it. It has "up" and "down" switches, as well
as the normal PTT switch. This particular MC-43 is in
extremely nice condition. $40

Shure 401 B, Low Z Hand Microphone
This mic has characteristics similar the the Shure 444
Desk Mic, but this one is a hand mic. It is a controlled
magnetic mic, with frequency response tailored for voice
communications. It has a rugged case, and a heavy duty
coiled cord. 4 pin connector. With paper work for $40.

Shure 104 C, Low Z hand Microphone
This is a very heavy duty Shure mic. It appears to be new,
with stripped and tinned ends that have never been on a
connector. It is in its original box, with the original
instruction manual. $30

Chrome Low Z Hand Microphone
This mic is chrome plated. My memory says it may have come from a Polycom rig. The mic is a good solid metal case with chrome plating all around, with a black PTT switch and black coiled cord. There are some pits on the chrome; it works fine. $30

Generic Hand Microphone
This is a low impedance hand microphone, black in color.
With 4 pin connector. $25
With no connector. $22

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed. Stripped and tinned leads.
It works fine, and looks good also. $25

DTMF Touch Tone Microphones:

KDK DM TT-1 DTMF Touch Tone Microphone
This mic has a 12 digit touch tone pad on it, along with a switch to turn the pad on and off. I presently has a 4 pin plug on it, and can be used on most any rig. It works fine, and looks great. $35

CES 655 L "Microdialer" DTMF Microphone
You can manual dial a number, or automatically have it stored in the mic, and "speed dial" with this mic. 12 digit touch tone pad on the front, with the microphone part above the pad. This one presently has a 4 pin plug on it, but of course that can be changed. $35

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with a low impedance microphone. This one has the 8 pin modular plug (like a computer LAN) on it. This mic has not been used, so it is in really great condition.
With paper work for $40.

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a normal low impedance microphone. With 4 pin plug.
Like new. $38

Speaker Microphones:

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine and works fine. $18

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. Has 3.5 mm and 2.5 mm plugs for Azden, Icom, some Yaesu, and others. $ 20

Communications Speaker
This 4 inch square speaker is optimized for communications frequencies (300 to 3000 Hz). It is in a black enclosure, and is an 8 ohm speaker. It has a cord with a 1/8 inch (3.5 mm) mono plug on the end.
This one works fine and looks OK also. $15

CW Items:

Vibroplex Brass Racer Triangular Iambic Paddle

The Brass Racer Paddles are unique in that there are no springs in the design. Tension on the paddle is infinitely adjustable by the use of magnets. It is a convenient, space saving portable keyer paddle unit crafted from solid brass with a lacquer coated brushed finish mounted on a hardwood base. Designed for use with an external keyer or a keyer built into the radio. It has a long shielded cord with a 1/4 inch stereo plug. It works fine and looks good. $100

Cable for straight key
About 3 feet long, with a mono 1/4 inch phone plug on it, as is used with a straight key. $5
As above, but 1/8 inch (3.5 mm) plug. $5

Cable for paddles
About 3 feet long, and with a 1/4 inch stereo connector on the end, like used by most rigs. $8
As above, but 1/8 inch (3.5 mm) plug $8

Kenwood MB-4000 Mobile Bracket
This mobile bracket is made to be used with the Kenwood TW-4000 dual band transceiver, and possibly other rigs as well.
This one is in good shape, with the paper work and hardware. $15

B & W 377 Coaxial Antenna Relay:

I had never seen one of these before. Most of us are familiar with the Dow Key Antenna relays that many of us used 40 or 50 years ago. This unit serves the same function, but is somewhat unique.

The B & W 377 is housed in a hexagon box. It has three SO-239 connectors coming out three of the sides, a length of wire on one side that goes to the coil of the relay, and two sides that are blank.

The coil is rated to work on 48 to 130 volts AC. The original single page instruction sheet says that it is a unique relay design permitting this large variation in voltage. It is good to 150 MHz, and will handle 2000 Watts PEP, or 1000 watts continuous.

It appears that this unit has never been used. It has the original instruction sheet, and original box. The unit itself does not appear to have been used, and looks perfect. $75

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted in the coax line after the transmitter or transceiver) to reduce harmonic interference.

Bencher YA-1, high power, low pass TVI filter
If you need a more heavy duty filter for the output of your amplifier, this one is ideal. It will take full legal power plus, and has at least 80 db signal attenuation at TV channel 2.
It is also in a very sturdy metal case with SO-239 connectors on each end, and is a 50 ohm filter.
This one works great, and looks close to new. Someone added some felt to the bottom, so that it protects better. It is in its original box, with paper work. Bencher currently sells these for about $90. This one is only $65.

B & W FL-10/1500 (Also known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters, and will handle 1500 Watts. SO-239 connector on each end. This is the latest model B & W filter. It is in very nice condition; it looks very close to new. With paper work $40.

Drake TV-5200-LP
This is the more modern version of the Drake TV-1000 Low Pass Filter. This is the filter that may also be used on the low end of six meters, as well as HF. It is good for 1000 Watts average below 30 MHz, and about 200 W up to 52 MHz. It works fine, and is in very nice shape. $35

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter and antenna, and has been optimized to have more attenuation in the 40 MHz region, where many TVs have their IF. It is good for 1000 Watts "average" according to the manual, and has over 80 db attenuation at 41 MHz. This one looks great, and includes the paper work. $30

Drake TV-42-LP Low pass filter
Rated for 100 W thru 30 MHz.
Similar characteristics as the TV-3300, but lower power rating.
It works fine and looks like new. $15

Prices do not include shipping from Florida.

Thanks.

From: Bry Carling
Topic: 1725 Message: 2115

FOR SALE:

1000 watt Isolation Transformer. for 120V AC.
by Northlake Engineering Co. This is a 1:1 transformer.
120V AC in = 120V AC out. Very conservatively rated.
Actually is rated for 12 Amps (1400 watts.)

Has four IEC outlets and heavy duty power cable.
Heavy gauge, light gray metal case with rubber feet.
Like new condition.

Has a nice breaker switch for power ON/OFF.

One available for $45.00 plus shipping

Picture available on request.

2117. - Dentron Clipperton L W/Tuned Input 1300 Watts

Yahoo group: amatuerradioswapfest
Date: 2010-02-06 14:26:15 UTC
From: n2yet1
Topic: 2117 Message: 2117

Dentron Clipperton L WITH Tuned Input. 10-160 meters with full output(1300 Watts) on all bands except 10 & 160 meters. ALL Original, no mods done, including original Dentron Tubes, not the new China made crap tubes. Works like a champ in pretty good condition with minor wear for the age and 1 bulb out. Not many around that someone didn't put their "goldenscrewdriver' to. Nice size Desktop Powerhouse. Will answer questions and send more pics if needed. Price reduced to $650 or Best Offer + Shipping. Paypal (Prefered) & Money Orders.
Pictures uploaded to photo section.
Best 73,
Fred / N2YET

FOR SALE: Hallicrafters SX24 Receiver

Coverage: 540 kHz - 43.500 MHz, with 4 main frequency bands,
Modes: AM / CW / SSB
Has many deluxe features including: Bandspread on the 10m thru 80m
Amateur Bands.
Has Automatic Noise Limiter (ANL), Crystal Filter and variable selectivity.
S Meter, BFO, ANL, AVC, Headphone output etc. etc.

Controls: Main Tuning, Bandspread Tuning, Xtal Phasing Control, R.F. Gain,
Band Selector,
Selectivity Control, Tone Switch, ANL switch, BFO switch, Receive/Standby
Switch.
Has 'S' meter, and Headphone jack. On the rear it has an external speaker
connector.

AC Power: 100 - 125V AC 50 - 60 Hz
Dimensions: 19.5" x 9.5" x 11.125" Weight: 46 Lbs.

Included is the original documentation - operators manual and
notes all in like-new condition. A digital copy of the manual will
be provided also.

Available for $135.00 plus shipping

2122. Antennas and related items FS

Yahoo group: amatuerradioswapfest
Date: 2010-02-26 17:50:22 UTC
From: Ken Simpson, W8EK
Topic: 2122 Message: 2122

Antennas and antenna related items for sale:

Larsen VHF and UHF Mobile Antennas:

Antennas are used, but in very good condition.

Larsen NMO-Q Quarter Wave Antenna, fits any NMO mount
For 450 MHz. $6

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 m; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on
the 70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
Can be cut for 2 m, 220 MHz, or 440 MHz. $9

Larsen Q Quarter Wave Antenna
Fits a 5/16 inch stud, such as the Larsen LM mount,
and others. It can be cut for 2 meters, 220 MHz, or
450 MHz bands. $8

Trunk Lip Mount with 5/16 inch stud
Ideal for use with the "Q" above, or any other antenna
that requires a 5/16 inch stud. Very nice for $18.

Avanti "On Glass" antenna for 440 MHz:

This antenna was made by Avanti to mount on a windshield,
or other glass. It does not require a ground plane, as
it is a 1/2 wave antenna, rated to have 3 db gain. It is
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Hustler HF mobile resonators:
All work fine and are in good cosmetic condition.

"Super" high power resonators (good for 2 KW PEP):
80 meter RM-80 S

can be cut for CW or phone, and also used on a 4BTV
Vertical to give 80/75 meter coverage
(basically make it into a 5BTV) $38

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted
in the coax line after the transmitter or transceiver) to
reduce harmonic interference.

Bencher YA-1, high power, low pass TVI filter
If you need a more heavy duty filter for the output of
your amplifier, this one is ideal. It will take full legal
power plus, and has at least 80 db signal attenuation at
TV channel 2.
It is also in a very sturdy metal case with SO-239 connectors
on each end, and is a 50 ohm filter.
This one works great, and looks close to new. Someone added
some felt to the bottom, so that it protects better. It is in its
original box, with paper work. Bencher currently sells these
for about $90. This one is only $65.

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter
and antenna, and has been optimized to have more attenuation
in the 40 MHz region, where many TVs have their IF. It is good
for 1000 Watts "average" according to the manual, and has
over 80 db attenuation at 41 MHz. This one looks great, and
includes the paper work. $30

B & W FL-10/1500 (Also known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. This is the latest model B & W filter. It is in very nice
condition; it looks very close to new. With paper work $40.

Drake TV-5200-LP
This is the more modern version of the Drake TV-1000 Low Pass
Filter. This is the filter that may also be used on the low
end of six meters, as well as HF. It is good for 1000 Watts
average below 30 MHz, and about 200 W up to 52 MHz. It works
fine, and is in very nice shape. $35

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC Regular length, 6 1/2 inches long
Alinco Stubby w/BNC Connector, 4.6 inches long

5/16 inch threaded, like used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15

BNC Stubby for 440 MHz, 3 inches long

B & W 377 Coaxial Antenna Relay:

I had never seen one of these before. Most of us are familiar with the Dow Key Antenna relays that many of us used 40 or 50 years ago. This unit serves the same function, but is somewhat unique.

The B & W 377 is housed in a hexagon box. It has three SO-239 connectors coming out three of the sides, a length of wire on one side that goes to the coil of the relay, and two sides that are blank.

The coil is rated to work on 48 to 130 volts AC. The original single page instruction sheet says that it is a unique relay design permitting this large variation in voltage. It is good to 150 MHz, and will handle 2000 Watts PEP, or 1000 watts continuous.

It appears that this unit has never been used. It has the original instruction sheet, and original box. The unit itself does not appear to have been used, and looks perfect. $75

ParaDynamics PDC-5 Wattmeter
This unit has a wattmeter with scales of 100 W, 10 W, and 1 W. It has an SWR Bridge built in, with an antenna tuner. It was obviously made for 11 meter use, but it works well on other frequencies. The tuner portion works fine on 10 m, 12 m, and 15 m. The wattmeter seems accurate from 20 meters thru 10 meters.
It is physically small (only 5 X 3 X 1), so would be ideal for portable use.
The wattmeter and antenna tuner portion work fine, however, the SWR portion of this unit is inoperative. It looks fine. $12

Coax Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long. It has a male type "N" connector on each end. $15

Coax connectors and adapters:
Prices are per connector. Several of each are available. These are NOS (have not been used).

BNC male for coax cable
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $3

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Antenna adapter for Kenwood TH-21/31/41 HTs
Adapts the antenna connector found on these HTs to a
standard PL-259 connector. $6

Prices do not include shipping from Florida.

Thanks.

My first ad was confusing sri abt tht. I have an IC-761 using an iCM microphone with it and it works FB, I am trading rigs for a TS-850SAT and need a microphone for the Kenwood TS-850SAT:
I want to trade the iCM for:
a Heil Goldline microphone, Kenwood MC-85, MC-80, MC60A
(pics on request)

2129. Kenwood, Icom, Heath and other original manuals FS

Yahoo group: amatuerradioswapfest
Date: 2010-03-03 01:26:14 UTC
From: Ken Simpson, W8EK
Topic: 2129 Message: 2129

Kenwood, Icom, Heath, plus other ORIGINAL Manuals For Sale:

All of these manuals are originals and are not copies.
All are in very good condition, or better, with most close
to new condition.

Service Manuals:

These are original service manuals in extremely good condition.

Service manual for Kenwood TH-21 series (2 meter) HTs, plus most
accessories for this series HT such as DC-21, EP-2, TU-6, etc. $20

Service manual for Kenwood TH-41 series (440 MHz) HTs, plus most
accessories for this series HT such as DC-21, EP-2, TU-6, etc. $20

Service manual for Kenwood TW-4000 dual bander $20

Service Manual for Kenwood TR-2600, 2 meter HT $15

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a service
pack. It has schematics, circuit explanations, voltages, etc. $18

Original Operating Manuals for Kenwood equipment:

All manuals are in very nice condition, for Kenwood equipment.
All are original and are not copies.

BC-5 DC charger/adapter $4
HS-5 Headphones $4
LF-30A Low Pass Filter $5
MC-30 and MC-35 hand microphones $5
MC-85 desk microphone $4
PB-1, PB-2, PB-3, and PB-4 battery packs $3
PS-6 power supply $6
PS-30 power supply $5
SMC-24 speaker mic $4
SMC-25 speaker mic $4
SP-430 speaker $4
YK-88SN Narrow SSB Filter $4

Operating manual for TW-4000 dual bander $15
Service manual for TW-4000 dual bander $20
Operating manual for TH-21 HT for 2 meters $8
Service Manual for TH-21 series HTs & Accessories $20
Service Manual for TH-41 series HTs & Accessories $20
Operating manual for TH-225, 2 meter HT $12

Operating manual for TM-221/421 mobile $15
Operating manual for TH-241/441/541 mobile FM transceivers
..For 2 meters, 440 MHz, and 1200 MHz. $12
Operating manual for TR-2200, 2 meter "portable"
..This is very similar to the Drake TR-22. $15
Operating manual for TR-2400, 2 meter HT $12
Operating manual for TR-2500, 2 meter HT $14
Operating manual for TR-2600, 2 meter HT $12
Service Manual for TR-2600, 2 meter HT $15

These are original Kenwood manuals only.

Spanish version of the Operating Manual
for the Kenwood TM G-707 dual band transceiver
This is the original operating manual only, in Spanish.
It looks like it is quite extensive and detailed.
It is basically new, only being opened to observe that
it is in Spanish only. It is original from Kenwood.
$10
Please note: All other manuals are in English.

ORIGINAL Icom operating manuals:

Please note that all of these are original Icom manuals and
are not copies. All are in very good condition.
These are original manuals only.

BC-30 Desk Charger $5
BC-35 Desk Charger $7
BP-2, BP-3, BP-4, BP-5 battery packs $3
BP-21, BP-22, BP-23, and BP-24 Batteries $3
DC-1 DC pack for IC-2 AT series HTs $4
HM-8 Hand Microphone, w/schematic $5
IC-22 S, 2 m FM transceiver $12
IC-229, 2 meter mobile transceiver $15
IC-3 PA Power supply / speaker $10
UT-16 Voice Synthesizer $5

These are original manuals only.

ORIGINAL Heath manuals. These are manuals only.
They are all originals, not copies, and are close
to new condition.

Brochure "Heathkit Specials" featuring the
Twoer, Sixer, SB series, and others. $4
AM-2 Reflected Power Meter (SWR Meter), 1960
w/schematic, pictorial $8
HD-15 Hybrid Phone patch, 1965, Schematic in book $8
HD-1234 Four Position Coax Switch, 1973, no check marks $7
Heath HDP-21 Desk Microphone, 1969 $4
HM-15 Reflected Power Meter and SWR Bridge

1968, Schematic in book $8
HM-2102 VHF Wattmeter 1972
No check marks. Schematic in book $15
HW-2021 2 meter hand held transceiver, 1975, No check marks $9
IM-5284 Multimeter, Large schematic $3
SB-102 HF Transceiver Schematic, Large fold out page $4

These are original manuals only.

Gonset Noise Clipper Model C
This manual has a couple marks in one corner, plus the paper has yellowed somewhat. Otherwise, it is in good shape. $4

Prices do not include shipping from Florida.

Thanks.

2133. FS: Grab Bag of CLEVITE Filters and a rare W.E. LF Crystal

Yahoo group: amatuerradioswapfest
Date: 2010-03-06 20:41:22 UTC
From: Bry Carling
Topic: 2133 Message: 2133

FOR SALE:

Grab Bag of 7 CLEVITE (mostly) Crystal Filters and Ceramic
Filters plus a rare Western Electric LF Crystal...

Here is a great collection for experimenters. Most filters made by Clovite
were for 455 kHZ, so there may be some real jems.
Two or three of them are crystal filters the rest appear to
be ceramic filters. Two are marked "Ladder filetr." One is an
unknown through-panel type filter like I have seen used in
some Collins receivers, but not sure who made it since the label
is hard to read. If you have a signal generator and oscilloscope
there could be some real bargains here for you.

One hc13/w Crystal on 1.9020 kHz (Yes, KHZ!!) This is a tall metal
can, like an hc6u or hc13/u but with wire leads....

I will sell this entire package of parts for $19.00 plus shipping.

Brian, AF4K

2134. Hi Z, Lo Z, DTMF and other Microphones FS

Yahoo group: amatuerradioswapfest
Date: 2010-03-06 22:48:38 UTC
From: Ken Simpson, W8EK
Topic: 2134 Message: 2134

For Sale:

Microphones:

All of these microphones have been tested and work well.

Shure 401 B, Low Z Hand Microphone
This mic has characteristics similar the the Shure 444
Desk Mic, but this one is a hand mic. It is a controlled
magnetic mic, with frequency response tailored for voice
communications. It has a rugged case, and a heavy duty
coiled cord. 4 pin connector. With paper work for $40.

Shure 104 C, Low Z hand Microphone
This is a very heavy duty Shure mic. It appears to be new,
with stripped and tinned ends that have never been on a
connector. It is in its original box, with the original
instruction manual. $30

Chrome Low Z Hand Microphone
This mic is chrome plated. My memory says it may have come
from a Polycom rig. The mic is a good solid metal case with
chrome plating all around, with a black PTT switch and black
coiled cord. There are some pits on the chrome; it works
fine. $30

Generic Hand Microphone
This is a low impedance hand microphone, black in color.
With 4 pin connector. $25
With no connector. $22

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is
needed. Stripped and tinned leads.
It works fine, and looks good also. $25

Generic Hi Z Hand Microphone
This hand mic is black in color, and looks like it might
have come from a HyGain rig. It has a PTT switch and black
coiled cord. $25

DTMF Touch Tone Microphones:

KDK DM TT-1 DTMF Touch Tone Microphone
This mic has a 12 digit touch tone pad on it, along with a
switch to turn the pad on and off. I presently has a 4 pin
plug on it, and can be used on most any rig. It works fine,

and looks great. $35

CES 655 L "Microdialer" DTMF Microphone
You can manual dial a number, or automatically have it stored in the mic, and "speed dial" with this mic. 12 digit touch tone pad on the front, with the microphone part above the pad. This one presently has a 4 pin plug on it, but of course that can be changed. $35

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with a low impedance microphone. This one has the 8 pin modular plug (like a computer LAN) on it. This mic has not been used, so it is in really great condition. With paper work for $40.

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a normal low impedance microphone. With 4 pin plug. Like new. $38

Speaker Microphones:

MFJ-287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the TH-21/31/41 series HTs, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug. $15

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine and works fine. $18

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. Has 3.5 mm and 2.5 mm plugs for Azden, Icom, some Yaesu, and others. $ 20

Communications Speaker
This 4 inch square speaker is optimized for communications frequencies (300 to 3000 Hz). It is in a black enclosure, and is an 8 ohm speaker. It has a cord with a 1/8 inch (3.5 mm) mono plug on the end.
This one works fine and looks OK also. $15

Phone Patches / Digital Interfaces:

Waters "Universal Hybrid Coupler II" Model 3002

Most of us would likely call this a phone patch, but it is really much more than that. It does that, but also will interface with a tape recorder, and permit recording and play back of on-the-air QSOs. Nothing says that the

tape recorder input must be used that way. Connect the sound card in your computer in this position, and you have a very effective interface.

Model 3002 includes a speech compressor powered by a 9 volt battery. The front panel is finished on both sides, with one side having it set in a horizontal position, and the other in a vertical position.

This was a "top of the line" unit years ago. One only found them with top stations such as Collins.

This particular unit is in really great condition.

With paper work for $100.

Heath HD-15 Phone Patch
This is the unit with the VU meter on the left and 3 knobs that match the SB series to the middle and right. Low or high Z output to the transmitter. It can also be used as an interface to the computer for PSK31, etc. It is in extremely good condition. No scratches or imperfections. Paper work included for $25.

Weston Precision MilliVolt Meter Model 1
This is an extremely precision meter, with mirrored scale about 6 inches long. It weighs about 5 1/2 pounds! It has terminals for scales of 150, 1500, 15000, and 150000 millivolts.
Also included is the calibration information (from 1944) indicating that it is "dot on" for calibration.
In addition, it is in an extremely nice protective case, that appears to be real leather.
To put it another way, this is an extremely nice meter!
$80

Prices do not include shipping from Florida.

Thanks.

2137. Value of these two audio components?

Yahoo group: amatuerradioswapfest
Date: 2010-03-13 12:59:41 UTC
From: Bry Carling
Topic: 2137 Message: 2137

Hi,

I was wondering if somoene can tell me the approximate value
of a couple of older audio items that I have here.

I have a Harmon Kardon HK500 Tuner in nice condition.

I also have an unusual, professional style cassette recording deck
with many extra features. It's a Pioneer model CT-F950 with three
heads and it has a digital display etc.

Anyone have an estimate as to what these units are worth?

Best regards - Brian AF4K

2138. FS: Multi-way Crystal Sockets, hc6/u

Yahoo group: amatuerradioswapfest
Date: 2010-03-16 00:13:34 UTC
From: Bry Carling
Topic: 2138 Message: 2138

FOR SALE:

A few really nice AMPHENOL multi-way sockets for hc6u crystals.

These are switchable bank sockets for 10 or 18 crystals.
Two of the ten way ones have a rotary switch wafer attached
and could be used as part of a channelized transmitting system or
to select among several rocks for your favorite operating frequencies.

They all appear to be either unused or used very little and in
excellent condition... built with heavy duty blue plastic material and
have mounting holes.

Dimensions for 10-socket units: 2-3/8" X 2-3/8" X 5/16"
Dimensions for 18-socket unit: 3-1/4" X 2-3/8" X 5/16"

Pictures of these are available here:
http://www.af4k.com/crystal_sockets.htm

Pricing as follows:

QTY 1 - New in package unwired 10-socket unit = $10.00
QTY 2 - Wired, new-looking wired 10-socket units with 10-way
wafer switch. $8.00 each
QTY 1 - Wired, 18-socket unit = $12.00

Shipping additional. Please reply off-list if you'd like some
of these.

Regards - Brian, AF4K

2140. REDUCED: Multi-crystal sockets

Yahoo group: amatuerradioswapfest
Date: 2010-03-21 11:34:24 UTC
From: Bry Carling
Topic: 2140 Message: 2140

REDUCED:

Excellent military style AMPHENOL multi-way sockets
for HC6U crystals. Great for amateur homebrew projects etc.

These are switchable bank sockets for up to 10 or 18 crystals.
Two of the ten way ones have a rotary switch wafer attached
and could be used as part of a channelized transmitting system or
to select among several rocks for your favorite operating frequencies.

They all appear to be either unused or used very little and in
excellent condition... built with heavy duty blue plastic material and
have mounting holes.

Dimensions for 10-socket units: 2-3/8" X 2-3/8" X 5/16"

Dimensions for 18-socket unit: 3-1/4" X 2-3/8" X 5/16"

Pictures of these are available here:
http://www.af4k.com/crystal_sockets.htm

Pricing as follows:

QTY 1 - New in package unwired 10-socket unit = $8.00
QTY 2 - Wired, new-looking wired 10-socket units with 10-way
wafer switch. $6.00 each
QTY 1 - Wired, 18-socket unit = $10.00

Shipping additional. Please reply off-list if you'd like some
of these.

73 - Brian, AF4K

2141. FS: Drake Crystals for 2-line and 4-line radios

Yahoo group: amatuerradioswapfest
Date: 2010-03-23 01:12:24 UTC
From: Bry Carling
Topic: 2141 Message: 2141

For sale: hc6u crystals for the Drake 2-line and 4-line radios as follows:

DRAKE 2A, 2B and 2C CRYSTALS etc. (+ 4MHz from low edge)

CRYSTAL - RECEIVER - BAND
4.500 MHz covers 0.5 to 1.0 MHz
5.000 MHz covers 1.0 to 1.5 MHz - AM BCB
6.000 MHz covers 2.0 to 2.5 MHz
6.500 MHz covers 2.5 to 3.0 MHz
7.000 MHz covers 3.0 to 3.5 MHz
8.000 MHz covers 4.0 to 4.5 MHz
9.000 MHz covers 5.0 to 5.5 MHz - 60m
10.000 MHz covers 6.0 to 6.5 MHz
11.000 MHz covers 7.0 to 7.5 MHz - 40m
12.000 MHz covers 8.0 to 8.5 MHz
12.500 MHz covers 8.5 to 9.0 MHz
13.500 MHz covers 9.5 to 10.0 MHz
14.000 MHz covers 10.0 to 10.5 MHz - 30m
15.000 MHz covers 10.5 to 11.0 MHz
16.000 MHz covers 11.5 to 12.0 MHz
18.000 MHz covers 14.0 to 14.5 MHz - 20m
20.000 MHz covers 16.0 to 16.5 MHz
25.000 MHz covers 21.0 to 21.5 MHz - 15m
24.000 MHz covers 28.0 to 28.5 MHz - 10m
24.500 MHz covers 28.5 to 29.0 MHz - 10m
$16.00 each plus shipping

Also:
SPECIAL 20.8 MHz crystal for Drake 4-line on 30 meter band.
Now $35.00 each.

DRAKE 4-LINE CRYSTALS - for the T-4 and R-4 TWINS
- $16.00 except as noted
1.0 MHz band = 12.100 MHz
1.5 MHz band = 12.600 MHz
2.5 MHz band = 13.600 MHz
3.5 MHz band = 14.600 MHz ($45.00)
6 MHz band = 17.100 MHz
6.5 MHz band = 17.600 MHz
7.0 MHz band = 18.100 MHz ($45.00)
8 MHz band = 19.100 MHz
8.5 MHz band = 19.600 MHz
9.5 MHz band = 20.600 MHz
10 MHz Band = 20.800 MHz ($35.00) - as recommended by Drake
10 MHz band = 21.100 MHz
14.0 MHz band = 25.1 MHz ($45.00)

18.0 MHz band = 29.100 MHz
21.0 MHz band = 32.100 MHz ($45.00)
21.5 MHz band = 32.600 MHz
24.5 MHz band = 35.600 MHz
27.0 MHz band = 38.100 MHz
28.0 MHz band = 39.100 MHz
28.5 MHz band = 39.600 MHz
29.0 MHz band = 40.100 MHz

All hc6/u crystals $16.00 each plus shipping (except as noted)

Details at:
http://www.af4k.com/hc6u_crystals.htm#drake

2142. FS: New Waxed Lacing Cord

Yahoo group: amatuerradioswapfest
Date: 2010-03-29 11:05:13 UTC
From: Bry Carling
Topic: 2142 Message: 2142

FOR SALE: WAXED LACING CORD

New rolls of high quality lacing cord....

Lacing cord for wiring harnesses in homebrew equipment or
restoration of older radio and electronic equipment.
Brand new - comes as a 300 yard spool, so should last for a long time.
Available for $12.50 per spool plus shipping

ALSO:
Waxed Lacing cord Brand new - a larger 500 yard spool,
should last for a long time. One left!
Available for $15.00 plus shipping.

For fastest response, please use my main e-mail address:
af4k@...

Picture and details at:
http://www.af4k.com/miscpart.htm

2143. Digging Deeper in the Basement for Crystals

Yahoo group: amatuerradioswapfest
Date: 2010-03-30 16:15:15 UTC
From: Bry Carling
Topic: 2143 Message: 2143

FOR SALE: More "Bargain Basement" Crystals...

For $2.00 to $6.00 each while they last... sold in groups
only. Many of these will multiply up nicely into 20m, 15m,
10m, 6m, 2m, etc.
Some are marked as 15m and 10m are actually 7 MHz crystals.
All are type hc6u metal can crystals with 1/2 inch pin spacing (thin pins)
unless otherwise stated.Shipping additional.

Group 11 - 1845.76 kHz, 1905 kHz and QTY 2 X 1942 MHz
- all 4 for $16.00

Group 12 - QTY 2 X 3727 kHz, 7037 kHz, 7052 kHz, 7070.37 kHz
- All 5 for $29.00

Group 13 - 7022, 7037, 7070.37, 7079, 7081, 7095 kHz
- All 6 for $24.00

Group 14 - QTY 2 X 7095, 7124, 7129, 7138 kHz
- all 5 for $15.00

Group 15 - 7000, 7100, 7159, 7170.37, 7174 kHz
- All 5 for $15.00

Group 16 - 7174, 7185, 7200, 7212, 7242, 7290 kHz
- All 6 for $27.00

Group 17 - QTY 2 X 7218, 7228, 7246, 7247, 7295 kHz
- All 6 for $27.00

Group 18 - 7034 kHz, QTY 2 X 7051 kHz, 7084 kHz, QTY 2 X 7101 kHz
MARKED as: 21.1035, QTY 2 X 21.1535, 21.2535, QTY 2 X 21.3035 MHz
- All 6 for $24.00

Group 19 - 7034, 7051, 7068, QTY 2 X 7084, QTY 2 X 7101 kHz
MARKED as: 21.1035, 21.1535, 21.20350, QTY 2 X 21.2535, QTY 2 X
21.3035 MHz
- All 7 for $21.00

Group 20 - QTY 2 X 7111, 7171, 7184, 7196, 7216, 7253, 7361 kHz
MARKED as: QTY 2 X 28.444, 28.685, 28.735, 28.785, 28.866, 29.011,
29.444 MHz
- All 8 for $26.00

Group 21 - QTY 2 New FT243 'PR' Crystals on 28.616 and 28.670 MHz
- these two for $8.00 total.

Group 22 - QTY 40 (forty) FT241 crystals - note these are
the LF crystals for the military surplus channelized radios.
- Available for $20.00 for all 40.

Please e-mail me off the list to arrange purchase.

Updated listing of availability of these groups will be posted at:

http://www.af4k.com/basementcrystals.htm

2147. FS or FT: Three HF Mobile whips

Yahoo group: amatuerradioswapfest
Date: 2010-04-09 10:56:56 UTC
From: Bry Carling
Topic: 2147 Message: 2147

FOR SALE OR TRADE - I have three HF amateur band mobile whips
that are for sale or trade. All are in excellent condition.

PRO-AM

PHF-40 = 40m whip antenna
PHF-15 = 15m whip antenna
PHF-17? The label fell of the last one I think it is a 17m whip antenna.
Or it may possibly be for 20m.

All of these have 3/8 X 24 threads for mounting on your
standard antenna mount.

I would like to sell these or trade for other amateur radio
parts or equipment.

73 - Brian Carling, AF4K

2148. Antennas, Connectors, and related items FS

Yahoo group: amatuerradioswapfest
Date: 2010-04-10 14:08:31 UTC
From: Ken Simpson, W8EK
Topic: 2148 Message: 2148

Antennas and related items for sale:

Larsen VHF and UHF Mobile Antennas:

Antennas are used, but in very good condition.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 m; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on
the 70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
Can be cut for 2 m, 220 MHz, or 440 MHz. $9

Larsen Q Quarter Wave Antenna
Fits a 5/16 inch stud, such as the Larsen LM mount,
and others. It can be cut for 2 meters, 220 MHz, or
450 MHz bands. $8

Trunk Lip Mount with 5/16 inch stud
Ideal for use with the "Q" above, or any other antenna
that requires a 5/16 inch stud. Very nice for $18.

Avanti "On Glass" antenna for 440 MHz:

This antenna was made by Avanti to mount on a windshield,
or other glass. It does not require a ground plane, as
it is a 1/2 wave antenna, rated to have 3 db gain. It is
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.

Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Hustler MOS Monitor Antenna:
The Hustler MOS monitor antenna is for use on indoor scanners.
It features a suction cup to hold it to the top of the table.
A Motorola type connector can be moved up and down the antenna
so that it is just the right height to plug directly in to
your scanner.
Basically, this antenna will attach to the table behind your
desktop scanner, out of the way, but will provide a significant

amount of gain over the internal antenna.
This particular antenna works fine, and looks very close to new.
$20

Hustler HF mobile resonators:
All work fine and are in good cosmetic condition.

"Super" high power resonators (good for 2 KW PEP):
80 meter RM-80 S
can be cut for CW or phone, and also used on a 4BTV
Vertical to give 80/75 meter coverage
(basically make it into a 5BTV) $38

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted
in the coax line after the transmitter or transceiver) to
reduce harmonic interference.

Bencher YA-1, high power, low pass TVI filter
If you need a really heavy duty filter for the output of
your amplifier, this one is ideal. It will take full legal
power plus much more, and has at least 80 db signal
attenuation at TV channel 2.
It is in a very sturdy metal case with SO-239 connectors
on each end, and is a 50 ohm filter.
This one works great, and looks very close to new. It has felt
on the bottom, so that it protects better. It is in its original
box, with paper work.
Bencher currently sells these for about $90. This one is only
$65

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter
and antenna, and has been optimized to have more attenuation
in the 40 MHz region, where many TVs have their IF. It is good
for 1000 Watts "average" according to the manual, and has
over 80 db attenuation at 41 MHz. This one looks great, and
includes the paper work. $30

B & W FL-10/1500 (Also known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters,
and will handle 1500 Watts. SO-239 connector on each
end. This is the latest model B & W filter. It is in very nice
condition; it looks very close to new. With paper work $40.

Drake TV-5200-LP
This is the more modern version of the Drake TV-1000 Low Pass
Filter. This is the filter that may also be used on the low
end of six meters, as well as HF. It is good for 1000 Watts
average below 30 MHz, and about 200 W up to 52 MHz. It works
fine, and is in very nice shape. $35

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC Regular length, 6 1/2 inches long
BNC, Original antenna from Kenwood TH-215
Alinco Stubby w/BNC Connector, 4.6 inches long

5/16 inch threaded, like used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15

BNC Stubby for 440 MHz, 3 inches long

ParaDynamics PDC-5 Wattmeter
This unit has a wattmeter with scales of 100 W, 10 W, and
1 W. It has an SWR Bridge built in, with an antenna tuner.
It was obviously made for 11 meter use, but it works well
on other frequencies. The tuner portion works fine on 10 m,
12 m, and 15 m. The wattmeter seems accurate from 20 meters
thru 10 meters.
It is physically small (only 5 X 3 X 1), so would be ideal
for portable use.
The wattmeter and antenna tuner portion work fine, however,
the SWR portion of this unit is inoperative. It looks fine. $12

Coax Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

Coax connectors and adapters:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male for coax cable
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $3

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Antenna adapter for Kenwood TH-21/31/41 HTs
Adapts the antenna connector found on these HTs to a
standard PL-259 connector. $6

Prices do not include shipping from Florida.

Thanks.

Antennas and related items for sale:

Larsen VHF and UHF Mobile Antennas:

Antennas are used, but in very good condition.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 m; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on
the 70 cm band. Stacked whip is included. $12

Larsen NLA-Q
Fits the Larsen NLA mount, but is a quarter wave antenna.
Can be cut for 2 m, 220 MHz, or 440 MHz. $9

Trunk Lip Mount with 5/16 inch stud
Ideal for use with the "Q" above, or any other antenna
that requires a 5/16 inch stud. Very nice for $18.

Avanti "On Glass" antenna for 440 MHz:

This antenna was made by Avanti to mount on a windshield,
or other glass. It does not require a ground plane, as
it is a 1/2 wave antenna, rated to have 3 db gain. It is
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.

BNC Regular length, 6 1/2 inches long
BNC, Original antenna from Kenwood TH-215
Alinco Stubby w/BNC Connector, 4.6 inches long

5/16 inch threaded, like used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15

BNC Stubby for 440 MHz, 3 inches long

ParaDynamics PDC-5 Wattmeter
This unit has a wattmeter with scales of 100 W, 10 W, and 1 W. It has an SWR Bridge built in, with an antenna tuner. It was obviously made for 11 meter use, but it works well on other frequencies. The tuner portion works fine on 10 m,

12 m, and 15 m. The wattmeter seems accurate from 20 meters
thru 10 meters.
It is physically small (only 5 X 3 X 1), so would be ideal
for portable use.
The wattmeter and antenna tuner portion work fine, however,
the SWR portion of this unit is inoperative. It looks fine. $12

Coax Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

Coax connectors and adapters:
Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male for coax cable
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $3

BNC 90 degree - female to male - $3

BNC "T" - two female and one male - $3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Antenna adapter for Kenwood TH-21/31/41 HTs
Adapts the antenna connector found on these HTs to a
standard PL-259 connector. $6

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

2151. VX-5 Handheld for Sale

Yahoo group: amatuerradioswapfest
Date: 2010-04-16 16:41:07 UTC
From: Chris Schwab
Topic: 2151 Message: 2151

All:

I have a Yeasu VX-5 for sale. Here's the description:

The Yaesu VX-5R is a triple band (6M, 2M & 440 MHz) HT with extensive receive coverage, and leading-edge features. It receives the AM and FM broadcast bands, shortwave (AM) to 16 MHz, VHF and UHF TV audio, VHF Air and public service frequencies. The specific ranges covered are: 0.5-16, 47-729 and 800-999 (less cellular). The die-cast aluminum housing, augmented by an extensive gasketing system sets a new standard for water resistance among amateur HTs. This robust construction has earned it a MIL-STD 810 rating.

The supplied FNB-58LI 7.2 V 1100 mAh Lithium-ion battery provides 5 watts out on 6M and 2M and 4.5 watts on 440 MHz. Features include: 16 digit 9 memory DTMF autodialer, CTCSS/DCS, 220 memories, aluminum die-cast case and 8 character alphanumeric display.

At only 2.3 x 3.4 x 1.1 inches (58x87x28 mm) it will go with you everywhere. The VX5R comes with SMA Antenna, FNB-58LI Lithium Ion Battery, NC-72B Battery Charger, Belt Clip and Wrist Strap.

Features
220 Alpha Memories
AM/FM BCB
SW to 16 MHz
CTCSS/DCS
European Tone Burst
Wideband Receive
Dual Watch
ARTS-Automatic In-Range Transponder
Backlit Keypad & LCD

Electronically, this radio is 10+. Physically, this had been my favorite radio with some wear to show it, and is probably about a 7 or an 8, with some scratches on the edges of the radio. I'm including the original box (see attached picture)

This radio includes the Yaesu SU-1 barometric module which provides both barometric pressure and altitude measuring capability, and has been MARS/CAP modified. I'm also including a MFJ-295 hand held microphone.

Originally with accessories, this would have gone for around $280, I'm asking $150 plus shipping for the package. Paypal preferred, shipped via fedex ground.

Any idea of the model numbers of the mikes you need? In an estate
I'm helping with, there are a few. Also, we unloaded a few on Ken
Simpson in Ocala awhile back. He's usually on the Fla newsgroups
and might be able to help you. If you can't find him, let me know
and I'll send you his email.

From: Ken Snipes
Topic: 2153 Message: 2153

My new job allows me to have ham radio in my company car. I have a small 2 meter radio, But I would love to find a small light weight 10 meter SSB rig, doesnt have to be high power or anything special as ill probably be doing more listening than talking..
Anyone have any ideas or suggestions, or a radio they would part with reasonably , please let me know...Thanks

2154. Audio Filter, Power Suppies, Mics and much more FS

Yahoo group: amatuerradioswapfest
Date: 2010-05-01 12:31:49 UTC
From: Ken Simpson, W8EK
Topic: 2154 Message: 2154

Many Ham Items For Sale
Audio Filter, SWR Bridge, Keyer, Power Supplies, Microphones
(Hand Mics, DTMF Touch Tone Mics, Speaker Mics),
Communications Speaker, Low Pass TVI Filters, etc.

Autek QF-1 A, Active Audio Filter

This is an audio filter that goes between your rig and speaker.
It runs off of 110 V AC, and will peak, notch, or become a low
pass or high pass filter. Selectivity (bandwidth) and frequency
are adjustable from the front panel. This is the "A" model that
also has an additional notch filter added. The input is an 1/4 inch
phone plug, and the output is a 1/4 inch jack on the rear panel.

This particular unit looks very, very nice, and works 100%.
With paper work for $55.

Dual Meter SWR Bridge

This meter is a Siltronics / Swan SWR-2. Back in the 1970's and
80's, this meter was relabeled by many different manufacturers
with their own label, but is basically the same meter that was
made in Japan. It has two separate meters -- one for forward
power and one for reading the SWR. It works from 160 thru 2
meters, so is useful on most any frequency you would want.
The SWR-2 has SO-239 connectors on each end. It differs
from the SWR-1 that had the connectors on the back.

This particular meter works fine. Cosmetically the forward
power meter lens has a crack in it. The SWR meter is fine.
Since it is only necessary to set the forward meter to full
scale, this really does not detract from its usefulness.

With paper work for $18.

CW Items:

Cable for straight key
About 3 feet long, with a mono 1/4 inch phone plug on it,
as is used with a straight key. $5
As above, but 1/8 inch (3.5 mm) plug. $5

Cable for paddles
About 3 feet long, and with a 1/4 inch stereo connector
on the end, like used by most rigs. $8
As above, but 1/8 inch (3.5 mm) plug $8

Power Supplies:

10 amp Motorola NPN1007A Power Supply
This supply looks like an Astron! Same color paint, same styling, etc. In fact I thought it was an Astron until I read the Motorola name tag.
This one works 100%, and looks very close to new. I can not find a scratch on it. $40

TenTec Model 280 power supply, 20 amps at 13 V DC.
This supply is quite heavy duty electrically.
It has 2 pass transistors, instead of the one that some have. It also has an ammeter on it.
This one works fine, and looks OK as well.
A previous owner removed the molded in TenTec power cable on the back and added very heavy binding posts, so that it can be used with many different rigs and not just TenTec. It also has a couple RCA jacks for lower power use.
With paper work for $100.

"Switcher / 25" 25 amp switching power supply
This is a 25 amp switching power supply in a case that matches the early Omni series case, with the metal bezel around it. It is in a case that is the same size as a 243 remote VFO. It has an ammeter on the front, along with Switch, TenTec logo, and output bulb. The front panel basically looks like a 280 power supply with a metal bezel, but says "Switcher/25" on it. It is very quiet, and well shielded, and does not produce any electrical noise that I could find. $150

AEA AC-1
"Wall wort" 12 V DC power supply at 1 amp.
Can be used with the AEA PK-232, PK-88 or others.
This unit has a 2.1 mm plug, with the center positive, so it can be used on many different things that require 12 V DC at up to an amp, such as keyers, antenna tuners, etc. $15

Microphones:

All of these microphones have been tested and work well.

Johnson Hi Z Hand Microphone
This high impedance hand mic is a gray color, with the Johnson logo with the Viking on it. It has a PTT switch and coiled cord, and produces a nice pattern on the scope. It looks very nice also. $30

Generic Hi Z Hand Microphone
This hand mic is black in color, and looks like it might have come from a HyGain rig. It has a PTT switch and black coiled cord. $25

Shure 401 B, Low Z Hand Microphone
This mic has characteristics similar the the Shure 444 Desk Mic, but this one is a hand mic. It is a controlled magnetic mic, with frequency response tailored for voice communications. It has a rugged case, and a heavy duty coiled cord. 4 pin connector. With paper work for $40.

Shure 104 C, Low Z hand Microphone
This is a very heavy duty Shure mic. It appears to be new, with stripped and tinned ends that have never been on a connector. It is in its original box, with the original instruction manual. $30

Chrome Low Z Hand Microphone
This mic is chrome plated. My memory says it may have come from a Polycom rig. The mic is a good solid metal case with chrome plating all around, with a black PTT switch and black coiled cord. There are some pits on the chrome; it works fine. $30

Generic Hand Microphone
This is a low impedance hand microphone, black in color.
With 4 pin connector. $25
With no connector. $22

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed. Stripped and tinned leads.
It works fine, and looks good also. $25

DTMF Touch Tone Microphones:

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic. Presently with 4 pin plug. Looks to be unused. $40

KDK DM TT-1 DTMF Touch Tone Mic
This mic has a 12 digit touch tone pad on it, with a switch to turn the pad on and off. With 4 pin plug.
It works fine, and looks great. $35

Data Signal "Data-Coder 5" Touch Tone Mic
This mic has a 12 digit touch tone pad on it, plus a normal low impedance microphone. With 4 pin plug. Like new. $38

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in the mic, and "speed dial". 12 digit touch tone pad on the front, with the microphone part above the pad. With an 8 pin modular plug (like a computer LAN) on it, which can be changed.
Looks to be new. $40

Speaker Microphones:

MFJ-287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the TH-21/31/41 series HTs, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug. $15

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine and works fine. $18

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. Has 3.5 mm and 2.5 mm plugs for Azden, Icom, some Yaesu, and others. $ 20

Communications Speaker
This 4 inch square speaker is optimized for communications frequencies (300 to 3000 Hz). It is in a black enclosure, and is an 8 ohm speaker. It has a cord with a 1/8 inch (3.5 mm) mono plug on the end.
This one works fine and looks OK also. $15

Kenwood MB-4000 Mobile Bracket
This mobile bracket is made to be used with the Kenwood TW-4000 dual band transceiver, and possibly other rigs as well.
This one is in good shape, with the paper work and hardware. $15

ParaDynamics PDC-5 Wattmeter
This unit has a wattmeter with scales of 100 W, 10 W, and 1 W. It has an SWR Bridge built in, with an antenna tuner. It was obviously made for 11 meter use, but it works well on other frequencies. The tuner portion works fine on 10 m, 12 m, and 15 m. The wattmeter seems accurate from 20 meters thru 10 meters.
It is physically small (only 5 X 3 X 1), so would be ideal for portable use.
The wattmeter and antenna tuner portion work fine, however, the SWR portion of this unit is inoperative. It looks fine. $12

Phone Patch / Digital Interface:

Heath HD-15 Phone Patch
This is the unit with the VU meter on the left and 3 knobs that match the SB series to the middle and right. Low or high Z output to the transmitter. It can also be used as an interface to the computer for PSK31, etc. It is in great shape. Paper work included for $25.

Waters "Universal Hybrid Coupler II" Model 3002

Most of us would likely call this a phone patch, but it is really much more than that. It does that, but also will interface with a tape recorder, and permit recording and play back of on-the-air QSOs. Nothing says that the tape recorder input must be used that way. Connect the sound card in your computer in this position, and you have a very effective interface.

Model 3002 includes a speech compressor powered by a 9 volt battery. The front panel is finished on both sides, with one side having it set in a horizontal position, and the other in a vertical position.

This was a "top of the line" unit years ago. One only found them with top stations such as Collins.

This particular unit is in really great condition.

With paper work for $100.

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter (inserted in the coax line after the transmitter or transceiver) to reduce harmonic interference.

B & W FL-10/1500 (Also known as model 425) low pass filter
B & W TVI filter, 50 ohm. It cuts off just above 10 meters, and will handle 1500 Watts. SO-239 connector on each end. This is the latest model B & W filter. It is in very nice condition; it looks very close to new. With paper work $40.

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter and antenna, and has been optimized to have more attenuation in the 40 MHz region, where many TVs have their IF. It is good for 1000 Watts "average" according to the manual, and has over 80 db attenuation at 41 MHz. This one looks great, and includes the paper work. $30

Coax Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long. It has a male type "N" connector on each end. $15

Coax connectors and adapters:
Prices are per connector. Several of each are available. These are NOS (have not been used).

BNC male for coax cable
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3

screw in type - $3

BNC "T" - two female and one male - $3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Antenna adapter for Kenwood TH-21/31/41 HTs
Adapts the antenna connector found on these HTs to a
standard PL-259 connector. $6

Prices do not include shipping from Florida.

Thanks.

2157. REDUCED - Ham Crystals $2.00 and up

Yahoo group: amatuerradioswapfest
Date: 2010-05-07 12:06:11 UTC
From: Bry Carling
Topic: 2157 Message: 2157

Reduced even more - some great groups of
Amateur Band hc6u and FT243 Crystals...

80m CW and AM, 40m CW and AM etc. etc. etc.
For $2.00 and $3.00 each while they last... sold in groups
only.

Group 14 hc6u - QTY 2 X 7095, 7124, 7129, 7138 kHz
- all 5 for $10.00

Group 15 hc6u - 7000, 7100, 7159, 7170.37, 7174 kHz
- All 5 for $10.00

Group 16 hc6u - 7174, 7185, 7200, 7212, 7242, 7290 kHz
- All 6 for $15.00

Group 17 hc6u - QTY 2 X 7218, 7228, 7246, 7247, 7295 kHz
- All 6 for $12.00

Group 18 hc6u - 7034 kHz, QTY 2 X 7051 kHz, 7084 kHz, QTY 2 X 7101
kHz
MARKED as: 21.1035, QTY 2 X 21.1535, 21.2535, QTY 2 X 21.3035 MHz
- All 6 for $18.00

Group 20 hc6u - QTY 2 X 7111, 7171, 7184, 7196, 7216, 7253, 7361
kHz
MARKED as: QTY 2 X 28.444, 28.685, 28.735, 28.785, 28.866, 29.011,
29.444 MHz
- All 8 for $16.00

Group 21 hc6u - QTY 2 New FT243 'PR' Crystals on 28.616 and 28.670
MHz
- these two for $6.00 total.

Group 25 - Two FT243 crystals on 20m fundamental freqs of
14.042 MHz and 14.060 MHz - available for $24.00 plus shipping.

Please e-mail me off the list to arrange purchase.

Updated listing of availability of these groups will be posted at:

2168. FS: Drake 4-Line 30m Crystals

Yahoo group: amatuerradioswapfest
Date: 2010-05-26 00:46:02 UTC
From: Bry Carling
Topic: 2168 Message: 2168

FOR SALE: Drake 4-Line 30m Crystals

This is the PROPER recommended crystal as described for
Drake equipment to be used on the 10 MHz band.
Great for your Drake T4X and R4B etc.

If you use 21.100 MHz crystals which would be the "normal" ones
to use, there is a severe reduction in sensitivity.
For best band coverage you need a crystal on 20.800 MHz.

I have had just a limited number of these made up for Drake owners.

They are currently available for $35.00 each and when they are gone,
that's it for the run.

Get the best performance from your Drake 4-Line equipment
on 30 meters.

Contact me off the list if you would like some of these.

2169. Kenwood MC-50 Microphone

Yahoo group: amatuerradioswapfest
Date: 2010-05-26 12:52:43 UTC
From: Bry Carling
Topic: 2169 Message: 2169

FOR SALE: The Kenwood MC-50 desk mic has PTT and LOCK buttons. It was originally designed for use with the TS-120S, TS-520S, TS-530S, TS-820S and TS-830S. It can easily be adapted to work with other transceivers. The MC-50 microphone is no longer in production.

The connection at the back of the mike can be removed and rotated 180 degrees to select either high or low impedance.
- Selectable impedance: 600 ohms or 50 kilohms.
- Sensitivity is:
- -56 dB +/- 3 dB when used at 50 kilohms. And -76 dB +/- 3 dB when used at 600 ohms.

The microphone is in excellent condition. No scratches, marks, rust, scuffs etc.
Hard to tell from new, and comes with the stand and cables of course. It also comes with the instruction sheet.

As of right now I have two of these available, and you will not find any better ones.
One comes with the MFJ-48 which is a 4-pin to 8-pin adapter. This adapter allows the MC-50 microphone to be used with later model Kenwood tranceivers such as the TS-440s, TS-140s, etc.
The other one already has an 8-pin connector so can;t immediately be used on the older radios.
Take your choice... first come, first served.

Available for $85.00 each plus shipping.

Picture and details at:
http://www.af4k.com/miscpart.htm

2170. Re: Drake 4-line 30m Crystals

Yahoo group: amatuerradioswapfest
Date: 2010-05-26 15:54:00 UTC
From: Bry Carling
Topic: 2170 Message: 2170

Some folks have written to me asking WHY use a 20.8 MHz crystal
for your 4-line Drake rigs on the 30m band.

It is specified in the manual, but here is why - from the archives of
the Drakelist Group.... see below - 73, Bry AF4K.com
(Thanks David, Eric and Garey)

-~ø¤°°º¤ø~-"ßrÿ in FLÕRÎÐÁ"-~ø¤°°º¤ø~-

SUBJECT: [drakelist] 20.8 MHz (30 Meter) T-4XC Crystal wanted

-----Original Message-----
From: Garey Barrell
Sent: Sunday, February 27, 2005
To: Eric Webner; Drakelist
Subject: Re: [drakelist] 20.8 MHz (30 Meter) T-4XC Crystal wanted

Garey Barrell made an utterence to the drakelist gang:

Eric -

There is a very good reason for using the 20.8 MHz crystal instead of
the 21.1. There are several spurious outputs in and around 10 MHz
when using the 21.1. This is specified in the T-4X(any) manual with
"do not use" ranges for certain crystals. Keep in mind that the PTO
operates in and around 5 MHz.....

And yes, you can transceive on any crystal you have in the receiver,
but the same problems occur with a 21.1 MHz crystal in the R-4(any).
If you just want to listen to 10.1 - 10.150 the 21.1 MHz crystal will work
in the receiver. But don't transceive using that crystal. Transceive isn't
all that satisfactory on CW anyway, since the offset is around 900 Hz
and most folks like to listen to CW at a somewhat lower frequency.

73, Garey - K4OAH
Atlanta

Eric Webner wrote:

>I wonder if the 21.1 Mhz crystal would work as well. It sure would be
a lot easier to operated the vfo, since the band would start at 10.0
Mhz instead of 9.7 or whatever the manual says.

Can you experts tell me what it takes to transceive on accessory
crystals? Can I get a crystal for the receiver, set the T-4XC mode
switch to "RECEIVE" and be able to transmit and receive on the 30
meter band?

73,

Eric KA8FAN

David Havel wrote:

Hello gang,

I'm in search of a 20.8 MHz crystal for my T-4XC in order to put it on 30 meters. According to the manual, the 20.8 unit is the only recommended crystal for use on this band. If you have one you'd like to sell, please email me what you're asking for it!

Thank you in advance & 73,

David Havel - NO3K

WM4B

Heathkit HM-9 QRP Wattmeter
- Wired for 144-148 MHz
- Calibration is comparable to my MFJ wattmeter
- Includes original Heathkit manual
- Upper half of clamshell case repainted by previous owner
-- Color match is reasonable, but overall paintjob is poor
-- Several scratches on top of case
-eBay average price is $49.29
- Asking $30

Heathkit HD-1422-A Antenna Noise Bridge
- Rated at 1 - 30 Mhz with a specified useful range of 1 - 100 MHz
- Works great
- Cosmetically, this unit is a near perfect as they come
- Includes COPY of Heathkit manual
- eBay average price is $37.77
- Asking $35

MFJ-864 HF/144/440 MHz SWR Wattmeter
- Measures forward/reflected power and SWR for the 1.8 - 60, 144, and 440 MHz ham bands.
- 2 power scales for each band selected
-- Low power scale reads 0-30 watts forward & 0-6 watts reflected
-- High power reads 0-300 watts forward & 0-60 watts reflected
- SWR is indicated from 1:1 to 5:1
- Works great
- Very good cosmetic condition
- COPY of manual will be provided
- Currently selling for $99.95
- Asking $50

2178. Various Microphones FS

Yahoo group: amatuerradioswapfest
Date: 2010-06-11 22:08:17 UTC
From: Ken Simpson, W8EK
Topic: 2178 Message: 2178

Microphones For Sale:

All of these microphones have been tested and work well.

Hand Microphones:

Collins MM-1 Mobile Mic
The Collins MM-1 is a pressure-operated dynamic microphone designed to fit your hand comfortably. This mike is engineered for maximum voice response, and its die-cast case is finished in brushed satin chrome. With its mounting button on the front, the MM-1 slips easily into a dashboard bracket supplied with the mike. When the MM-1 is removed from the dashboard bracket, the microphone is in position for instant transmission. A coiled cord is supplied with the 22-ounce microphone. The MM-1 has a frequency response from 200-10,000 cycles per second and has an output level of -48 db.
This one works fine; there are some pits in the chrome. $80

Johnson Hi Z Hand Microphone
This high impedance hand mic is a gray color, with the Johnson logo with the Viking on it. It has a PTT switch and coiled cord, and produces a nice pattern on the scope. It looks very nice also. $30

Generic Hi Z Hand Microphone
This hand mic is black in color, and looks like it might have come from a HyGain rig. It has a PTT switch and black coiled cord. $25

Shure 401 B, Low Z Hand Microphone
This mic has characteristics similar the the Shure 444 Desk Mic, but this one is a hand mic. It is a controlled magnetic mic, with frequency response tailored for voice communications. It has a rugged case, and a heavy duty coiled cord. 4 pin connector. With paper work for $40.

Shure 104 C, Low Z hand Microphone
This is a very heavy duty Shure mic. It appears to be new, with stripped and tinned ends that have never been on a connector. It is in its original box, with the original instruction manual. $30

Generic Hand Microphone
This is a low impedance hand microphone, black in color.
With 4 pin connector. $25
With no connector. $22

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed. Stripped and tinned leads.
It works fine, and looks good also. $25

DTMF Touch Tone Microphones:

Icom HM-23 DTMF Touch Tone Microphone
With round 8 pin connector, Up-Down, switches, and 16 digit touch tone pad. This was originally used on the IC-27, 28, 37, 47, etc, that requires a long nut for the recessed connector. Of course it can also be used on rigs that do not have the recessed connector. It works fine and looks close to new. $45

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic. Presently with 4 pin plug. Looks to be unused. $40

KDK DM TT-1 DTMF Touch Tone Mic
This mic has a 12 digit touch tone pad on it, with a switch to turn the pad on and off. With 4 pin plug.
It works fine, and looks great. $35

Data Signal "Data-Coder 5" Touch Tone Mic
This mic has a 12 digit touch tone pad on it, plus a normal low impedance microphone. With 4 pin plug. Like new. $38

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in the mic, and "speed dial". 12 digit touch tone pad on the front, with the microphone part above the pad. With an 8 pin modular plug (like a computer LAN) on it, which can be changed.
Looks to be new. $40

Speaker Microphones:

MFJ-287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the TH-21/31/41 series HTs, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug. $15

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine and works fine. $18

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. Has 3.5 mm and 2.5 mm plugs for Azden, Icom, some Yaesu, and others. $ 20

Communications Speaker
This 4 inch square speaker is optimized for communications frequencies (300 to 3000 Hz). It is in a black enclosure,

and is an 8 ohm speaker. It has a cord with a 1/8 inch
(3.5 mm) mono plug on the end.
This one works fine and looks OK also. $15

Autek QF-1 A, Active Audio Filter
This is an audio filter that goes between your rig and speaker.
It runs off of 110 V AC, and will peak, notch, or become a low
pass or high pass filter. Selectivity (bandwidth) and frequency
are adjustable from the front panel. This is the "A" model that
also has an additional notch filter added. The input is an 1/4
inch phone plug, and the output is a 1/4 inch jack on the rear
panel.
This particular unit looks very, very nice, and works 100%.
With paper work for $55.

Prices do not include shipping from Florida.

Thanks.

2180. Misc Ham Accessories FS

Yahoo group: amatuerradioswapfest
Date: 2010-06-16 12:22:47 UTC
From: Ken Simpson, W8EK
Topic: 1999 Message: 2180

Various Miscellaneous Accessory Items For Sale:

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.

Similar to the HM-102, but for VHF frequencies, with 250 and 25 watt scales. It can also be used to check SWR, and has a remote sensor that can either be left inside the meter, or separated from the actual meter. SO-239 connectors in and out.

This particular meter works great. It looks good, but has a small defect on the left side of the meter that does not effect operation.

Paper work included for $40.

Dual Meter SWR Bridges:

All of these feature two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on the antenna. They were made in Japan, and labeled with various names, including Swan, Siltronix, and Quement. All have SO-239 connectors on each end, and work fine.

All will work on HF, and VHF, covering 3 to 150 MHz, so are ideal for the new rigs that include 6 and 2 meters.

Swan SWR-1
This one is in its original box, but the meter itself says Siltronix on it. The original instruction sheet has both Swan and Siltronix on it. $45

Quement SWB-2
No box for this one, but it works fine and looks great.
With paper work for $40

SWR Bridges / Field Strength Meters:

Midland 23-126 SWR Bridge / Field Strength Meter
This is an HF SWR Bridge, but it can be used up thru 2 meters, with slightly reduced accuracy. It is also a field strength meter. SO-239 connectors.
This one works fine, and looks extremely nice. I do not see any scratches on it; it may not have ever been used. In its original box with original instructions and small telescoping antenna. $35

ThordTest SWFS-2 SWR Bridge / Field Strength Meter
Appears to be the same as the Midland above, but the outer case is beige instead of black.
In original box, with original instruction sheet, and antenna.
$30

Cables for keys and keyers:

Cable for straight key
About 3 feet long, with a mono 1/4 inch phone plug on it, as is used with a straight key. $5
As above, but 1/8 inch (3.5 mm) plug. $5

Cable for paddles
About 3 feet long, and with a 1/4 inch stereo connector on the end, like used by most rigs. $8
As above, but 1/8 inch (3.5 mm) plug $8

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter to reduce harmonic interference. Both have SO-239 connectors.

B & W FL-10/1500 low pass filter
This 50 ohm filter cuts off just above 10 meters, and will handle 1500 Watts. This is the latest model B & W filter. It is in very nice condition; it looks very close to new. With paper work $40.

B & W 425 low pass filter
It cuts off just above 10 meters, and will handle 1500+ Watts. Maximum attenuation is at 52 MHz, with at least 70 db across the band. This is an older model that seems much heavier duty. It weighs almost twice as much as the newer model, and looks like it would take more power. It even has a serial number on it, and "Patent applied for". Paper work included. $35

Drake TV-3300-LP Low Pass Filter
This is a modern low pass filter to go between your transmitter and antenna, and has been optimized to have more attenuation in the 40 MHz region, where many TVs have their IF. It is good for 1000 Watts "average" according to the manual, and has over 80 db attenuation at 41 MHz. This one looks great, and includes the paper work. $30

Power Supplies:

TenTec Model 280 power supply, 20 amps at 13 V DC.
This supply is quite heavy duty electrically.
It has 2 pass transistors, instead of the one that some have. It also has an ammeter on it.
This one works fine, and looks OK as well.
A previous owner removed the molded in TenTec power cable on the back and added very heavy binding posts,

so that it can be used with many different rigs and
not just TenTec. It also has a couple RCA jacks for
lower power use.
With paper work for $100.

"Switcher / 25" 25 amp switching power supply
This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel
around it. It is in a case that is the same size as a 243
remote VFO. It has an ammeter on the front, along with
Switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,
but says "Switcher/25" on it. It is very quiet, and well
shielded, and does not produce any electrical noise that
I could find. $150

AEA Power Supply:
AEA AC-1
"Wall wort" 12 V DC power supply at 1 amp.
Can be used with the AEA PK-232, PK-88 or others.
This unit has a 2.1 mm plug, with the center positive,
so it can be used on many different things that require
12 V DC at up to an amp, such as keyers, antenna tuners,
etc. $15

Communications Speaker
This 4 inch square speaker is optimized for communications
frequencies (300 to 3000 Hz). It is in a black enclosure,
and is an 8 ohm speaker. It has a cord with a 1/8 inch
(3.5 mm) mono plug on the end.
This one works fine and looks OK also. $15

ParaDynamics PDC-5 Wattmeter
This unit has a wattmeter with scales of 100 W, 10 W, and
1 W. It has an SWR Bridge built in, with an antenna tuner.
It was obviously made for 11 meter use, but it works well
on other frequencies. The tuner portion works fine on 10 m,
12 m, and 15 m. The wattmeter seems accurate from 20 meters
thru 10 meters.
It is physically small (only 5 X 3 X 1), so would be ideal
for portable use.
The wattmeter and antenna tuner portion work fine, however,
the SWR portion of this unit is inoperative. It looks fine. $12

Phone Patch / Digital Interface:

Heath HD-15 phone patch

This is the unit with the VU meter on the left and 3 knobs that
match the SB series to the middle and right. Low or high Z output
to the transmitter. It can also be used as an interface for PSK31,
and other digital modes.

It is in excellent condition. It has a couple of modifications that are very professionally done. There is a modular jack added for the phone line. Two RCA phono jacks have been added for speaker in and out. In both cases, they are in parallel with the original terminal strip, so either may be used. The actual meter movement has been replaced with a slightly larger, and more professional looking meter.

Paper work included for $30.

As above, but without any modifications, with paper work. $25

Waters "Universal Hybrid Coupler II" Model 3002

Most of us would likely call this a phone patch, but it is really much more than that. It does that, but also will interface with a tape recorder, and permit recording and play back of on-the-air QSOs. Nothing says that the tape recorder input must be used that way. Connect the sound card in your computer in this position, and you have a very effective interface.

Model 3002 includes a speech compressor powered by a 9 volt battery. The front panel is finished on both sides, with one side having it set in a horizontal position, and the other in a vertical position.

This was a "top of the line" unit years ago. One only found them with top stations such as Collins.

This particular unit is in really great condition.

With paper work for $100.

Coax Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

Prices do not include shipping from Florida.

Thanks.

2181. FS: 455 kHz Filter Partial Kit

Yahoo group: amatuerradioswapfest
Date: 2010-06-19 21:35:59 UTC
From: Bry Carling
Topic: 2181 Message: 2181

For Sale: 455 kHz Filter Partial Kit

This is suitable for a 250 Hz bandwidth CW filter. Has 60 dB rejection outside the pass band. Connect right after the last i.f. and before the detector in almost any receiver design.
Two pole filter design using tubes - typically like a 6AK5 and 12AX7. Can also be adapted for use with a modern transistor circuit.

Comes with all instructions, schemtic, complete article and two 455 kHz hc6u crystals.

Two sockets available for an additional $5.00 with this kit.

I currently have eight of these kits left, and they are available for $32.00 each plus shipping.

73 - Bry, AF4K

2182. Lightning Protection, Heil Shock Mount, DMM and more FS

Yahoo group: amatuerradioswapfest
Date: 2010-06-25 15:55:31 UTC
From: Ken Simpson, W8EK
Topic: 2182 Message: 2182

Lightning Protection, Microphones and Heil "Shock
Mount", DMM, SWR Bridges, Cables, and Crystals
For Sale:

Polyphaser IS-VU50HN-MA Lightning Protector

Polyphaser is well know for extremely good lightning
protection equipment. This coaxial antenna protector
is designed to be inserted in the coaxial cable at the
bottom of a tower, or just as it enters your house.
This unit has two SO-239 connectors, and is rated to
take 750 Watts and operate from 50 to 300 MHz (VHF)
and from 380 to 550 MHz (UHF).

This particular unit includes the spec sheet, and appears
that it might not have been used. It is not oxidized,
or corroded, although it appears that someone must have
measured the SWR, as it says "4.5 MHz to 54 MHz, 1.1 to
1.4" on the back.

These sell for about $75 new. Buy this one for $55.

"Blitz Bug" Lighting protectors
These are not as sophisticated as the Polyphaser above,
but still protect against lightning. Two versions are
available. One has an SO-239 connector on each end.
The other has a PL-259 on one end and an SO-239 on
the other end. Take your choice for $8 each.

Heil SM-1 Microphone "Shock Mount"

The SM-1 "Shock Mount" is Heil Sound's 8-point flexible
suspension support system that helps suppress low-frequency
rumble on the microphone line by absorbing and damping
vibrations picked up from the studio desk or console.
It is a professional suspended shock mounting system,
black in color. The SM-1 is designed for use with the
slim-line Heil Sound microphones, such as the GoldLine
GM series, HM-10-DUAL and the PR-20. Its standard 5/8"
threads mount onto the PL-2T "Topless" and other mounts,
for easy installation.

This shock mount works with the GM-5 and similar body sizes.

This particular unit works fine, and looks very close to new.
$50

Micronta 21-194 Digital Multimeter For Sale:

This DMM not only does the traditional things that DMMs do (measure voltage, current, etc.), but is also a transistor tester and a capacitance meter. Voltage ranges are up to 1000 Volts, current to 10 Amps, and capacitance to 20 microfarads.

This particular meter looks good, and functions fine on all modes except resistance.

Probes included for $15.

Linear Amp Switching Cable for Kenwood Rigs:
This cable goes from a Kenwood transceiver to a linear amplifier to switch the amp from transmit to receive. One end has a DIN connector, as is used with most Kenwood rigs. The other end has an RCA phono plug, as used by most linear amplifiers. Before using this cable, please check the switching capabilities of your transceiver.
This cable has one coax for switching the relay. $12

Cables for keys and keyers:

Cable for straight key
About 3 feet long, with a mono 1/4 inch phone plug on it, as is used with a straight key. $5
As above, but 1/8 inch (3.5 mm) plug. $5

Cable for paddles
About 3 feet long, and with a 1/4 inch stereo connector on the end, like used by most rigs. $8
As above, but 1/8 inch (3.5 mm) plug $8

Dual Meter SWR Bridges:

These feature two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on the antenna. They are from Japan, and labeled with various names, including Swan, Siltronix, and Quement. Both have SO-239 connectors on each end, and work fine.

Both will work on HF, and VHF, covering 3 to 150 MHz, so are ideal for the new rigs that include 6 and 2 meters.

Swan SWR-1
This one is in its original box, but the meter itself says Siltronix on it. The original instruction sheet has both Swan and Siltronix on it. $45

Quement SWB-2
No box for this one, but it works fine and looks great.
With paper work for $40

SWR Bridges / Field Strength Meters:

Midland 23-126 SWR Bridge / Field Strength Meter
This is an HF SWR Bridge, but it can be used up thru 2 meters, with slightly reduced accuracy. It is also a field strength meter. SO-239 connectors.
This one works fine, and looks extremely nice. I do not see any scratches on it; it may not have ever been used. In its original box with original instructions and small telescoping antenna. $35

ThordTest SWFS-2 SWR Bridge / Field Strength Meter
Appears to be the same as the Midland above, but the outer case is beige instead of black.
In original box, with original instruction sheet, and antenna.
$30

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.

Similar to the HM-102, but for VHF frequencies, with 250 and 25 watt scales. It can also be used to check SWR, and has a remote sensor that can either be left inside the meter, or separated from the actual meter.
SO-239 connectors in and out.

This particular meter works great. It looks good, but has a small defect on the left side of the meter that does not effect operation.

Paper work included for $40.

Hand Microphones:

Icom HM-12 microphone:
The HM-12 has a round 8 pin connector on it, and includes up-down switches on the top and a lock switch on the back. It is used with most of the modern Icom rigs using a round 8 pin connector.
The mic works as it should, and the mic itself looks very, very good. The cord has seen some of the Florida sun and has some deterioration. $40

Generic Hi Z Hand Microphone
This hand mic is black in color. It has a PTT switch and black coiled cord. It works fine and looks very close to new. $25

Shure 104 C, Low Z hand Microphone
This is a very heavy duty Shure mic. It appears to be new, with stripped and tinned ends that have never been on a connector. It is in its original box, with the original instruction manual. $30

Generic Hand Microphone
This is a low impedance hand microphone, black in color.
Looks and works great. With 4 pin connector. $25

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is
needed. Stripped and tinned leads.
It works fine, and looks good also. $25

DTMF Touch Tone Microphones:

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin plug. Looks to be unused. $40

KDK DM TT-1 DTMF Touch Tone Mic
This mic has a 12 digit touch tone pad on it, with a
switch to turn the pad on and off. With 4 pin plug.
It works fine, and looks great. $35

Data Signal "Data-Coder 5" Touch Tone Mic
This mic has a 12 digit touch tone pad on it, plus a normal
low impedance microphone. With 4 pin plug. Like new. $38

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in the
mic, and "speed dial". 12 digit touch tone pad on the front,
with the microphone part above the pad. With an 8 pin modular
plug (like a computer LAN) on it, which can be changed.
Looks to be new. $40

HT Speaker Microphones:

MFJ-287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits
the TH-21/31/41 series HTs, TH-215, TH-415, as well as
others. It has a 3 conductor 3.5 mm plug and a 2 conductor
2.5 mm plug. $15

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Azden SDX-316
This is the rounder style speaker mic that fits nicely in
the palm of your hand. Has 3.5 mm and 2.5 mm plugs for
Azden, Icom, some Yaesu, and others. $20

Communications Speaker:

This 4 inch square speaker is optimized for communications
frequencies (300 to 3000 Hz). It is in a black enclosure,
and is an 8 ohm speaker. It has a cord with a 1/8 inch
(3.5 mm) mono plug on the end.

This one works fine and looks OK also. $15

Coax Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

Crystals - FT-243, HC-6, etc.:

1000.00 KHz for crystal calibrator (octal plug)

FT-243 Crystals for 40, 20, 15, and 10 meter ham bands

Crystals can be used at fundamental, or multiplied for
20, 15, or 10 meters. E.g. the 7081 could be used at 7081,
14162, 21243, or 28324 KHz.

7081 (HC-6), 7094 (HC-6), 7174 (HC-6), 7175, 7186,
7189, 7198.5 (HC-6), 7200 (HC-6), 7200, 7207, 7225,
7236.2 (HC-6), 7248, 7261 (FT-243 & HC-6), 7283.33 (HC-6)
7325, 7375, 7395, 7400, 7404, 7410,

HC-6 Crystals
These may be used as heterodyning crystals in many
Collins, Drake, Heath, Yaesu, and other rigs.
Freq of crystal in MHz.
7.98, 9.5, 12.0, 12.545, 15.0, 16.0, 17.0, 24.7, 30.75,
32.5, 39.0, 41.9, 42.7, 44.5, 46.0, 46.7, 49.9, 51.1,

All crystals are $8 each, plus shipping from Florida.

I also have many 2 meter crystals in HC-25 holders.
Please e-mail your needs.

Prices do not include shipping from Florida.

Thanks.

2183. need 2m/440 mobile rig

Yahoo group: amatuerradioswapfest
Date: 2010-06-28 01:09:52 UTC
From: bartenderjim
Topic: 2183 Message: 2183

Hi all,
let me introduce myself. My name is Jim and I am new on heere. I am a member of HRHG (also on Yahoo). I was told I could probably find on here what I am looking for. I have been a tech since Mar '10. I am looking for a small 2m/440 mobile rig for my '09 Ford Focus. I have a mag mount antenna. I am looking to spend around $100-$125. All I have been using since I got my ticket is a 2m ht (old one an elmer gave me to use. Anyone have anything they think might fit my needs please give me a direct e-mail with "MOBILE RIG" in the subject line.
Thanks all for your support

2184. Original Manuals from Kenwood, Icom, Heath, etc. FS

Yahoo group: amatuerradioswapfest
Date: 2010-07-02 01:32:40 UTC
From: Ken Simpson, W8EK
Topic: 2184 Message: 2184

Original Operating and Service Manuals for Kenwood, Icom,
Heath, and others For Sale:

Original Operating Manuals for Kenwood equipment:

All manuals are in very nice condition, for Kenwood equipment.
All are original and are not copies.

BC-5 DC charger/adapter $4
HS-5 Headphones $4
LF-30A Low Pass Filter $5
MC-30 and MC-35 hand microphones $5
MC-85 desk microphone $4
PB-1, PB-2, PB-3, and PB-4 battery packs $3
PS-6 power supply $6
PS-30 power supply $5
SMC-24 speaker mic $4
SMC-25 speaker mic $4
SP-430 speaker $4
YK-88SN Narrow SSB Filter $4

Operating manual for TW-4000 dual bander $15
Service manual for TW-4000 dual bander $20
Operating manual for TH-21 HT for 2 meters $8
Operating manual for TH-225, 2 meter HT $12
Operating manual for TM-221/421 mobile $15
Operating manual for TH-241/441/541 mobile FM transceivers
..For 2 meters, 440 MHz, and 1200 MHz. $12
Operating manual for TR-2200, 2 meter "portable"
..This is very similar to the Drake TR-22. $15
Operating manual for TR-2400, 2 meter HT $12
Operating manual for TR-2500, 2 meter HT $14

These are original Kenwood manuals only.

Spanish version of the Operating Manual
for the Kenwood TM G-707 dual band transceiver
This is the original operating manual only, in Spanish.
It looks like it is quite extensive and detailed.
It is basically new, only being opened to observe that
it is in Spanish only. It is original from Kenwood.
$10
Please note: All other manuals are in English.

ORIGINAL Icom operating manuals:

Please note that all of these are original Icom manuals and
are not copies. All are in very good condition.
These are original manuals only.

BC-30 Desk Charger $5
BC-35 Desk Charger $7
BP-2, BP-3, BP-4, BP-5 battery packs $3
BP-21, BP-22, BP-23, and BP-24 Batteries $3
DC-1 DC pack for IC-2 AT series HTs $4
HM-8 Hand Microphone, w/schematic $5
IC-22 S, 2 m FM transceiver $12
IC-229, 2 meter mobile transceiver $15
IC-3 PA Power supply / speaker $10
UT-16 Voice Synthesizer $5

These are original manuals only.

ORIGINAL Heath manuals.

These are manuals/brochures/schematics only.
They are all originals, not copies, and
all are close to new condition.

Brochure "Heathkit Specials" featuring the
Twoer, Sixer, SB series, and others. $4

GD-600 Photoelectric Light Switch, 1972, $5

HW-2021 2 meter hand held transceiver
1975, No check marks $9

SB-620 Scanalyzer
Schematic Only, Large fold out page, $4

These are original manuals/brochures/schematics only.

Service Manuals:

These are service manuals (not operating manuals) in extremely
good condition.

Service Manual for Kenwood TR-9130 multimode 2 meter transceiver
This manual is a very good copy. $10

Service manual for Kenwood TW-4000 dual bander, $20

Service manual for TR-2600, 2 meter HT $12

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a service
pack. It has schematics, circuit explanations, voltages, etc. $18

Gonset Manual:
Gonset Noise Clipper Model C
This manual is an original in good condition.

It has a couple marks in one corner, otherwise
it is in good shape. $4

Prices do not include shipping from Florida.

Thanks.

2185. FS: Two 40,000 uFD Capacitors

Yahoo group: amatuerradioswapfest
Date: 2010-07-02 22:01:25 UTC
From: Bry Carling
Topic: 2185 Message: 2185

FOR SALE: Two Sangamo type DCMX computer-grade
electrolytic capacitors - Made in U.S.A.
Each is 40,000 uFD and rated at 25V DC.

These are ideal for power supplies and/or use with
high-powered mobile systems running on 13.8V DC power.

These are large, heavy duty capacitors with dimensions 6" X 3" diameter.

Will sell the pair for $15.00 plus $10.00 for USA shipping.

Bry Carling, AF4K

2186. FS: Uniden BCD-996T Good Price!

Yahoo group: amatuerradioswapfest
Date: 2010-07-04 15:46:36 UTC
From: Jeffrey
Topic: 2186 Message: 2186

Selling a Uniden BCD-996T scanner for $325.00 + Shipping which is an awesome deal! Unit is in perfect condition and works perfectly also. I have it on EBay also so if interested in it please let me know ASAP so you don't lose out.

Go on Ebay and check it out... I believe I am the only one selling one at the moment.

Jeffrey "lost-love" is my name on EBay.

2187. FS: FT171B Crystal Groups - $4.00 each

Yahoo group: amatuerradioswapfest
Date: 2010-07-05 13:27:02 UTC

FOR SALE:

The following are type FT171B Crystals: (for BC610 or T-368 transmitters)
These are normally $19.00 for each crystal...

Group 171-A - 3510, 3520, 3550, 3615, 3905, 7290 kHz - All 6 for $24.00 total.

Group 171-B - 3510, 3615, 3835, 3905, 3905, 3945 kHz - All 6 for $24.00 total.

Group 171-C - 3615, 3905, 7285, 7290, 7295, 14286 kHz - All 6 for $24.00 total.

Group 171-D - 3615, 3905 kHz - Two for $8.00 total.

The following are type CR-1A Crystals:
Group 12-C - 6820 (QTY 4), 7610, 8007.7, 8297 kHz - All 7 for $7.00 total.

DETAILS and latest listings at:
http://www.af4k.com/basementcrystals.htm

2190. HF Rig, PS, Ant Tuner, Mic, Dual Band HT, SWR Bridges, and much more FS

Yahoo group: amatuerradioswapfest
Date: 2010-07-09 12:08:47 UTC
From: Ken Simpson, W8EK
Topic: 2190 Message: 2190

TenTec 585 Paragon, Power supplies, Automatic Antenna Tuner, Desk Microphone, Dual Band HT, Cables, Lightning Protection, SWR Bridge / Wattmeters, and other items For Sale:

TenTec 585 Paragon HF Transceiver:

The Paragon is a top of the line transceiver that includes a general coverage receiver. It covers 160-10 meters, including WARC bands, with 100 watts output. The receiver is fantastic. It has dual VFOs and many memories built in, along with a speech processor. Basically, it has about every feature that a ham could want in an HF rig.

This particular unit works 100% as best I can tell. Since the rig does so many things, I am sure that there is something I didn't test, but I don't know what it is (or I would have tested it!).

Cosmetically, it is in extremely nice shape. The front panel is extremely good. Most all of the lettering is clean and crisp. There are a couple of very minor scratches on the heat sink that certainly will not be noticeable in operation.

Large manual and power cord included for $650.

TenTec Model 280 power supply, 20 amps at 13 V DC

This supply is quite heavy duty electrically.
It has 2 pass transistors, instead of the one that some have. It also has an ammeter on it.

This one works fine, and looks OK as well.
A previous owner removed the molded in TenTec power cable on the back and added very heavy binding posts, so that it can be used with many different rigs and not just TenTec. It also has a couple RCA jacks for lower power use.

With paper work for $100.

"Switcher / 25" 25 amp switching power supply
This is a 25 amp switching power supply in a case that matches the early Omni series case, with the metal bezel around it. It is in a case that is the same size as a 243 remote VFO. It has an ammeter on the front, along with Switch, TenTec logo, and output bulb. The front panel

basically looks like a 280 power supply with a metal bezel, but says "Switcher/25" on it. It is very quiet, and well shielded, and does not produce any electrical noise that I could find. $150

Icom AH-3 Automatic Antenna Tuner:

The Icom AH-3 automatic tuner will tune continuously from 1.8 MHz through 30 MHz, i.e. from the low end of the 160 meter band to top of the 10 meter band, including 60 meters and all WARC bands. The AH-3 is a full HF tuner. Note that the newer Icom AH-4 tuner is not listed to tune below 3.5 MHz, while the the AH-3 is. It requires at least 5 watts to automatically tune, and will handle up to 120 watts. It requires 13 V DC to operate.

The AH-3 works with any Icom radio with standard 4 pin rear tuner connector, such as the Icom 703, 703+, 706 series, 718, 746, 746 Pro, 756 series (including Pros), 7000, 7200, and many others. It can also be used with most any other radio with a simple interface (information provided).

This AH-3 is in excellent condition. Paper work is included for $200.

Johnson Desk Microphone
It looks like a Shure 444, except it says Johnson on the front instead of Shure, and has the Johnson logo on it. I am assuming that it is a Shure 444 that Johnson simply had their name and logo placed on it.
This one has a very nice pattern on the scope and looks extremely nice. $45

Yaesu VX-1 Dual Band HT:

This is a dual-band HT which provides small size combined with wide frequency coverage while weighing about 4 ounces.

It can produce up to 1 Watt output power in the 2 meter & 440 MHz bands. The VX-1 provides extraordinarily wide frequency receive coverage of 500-1700 kHz plus 76-999 MHz, which includes AM BC, FM BC, public safety, and audio from most TV channels. The operating mode (AM, FM-Narrow, FM-Wide) can be automatically preset.

It includes an FNB-52LI High-Capacity Lithium-Ion battery. The memory system includes two main channel groups, plus additional memories bringing the memory total to 291 channels!

To put it another way, the VX-1 will do more than most hams need!

This one includes the HT, LIon Battery, Charger, Rubber Duck antenna, and an extensive manual. It works fine, and looks very close to new. $125

Battery pack for Yaesu VX-2 or VX-3 HT
Lithium Ion Battery Pack that fits both the VX-2 and the VX-3
3.7 volts, 1200 mahr, works great, and holds a charge like new.
$15

Yaesu Hat
This "Ball Cap" has Yaesu on the front of it in big letters.
It is white and says "Yaesu" on the front, with the Yaesu
logo. It has never been used. $6

SWR Bridges / Field Strength Meters:

Midland 23-126 SWR Bridge / Field Strength Meter
This is an HF SWR Bridge, but it can be used up thru 2 meters,
with slightly reduced accuracy. It is also a field strength
meter. SO-239 connectors.
This one works fine, and looks extremely nice. I do not see
any scratches on it; it may not have ever been used. In its
original box with original instructions and small telescoping
antenna. $35

ThordTest SWFS-2 SWR Bridge / Field Strength Meter
Appears to be the same as the Midland above, but the outer
case is beige instead of black.
In original box, with original instruction sheet, and antenna.
$30

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.

Similar to the HM-102, but for VHF frequencies, with 250 and
25 watt scales. It can also be used to check SWR, and has a
remote sensor that can either be left inside the meter, or
separated from the actual meter.
SO-239 connectors in and out.

This particular meter works great. It looks good, but has a
small defect on the left side of the meter that does not
effect operation.

Paper work included for $40.

Linear Amp Switching Cable for Kenwood Rigs:
This cable goes from a Kenwood transceiver to a linear
amplifier to switch the amp from transmit to receive. One
end has a DIN connector, as is used with most Kenwood rigs.
The other end has an RCA phono plug, as used by most linear
amplifiers. Before using this cable, please check the
switching capabilities of your transceiver.
This cable has one coax for switching the relay. $12

CW Items:

Cable for straight key
About 3 feet long, with a mono 1/4 inch phone plug on it,

as is used with a straight key. $5
As above, but 1/8 inch (3.5 mm) plug. $5

Cable for paddles
About 3 feet long, and with a 1/4 inch stereo connector
on the end, like used by most rigs. $8
As above, but 1/8 inch (3.5 mm) plug $8

120 Volt AC Power cables:

These are power cables that plug in to the 120 V AC line.
They have the standard 3 prong plug on one end, and have the
"International" 3 slot socket on the other end, as is used
on most computers, plus many other pieces of electronic
equipment, such as ham gear and test equipment.

These all function fine, and look very good. Some have been
used, and some may not have been.

Buy one for $1, six for $5, or 14 for $10.

Lightning Protectors:

"Blitz Bug" Lighting protectors
These are not as sophisticated as the Polyphaser below,
but still protect against lightning. Two versions are
available. One has an SO-239 connector on each end.
The other has a PL-259 on one end and an SO-239 on
the other end. Take your choice for $8 each.

Polyphaser IS-VU50HN-MA Lightning Protector

Polyphaser is well know for extremely good lightning
protection equipment. This coaxial antenna protector
is designed to be inserted in the coaxial cable at the
bottom of a tower.
This unit has two SO-239 connectors, and is rated to take
750 Watts from 50 to 300 MHz and from 380 to 550 MHz.

This particular unit includes the spec sheet, and appears
that it might not have been used. It is not oxidized,
or corroded.

These sell for about $75 new. Buy this one for $55.

Prices do not include shipping from Florida.

Thanks.

From: Bry Carling
Topic: 2191 Message: 2191

OK - nobody wants them but I hate to throw nice things like this away.

FREE:

Two Sangamo type DCMX computer-grade electrolytic capacitors -
Made in U.S.A. Each is 40,000 uFD and rated at 25V DC.

These are ideal for power supplies and/or use with high-powered
car audio systems running on 13.8V DC power.
These are large, heavy duty capacitors with dimensions 6" X 3" diameter.

Cornell-Dubilier computer grade capacitor, 9100 uF at 35V DC.
With all mounting hardware. Dimensions: 3-3/4" X 1-3/4" diameter
Made in the USA

G.E. Dielectrol non-PCB, oil-filled capacitor 40 uF at 480V DC.
Easily good for 1000V DC.
Dimensions: 5" X 2-1/2" diameter.

FREE for postage. Just pay $12.00 for USA shipping.
Next stop will be the dumpster if they are still here on Monday.

Bry, AF4K

2193. Reduced more: BC610 Crystals

Yahoo group: amatuerradioswapfest
Date: 2010-07-13 23:03:11 UTC
From: Bry Carling
Topic: 2193 Message: 2193

Reduced even more.... some BC610 crystals need a new home:
(Type FT171B)

Someone is going to get a bargain here... if they don't sell this week I will put them back into the regular bins.

Group 171-B - 3510, 3615, 3835, 3905, 3905, 3945 kHz - All 6 for $21.00 total. (normally $19.00 each)

Group 171-D - 3615, 3905 kHz - Two for $7.00 total.
(normally $38.00 for the pair)

I hope someone can use these. I have a bunch of other FT171B crystals available for $19.00 each.

Shipping additional. E-mail me off the list please.

73 de AF4K, Brian Carling

2194. FS: Box of New Precision Power Resistors

Yahoo group: amatuerradioswapfest
Date: 2010-07-16 10:09:41 UTC
From: Bry Carling
Topic: 2194 Message: 2194

FOR SALE: Quantity 37 precision power resistors. All new and unused,
with long radial leads. Gray in color. Great for homebrew and repair projects.

QTY 8: 5 watt power resistors - all rated 1% tolerance.
Consists of seven (7) at 100 kilohms and one at 2500 ohms.

QTY 8: 2 watt power resistors - all rated 1% tolerance.
Consists of
Quantity 7 at 500 kilohms,
Quantity 1 at 9.50 kilohms

QTY 18: 1 watt power resistors - all rated 1% tolerance.
Consists of -
Quantity 1 at 2.0 Megohms,
Quantity 1 at 1.0 Megohms,
Quantity 1 at 250 kilohms,
Quantity 2 at 200 kilohms,
Quantity 4 at 100 kilohms,
Quantity 2 at 51.0 kilohms,
Quantity 2 at 22.0 kilohms,
Quantity 1 at 8.0 kilohms,
Quantity 1 at 5000 ohms,
Quantity 1 at 4560 ohms,
Quantity 3 at 4500 ohms

QTY 3: 1/2 watt power resistors - all rated 1% tolerance.
radial leads.
Quantity at 800 kilohms
Quantity at 100 kilohms
Quantity at 2700 ohms

Will sell all the above for $15.00 plus shipping

2195. FS: TAG STRIPS

Yahoo group: amatuerradioswapfest
Date: 2010-07-16 10:52:01 UTC
From: Bry Carling
Topic: 2195 Message: 2195

For Sale - Tag Strips. All are new.

These are the standard baekelite type tag strips with mounting bracket(s) and tags arranged on 3/8" centers. As used for most tube homebrewing etc.

Quantity 50 - 4-way strips - 10 cents each, plus shipping

Quantity 4 of the 5-way strips - $1.00 total plus shipping

Quantity 14 of the classy 5-way turret strips - $1.00 each plus shipping

I will list a few more soon of other sizes.

73 - Bry, AF4K

2196. Tube Intercom for sale.

Yahoo group: amatuerradioswapfest
Date: 2010-07-17 12:29:16 UTC
From: Bry Carling
Topic: 2196 Message: 2196

FOR SALE: TUBE TYPE 2-station intercom which
includes
a 12AT7 tube amplifier and two speakers. Push
button to talk. I have not tried this out, but it
looks beautifully constructed with louvered clam-
shell type cabinets.
There is a Raytheon tranformer inside and also
another transformer with no name.
Way more fun than plastic toy intercoms.
Dimensions each: 5" X 5" X 3".
Complete set available for $8.00 plus shipping.

Picture and details at:
http://www.af4k.com/chassisandcabinets.htm

73 & thanks for looking - Bry, AF4K

2197. HF Rig, PSs, Wattmeter, Vertical Antennas FS

Yahoo group: amatuerradioswapfest
Date: 2010-07-17 12:36:16 UTC
From: Ken Simpson, W8EK
Topic: 2197 Message: 2197

TenTec 585 Paragon HF Transceiver, Power Supplies, HF Digital Wattmeter, HF Vertical Antennas, and Lightning Protection For Sale:

TenTec 585 Paragon HF Transceiver:

The Paragon is a top of the line transceiver that includes a general coverage receiver. It covers 160-10 meters, including WARC bands, with 100 watts output. The receiver is fantastic. It has dual VFOs and many memories built in, along with a speech processor. Basically, it has about every feature that a ham could want in an HF rig.

This particular unit works 100% as best I can tell. Since the rig does so many things, I am sure that there is something I didn't test, but I don't know what it is (or I would have tested it!). It has had all of the "Updates" performed on it by TenTec.

Cosmetically, it is in extremely nice shape. The front panel is extremely good. Most all of the lettering is clean and crisp. There are a couple of very minor scratches on the heat sink that certainly will not be noticeable in operation.

Large manual and power cord included for $650.

TenTec Model 280 power supply, 20 amps at 13 V DC

This supply is quite heavy duty electrically.
It has 2 pass transistors, instead of the one that some have. It also has an ammeter on it.

This one works fine, and looks OK as well.
A previous owner removed the molded in TenTec power cable on the back and added very heavy binding posts, so that it can be used with many different rigs and not just TenTec. It also has a couple RCA jacks for lower power use.

With paper work for $100.

"Switcher / 25" 25 amp switching power supply
This is a 25 amp switching power supply in a case that matches the early Omni series case, with the metal bezel around it. It is in a case that is the same size as a 243 remote VFO. It has an ammeter on the front, along with Switch, TenTec logo, and output bulb. The front panel

basically looks like a 280 power supply with a metal bezel, but says "Switcher/25" on it. It is very quiet, and well shielded, and does not produce any electrical noise that I could find. $150

HF Digital Peak and Average Reading Wattmeter:

Radio Shack MTA-20 (21-527) Digital Wattmeter will read either peak or average power. It is a digital meter with no moving parts, although it does have a sort of analog bar graph on it.

It is rated to cover 1.8 thru 30 MHz, so it covers all of the HF bands. It will measure up to 2000 Watts, in ranges of 2000, 200, or 20. It will also indicate SWR, which requires at least 1/2 Watt. It has a nice back light, and requires 13 V DC for operation. There is about a 3 foot cable between the digital display and the remote sensor. This is a great meter.

This particular meter is in its original box, and appears to not have been used. It has been tested, and works fine. $100

Two HF Vertical Antennas for pick up near Ocala Florida:

These two HF Vertical antennas are located near Ocala, Florida, near I-75. They are disassembled, on the ground, ready for pickup, and reassembly at your QTH. Paper work is included, as are all parts, to the best of my knowledge. I was careful with disassembly, so it should be easy to reassemble them. Due to their size, it is just not practical to ship them.

HyGain HyTower HF Vertical Antenna:

The HyGain HyTower HF vertical covers 80, 40, 20, 15, and 10 meters. The WARC bands (and 160 meters) can be added, but are not a part of this antenna at present. This is an extremely rugged antenna, consisting of about 30 feet of actual tower, with additional stubs for tuning. Total height is about 50 feet.

Automatic band selection is achieved through a unique stub decoupling system so that an electrical 1/4 wavelength (or odd multiple) exists on all bands. Unity gain on 20, 40, 80; 2 dB on 10/15 Meters.

This particular antenna is in extremely good condition. As far as I know, all hardware is included. The galvanizing on the tower sections is very good. The hardware is all stainless and still shines, with the exception of the galvanized bolts that Rohn uses on most all of their tower to hold the sections together. I do not find any rust.

Due to size, this is pick up only, near Ocala FL, close to I-75.

This antenna sells for about $1000 new. With paper work for $450.

Gap "Titan" HF Vertical Antenna:

The Titan is an 8 Band Multiband DX Antenna. It covers 80 thru 10 meters, including the WARC bands. It covers the entire band on 40 thru 10, and about 100 KHz on 75/80 meters. It is about 25 feet tall, and includes a counterpoise, so that no radials are required.

One of the primary virtues of the Titan is the GAP center feed. By elevating the feed the earth loss is dramatically decreased, which means the RF is going out to make the contact instead of into the ground to warm the earth. Reducing the earth loss eliminates the need for a radial system. The Titan requires NO RADIALS.

This particular antenna is in extremely nice shape with no corrosion. Most of the aluminum is still shiny. If I were putting it up myself, I would clean the connections with a Scotchbrite sponge, but it is in great condition. I will even furnish the sponge!

These sell new for about $400. This one is close to new, with paper work for $250. Pick up only near Ocala FL.

Lightning Protectors:

"Blitz Bug" Lighting protectors
These are not as sophisticated as the Polyphaser below, but still protect against lightning. Two versions are available. One has an SO-239 connector on each end. The other has a PL-259 on one end and an SO-239 on the other end. Take your choice for $8 each.

Polyphaser IS-VU50HN-MA Lightning Protector

Polyphaser is well know for extremely good lightning protection equipment. This coaxial antenna protector is designed to be inserted in the coaxial cable at the bottom of a tower.
This unit has two SO-239 connectors, and is rated to take 750 Watts from 50 to 300 MHz and from 380 to 550 MHz.

This particular unit includes the spec sheet, and appears that it might not have been used. It is not oxidized, or corroded.

These sell for about $75 new. Buy this one for $55.

Prices do not include shipping from Florida.

Thanks.

2198. FS: Conar Twins - collector quality

Yahoo group: amatuerradioswapfest
Date: 2010-07-21 12:22:18 UTC
From: Bry Carling
Topic: 2198 Message: 2198

FOR SALE: CONAR Transmitter and Receiver

Extra sharp and collector quality...

Conar 400 Transmitter - 25 watts on 80m, 40m and 15m bands.
Usesa 6DQ6 sweep tube. Crystal controlled, runs on 120V AC.
These were both part of an NRI training course. Looks like new.
Would rate this transmitter a 10 out of 10. It has not been tested.

Conar 500 Receiver. Beautiful front panel. A few marks on the top
but not bad. Runs on 120V AC. Receives AM, SSB and CW. Covers
bands: 80m, 40m and 15m - full coverage. Built-in speaker, and
headphones
output. Controls for volume, variable BFO, antenna trimmer etc.
Front panel is excellent and overall would rate this receiver
9 out of 10. It has not been tested.

These come with copies of the manuals.
Excellent condition. Pictures will be posted soon at:
http://www.af4k.com/radios.htm

Will sell the pair for $250.00 plus shipping

Transmitter Book Online:

http://www.af4k.com/Conar/Conar%20manuals/TX.pdf

Receiver Book Online:

http://www.af4k.com/Conar/Conar%20manuals/conarrxmanual.html

WD0HCO's old Conar web page is here...

2199. FS: Panel Meters and Ceramic couplers

Yahoo group: amatuerradioswapfest
Date: 2010-07-21 12:45:03 UTC
From: Bry Carling
Topic: 2199 Message: 2199

FOR SALE:

Two small black Westinghouse panel meters. Excellent.
These are 2-1/4" square with rounded corners. 2" diameter mounting hole.

One each:

0 - 200 mA DC

0 - 150V DC
(FSD 100 uA, with series resistor for 150V DC)

Available for $5.00 each plus shipping

ALSO Group of Ceramic couplers - three ceramic, one bakelite.
For use with 1/4" shafts. made by G.E. and National Excellent condition.
Will sell all four for $10.00 plus shipping.

Regards - Brian, AF4K

2200. FS: 7160 kHz crystals for AM etc.

Yahoo group: amatuerradioswapfest
Date: 2010-07-25 00:29:37 UTC
From: Bry Carling
Topic: 2200 Message: 2200

For Sale: 7160 kHz FT-243 crystals for AM

Now available on the popular AM "mid-band calling frequency..."

Also for 40m AM -
7155, 7156, 7159, 7165, 7167, 7170, 7172, 7173, 7174, 7175, 7176, 7177,
7179 kHz
7180, 7185, 7187, 7188, 7190, 7192, 7193, 7195, 7199, 7200, 7203, 7204,
7205 kHz
7206, 7206.7, 7207, 7209, 7211, 7212, 7213, 7214, 7215, 7217, 7220, 7221,
7222 kHz
7224.4, 7225, 7226, 7229, 7232, 7233, 7237, 7238.9, 7240, 7241, 7242,
7243, 7243.5 kHz
7243.7, 7246, 7248, 7249, 7250, 7252.5, 7255, 7256.25, 7258, 7260, 7262,
7273, 7275 kHz
7279, 7280, 7281.5, 7285, 7286, 7287, 7288, 7289, 7290, 7291, 7293, 7295,
7297 kHz etc.

(Some of these will make great multipliers onto 10m AM also...)

Many other FT243 crystals are available at:

http://www.af4k.com/crystals.htm

Available for $14.00 each plus shipping.

73 & thanks for looking,

Brian, AF4K

2205. Ant Tuners, Wattmeters/SWR, Digital Interfaces, DMM and more FS

Yahoo group: amatuerradioswapfest
Date: 2010-08-08 17:03:46 UTC
From: Ken Simpson, W8EK
Topic: 2205 Message: 2205

Antenna Tuners, Wattmeters / SWR Bridges, Packet TNC, Digital Interfaces, Lightning Protection, DMM, Cables For Sale:

TenTec 238 Roller Inductor Antenna Tuner:

This HF antenna tuner will handle the full legal limit, and will match almost anything. It is rated to match loads up to 3000 ohms.

It is an "L" network, which means that there is only one correct matching point, and not false readings like some tuners. It has a roller inductor that permits matching all HF bands, including the WARC bands.

In addition to the tuner, it also includes a wattmeter with 200 and 2000 watt scales, plus SWR bridge. There is also an antenna switch built in, so this unit will handle all of your antenna needs.

This particular unit works fine, and looks extremely nice. I can not find a scratch or defect on it. With paper work for $395.

MFJ 949 E Antenna Tuner

The MFJ-949E deluxe 300 watt Versa Tuner II gives you full coverage from 1.8 to 30 MHz, with a peak and average reading cross-needle SWR/power meter. It features a custom designed inductor switch, 1000 volt tuning capacitors, Teflon insulation washers and proper L/C ratio to ensure arc-free operation with up to 300 Watts. MFJ's Cross-Needle Meter shows you SWR, forward and reflected power simultaneously. It reads both peak and average power on 300 or 30 watt ranges. A dummy load is built in. It includes an antenna switch for the two coaxial cables and one random wire or balanced line, in addition to the dummy load. It needs 12 V DC to illuminate the meter.

This is the current model that MFJ is selling. This particular unit works fine, and looks close to new. With paper work for $125.

MFJ 815 B Cross Needle Wattmeter:

The MFJ-815B cross-needle meter allows you to monitor both forward and reflected power, and SWR simultaneously. There are buttons to select either Peak or Average reading and power ranges of 200/2000 watts forward and 50/500 watts reflected. Frequency coverage is 1.8 to 60 MHz, so it covers 6 meters in addition to the HF bands, making it ideal for some of the new rigs that include 6 meters.

The peak reading function of this meter and meter light
require external 12 V DC.

This particular unit works fine, and looks very close to new.
With paper work for $65.

MFJ 815 (not the B model) similar to above.
It works fine, and looks good. With paper work for $50.

SWR Bridges / Field Strength Meters:

Midland 23-126 SWR Bridge / Field Strength Meter
This is an HF SWR Bridge, but it can be used up thru 2 meters,
with slightly reduced accuracy. It is also a field strength
meter. SO-239 connectors.
This one works fine, and looks extremely nice. I do not see
any scratches on it; it may not have ever been used. In its
original box with original instructions and small telescoping
antenna. $35

ThordTest SWFS-2 SWR Bridge / Field Strength Meter
Appears to be the same as the Midland above, but the outer
case is beige instead of black.
In original box, with original instruction sheet, and antenna.
$30

AEA PK-88, Packet Terminal Node Controller
This unit is a hardware interface between your computer and your
rig. It has actual hardware, instead of using computer software
to generate and decode the signal. Using the PK-88 is like using
a real modem, as opposed to a "WinModem" for internet access.
The PK-88 has good filtering, and does a super job on Packet.
Of course it can also be used for APRS.
This one works fine and looks fine also. Actually, it looks close
to new; I can not find a scratch on it.
The big thick manual is included, as is the computer cable, radio
to TNC cable, and power cable, all in the original box, for $65.

AEA AC-1
"Wall wort" 12 V DC power supply at 1 amp.
Can be used with the AEA PK-232, PK-88 or others.
This unit has a 2.1 mm plug, with the center positive,
so it can be used on many different things that require
12 V DC at up to an amp, such as keyers, antenna tuners,
etc. $17

AEA "Wall cube" as above, but only 1/2 amp rating,
which is enough for the PK-88. $12

Heath HD-15 phone patch / digital interface

This is the unit with the VU meter on the left and 3 knobs that
match the SB series to the middle and right. Low or high Z output

to the transmitter. It can also be used as an interface for PSK31, and other digital modes, using it as a sound card interface.

It is in excellent condition. It has a couple of modifications that are very professionally done. There is a modular jack added for the phone line. Two RCA phono jacks have been added for speaker in and out. In both cases, they are in parallel with the original terminal strip, so either may be used. The actual meter movement has been replaced with a slightly larger, and more professional looking meter.

Paper work included for $30.

HD-15 as above, but without the nice modifications. Everything is original. No scratches or imperfections. $25

Waters "Universal Hybrid Coupler II" Model 3002:

Most of us would likely call this a phone patch, but it is really much more than that. It does that, but also will interface with a tape recorder, and permit recording and play back of on-the-air QSOs. Nothing says that the tape recorder input must be used that way. Connect the sound card in your computer in this position, and you have a very effective interface.

Model 3002 includes a speech compressor powered by a 9 volt battery. The front panel is finished on both sides, with one side having it set in a horizontal position, and the other in a vertical position.

This was a "top of the line" unit years ago. One only found them with top stations such as Collins.

This particular unit is in really great condition.

With paper work for $100.

Lightning Protectors:

"Blitz Bug" Lighting protectors
These are not as sophisticated as the Polyphaser below, but still protect against lightning. Two versions are available. One has an SO-239 connector on each end. The other has a PL-259 on one end and an SO-239 on the other end. Take your choice for $8 each.

Polyphaser IS-VU50HN-MA Lightning Protector

Polyphaser is well know for extremely good lightning protection equipment. This coaxial antenna protector is designed to be inserted in the coaxial cable at the bottom of a tower.
This unit has two SO-239 connectors, and is rated to take

750 Watts from 50 to 300 MHz and from 380 to 550 MHz.

This particular unit includes the spec sheet, and appears that it might not have been used. It is not oxidized, or corroded.

These sell for about $75 new. Buy this one for $55.

Micronta 21-194 Digital Multimeter:

This DMM not only does the traditional things that DMMs do (measure voltage, current, etc.), but is also a transistor tester and a capacitance meter. Voltage ranges are up to 1000 Volts, current to 10 Amps, and capacitance to 20 microfarads.

This particular meter looks good, and functions fine on all modes except resistance.

Probes included for $15.

Linear Amp Switching Cable for Kenwood Rigs:
This cable goes from a Kenwood transceiver to a linear amplifier to switch the amp from transmit to receive. One end has a DIN connector, as is used with most Kenwood rigs. The other end has an RCA phono plug, as used by most linear amplifiers. Before using this cable, please check the switching capabilities of your transceiver.
This cable has one coax for switching the relay. $12

Cables for keys and keyers:

Cable for straight key
About 3 feet long, with a mono 1/4 inch phone plug on it, as is used with a straight key. $5
As above, but 1/8 inch (3.5 mm) plug. $5

Cable for paddles
About 3 feet long, and with a 1/4 inch stereo connector on the end, like used by most rigs. $8
As above, but 1/8 inch (3.5 mm) plug $8

Coax Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long. It has a male type "N" connector on each end. $15

Prices do not include shipping from Florida.

Thanks.

2206. HT accessories and related items FS

Yahoo group: amatuerradioswapfest
Date: 2010-08-13 13:49:56 UTC
From: Ken Simpson, W8EK
Topic: 2206 Message: 2206

HT Accessories, and VHF/UHF related equipment for sale,
such as Protective Cases, GPS for APRS, Speaker Microphones,
Batteries, Belt Clips, Wrist Straps, Rubber Ducks, Wattmeters,
Power Cables, DMM, and much more:

Yaesu HT Accessories:

FNB-52 LI Lithium Battery for VX-1
Fits VX-1 dual band HT. It works fine. Holds a good charge
and is in good health. $25

CSC-71 Case for VX-1 dual band HT
Close to new condition. No visible wear. $16

FBA-20 "Empty battery Pack" for VX-1
Takes a single AA cell, which can be alkaline, NiCad, NiMH,
etc. Like new. $18

Battery pack for Yaesu VX-2 or VX-3 HT
Lithium Ion Battery Pack that fits both the VX-2 and the
VX-3. 3.7 volts, 1200 mahr, works great, and holds a charge
like new. $15

Belt Clip for Yaesu FT-207, with hardware. $8

Wrist Strap for Yaesu FT-209, and probably others $4

Yaesu Hat
This "Ball Cap" has Yaesu on the front of it in big letters.
It is white and says "Yaesu" on the front, with the Yaesu
logo. It has never been used. $6

Speaker Microphones:

MFJ-287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits
the TH-21/31/41 series HTs, TH-215, TH-415, as well as
others. It has a 3 conductor 3.5 mm plug and a 2 conductor
2.5 mm plug. Coiled cord is somewhat stretched, but it
works fine. $12

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Azden SDX-316
This is the rounder style speaker mic that fits nicely in
the palm of your hand. Has 3.5 mm and 2.5 mm plugs for

Azden, Icom, some Yaesu, and others. $ 20

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC Regular length, 6 1/2 inches long
BNC - Original from Kenwood TH-215 HT, 5 inches long
Alinco Stubby w/BNC Connector, 4.6 inches long

5/16 inch threaded, like used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15

BNC Stubby for 440 MHz, 3 inches long

Protective Cases:

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger
PB-1 and PB-4 battery packs. It can also be used with
the smaller PB-2 and PB-3 packs. Black color. Great
condition. $15

Case for Drake TR-33C
This is the black case that fits the Drake TR-33C, and has
cutouts in the back for antenna, power, etc. It includes
the shoulder strap, and is in good shape. $12

Case for Drake TR-22
As above, but for the TR-22. No shoulder strap. $10

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap. $25

Earthmate GPS by DeLorme, with software

The GPS unit plugs into a USB port on your computer.
DeLorme Street Atlas Software is included, so plan your
route, and also let the GPS tell you where you are, and

give you voice directions, if desired. You can even ask
it questions!

It will calculate your route and tell you exactly where
and when to turn, plus figure statistics such as mileage.

The GPS hardware unit is powered from the USB port, so no
additional power supply is needed.

This particular unit is in close to new condition, in its
original box, with the GPS unit, and the software. I would
think that it could be used with APRS. $65

Accessories for the Kenwood TR-2400 HT:

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
This adapter can be used on any HT with a BNC connector. $5

Belt clip for TR-2400 HT, complete with hardware - $8

Wrist strap for TR-2400, and most other HTs - $4

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the
Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually,
one must have the battery inside the HT, but this lets you charge
a second battery outside of the HT. The original charger is used.
It is in good shape, and works fine. $3

Santec HT Accessories:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap.
The case itself is in very nice shape. The leather
shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a
service pack. It has schematics, circuit explanations,
voltages, etc. $18

Accessories for Kenwood TH-205, TH-215, TH-225, TH-415,
and other HTs in that series:

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1 and PB-4 battery packs. It can also be used with the smaller PB-2 and PB-3 packs. Black color. Great condition. $15

MFJ-287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the TH-21/31/41 series HTs, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug. Coiled cord is somewhat stretched, but works fine. $12

Dead PB-2 Battery for rebuilding, or use the case to adapt other batteries. Looks fine.
For Kenwood TH-205, TH-215, TH-415, TH-225, etc.
Two available. $6 each.
Buy both for $10.

Kenwood Wall Wort Charger for PB-2. $12

Kenwood BH-2 Belt clip with screws
Used on many Kenwood HTs. $8

Kenwood Wrist Strap for TH-215, plus many other HTs. $4

Original Kenwood Rubber Duck antenna from Kenwood TH-215. $10

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. (BNC male to UHF female) $5

Accessories for the Azden PCS-300 HTs:

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. Has 3.5 mm and 2.5 mm plugs for Azden, Icom, some Yaesu, and others. It works great, and looks great also. $20

Battery charge adapter for Azden PCS-300 HT
This is an adapter that permits one to charge the battery of the Azden PCS-300, 2 meter HT, outside of the HT itself. Usually, one must have the battery inside the HT, but this lets you charge a second battery outside of the HT. The original charger is used. If you have a PCS-300 HT, you need this adapter.
It works fine, and looks like new. $3

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. This adapter can be used on any HT with a BNC connector. $5

Battery pack for Yaesu VX-2 or VX-3 HT
Lithium Ion Battery Pack that fits both the VX-2 and the VX-3
3.7 volts, 1200 mahr, works great, and holds a charge like new.
$15

Dead Battery Packs:

Please note that all of these battery packs are dead. There
is no voltage from them. They are being sold for the purpose
of rebuilding, or to be used to build a regulator in them,
or whatever.

Batteries for Icom 2AT, 3 AT, 4 AT, 02AT, 03AT. 04AT, 24,
and others:
BP-2, looks very nice $5
BP-3, looks like it may have gotten warm, and may be slightly
deformed $4
BP-4, "Empty case" for alkalines, etc. Needs cleaning. $8
BP-5, larger pack, looks good, but has former owners call
sign scratched in case, $5
Buy all four of the above for $20.

Dead Kenwood PB-2 Battery for rebuilding, or use the case to
adapt other batteries. Looks fine.
For Kenwood TH-205, TH-215, TH-415, TH-225, etc.
Two available. $6 each.
Buy both for $10.

Belt Clips:
All include the hardware with the belt clip and are $8 each.
Kenwood BH-2 for Kenwood TH-215 / 225 / 415, etc.
Kenwood BH-3 for Kenwood TH-21 / 31 / 41 series HTs
Kenwood TR-2400
Motorola
Yaesu FT-207

Wrist Straps for various HTs - $4 each
Kenwood TH-215 / 225 / 415, etc.
Kenwood TR-2400
Yaesu FT-209

Micronta 21-194 Digital Multimeter:

This DMM not only does the traditional things that DMMs do
(measure voltage, current, etc.), but is also a transistor
tester and a capacitance meter. Voltage ranges are up to
1000 Volts, current to 10 Amps, and capacitance to 20
microfarads.

This particular meter looks good, and functions fine on all
modes except resistance.

Probes included for $15.

Prices do not include shipping from Florida.

Thanks.

2207. Special Pricing on Many Ham Publications

Yahoo group: amatuerradioswapfest
Date: 2010-08-13 15:08:36 UTC
From: Ken Simpson, W8EK
Topic: 2207 Message: 2207

SPECIAL PRICING ---

I need to clear out some of these books. For the rest of August, I will offer a 5% discount if you buy one publication, 10% if you buy two, 15% of you buy three and 20% if you buy four or more.

ARRL Handbooks, IC Book, Operating Books, Digital and Satellite Books, Licensing Books, Electronics Text Books, TI Books and other Ham Related Publications For Sale:

ARRL Handbooks:

The first one is in the smaller format (6 1/2 by 9 1/2 inch size). It includes tube charts and ads for vintage equipment, which are not in the newer handbooks.
1977 - 54th edition - Good condition $10

More modern, larger 8 1/2 by 11 inch format:
1981, 58th edition, Nice shape $13
2000, 77th edition, Very nice, 2 inch thick book $20

ARRL Learning to Work with Integrated Circuits, First edition $10

The Radio Amateur's Digital Communications Handbook
By KR3T, J Mayo, Hardback Book Published by Tab
Like New, 208 pages, $12

ARRL How to Become a Radio Amateur, 1970, 26th edition, This book is in extremely nice, close to new condition, with many vintage ads in the back. It has a lot of good information, and is collectible. $15

ARRL Radio Frequency Interference, First Edition, $10

The ARRL RFI Book
Practical Cures for Radio Frequency Interference
First Edition, Large 8 1/2 X 11, inch thick, 320 page book, $12

Tab Books: "Oscar: The Ham Radio Satellites"
by recent silent key Dave Ingram, K4TWJ
First Edition, Hardback, Like new $15

ARRL "Radio Amateurs Operating Manual", 2nd edition, $8

RSGB "Amateur Radio Operating Manual", 2nd edition, $8

ARRL Amateur Radio Field Resources Directory
First edition, $7

ARRL "FCC Rulebook"
Seventh edition, $3
Eighth Edition, $4
As above, but "Newly Revised to include Codeless
.....Technician" - Like New, $6
13th edition $10

W5YI
"Ham Operator Education Package" $4
"Rules and Regulations - Part 97 Amateur Radio Service"
Fourth Edition $3
17th Revised Edition $4

ARRL Understanding Amateur Radio
1977, no edition number listed, $8

Bash Book
This is the book that started it all, back in the 1970's.
"General Class Test Guide, The Final Exam" listing the
General Class questions and answers. Nice condition. $8

ARRL Operating an Amateur Radio Station
57th edition, 58th edition, 61st edition, 62nd edition, $3 each
63rd edition $4

ARRL Public Service Communications
Ninth edition, $3
no edition number listed, $3

CQ: The Packet Radio Operators Manual
By Buck Rogers, K4ABT, Close to new condition, $14

Your Packet Companion by Steve Ford, WB8IMY
ARRL, 1995, First Edition, $5

The Radio Amateur's Digital Communications Handbook
By KR3T, J Mayo, Published by Tab, Hardback Book,
Like New, 208 pages, 1992, $12

The Packet Radio Operators Manual published by CQ
By Buck Rogers, K4ABT, 1995, Close to new condition, $12

Tab Books:
"Oscar: The Ham Radio Satellites"
by recent silent key Dave Ingram, K4TWJ
First Edition, Hardback, Like new, $14

ARRL Technician Class Computerized Exam Review
Complete with Disk and Book, still sealed in package, $10

ARRL License Manuals - $3 each
1977, 76th edition, All classes
1979, 77th edition, All classes
1984, 79th edition, All classes

1984, 80th edition, All classes

Technician Class
1989, First Edition
1993, Second Edition

General Class
1989, First Edition
1997, Second Edition

Advanced Class
1985, First Edition
1990, Third Edition
1996, Fourth Edition

Extra Class, 1988, Third edition

General Class License Manual by Gordon West, WB6NOA
Second Edition - Like New - $3
Fifth Edition - Like new - $5

Upgrade to General Class by Don Stoner, W6TNS
1992 - $4

Advanced Class License Manual by Gordon West, WB6NOA
"New Edition" - Second Edition - 1995 - $4

ARRL Radio Amateurs Operating Manual
1985, 2nd edition, $8

Electronics Text Books:

The following books are often used as text books at the two year community and technical college level.

Experiments in Electrical Circuit Analysis, Schuler
About 200 pages, including programs. $50

Study Guide for Electronics Fundamentals, McIntyre
Paper back with about 200 pages of study material w/answers. $15

Understanding Electricity and Electronics Student Lab Guide by Science Electronics, 135 page paper back $12

Computers by Long and Long
Large book with about 750 pages. Answers to problems included. Like new. $20

A Guide to Managing and Maintaining Your PC by Andrews
Sometimes used for A+ computer certification. About 750 pages, plus CD. Like new. $30

Ameco Ham Publications:

These are all Ameco Publications that are in
extremely nice condition.

Ameco "Novice License Radio Amateur FCC Test Manual"
1984, like new $4

Ameco "Amateur Radio Novice Class Theory Course"
Far more in depth than the test manual.
First Edition, 1978 $5

Ameco "Complete Technician Radio Amateur FCC Test Manual"
1992 $3

Ameco "General Class Radio Amateur FCC Test Manual"
1984, Like new $4
As above, but includes 1988 questions and answers $4

Ameco "Advanced Class Radio Amateur License Guide"
First Edition, 1981, like new $5

Ameco "Advanced Class Radio Amateur FCC Test Manual"
Copyright 1987, with added 1991 material
First Edition, Like New $6

Texas Instruments Data Books:

The following Texas Instrument Data Books are available.
All are in very nice, close to new, condition, with
very little use.

Analog Applications Journal, $2 each
August 1999
Nov 1999
Feb 2000
May 2000
August 2000
Nov 2000

AHC/AHCT Designer's Guide, June 1999 $2

Mixed-Signal and Analog Products Designer's Guide
And Reference w/CD, January 1999 $4

Analog and Mixed Signal Products Designer's Guide
And Reference, August 1999 $3

Logic Selection Guide, August 1998 $4

BiCMOS Bus Logic Interface, 1988 $2

Prices do not include shipping from Florida.

Thanks.

2208. Wattmeters and SWR Bridges FS

Yahoo group: amatuerradioswapfest
Date: 2010-08-15 12:10:33 UTC
From: Ken Simpson, W8EK
Topic: 1317 Message: 2208

Wattmeters and SWR Bridges For Sale:

HF Digital Peak and Average Reading Wattmeter:

Radio Shack MTA-20 (21-527) Digital Wattmeter will read either peak or average power. It is a digital meter with no moving parts, although it does have a sort of analog bar graph on it.

It is rated to cover 1.8 thru 30 MHz, so it covers all of the HF bands. It will measure up to 2000 Watts, in ranges of 2000, 200, or 20. It will also indicate SWR, which requires at least 1/2 Watt. It has a nice back light, and requires 13 V DC for operation. There is about a 3 foot cable between the digital display and the remote sensor. This is a great meter.

This particular meter is in its original box, and appears to not have been used. It has been tested, and works fine. $100

MFJ 815 B Cross Needle Wattmeter:

The MFJ-815B cross-needle meter allows you to monitor both forward and reflected power, and SWR simultaneously. There are buttons to select either Peak or Average reading and power ranges of 200/2000 watts forward and 50/500 watts reflected. Frequency coverage is 1.8 to 60 MHz, so it covers 6 meters in addition to the HF bands, making it ideal for some of the new rigs that include 6 meters.
The peak reading function of this meter and meter light require external 12 V DC.

This particular unit works fine, and looks very close to new. With paper work for $65.

MFJ 815 (not the B model) similar to above.
It works fine, and looks good. With paper work for $50.

SWR Bridges:

Dual Meter SWR Bridges:

These feature two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on the antenna. They are from Japan, and labeled with various names, including Swan, Siltronix, and Quement. Both have SO-239 connectors on each end, and work fine.

Both will work on HF, and VHF, covering 3 to 150 MHz, so are ideal for the new rigs that include 6 and 2 meters.

Swan SWR-1
This one is in its original box, but the meter itself says Siltronix on it. The original instruction sheet has both Swan and Siltronix on it. This item was purchase earlier, but the "package smashers" got to it, and the right edge of the meter on the right side has a portion of the lens broken off. The meter still functions fine. $30

Quement SWB-2
No box for this one, but it works fine and looks great. With paper work for $40

Single meter SWR Bridges / Field Strength Meters:

Midland 23-126 Single Meter SWR Bridge / Field Strength Meter
This is an HF SWR Bridge, but it can be used up thru 2 meters, with slightly reduced accuracy. It is also a field strength meter. SO-239 connectors.
This one works fine, and looks extremely nice. I do not see any scratches on it; it may not have ever been used. In its original box with original instructions and small telescoping antenna. $32

ThordTest SWFS-2 SWR Bridge / Field Strength Meter
Appears to be the same as the Midland above, but the outer case is beige instead of black.
In original box, with original instruction sheet, and antenna. $30

Lightning Protectors:

"Blitz Bug" Lighting protectors
These are not as sophisticated as the Polyphaser below, but still protect against lightning. Two versions are available. One has an SO-239 connector on each end. The other has a PL-259 on one end and an SO-239 on the other end. Take your choice for $8 each.

Polyphaser IS-VU50HN-MA Lightning Protector

Polyphaser is well know for extremely good lightning protection equipment. This coaxial antenna protector is designed to be inserted in the coaxial cable at the bottom of a tower.
This unit has two SO-239 connectors, and is rated to take 750 Watts from 50 to 300 MHz and from 380 to 550 MHz.

This particular unit includes the spec sheet, and appears that it might not have been used. It is not oxidized, or corroded. $55.

Prices do not include shipping from Florida.

Thanks.

2211. FS: Box of TUBE ERA pilot lamps and some bulbs

Yahoo group: amatuerradioswapfest
Date: 2010-08-21 16:18:30 UTC
From: Bry Carling
Topic: 2211 Message: 2211

FOR SALE: TUBE ERA pilot lamps and some bulbs....

This is a box of about 35 or 40 various bayonet style tube era pilot lights as used in commercial radio transmitters, receivers, test equipment etc. typical lamp holders, some panel mount, some not.

Also a bunch of behind-the-panel type screw in and bayonet fitting lamps, and a few bulbs for them too. These are typical like #44, #51, grain-of-wheat bulbs etc. Red, blue, green and white jeweled lenses etc. includes some plastic standoffs and phenolic terminal strips etc.

Will sell the whole box for $12.00 plus $6.00 for USA shipping.

73 - Brian, AF4K

2213. EF Johnson Insulators

Yahoo group: amatuerradioswapfest
Date: 2010-08-22 17:42:20 UTC
From: Bry Carling
Topic: 2213 Message: 2213

For auction - a pair of nice old EF Johnson Number 20 standoff insulators.

White ceramic pair with height 2" and the base is 1-3/4" X 1-1/8" oval with two mounting holes. They come with all of the hardware - nuts and solder tag terminals for attaching several wires on the top of each insulator. Great for high voltage RF projects etc.

These are both complete and in excellent, used condition.

eBay listing number 110576814470

73 & thanks for looking!

HI guys,

I am looking to buy a pair of new 6L6GC tubes or similar. I would also have some great tunes ot trade or swap for other amateur items.
I can supply a list if anyone has said tubes for trade,. I need these for a Fender guitar amplifier which runs some fairly high plate voltage.

What do you have please?

Thanks & 73 - Bry

2215. Microphones For Sale

Yahoo group: amatuerradioswapfest
Date: 2010-08-27 20:00:39 UTC
From: Ken Simpson, W8EK
Topic: 2215 Message: 2215

Several Microphones For Sale:

RCA equivalent to a Shure 444 desk microphone
Although the front of this mic says RCA on it, it looks like a Shure 444, and has a controlled magnetic element in it just like the Shure 444. My assumption is that it is a 444 with an RCA label.
Of course most of us know that the 444 is an extremely good communications microphone with great articulation.
This one works fine, and looks very nice. It has a 4 pin connector on it. $50

TenTec 705 desk microphone
This electret desk mic has the 4 pin connector, with PTT and "hold" buttons. It works great, and looks like new.
With paper work for $75.

Collins MM-1 Mobile Microphone
The Collins MM-1 is a pressure-operated dynamic microphone designed to fit your hand comfortably. This mike is engineered for maximum voice response, and its die-cast case is finished in brushed satin chrome. With its mounting button on the front, the MM-1 slips easily into a dashboard bracket supplied with the mike. When the MM-1 is removed from the dashboard bracket, the microphone is in position for instant transmission. A coiled cord is supplied with the 22-ounce microphone. The MM-1 has a frequency response from 200-10,000 cycles per second and has an output level of -48 db.
This one works fine; there are a couple extremely small pits (smaller than a pin head) on the chrome, but it looks very good. The coiled cord is a bit stiffer than when it was new.
With PJ-068 connector (0.206 inch plug) for $100.

Shure 104 C, Low Z hand Microphone
This is a very heavy duty Shure mic. It appears to be new, with stripped and tinned ends that have never been on a connector. It is in its original box, with the original instruction manual. $30

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance can be used any place a dynamic mic is needed. Stripped and tinned leads.
It works fine, and looks good also. $25

DTMF Touch Tone Microphones:

KDK DM TT-1 DTMF Touch Tone Microphone
This mic has a 12 digit touch tone pad on it, along with a switch to turn the pad on and off. I presently has a 4 pin plug on it, and can be used on most any rig. It works fine, and looks great. $35

CES 655 L "Microdialer" DTMF Microphone
You can manual dial a number, or automatically have it stored in the mic, and "speed dial" with this mic. 12 digit touch tone pad on the front, with the microphone part above the pad. This one presently has a 4 pin plug on it, but of course that can be changed. $35

CES 600 L, Universal DTMF microphone
This has a normal touch tone pad on the front, with a low impedance microphone. This one has the 8 pin modular plug (like a computer LAN) on it. This mic has not been used, so it is in really great condition. With paper work for $40.

Data Signal "Data-Coder 5" touch tone mic
This mic has a 12 digit touchtone pad on it, plus a normal low impedance microphone. With 4 pin plug. Like new. $38

Speaker Microphones:

MFJ-287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the TH-21/31/41 series HTs, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug. Coiled cord is somewhat stretched, but it works fine. $12

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine and works fine. $18

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. Has 3.5 mm and 2.5 mm plugs for Azden, Icom, some Yaesu, and others. $ 20

Prices do not include shipping from Florida.

Thanks.

2216. Wattmeters and SWR Bridges FS

Yahoo group: amatuerradioswapfest
Date: 2010-08-29 19:05:22 UTC
From: Ken Simpson, W8EK
Topic: 1317 Message: 2216

Wattmeters and SWR Bridges For Sale:

M C Jones VHF/UHF Wattmeter:

This MC Jones Wattmeter is a vintage unit, probably from just after WW II. At that time, it was the gold standard of wattmeters, basically equivalent to a Bird today.

This particular meter has N connectors in and out. It reads 12 Watts full scale in the forward position, and 4 Watts full scale in reflected. It also has an SWR calibrate and SWR scale on the meter. I think the frequency range is from 20 to 1000 MHz, but I am not 100% positive of that. It works well on 2 meters and 440 MHz. The RF sensor unit inside is model 576.3.

This one functions fine, and looks extremely nice for its age.
$60

MFJ 815 Cross Needle Wattmeter:

The MFJ-815 cross-needle meter allows you to monitor both forward and reflected power, and SWR simultaneously. There are buttons to select power ranges of 20/200/2000 watts forward and 5/50/500 watts reflected.
Frequency coverage is 1.8 to 60 MHz, so it covers 6 meters in addition to the HF bands, making it ideal for some of the new rigs that include 6 meters.
There is a meter light that requires a source of 12 V DC.

This particular unit works fine, and looks extremely good.
With paper work for $50.

HF Digital Peak and Average Reading Wattmeter:

Radio Shack MTA-20 (21-527) Digital Wattmeter will read either peak or average power. It is a digital meter with no moving parts, although it does have a sort of analog bar graph on it.

It is rated to cover 1.8 thru 30 MHz, so it covers all of the HF bands. It will measure up to 2000 Watts, in ranges of 2000, 200, or 20. It will also indicate SWR, which requires at least 1/2 Watt. It has a nice back light, and requires 13 V DC for operation. There is about a 3 foot cable between the digital display and the remote sensor. This is a great meter.

This particular meter is in its original box, and appears to not have been used. It has been tested, and works fine. $100

ParaDynamics PDC-5 Wattmeter / Antenna Tuner:

This unit has a wattmeter with scales of 100 W, 10 W, and
1 W with an antenna tuner built in.
The tuner portion works on 10 m, 12 m, and 15 m.
The wattmeter seems accurate from 20 meters thru 10 meters.

It is physically small (only 5 X 3 X 1), so would be ideal
for portable use.

The wattmeter and antenna tuner portion work fine, however,
the SWR portion of this unit is inoperative. It looks great.
$12

SWR Bridges:

Quement SWB-2 Dual Meter
This unit features two separate meters -- one for reading forward
power and another for reading SWR. This permits one to easily
monitor both the power going out, and the SWR on the antenna.
It has SO-239 connectors on each end.
It will work on HF, and VHF, covering 3 to 150 MHz, so is
ideal for the new rigs that include 6 and 2 meters.
Works fine and looks great. With paper work for $40

ThordTest SWFS-2 SWR Bridge / Field Strength Meter
This is an HF SWR Bridge, but it can be used up thru 2 meters,
with slightly reduced accuracy. It is also a field strength
meter. SO-239 connectors.
This one works fine, and looks extremely nice. It is in original
box, with original instruction sheet, and antenna. $30

Lightning Protectors:

"Blitz Bug" Lighting protectors
These are not as sophisticated as the Polyphaser below,
but still protect against lightning. Two versions are
available. One has an SO-239 connector on each end.
The other has a PL-259 on one end and an SO-239 on
the other end. Take your choice for $8 each.

Polyphaser IS-VU50HN-MA Lightning Protector

Polyphaser is well know for extremely good lightning
protection equipment. This coaxial antenna protector
is designed to be inserted in the coaxial cable at the
bottom of a tower.
This unit has two SO-239 connectors, and is rated to take
750 Watts from 50 to 300 MHz and from 380 to 550 MHz.

This particular unit includes the spec sheet, and appears
that it might not have been used. It is not oxidized,
or corroded. $55.

Coaxial Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

Prices do not include shipping from Florida.

Thanks.

2217. Tower and antenna related items FS

Yahoo group: amatuerradioswapfest
Date: 2010-09-04 14:35:34 UTC
From: Ken Simpson, W8EK
Topic: 2217 Message: 2217

Antennas and related items For Sale:
Tower, Mast, Full Power Antenna Tuner, Wattmeters and SWR Bridges, Lightning Protectors, VHF and UHF Mobile antennas, Coax Connectors, etc.

The first two items are pickup only near Ocala, Florida, close to I-75. The other items can be shipped.

Antenna tower:

A total of 35 feet of antenna tower is available, consisting of one top section, 2 "middle" sections, and a 5 foot section for the base.

This tower is "American" tower, which has a horizontal brace about every 22 inches. It is suitable for VHF antennas, very large TV antennas, or small tribanders.

This particular tower is in good condition, although there is some slight surface rust.

It is pickup only near Ocala, FL, just off of I-75. $125

Heavy Duty Antenna Mast:

18 foot long heavy duty galvanized antenna mast.
2 inch OD with 1/4 inch wall.
This is heavy! But also very strong!

It is in good condition and is located near Ocala Florida, near I-75. $125

TenTec 238 Roller Inductor Antenna Tuner:

This HF antenna tuner will handle the full legal limit, and will match almost anything. It is rated to match loads up to 3000 ohms.

It is an "L" network, which means that there is only one correct matching point, and not false readings like some tuners. It has a roller inductor that permits matching all HF bands, including the WARC bands.

In addition to the tuner, it also includes a wattmeter with 200 and 2000 watt scales, plus SWR bridge. There is also an antenna switch built in, so this unit will handle all of your antenna needs.

This particular unit works fine, and looks extremely nice. I can not find a scratch or defect on it. With paper work for $395.

M C Jones VHF/UHF Wattmeter:

This MC Jones Wattmeter is a vintage unit, probably from just after WW II. At that time, it was the gold standard of wattmeters, basically equivalent to a Bird today.

This particular meter has N connectors in and out. It reads 12 Watts full scale in the forward position, and 4 Watts full scale in reflected. It also has an SWR calibrate and SWR scale on the meter. I think the frequency range is from 20 to 1000 MHz, but I am not 100% positive of that. It works well on 2 meters and 440 MHz. The RF sensor unit inside is model 576.3.

This one functions fine, and looks extremely nice for its age. $60

MFJ 815 Cross Needle Wattmeter
The MFJ-815 cross-needle meter allows you to monitor both forward and reflected power, and SWR simultaneously. There are buttons to select power ranges of 20/200/2000 watts forward and 5/50/500 watts reflected.
Frequency coverage is 1.8 to 60 MHz, so it covers 6 meters in addition to the HF bands, making it ideal for some of the new rigs that include 6 meters.
There is a meter light that requires a source of 12 V DC.
This particular unit works fine, and looks extremely good.
With paper work for $50.

HF Digital Peak and Average Reading Wattmeter:

Radio Shack MTA-20 (21-527) Digital Wattmeter will read either peak or average power. It is a digital meter with no moving parts, although it does have a sort of analog bar graph on it.

It is rated to cover 1.8 thru 30 MHz, so it covers all of the HF bands. It will measure up to 2000 Watts, in ranges of 2000, 200, or 20. It will also indicate SWR, which requires at least 1/2 Watt. It has a nice back light, and requires 13 V DC for operation. There is about a 3 foot cable between the digital display and the remote sensor. This is a great meter.

This particular meter is in its original box, and appears to not have been used. It has been tested, and works fine. $100

ParaDynamics PDC-5 Wattmeter
This unit has a wattmeter with scales of 100 W, 10 W, and 1 W. It has an SWR Bridge built in, with an antenna tuner. It was obviously made for 11 meter use, but it works well on other frequencies. The tuner portion works fine on 10 m, 12 m, and 15 m. The wattmeter seems accurate from 20 meters thru 10 meters.
It is physically small (only 5 X 3 X 1), so would be ideal for portable use.

The wattmeter and antenna tuner portion work fine, however,
the SWR portion of this unit is inoperative. It looks fine. $12

SWR Bridges:

Quement SWB-2 Dual Meter
This unit features two separate meters -- one for reading forward
power and another for reading SWR. This permits one to easily
monitor both the power going out, and the SWR on the antenna.
It has SO-239 connectors on each end.
It will work on HF, and VHF, covering 3 to 150 MHz, so is
ideal for the new rigs that include 6 and 2 meters.
Works fine and looks great. With paper work for $40

ThordTest SWFS-2 SWR Bridge / Field Strength Meter
Appears to be the same as the Midland above, but the outer case
is beige instead of black.
In original box, with original instruction sheet, and antenna.
$30

Lightning Protectors:

"Blitz Bug" Lighting protectors
These are not as sophisticated as the Polyphaser below,
but still protect against lightning. Two versions are
available. One has an SO-239 connector on each end.
The other has a PL-259 on one end and an SO-239 on
the other end. Take your choice for $8 each.

Polyphaser IS-VU50HN-MA Lightning Protector

Polyphaser is well know for extremely good lightning
protection equipment. This coaxial antenna protector
is designed to be inserted in the coaxial cable at the
bottom of a tower.
This unit has two SO-239 connectors, and is rated to take
750 Watts from 50 to 300 MHz and from 380 to 550 MHz.

This particular unit includes the spec sheet, and appears
that it might not have been used. It is not oxidized,
or corroded.

These sell for about $75 new. Buy this one for $55.

Larsen LM type VHF and UHF Mobile Antennas:

Antennas are used, but in very good condition.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 meters; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on
the 70 cm band. Stacked whip is included. $12

Larsen LM-150, 2 meter antenna for Larsen LM Mount
Has 3 db gain on 2 meters.
This coil is still in its original box, and appears to
never have been used. It even has its rubber washer with
it, along with instructions.
Coil only for $20.
Coil, with 4 foot used whip. $26

Larsen Q Quarter Wave Antenna
Fits a 5/16 inch stud, such as the Larsen LM mount,
and others. It can be cut for 2 meters, 220 MHz, or
450 MHz bands. $9

Avanti "On Glass" antenna for 440 MHz:
This antenna was made by Avanti to mount on a windshield,
or other glass. It does not require a ground plane, as
it is a 1/2 wave antenna, rated to have 3 db gain. It is
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.
Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Coaxial Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

Coax connectors and adapters:

Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male for coax cable
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $3

BNC "T" - two female and one male - $3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5
-
UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Antenna adapter for Kenwood TH-21/31/41 HTs
Adapts the antenna connector found on these HTs to a
standard PL-259 connector. $8

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC Regular length, 6 1/2 inches long
BNC - Original from Kenwood TH-215, 5 inches long
Alinco Stubby w/BNC Connector, 4.6 inches long

5/16 inch threaded, like used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15

BNC Stubby for 440 MHz, 3 inches long

Prices do not include shipping from Florida.

Thanks.

2218. 2 m HT and other HT related accessories FS

Yahoo group: amatuerradioswapfest
Date: 2010-09-05 12:52:09 UTC
From: Ken Simpson, W8EK
Topic: 2218 Message: 2218

Two meter HT, HT Accessories, and VHF/UHF related equipment for sale, such as Protective Cases, Speaker Microphones, Batteries, Belt Clips, Wrist Straps, Rubber Ducks, DMM, and much more:

ADI-201, 2 meter HT:

The ADI-201 is a really great HT. It features up to 5 watts power output (actually about 5 W, 2.5 W and 0.3 W in three power ranges). It can be powered by many different voltages from 5 V to 16 V DC, producing different power outputs. It covers not only the 2 meter band, but also receives in the public service bands, including the weather frequencies, so it is ideal for such things as Skywarn. It has full tone capabilities, handling subaudible CTCSS PL tone encode and decode, along with some paging functions. DTMF tones are also available. Of course it has 40 memories, scan features, and all of the things one would expect in a modern 2 meter HT.

This particular HT has the 12 V high power battery with it. It looks very, very good (I can not find a scratch on it), and works 100%. It includes the HT, a rubber duck antenna, belt clip, wrist strap, charger, and paper work for $75.

Yaesu HT Accessories:

Real Yaesu Battery pack for Yaesu VX-2 or VX-3 HT
FNB-82 LI Lithium Ion Battery Pack fits both the VX-2 and the VX-3. 3.7 volts, 1000 mahr, works great, and holds a charge like new. $22

FNB-52 LI Lithium Battery for VX-1 HT
Fits VX-1 dual band HT. It works fine. Holds a good charge and is in good health. $25

CSC-71 Case for VX-1 dual band HT
Close to new condition. No visible wear. $16

FBA-20 "Empty battery Pack" for VX-1
Takes a single AA cell, which can be alkaline, NiCad, NiMH, etc. Like new. $18

Belt Clip for Yaesu FT-207, with hardware. $8

Wrist Strap for Yaesu FT-209, and probably others $4

Yaesu Hat
This "Ball Cap" has Yaesu on the front of it in big letters. It is white and says "Yaesu" on the front, with the Yaesu

logo. It has never been used. $6

Speaker Microphones:

MFJ-287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the TH-21/31/41 series HTs, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug. Coiled cord is somewhat stretched, but it works fine. $12

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine and works fine. $18

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. Has 3.5 mm and 2.5 mm plugs for Azden, Icom, some Yaesu, and others. $ 20

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC Regular length, 6 1/2 inches long
BNC - Original from Kenwood TH-215 HT, 5 inches long
Alinco Stubby w/BNC Connector, 4.6 inches long

5/16 inch threaded, like used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15

BNC Stubby for 440 MHz, 3 inches long

Protective Cases:

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1 and PB-4 battery packs. It can also be used with the smaller PB-2 and PB-3 packs. Black color. Great condition. $15

Case for Drake TR-33C
This is the black case that fits the Drake TR-33C, and has

cutouts in the back for antenna, power, etc. It includes
the shoulder strap, and is in good shape. $12

Case for Drake TR-22
As above, but for the TR-22. No shoulder strap. $10

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap. $25

Accessories for the Kenwood TR-2400 HT:

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
This adapter can be used on any HT with a BNC connector. $5

Belt clip for TR-2400 HT, complete with hardware - $8

Wrist strap for TR-2400, and most other HTs - $4

Battery charge cable for Kenwood TR-2400 HT
This is an adapter that permits one to charge the battery of the
Kenwood TR-2400, 2 meter HT, outside of the HT itself. Usually,
one must have the battery inside the HT, but this lets you charge
a second battery outside of the HT. The original charger is used.
It is in good shape, and works fine. $3

Santec HT Accessories:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap.
The case itself is in very nice shape. The leather
shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a
service pack. It has schematics, circuit explanations,
voltages, etc. $18

Accessories for Kenwood TH-205, TH-215, TH-225, TH-415,
and other HTs in that series:

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1 and PB-4 battery packs. It can also be used with the smaller PB-2 and PB-3 packs. Black color. Great condition. $15

MFJ-287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the TH-21/31/41 series HTs, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug. Coiled cord is somewhat stretched, but works fine. $12

Kenwood BC-2 Wall Wort Charger for PB-2. $12

Kenwood BH-2 Belt clip with screws
Used on many Kenwood HTs. $8

Kenwood Wrist Strap for TH-215, plus many other HTs. $4

Original Kenwood Rubber Duck antenna from Kenwood TH-215. $10

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. (BNC male to UHF female) $5

Accessories for the Azden PCS-300 HTs:

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. Has 3.5 mm and 2.5 mm plugs for Azden, Icom, some Yaesu, and others. It works great, and looks great also. $20

Battery charge adapter for Azden PCS-300 HT
This is an adapter that permits one to charge the battery of the Azden PCS-300, 2 meter HT, outside of the HT itself. Usually, one must have the battery inside the HT, but this lets you charge a second battery outside of the HT. The original charger is used. If you have a PCS-300 HT, you need this adapter.
It works fine, and looks like new. $3

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. This adapter can be used on any HT with a BNC connector. $5

Battery pack for Yaesu VX-2 or VX-3 HT
Lithium Ion Battery Pack that fits both the VX-2 and the VX-3 3.7 volts, 1200 mahr, works great, and holds a charge like new. $15

Dead Battery Packs:

Please note that all of these battery packs are dead. There is no voltage from them. They are being sold for the purpose of rebuilding, or to be used to build a regulator in them, or whatever.

Batteries for Icom 2AT, 3 AT, 4 AT, 02AT, 03AT. 04AT, 24, and others:
BP-2, looks very nice $5
BP-3, looks like it may have gotten warm, and may be slightly deformed $4
BP-4, "Empty case" for alkalines, etc. Needs cleaning. $8
BP-5, larger pack, looks good, but has former owners call sign scratched in case, $5
Buy all four of the above for $20.

Belt Clips:
All include the hardware with the belt clip and are $8 each.
Kenwood BH-2 for Kenwood TH-215 / 225 / 415, etc.
Kenwood BH-3 for Kenwood TH-21 / 31 / 41 series HTs
Kenwood TR-2400
Motorola
Yaesu FT-207

Wrist Straps for various HTs - $4 each
Kenwood TH-215 / 225 / 415, etc.
Kenwood TR-2400
Yaesu FT-209

Micronta 21-194 Digital Multimeter:

This DMM not only does the traditional things that DMMs do (measure voltage, current, etc.), but is also a transistor tester and a capacitance meter. Voltage ranges are up to 1000 Volts, current to 10 Amps, and capacitance to 20 microfarads.

This particular meter looks good, and functions fine on all modes except resistance.

Probes included for $15.

Prices do not include shipping from Florida.

Thanks.

2219. Antenna Tower, Mast, Analyzer, Wattmeters, Mics and more FS

Yahoo group: amatuerradioswapfest
Date: 2010-09-11 14:05:43 UTC
From: Ken Simpson, W8EK
Topic: 2219 Message: 2219

Antenna Tower, Antenna Mast, Antenna Analyzer, Wattmeters, Microphones, 19 inch rack shelves, etc. For Sale:

Antenna tower:

A total of 35 feet of antenna tower is available, consisting of one top section, 2 "middle" sections, and a 5 foot section for the base.

This tower is "American" tower, which has a horizontal brace about every 22 inches. It is suitable for VHF antennas, very large TV antennas, or small tribanders.

This particular tower is in good condition, although there is some slight surface rust. $125

Heavy Duty Antenna Mast:

18 foot long heavy duty galvanized antenna mast.
2 inch OD with 1/4 inch wall.
This is heavy! But also very strong! $125

The above two items are pick up only near Ocala, FL, close to I-75. The items below can be shipped.

Antenna Analyzer:

MFJ 249 Antenna Analyzer:

This antenna analyzer covers from 1.8 to 170 MHz, so it covers all of the HF bands, plus 6 and 2 meters.

Use this unit to find your antennas true resonant frequency. Trim dipoles and verticals. Adjust your Yagi, quad, loop and other antennas, change antenna spacing and height and watch SWR, resistance and reactance change instantly. Perfectly tune critical HF mobile antennas in seconds. Take the guesswork out of building and adjusting matching networks and baluns. You can determine velocity factor, coax cable loss in dB, length of coax and distance to a short or open in feet. You can read SWR, return loss and reflection coefficient. Two line LCD screen clearly displays your information. Built-in frequency counter.

This particular unit works fine, and looks extremely nice. With paper work for $150.

Lightning Protector:

Polyphaser IS-VU50HN-MA Lightning Protector

Polyphaser is well know for extremely good lightning
protection equipment. This coaxial antenna protector
is designed to be inserted in the coaxial cable at the
bottom of a tower.
This unit has two SO-239 connectors, and is rated to take
750 Watts from 50 to 300 MHz and from 380 to 550 MHz.

This particular unit includes the spec sheet, and appears
that it might not have been used. It is not oxidized,
or corroded. $55.

M C Jones VHF/UHF Wattmeter:

This MC Jones Wattmeter is a vintage unit, probably from just
after WW II. At that time, it was the gold standard of
wattmeters, basically equivalent to a Bird today.

This particular meter has N connectors in and out. It reads 12
Watts full scale in the forward position, and 4 Watts full scale
in reflected. It also has an SWR calibrate and SWR scale on the
meter. I think the frequency range is from 20 to 1000 MHz, but I
am not 100% positive of that. It works well on 2 meters and 440
MHz. The RF sensor unit inside is model 576.3.

This one functions fine, and looks extremely nice for its age.
$60

MFJ 815 Cross Needle Wattmeter:

The MFJ-815 cross-needle meter allows you to monitor both
forward and reflected power, and SWR simultaneously. There
are buttons to select power ranges of 20/200/2000 watts
forward and 5/50/500 watts reflected.
Frequency coverage is 1.8 to 60 MHz, so it covers 6 meters
in addition to the HF bands, making it ideal for some of
the new rigs that include 6 meters.
There is a meter light that requires a source of 12 V DC.

This particular unit works fine, and looks extremely good.
With paper work for $50 plus shipping from Florida.

SWR Bridge:

Quement SWB-2 HF and VHF Dual Meter SWR Bridge
This unit features two separate meters -- one for reading forward
power and another for reading SWR. This permits one to easily
monitor both the power going out, and the SWR on the antenna.
It has SO-239 connectors on each end.
It will work on HF, and VHF, covering 3 to 150 MHz, so is
ideal for the new rigs that include 6 and 2 meters.
Works fine and looks great. With paper work for $40

Desk Microphone:
RCA equivalent to a Shure 444 desk microphone
Although the front of this mic says RCA on it, it looks like a Shure 444, and has a controlled magnetic element in it just like a Shure 444. My assumption is that it is a 444 with an RCA label.
Of course most of us know that the 444 is an extremely good communications microphone with great articulation.
This one works fine, and looks very nice. It has a 4 pin connector on it. $50

Hand Microphones:

Collins MM-1 Mobile Microphone
The Collins MM-1 is a pressure-operated dynamic microphone designed to fit your hand comfortably. This mike is engineered for maximum voice response, and its die-cast case is finished in brushed satin chrome.
This one works fine; there are a couple extremely small pits (smaller than a pin head) on the chrome, but it looks very good. The coiled cord is a bit stiffer than when it was new.
With PJ-068 connector for $100.

Shure 104 C, Low Z hand Microphone
This is a very heavy duty Shure mic. It appears to be new, with stripped and tinned ends that have never been on a connector. It is in its original box, with the original instruction manual. $30

Lafayette EAM-15 dynamic hand microphone
2000 ohm impedance. Stripped and tinned leads.
It works fine, and looks good also. $25

19 inch Relay Rack Shelves:

This black shelf in made to fit a standard 19 inch relay rack. The shelf itself is 17 5/8 inches wide (standard width for inside of the rack) by 18 inches. It attaches to the rack so that 4 inches of it extends in front of the rack and 14 inches behind the rack (or you could reverse it for 14 inches in front and 4 behind). It has vent holes so that equipment that is set on it can get some air. It requires 4 inches of rack space.

It is similar to one seen here
http://www.l-com.com/item.aspx?id=8487
or
http://www.rackmounts.com/Middle-Atlantic-U2MS-DF2984.html
except 4 inches of it extends past the mounting point.

These are in extremely good condition. I can not find a scratch on them. They look new. Two are available. Buy one for $35, or both together for $65.

Astron RS-12 A, 13.8 Volt DC Power Supply:

This power supply is rated at 9 amps continuous and 12 amps ICS.
It is ideal for most 2 meter rigs, including the 50 Watt rigs.

This Astron power supply features solid-state electronic
regulation, EMI filter, fold back current limiting for protection
from excessive current and shorted output, and crowbar over-voltage
protection.

This particular supply works 100% and looks the same. I can not find
a scratch on it. With paper work for $50.

Prices do not include shipping from Florida.

Thanks.

2220. WTB: Manual for Genave GTX-800

Yahoo group: amatuerradioswapfest
Date: 2010-09-11 19:40:06 UTC
From: W5HW
Topic: 2220 Message: 2220

Looking for a copy of the manual for my Genave GTX-800.
Will gladly pay cost of copying and mailing, or a reasonable
price you might ask for it.

Please email me at w5hw_harry@...

I am one of those people who made the mistake of
lending my manual to someone to copy, and never
got it back. Have been looking for years for another
copy, but no luck so far.

73,

Harry

2221. FS: Power - Bleeder Resistors

Yahoo group: amatuerradioswapfest
Date: 2010-09-25 15:25:26 UTC
From: Bry Carling
Topic: 2221 Message: 2221

FOR SALE: Power - Bleeder Resistors

All are quality, USA made NOS parts -

50,000 ohms at 100 watts = $20.00
25,000 ohms w/slider at 100 watts = $22.00
25,000 ohms at 100 watts = $20.00
25,000 ohms at 75 watts = $18.00
25,000 ohms at 50 watts = $16.00
24,000 ohms at 72 watts = $18.00
20,000 ohms at 100 watts = $20.00
20,000 ohms at 50 watts = $16.00
18,000 ohms at 86 watts = $18.00
18,000 ohms at 55 watts = $15.00
16,000 ohms at 50 watts = $15.00
15,000 ohms at 120 watts = $18.00
15,000 ohms at 72 watts = $16.00
14,000 ohms at 50 watts = $16.00 (QTY 2)
12,000 ohms at 116 watts = $18.00
12,000 ohms at 75 watts = $16.00
12,000 ohms at 68 watts = $14.00
12,000 ohms at 40 watts = $10.00
12,000 ohms at 30 watts = $8.00

Shipping additional

2223. FS: Two BC610 crystals for 80m

Yahoo group: amatuerradioswapfest
Date: 2010-10-04 11:51:08 UTC
From: Bry Carling
Topic: 2223 Message: 2223

FOR SALE: Two original BC610 crystals for 80m band.

These are the larger old crystals in the FT171B cases... 3/4" pin spacing
and a handle on top.

One is on 3615 kHz, and the other one is on 3905 kHz.
Good working condition.

Will sell as a pair only - for $20.00 plus shipping.

(normally sell for $19.00 each)

Contact via e-mail: bcarling@...
or check the other crystals at my web site:

2225. FS: Plate & Filament Power Transformer

Yahoo group: amatuerradioswapfest
Date: 2010-10-04 18:41:15 UTC
From: Bry Carling
Topic: 2225 Message: 2225

FOR SALE: Brand New, old stock Military Surplus Plate Transformer.

Gray potted upright style transformer. Manufactured by Tensor Electric.
Primaries:
103, 115, 126V AC at 57 to 440 Hz

Secondaries:
6.3V AV at 9 Amps
5.0V AC at 2 Amps
465V AC c.t. at 75 mA - VERY conservatively rated.
Will easily supply 150 mA DC and about 200-300 mA ICAS.
Dimensions: 4-1/4" X 3-5/8" X 4-1/2" tall with four #10
threaded mounting studs.

QTY 1 available for $20.00 plus shipping.

73 - Bry, AF4K

2226. FS: UTC S-70 Filament Transformer

Yahoo group: amatuerradioswapfest
Date: 2010-10-04 18:53:04 UTC
From: Bry Carling
Topic: 2226 Message: 2226

FOR SALE: UTC model S-70 Filament Transformer.

Classic gray potted upright style transformer with the beveled corners.
Lightly used and in good working condition. These vintage UTC
transformers typically sell for around $100 each on eBay.
Here is a guy selling a pair of rusty ones for $259.00 - item # 310154251173

Primaries:
105 and 115V AC

TWO Secondaries:
Each is 6.3V c.t. at 5 Amps

PRI:1500V HIPOT
SEC:3000V HIPOT
CT 6.3V 5A x2
50~60Hz

Dimensions: 4-1/2" X 3-1/8" X 3-7/8" tall with four ears that
have mounting holes.

QTY 1 available for $35.00 plus shipping.

2228. FS: AM & CW ops - Nearly Free, old FT243 crystals

Yahoo group: amatuerradioswapfest
Date: 2010-10-08 22:17:13 UTC
From: Bry Carling
Topic: 2228 Message: 2228

FOR SALE:

Groups of original old FT243 crystals. Great for experiments
needing some reliable WW2-era rocks for those who prefer them.
Hard to beat and hard to find. They just need a home!

GROUP 6 - SIX (6) FT243 crystals - original ones on
7125, 7140, 7206, 7200, 7202, 7243 kHz
Available for just $6.00 total for all six plus shipping.

GROUP 7 - SEVEN (7) FT243 crystals - original ones on
7125, 7140, 7173, 7229, 7242, 7274, 7291 kHz
Available for just $7.00 total for all seven plus shipping.

GROUP 8 - EIGHT (8) FT243 CRYSTALS - original ones on
7125, 7140, 7167, 7205, 7221, 7248, 7291, 7297 kHz
Available for just $8.00 total for all eight plus shipping.

You can order directly on line. Or e-mail me.

Many other ham band FT243 crystals, new and old available.
See:
http://www.af4k.com/basementcrystals.htm

2229. Nearly Free Ham Band Crystals II

Yahoo group: amatuerradioswapfest
Date: 2010-10-11 12:48:51 UTC
From: Bry Carling
Topic: 2229 Message: 2229

Thank you to everyone who responded about the groups of crystals. They were all sold. I have a few more if anyone is interested, great for homebrewing and experimenting "AM CW delight" - as follows:

(these will only be sold as groups)

GROUP 1 - hc16 crystals on: 7174, 7185, 7200, 7212, 7244 kHz
Available for $5.00 plus shipping

GROUP 2 - hc16 crystals on: 28444, 28444, 28555, 28735, 28785, 28866, 29011, 29444 kHz
Available for $8.00 plus shipping

GROUP 3 - FT243 crystals on 7073, 7100, 7125, 7140, 7175, 7200, 225, 7244, 7275, 7286 kHz
Available for $12.00 plus shipping

GROUP 4 - FT243 Crystals on 7075, 7100, 7106.7, 7125, 7140, 7173, 7175, 7224, 7275 kHz
Available for $12.00 plus shipping

GROUP 5 - FT243 Crystals on 7073, 7125, 7125, 7140, 7151, 7174, 7175, 7200, 7225, 7300 kHz
Available for $12.00 plus shipping

Contact me off the list via e-mail please...

From: kd6rhr
Topic: 2230 Message: 2230

I have a very clean and good operating KW-107 SuperMatch tuner swr/wattmeter and dummy load with original manual and a printout with more info also. Asking $150 + shipping $20. or make offer
I can email pictures upon request my email is kd6rhr at yahoo dot com.

2231. FS: Large box of Cinch-Jones Connectors

Yahoo group: amatuerradioswapfest
Date: 2010-10-16 19:25:07 UTC
From: Bry Carling
Topic: 2231 Message: 2231

FOR SALE: Box of Cinch-Jones Connectors

Approximately 90 pieces, everywhere from 2-pins to 15 pins.
Some are cable-end types, others are chassis mount. Many are
in pairs (M-F) - many of these parts are new, several are used, but all
are in great shape, and they come in very handy around the ham shack.

Will sell the entire box for $40.00 plus $12.00 for USA shipping.

From: Bry Carling
Topic: 2236 Message: 2236

FOR SALE:

NEW IN BOX FT243 Crystals on 1030 kHz - $5.00 each (QTY 10 available)

NEW IN BOX FT243 Crystal on 1475 kHz - $5.00 (QTY 1 available)

GROUP OF SIX panel mount fuse holders - traditional cartridge fuse sizes.
various shapes, but all pretty standard. All for $6.00 plus shipping.

RCA 6197 tubes - QTY 4 available. New in boxes. $2.00 each plus shipping.

RCA 5651 tubes - QTY 2 available. New in boxes. $2.00 each plus shipping.

Sylvania 5963 tubes - QTY 2 available. New in boxes. $3.00 each plus
shipping.

JUNK BOXES (!!) - may include caps, power supplies, tubes, resistors,
plugs,
adapters, crystals, variable capacitors, fuses, hardware etc. These will fill a
medium sized Priority mail flat rate box to USA for $15.00 plus $13.00
shipping.
Easily worth at least $60.00 by anyone's reckoning.
QTY 4 available for $15.00 plus shipping.

HIGH Voltage terminal - plug and socket for panel mount of up to 5 KV
cables to RF PA etc.
QTY 1 available for $2.00 plus shipping.

PAIR OF special UHF diodes - type 1N21B as used in microwave
applications and prized by
crystal set builders. Will sell the pair for $5.00 plus shipping.

BOX of ten air variable capacitors with 1/4" shafts. Various PFs. Mostly
medium - low power
devices and most will be max of about 20 pf to 300 pF.
Will sell all for $20.00 plus shipping

STANCOR P-8359 p[ower transformer, new in box.
117V at 60 Cy. primary, SEC = 12.6V CT at 3.0 A
Available for $6.00 plus shipping

Pair of No. 20 ceramic standoffs by EF Johnson, conical, with two screw
mounts.
Height is 2". Width is 1-5/8" - has stud-nut and solder tag terminals on top.
Will sell the pair for just $4.00 plus shipping.

Group of TEN type CR-1A crystals from WW2 - most are not in the ham
bands - a few may be.

Will sell as a group for $10.00 plus shipping.

GROUP of TEN type FT243 Crystals WW2-era original types in the 40 meter ham band.
FREQs = 7000, 7075, 7100, 7125, 7140, 7173.3, 7175, 7185, 7222, 7275 kHz
A great value at $20.00 plus shipping for the entire group. (normally $14 each!)

PAIR of RF Chokes. 2.5 mH multi-pile types as typically used in low level transmitter stages or
in receivers, about 1" long X 1-1/2" diameter pilings, plus length of leads attached. Good,
used condition. Will sell the pair for $4.00 plus shipping.

QTY 4 new Octal sockets, with ground tags. Will sell all four for $6.00 plus shipping.

QTY 4 used Octal sockets, with ground tags. Good condition. Will sell all four for $4.00 plus shipping.

QTY 4 new LOCTAL sockets. Will sell all four for $8.00 plus shipping.

hc6u Crystal Sockets, ceramic - available for $4.00 each or FOUR for $12.00

QTY 8 - Phenolic, NEW 5-way terminal strips. Traditional turret style, great for homebrewing.
Dimensions, 2-/12' X 1/2" with 5 turrets. Wrap, solder, bingo, perfection. 2 sets available.
Will sell group of 8 for $16.00 plus shipping.

CS-137 crystal case from WW2 era. Good condition. Has been painted a darker green but still quite usable and in good shape.
Holds QTY 120 type FT243 crystals. Available for $15.00 plus shipping.

Combine items to save on shipping costs.

73 & thanks for looking - Bry, AF4K

2238. FS: Isolation Transformers

Yahoo group: amatuerradioswapfest
Date: 2010-11-01 12:54:27 UTC
From: Bry Carling
Topic: 2238 Message: 2238

FOR SALE:

1000 watt Isolation Transformer. for 120V AC.

by Northlake Engineering Co. This is a 1:1 transformer.
120V AC in = 120V AC out. Very conservatively rated.
Actually is rated for 12 Amps (1400 watts.)

Has four IEC outlets and heavy duty power cable.
Heavy gauge, light gray metal case with rubber feet.
Like new condition.

Has a nice breaker switch for power ON/OFF.

Available for $45.00 each plus shipping

2239. HF Rigs, Power Supplies, Tuner FS

Yahoo group: amatuerradioswapfest
Date: 2010-11-03 20:41:53 UTC
From: Ken Simpson, W8EK
Topic: 2239 Message: 2239

Several HF Transceivers, Power Supplies and Antenna
Tuner For Sale:

Icom IC-706 Mk II G 160 thru 2 meter transceiver:

The '706' Series represents one of the most popular transceivers in amateur radio histroy. The latest version is the incredibly small Icom IC-706 Mark II G which adds many new features and capabilities not found in previous versions. The "G" is an all-mode transceiver that provides 100 watts on HF and 6 meters and 50 watts on 2 meters plus 20 watts on 440 MHz. It receives from 30 kHz to 199 MHz and from 400 to 470 MHz. It features a removable, remoteable, front panel that allows control of all features. The large LCD display features alphanumeric memory names (9 character) and soft key descriptions. The LCD even supports a simple band scope display. Other advanced features include: IF Shift, RIT, Tone Squelch, Scanning, Noise Blanker, Speech Compressor, Mini Spectrum Scope and Electronic Keyer. This latest version in the 706 series includes the UT-106 DSP module as a standard feature. Despite its compact size (6.56" x 2.28" x 7.88"), it has big, easy to use control dials. With HM-103 hand mic. One or two optional filters may be added.

Features
* .03-199, 400-470 MHz Receive
* Alpha memories
* RIT
* Preamp/ATT
* VFO A/B
* 1 Hz Display
* IF Shift
* Scanning
* S/RF Meter
* 100 Watts HF+6M
* 50 Watts 2M, 20 Watts 440
* 100 Memories
* All band Multimode
* Removable head
* Mini Spectrum Scope
* Electronic Keyer

This one works 100% as best I can determine. It looks extremely nice. Microphone and paper work is included for $650.

Kenwood TS-440 S / AT, 100 Watt HF transceiver:

The Kenwood TS-440S/AT was designed for superior performance in the SSB, CW, AM, FM and AFSK modes. An automatic antenna tuner is built in. Coverage is 160 through 10 meters including the WARC bands with 100 watts (40W AM). It includes such things as notch filter, individual selection of optional crystal filters, digital readout, memories, scan capabilities, IF shift, direct frequency entry from a keyboard, and many other features. It requires 13 VDC at about 20 amps.

This particular TS-440 is in great condition. Electrically, it functions 100%. There are no problems with the VCO and PLL like plagues some of these units. Likewise the frequency entry from the keyboard is clean and definite. Cosmetically, it looks good. With paper work for only $450.

TenTec 585 Paragon HF Transceiver:

The Paragon is a top of the line transceiver that includes a general coverage receiver. It covers 160-10 meters, including WARC bands, with 100 watts output. The receiver is fantastic. It has dual VFOs and many memories built in, along with a speech processor. Basically, it has about every feature that a ham could want in an HF rig.

This particular unit works 100% as best I can tell. Since the rig does so many things, I am sure that there is something I didn't test, but I don't know what it is (or I would have tested it!). It has had all updates completed by TenTec.

Cosmetically, it is in extremely nice shape. The front panel is extremely good. Most all of the lettering is clean and crisp. This one also has the Giehl chip in it making it similar to a Paragon II.

Large manual and power cord included for $650.

TenTec Power Supplies:

TenTec Model 280 power supply, 20 amps at 13 V DC
This supply is quite heavy duty electrically. It has 2 pass transistors, instead of the one that some have. It also has an ammeter on it.
This one works fine, and looks OK as well.
With paper work for $100.

"Switcher / 25" 25 amp switching power supply:
This is a 25 amp switching power supply in a case that matches the early Omni series case, with the metal bezel around it. It is in a case that is the same size as a 243 remote VFO. It has an ammeter on the front, along with Switch, TenTec logo, and output bulb. The front panel basically looks like a 280 power supply with a metal bezel, but says "Switcher/25" on it. It is very quiet, and well

shielded, and does not produce any electrical noise that
I could find. $150

Astron RS-12 A, 13.8 Volt DC Power Supply:

This power supply is rated at 9 amps continuous and 12 amps ICS.
It is ideal for most 2 meter rigs, including the 50 Watt rigs.

This Astron power supply features solid-state electronic
regulation, EMI filter, fold back current limiting for protection
from excessive current and shorted output, and crowbar over-voltage
protection.

This particular supply works 100% and looks the same. I can not find
a scratch on it. With paper work for $50.

MFJ 900 HF Antenna Tuner:
The MFJ 900 covers 160 thru 10 meters, and is rated at 200
watts. I would not put more than 100 watt thru it, however.
It is in a nice Woodgrain / Eggshell color enclosure that is
a perfect match for some of the earlier TenTec gear, such as
the Triton I and II, Argonaut 505 and 509, and others.
This one works fine, and looks fine also. $45

SWR Bridges:

Both have SO-239 connectors, and cover from 3 to 150 MHz,
covering HF, 6 meters, and 2 meters, so they are ideal for the new
rigs with 6 meters and 2 meters in them.

Quement SWB-2 Dual Meter
This unit features two separate meters -- one for reading forward
power and another for reading SWR. This permits one to easily
monitor both the power going out, and the SWR on the antenna.
Works fine and looks great. With paper work for $40

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see
any scratches on it, but it does have a previous owners name
on it. In its original box with original instructions. $32

I also have many other accessories available such as
microphones, wattmeters, keyers, etc. Just too many to list
here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

Sorry for the reply to the group, but G4EZZ has no e-mail address showing here and replies in thois group are strangely sent to a dead address: noreply@yahoogroups.com

That sounds like a great project, Derek.
I have most WW2 era crystals available here... plus the CS137 case is still available.

Regards - Brian, AF4K (Ex-G3XLQ)

Bry

Stranage to see that there's no email associated... will have a shuftee

derek.andrews@... is one
derek.amifrance@... is another
g4ezz@... is another!!

73

Derek

(and if anyone's intersted in finding out what the ex-pat brit is doing in France....
www.ami-enr.fr.gd should explain!!)

2242. VHF & UHF Antennas and related items FS

Yahoo group: amatuerradioswapfest
Date: 2010-11-05 17:30:43 UTC
From: Ken Simpson, W8EK
Topic: 2242 Message: 2242

For Sale:

VHF (2 meter) and UHF (440 MHz) antennas and related items
including mobile antennas, antenna mounts, Wattmeters, SWR
Bridges, HT Rubber Duck Antennas, Tower, and Coax Connectors
and more

Larsen 2 meter Mobile antennas:

Antennas are used, but in very good condition.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 meters; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on
the 70 cm band. Stacked whip is included. $12

Larsen LM-150, 2 meter antenna for Larsen LM Mount
Has 3 db gain on 2 meters.
This coil is still in its original box, and appears to
never have been used. It even has its rubber washer with
it, along with instructions.
Coil only for $20.
Coil, with 4 foot used whip. $26

Larsen "Q" Quarter Wave Antenna
Fits a 5/16 inch stud, such as the Larsen LM mount,
and others. It can be cut for 2 meters, 220 MHz, or
450 MHz bands. $9

Larsen LM-MM
Mag Mount for use with Larsen LM series antennas such as
LM-150 and "Q" above, or any other antenna that requires
a 5/16 inch stud. With coax and paper work for $18

Trunk Lip Mount with 5/16 inch stud
Ideal for use with the "Q" or LM-150 above, or any other
antenna that requires a 5/16 inch stud. Coax is included.
Very nice for $18.

Large, heavy duty magnetic mount
This large mag mount will take any antenna with a PL-259
connector. It is very heavy duty, about 6 inches in
diameter. With coax for $25.

Avanti "On Glass" antenna for 440 MHz:
This antenna was made by Avanti to mount on a windshield, or other glass. It does not require a ground plane, as it is a 1/2 wave antenna, rated to have 3 db gain. It is ideal for places where a ground plane is not available, such as a boat or motor home, in addition to cars. A special tuning box is included to match to your particular situation.
Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Wattmeters:

Daiwa CN-465 M, Dual Needle, VHF / UHF Wattmeter

The Daiwa CN-465 M is a wattmeter designed for VHF and UHF frequencies, covering from 140 to 450 MHz. Since it is a cross needle meter, it can read forward power, reverse power, and SWR simultaneously. It also has a lighted meter if you apply 12 volts to it. The full scale deflections are either 75 or 15 watts forward, and 15 or 5 watts in reverse.

This particular meter works 100% and looks very nice.

With paper work for $55.

M C Jones VHF/UHF Wattmeter

This MC Jones Wattmeter is a vintage unit, probably from just after WW II. At that time, it was the gold standard of wattmeters, basically equivalent to a Bird today.

This particular meter has N connectors in and out. It reads 12 Watts full scale in the forward position, and 4 Watts full scale in reflected. It also has an SWR calibrate and SWR scale on the meter. I think the frequency range is from 20 to 1000 MHz, but I am not 100% positive of that. It works well on 2 meters and 440 MHz. The RF sensor unit inside is model 576.3.

This one functions fine, and looks extremely nice for its age.
$60

SWR Bridges:

Both have SO-239 connectors, and cover from 3 to 150 MHz, covering HF, 6 meters, and 2 meters, so they are ideal for the new rigs with 6 meters and 2 meters in them.

Quement SWB-2 Dual Meter
This unit features two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on the antenna. Works fine and looks great. With paper work for $40

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see
any scratches on it, but it does have a previous owners name
on it. In its original box with original instructions. $32

Rubber Duck antennas for your HT:
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC - Original from Kenwood TH-215, 5 inches long

5/16 inch threaded, like used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15

BNC Stubby for 440 MHz, 3 inches long

Antenna tower for sale in Florida:

A total of 35 feet of antenna tower is available, consisting
of one top section, 2 "middle" sections, and a 5 foot section
for the base.

This tower is "American" tower, which has a horizontal brace
about every 22 inches. It is suitable for VHF antennas, very
large TV antennas, or small tribanders.

This particular tower is in good condition, although there
is some slight surface rust.

It is pickup only near Ocala, FL, just off of I-75. $125

Coax connectors and adapters:

Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male for coax cable
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $3

BNC "T" - two female and one male - $3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

I also have many other accessories available such as HF rigs,
microphones, wattmeters, keyers, etc. Just too many to list
here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

2243. HF antenna related items FS

Yahoo group: amatuerradioswapfest
Date: 2010-11-07 13:38:50 UTC
From: Ken Simpson, W8EK
Topic: 2243 Message: 2243

HF Antenna Related Items For Sale

Dummy Load, Antenna tuners, Wattmeters and SWR Bridges,
Coax and Connectors, Tower, etc.

Heath HN-31 "Cantenna" RF Dummy Load

This is the traditional Heath dummy load that will handle a
kilowatt. It has a derating curve both printed in the manual
and on the can.

I measured the resistor and it is 47 ohms, so obviously it
is in good shape and a great match for 50 ohms. The cantenna
itself is in really great shape, with no rust, dents or dings.

Paper work is included for $45.

Daiwa CN-465 M, Dual Needle, VHF / UHF Wattmeter:

The Daiwa CN-465 M is a wattmeter designed for VHF and UHF
frequencies, covering from 140 to 450 MHz. Since it is a
cross needle meter, it can read forward power, reverse power,
and SWR simultaneously. It also has a lighted meter if you
apply 12 volts to it. The full scale deflections are either
75 or 15 watts forward, and 15 or 5 watts in reverse.

This particular meter works 100% and looks very nice.

With paper work for $55.

M C Jones VHF/UHF Wattmeter:

This MC Jones Wattmeter is a vintage unit, probably from just
after WW II. At that time, it was the gold standard of wattmeters,
basically equivalent to a Bird today.

This particular meter has N connectors in and out. It reads 12
Watts full scale in the forward position, and 4 Watts full scale
in reflected. It also has an SWR calibrate and SWR scale on the
meter. I think the frequency range is from 20 to 1000 MHz, but I
am not 100% positive of that. It works well on 2 meters and 440
MHz. The RF sensor unit inside is model 576.3.

This one functions fine, and looks extremely nice for its age.
$60

ParaDynamics PDC-5 Wattmeter / Antenna Tuner:

This unit has a wattmeter with scales of 100 W, 10 W, and
1 W with an antenna tuner built in.
The tuner portion works on 10 m, 12 m, and 15 m.
The wattmeter seems accurate from 20 meters thru 10 meters.

It is physically small (only 5 X 3 X 1), so would be ideal
for portable use.

The wattmeter and antenna tuner portion work fine, however,
the SWR portion of this unit is inoperative. It looks great.
$12

SWR Bridges:

Both have SO-239 connectors, and cover from 3 to 150 MHz,
covering HF, 6 meters, and 2 meters, so they are ideal for the new
rigs with 6 meters and 2 meters in them.

Quement SWB-2 Dual Meter
This unit features two separate meters -- one for reading forward
power and another for reading SWR. This permits one to easily
monitor both the power going out, and the SWR on the antenna.
Works fine and looks great. With paper work for $40

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see
any scratches on it, but it does have a previous owners name
on it. In its original box with original instructions. $32

Antenna tower in Florida:

A total of 35 feet of antenna tower is available, consisting
of one top section, 2 "middle" sections, and a 5 foot section
for the base.

This tower is "American" tower, which has a horizontal brace
about every 22 inches. It is suitable for VHF antennas, very
large TV antennas, or small tribanders.

This particular tower is in good condition, although there
is some slight surface rust.

It is pickup only near Ocala, FL, just off of I-75. $125

Coaxial Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long.
It has a male type "N" connector on each end. $15

Coax connectors and adapters:

Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male for coax cable
standard type - $2

crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $3

BNC "T" - two female and one male - $3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

I also have many other accessories available such as HF rigs,
microphones, wattmeters, keyers, etc. Just too many to list

2244. Miscellaneous HF Vertical Antenna Elements For Sale

Yahoo group: amatuerradioswapfest
Date: 2010-11-09 23:12:09 UTC
From: K7NKS
Topic: 2244 Message: 2244

The widow of a Silent Key (amazing how many XYLs don't know the callsign) asked me to remove the Hy Gain type HF antenna in her back yard. The vertical antenna was damaged to the point of just being useable for replacement parts, traps, and aluminum tubing.

Due to extra long elements I will not ship. It is available for pickup at 80104 ZipCode. All I want is the scrap metal value ($15 est. OBO) and that it all be removed.

Also have a coil of older RG8 coax which may not be of any use for RF but can make a nice ground strap.

Thanks,

Chuck, K7NKS

FOR SALE - Behringer Feedback Destroyer Pro Model DSP1124P
and Parametric Equalizer

Description: 24-Bit Dual Engine Digital Feedback Suppressor / Parametric
EQ

* Ultra-high performance 2-channel digital feedback suppressor /
parametric EQ
* Automatically and "intelligently" locates and destroys up to 12
frequencies per channel
* "Set-and-forget" default setting enables immediate and super-easy
performance
* 2 x 12 fully programmable parametric filters that can be set manually
or via MIDI
* Auto mode continuously monitors the mix, resetting programmed
filters automatically
* Single-shot mode automatically detects and destroys feedback and
locks the filter until you reset it manually
* Manual mode allows individual setting of up to 2 x 12 fully parametric
filters with frequency, bandwidth and gain adjustment
* 2 digital processing engines provide independent or coupled functions
on left and right channels
* Extensive MIDI implementation and user preset memories for storing
and instantly recalling programs
* Accurate eight-segment LED level meters for perfect level setting and
optimum performance
* Servo-balanced, gold-plated XLR and 1/4" TRS connectors
* High-quality components and exceptionally rugged construction
ensure long life
* Conceived and designed by BEHRINGER Germany

This is a standard 19" rack mount unit.

Purchased recently and never used due to a change in plans.
Comes new in the box.
Cost $99.00 new (which was a great price.)

Available for $65.00 firm. Possible ham trades considered.

2246. Desk Mics, Hand Mics, DTMF Mics, Speaker Mics FS

Yahoo group: amatuerradioswapfest
Date: 2010-11-13 13:20:35 UTC
From: Ken Simpson, W8EK
Topic: 2246 Message: 2246

A variety of Desk Microphones, Hand Microphones, DTMF
Touch Tone Microphones, and HT speaker microphones for sale:

Desk Microphones:

Astatic D-104 Desk Microphone

Most people know that the Astatic D-104 is the "Lollypop"
desk mic. This mic has very nice chrome plating on the mic
itself, and on the PTT grip section. The base is black.

Of course it works fine, and looks extremely nice.

With paper work for $75.

TenTec Desk Microphones:

TenTec Model 706 deluxe base microphone
The TenTec model 706 is an electret microphone. It has an 8 pin
connector as used on the Orion, Eagle, and the newer TenTec rigs.
This particular mic works 100% and looks very close to new. $75

TenTec 709A Desk Microphone
Model 709A is an omni-directional dynamic microphone.
The unit consists of a die-cast zinc shell with molded sliding
PTT on/off switch, dynamic microphone element and detachable
multi-wire connection cable.
It has an 8 pin connector as used on the Orion, Eagle and newer
TenTec rigs.
This particular mic works 100% and is still in its original box. $60

TenTec 214 Electret "Banana" Desk Microphone
This is actually the mic that TenTec sold to go with the Corsair,
Paragon, and other rigs of that vintage.
It has an electret element for great frequency response. It has a
4 pin plug and pulls its power from the radio. This one works
fine, and looks great. With paperwork for $85.

Turner "Plus Three" Desk Microphone
This is an amplified desk mic, so it can be used with most any
rig. Gain can be adjusted from basically no gain to quite a bit.
The reviews on eham, several people say it is the best microphone
they ever used. It requires a 9 volt battery. It presently has
a round 8 pin connector wired for Kenwood, but of course that
can be changed.
This one works fine and looks nice. $40

Turner Sideband Expander Desk Microphone
This is a high impedance desk mic with good articulation. It has a black base and neck with an aluminum colored rig around the actual mic element. Stripped and tines leads. $35

Hand Microphones:

Icom HM-36 hand mic.
This mic has the round 8 pin connector, and also has up-down switches on the top.
It is used on the IC-25A grn LED, 28H, 38, 45A, 48, 77, 78, 120, 229H, 271, 275, 290, 375, 451, 471/A, 475, 505, 575, 707, 718, 725, 728, 729, 735, 736, 737/A, 745, 746, 751/A, 756/PRO, 761, 765, 775, 781, 820H, 821H, 900, 901, 970, 1201, 1271, 1275, 2400, 3200, 3210, and maybe others.
This one works fine and looks very close to new.
It may not have been used, other than to test it. $40

Astatic D-104-M6 Hand Microphone

Most of use know what the D-104 "Lollypop" desk mic is like.
This is the hand mic equivalent.

The D104-M6 microphone is a quality performance field effect amplified “power” microphone. The housing is molded black ABS; the front half is chrome plated and the grille screen is chrome plated. The output impedance is compatible with the inputs of almost all commercial transceivers; it has an externally adjustable high gain amplifier to ensure the desired modulation level.
The D104-M6 has an easily accessible control so that the correct modulation level can be set for each operators voice.

This one works fine and looks extremely nice.

With paper work for $40.

Generic Low Impedance Hand Microphone
This is a low impedance hand microphone, black in color.
Looks and works great. With 4 pin connector. $25

DTMF Touch Tone Microphones:

Icom HM-8 hand mic with Touch Tone (DTMF) Pad:
The HM-8 has a 12 digit touch tone (DTMF) pad on the front of it, along with an on-off switch for the tones. Of course it also has the normal PTT switch.
The HM-8 is used on the 25A Red LED, 245, 290, 402, 202S, 451, 471A, plus other rigs.
This particular microphone has an 8 pin round connector, works fine, and includes paper work for $40.

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in the mic, and "speed dial". 12 digit touch tone pad on the front,

with the microphone part above the pad. With an 8 pin modular
plug (like a computer LAN) on it, which can be changed.
Looks to be new. $40

KDK DM TT-1 DTMF Touch Tone Mic
This mic has a 12 digit touch tone pad on it, with a
switch to turn the pad on and off. With 4 pin plug.
It works fine, and looks great. $35

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin plug. Looks to be unused. $40

Data Signal "Data-Coder 5" Touch Tone Mic
This mic has a 12 digit touch tone pad on it, plus a normal
low impedance microphone. With 4 pin plug. Like new. $38

HT Speaker Microphones:

Icom HM-70 Speaker Microphone
The Icom HM-70 speaker mic (also known as the EX-1036)
works on the Icom 2SRA, 4SRA, Delta 1, IC-W2/X2 or any
Icom HT which uses the single 3 conductor stereo-style
1/8 inch (3.5 mm) plug.
This one is in the original box, and appears to be unused.
$25

Azden SDX-316
Although it has an Azden name plate, it will also work
with Icom, some Yaesu, and Alinco that needs 3.5 mm and
2.5 mm plugs.
This is the rounder style speaker mic that fits nicely in
the palm of your hand. $20

MFJ-287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the
TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as
others. It has a 3 conductor 3.5 mm plug and a 2 conductor
2.5 mm plug. The coiled cord has been stretched a bit, but
it works fine. $12

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Prices do not include shipping from Florida.

Thanks.

2247. FS: Marker Crystals

Yahoo group: amatuerradioswapfest
Date: 2010-11-15 12:12:29 UTC
From: Bry Carling
Topic: 2247 Message: 2247

For sale: Marker Crystals

100 kHz - $19.00 each
1.000 MHz - $16.00 each
10.000 MHz - $16.00 each

These are full size, hc6u, or wire lead crystals. In the case of the 100kHz crystals, they are new manufacture, top quality "tall hc6/u" crystals known as hc13/u. Some of the others are available with wire leads. Shipping is additional.

2248. FS: TUBE ERA Ham Parts

Yahoo group: amatuerradioswapfest
Date: 2010-11-18 12:27:06 UTC
From: Bry Carling
Topic: 2248 Message: 2248

FOR SALE:

QTY 14 Tube-era transformers.
These are mostly open frame, above-chassis type transformers w/lugs.
One or two potted, includes output transformers, power transformers etc.
Some marked, some pot-luck.
Will sell all 14 for $25.00 plus $11.00 for USA shipping.

JUNK BOXES (!!) - may include caps, power supplies, tubes, resistors, plugs,
adapters, crystals, variable capacitors, fuses, hardware etc. These will fill a
medium sized Priority mail flat rate box to USA for $15.00 plus $13.00 shipping.
Easily worth at least $60.00 by anyone's reckoning.
QTY 2 available for $15.00 plus $12.00 for USA shipping.

Paper capacitors, QTY 30 new, old stock caps with axial leads for
$3.00 plus shipping

Electrolytic capacitors, QTY 30 new, old stock caps with axial and radial
leads for $3.00 plus shipping

New RF Chokes, 2 mH pi-wound types with axial leads - rated 50 mA
Available for $2.00 each

New RF Chokes, 1 mH pi-wound types with axial leads - rated 50 mA
Available for $1.00 each

GROUPS of original ham band, 1945-1960 era FT243 crystals:

GROUP A:
QTY 5 - 3835, 3858, 3910, 3931, 3952 kHz
All for $15.00 plus shipping

GROUP B:
QTY 5 - 3878, 3891, 3940, 3945, 3990 kHz
All for $15.00 plus shipping

GROUP C:
QTY 2 - 3825 kHz
Pair for $10.00 plus shipping

GROUP D:
QTY 2 - 3840 kHz
Pair for $10.00 plus shipping

GROUP E:
QTY 2 - 3897 kHz
Pair for $10.00 plus shipping

GROUP F:
QTY 2 - 3995 kHz
Pair for $10.00 plus shipping

GROUP G:
QTY 2 more - 3995 kHz
Pair for $10.00 plus shipping

NEW IN BOX FT243 Crystals on 1030 kHz - $6.00 each (QTY 8 available)

100 kHz Calibrator Crystals HC13/U (TALL HC6U)
- $19.00 each plus shipping.

Other FT243 crystals: 1430, 1470, 1525, 1585, 1600, 1700, 1790 kHz
1815, 1822, 1825, 1843, 1850, 1856 kHz FT243 crystals - $14.00 each

QTY 1 - FT-243 crystal case, military surplus, type CS-137 with two locking compartments. Holds up to 120 crystals. QTY 1 available for $15.00 plus shipping.

GROUP OF SIX panel mount fuse holders - traditional cartridge fuse sizes. Very standard for homebrewing and repairs. All for $6.00 plus shipping.

QTY 4 Octal tube sockets. These are clean, used sockets.- standard type with ears for chassis mounting. All four for $4.00 plus shipping.

RCA 6197 tubes - QTY 4 available. New in boxes. $2.00 each plus shipping.

RCA 5651 tubes - QTY 2 available. New in boxes. $2.00 each plus shipping.

Sylvania 5963 tubes - QTY 2 available. New in boxes. $3.00 each plus shipping.

Please contact me directly to arrange purchase.

2249. HF Rigs, Power Supplies, Ant Tuner, and other HF items FS

Yahoo group: amatuerradioswapfest
Date: 2010-11-20 15:16:07 UTC
From: Ken Simpson, W8EK
Topic: 2249 Message: 2249

Several HF Transceivers, Power Supplies, Antenna Tuner,
etc. For Sale:

Icom IC-706 Mk II G 160 thru 2 meter transceiver:

The '706' Series represents one of the most popular transceivers
in amateur radio histroy. The latest version is the incredibly
small Icom IC-706 Mark II G which adds many new features and
capabilities not found in previous versions. The "G" is an
all-mode transceiver that provides 100 watts on HF and 6 meters
and 50 watts on 2 meters plus 20 watts on 440 MHz. It receives
from 30 kHz to 199 MHz and from 400 to 470 MHz. It features a
removable, remoteable, front panel that allows control of all
features. The large LCD display features alphanumeric memory
names (9 character) and soft key descriptions. The LCD even
supports a simple band scope display. Other advanced features
include: IF Shift, RIT, Tone Squelch, Scanning, Noise Blanker,
Speech Compressor, Mini Spectrum Scope and Electronic Keyer.
This latest version in the 706 series includes the UT-106 DSP
module as a standard feature. Despite its compact size (6.56"
x 2.28" x 7.88"), it has big, easy to use control dials. With
HM-103 hand mic. One or two optional filters may be added.

Features
* .03-199, 400-470 MHz Receive
* Alpha memories
* RIT
* Preamp/ATT
* VFO A/B
* 1 Hz Display
* IF Shift
* Scanning
* S/RF Meter
* 100 Watts HF+6M
* 50 Watts 2M, 20 Watts 440
* 100 Memories
* All band Multimode
* Removable head
* Mini Spectrum Scope
* Electronic Keyer

This one works 100% as best I can determine. It looks extremely
nice. Microphone and paper work is included for $650.

Kenwood TS-440 S / AT, 100 Watt HF transceiver:

The Kenwood TS-440S/AT was designed for superior performance in the SSB, CW, AM, FM and AFSK modes. An automatic antenna tuner is built in. Coverage is 160 through 10 meters including the WARC bands with 100 watts (40W AM). It includes such things as notch filter, individual selection of optional crystal filters, digital readout, memories, scan capabilities, IF shift, direct frequency entry from a keyboard, and many other features. It requires 13 VDC at about 20 amps.

This particular TS-440 is in great condition. Electrically, it functions 100%. There are no problems with the VCO and PLL like plagues some of these units. Likewise the frequency entry from the keyboard is clean and definite. Cosmetically, it looks good. With paper work for only $450.

Sangean ATS-803 A Short Wave Receiver:

The Sangean ATS-803A is a "top of the line" receiver. This digital world band radio has dual-conversion covering all shortwave frequencies (1.6-30 MHz), long wave (150-519 kHz), AM (520-1710 kHz) and FM (87.5-108 MHz). A BFO control is included for smooth SSB and CW reception. An LCD display with dial lamp shows frequency, 24 hour time, battery indicator and signal strength. The receiver features an RF gain, tone, wide-narrow selectivity, keypad entry, manual tuning knob, plus 14 memories. There is an external RCA phone antenna jack on the rear panel.
The left panel has a 3.5mm earphone jack plus a DIN type jack for tape recording. It can be powered by either batteries or a wall wart power supply.

This one works fine and looks really great as well.
With paper work for $100.

TenTec 585 Paragon HF Transceiver:

The Paragon is a top of the line transceiver that includes a general coverage receiver. It covers 160-10 meters, including WARC bands, with 100 watts output. The receiver is fantastic. It has dual VFOs and many memories built in, along with a speech processor. Basically, it has about every feature that a ham could want in an HF rig.

This particular unit works 100% as best I can tell. Since the rig does so many things, I am sure that there is something I didn't test, but I don't know what it is (or I would have tested it!). It has had all updates completed by TenTec.

Cosmetically, it is in extremely nice shape. The front panel is extremely good. Most all of the lettering is clean and crisp. This one also has the Giehl chip in it making it similar to a Paragon II.

Large manual and power cord included for $650.

TenTec Power Supplies:

TenTec Model 280 power supply, 20 amps at 13 V DC
This supply is quite heavy duty electrically. It has 2 pass transistors, instead of the one that some have. It also has an ammeter on it.
This one works fine, and looks OK as well.
With paper work for $100.

"Switcher / 25" 25 amp switching power supply:
This is a 25 amp switching power supply in a case that matches the early Omni series case, with the metal bezel around it. It is in a case that is the same size as a 243 remote VFO. It has an ammeter on the front, along with Switch, TenTec logo, and output bulb. The front panel basically looks like a 280 power supply with a metal bezel, but says "Switcher/25" on it. It is very quiet, and well shielded, and does not produce any electrical noise that I could find. $150

Astron RS-12 A, 13.8 Volt DC Power Supply:

This power supply is rated at 9 amps continuous and 12 amps ICS. It is ideal for most 2 meter rigs, including the 50 Watt rigs.

This Astron power supply features solid-state electronic regulation, EMI filter, fold back current limiting for protection from excessive current and shorted output, and crowbar over-voltage protection.

This particular supply works 100% and looks the same. I can not find a scratch on it. With paper work for $50.

MFJ 900 HF Antenna Tuner:
The MFJ 900 covers 160 thru 10 meters, and is rated at 200 watts. I would not put more than 100 watt thru it, however.
It is in a nice Woodgrain / Eggshell color enclosure that is a perfect match for some of the earlier TenTec gear, such as the Triton I and II, Argonaut 505 and 509, and others.
This one works fine, and looks fine also. $45

SWR Bridges:

Both have SO-239 connectors, and cover from 3 to 150 MHz, covering HF, 6 meters, and 2 meters, so they are ideal for the new rigs with 6 meters and 2 meters in them.

Quement SWB-2 Dual Meter
This unit features two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on the antenna.
Works fine and looks great. With paper work for $40

Swan SWR-1 A Dual Meter
Similar to the Quement dual meter above. This one is in its original box, with the original instruction sheet. $45

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see any scratches on it, but it does have a previous owners name on it. In its original box with original instructions. $32

CW Keys:

Nye Viking Speedex 310-001 "Oval Base" Key
Nice action, with nickel hardware. This originally had a black base, but someone painted the base to look like it is brass. Nye sells these for $58. This one is only $35.

Heavy Metallic Base for CW Key
This is a heavy metal base that weighs about a pound and a half, black color with red felt on the bottom. Attach most any key to it and it will stay in place on your desk! $20

Autek QF-1 A, Active Audio Filter:

This is an audio filter that goes between your rig and speaker. It runs off of 110 V AC or 13 Volt DC, and will peak, notch, or become a low pass or high pass filter. Selectivity (bandwidth) and frequency are adjustable from the front panel. This is the "A" model that also has an additional notch filter added. The input is an 1/4 inch phone plug, and the output is a 1/4 inch jack on the rear panel.

This particular unit works 100%, and looks very, very nice. I can not find a scratch on it.

With paper work for $60.

Heath HN-31 "Cantenna" RF Dummy Load

This is the traditional Heath dummy load that will handle a kilowatt. It has a derating curve both printed in the manual and on the can.

I measured the resistor and it is 47 ohms, so obviously it is in good shape and a great match for 50 ohms. The cantenna itself is in really great shape, with no rust, dents or dings.

Paper work is included for $45.

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter to reduce harmonic interference. All have SO-239 connectors, and include paper work.

B & W FL-10/1500
This filter cuts off just above 10 meters, and handles 1500
Watts. It is the latest model B&W filter.
In very nice condition, it looks very close to new. $40.

B & W 425
It cuts off just above 10 meters, and will handle 1500+ Watts.
Maximum attenuation is at 52 MHz, with at least 70 db across
the band. This is an older, heavier duty model. It weighs
almost twice as much as the newer model. $35

Drake TV-3300-LP
This is a modern low pass filter has been optimized to have
more attenuation in the 40 MHz region, where many TVs have
their IF. It is good for 1000 Watts "average" according to
the manual, and has over 80 db attenuation at 41 MHz.
This one looks great. $30

I also have many other accessories available such as
microphones, wattmeters, antennas, etc. Just too many to list
here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

2251. Antennas and related items FS

Yahoo group: amatuerradioswapfest
Date: 2010-11-25 15:07:56 UTC
From: Ken Simpson, W8EK
Topic: 2122 Message: 2251

For Sale:
Antennas and related items such as Wattmeters, Antenna Tuner, SWR Bridges, Low Pass Filters, Mobile Antennas, Rubber Duck Antennas, Connectors, Tower, and more

M C Jones VHF/UHF Wattmeter:

This MC Jones Wattmeter is a vintage unit, probably from just after WW II. At that time, it was the gold standard of wattmeters, basically equivalent to a Bird today.

This particular meter has N connectors in and out. It reads 12 Watts full scale in the forward position, and 4 Watts full scale in reflected. It also has an SWR calibrate and SWR scale on the meter. I think the frequency range is from 20 to 1000 MHz, but I am not 100% positive of that. It works well on 2 meters and 440 MHz. The RF sensor unit inside is model 576.3.

This one functions fine, and looks extremely nice for its age.
$60

SWR Bridges:

Dual Meter SWR Bridges:

All of these feature two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on the antenna. They were made in Japan, and labeled with various names, including Swan, Siltronix, and Quement. All have SO-239 connectors on each end, and work fine.

All will work on HF, and VHF, covering 3 to 150 MHz, so are ideal for the new rigs that include 6 and 2 meters.

Swan SWR-1
This one is in its original box, with the original instruction sheet. $45

Quement SWB-2
No box for this one, but it works fine and looks great.
With paper work for $40.

Siltronix SWR-2
This meter functions fine, but the meter lens of the meter that reads SWR has a crack in it. Strictly cosmetic. $25

Single meter SWR Bridge:

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
With SO-239 connectors, it covers from 3 to 150 MHz, covering HF, 6 meters, and 2 meters, so is ideal for the new rigs with 6 meters and 2 meters in them.
This one works fine, and looks extremely nice. I do not see any scratches on it, but it does have a previous owners name on it. In its original box with original instructions. $32

MFJ 900 HF Antenna Tuner:

The MFJ 900 covers 160 thru 10 meters, and is rated at 200 watts. I would not put more than 100 watt thru it, however.

It is in a nice Woodgrain / Eggshell color enclosure that is a perfect match for some of the earlier TenTec gear, such as the Triton I and II, Argonaut 505 and 509, and others. But of course it can be used with any HF rig.

This one works fine, and looks fine also. $45

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter to reduce harmonic interference. All have SO-239 connectors, and include paper work.

B & W FL-10/1500
This filter cuts off just above 10 meters, and handles 1500 Watts. It is the latest model B&W filter.
In very nice condition, it looks very close to new. $40.

B & W 425
It cuts off just above 10 meters, and will handle 1500+ Watts. Maximum attenuation is at 52 MHz, with at least 70 db across the band. This is an older, heavier duty model. It weighs almost twice as much as the newer model. $35

Drake TV-3300-LP
This is a modern low pass filter has been optimized to have more attenuation in the 40 MHz region, where many TVs have their IF. It is good for 1000 Watts "average" according to the manual, and has over 80 db attenuation at 41 MHz.
This one looks great. $30

Heath HN-31 "Cantenna" RF Dummy Load

This is the traditional Heath dummy load that will handle a kilowatt. It has a derating curve both printed in the manual and on the can.

I measured the resistor and it is 47 ohms, so obviously it is in good shape and a great match for 50 ohms. The cantenna itself is in really great shape, with no rust, dents or dings.

Paper work is included for $45.

Gap "Titan DX" HF Vertical Antenna:

The Titan is an 8 Band Multiband DX Antenna. It covers 80 thru 10 meters, including the WARC bands. It covers the entire band on 40 thru 10, and about 100 KHz on 75/80 meters. It is about 25 feet tall, and includes a counterpoise, so that no radials are required.

One of the primary virtues of the Titan is the GAP center feed. By elevating the feed the earth loss is dramatically decreased, which means the RF is going out to make the contact instead of into the ground to warm the earth. Reducing the earth loss eliminates the need for a radial system. The Titan requires NO RADIALS.

This particular antenna is in extremely nice shape with no corrosion. Most of the aluminum is still shiny.

These sell new for about $400. This one is close to new, with paper work for $250. Pick up only near Ocala FL.

Duplexers / Diplexers:

These units are designed to split transmit and receive signals between 2 meters and 440 MHz bands. Some rigs have only one output connector; you may want to use separate antennas for 2 meters and for 440 MHz. Or, you might have a combination 2m/440 MHz antenna, and your rig has two outputs. These units can be used either to combine or separate the two bands. Both work fine and look great also.

Maldol HS-770
2 m and 440 Mhz ports have a foot long coax with PL-259 connectors. Common is a case mounted SO-239 connector. $50

Diamond MX-72 D
It has a 1.6-150mhz input on one port (so it can be used to split 6 meter or HF as well as 2 meters) and a 400-460mhz port. The HF port will handle 1kw and the UHF port 400 watts. Isolation is 60db between ports. It has an SO-239 on one end and two PL-259's on the other. $40

Larsen LM type VHF and UHF Mobile Antennas:

Antennas are in very good condition.

Larsen LM-150, 2 meter antenna for Larsen LM Mount
Has 3 db gain on 2 meters.
This coil is still in its original box, and appears to never have been used. It even has its rubber washer with it, along with instructions.
Coil only for $20.

Coil, with 4 foot used whip. $26

Larsen Q Quarter Wave Antenna
Fits a 5/16 inch stud, such as the Larsen LM mount, and others. It can be cut for 2 meters, 220 MHz, or 450 MHz bands. $9

Larsen LM-MM with 5/16 inch stud
Mag Mount for use with Larsen LM series antennas such as LM-150 and "Q", or any other antenna that requires a 5/16 inch stud. With coax and paper work for $18

Trunk Lip Mount with 5/16 inch stud
Ideal for use with the "Q" or LM-150 above, or any other antenna that requires a 5/16 inch stud. Coax is included. Very nice for $18.

Buy 5/8 wave antenna, 1/4 wave antenna, and mount together for $50.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 meters; includes whip. $16
As above, but coil only, without whip. $10

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on the 70 cm band. Stacked whip is included. $12

Avanti "On Glass" antenna for 440 MHz:
This antenna was made by Avanti to mount on a windshield, or other glass. It does not require a ground plane, as it is a 1/2 wave antenna, rated to have 3 db gain. It is ideal for places where a ground plane is not available, such as a boat or motor home, in addition to cars. A special tuning box is included to match to your particular situation.
Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Large, heavy duty magnetic mount
This large mag mount will take any antenna with a PL-259 connector. It is very heavy duty, about 6 inches in diameter. With coax for $25.

Coaxial Cable with Type "N" Connectors:
This cable is made of RG-8 coax and is about 6 feet long. It has a male type "N" connector on each end. $15

Coax connectors and adapters:

Prices are per connector. Several of each are available. These are NOS (have not been used).

BNC male for coax cable
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $3

BNC "T" - two female and one male - $3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5
-
UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Antenna adapter for Kenwood TH-21/31/41 HTs
Adapts the antenna connector found on these HTs to a
standard PL-259 connector. $8

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC - Original from Kenwood TH-215, 5 inches long

5/16 inch threaded, like used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15

BNC Stubby for 440 MHz, 3 inches long

Knife Switch
A knife switch is often used to switch antennas using open
wire or "twin line" feeders, but can be used for other purposes.
This knife switch is DPDT. The base is about 2 1/2 by 1 1/2
inches in size, and is phenolic.
This one works fine and is in good condition. $7

Antenna tower for sale in Florida:

A total of 35 feet of antenna tower is available, consisting of one top section, 2 "middle" sections, and a 5 foot section for the base.

This tower is "American" tower, which has a horizontal brace about every 22 inches. It is suitable for VHF antennas, very large TV antennas, or small tribanders.

This particular tower is in good condition, although there is some slight surface rust.

It is pickup only near Ocala, FL, just off of I-75. $125

Prices do not include shipping from Florida.

Thanks.

From: Bry Carling
Topic: 2254 Message: 2254

FOR SALE:

Interface modern transceivers with older tube linear amplifiers
with ease with this plug-and-play device.

Manufactured by Mike, WB8VGE of SunLight Energy Systems, The
Heathkit Shop. This one is brand new - I never used it.

The Ampkeyer will solve the universal problem of interfacing
one's transceiver to an amplifier, no matter what the rig or what kind of
amplifier. And you don't have to open up the amp to install any
modifications.

Manufacturer page:
http://www.theheathkitshop.com/page13/page13.html

Details and glowing reviews here.
http://www.eham.net/reviews/detail/3100?page=1

Comes with the original documentation. Mint condition.

New cost is $49.95 plus shipping.
Will sell mine for $39.95 plus shipping.

2255. VHF Wattmeters / SWR Bridges FS

Yahoo group: amatuerradioswapfest
Date: 2010-12-08 14:08:34 UTC
From: Ken Simpson, W8EK
Topic: 2255 Message: 2255

VHF Wattmeters and SWR Bridges and connectors For Sale:

Heath VHF Wattmeter:

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.

Similar to the HM-102, but for VHF frequencies, with 250 and 25 watt scales. It can also be used to check SWR, and has a remote sensor that can either be left inside the meter, or separated from the actual meter. SO-239 connectors in and out.

This particular meter works great. It looks very close to perfect with no defects that I can find.

Paper work included for $50.

M C Jones VHF/UHF Wattmeter:

This MC Jones Wattmeter is a vintage unit, probably from just after WW II. At that time, it was the gold standard of wattmeters, basically equivalent to a Bird today.

This particular meter has N connectors in and out. It reads 12 Watts full scale in the forward position, and 4 Watts full scale in reflected. It also has an SWR calibrate and SWR scale on the meter. I think the frequency range is from 20 to 1000 MHz, but I am not 100% positive of that. It works well on 2 meters and 440 MHz. The RF sensor unit inside is model 576.3.

This one functions fine, and looks extremely nice for its age.
$60

SWR Bridge / Field Strength Meter:

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter

With SO-239 connectors, it covers from 3 to 150 MHz, covering HF, 6 meters, and 2 meters, so is ideal for the new rigs with 6 meters and 2 meters in them.

This one works fine, and looks extremely nice. I do not see any scratches on it, but it does have a previous owners name on it. In its original box with original instructions.
$32

Dual Meter SWR Bridges:

Both of these feature two separate meters -- one for reading forward power and another for reading SWR. This permits one

to easily monitor both the power going out, and the SWR on
the antenna. They were made in Japan, and labeled with various
names, including Swan, Siltronix, and Quement. Both have SO-239
connectors on each end, and work fine.

Both will work on HF, and VHF, covering 3 to 150 MHz, so are
ideal for the new rigs that include 6 and 2 meters.

Quement SWB-2
No box for this one, but it works fine and looks great.
With paper work for $40.

Siltronix SWR-2
This meter functions fine, but the meter lens of the meter that
reads SWR has a crack on the very right edge of it. Strictly
cosmetic. $25

Heath HN-31 "Cantenna" RF Dummy Load

This is the traditional Heath dummy load that will handle a
kilowatt. It has a derating curve both printed in the manual
and on the can.

I measured the resistor and it is 47 ohms, so obviously it
is in good shape and a great match for 50 ohms. The cantenna
itself is in really great shape, with no rust, dents or dings.

Paper work is included for $45.

Coax connectors and adapters:

Prices are per connector. Several of each are available.
These are NOS (have not been used).

BNC male for coax cable
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $3

BNC "T" - two female and one male - $3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Prices do not include shipping from Florida.

Thanks.

2258. FS: Some more radio parts

Yahoo group: amatuerradioswapfest
Date: 2010-12-14 14:34:12 UTC
From: Bry Carling
Topic: 2258 Message: 2258

FOR SALE:

1) BOX of 10 Ceramic Variable Capacitors. Various values from 30 pF and up. Some transmitting, some receiving. All ten for $20.00 plus shipping.

2) 100 kHz crystals - new, tall type hc13u calibrator crystal as used in all tube era radios. FIts the same soicket as an hc6u crystal. Available for $19.00 each plus shipping.

3) Lacing cord for wiring harnesses. New, 300 yard spool available for $12.50 plus shipping.

4) Pair of 2E26 transmitting tubes. Used, good tested tube pair for $5.00 plus shipping.

5) EIMAC 4-65A transmitting tube with ceramic socket in excellent condition. QTY 1 available for $8.00 plus shipping.

6) RCA 832 mil-spec transmitting tube - looks new.
QTY 1 available for $5.00 plus shipping.

7) G.E. 6997 VHF transmitting tube, used. Looks OK.
QTY 1 available for $2.00 plus shipping.

8) Drake Crystal for R4A, R4B or R4C, covers 10.0 - 10.5 MHz
QTY 1 available for $12.00

9) Group of hc6u crystals on 7000 kHz, 7100 kHz, 7159 kHz, 7170 kHz, and QTY 2 X 7174 kHz. TOTAL of six mil surplus crystals for $12.00 plus shipping.

10) Pair of FT243 crystals on 3880 kHz. One for you and one for a friend! These are available for $10.00 each plus shipping.

11) Broadcast band FT243 crystals. 1200 kHz, 1300 kHz, 1475 kHz, 1600 kHz, 1585 kHz. Available for $14.00 each plus shipping.

73 and thanks for looking.

Brian, AF4K

2260. Transceivers, Power Supplies, Wattmeters and more FS

Yahoo group: amatuerradioswapfest
Date: 2010-12-19 14:35:59 UTC
From: Ken Simpson, W8EK
Topic: 2260 Message: 2260

Multiband Multimode Transceviers, Power Supplies, Wattmeters, and SWR Bridges For Sale:

Icom IC-746 Pro, 160 thru 2 meter Multi mode transceiver:

The Icom IC-746 Pro covers 160-10 meters plus 6 and 2 meters all mode. 100 Watts of output is available on all bands - HF, 50 MHz and 144 MHz, making the IC-746 Pro a practical choice for all-around base station use. The die-cast aluminum chassis and a large cooling fan help to stabilize the PA circuit, providing 100% full duty cycle operation. The new Pro version features 32 bit floating point DSP and 24-bit AD/DA converter. There are NO more expensive optional filters to buy. The digital IF filter allows one to select 51 filter bandwidths. There are three user selectable filter memories per mode. Soft and sharp filter shapes can be selected in both SSB and CW modes independently. You can also change the settings on the fly and compare! For repeater operation theres is a built-in tone encoder and decoder with 50 CTCSS and 108 DTCS based tones. There is even a built-in Baudot RTTY demodulator.

It has 100 alphanumeric memories, digital RF speech compression, spectrum display, Manual and Automatic Notch, digital Twin PBT, Noise Blanker, CTCSS encode/decode, APF, two stage preamp, automatic antenna tuner and electronic keyer. A built-in automatic antenna tuner operates on the HF bands plus 6 meters. The 746 Pro requires 12 VDC at 23 amps. It is 11.3 x 4.8 x 12.5 inches in size and weighs 20 Lbs. See the May 2002 issue of QST for a review of this radio.

Features
* Spectrum Scope
* 102 Memories
* RIT/XIT
* Digital Noise Reduction
* Manual and Automatic Notch
* Digital Twin PBT
* Dual Display
* 100 Watt Output
* 40 Watt Output (AM)
* Digital RF Speech Compressor
* Microphone Equalizer
* Monitor Transmit Audio
* SWR Plotting

* Built-in Automatic Antenna Tuner 180-6 Meters
* Full Break-In CW
* SSB/CW Synchronous Tuning
* 100% Duty Cycle
* Rx Antenna Jack
* 32 bit DSP
* 1 Hz Readout
* 4 Channel Memory Keyer
* RF Attenuator 6/12/18 dB
* RTTY Demodulator
* CW Pitch and CW Reverse
* Adjustable Transmit Bandwith
* Triple Band Stack Registers

This one works 100% as best I can tell, and looks close to the same. I can not find a scratch on it. With paper work for $1050.

Icom IC-706 Mk II G 160 thru 440 MHz transceiver:

The '706' Series represents one of the most popular transceivers in amateur radio histroy. The latest version is the incredibly small Icom IC-706 Mark II G which adds many new features and capabilities not found in previous versions. The "G" is an all-mode transceiver that provides 100 watts on HF and 6 meters and 50 watts on 2 meters plus 20 watts on 440 MHz. It receives from 30 kHz to 199 MHz and from 400 to 470 MHz. It features a removable, remoteable, front panel that allows control of all features. The large LCD display features alphanumeric memory names (9 character) and soft key descriptions. The LCD even supports a simple band scope display. Other advanced features include: IF Shift, RIT, Tone Squelch, Scanning, Noise Blanker, Speech Compressor, Mini Spectrum Scope and Electronic Keyer. This latest version in the 706 series includes the UT-106 DSP module as a standard feature. Despite its compact size (6.56" x 2.28" x 7.88"), it has big, easy to use control dials. With HM-103 hand mic. One or two optional filters may be added.

Features
* .03-199, 400-470 MHz Receive
* Alpha memories
* RIT
* Preamp/ATT
* VFO A/B
* 1 Hz Display
* IF Shift
* Scanning
* S/RF Meter
* 100 Watts HF+6M
* 50 Watts 2M, 20 Watts 440
* 100 Memories

* All band Multimode
* Removable head
* Mini Spectrum Scope
* Electronic Keyer

This one works 100% as best I can determine. It looks extremely nice. Microphone and paper work are included for $650.

TenTec 585 Paragon HF Transceiver:

The Paragon is a top of the line transceiver that includes a general coverage receiver. It covers 160-10 meters, including WARC bands, with 100 watts output. The receiver is fantastic. It has dual VFOs and many memories built in, along with a speech processor. Basically, it has about every feature that a ham could want in an HF rig.

This particular unit works 100% as best I can tell. Since the rig does so many things, I am sure that there is something I didn't test, but I don't know what it is (or I would have tested it!). It has had all updates completed by TenTec.

Cosmetically, it is in extremely nice shape. The front panel is extremely good. Most all of the lettering is clean and crisp. This one is in exceptional condition. It also has the Giehl chip in it making it similar to a Paragon II.

Large manual and power cord included for $650.

TenTec Power Supplies:

TenTec Model 280 power supply, 20 amps at 13 V DC
This supply is quite heavy duty electrically. It has 2 pass transistors, instead of the one that some have. It also has an ammeter on it.
This one works fine, and looks OK as well.
With paper work for $100.

"Switcher / 25" 25 amp switching power supply:
This is a 25 amp switching power supply in a case that matches the early Omni series case, with the metal bezel around it. It is in a case that is the same size as a 243 remote VFO. It has an ammeter on the front, along with Switch, TenTec logo, and output bulb. The front panel basically looks like a 280 power supply with a metal bezel, but says "Switcher/25" on it. It is very quiet, and well shielded, and does not produce any electrical noise that I could find. $150

Icom PS-125 Switching 25 amp power supply
The ICOM PS-125 switching power supply provides 13.8 VDC, at 25 amps. The output cord has the Molex plug prewired for many Icom radios such as the IC-746Pro (above), or any of

the rigs (including Kenwood and Yaesu) that require the heavy duty 6 pin molex connector. It is 4.4 x 3.7 x 11.3 inches in size and weighs under 7 pounds. With paper work for $135

Astron RS-12 A, 13.8 Volt DC Power Supply:

This power supply is rated at 9 amps continuous and 12 amps ICS. It is ideal for most 2 meter rigs, including the 50 Watt rigs.

This Astron power supply features solid-state electronic regulation, EMI filter, fold back current limiting for protection from excessive current and shorted output, and crowbar over-voltage protection.

This particular supply works 100% and looks the same. I can not find a scratch on it. With paper work for $50.

Autek QF-1 A, Active Audio Filter:

This is an audio filter that goes between your rig and speaker. It runs off of 110 V AC or 13 Volt DC, and will peak, notch, or become a low pass or high pass filter. Selectivity (bandwidth) and frequency are adjustable from the front panel. This is the "A" model that also has an additional notch filter added. The input is an 1/4 inch phone plug, and the output is a 1/4 inch jack on the rear panel.

This particular unit works 100%, and looks very, very nice. I can not find a scratch on it.

With paper work for $60.

Heath VHF Wattmeter:

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.

Similar to the HM-102, but for VHF frequencies, with 250 and 25 watt scales. It can also be used to check SWR, and has a remote sensor that can either be left inside the meter, or separated from the actual meter. SO-239 connectors in and out.

This particular meter works great. It looks very close to perfect with no defects that I can find.

Paper work included for $50.

M C Jones VHF/UHF Wattmeter:

This MC Jones Wattmeter is a vintage unit, probably from just after WW II. At that time, it was the gold standard of wattmeters, basically equivalent to a Bird today.

This particular meter has N connectors in and out. It reads 12 Watts full scale in the forward position, and 4 Watts full scale in reflected. It also has an SWR calibrate and SWR scale on the meter. I think the frequency range is from 20 to 1000 MHz, but I am not 100% positive of that. It works well on 2 meters and 440 MHz. The RF sensor unit inside is model 576.3.

This one functions fine, and looks extremely nice for its age. $60

Dual Meter SWR Bridges:

All of these feature two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on the antenna. They were made in Japan, and labeled with various names, including Swan, Siltronix, and Quement. All have SO-239 connectors on each end, and work fine.

All will work on HF, and VHF, covering 3 to 150 MHz, so are ideal for the new rigs that include 6 and 2 meters.

Quement SWB-2
No box for this one, but it works fine and looks great.
With paper work for $40.

Siltronix SWR-2
This meter functions fine, but the meter lens of the meter that reads SWR has a crack in it. Strictly cosmetic. $25

Single meter SWR Bridge:

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
With SO-239 connectors, it covers from 3 to 150 MHz, covering HF, 6 meters, and 2 meters, so is ideal for the new rigs with 6 meters and 2 meters in them.
This one works fine, and looks extremely nice. I do not see any scratches on it, but it does have a previous owners name on it. In its original box with original instructions. $32

I also have many other accessories available such as many different types of microphones, wattmeters, keyers, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

2261. FS: Heathkit Crystal

Yahoo group: amatuerradioswapfest
Date: 2011-01-03 12:46:31 UTC
From: Bry Carling
Topic: 2261 Message: 2261

FOR SALE: Heathkit SB-line / HW-line Crystal

This is a new, unused, original heathkit part intended for extended range on 40m for MARS use.

Comes in the Heath box, and is marked "HEATH" in bold letters on the crystal.

This is a special 40 m crystal that covers 6.900 - 7.200 MHz
Crystal Frequency is 15.7950 MHz

Price reduced to $4.00 plus shipping.

Please contact me off the list to arrange purchase.

From: Bry Carling
Topic: 2262 Message: 2262

FOR SALE:

Group of 15 USA made air variable capacitors.

These are all older parts, many unused. Brands like Hammarlund, Cardwell, Johnson, etc. Small to medium sized parts, from 15 pF to 200 pF. All of these have the typical white ceramic frame. Great condition and ready for your winter homebrew projects.

Will sell for $30.00 plus shipping.

73 de AF4K, Bry

All are air variable caps.
Most are 1/4" shaft, and have a nut and collar, although one or two may have screw mounts... I am throwing in a few extra compression trimmers too.

2266. 2 m rigs, dual band HT, Multimode, andWattmeters FS

Yahoo group: amatuerradioswapfest
Date: 2011-01-08 15:45:05 UTC
From: Ken Simpson, W8EK
Topic: 2266 Message: 2266

Two meter mobile transceivers, dual band HT, Multiband Multimode transceiver, and VHF and HF Wattmeters For Sale:

Alinco DR-150T VHF FM Mobile Transceiver:

The DR-150 is a 50 watt 2 meter transceiver that will also receive on the 440 MHz band, as well as wide band receive for VHF.

Specs include
Tx: 144.00-147.995 MHz FM
Rx: 108.000-173.995/440.000-449.995 MHz FM/AM
Channel Scope
Sweep Scan
CTCSS Tone encoder
Time-out-timer
DSQ selective call
9600bps connector
100 memory channels
Autodialer
S-meter squelch
Remote DTMF control
Plus many other bells and whistles

This one works fine and looks fine also. I do not find any scratches on it. Mobile bracket with hardware, DTMF Microphone, power cord and paper work are included in the original box for $150.

Kenwood TR-7400 Two Meter FM Transceiver:

The Kenwood TR-7400 is a digitally synthesized high performance, 2 meter mobile FM transceiver. It features a full frequency digital LED display. Transmit power may be set for 5 or 25 watts. Frequency range is 144-147.995 MHz. It is 7.3 x 2.875 x 10.6 inches in size and requires 13.8 VDC at 8 amps.

One of the really nice things about the TR-7400 is that the frequency selection is by means of a rotary switch that has a stop at each end. It can be turned from 0 to 9 for both 10s and 100s of KHz. The MHz switch is a 4 position switch with a detent. This means that someone who is blind or vision impaired can easily count the clicks and know the frequency.

This particular unit works 100%. The front panel is very nice and the digital readout is crisp and clear. It includes a hand mic, DC cord, and tilt bail.

With paper work for $45.

Yaesu VX-3 dual band HT:

The compact VX-3R 2m/70cm FM HT Transceiver is loaded with convenience features. In additon to top quality performance on 2m and 70cm, you will also be able to enjoy stereo FM and AM broadcast band reception.

The Yaesu VX-3R 2 meter/440 MHz handheld has extensive receive frequency coverage, providing local-area two-way amateur communications along with unmatched monitoring capability. The VX-3R receives: 500 - 1800 kHz (AM Band), 1.8 - 30 MHz (Shortwave), 30 - 76 MHz (VHF Lowband with 6M), 76 - 108 MHz (FM band), 108 - 137 MHz (Air Band), 137 - 174 MHz (VHF High band with 2M), 174 - 222 MHz, 222 - 420 MHz (VHF band with 220), 420 - 470 MHz (440), 470 - 800 MHz and 800 - 999 MHz (800 band [cellular blocked]). You get a huge 1000 channel memory system.

Power output with the supplied Lithium Ion battery is 1.5 watts VHF and 1 watt UHF. With the optional E-DC-21 DC adapter output jumps to 3 watts and 2 watts!

This particular HT is like new. It works 100%, and looks like new, with no scratches. It has its original box, rubber duck antenna, LiIon Battery, charger, and paper work all for only $155.

Icom IC-706 Mk II G 160 thru 440 MHz transceiver:

The '706' Series represents one of the most popular transceivers in amateur radio histroy. The latest version is the incredibly small Icom IC-706 Mark II G which adds many new features and capabilities not found in previous versions. The "G" is an all-mode transceiver that provides 100 watts on HF and 6 meters and 50 watts on 2 meters plus 20 watts on 440 MHz. It receives from 30 kHz to 199 MHz and from 400 to 470 MHz. It features a removable, remoteable, front panel that allows control of all features. The large LCD display features alphanumeric memory names (9 character) and soft key descriptions. The LCD even supports a simple band scope display. Other advanced features include: IF Shift, RIT, Tone Squelch, Scanning, Noise Blanker, Speech Compressor, Mini Spectrum Scope and Electronic Keyer. This latest version in the 706 series includes the UT-106 DSP module as a standard feature. Despite its compact size (6.56" x 2.28" x 7.88"), it has big, easy to use control dials. With HM-103 hand mic. One or two optional filters may be added.

Features
* .03-199, 400-470 MHz Receive
* Alpha memories
* RIT
* Preamp/ATT
* VFO A/B

* 1 Hz Display
* IF Shift
* Scanning
* S/RF Meter
* 100 Watts HF+6M
* 50 Watts 2M, 20 Watts 440
* 100 Memories
* All band Multimode
* Removable head
* Mini Spectrum Scope
* Electronic Keyer

This one works 100% as best I can determine. It looks extremely nice. Microphone and paper work are included for $650.

Heath VHF Wattmeter:

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.

Similar to the HM-102, but for VHF frequencies, with 250 and 25 watt scales. It can also be used to check SWR, and has a remote sensor that can either be left inside the meter, or separated from the actual meter. SO-239 connectors in and out.

This particular meter works great. It looks very close to perfect with no defects that I can find.

Paper work included for $50.

M C Jones VHF/UHF Wattmeter:

This MC Jones Wattmeter is a vintage unit, probably from just after WW II. At that time, it was the gold standard of wattmeters, basically equivalent to a Bird today.

This particular meter has N connectors in and out. It reads 12 Watts full scale in the forward position, and 4 Watts full scale in reflected. It also has an SWR calibrate and SWR scale on the meter. I think the frequency range is from 20 to 1000 MHz, but I am not 100% positive of that. It works well on 2 meters and 440 MHz. The RF sensor unit inside is model 576.3.

This one functions fine, and looks extremely nice for its age.
$60

I also have many other accessories available.
Just too many to list here.
Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

2267. FS: Variety of Radio Items

Yahoo group: amatuerradioswapfest
Date: 2011-01-09 23:34:41 UTC
From: Bry Carling
Topic: 2267 Message: 2267

FOR SALE - Various Radio Items:

Hallicrafters Sky Buddy S19, Excellent - $165.00

Yaesu FT-101E, may need some work - $225.00

KLM ECHO 70 SSB-CW Transceiver for UHF 70cm Band - $95.00

RL Drake Company receiver 100 kHz - 30.0 MHz PRN1000 - $145.00

Two 250 watt variacs - Each designed for 0 - 250 V AC at 1 amp.
Can be used at 120V AC also.
Available for $27.00 each

Heath HD-15 Phone Patch - cherry, $15.00

Panel meter - 0 to 200 mA DC, 2" diameter with hardware - $5.00

Group of variable capacitors -
Consists of TWO DUAL 500pf air variable capacitors and TWO 350 pF
single air variable capacitors.
ALL FOUR for a total of $20.00 plus shipping.

MFJ-760 notch filter - 80 to 180 MHz... $4.00

Hamtronics 800 MHz receiving converter $4.00

14V DC at 4.5 Amps power supply.
AC operated supply. Based on a circuit Board. Rugged design - great
for filaments or for use with other projects. Excellent working condition.
QTY 1 available for $8.00 plus shipping.

More parts and accessory items will be added soon...

2268. FS: Surplus chasses, transformers, crystals projects and parts

Yahoo group: amatuerradioswapfest
Date: 2011-01-12 14:29:58 UTC
From: Bry Carling
Topic: 2268 Message: 2268

FOR SALE:

Group of four classic air variable capacitors:
QTY 2 X 80 pF and QTY 1 X 100 pF plus a large 30 pF.
Will sell all four for $12.00 plus shipping. Picture and details at:
http://www.af4k.com/miscpart.htm

Various Tube era chassis and radio / audio projects including a Piano-key shortwave table radio, A Bogen E10 tube audio amplifier, most are full of useful parts or could be rebuilt into something fun. Ranging from $1.00 to $8.00 each plus shipping. Combine items to save on shipping.
Pictures and details at:
http://www.af4k.com/miscpart.htm

ALSO:
MFJ-760 Filter for scanners - removes nearby sources of powerful QRM.
Nice box. Only $4.00 plus shipping.

Hamtronics UHF 800 MHz receiving converter. $4.00 plus shipping.

New small RF Chokes, 2 mH pi-wound - $2.00 each (12 available)

New small RF Chokes, 1 mH pi-wound - $1.00 each (32 available)

NEW IN BOX FT243 Crystals on 1030 kHz - $6.00 each (8 available)

Pair of crystals for BC611 - $24.00 per pair:
3735 kHz and 4190 kHz (6 pairs available)
3800 kHz and 4255 kHz (2 pairs available)
3885 kHz and 4340 kHz (6 pairs available)

100 kHz calibrator crystal, tall hc6u (hc13u) - new - $19.00 each
(several available)

73 & thank you for looking - Bry Carling, AF4K

2269. DSP Signal Processors and Audio Filters FS

Yahoo group: amatuerradioswapfest
Date: 2011-01-12 15:14:30 UTC
From: Ken Simpson, W8EK
Topic: 2269 Message: 2269

DSP Signal Processors and Audio Filters For Sale:

Timewave DSP-599zx Deluxe DSP Processor / Audio Filter:

Calling it an audio filter does not tell the whole story. It is really much more. It represents the latest generation of Digital Signal Processing (DSP) audio filtering, incorporating the newest high speed CPU. The LCD display, push buttons and Visible Memory let you see the exact settings of the filters. The DSP-599zx works in all modes. It is a dream for the non-voice modes, as well as voice and CW modes. Data filters supported in the filter are RTTY, Amtor, PACTOR, G-TOR, HF Packet, SSTV, WeFax, SITOR and Clover. It needs 13 V DC at 1 amp.

This particular unit works fine and looks very nice. A wall wort power supply and paper work are included for $300.

JPS NIR-10 DSP Audio Filter

The JPS NIR-10 audio filter allows reception of difficult to read signals and reduces listener fatigue. It operates on radio receiver audio outputs, then provides its own volume adjustable processed audio to an external 3 to 8 ohm speaker. The NIR-10 reduces or eliminates white/pink noise, ignition noise, static interference, RTTY interference, and power line noise. PEAK function reduces white noise interference. The Notch Filter mode removes multiple heterodynes and acts in 3 milliseconds. Band Pass mode has continuously adjustable center frequency, selectable bandwidths (0.25, 0.6 and 1 kHz), vertical-skirted filters, and greater than 60 dB ultimate rejection. The rear panel has RCA phono jacks for Audio Input, Speaker Output, Remote Bypass, and Inverted Remote Bypass. There is also a jack for 12 VDC Input (1 amp). The front panel has a 1/4 inch headphone jack.

This unit works fine, and looks very close to new. I can not find a scratch on it. With paper work for $75.

Grove SP-200 Speaker and Audio Filter

The Grove SP-200 speaker with filter has extensive audio filtration capability which includes peak and notch functions, with variable bandwidth and frequency. In this respect, it seems to be similar to the Autek QF-1 filter, but it is built in to the speaker enclosure. It also has a tape recorder activation feature with a variable hold. Tape out and activation are on the rear panel.

In addition, it has an audio amplifier in it with a volume control and separate bass and treble controls. A noise limiter is also included. To put it another way, it is quite sophisticated!

It is all housed in a nice woodgrain cabinet, about 11 inches wide by 7 high and 8 deep. $175

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

Alinco DR-150T VHF FM Mobile Transceiver For Sale:

The DR-150 is a 50 watt 2 meter transceiver that will also
receive on the 440 MHz band, as well as wide band receive for VHF.

Specs include
Tx: 144.00-147.995 MHz FM
Rx: 108.000-173.995/440.000-449.995 MHz FM/AM
Channel Scope
Sweep Scan
CTCSS Tone encoder
Time-out-timer
DSQ selective call
9600bps connector
100 memory channels
Autodialer
S-meter squelch
Remote DTMF control
Plus many other bells and whistles

This one works fine and looks fine also. I do not find any
scratches on it. Mobile bracket with hardware, DTMF Microphone,
power cord and paper work are included in the original box
for $150 plus shipping from Florida.

Thanks.

2274. FS: PAIR OF 811A Tubes for $6.00

Yahoo group: amatuerradioswapfest
Date: 2011-01-22 19:40:48 UTC
From: Bry Carling
Topic: 2274 Message: 2274

For sale:

Two 811A Tubes for $6.00 total.

These are good looking used tubes, but don't look overheated
or anything. Great for tube homebrew. One is a nice RCA tube and
the other is a Sylvania, but they look the same inside. No boxes
but will pack them carefully for safe shipment.

"Why are these so inexpensive?" you may ask!

Well, the Sylvania one is missing the plate cap, and I don't have it.
Just the wire on top so you will need to connect to that, which is easy
enough.

I figured the RCA one is easily worth the $6 and the other is a freebie.

So - let me know ASAP if you'd like tyhese and they are all yours!

73 de AF4K - Bry

2275. FS: Compactron Tube Sockets

Yahoo group: amatuerradioswapfest
Date: 2011-01-22 20:41:54 UTC
From: Bry Carling
Topic: 2275 Message: 2275

FOR SALE:

More homebrew parts delight...
A group of 8 unusual tube sockets and one male plug.
Most of these appear to be for compactron tubes as noted.

All are new and unused except one.

Two 12-pin sockets - new
One 11-pin socket - new
One 11-pin plug - new
One 11-pin socket - used
Two 9-pin sockets, new (one missing a pin, easily replaced from
a smaller donor socket)

One larger vented socket, sems to be a 4X150A style socket.

I don't want to ship these out separately, so will sell the entire group
for $24.00 plus shipping.

2281. FS: Two aluminum chassis

Yahoo group: amatuerradioswapfest
Date: 2011-01-31 23:40:52 UTC
From: Bry Carling
Topic: 2281 Message: 2281

For sale: Two small aluminum chassis

These are two new boxes intended for use with an intercom case, but would work great for a small ham project too. Shaped and constructed like any conventional chassis, except painted white.

Dimensions: 8" X 6-1/4" X 2-3/4" tall. The lip on the bottom is 1/2" wide and has six handy threaded holes for mounting. There are four small holes in the top of the chassis.

QTY 2 available for $5.00 each.

E-mail for a picture if you need to see one first.

2284. 2 m mobile, dual band HT, DTMF Mics and more FS

Yahoo group: amatuerradioswapfest
Date: 2011-02-01 17:19:54 UTC
From: Ken Simpson, W8EK
Topic: 2284 Message: 2284

Two Meter Mobile transceiver, Dual Band HT, DTMF Touch
Tone Microphones, Digital Interface, and Diplexer For Sale:

Alinco DR-150T VHF FM Mobile Transceiver:

The DR-150 is a 50 watt 2 meter transceiver that will also
receive on the 440 MHz band, as well as wide band receive for VHF.

Specs include
Tx: 144.00-147.995 MHz FM
Rx: 108.000-173.995/440.000-449.995 MHz FM/AM
Channel Scope
Sweep Scan
CTCSS Tone encoder
Time-out-timer
DSQ selective call
9600bps connector
100 memory channels
Autodialer
S-meter squelch
Remote DTMF control
Plus many other bells and whistles

This one works fine and looks fine also. I do not find any
scratches on it. Mobile bracket with hardware, DTMF Microphone,
power cord and paper work are included in the original box
for $150.

Yaesu VX-3 dual band HT:

The Yaesu VX-3R 2 meter/440 MHz handheld has extensive receive
frequency coverage, providing local-area two-way amateur
communications along with unmatched monitoring capability.
The VX-3R receives 500-1800 kHz (AM Band), 1.8-30 MHz
(Shortwave), 30-76 MHz (VHF Lowband with 6M), 76-108 MHz
(FM band), 108-137 MHz (Air), 137-174 MHz (VHF with 2M),
174-222 MHz, 222-420 MHz (VHF with 220), 420-470 MHz (440),
470-800 MHz and 800-999 MHz.
You get a 1000 channel memory system, and can enjoy
stereo FM and AM broadcast reception.

Power output with the supplied Lithium Ion battery is 1.5 watts
VHF and 1 watt UHF. With the optional E-DC-21 DC adapter output
jumps to 3 watts and 2 watts!

This particular HT is like new. It works 100%, and looks like
new, with no scratches. It has a rubber duck antenna, LiIon

Battery and charger in its original box, with paper work all for only $155.

DTMF Touch Tone Microphones:

Alinco:

I have two Alinco hand microphones with 16 digit DTMF Touch Tone Pads, and Up-Down switches on them. Neither have an Alinco number on them, but simply say "Alinco". These have the round 8 pin connector on them, and will also work with most Kenwood and ADI rigs, as well as Alinco. Both work 100% on all 16 tones, and Up-Down switches, plus the mic and PTT switch.

One is a more rectangular shape, with only the PTT, 16 digits, and Up-Down switches. It does have a scratch on the side with the DTMF pad, but is in nice shape. $40

The second one is more of a tear drop shape, and has a lock switch and a switch to turn the DTMF pad off, in addition to the other buttons. It shows some use, but is in very good condition. $45

Icom HM-56 DTMF Deluxe Microphone:

The Icom HM-56 is a DTMF touchtone microphone with up-down switches and a lot of sophisticated functions built in. This was the original mic that was furnished with an IC-229.

This electret mic has a 16 digit DTMF touchtone pad on it along with other special buttons. It also has 14 memories included in it for remembering phone numbers to dial. It has a round 8 pin connector on it, and works with the Icom 28, 38, 228, 229, 449, 901, 1201, 2330, 2400, 2410, 2500 and others. This mic also has an up and a down switch on it. Basically, it is like an HM-12, but with DTMF pad and memories added. These are about $170 new, so that gives some idea of its sophistication!

This one works on all of its functions, including the dialing memories. It looks extremely nice, with no scratches.

With paper work for $90.

Icom HM-8 hand mic with Touch Tone (DTMF) Pad:

The HM-8 has a 12 digit touch tone (DTMF) pad on the front of it, along with an on-off switch for the tones.
Of course it also has the normal PTT switch.
The HM-8 is used on the 25A Red LED, 245, 290, 402, 202S, 451, 471A, plus other rigs.

This particular microphone has an 8 pin round connector,
works fine, and includes paper work for $40.

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in
the mic, and "speed dial". 12 digit touch tone pad on the
front. 8 pin modular plug (like computer LAN).
Looks to be new. $40

Data Signal "Data-Coder 5" Touch Tone Mic
This mic has a 12 digit touch tone pad on it, plus a normal
low impedance microphone. With 4 pin plug. Like new. $38

KDK DM TT-1 DTMF Touch Tone Mic
This mic has a 12 digit touch tone pad on it, with a
switch to turn the pad on and off. With 4 pin plug.
It works fine, and looks great. $35

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently
has stripped and tinned ends. Nice condition. $40

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin plug. Looks to be unused. $40

"Rigblaster Plus / USB" Digital Interface:

Rigblaster Plus / USB by West Mountain Radio
A RIGblaster is the easiest way to connect your radio to
a computer so that you may operate using over 100 existing
and future ham radio sound card software programs.
You will be able to operate over 20 exciting modes that
your radio could not operate otherwise.

Presently available ham radio sound card software, a RIGblaster,
a radio and a computer is the easy and modern way to operate
with every existing or future Amateur Radio sound card program.

This particular unit is complete, in its original box, with all
of the items listed on the enclosed paper work. Software CD is
included, along with many cables. It looks like this unit may
not have ever been used. Most bags appear that they have not
been opened.

West Mountain sells these for about $160. Buy this one for
only $110.

Duplexer / Diplexer :

This unit is designed to split transmit and receive signals
between the 2 meter and 440 MHz bands. Some rigs have only one
output connector; you may want to use separate antennas for 2
meters and for 440 MHz. Or, you might have a combination

2m/440 MHz antenna, and your rig has two outputs. This unit
can be used either to combine or separate the two bands.

Maldol HS-770
2 m and 440 Mhz ports have a foot long coax with PL-259
connectors. Common is a case mounted SO-239 connector.
It works fine and looks good as well. $50

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

Topic: 2285 Message: 2285

Microphones For Sale --
Desk Microphones, DTMF Touch Tone Microphones, Speaker Microphones,
and Microphone Stands and other Microphone Accessories

Desk Microphones:

Kenwood MC-80 Desk Microphone:

The Kenwood MC-80 is an omnidirectional electret condenser
"gooseneck" desk mic. It has UP-DOWN tuning plus a built-in
pre-amp. There is a switch for PTT and also a lock feature.
The mic impedance is 700 ohms so it can be used with a wide
range of models, and it has a frequency response of 200 Hz
to 7 KHz. There is a potentiometer adjustment on the back
of the mic stand to adjust the output level. The mic
terminates to a standard 8 pin Kenwood mic plug. It requires
voltage from the Kenwood transceiver to operate.

This one works fine, sounds good, has a new wind screen,
and is in its original box. With paper work for $75.

TenTec 709A Desk Microphone
Model 709A is an omni-directional dynamic microphones designed for
use as a communications station microphone for Amateur Radio and
other transmitting applications. The unit consists of a die-cast
zinc shell with molded sliding PTT on/off switch, dynamic
microphone element and detachable multi-wire connection cable.
The element has tailored frequency response from 30 Hz to 12 kHz
designed for excellent transmit audio in SSB, AM, and FM modes.
It has an 8 pin connector as used on the Orion, Eagle and newer
TenTec rigs.
This particular mic works 100% and is still in its original box. $60

DTMF Touch Tone Microphones:

Icom HM-56 DTMF Deluxe Microphone:

The Icom HM-56 is a DTMF touchtone microphone with up-down
switches and a lot of sophisticated functions built in. This
was the original mic that was furnished with an IC-229.

This electret mic has a 16 digit DTMF touchtone pad on it along
with other special buttons. It also has 14 memories included
in it for remembering phone numbers to dial. It has a round
8 pin connector on it, and works with the Icom 28, 38, 228, 229,
449, 901, 1201, 2330, 2400, 2410, 2500 and others. This mic
also has an up and a down switch on it. Basically, it is like

an HM-12, but with DTMF pad and memories added. These are
about $170 new, so that gives some idea of its sophistication!

This one works on all of its functions, including the dialing
memories. It looks extremely nice, with no scratches.
With paper work for $90.

Icom HM-8 hand mic with Touch Tone (DTMF) Pad:

The HM-8 has a 12 digit touch tone (DTMF) pad on the
front of it, along with an on-off switch for the tones.
Of course it also has the normal PTT switch.
The HM-8 is used on the 25A Red LED, 245, 290, 402,
202S, 451, 471A, plus other rigs.

This particular microphone has an 8 pin round connector,
works fine, and includes paper work for $40.

Alinco DTMF Touch Tone Microphones:

I have two Alinco hand microphones with 16 digit DTMF Touch
Tone Pads, and Up-Down switches on them. Neither have an
Alinco number on them, but simply say "Alinco". These have
the round 8 pin connector on them, and will also work with
most Kenwood and ADI rigs, as well as Alinco. Both work 100%
on all 16 tones, and Up-Down switches, plus the mic and PTT
switch.

One is a more rectangular shape, with only the PTT, 16 digits,
and Up-Down switches. It does have a scratch on the side with
the DTMF pad, but is in nice shape. $40

The second one is more of a tear drop shape, and has a lock
switch and a switch to turn the DTMF pad off, in addition to
the other buttons. I think it is an EMS-12, but that number
is not on the mic any place. It is in very good condition. $45

KDK DM TT-1 DTMF Touch Tone Mic
This mic has a 12 digit touch tone pad on it, with a
switch to turn the pad on and off. With 4 pin plug.
It works fine, and looks great. $35

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently
has stripped and tinned ends. Nice condition. $35

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in
the mic, and "speed dial". 12 digit touch tone pad on the
front. 8 pin modular plug (like computer LAN).
Looks to be new. $38

Data Signal "Data-Coder 5" Touch Tone Mic
This mic has a 12 digit touch tone pad on it, plus a normal low impedance microphone. With 4 pin plug. Like new. $36

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic. Presently with 4 pin plug. Looks to be unused. $38

HT Speaker Microphones:

Radio Shack speaker mic
Fits most HTs that require the 3.5 mm and 2.5 mm plug, such as Icom, Alinco, Radio Shack, some Yaesu, and others. It works fine and looks fine. $14

Azden SDX-316 Speaker Microphone
Although it has an Azden name plate, it will also work with Icom, some Yaesu, and Alinco that need 3.5 mm and 2.5 mm plugs.
This is the rounder style speaker mic that fits nicely in the palm of your hand. $20

MFJ 286 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug. It works fine. $12

MFJ-287 Speaker Microphone
Fits same HTs as the MFJ 286 above, but is a smaller more compact speaker mic. It works fine, and looks close to new. $15

Heil Wind Screen
This windscreen can be used with a variety of microphones, including the GM-5 above. Excellent condition. $10

Microphone Stands:

Regular round desk stand
Round 6 inch diameter heavy black base, with a 3 inch chrome tube coming up from the middle. Standard 5/8 inch threaded. $15

Rectangular desk stand
Approx 4 inch by 5 inch heavy black base, with a 2 1/2 inch chrome tube from the center. Standard 5/8 inch threaded. $15

Gooseneck Extension
Male connection on one end and female on the other, so it can be used as an extension. Standard 5/8 inch threaded. 7 inches long. $10

Solid 12 inch Extension
Male connection on one end and female on the other, so it can be used as an extension. Solid chrome plated threaded tubing,

with a small hole so that a mic cable can be brought out of the
center of the tube. Standard 5/8 inch threads. 12 inches long. $10

Cables for Heil (and other) Microphones:

Heil CC-1 XLR 4
3 pin XLR Male to 4 pin XLR Female $25

3 pin XLR to stripped and tinned ends
About 10 feet of quality rubber covered mic cable with a 3 pin
XLR connector on one end, and nothing on the other end. Ideal
to add your own connector. Can be used with the CC-1 XLR-4
above. $20

Heil round 8 pin connector to 8 pin modular connector for Icom
Not positive of the number, but it might be HSTA-IM or HSTA-706
$15

Microphone holders:

Electro Voice
Gray colored EV, designed to hold 5/8 to 3/4 inch diameter mics,
and go into a stand with standard 5/8 inch threads. $5

Chrome Mic holder
Similar to EV holder, but chrome metal with a green felt on the
inside to protect the mic. For 1/2 inch to 5/8 inch diameter
microphones. Standard 5/8 inch threads. $5

Microphone Holder from a Kenwood MC-60 desk microphone
This is the black plastic (or is it bakelite ?) piece that
attaches to the mic stand and holds the mic. It includes the
chrome screw/bolt, and looks like new. Ideal if yours broke.
It probably is used on other mics as well. $10

Prices do not include shipping from Florida.

Thanks.

Microphones For Sale --
Desk Microphones, DTMF Touch Tone Microphones, Speaker Microphones, and Microphone Stands and other Microphone Accessories

Desk Microphones:

Kenwood MC-80 Desk Microphone:

The Kenwood MC-80 is an omnidirectional electret condenser "gooseneck" desk mic. It has UP-DOWN tuning plus a built-in pre-amp. There is a switch for PTT and also a lock feature. The mic impedance is 700 ohms so it can be used with a wide range of models, and it has a frequency response of 200 Hz to 7 KHz. There is a potentiometer adjustment on the back of the mic stand to adjust the output level. The mic terminates to a standard 8 pin Kenwood mic plug. It requires voltage from the Kenwood transceiver to operate.

This one works fine, sounds good, has a new wind screen, and is in its original box. With paper work for $75.

TenTec 709A Desk Microphone
Model 709A is an omni-directional dynamic microphones designed for use as a communications station microphone for Amateur Radio and other transmitting applications. The unit consists of a die-cast zinc shell with molded sliding PTT on/off switch, dynamic microphone element and detachable multi-wire connection cable. The element has tailored frequency response from 30 Hz to 12 kHz designed for excellent transmit audio in SSB, AM, and FM modes. It has an 8 pin connector as used on the Orion, Eagle and newer TenTec rigs.
This particular mic works 100% and is still in its original box. $60

Astatic Model 810-6 Gooseneck Microphone:

This mic is on a 12 inch gooseneck. The mic is a brushed metal about 5 1/4 inches long, and is actually part of the gooseneck. The cable goes thru the gooseneck. This has a 2 conductor shielded cable, so it is a quality balanced microphone with about a 4000 ohm impedance. The gooseneck terminates in a standard 5/8 inch threaded connector.

This one works fine and looks good. $45

DTMF Touch Tone Microphones:

Icom HM-56 DTMF Deluxe Microphone:

The Icom HM-56 is a DTMF touchtone microphone with up-down switches and a lot of sophisticated functions built in. This was the original mic that was furnished with an IC-229.

This electret mic has a 16 digit DTMF touchtone pad on it along with other special buttons. It also has 14 memories included in it for remembering phone numbers to dial. It has a round 8 pin connector on it, and works with the Icom 28, 38, 228, 229, 449, 901, 1201, 2330, 2400, 2410, 2500 and others. This mic also has an up and a down switch on it. Basically, it is like an HM-12, but with DTMF pad and memories added. These are about $170 new, so that gives some idea of its sophistication!

This one works on all of its functions, including the dialing memories. It looks extremely nice, with no scratches.
With paper work for $90.

Alinco DTMF Touch Tone Microphones:

I have two Alinco hand microphones with 16 digit DTMF Touch Tone Pads, and Up-Down switches on them. Neither have an Alinco number on them, but simply say "Alinco". These have the round 8 pin connector on them, and will also work with most Kenwood and ADI rigs, as well as Alinco. Both work 100% on all 16 tones, and Up-Down switches, plus the mic and PTT switch.

One is a more rectangular shape, with only the PTT, 16 digits, and Up-Down switches. It does have a scratch on the side with the DTMF pad, but is in nice shape. $40

The second one is more of a tear drop shape, and has a lock switch and a switch to turn the DTMF pad off, in addition to the other buttons. I think it is an EMS-12, but that number is not on the mic any place. It is in very good condition. $45

KDK DM TT-1 DTMF Touch Tone Mic
This mic has a 12 digit touch tone pad on it, with a switch to turn the pad on and off. With 4 pin plug.
It works fine, and looks great. $35

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently has stripped and tinned ends. Nice condition. $35

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in the mic, and "speed dial". 12 digit touch tone pad on the front. 8 pin modular plug (like computer LAN).
Looks to be new. $38

Data Signal "Data-Coder 5" Touch Tone Mic
This mic has a 12 digit touch tone pad on it, plus a normal low impedance microphone. With 4 pin plug. Like new. $36

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic. Presently with 4 pin plug. Looks to be unused. $38

Viking 2000, Model 709
It has a 12 digit pad on the front, and is a rugged mic. Presently with 4 pin plug. $35

Regular Hand Microphone:
This one says Midland on the front, but no model number given. It has a transformer inside, so it can be used for either Hi Z or Low Z. Stripped and tined leads. $25

HT Speaker Microphones:

Azden SDX-316 Speaker Microphone
Although it has an Azden name plate, it will also work with Icom, some Yaesu, and Alinco that need 3.5 mm and 2.5 mm plugs.
This is the rounder style speaker mic that fits nicely in the palm of your hand. $20

MFJ 286 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug. It works fine. $12

MFJ-287 Speaker Microphone
Fits same HTs as the MFJ 286 above, but is a smaller more compact speaker mic. It works fine, and looks close to new. $15

Heil Wind Screen
This windscreen can be used with a variety of microphones, including the GM-5 above. Excellent condition. $10

Microphone Stands:

Regular round desk stand
Round 6 inch diameter heavy black base, with a 3 inch chrome tube coming up from the middle. Standard 5/8 inch threaded. $15

Rectangular desk stand
Approx 4 inch by 5 inch heavy black base, with a 2 1/2 inch chrome tube from the center. Standard 5/8 inch threaded. $15

Gooseneck Extension
Male connection on one end and female on the other, so it can be used as an extension. Standard 5/8 inch threaded. 7 inches long. $10

Cables for Heil (and other) Microphones:

Heil CC-1 XLR 4
3 pin XLR Male to 4 pin XLR Female $25

3 pin XLR to stripped and tinned ends
About 10 feet of quality rubber covered mic cable with a 3 pin XLR connector on one end, and nothing on the other end. Ideal to add your own connector. Can be used with the CC-1 XLR-4 above. $20

Heil round 8 pin connector to 8 pin modular connector for Icom
Not positive of the number, but it might be HSTA-IM or HSTA-706
$15

Microphone holders:

Electro Voice
Gray colored EV, designed to hold 5/8 to 3/4 inch diameter mics, and go into a stand with standard 5/8 inch threads. $5

Chrome Mic holder
Similar to EV holder, but chrome metal with a green felt on the inside to protect the mic. For 1/2 inch to 5/8 inch diameter microphones. Standard 5/8 inch threads. $5

Microphone Holder from a Kenwood MC-60 desk microphone
This is the black plastic (or is it bakelite ?) piece that attaches to the mic stand and holds the mic. It includes the chrome screw/bolt, and looks like new. Ideal if yours is broken. It probably is used on other mics as well. $10

Prices do not include shipping from Florida.

Thanks.

2288. FS: Yaesu FT101E h.f. transceiver

Yahoo group: amatuerradioswapfest
Date: 2011-02-06 03:12:21 UTC
From: Bry Carling
Topic: 2288 Message: 2288

FOR SALE: FS: Yaesu FT101E Transceiver

Covers 160m through 10m, AM-CW-USB-LSB 260 watts p.e.p.

Frequency Range: 3.5-30 MHz (160/80/40/20/15/10 meters)
27.0-27.5 MHz (11/AUX)
10.0-10.5 MHz (WWV receive only)
Modes: USB, LSB, CW, AM
Power Input: SSB 260 watts PEP DC Input (130-150 watts output)
CW 260 watts DC Input (130-150 watts output)
AM 80 watts PEP DC Input (40 watts output)
TX Freq Response: 300 Hz - 2700 Hz
RX Freq Response: 300 Hz - 2400 Hz Standard Yaesu SSB Filter
500 Hz Optional Yaesu CW Filter
Optional Filters: 300 Hz - 1800 Hz SSB Narrow(Fox Tango Filter)
250 Hz CW Narrow (Fox Tango Filter)
Audio Output: 3 watts
AC Power: Rx 35 watts, Tx 300 watts
DC Power: Rx 0.5 amps, Tx 20.0 amps
Weight: 35 lbs
Size: 13-1/2" x 6" x 11-1/2"

Looks good overall. Untested, but complete and in good cosmetic
conmdition.
All of the knobs and controls are original and in good working condition.
The radio is complete and looks clean inside. Front and rear panels both
look
very good. Has a few marks on the sides and top typical of a rig of this age.

Missing the original AC power cord but comes with a power CONNECTOR
that can be
used with this rig, ADD WIRE to the plug to easily make the AC power
cable.

Manual copy of the Operators manual and the service manual will be
supplied as a printable file.

Available for $225.00 plus shipping.

2289. Kenwood TK790H High Band radios

Yahoo group: amatuerradioswapfest
Date: 2011-02-06 04:05:51 UTC
From: Paul Finch
Topic: 2289 Message: 2289

Hello,

I have a few of the Kenwood TK790H radios for sale. These are excellent radios if you need a 2 meter 110 watt radio. They are all come with the standard remote head option and all the parts and pieces. The only thing missing is the fuse holder on the power cord. Kenwood is still selling these radios for almost $1,500.00 and can still be used on commercial frequencies after the narrowband mandate coming January 2013.

If interested email me at WB5IDM@... .

Paul/WB5IDM

2291. FS: Extra Nice Hallicrafters Receiver

Yahoo group: amatuerradioswapfest
Date: 2011-02-08 13:45:44 UTC
From: Bry Carling
Topic: 2291 Message: 2291

FOR SALE: Hallicrafters S19 Receiver

This is an exceptionally nice example of this early shortwave,
all-band receiver. Has 6 Tubes, covers 540 kHz - 50.0 MHz in 4 bands.
Modes: AM, CW, SSB. Has bandspread tuning,
logging scale, original S-meter, internal speaker all in great shape.
Serial number H-96701
Dimensions: 17 1/2" wide X 9" high X 10" deep

Exceptionally nice, working condition. Very clean inside and out.
Original paint. All functions working.
I have seen a lot of these that are repainted or scuffed up badly, but
this one is exceptionally nice. Great for re-creating that early novice station.
Comes with two original manuals and a special Hugo Gernsback book "The
Sky Buddy Sage" - 26 pages about this receiver.

Available for $149.00 plus shipping.

Yahoo group: amatuerradioswapfest
Date: 2011-02-26 22:21:00 UTC
From: Bry Carling
Topic: 2306 Message: 2306

FOR SALE: Heathkit HR10B Receiver

Covers the amateur bands, 80 through 10 meters. Each band is separately calibrated on a large easy-to-read slide-rule dial. The dial is illuminated and provides about 6 inches of bandspread for each band.

The receiver features a signal strength "S" meter, a front panel dial calibration control that operates in conjunction with the 100 kc crystal calibrator provisions (optional), a tuned RF amplifier stage, a crystal filter (2 pole), and an automatic noise limiter circuit. It was introduced in 1968 as color-upgrade successor to the HR-10 introduced in 1961. Coverage is ham-band only. The HR-10B color matches the DX-60B transmitter while the HR-10 matches the DX-60. A review of the HR-10 can be found in the July 1963 QST magazine. A clear copy of the schematic diagram is included.
Available for $115.00 plus shipping

I also have a nice little Heathkit external speaker that would work nicely with this receiver for another $15.00

and Balun. 2KW plus rating.

Vernier tuning dials, and a clear numberical readout for the roller inductor.
Antenna connections uinclude single wire, balanced feedline and coax.
Connection
to transmitter is via SO-239 coax connector.
The beauty of this tuner is the cabinet which matches Collins equipment.
Will outperform most commercially available tuners of today.

Available for $175.00 plus shipping.

Pictures and details here:
http://www.af4k.com/radios.htm

2309. FS: Hallicrafters HA2 TRANVSVERTER

Yahoo group: amatuerradioswapfest
Date: 2011-02-26 23:51:44 UTC
From: Bry Carling
Topic: 2309 Message: 2309

FOR SALE: Hallicrafters HA-2 Transverter for 2m.

For 144 - 148 MHz band allmode use. Converts 10 meter transceiver to 6 or 2 meters.
Maximum drive power level is 25W. The output on 2m is rated for about 60 watts
and operates "all modes."
Front panel controls: Power on/off, range selector, tuning, loading, output indicator, plate current meter. 8 tubes, 5894 in the final. External power supply
requires 750 volts at 120mA, 250 volts at 70mA, minus 60 volts at 10mA.
8"H x 17"W x 8 7/8"D. Production Year 1962.

Available for $85.00 plus shipping.

Pictures and details here:

http://www.af4k.com/radios.htm

2310. desk mike for yaseu

Yahoo group: amatuerradioswapfest
Date: 2011-02-28 02:42:38 UTC
From: bartenderjim
Topic: 2310 Message: 2310

Hi all,
I have a Yaseu ft-89000 I am uwsing for a base. I am lookiing for an inexpensive desk mike for this radio. It needs to have the modular plug for the radio end. I am inexpewrienced in the radio hobby (but am learning quickly). I can be reached off list if someone has one they would like to sell.
Thanks
Jim

2313. REDUCED: Drake TR3 Transceiver

Yahoo group: amatuerradioswapfest
Date: 2011-03-05 14:14:43 UTC
From: Bry Carling
Topic: 2313 Message: 2313

FOR SALE: Drake TR3 Transceiver

The R. L. Drake model TR-3 is an SSB-CW-AM transceiver designed for the transmission and reception of upper and lower sideband signals on the 80 through 10 meter amateur bands. AM and CW capabilities are included.

Ideal for both fixed station use in conjunction with the model AC-3 or AC4 120 volt AC Power Supply, or for mobile installations using the DC-3 or DC4 12 volt DC Power Supply.

The 300 watt PEP input on SSB enables the TR-3 to give an excellent account of itself barefoot and it will drive the highest powered ham linear amplifiers.

Upper and lower sideband selection is accomplished by switching between two Drake designed and manufactured 9 MC crystal lattice filters with 2.1 kc pass-bands. Among the other features included on the TR-3 are VOX and PTT, shifted carrier CW, separate RF and AF gain controls, linear permeability tuned VFO with vernier scale, transmitting and receiving AGC, and separate receiver S-meter and transmitter plate ammeter. The addition of the accessory RV- 3 remote VFO speaker combination enables the operator to receive, transmit or transceive throughout the band being used without disturbing the setting of the TR-3 tuning dial. This is useful for working DX stations operating outside the United States Phone Bands, or for working near your own frequency in search of a clear spot under crowded band conditions.

FREQUENCY COVERAGE: Full coverage on all amateur bands 10 thru 80 meters, in seven 600 k c ranges ; 3.5-4.1 mc, 7.0 to 7.6 mc, 13.9 to 14.5 mc, 21 to 21.6 mc, 28 to 28.6 mc, 28.5 to 29.1 mc, 29.1 to 29.7 mc.
bullet LINEAR PERMEABILITY TUNED VFO: Tunes 4.9 to 5.5 mc for all ranges, 9 mc I.F. minus VFO range overs 80 meters, 9 mc I. F. plus VFO range covers 20 meters. VFO and crystal oscillator heterodyned in premixer for 40, 15, and three 10 meter ranges.
bullet
DIAL CALIBRATION: 10 kc divisions on main tuning dial and interpolation to 1 kc on tuning knob skirt . Effective length of circular dial scale is over 14 inches.
bullet
FREQUENCY STABILITY: High stability permeability tuned VFO tunes same range on all bands . Drift is less than 100 cycles after warm-up, and less than 100 cycles for plus or minus 10% line voltage change.
bullet
FRONT PANEL CONTROLS:
bullet Main Tuning has fluted knob with adjustable 25 division skirt. Tunes VFO and rotates main dial.

bullet RF Tune tunes the RF circuit common to receiver RF amplifier and transmitter driver stages. 0-10 scale.
bullet Plate and Load tuning adjust pi-network capacitors in transmitter for proper resonance and loading on each band.
bullet Band switch selects desired ham band (see frequency coverage).
bullet Function switch has four positions CAL, SSB, X-CW, X-AM. CAL operates built-in 100 kc crystal calibrator for accurate setting of main tuning hair line indicator and knob skirt SSB provides SSB operation, either VOX or PTT, and is receive position for SSB, CW, and AM. X-CW (transmit CW) inserts carrier , converts `Xmtr Gain´ control to carrier injection for tuning and CW transmitting. X-AM (transmit AM) inserts carrier and screen modulator for AM transmitting.
bullet XMTR GAIN functions as mike audio gain on SSB and AM, and as carrier injection control on X-CW for tune and CW.
bullet RCVR GAIN knob controls receiver AF gain and power ON-OFF switch. Lever behind knob controls setting of RF gain.
bullet Sideband switch in conjunction with indicator lights marked Upper and lower selects desired sideband by connecting into the circuit either the upper or lower sideband filter.

There is no power supply with this radio.

2314. HF Antennas and antenna related items FS

Yahoo group: amatuerradioswapfest
Date: 2011-03-05 14:36:09 UTC
From: Ken Simpson, W8EK
Topic: 2314 Message: 2314

HF Antenna related items For Sale -- Vertical antennas,
SWR Bridges, Legal Limit Balun, Low Pass TVI Filters,
Connectors and more

Gap "Titan DX" HF Vertical Antenna:

The Titan is an 8 Band Multiband DX Antenna. It covers 80
thru 10 meters, including the WARC bands. It covers the
entire band on 40 thru 10, and about 100 KHz on 75/80 meters.
It is about 25 feet tall, and includes a counterpoise, so
that no radials are required.

One of the primary virtues of the Titan is the GAP center
feed. By elevating the feed the earth loss is dramatically
decreased, which means the RF is going out to make the contact
instead of into the ground to warm the earth. Reducing the
earth loss eliminates the need for a radial system. The
Titan requires NO RADIALS.

This particular antenna is in extremely nice shape with no
corrosion. Most of the aluminum is still shiny.

These sell new for about $400. This one is close to new,
with paper work for $250. Pick up only near Ocala FL, just
off of I-75.

Hustler 4BTV "Base station" HF vertical antenna

The 4BTV covers 10, 15, 20, and 40 meters.
It can also cover 75/80 meters by using an RM-80 S resonator.

This one is in extremely good shape. It actually still shines!
No corrosion evident. Penetrox was used on the original
assembly, so it comes apart easily.

Paper work is included. but connection points are well marked
for easy reconstruction. $120

I would prefer pickup near Ocala, Florida, just off of I-75.
It will easily fit inside a minivan, or it can be broken down
more to go inside a car. It is possible to ship it, but the
cost is high due to it being oversize. Obviously, shipping
is not included in the price.

SWR Bridge / Field Strength Meter:

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter

With SO-239 connectors, it covers from 3 to 150 MHz, covering HF, 6 meters, and 2 meters, so is ideal for the new rigs with 6 meters and 2 meters in them.

This one works fine, and looks extremely nice. I do not see any scratches on it, but it does have a previous owners name on it. In its original box with original instructions. $32

Dual Meter SWR Bridges:

Both of these feature two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on the antenna. They were made in Japan, and labeled with various names, including Swan, Siltronix, and Quement. Both have SO-239 connectors on each end, and work fine.

Both will work on HF, and VHF, covering 3 to 150 MHz, so are ideal for the new rigs that include 6 and 2 meters.

Quement SWB-2
No box for this one, but it works fine and looks great.
With paper work for $40.

Siltronix SWR-2
This meter functions fine, but the meter lens of the meter that reads SWR has a crack on the very right edge of it. Strictly cosmetic. $25

Heavy Duty Legal Limit Plus Balun:

HyGain BN-4000 Balun

A balun is used to convert an unbalanced load such as coax to a balanced load such as a beam or dipole. It will also help reduce radiation from the coax feedline, that could reduce TVI and other interference.

The BN-4000 D is a 1 to 1 ratio broadband 50 Ohm current balun, and is potted to seal out moisture. It is rated at 4000 Watts for increased power handling capabilities. Frequency range is 1 MHz to 54 MHz. It has stainless steel hardware and comes with a SO-239 connector.

This particular unit works fine and looks really great. It would appear that it has not been used. All connections are clean and shiny; the case also shines.

Paper work is included for $80.

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter to reduce harmonic interference. All have SO-239 connectors and include paper work.

Drake TV-3300
This is a modern low pass filter has been optimized to have more attenuation in the 40 MHz region, where many TVs have their IF. It is good for 1000 Watts "average" according to the manual, and has over 80 db attenuation at 41 MHz.
This one looks great. $30

B & W FL-10/1500
This filter cuts off just above 10 meters, and handles 1500 Watts. It is the latest model B&W filter.
It looks very close to new. $40.

Coax connectors and adapters For Sale:

Prices are per connector. Several of each are available.
These are NOS (have not been used).

"N" Connector - Double Male - $8

BNC male for coax cable
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $3

BNC "T" - two female and one male - $3

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male (PL-259) connection - $5

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

2315. F/S DX RPT VHF modules, Tait VHF T-800 Slim Line, and Doug Hall 4RV Voter

Yahoo group: amatuerradioswapfest
Date: 2011-03-05 18:23:55 UTC
From: nicholascerreto
Topic: 2315 Message: 2315

I have up for sale:

1- DX Eclipse VHF Exciter/TX. Has built in CTCSS. I use these in all my RPT systems/base stations. Are fully programable. And are NB if needed.
Has 20 watts adj out of the Module
Looking for 400.00

1-DX Eclipse VHF RX- Has built in CTCSS, I use these in all of my RPT systems/base stations. Are fully programable. And are NB if needed.

Looking for 400.00

I would sell the pair for 600.00

1-Tait T-800 VHF Slim Line RPT TX and RX. Eprom programable. has after market CTCSS tone boards in them. TX is 20 watts out

Would like 400.00

1-Doug Hall 4RV Voter. Voter was pulled from working HAM site. And was bench checked and in working order.

Would like 300.00

All plus shipping.

Open to offers.

Paypal plz.

Thx

Nick, KC8BQS

2316. F/S Tait RPT Equipment, DX RPT Equipment, TX/RX Duplexers, KW Moblie Radios

Yahoo group: amatuerradioswapfest
Date: 2011-03-06 14:08:10 UTC
From: nicholascerreto
Topic: 2316 Message: 2316

Good morning group..

I have up forsale the following:

1-Tait T-800 Slim line repeater. VHF TX puts out 20 watts. RX is at .3 uV sen. Repeater is in great shape. And is eprom programable. They have aftermarket CTCSS Boards in them.

19" Rack mount

Looking for 300.00 obo

1-DX RPT Module VHF TX 15 watts out. And is computer programable.
Good Shape.

Looking for 250.00 obo

1-DX RPT Module VHF RX .25 uV sen. And is computer programable
Good Shape.

Looking for 250.00 obo

1-DX RPT Module UHF TX 15 watts out. And is computer programable.
Good Shape

Looking for 250.00 obo

1-DX RPT Module UHF RX about .25 uV sen. And is computer programable.

Looking for 250.00 obo

(I would incuded service manauls for the RPT equipment)

1-TX/RX 4 can VARI-Notch Duplexer 19" Rack mount VHF

Looking for 300.00 obo

1-KW TK-8180 Moblie Radio UHF. Radio is in great shape. Would come with PWR Cord , Mounting bracket and HD Mic

Looking for 300.00 obo

1-KW TK-7180 Moblie Radio VHF. Radio is NEW. Comes with PWR Cord, Mounting bracket, and HD Mic.

Looking for 300.00 obo

1-KW TK-790 Moblie Radio VHF is Stan Head.Type 2 Comes with PWR Cord, Mounting bracket and HD Mic.

Looking for 225.00 obo

I am open to offers all of the above equipment.

Shipping would be free if you buy more than one item.

Im in OH.

Please buy with ease.. I have been a two-way tech for over 15 years and in HAM Radio for 16.

Please email me me off list. And you have any questions please ask.

Thx

73

2318. FS: 1500 Watt tuner

Yahoo group: amatuerradioswapfest
Date: 2011-03-09 22:13:54 UTC
From: Bry Carling
Topic: 2318 Message: 2318

FOR SALE: Beautiful High Power HF Antenna Tuner with Roller Inductor
and Balun.
Has heavy duty components and must be at least 1500 watt rating.
Vernier tuning dials, and a clear numberical readout for the roller inductor.
Antenna connections uinclude single wire, balanced feedline and coax.
Connection to the transmitter or transceiver is via SO-239 coax connector.
Another nice feature of this tuner is the perforated, slant cabinet,
which matches Collins equipment.

Will outperform most commercially available tuners of today.

Available for $175.00 plus shipping.

Pictures and details here:

2324. Accessories for many HTs FS

Yahoo group: amatuerradioswapfest
Date: 2011-03-25 15:53:36 UTC
From: Ken Simpson, W8EK
Topic: 2324 Message: 2324

Many HT Accessories For Sale:

Yaesu HT Accessories:

Real Yaesu Battery pack for Yaesu VX-2 or VX-3 HT
FNB-82 LI Lithium Ion Battery Pack fits both the VX-2 and the
VX-3. 3.7 volts, 1000 mahr, works great, and holds a charge
like new. $22

Belt Clip for Yaesu FT-207, with hardware. $8

Wrist Strap for Yaesu FT-209, and probably others $4

HT Speaker Microphones:

Radio Shack speaker mic
Fits most HTs that require the 3.5 mm and 2.5 mm plug,
such as Icom, Alinco, Radio Shack, some Yaesu, and others.
Works fine and looks fine. $14

Azden SDX-316 Speaker Microphone
Although it has an Azden name plate, it will also work
with Icom, some Yaesu, and Alinco that need 3.5 mm and
2.5 mm plugs.
This is the rounder style speaker mic that fits nicely in
the palm of your hand. $20

MFJ 286 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the
TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as
others. It has a 3 conductor 3.5 mm plug and a 2 conductor
2.5 mm plug. It works fine. $12

MFJ-287 Speaker Microphone
Fits same HTs as the MFJ 286 above, but is a smaller more
compact speaker mic. It works fine, and looks close to new. $15

Icom BC-127 A, Battery Charger for Icom IC-Q7A
Dual Band HT:

This charger charges two AA NiCads (or NiMH) for the
IC-Q7 A Dual band HT, and Icom R-2 receiver, and probably
others.

This appears to be new, unused, still in its bag.
Icom lists them at $21.
Buy this one for $12.

Rubber Duck Antennas with SMA Connectors:

All of these have SMA connectors as used by most modern multiband HTs. All work fine, and look very close to new. All provide gain over the standard rubber duck.

MFJ 1720 S, for 6 meters, 2 meters and 440 MHz
This MFJ Triple Band HT FlexiDuck antenna is 19 inches tall. It is a 5/8 Wave on 440 MHz to give you 3.2 dB gain. On 2 Meters it is 1/4 Wave antenna with 2.15 dBi gain. On 6 Meters you get an efficient full size 1/4 Wave antenna for full-size performance. $25

Full size SMA for 2 meters and 440 MHz
This is a very flexible antenna that is a quarter wave on both 2 meters and 440 MHz. $20

Rubber Duck antennas for your HT:
All are for 2 meters, are in good condition, and are $10 each, unless stated otherwise.

BNC - About 7 inches long
BNC - Original from Kenwood TH-215, about 5 inches long
BNC - Stubby about 4.5 inches long

5/16 inch threaded, as used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Stubby, about 4.5 inches long - $20

BNC Stubby for 440 MHz, 3 inches long

Protective Cases:

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1 and PB-4 battery packs. It can also be used with the smaller PB-2 and PB-3 packs. Black color. Great condition. $15

Case for Drake TR-33C
This is the black case that fits the Drake TR-33C, and has cutouts in the back for antenna, power, etc. It includes the shoulder strap, and is in good shape. $12

Case for Drake TR-22
As above, but for the TR-22. No shoulder strap. $10

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap. $25

Accessories for Kenwood TH-205, TH-215, TH-225, TH-415,
and other HTs in that series:

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger
PB-1 and PB-4 battery packs. It can also be used with
the smaller PB-2 and PB-3 packs. Black color. Great
condition. $15

Kenwood BH-2 Belt clip with screws
Used on many Kenwood HTs. $8

Kenwood Wrist Strap for TH-215, plus many other HTs. $4

Original Kenwood Rubber Duck antenna from TH-215. $10

Kenwood BC-2 Charger for PB-2 batteries. $12

BNC to PL-259 antenna adapter $5

Accessories for the Kenwood TH-21 / 31 / 41 series HTs:

Kenwood BH-3 belt clip and hardware for Kenwood TH-21 / 31 / 41
series HTs. $8

Kenwood W09-0315 charger
This charger is used to charge the larger PB-21 H batteries
for the TH-21 series, and also on other Kenwood radios.
It produces 10.5 V DC at 42 ma, with a standard 2.1 mm
coaxial connector. $12

DEAD Kenwood PB-21 battery pack
This battery pack is used on the TH-21 series HTs. This one is
dead, but can be used for rebuilding. It is in good physical
condition, with no cracks. $10

Kenwood Rubber duck antenna for the TH-21 HT
Shorter "Stubby Duck" from Kenwood. $20

Accessories for the Azden PCS-300 HTs:

Azden SDX-316
This is the rounder style speaker mic that fits nicely in
the palm of your hand. Has 3.5 mm and 2.5 mm plugs for
Azden, Icom, some Yaesu, and others. It works great, and

looks great also. $20

Battery charge adapter for Azden PCS-300 HT
This is an adapter that permits one to charge the battery
of the Azden PCS-300, 2 meter HT, outside of the HT itself.
Usually, one must have the battery inside the HT, but this
lets you charge a second battery outside of the HT. The
original charger is used. If you have a PCS-300 HT, you
need this adapter.
It works fine, and looks like new. $3

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
This adapter can be used on any HT with a BNC connector. $5

Santec HT Accessories:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap.
The case itself is in very nice shape. The leather
shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a
service pack. It has schematics, circuit explanations,
voltages, etc. $18

Battery pack for Yaesu VX-2 or VX-3 HT
Lithium Ion Battery Pack that fits both the VX-2 and the VX-3
3.7 volts, 1200 mahr, works great, and holds a charge like new.
$15

HT Belt Clips and Wrist Straps:

Belt Clips:
All include the hardware with the belt clip and are $8 each.
Kenwood BH-2 for TR-2500, TH-205, TH-215, and many others
Kenwood BH-3 for Kenwood TH-21 / 31 / 41 series HTs
Motorola
Yaesu FT-207

Wrist Straps for various HTs - $4 each
Kenwood TH-215 / 225 / 415, TR-2500, etc.
Kenwood TR-2400
Yaesu FT-209

Duplexer / Diplexer :

This unit is designed to split transmit and receive signals between the 2 meter and 440 MHz bands. Some rigs have only one output connector; you may want to use separate antennas for 2 meters and for 440 MHz. Or, you might have a combination 2m/440 MHz antenna, and your rig has two outputs. This unit can be used either to combine or separate the two bands.

Maldol HS-770
2 m and 440 Mhz ports have a foot long coax with PL-259 connectors. Common is a case mounted SO-239 connector. It works fine and looks good as well. $50

DTMF Touch Tone Microphones:

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in the mic, and "speed dial". 12 digit touch tone pad on the front. 8 pin modular plug (like computer LAN). Looks to be new. $38

Data Signal "Data-Coder 5" Touch Tone Mic
This mic has a 12 digit touch tone pad on it, plus a normal low impedance microphone. With 4 pin plug. Like new. $36

KDK DM TT-1 DTMF Touch Tone Mic
This mic has a 12 digit touch tone pad on it, with a switch to turn the pad on and off. With 4 pin plug. It works fine, and looks great. $35

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently has stripped and tinned ends. Nice condition. $35

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic. Presently with 4 pin plug. Looks to be unused. $38

I also have many other items, including HF rigs, power supplies, microphones, and other items too numerous to list. Please let me know what you need. I might have it.

Prices do not include shipping from Florida.

Thanks.

2325. Transceivers, Power Supplies, Desk Mics, etc. FS

Yahoo group: amatuerradioswapfest
Date: 2011-04-02 13:19:01 UTC
From: Ken Simpson, W8EK
Topic: 2325 Message: 2325

Several Transceivers, Power Supplies, Desk Microphones, etc. For Sale:

Icom IC-746 Pro, 160 thru 2 meter Multi mode transceiver:

The Icom IC-746 Pro covers 160-10 meters plus 6 and 2 meters all mode. 100 Watts of output is available on all bands - HF, 50 MHz and 144 MHz, making the IC-746 Pro a practical choice for all-around base station use. The die-cast aluminum chassis and a large cooling fan help to stabilize the PA circuit, providing 100% full duty cycle operation. The new Pro version features 32 bit floating point DSP and 24-bit AD/DA converter. There are NO more expensive optional filters to buy. The digital IF filter allows one to select 51 filter bandwidths. There are three user selectable filter memories per mode. Soft and sharp filter shapes can be selected in both SSB and CW modes independently. You can also change the settings on the fly and compare! For repeater operation theres is a built-in tone encoder and decoder with 50 CTCSS and 108 DTCS based tones. There is even a built-in Baudot RTTY demodulator.

It has 100 alphanumeric memories, digital RF speech compression, spectrum display, Manual and Automatic Notch, digital Twin PBT, Noise Blanker, CTCSS encode/decode, APF, two stage preamp, automatic antenna tuner and electronic keyer. A built-in automatic antenna tuner operates on the HF bands plus 6 meters. The 746 Pro requires 12 VDC at 23 amps. It is 11.3 x 4.8 x 12.5 inches in size and weighs 20 Lbs. See the May 2002 issue of QST for a review of this radio.

Features
* Spectrum Scope
* 102 Memories
* RIT/XIT
* Digital Noise Reduction
* Manual and Automatic Notch
* Digital Twin PBT
* Dual Display
* 100 Watt Output
* 40 Watt Output (AM)
* Digital RF Speech Compressor
* Microphone Equalizer
* Monitor Transmit Audio
* SWR Plotting

* Built-in Automatic Antenna Tuner 180-6 Meters
* Full Break-In CW
* SSB/CW Synchronous Tuning
* 100% Duty Cycle
* Rx Antenna Jack
* 32 bit DSP
* 1 Hz Readout
* 4 Channel Memory Keyer
* RF Attenuator 6/12/18 dB
* RTTY Demodulator
* CW Pitch and CW Reverse
* Adjustable Transmit Bandwith
* Triple Band Stack Registers

This one works 100% as best I can tell, and looks close to the same. I can not find a scratch on it. With paper work for $1050.

TenTec 585 Paragon HF Transceiver:

The Paragon is a top of the line transceiver that includes a general coverage receiver. It covers 160-10 meters, including WARC bands, with 100 watts output. The receiver is fantastic. It has dual VFOs and many memories built in, along with a speech processor. Basically, it has about every feature that a ham could want in an HF rig.

This particular unit works 100% as best I can tell. Since the rig does so many things, I am sure that there is something I didn't test, but I don't know what it is (or I would have tested it!). It has had all updates completed by TenTec.

Cosmetically, it is in extremely nice shape. The front panel is extremely good. Most all of the lettering is clean and crisp. This one is in exceptional condition. It also has the Giehl chip in it making it similar to a Paragon II.

Large manual and power cord included for $650.

TenTec Power Supply:

"Switcher / 25" 25 amp switching power supply:
This is a 25 amp switching power supply in a case that matches the early Omni series case, with the metal bezel around it. It is in a case that is the same size as a 243 remote VFO. It has an ammeter on the front, along with Switch, TenTec logo, and output bulb. The front panel basically looks like a 280 power supply with a metal bezel, but says "Switcher/25" on it. It is very quiet, and well shielded, and does not produce any electrical noise that I could find. $150

Icom PS-125 Switching 25 amp power supply
The ICOM PS-125 switching power supply provides 13.8 VDC, at 25 amps. The output cord has the Molex plug prewired for many Icom radios such as the IC-746Pro (above), or any of the rigs (including Kenwood and Yaesu) that require the heavy duty 6 pin molex connector. It is 4.4 x 3.7 x 11.3 inches in size and weighs under 7 pounds. With paper work for $135

Shure 444 D Dual Impedance Desk Microphone:

The Shure 444 D has voice shaping built in to it, providing greater articulation at communications frequencies. Of course it has a PTT switch on the base, that can be used as a momentary switch, or can be locked in position. Also under the base are switches for High or Low Z. It also has a switch for VOX or PTT under the base.

This mic is the black color, has a coiled cord, and is in very nice shape. It works fine, and looks great. It presently has stripped and tinned ends, ready to add the connector of your choice.

With paper work for $75.

Kenwood MC-80 Desk Microphone:

The Kenwood MC-80 is an omnidirectional electret condenser "gooseneck" desk mic. It has UP-DOWN tuning plus a built-in pre-amp. There is a switch for PTT and also a lock feature. The mic impedance is 700 ohms so it can be used with a wide range of models, and it has a frequency response of 200 Hz to 7 KHz. There is a potentiometer adjustment on the back of the mic stand to adjust the output level. The mic terminates to a standard 8 pin Kenwood mic plug. It requires voltage from the Kenwood transceiver to operate.

This one works fine, sounds good, has a new wind screen, and is in its original box. With paper work for $75.

Cables for Heil (and other) Microphones:

Heil CC-1 XLR 4
3 pin XLR Male to 4 pin XLR Female $25

3 pin XLR to stripped and tinned ends
About 10 feet of quality rubber covered mic cable with a 3 pin XLR connector on one end, and nothing on the other end. Ideal to add your own connector. Can be used with the CC-1 XLR-4 above. $20

Heil round 8 pin connector to 8 pin modular connector for Icom
Not positive of the number, but it might be HSTA-IM or HSTA-706
$15

Regular round desk stand
Round 6 inch diameter heavy black base, with a 3 inch chrome tube coming up from the middle. Standard 5/8 inch threaded. $15

I also have many other accessories available such as many different types of microphones, wattmeters, keyers, and many other ham accessories. Just too many to list here.
Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

2326. F/S Siltronix 1011D Comanche - $300 (Salisbury)

Yahoo group: amatuerradioswapfest
Date: 2011-04-06 05:08:35 UTC
From: Garry
Topic: 2326 Message: 2326

This is a working Black face Siltronix Comanche 1011D. It has a Shure desk mike, a FD1011 frequency counter and a model 90 VFO. All items work well the only known problem is a couple bars are out on the LED of the FD1011 counter. The tubes are all in good shape and after proper warmup it is very stable on frequency. I do have a D104 that is wired for the 1011D and will include it for $50. Radio covers 10 and 11 meters and has very strong clear transmit. Any questions feel free to contact me.

Location Salisbury,NC

2327. Reduced: RF Tank Coils

Reduced - RF Tank Coils for sale.

Group of 4 useful RF power amplifier tank coils, suitable for QRO applications etc.

GROUP OF 4 TANK COILS

Here are four surplus RF tank coils. Two are plug-in,
jackbar types with center tap and coupling coil. One has
the banana plugs missing but these are easy to replace
with standard banana plug parts. The other two comprise
a ceramic coil, and a phenolic core coil.

Available for $9.00 each or will sell all four for
$30.00 plus shipping.

From: Ken Simpson, W8EK
Topic: 2329 Message: 2329

Microphones For Sale --
Desk Microphones, DTMF Touch Tone Microphones, Speaker Microphones, and other Microphone Accessories

Desk Microphones:

Kenwood MC-80 Desk Microphone:

The Kenwood MC-80 is an omnidirectional electret condenser "gooseneck" desk mic. It has UP-DOWN tuning plus a built-in pre-amp. There is a switch for PTT and also a lock feature. The mic impedance is 700 ohms so it can be used with a wide range of models, and it has a frequency response of 200 Hz to 7 KHz. There is a potentiometer adjustment on the back of the mic stand to adjust the output level. The mic terminates to a standard 8 pin Kenwood mic plug. It requires voltage from the Kenwood transceiver to operate.

This one works fine, sounds good, has a new wind screen, and is in its original box. With paper work for $75.

Astatic Model 810-6 Gooseneck Microphone:

This mic is on a 12 inch gooseneck. The mic is a brushed metal about 5 1/4 inches long, and is actually part of the gooseneck. The cable goes thru the gooseneck. This has a 2 conductor shielded cable, so it is a quality balanced microphone with about a 4000 ohm impedance. The gooseneck terminates in a standard 5/8 inch threaded connector.

This one works fine and looks good. $45

DTMF Touch Tone Microphones:

KDK DM TT-1 DTMF Touch Tone Mic
This mic has a 12 digit touch tone pad on it, with a switch to turn the pad on and off. With 4 pin plug.
It works fine, and looks great. $35

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently has stripped and tinned ends. Nice condition. $35

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in the mic, and "speed dial". 12 digit touch tone pad on the front. 8 pin modular plug (like computer LAN).
Looks to be new. $38

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin plug. Looks to be unused. $38

Viking 2000, Model 709
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin plug. $35

Regular Hand Microphone:
This one says Midland on the front, but no model number
given. It has a transformer inside, so it can be used for
either Hi Z or Low Z. Stripped and tined leads. $25

HT Speaker Microphones:

Azden SDX-316 Speaker Microphone
Although it has an Azden name plate, it will also work
with Icom, some Yaesu, and Alinco that need 3.5 mm and
2.5 mm plugs.
This is the rounder style speaker mic that fits nicely in
the palm of your hand. $20

MFJ 286 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the
TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as
others. It has a 3 conductor 3.5 mm plug and a 2 conductor
2.5 mm plug. It works fine. $12

MFJ-287 Speaker Microphone
Fits same HTs as the MFJ 286 above, but is a smaller more
compact speaker mic. It works fine, and looks close to new. $15

Heil Wind Screen
This windscreen can be used with a variety of microphones,
including the GM-5. Excellent condition. $10

Cables for Heil (and other) Microphones:

Heil CC-1 XLR 4
3 pin XLR Male to 4 pin XLR Female $25

3 pin XLR to stripped and tinned ends
About 10 feet of quality rubber covered mic cable with a 3 pin
XLR connector on one end, and nothing on the other end. Ideal
to add your own connector. Can be used with the CC-1 XLR-4
above. $20

Heil round 8 pin connector to 8 pin modular connector for Icom
Not positive of the number, but it might be HSTA-IM or HSTA-706
$15

Microphone holders:

Electro Voice
Gray colored EV, designed to hold 5/8 to 3/4 inch diameter mics, and go into a stand with standard 5/8 inch threads. $5

Chrome Mic holder
Similar to EV holder, but chrome metal with a green felt on the inside to protect the mic. For 1/2 inch to 5/8 inch diameter microphones. Standard 5/8 inch threads. $5

Microphone Holder from a Kenwood MC-60 desk microphone
This is the black plastic (or is it bakelite ?) piece that attaches to the mic stand and holds the mic. It includes the chrome screw/bolt, and looks like new. Ideal if yours is broken. It probably is used on other mics as well. $10

Prices do not include shipping from Florida.

Thanks.

2330. REDUCED: Military Sirplus VHF power amplifier

Yahoo group: amatuerradioswapfest
Date: 2011-04-09 20:30:36 UTC
From: Bry Carling
Topic: 2330 Message: 2330

REDUCED: MIlitary Sirplus VHF power amplifier
VHF Linear Amplifier, 50 - 100 MHz, AM-1180/GRC

This military surplus workhorse was designed to cover 50-100 MHz, and the power level is officially 250 Watts max input. Great for 6 meter DX. It was originally
used with the T-302/PRC transmitter. Complete with 4X150A tube and everything
needed. Excellent condition, Easily modified to run more power with a 4CX250B
tube as W4DEX and others have done. Simple, basic workhorse amplifier. Easy to
get at everything internally and not a huge size. Needs power supply of approx:
1250V DC at 200 mA, and 6V AC at 2.5 A. You could sSimply add a regulated
screen supply for all-mode linear amplifier operation. Uses N connectors for RF in
and RF out. Dimensions: 12" X 6.25" X 13.5" deep.

Was $115.00

Now available for $75.00 plus shipping

Picture and details at:

http://www.af4k.com/radios.htm

73 and thanks for looking at this electronic marvel!

FOR SALE: Lafayette HA600 Amateur Bands Receiver

This is a nice amateur bands communications receiver. Covers 80/75m, 40m, 20m, 15m, 10 AND 6 meters.
Many young radio enthusiasts in the early 1970s saved up all their pay from mowing lawns to buy one of these and then used it as their first novice receiver.
Model is 99-2595WX. This was the later model of these type receivers and it has significant improvments over earlier versions.
Requires an external speaker. Modes AM/SSB and CW. Coverage 80 - 6m.
Produced 1970-1975. Comes with a handy digital PDF copy of the manual.
Excellent, like-new cosmetic condition, looks beautiful. One knob is not original. Looks like new otherwise.

Available for $89.00 plus shipping

Pictures and details at:
http://www.af4k.com/radios.htm#HA600

2341. Reduced: Hallicrafters SX-101A Receiver

Yahoo group: amatuerradioswapfest
Date: 2011-04-30 17:48:20 UTC
From: Bry Carling
Topic: 2341 Message: 2341

Reduced: HALLICRAFTERS SX101 AMATEUR BANDS RECEIVER

AM, CW and SSB coverage of the 80m through 10m ham bands with slide rule dial.
Excellent - many extra features including noise blanker etc.
Designed for rack mount, and hence no cabinet with this one. One knob is missing.

The main dial and knob are in good condition. It has been re-capped and is in overall decent condition. Normally supplied with the calibrator but will sell without to save someone money. Easily mounted in a standard rack cabinet with front opening measurement of 19" width.

Let me make it cleart that this receiver normally came with the 100 kHz crystal calibrator.
Will sell without the calibrator for anyone who so desires, for an even further reduced price, as shown bleow.

If left over, the calibrator will be available for $29.00 plus shipping.

SX101A Now available without calibrator for $75.00 plus shipping
SX101A with calibrator for $95.00 plus shipping

Picture and details at:

2344. FS: Iso xfmr and parts

Yahoo group: amatuerradioswapfest
Date: 2011-04-30 21:59:23 UTC
From: Bry Carling
Topic: 2344 Message: 2344

FOR SALE:

Isolation transformer 115V AC to 115V AC at 500 watts.
Also has taps for 10V, 14V and 22V. Conservatively rated.
With power on-off switch, cables and IEC adapters for receptacles.
Like new. Available for $25.00 plus shipping.

Crystal ovens - octal style, brand new 6.3V power needed. Hold two
type hc6u metal can crystals. Brand new. Picture available.
QTY 15 available for $5.00 each or buy ALL 15 for $50.00

Group of RF chokes:
QTY 12 of 0.5 mH rf chokes at 50 mA plus.
QTY 26 of 0.35 mH rf chokes at 50 mA plus.
These are all brand new with full length leads, great for homebrew
applications.

Group of antique radio dials 2 (they look like Johnson? Hallicrafters?)
and knobs 5 - again they are special, no doubt. Two are brand new,
rare knurled knobs made for those variable capacitors with the 3/8"
diameter shaft. Picture and details available on web site below.
Will sell this group for $20.00 plus shipping

TO-3 heat sink - like new. Hold a single TO-3 device such as a 2N3773
power transistor etc.
Finned aluminium heatsink with dimensions: 4-1/2" X 3-5/8" X 2-1/2"
Includes mounting hardware. Available for $1.00

QTY 10 crystals on 25.000 MHz - surface mount. Ears that are
easily soldered to with standard non-smd soldering equipment and
wires.
Will sell all 10 for $2.00 plus shipping

Box of new old stock silicon power transistors and hardware
All ne win packages, Includes:
SK3024, ECG175, 2N3053 (HEP), 1N645, a small audio transformer,
Six RCA 40511 power transistors in boxes. Also a 7.5V - 10 watt
zener diode, plus some electrolytic capacitors, resistors, a large
bag of mixed, new and used transistors, a box of 5 amp cartridge fuses,
two "F" connector high pass filters, etc. etc.
Entire box of goodies for $12.00 plus shipping.

I will post some of the pictures soon at:
http://www.af4k.com/miscpart.htm

First come, first served.

Thanks for reading,

2354. FS: Slatboard Transmitter

Yahoo group: amatuerradioswapfest
Date: 2011-05-19 23:16:52 UTC
From: Bry Carling
Topic: 2354 Message: 2354

FOR SALE: Slatboard Transmitter
Beautiful homebrew device built by WD4NKA. Uses hardwood and angle aluminum for a fine, compact chassis. Most parts in this are new.

Has silver mica capacitors, two large RF chokes. Nice ceramic 140 pF variable capacitor, two large RF chokes, 30 pF trimmer cap and a 3" diameter copper tank coil. Appears to be for a 6V6 or 6AG7 etc. - tube missing. Includes key terminals, (binding posts) - barrier strip marked for B+, Ground and filament power connections.

(Crystals and a Power Supply are available separately.)

Will sell for $25.00 plus shipping.

Send for pictures.

2355. FS: Two tube type power supplies etc...

Yahoo group: amatuerradioswapfest
Date: 2011-05-19 23:43:27 UTC
From: Bry Carling
Topic: 2355 Message: 2355

FOR SALE: Two tube type power supplies etc. etc.

POWER SUPPLY NUMBER ONE:
First is a homebuilt 117V AC, slat-board style station power supply, built by WD4NKA and appears to match the little transmitter mentioned earlier. It has a nice, large AC power transformer that willl supply way more power than needed for just the little transmitter. Secondaries are 750V c.t. at about 200 ma, 6.3V, 5V etc.
This is also slat board construction, with hardwood, and aluminum angle stock.
Has fuse, ON-OFF switch with knob, 6X5 rectifier, two VR tubes and two 40 uF at 450V DC Mallory FP style can capacitors.

Has barrier strip output terminals marked for B+, Filament and Ground.

Available for $25.00 plus shipping.

POWER SUPPLY NUMBER TWO:
117V AC primary, B plus and 6.3V AC supply. 445V c.t. AC at about 100 mA.
This is a commercial or surplus supply on a compact chassis. Suitable for QRP xmtr or for a use with receiver. It has two 20 uF at 350 WVDC can capacitors, and a 6X% rctifier plus a regulator tube.

Available for $19.00 plus shipping.

More power supply components:
TWO AEROVOX Electrolytic plug-in capacitors (Octal Sockets) each is 10+10+10 uF at 450 WVDC.
Will sell the pair for $5.00

High Voltage POWER SUPPLY Board. Has FIVE 100 uFD at 450V capacitors in series for 20 uF at 2250 WVDC, and also has balancing / bleeder resistor across each one - These are each 50 kilohms at 20 watts. All new parts mounted on a nice phenolic board with mounting hardware. Picture available on request.
Available for $16.00 plus shipping.

Coming soon - s0me antique knobs, dials, transmitting and receiving tubes etc.

73 & Thanks for looking!

2362. FS: Tube type preamp with tone controls

Yahoo group: amatuerradioswapfest
Date: 2011-05-27 21:20:03 UTC
From: Bry Carling
Topic: 2362 Message: 2362

FOR SALE: Tube type preamp / tone controls.

Here is a cool "signal processor" of sorts.

It has those screw-on coaxial mono audio connectors of yore, usually used for mic level signals.

Has two tubes, 6SQ7 and 6SN7. Two Allen Bradley pots with black "chicken head knobs" for bass and treble cut-boost, and has beautiful construction using cloth-covered wire. No AC supply on board but DOES have a dual 20 uF + 20 uF at 450V DC can capacitor. Requires about 250V DC at 25 mA and 6.2V AC at 1A. Includes numerous capacitors and carbon composition resistors.

Small aluminum chassis dimensions: 6.5" X 5.5" X 1" tall.
Overall 4" tall with parts. Pictures available on request.

Available for $15.00 plus shipping.

Thanks & 73 de AF4K, Bry

From: Bry Carling
Topic: 2366 Message: 2366

For Sale: Power Supply Chokes

1) QTY 1 - 4.5 H at 445 mA and 39 ohms DC resistance
G.E. Dimensions are 5" X 3.5" X 4.5" tall, potted
Available for $10.00

2) QTY 1 - 12H at 150 mA and 230 ohms DC resistance,
STANCOR Dimensions are 3.5" X 2.5" X 2.5" tall, upright type
Available for $8.00

3) QTY 1 - 8H at 150 mA and 150 ohms DC resistance, looks same as
the Stancor Dimensions are 3.5" X 2.5" X 2.5" tall, upright type
Available for $8.00

4) QTY 1 - 20 H at 45 mA and 308 ohms DC resistance, potted.
Military gray, nice. Dimensions 2.25" X 2" X 3" tall.
Available for $6.00

5) QTY 1 - 2H at 50 mA and 60 ohms DC resistance. Upright type
Dimensions 2.25" X 1.5" X 2" tall.
Available for $4.00

Take all of the above and save majorly on shipping costs.
Pictures available on request.

73 & thanks for looking.

Yahoo group: amatuerradioswapfest
Date: 2011-06-06 23:04:09 UTC
From: Bry Carling
Topic: 2367 Message: 2367

FOR SALE: Box of (8) new Power Potentiometers - all ceramic frame USA manufacture.

1) TRU OHM Type R-75, New. This is a 25 Ohm Rotary Variable Resistor, New
Rated for 1.73 Amps and a maximum of 75 watts.

2) OHMITE, Skokie, IL - QYTY 1 - New, 100 oHMs at 50 watts.

3) QTY 2 OHMITE, Skokie, IL - 1.8 Ohms at 8.5 Amps maximum.
Maximum continuous power of 75 Watts.

4) QTY 3 - OHMITE, Skokie, IL - 125 ohms at 25 watts.

5) QTY 1 - OHMITE, Skokie, IL - 10 ohms at 25 watts.

Will not sell individually - just the whole box...
Available for $16.00 plus $6.00 for USA shipping

73 & thanks for looking - Bry, AF4K

2369. Mics, Coax Switches, Wattmeters, etc. FS

Yahoo group: amatuerradioswapfest
Date: 2011-06-15 00:05:56 UTC
From: Ken Simpson, W8EK
Topic: 2369 Message: 2369

For Sale: Accessory items, primarily related to HF ---
Desk Microphones and accessories, Coaxial Antenna Switches,
Wattmeter / SWR Bridges, and more

Kenwood MC-50 desk microphone:
This is the popular mic that is made to match the TS-120,
TS-130, TS-180, TS-520, TS-820, TS-530, TS-830 and others
of that vintage. It has both high and low Z output, and
a 4 pin connector. This one is in very nice shape. Of
course both cords are included, as is the paper work.
In its original box for $75.

Kenwood MC-80 Desk Microphone:

The Kenwood MC-80 is an omnidirectional electret condenser
"gooseneck" desk mic. It has UP-DOWN tuning plus a built-in
pre-amp. There is a switch for PTT and also a lock feature.
The mic impedance is 700 ohms so it can be used with a wide
range of models, and it has a frequency response of 200 Hz
to 7 KHz. There is a potentiometer adjustment on the back
of the mic stand to adjust the output level. The mic
terminates to a standard 8 pin Kenwood mic plug. It requires
voltage from the Kenwood transceiver to operate.

This one works fine, sounds good, has a new wind screen,
and is in its original box. With paper work for $75.

TenTec 705 desk microphone
This electret desk mic has the PTT and "hold" buttons.
It works great, and looks close to new.
With paper work for $75.

Cables for Heil (and other) Microphones:

Heil CC-1 XLR 4
3 pin XLR Male to 4 pin XLR Female $25

3 pin XLR to stripped and tinned ends
About 10 feet of quality rubber covered mic cable with a 3 pin
XLR connector on one end, and nothing on the other end. Ideal
to add your own connector. Can be used with the CC-1 XLR-4
above. $20

Heil round 8 pin connector to 8 pin modular connector for Icom
Not positive of the number, but it might be HSTA-IM or HSTA-706
$15

Microphone for Heath Twoer, Sixer, Tener, etc.:

This is the mic that Heath used with these popular rigs.
If you have a rig that is lacking the microphone (which
seems to be the case most of the time), this is your
opportunity to get one.

This one works OK, and looks OK as well.
It has the very nice cotton covered cord.
and presently has a 1/4 inch plug on it. $25

Coaxial antenna switches:

B & W CS-3 G "Protax" (formerly called Model 593)
This is a 3 position antenna switch with the four SO-239
connectors coming out the back of the rectangular enclosure.
It does ground all unused connections.
This one works fine and looks like new. With paper work
for $30.

B & W CSR-5 G "Protax" (Formerly known as Model 376)
This is a five position antenna switch with the six SO-239
connectors coming out of the switch like the spokes of a
wheel. Unused connections are grounded.
This switch is in its original box, with paper work, and
appears unused. These go for about $75 new. Buy this
one for only $55.

B & W Model 550 G coax switch
This model will switch up to 5 antennas, and DOES ground
unused antennas. It has SO-239 connectors on the sides,
with the coax coming out like spokes of a wheel. It is
in good condition and works fine. Mounting bracket is
included for $30.

Wattmeters:

Micronta 21-520 A Dual Meter HF Wattmeter:
Full scale readings of 10, 100 and 1000 Watts. It has a
remote pickup sensor with about 3 feet of cable to the
dual meter control head. It reads both SWR and forward
watts at the same time, on the dual meters, which are
fairly large. This one is in extremely nice, close to
new, shape. $55

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.
Similar to the HM-102, but for VHF frequencies, with
250 and 25 watt scales. It can also be used to check
SWR, and has a remote sensor that can either be left
inside the meter, or separated from the actual meter.
SO-239 connectors in and out. This particular meter works
great, looks great and includes paper work for $45.

SWR Bridges:

Both of these SWR Meters will operate from 160 thru 2 meters, and have an SO-239 connector on each end.
All will work on HF, and VHF, covering 3 to 150 MHz, so are ideal for the new rigs that include 6 and 2 meters.

Quement SWB-2

This SWR Bridge features two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on the antenna at the same time. They were made in Japan, and labeled with various names, including Swan, Siltronix, and Quement.
It works fine and looks great. With paper work for $40.

Single meter SWR Bridge:

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
Covering HF, 6 meters, and 2 meters, it is ideal for the new rigs with 6 meters and 2 meters in them.
This one works fine, and looks extremely nice. I do not see any scratches on it, but it does have a previous owners name on it. In its original box with original instructions. $32

AEA PK-232 MBX, multi-mode digital controller.
More than just a TNC. It will handle packet, RTTY, Amtor, ASCII, CW, etc. It has version 7 firmware, which I think is the latest. It includes Pactor in it. It works fine, and looks very close to new. The large, inch thick manual is included, all in the original box, for $125.

AEA AC-1 "Wall Wort" Power Supply
This "Wall wort" power supply will supply 12 V DC at up to 1 amp.
It can be used with the AEA PK-232, PK-88 or others.
This unit has a 2.1 mm plug, with the center positive, so it can be used on many different things that require 12 V DC at up to an amp, such as keyers, antenna tuners, etc.
This is a "regular" wall wort -- not the new switching type that creates all sort of noise in your receiver.
Get this one, and leave the noise behind. $14

I also have many other accessories available such as many different types of microphones, HTs, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

2370. RARE ALPHA 6 50 MHz 2 KW 6 METER HAM RADIO AMPLIFIER

Yahoo group: amatuerradioswapfest
Date: 2011-06-16 01:57:16 UTC
From: n3dg
Topic: 2370 Message: 2370

Alpha 6 is a Custom-Built, Very Limited Edition 6 Meter Amplifier conservatively rated at 1500++ Watts Output on 50 MHz tunable up to 2 KW, made by Alpha Power as a Custom Order and Very Limited Edition using a Single, Robust 4CX1600B (Svetlana GU-91B) which is very affordable and readily available. Only 10-20 Watts drive delivers 1 KW Output and that is 100% Continuous Duty (unlike solid-state amplifiers).

Alpha 6 Features:
☐ Single 4CX1600B Ceramic-Metal Tetrode providing a maximum plate dissipation of over 1.6 KW
☐ Supports the Entire 6 meter Amateur Radio Band 50 MHz ☐ 54 MHz
☐ Comfortably delivers Full Legal Limit on the 6 meter band in All modes
☐ Hypersil 3.5 KVA transformer
☐ Grid & Screen Current Limiting Protection
☐ Protection Circuit for Excessive SWR, Average Plate Current, RF Arc, Mistuning, HV Fault, HV Crowbar, Power Interlock, etc.
☐ Supports 90-130 Volts AC, 190-250 Volts AC, now wired for 220 Volts AC
☐ No Duty Cycle Limitation ☐ 100% Carrier, Key Down with included optional Cooling Fan
☐ Rugged Construction ☐ Built like a Tank
☐ Alpha Collector's Item and Serial Number 2

This Alpha 6 is in Mint Condition with the Optional Auxiliary Cooling Fan, Original Alpha 6 Owners Manual and both Alpha Cartons for Amplifier and Transformer (shipped separately) and has just been sitting on the shelf rarely used and as Collector's Item as Serial Number 2. Alpha now charges over $4600 for their Alpha 8406 which is of the same design, this Alpha 6 is a Collector's Item and Serial Number 2 and Mint at $3995 plus shipping and insurance.

2371. Microphones and Mic accessories FS

Microphones For Sale --
Desk Microphones, DTMF Touch Tone Microphones, Speaker Microphones, and Microphone Stands and other Microphone Accessories

Desk Microphones:

TenTec 705 desk microphone
This electret desk mic has the PTT and "hold" buttons.
It works great, and looks close to new.
With paper work for $75.

Microphone for Heath Twoer, Sixer, Tener, etc.:

This is the mic that Heath used with these popular rigs.
If you have a rig that is lacking the microphone (which seems to be the case most of the time), this is your opportunity to get one.

This one works OK, and looks OK as well.
It has the very nice cotton covered cord.
and presently has a 1/4 inch plug on it. $25

Astatic Model 810-6 Gooseneck Microphone:

This mic is on a 12 inch gooseneck. The mic is a brushed metal about 5 1/4 inches long, and is actually part of the gooseneck. The cable goes thru the gooseneck. This has a 2 conductor shielded cable, so it is a quality balanced microphone with about a 4000 ohm impedance. The gooseneck terminates in a standard 5/8 inch threaded connector.

This one works fine and looks good. $45

DTMF Touch Tone Microphones:

KDK DM TT-1 DTMF Touch Tone Mic
This mic has a 12 digit touch tone pad on it, with a switch to turn the pad on and off. With 4 pin plug.
It works fine, and looks great. $35

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently has stripped and tinned ends. Nice condition. $35

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in the mic, and "speed dial". 12 digit touch tone pad on the

front. 8 pin modular plug (like computer LAN).
Looks to be new. $38

Data Signal "Data-Coder 5" Touch Tone Mic
This mic has a 12 digit touch tone pad on it, plus a normal
low impedance microphone. With 4 pin plug. Like new. $36

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin plug. Looks to be unused. $38

Viking 2000, Model 709
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin plug. $35

HT Speaker Microphones:

Azden SDX-316 Speaker Microphone
Although it has an Azden name plate, it will also work
with Icom, some Yaesu, and Alinco that need 3.5 mm and
2.5 mm plugs.
This is the rounder style speaker mic that fits nicely in
the palm of your hand. $20

MFJ 286 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the
TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as
others. It has a 3 conductor 3.5 mm plug and a 2 conductor
2.5 mm plug. It works fine. $12

MFJ-287 Speaker Microphone
Fits same HTs as the MFJ 286 above, but is a smaller more
compact speaker mic. It works fine, and looks close to new. $15

Heil Wind Screen
This windscreen can be used with a variety of microphones,
including the GM-5. Excellent condition. $10

Cables for Heil (and other) Microphones:

Heil CC-1 XLR 4
3 pin XLR Male to 4 pin XLR Female $25

3 pin XLR to stripped and tinned ends
About 10 feet of quality rubber covered mic cable with a 3 pin
XLR connector on one end, and nothing on the other end. Ideal
to add your own connector. Can be used with the CC-1 XLR-4
above. $20

Heil round 8 pin connector to 8 pin modular connector for Icom
Not positive of the number, but it might be HSTA-IM or HSTA-706
$15

Microphone holders:

Electro Voice
Gray colored EV, designed to hold 5/8 to 3/4 inch diameter mics, and go into a stand with standard 5/8 inch threads. $5

Chrome Mic holder
Similar to EV holder, but chrome metal with a green felt on the inside to protect the mic. For 1/2 inch to 5/8 inch diameter microphones. Standard 5/8 inch threads. $5

Microphone Holder from a Kenwood MC-60 desk microphone
This is the black plastic (or is it bakelite ?) piece that attaches to the mic stand and holds the mic. It looks like new. Ideal if yours is broken.
It probably is used on other mics as well. $10

Prices do not include shipping from Florida.

Thanks.

2372. REDUCED: Midland SWR / Power Meter

Yahoo group: amatuerradioswapfest
Date: 2011-06-20 12:35:53 UTC
From: Bry Carling
Topic: 2372 Message: 2372

For Sale: Midland 13-126 SWR Meter

Gives accurate SWR readingsand relative FWD/REF power readings on
any 50 ohm antenna system using two standard SO239 connectors.

This is the one one that we ALL used in the 1960s! Rebuild your novice station just like the old days.

This one looks brand new and comes with the original box. Similar to the one pictured here, only better:

http://www.mudman98.com/Maintenance/SWR/SWR2.JPG

Available for $22.00 plus shipping.

2373. Digital Interfaces and related items FS

Yahoo group: amatuerradioswapfest
Date: 2011-06-21 11:31:56 UTC
From: Ken Simpson, W8EK
Topic: 2373 Message: 2373

Digital Interfaces and related items For Sale:

AEA PK-232 MBX, multi-mode digital controller.
More than just a TNC. It will handle packet, RTTY, Amtor, ASCII, CW, etc. It has version 7 firmware, which I think is the latest. It includes Pactor in it. It works fine, and looks very close to new. The large, inch thick manual is included, all in the original box, for $125.

AEA AC-1 "Wall Wort" Power Supply
This "Wall wort" power supply will supply 12 V DC at up to 1 amp.
It can be used with the AEA PK-232, PK-88 or others.
This unit has a 2.1 mm plug, with the center positive, so it can be used on many different things that require 12 V DC at up to an amp, such as keyers, antenna tuners, etc.
This is a "regular" wall wort -- not the new switching type that creates all sort of noise in your receiver.
Get this one, and leave the noise behind. $14

Waters "Universal Hybrid Coupler II" Model 3002:

Most of us would likely call this a phone patch, but it is really much more than that. It does that, but also will interface with a tape recorder, and permit recording and play back of on-the-air QSOs. Nothing says that the tape recorder input must be used that way. Connect the sound card in your computer in this position, and you have a very effective interface.

Model 3002 includes a speech compressor powered by a 9 volt battery. The front panel is finished on both sides, with one side having it set in a horizontal position, and the other in a vertical position.

This was a "top of the line" unit years ago. One only found them with top stations such as Collins.

This particular unit is in really great condition.

With paper work for $100.

Heath HD-15 phone patch / digital interface
This is the unit with the VU meter on the left and 3 knobs that match the SB series to the middle and right. Low or high Z output to the transmitter. It can also be used as

an interface for PSK31, and other digital modes that use
a sound card. The meter makes it great for setting levels.
This one is all original. It is in excellent condition.
Cosmetically, I can not find a scratch on it.
Paper work included for $25.

Heath HD-15 as above, but shows slight wear. $22

I also have parts from an HD-15 donor unit available.
Please let me know what parts you need.

Books related to digital modes:

CQ: The Packet Radio Operators Manual
By Buck Rogers, K4ABT, Close to new condition, $14

ARRL Your Packet Companion
by Steve Ford, WB8IMY; like new. $8

ARRL Specialized Communications Techniques
1975, First Edition, $15

ARRL Learning to Work with Integrated Circuits,
First edition $10

The Radio Amateur's Digital Communications Handbook
By KR3T, J Mayo, Published by Tab, Hardback Book,
Like New, 208 pages, 1992, $12

The Packet Radio Operators Manual published by CQ
By Buck Rogers, K4ABT, 1995, Close to new condition, $12

Tab Books:
"Oscar: The Ham Radio Satellites"
by recent silent key Dave Ingram, K4TWJ
First Edition, Hardback, Like new, $14

Ham CD:

Ham Exams
Software for studying for Tech, General and Extra Class License
exams. It also includes Morse Code Software, plus a variety of
other nice ham programs, including digital programs. $15

MFJ 484 C "Grandmaster" Memory Keyer:

MFJ 484 C "GrandMaster" Keyer with Memories
This keyer has a built in sidetone, with volume and tone
adjustable on the front panel. Speed and weighting are
also adjustable from the front panel.
It has 4 large memories. You may install a 9 volt battery
to preserve memory contents during a power failure. It can
be powered by either a 9 Volt battery, a 9 V DC wall wart,
or your station 12 V DC power supply.

It is a nice eggshell white and wood grain enclosure that matches the TenTec KR-2 paddle. This one works fine and looks great.

With paper work for $55.

I also have many other accessories available such as many different types of microphones, HTs, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

2378. FOR SALE: RARE ALPHA 6 50 MHz 2 KW 6 METER HAM RADIO AMPLIFIER

Yahoo group: amatuerradioswapfest
Date: 2011-06-24 02:30:01 UTC
From: n3dg
Topic: 2378 Message: 2378

Alpha 6 is made in Longmont, Colorado and is a Custom-Built, Very Limited Edition 6 Meter Amplifier conservatively rated at 1500++ Watts Output on 50 MHz tunable up to 2 KW, made by Alpha Power as a Custom Order and Very Limited Edition using a Single, Robust 4CX1600B (Svetlana GU-91B) which is very affordable and readily available. Only 10-20 Watts drive delivers 1 KW Output and that is 100% Continuous Duty (unlike solid-state amplifiers).

Alpha 6 Features:
☐ Single 4CX1600B Ceramic-Metal Tetrode providing a maximum plate dissipation of over 1.6 KW
☐ Supports the Entire 6 meter Amateur Radio Band 50 MHz -- 54 MHz
☐ Comfortably delivers Full Legal Limit on the 6 meter band in All modes
☐ Hypersil 3.5 KVA transformer
☐ Grid & Screen Current Limiting Protection
☐ Protection Circuit for Excessive SWR, Average Plate Current, RF Arc, Mistuning, HV Fault, HV Crowbar, Power Interlock, etc.
☐ Supports 90-130 Volts AC, 190-250 Volts AC, now wired for 220 Volts AC
☐ No Duty Cycle Limitation -- 100% Carrier, Key Down with included optional Cooling Fan
☐ Rugged Construction -- Built like a Tank
☐ Alpha Collector's Item and Serial Number 2

This Alpha 6 is in Mint Condition with the Optional Auxiliary Cooling Fan, Original Alpha 6 Owners Manual and both Alpha Cartons for Amplifier and Transformer (shipped separately) and has just been sitting on the shelf rarely used and as Collector's Item as Serial Number 2. Alpha now charges over $4600 for their Alpha 8406 which is of the same design, this Alpha 6 is a Collector's Item and Serial Number 2 and Mint at $3500 plus shipping and insurance.

2379. Wattmeters, Coax Switch FS

Yahoo group: amatuerradioswapfest
Date: 2011-06-24 12:31:21 UTC
From: Ken Simpson, W8EK
Topic: 2379 Message: 2379

Wattmeter/SWR Bridges, Coaxial Antenna Switch, For Sale:

Wattmeters:

Micronta 21-520 A Dual Meter HF Wattmeter:
Full scale readings of 10, 100 and 1000 Watts. It has a remote pickup sensor with about 3 feet of cable to the dual meter control head. It reads both SWR and forward watts at the same time, on the dual meters, which are fairly large. This one is in extremely nice, close to new, shape. $55

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz. Similar to the HM-102, but for VHF frequencies, with 250 and 25 watt scales. It can also be used to check SWR, and has a remote sensor that can either be left inside the meter, or separated from the actual meter. SO-239 connectors in and out. This particular meter works great, looks great and includes paper work for $45.

SWR Bridges:

Both of these SWR Meters will operate from 160 thru 2 meters, and have an SO-239 connector on each end.
All will work on HF, and VHF, covering 3 to 150 MHz, so are ideal for the new rigs that include 6 and 2 meters.

Quement SWB-2

This SWR Bridge features two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on the antenna at the same time. They were made in Japan, and labeled with various names, including Swan, Siltronix, and Quement.
It works fine and looks great. With paper work for $40.

Single meter SWR Bridge:

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
Covering HF, 6 meters, and 2 meters, it is ideal for the new rigs with 6 meters and 2 meters in them.
This one works fine, and looks extremely nice. I do not see any scratches on it, but it does have a previous owners name on it. In its original box with original instructions. $32

Coaxial antenna switch:

B & W CSR-5 G "Protax" (Formerly known as Model 376)
This is a five position antenna switch with the six SO-239 connectors coming out of the switch like the spokes of a wheel. Unused connections are grounded.
This switch is in its original box, with paper work, and appears unused. These go for about $75 new. Buy this one for only $55.

I also have many other accessories available such as many different types of microphones, HTs, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

2382. FS: UTC, TRIAD and STANCOR Transformers and chokes

Yahoo group: amatuerradioswapfest
Date: 2011-06-28 16:56:39 UTC
From: Bry Carling
Topic: 2382 Message: 2382

FOR SALE: Transformers and Chokes - most of these are new and
a few are nearly new.

Data for most of these is readily available on the internet.

STANCOR P-8356 Power Transformer - PRI 117V AC 60 Cy. black,
upright, nice end bells.
SEC1: 270 - 0 - 270 V AC at 260 mA (540V C.T.)
SEC 2: 5.0 V at 3.0 A
SEC 3: 6.3V at 8.8 A
Like new, posssibly used a little.
Available for $25.00 plus shipping

TRIAD R_56A Power Transformer - Pri; 117V AC 60 CPS
SEC 1: 130V at 20 mA
SEC 2: 30.0V at 0.6A
SEC 3: 22.5V at 0.6A
SEC 4: 15.0 V at 0.6A
(sec 2,3,4 are common) good, used. Nice gray end bells.
Available for $10.00 plus shipping

ALL of the following UTC items are new, old stock - unused
items:

United Transformer Corp. UTC HA114
Gray, potted pp low level plate to multiple line PRI: 30k p-p
at 1mA, unbal DC,
SEC: 50, 125/150, 200/250, 333, 500/600 ohms RESP: 30Hz -

2383. Mobile FM rigs, Dual Band HTs FS

Yahoo group: amatuerradioswapfest
Date: 2011-06-28 23:00:50 UTC
From: Ken Simpson, W8EK
Topic: 2383 Message: 2383

Dual Band mobile FM transceivers, 2 meter FM transceivers,
and Dual Band HTs, For Sale:

Kenwood TW-4100 A, Dual Band mobile FM transceiver:

The Kenwood TW-4100A is a high powered dual-band transceiver
providing 45 watts on 2 meters and 35 watts on 70 cm (440 MHz).
A low power setting of 5 watts may also be selected. Ten memories
with offset recall and lithium battery backup are provided. There
are separate antenna output jacks on the back panel for 2 meters
and 440 MHz. It is supplied with an MC-48, 16 key DTMF hand mic,
mobile mounting bracket and DC power cord. Requires 13.8 VDC at
7.5 amps.

Features
* 10 Memories
* Scanning
* Priority Watch
* Lithium battery backup
* Frequency Lock
* Auto Repeater Offset
* Large LCD Display
* MC-48 DTMF Microphone with up/down switches

This particular unit works great and looks fine. It has a
subaudible tone encoder added where the speaker would normally
be. That means that an external speaker needs to be used with
it.

With DTMF Mic, tone encoder, mobile bracket, power cord, and
paper work for $160.

Icom IC-228 H, 45 watt 2 meter mobile transceiver:

The Icom 228H is a 45 watt 2 Meter mobile FM transceiver.
There is also a setting for 5 watts output when less power is
needed. The multi-colored backlit LCD display is readable
over a wide range of light. This radio has 20 memories and
priority watch. It also has programmed scanning or memory
scanning. This radio requires 13.8 VDC and receives from
138 to 174 MHz. It has a built in tone encoder.

This particular unit works great and looks very close to new.
It is in its original box, with mobile bracket, power cord,
and DTMF Touch Tone Microphone. It even has the bag of misc
hardware that I don't think has ever been opened.

With paper work for $110.

Icom IC-28 H, 2 meter FM mobile transceiver:

The Icom IC-28 H is a well-built 2 meter FM mobile transceiver providing 45 watts of power. There is also a setting for 5 watts output when less power is needed. The backlit LCD display is readable over a wide range of light. This radio has 21 memories. It also has programmed scanning or memory scanning. This radio requires 13.8 VDC and received from 138 to 174 MHz. It has a built in tone encoder.

It works fine and looks fine also. No mobile bracket or "extras" with this one -- just the radio and paper work for $80.

Alinco DJ-580 dual band (2m and 440 MHz) HT:

Covers 110 to 174 MHz in the VHF position, which includes the AM Aircraft band. 440 to over 480 MHz in the UHF position. It is my understanding that it can also be modified to cover into the 800 and 900 MHz region. It will also cross band repeat, and is a very rugged radio.

Power output has 3 different levels. With the 7.2 V battery packs, it has 0.25 W / 1 W / 2.5 W. If used with the larger 12 V batteries, it will produce 0.25 W / 1.2 W / 5 W.

This particular unit is in very good shape, both electrically and cosmetically. The keyboard has very crisp and clear lettering. It includes the empty 6 cell battery pack that takes six AA cells, rubber duck antenna, belt clip, wrist strap, and paper work.
$150

Yaesu VX-3 dual band HT:

The Yaesu VX-3R 2 meter/440 MHz handheld has extensive receive frequency coverage, providing local-area two-way amateur communications along with unmatched monitoring capability.
The VX-3R receives 500-1800 kHz (AM Band), 1.8-30 MHz (Shortwave), 30-76 MHz (VHF Lowband with 6M), 76-108 MHz (FM band), 108-137 MHz (Air), 137-174 MHz (VHF with 2M), 174-222 MHz, 222-420 MHz (VHF with 220), 420-470 MHz (440), 470-800 MHz and 800-999 MHz.
You get a 1000 channel memory system, and can enjoy stereo FM and AM broadcast reception.

Power output with the supplied Lithium Ion battery is 1.5 watts VHF and 1 watt UHF. With the optional E-DC-21 DC adapter output jumps to 3 watts and 2 watts!

This particular HT is like new. It works 100%, and looks like new, with no scratches. It has a rubber duck antenna, LiIon Battery and charger in its original box, with paper work all for only $155.

I also have many other accessories available such as many different types of microphones, HTs, HF, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

2386. F/S Siltronix 1011D Comanche - $200 (Salisbury)

Yahoo group: amatuerradioswapfest
Date: 2011-07-08 01:40:50 UTC
From: Garry
Topic: 2386 Message: 2386

This is a working Black face Siltronix Comanche 1011D. It has a Shure desk mike,a FD1011 frequency counter and a model 90 VFO. All items work well the only known problem is a couple bars are out on the LED of the FD1011 counter. The tubes are all in good shape and after proper warmup it is very stable on frequency. I do have a D104 that is wired for the 1011D and will include it for $50. Radio covers 10 and 11 meters and has very strong clear transmit. $200 OBO Any questions feel free to contact me.

2387. Crystals For Sale

Yahoo group: amatuerradioswapfest
Date: 2011-07-08 21:09:34 UTC
From: Ken Simpson, W8EK
Topic: 2387 Message: 2387

Crystals For Sale:

FT-243, HC-6, etc.:

FT-243 Crystals for 40, 20, 15, and 10 meter ham bands

Crystals can be used at fundamental, or multiplied for
20, 15, or 10 meters. E.g. the 7081 could be used at 7081,
14162, 21243, or 28324 KHz.

7094 (HC-6), 7174 (HC-6), 7175, 7186, 7189, 7198.5 (HC-6),
7200 (HC-6), 7200, 7207, 7225, 7236.2 (HC-6), 7248,
7261, 7283.33 (HC-6), 7325, 7375, 7395, 7400, 7404, 7410,

HC-6 Crystals
These may be used as heterodyning crystals in many
Collins, Drake, Heath, Yaesu, and other rigs.
Freq of crystal in MHz.
7.98, 12.0, 15.0, 16.0, 30.75, 32.5, 39.0, 42.7,
44.5, 46.0, 46.7, 49.9, 51.1,

All crystals above are $8 each.

Crystals for 2 meter ham rigs For Sale:

Does anyone have an older two meter ham rig and need crystals?

Maybe I can help. I have some 2 meter crystals available -- both
transmit and receive. Most are in the 146 and 147 MHz band segments,
with very, very few in the 145 MHz segment, and none in the 144 MHz
segment. These are for ham rigs only, and not commercial rigs.

These are all the small HC-25 crystals, like are used in most of the
solid state 2 meter mobiles and HTs. Please e-mail the operating
frequency you need. I have them listed by operating frequency and rig,
and not by actual xtal frequency. Send the frequencies you need
(transmit or receive), and the rig that you have, and I will see if
I can help. I have cross references for the various rigs, so I will
know what you need if you give the rig. Crystals are $6 each.

Prices do not include shipping from Florida.

Thanks.

2390. Wattmeter and TVI Filters FS

Yahoo group: amatuerradioswapfest
Date: 2011-07-23 13:42:08 UTC
From: Ken Simpson, W8EK
Topic: 2390 Message: 2390

Wattmeter/SWR Bridges, Low Pass TVI Filters For Sale:

Wattmeter:

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.
Similar to the HM-102, but for VHF frequencies, with
250 and 25 watt scales. It can also be used to check
SWR, and has a remote sensor that can either be left
inside the meter, or separated from the actual meter.
SO-239 connectors in and out. This particular meter works
great, looks great and includes paper work for $45.

SWR Bridges:

Both of these SWR Meters will operate from 160 thru 2 meters,
and have an SO-239 connector on each end.
All will work on HF, and VHF, covering 3 to 150 MHz, so are
ideal for the new rigs that include 6 and 2 meters.

Quement SWB-2

This SWR Bridge features two separate meters -- one for reading
forward power and another for reading SWR. This permits one
to easily monitor both the power going out, and the SWR on
the antenna at the same time. They were made in Japan, and
labeled with various names, including Swan, Siltronix, and
Quement.
It works fine and looks great. With paper work for $40.

Single meter SWR Bridge:

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
Covering HF, 6 meters, and 2 meters, it is ideal for the new
rigs with 6 meters and 2 meters in them.
This one works fine, and looks extremely nice. I do not see
any scratches on it, but it does have a previous owners name
on it. In its original box with original instructions. $32

Full Power Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter to reduce
harmonic interference. All have SO-239 connectors, and are 50
ohm filters.

Bencher YA-1, high power, low pass TVI filter
If you need a more heavy duty filter for the output of
your amplifier, this one is ideal. It will take full legal
power plus, and has at least 80 db signal attenuation at

TV channel 2.
It is also in a very sturdy metal case with SO-239 connectors
on each end, and is a 50 ohm filter.
This one works great, and looks close to new. It has paper work.
Bencher currently sells these for about $90. This one is only $60.

B & W FL-10/1500
This filter cuts off just above 10 meters, and handles 1500
Watts. It is the latest model B&W filter.
In very nice condition, it looks very close to new. $40.

Para Dynamics PDC 1089
This filter is rated at a full Kilowatt, up to 30 MHz.
5 x 6 x 2 inch black box, instead of the more familiar long
enclosure. It looks like new. $25

Lower power Low Pass Filters:

B & W FL-10/100 low pass filter
Similar to FL-10/1500 above, except power rating is only 100 Watts.
Use this one after your rig, and before
your amplifier. Nice shape for $18.

I also have many other accessories available such as many
different types of microphones, HTs, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

Date: 2011-07-25 01:09:10 UTC
From: n3dg
Topic: 2393 Message: 2393

Hello SPE Customers and Fans !

As you may be aware, Expert Amps USA is the new US Authorized Reseller and Support agent for SPE Expert Amplifiers.

I understand that they have concluded their agreement and will begin placing customer orders for the New SPE Expert 2K-FA and 1K-FA in the next few days ahead, and before SPE Italy goes on Summer Holiday for a few weeks beginning next week and August 1.

I further understand that there are SPE Expert 2K-FA options for:
-Vacuum Relay QSK Full Break-in
-Remote Automatic Antenna Tuner

If you may be interested in the possibility of a future software update for MARS frequency support, please discuss with Expert Amps USA.

If you have any further questions or may wish to place your order in this batch to get into queue for delivery, please contact Expert Amps USA directly:

Alpha 6 is a Custom-Built, Very Limited Edition 6 Meter Amplifier conservatively rated at 1500++ Watts Output Continuous 100% Duty Cycle on 50-54 MHz tunable up to 2 KW (LED Wattmeter Scale up to 2500 Watts), made by Alpha Power as a Custom Order and Very Limited Edition using a Single, Robust 4CX1600B (Svetlana GU-91B) which is very affordable and readily available. Only 10-20 Watts drive delivers 1 KW Output and that is 100% Continuous Duty Cycle (unlike solid-state amplifiers).

Alpha 6 Features:
☐ Single 4CX1600B Ceramic-Metal Tetrode providing a maximum plate dissipation of over 1.6 KW
☐ Supports the Entire 6 meter Amateur Radio Band 50 MHz ☐ 54 MHz
☐ Comfortably delivers Full Legal Limit on the 6 meter band in All modes
☐ Hypersil 3.5 KVA transformer
☐ Grid & Screen Current Limiting Protection
☐ Protection Circuit for Excessive SWR, Average Plate Current, RF Arc, Mistuning, HV Fault, HV Crowbar, Power Interlock, etc.
☐ Supports 90-130 Volts AC, 190-250 Volts AC, now wired for 220 Volts AC
☐ No Duty Cycle Limitation ☐ 100% Carrier, Key Down with included optional Cooling Fan
☐ Rugged Construction ☐ Built like a Tank
☐ Alpha Collector's Item and Serial Number 2

This Alpha 6 is in Mint Condition with the Optional Auxiliary Cooling Fan, Original Alpha 6 Owners Manual and both Alpha Cartons for Amplifier and Transformer (shipped separately) and has just been sitting on the shelf rarely used and as Collector's Item as Serial Number 2. Alpha now charges over $4600 for their Alpha 8406 which is of the same design, this Alpha 6 is a Collector's Item and Serial Number 2 and Mint at $3250 plus shipping and insurance or Cash & Carry.

2395. Reduced: Box of Precision Wirewound Resistors

Yahoo group: amatuerradioswapfest
Date: 2011-07-27 22:04:23 UTC
From: Bry Carling
Topic: 2395 Message: 2395

REDUCED: Box of 70 Precision Wirewound Resistors, NOS.

Most are made by Shallcross Electronics of Collingdale, PA and a few from IRC and Bond Electronics of Summit, NJ etc. Most of these are 1% or better.
Examples: 3.3K, 4.0K, 5.0 K, 6.25K, 23.75K, 50K, 64K, 100K, 130K, 450K, 500K, 900K, 2.0 Megohms, 2.5 Megohms, 4.8 Megohms.
Was $30.00

Will sell the whole box of resistors for $18.00 plus shipping.

Topic: 2397 Message: 2397

FOR SALE: Collection of 38 antique radio dials, knobs and escutcheon scale plates etc.
Includes two large dials for the amateur bands, Some Collins style knobs,
black fluted knobs, chicken head knobs, a large bakelite 0 - 100 knob etc. etc.
Picture on request.
Will sell all for $25.00 plus shipping.

REDUCED: Midland SWR / Field Strength Meter - new in box.
New old stock HF swr meter in perfect condition, shows
relative power and SWR. Also a useful field strength meter for antenna
measurements. A great nostaligia piece too, for those reconstructing their
1960s novice station. Picture on request.
Now available for $15.00 plus shipping

FOR SALE: Box of 30 RF chokes. This assortment includes several 2.5 mH chokes
and others handy for building RF circuits. Two boxes of these available. Picture on
request.
Will sell these for $15.00 plus $6.00 shipping.

FOR SALE: Group of three 40m crystals, type hc6u
Frequencies - 7050, 7072, 7094 kHz
Will sell this group for $19.00 plus shipping

FOR SALE: Group of three 160m crystals, type hc6u
Frequencies - 1801, 1843, 1942 kHz
Will sell this group for $19.00 plus shipping

FOR SALE: Two Drake crystals, type hc6u
Frequencies 24.600 MHz and 31.600 MHz
Will sell this group for $19.00 plus shipping

Thanks for looking & 73 - Bry, AF4K

From: n3dg
Topic: 2398 Message: 2398

eQSL is the #1 leading medium for exchanging QSL confirmation electronically and is FREE, so you can save time and money especially in this economy.

Like what email has done for global communications, eQSL is Fast, Free and lets you still print your eQSLs as you desire.
eQSL rapidly growing daily since its inception over a decade ago and is integrated with rig control and logging programs, is a partner of Ham Radio Deluxe, qualifies for CQ Awards and thousands of other awards, and is also used standalone for Electronic QSL processing at no charge, saving time, money and trees. Even W1AW and ARRL are eQSL Members.

eQSL is the Leading #1 Most Widely-Used Electronic QSL Distribution !!!

If you are still not a member of eQSL, you likely have many eQSLs that await you, so please Register Now for FREE !!!

Simply go to: www.eqsl.cc and click Register, fill out the form and specify
N3DG in line 1 as referrer for FREE REGISTRATION.

If you have a ham radio website, perhaps you may be interested in a FREE Website Logo/Link as eQSL:

-Is the Leading #1 Most Widely-Used Electronic QSL Distribution Website with Over 1.5 Million Webhits per Month Over 50,000 per day !!!

-Has the Most Members of any QSL Website by far.

-Has the Most Growth of any QSL or Ham Radio Website, daily and annually.

eQSL in fact, has more members and visitors, and is in the Top 3 in Web Hits & Web Traffic for all Amateur Radio Websites Worldwide.

Please kindly advise if you may be interested in your FREE eQSL Website Banner and we look forward to working with you.

Thank you very much and 73,

2400. FOR SALE: RARE D&A HAWK HF 40-10 METER QRP AMPLIFIER

Yahoo group: amatuerradioswapfest
Date: 2011-08-17 01:07:48 UTC
From: n3dg
Topic: 2400 Message: 2400

D&A HAWK HF 40-10 METER QRP AMPLIFIER supports 40, 20, 15 and 10 Meters as marked on the front panel and with a very accessible coil if you wish to very simply change the taps to modify and resonate this Minty Pristine Linear Amplifier on another band(s).

D&A HAWK HF 40-10 METER AMPLIFIER consists of two tubes, a 6KV6A and 6AQ5A with a Transmit/Receive Relay and Two SO-239 Coaxial Sockets on the rear, Power Pilot Light, Drive Pilot Light, she's powered with standard 110 Volts AC, and measures a Cute & Compact 7.5"W x 5.5"D x 4.5"H.

D&A HAWK HF 40-10 METER AMPLIFIER is truly ULTRA RARE & MINT and as a Collector's Item, she comes from an estate of a Caring Collector who just had her sitting on his shelf, she powers on and was told she delivers 100 Watts with just a few watts drive input @ $100.

2401. FS: Groups of FT243 crystals

Yahoo group: amatuerradioswapfest
Date: 2011-08-18 21:49:48 UTC
From: Bry Carling
Topic: 2401 Message: 2401

FOR SALE: Groups of FT243 crystals as used in all the typical ham AM and CW rigs like Heathkit, Drake 2NT, Hallicrafters HT40, etc. etc.

Back by popular demand.

GROUP 01 - (8) FT243 crystals - original ones on
7028, 7038, 7068, 7075, 7130, 7156, 7185, 7196 kHz
Available for just $25.00 total for all eight plus shipping.

GROUP 2 - (8) FT243 crystals - original ones on
7049, 7072, 7075, 7083, 7093, 7130, 7133, 7156 kHz
Available for just $25.00 total for all eight plus shipping.

GROUP 3 - (8) FT243 crystals - original ones on
7125, 7140, 7161, 7222, 7233, 7240, 7247, 7284kHz
Available for just $18.00 total for all eight plus shipping.

GROUP 4 - (8) FT243 crystals - original ones on
7162, 7172, 7192, 7243, 7273, 7277, 7284, 7289 kHz
Available for just $18.00 total for all eight plus shipping.

See lists and buy hrere:
http://www.af4k.com/basementcrystals.htm

Plenty of other ham band crystals on a wide variety of useful frequencies listed here:

2402. Various Microphones FS

Yahoo group: amatuerradioswapfest
Date: 2011-08-19 21:45:40 UTC
From: Ken Simpson, W8EK
Topic: 2178 Message: 2402

Various Microphones For Sale:
Desk Mics, Hand Mics, DTMF Touch Tone Mics, Speaker Mics, and Miscellaneous Mic accessories

Deluxe Desk Microphone:

KLM / Fuji FDM-148 Deluxe Gooseneck Microphone

This is a 600 ohm impedance desk microphone that KLM sold for the KLM Multi 2700 and other transceivers. It was made by Fuji and relabeled by KLM and others. It has a flexible gooseneck, about 10 inches long. Being it is low impedance, it is compatible with most modern rigs.

This particular mic works great and has had the connector changed to a round 8 pin connector, wired for Kenwood. It is in its original box, with original paper work. $75

Another Deluxe Desk Microphone:

This is a great looking and great performing low impedance desk mic. It has a quality Shure 600 ohm cartridge in it (the cartridge alone is over $40 new), with a very nice black die case base and neck, with a chrome grill. It looks somewhat like a Shure 444, but no plastic on this one -- all metal!

This one looks like new, and works the same. It has a long (approx 6 foot) cord, with stripped and tinned ends. $75

Astatic Model 810-6 Gooseneck Microphone:

This mic is on a 12 inch gooseneck. The mic is a brushed metal about 5 1/4 inches long, and is actually part of the gooseneck. The cable goes thru the gooseneck. This has a 2 conductor shielded cable, so it is a quality balanced microphone with about a 4000 ohm impedance. The gooseneck terminates in a standard 5/8 inch threaded connector.

This one works fine and looks good. $45

Kenwood Hand Microphone with round 8 pin plug:

No model number on this hand mic, but it works great on most any Kenwood rig with the round 8 pin connector, such as the TS-430, TS-440, TS-570, TM-241, TM-2530, TW-4000, and other Kenwood rigs.

Basically, this mic is like an MC-43, only with a couple more features. Of course it has the mic and PTT switch, but it also has up/down switches on the top. It addition to those switches, there are four "extra" buttons labeled Call, VFO, MR, and PF. What these four buttons do depends on the rig that it is attached to. They will function on some rigs, and are completely useless on others. There is also a "Lock" switch on the back.

Regardless if you use the four extra buttons or not, you still have a mic that works like an MC-43.
-
This mic works fine, and looks like new. I am guessing it came with a rig, and was immediately put in the drawer. $30

DTMF Touch Tone Microphones:

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in the mic, and "speed dial". 12 digit touch tone pad on the front. 8 pin modular plug (like computer LAN).
Looks to be new. $38

KDK DM TT-1 DTMF Touch Tone Mic
This mic has a 12 digit touch tone pad on it, with a switch to turn the pad on and off. With 4 pin plug.
It works fine, and looks great. $35

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently has a round 8 pin connector wired for Kenwood.
Nice condition. $40

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic. Presently with 4 pin plug. Looks to be unused. $38

Several HT Speaker Microphones:

Speaker-mic for Yaesu (Vertex) VX-6 / VX-7 / VX-8
No number on this speaker-mic, but it has a 4 conductor 3.5 mm connector, with the threads as used by the VX-6 / VX-7/ VX-8. Looks to be unused. $15

Azden SDX-316 Speaker Microphone
Although it has an Azden name plate, it will also work with Icom, some Yaesu, and Alinco that need 3.5 mm and 2.5 mm plugs.
This is the rounder style speaker mic that fits nicely in the palm of your hand. $18

MFJ 286 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as

others. It has a 3 conductor 3.5 mm plug and a 2 conductor
2.5 mm plug. It works fine. $12

MFJ-287 Speaker Microphone
Fits same HTs as the MFJ 286 above, but is a smaller more
compact speaker mic. It works fine, and looks close to
new. $15

Cables for Heil (and other) Microphones:

Heil CC-1 XLR 4
3 pin XLR Male to 4 pin XLR Female $25

3 pin XLR to stripped and tinned ends
About 10 feet of quality rubber covered mic cable with a 3 pin
XLR connector on one end, and nothing on the other end. Ideal
to add your own connector. Can be used with the CC-1 XLR-4
above. $20

Heil round 8 pin connector to 8 pin modular connector for Icom
Not positive of the number, but it might be HSTA-IM or HSTA-706
$15

Heil Wind Screen
This windscreen can be used with a variety of microphones,
including the GM-5. Excellent condition. $8

I also have many other accessories available such as many
different types of microphones, HTs, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

2403. Variable Bench Power Supplies FS

Yahoo group: amatuerradioswapfest
Date: 2011-08-21 11:36:32 UTC
From: Ken Simpson, W8EK
Topic: 2403 Message: 2403

Several Variable Bench Type Power Supplies For Sale:

Kepco CK 18-3 Variable Bench Power Supply:

This power supply is a Kepco Model CK 18-3, which means
that it will produce up to 18 V DC at up to 3 amps. This is
an ideal bench power supply!

The voltage is adjustable with a 10 turn pot from close to zero,
up to almost 20 volts. There is a fairly large analog meter that
reads the voltage. Built in current limiting is adjustable with
a 10 turn pot from a few ma to up to about 3 amps. A separate
meter reads the current, so both voltage and current can be read
at the same time. Also, there are connections on the back to
allow remote sensing and remote programming. This is a quality
regulated power supply!

This particular unit works 100%, and looks extremely nice.

These are going for $190 to $200 (plus shipping) in this
condition on that e place. Buy this one for $160.

Kepco Model ABC 40-0.5 Variable Bench Power Supply:

This power supply is a Kepco Model ABC 40-0.5, which means
that it will produce up to 40 V DC at up to 1/2 amp. This is
an ideal bench power supply.

The voltage is adjustable with a 10 turn pot from close to zero,
up to about 40 volts. There is a fairly large analog meter that
reads the voltage. There is also current limiting built in that
is adjustable from about 100 ma to up to about 700 ma. The same
meter that reads voltage can be switched to read current, or
short circuit current (the point that the current limit is set).
In addition, there are connections on the back to allow remote
sensing and remote programming. This is a quality regulated
power supply!

This particular unit works 100%, and looks extremely nice.

These are going for $125 to $150 (plus shipping) in this
condition on that e place. Buy this one for $90.

Prices do not include shipping from Florida.

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.

Just too many to list here. Please e-mail your requests.

Thanks.

2404. FS: 455-457 kHz crystals etc.

Yahoo group: amatuerradioswapfest
Date: 2011-09-02 14:51:11 UTC
From: Bry Carling
Topic: 2404 Message: 2404

FOR SALE:

As used in the BC-684 military transmitter.

These are the closest you can get to 455 kHz in FT241 crystals and great for making i.f. filters, BFOs etc.

Quantity 7 - Channel 327 - 32.7 MHz / 454 to 455 kHz crystals, Type FT241,
and also Quantity 1 - Channel 329 - 32.9 MHz / 457 kHz

Will only sell these all as a group (all 8) for $22.00 plus shipping

ALSO:

FT243 Crystal on 2000 kHz - $14.00
FT243 Crystal on 5000 kHz - $14.00

hc13/u frequency standard (like tall hc6u metal can crystals) - $19.00 each

QTY 10 - 1843 kHz crystals - type hc33/u with wire leads (like hc6u) - $2.00 each
QTY 12 - 3742 kHz crystals, type hc6/u metal can, thin pins. - $2.00 each

Shipping additional.

Thanks for looking - Bry, AF4K

2405. WTB: Globe Scout 40A, 65, 65A

Yahoo group: amatuerradioswapfest
Date: 2011-09-03 23:38:14 UTC
From: Pigman
Topic: 2405 Message: 2405

I am looking for a really nice looking Globe Scout 40A, 65, or 65A to restore. I had a 40A as a kid and would love to especially find one of them, but the 65 and 65A look almost identical. It doesn't have to work but look good and be all there, (no missing tank coils or modification to the CB band). I can restore the radio with new cpas and capacitors, but I don't want to do this to some ugly looking candidate.

If anyone has a candidate like this I could restore, I would like to hear from you.

Thanks,

Lee, w0vt

2406. FS: Two Drake crystals $5.00

Yahoo group: amatuerradioswapfest

2408. CW Items FS

Yahoo group: amatuerradioswapfest
Date: 2011-09-05 12:04:22 UTC
From: Ken Simpson, W8EK
Topic: 2408 Message: 2408

CW Items For Sale -- Keyers, etc.

MFJ 8043 Electronic Keyer:

This is an electronic keyer that uses the Curtis 8043
Keyer IC. It has speed, weight, tone, and volume adjustments.
It is capable of fully automatic or semiautomatic (like
a bug) operation. Also, it can emit a solid "key down"
for tuning up. It works with tube or solid state transceivers.
It has sidetone with a front panel volume and tone control.
Weighting is adjustable from the front panel. It can be powered
via four internal C cells or an external 6 to 9 volt DC
power supply.

The styling of this unit is the wood grain and eggshell color
that TenTec used with their early equipment. TenTec made the
enclosure for MFJ, so it is an exact match.

This particular unit looks really great, and of course
it works. Paper work is included for $35.

MFJ 407 B Electronic Keyer:

This is an electronic keyer that uses the Curtis 8044 ABM
Keyer IC. It has TONE, VOL, WEIGHT and SPEED adjustments.
It is capable of fully automatic or semiautomatic (like
a bug) operation. Also, it can emit a solid "key down"
for tuning up. It works with tube or solid state transceivers.
It has sidetone with a front panel volume and tone control.
Weighting is adjustable from the front panel. Iambic switch
on the back selects Iambic keyer mode. It can be powered
via an internal 9 v battery or an external power supply.

This particular unit looks really great, and of course
it works. Paper work is included for $40.

MFJ 1312 Wall Wart power supply
This unit provides 12 V DC at 500 ma. It has a small 2.5
mm male plug, and is often used for keyers, lighting tuner
lights, and other small misc jobs where 12 V DC at low
current is needed. $10

Cables for CW keys and keyers:

Cable for paddles
About 3 feet long, and with a 1/8 inch (3.5 mm) stereo
connector on the end, like used by most rigs. $8

As above, but 1/4 inch plug. $8
As above, with 1/4 inch GOLD plated plug. $15

Cable for straight key
About 3 feet long, with a mono 1/8 inch (3.5 mm) phone plug on it, as used with a straight key. $5
As above, but 1/4 inch plug. $5

I also have many other accessories available such as many different types of microphones, HTs, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

2409. FS: Enamel covered copper wire

Yahoo group: amatuerradioswapfest
Date: 2011-09-09 20:04:30 UTC
From: Bry Carling
Topic: 2409 Message: 2409

FOR SALE: Spool of new old stock enamel covered copper wire, excellent condition.

This appears to be pretty old but looks new. Seems to be 20 or 22 awg wire. No micrometer.

Marked "B.D. Land, New York" on the end of spool. Alkso marked: "Dudlo Manufacturing, Ft. Wayne, IN" under the labels. Great for making coils, rewinding transformers and chokes etc.

Spool is about 4.5" tall X 4.5" diameter. Weighs almost 4 lbs. and seems to be a huge roll with many hundreds, if not thousands of feet of wire.

One spool only - available for $20.00 plus shipping.
(or will trade for large quantity of unwanted FT243 crystals)

Thanks for looking and 73 de AF4K, Bry

2411. FS: Power Transformer

Yahoo group: amatuerradioswapfest
Date: 2011-09-10 17:05:38 UTC
From: Bry Carling
Topic: 2411 Message: 2411

FOR SALE:

Power Transformer - looks to be older USA made item,
Upright mount with black end bells. No part number or label.
Dimensions: 3-3/4" X 3-3/4" X 4-1/2" tall.

I connected 120V AC and got 860V CT at est. 100 mA plus.
Also has secondaries of
SEC 2 = 10.0 V CT,
SEC 3 = 6.3 V AC CT
and 5.0 V CT
each with thick wires and unknown amps.

Nicely built with the typical flanges and four mounting holes for above chassis installation.

QTY 1 available for $12.00 plus shipping.

2418. Dual Band Mobile, 2 m rigs, dual band HT and related items FS

Yahoo group: amatuerradioswapfest
Date: 2011-09-29 14:02:30 UTC
From: Ken Simpson, W8EK
Topic: 2418 Message: 2418

Dual Band FM mobile, Two meter FM rigs, dual band HT,
and related accessories For Sale:

Alinco DR-605 T Dual Band FM Mobile Transceiver

The Alinco DR-605 T is a dual band FM transceiver covering
both the 2 meter and 440 MHz ham bands, plus extended
receive outside of the ham bands for weather, police, fire, etc.
It will cross band repeat, receive both 2 m and 440 at the
same time, and many other neat things. Subaudible (PL)
tones are built in. A DTMF microphone with up/down
switches is included.

You can find details at
http://www.alinco.com/Archives/Mobile/dr-605t.shtml

This one works 100% as best I can tell. Cosmetically, one
of the lights behind the display is burned out, but the
others work, so there is plenty of light to read the
display. It looks great.

Paper work is included for $170.

Icom IC-281 H, 2 meter FM transceiver with 440 MHz receive

The Icom IC-281H 2 meter mobile FM transceiver boasts 50
watts output plus 440 band receive (440-450 MHz) for full
duplex crossband operation. Other features include 60
regular memories, 10 scratch pad memories, 14 auto dialer
memories, built-in pager and code squelch functions and
auto memory channel advance. The IC-281H is packet ready.
A data jack is available for direct TNC connection,
supporting speeds up to 9600 baud. It features a huge
heat sink. Requires 10.5 amps at 13 VDC.

Features
* 440 MHz Band Receive
* Tone Scan
* 60 Memories
* 10 Scratch Pad Memories
* Scanning
* Call Channel
* 50/10/5 Watts Output
* Auto Power Off
* Priority Watch

This one works 100% and looks extremely nice.
With mic, tone encoder/decoder, mobile bracket, power
cord, and paper work for $150.

Alinco DR-110 T, 2 meter FM Transceiver

The Alinco DR-110T is a full-featured 2 Meter FM mobile
transceiver with 14 memory channels. Power output is
selectable at 45 or 5 watts. Subaudible tone encoder
and decoder is included. Tuning steps may be selected
at 5, 10, 12.5, 15, 20 or 25 kHz. It is 5.5 x 2 x 6.75
inches. With hand mic.

Features:
* 14 Memories
* VFO Scaning
* Memory Scanning
* Odd Offsets
* CTCSS Encode/Decode
* Large LCD
* Function Lock
* Reverse Key

This unit works fine, and looks extremely nice. It
includes a mic, power cord, internal tone unit, and
paper work for $90.

Icom IC-229 H, 2 meter FM mobile transceiver

The Icom IC-22 H is a 2 meter FM mobile transceiver
providing 50 watts of power. There is also a setting for
25, 10, or 5 watts output when less power is needed. The
LCD display is easy to read. This radio has 20 memories
and priority watch. It also has programmed scanning or
memory scanning. This radio requires 13 V DC at 10 amps,
measures 5.5 x 1.6 x 6.1 inches, and weighs 2.2 lbs.

Features:
* SubAudible (CTCSS, PL) tones
* 20 Memories
* Priority Watch
* Call Channel
* Memory Skip
* Scan
* Backlit LCD
* Receive 138-174 MHz
* 4 RF Output Levels

This particular unit works fine, produces full power output,
and receives great. Cosmetically, it looks extremely nice
with no scratches that I can find. It comes with power cord
in its original box, with paper work for $100.

I also have a second IC-229 H. However, it has extremely low power output in all power positions. I am 99% sure that the problem is the output power module. It receives great and functions fine in all other respects. Cosmetically, it is in nice condition, but not as good as the one above. It does have a bulb burned out. $60

Both of the IC-229 H rigs were used for packet and do not include a microphone.

Alinco DJ-580 dual band (2m and 440 MHz) HT:

This HT receives from 110 to 174 MHz in the VHF position, which includes the AM Aircraft band. 440 to over 480 MHz in the UHF position. Of course it transmits in the 2 meter and 440 MHz ham bands. It is my understanding that it can also be modified to receive into the 800 and 900 MHz region. It will also cross band repeat, and is an extremely rugged radio.

Power output has 3 different levels. With the 7.2 V battery packs, it has 0.25 W / 1 W / 2.5 W. If used with the larger 12 V batteries, it will produce 0.25 W / 1.2 W / 5 W.

This particular unit is in very good shape, both electrically and cosmetically. The keyboard has very crisp and clear lettering. It includes the empty 6 cell battery pack that takes six AA cells, rubber duck antenna, belt clip, wrist strap, and paper work. $140

Alinco EDC-43, DC cord / cigarette lighter plug:

This DC cord is used with the Alinco DJ-G7T, DJ-F1T, DJ-160, DJ-180, DJ-196, DJ-580, and other Alinco HTs. In fact it appears that it works with most Alinco HTs, except the "credit card" size HTs. It plugs into a cigarette lighter, and has a small coaxial power connector on the other end.

This one works 100% and looks like new. $12

Hand Microphone that can be used with Kenwood or Alinco rigs:

Hand Microphone with round 8 pin plug:

This hand mic works great on most Kenwood rigs with the round 8 pin connector, such as the TS-430, TS-440, TS-570, TM-241, TM-2530, TW-4000, and others, and also on most Alinco rigs with the round 8 pin plug..
It only says "Electret Condenser Mic" on it, with no model number.

Basically, this mic is like an MC-43, only with a couple more features. Of course it has the mic and PTT switch; it also has up/down switches on the top. There are four "extra" buttons labeled Call, VFO, MR, and PF. What these four buttons do depends on the rig that it is attached to. They will function on some rigs, and are completely useless on others. There is also a "Lock" switch on the back.

Regardless if you use the four extra buttons or not, you still have a mic that works like an MC-43.

This mic works fine, and looks like new. I am guessing it came with a rig, and was immediately put in the drawer. $30

DTMF Touch Tone Microphones:

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in the mic, and "speed dial". 12 digit touch tone pad on the front. 8 pin modular plug (like computer LAN).
Looks to be new. $38

KDK DM TT-1 DTMF Touch Tone Mic
This mic has a 12 digit touch tone pad on it, with a switch to turn the pad on and off. With 4 pin plug.
It works fine, and looks great. $35

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently has a round 8 pin connector wired for Kenwood/Alinco.
Nice condition. $40

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin plug. Looks to be unused. $38

I also have many other accessories available such as many different types of microphones, HTs, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

From: Bry Carling
Topic: 2421 Message: 2421

A while back someone posted a link to the entire library of scanned pages from all the 73 Magazines ever published. It was great to be able to see these old articles on the web.

It was and is an invaluable resource to hams and homebrewers in particular.

NOW, I have some good news about another free online Magazine - WORLD RADIO ONLINE. This is published by CQ Magazines and it is free as far as I can tell. I just downloaded the current issue anyway, and they have back issues too by the look of it.

http://www.worldradiomagazine.com/index.html

Give this a try. I hope you enjoy it - 73 de AF4K, Bry

Actually not a day late. You can still get them free for now.

A few months early in fact.

On 5 Oct 2011 at 11:10, David Rogers wrote:

A day late and $19.95 short, Bry. CQ just announced that they are going to start charging $19.95 per year for the digital version of World Radio.

From the email I received:

"Beginning with its November 2011 issue, WorldRadio Online will be available for a variety of online platforms, including those for tablets and mobile devices. As a result of this upgrade and additional enhancements we're making to this product, we must return to paid single copy and multi-issue subscriptions for the magazine. You will be able to purchase single issues online for $2.99 each or a one-year subscription for $19.95. The online edition will be produced by Zinio, probably the best-known e-magazine host today. As a subscriber, as soon as an issue goes "live" you will receive notification that a copy has been placed in your Zinio online library - ready to view, print
and/or download. Your issues will remain in your Zinio online library indefinitely!

"Limited Time - Special Offer - 50% OFF
WorldRadio Online Charter Subscription only $9.97!
For a limited time, we're offering our email list members the opportunity to purchase a one-year WorldRadio Online Charter Subscription for only $9.97! That's right . . . only 83 cents an issue! You'll get 12 great, information-packed, issues for only $9.97 . . . half off the regular price!

"Enter your Charter Subscription today and we'll deliver WRO's November issue on October 25th, and future issues on the twenty-fifth of each month thereafter for the balance of your subscription.
Hurry, this offer ends October 24, 2011. WorldRadio Online's one-year subscription rate will increase to $19.95 on October 25th."

2423. Heath HF Rig, PS and accessories FS

Yahoo group: amatuerradioswapfest
Date: 2011-10-11 16:58:55 UTC
From: Ken Simpson, W8EK
Topic: 2423 Message: 2423

Heath Items For Sale - HF transceiver, Station Console,
Wattmeters, Misc Parts, and Original Manuals:

Heath SB-1400 HF Transceiver:

This is a 100 watt multimode HF transceiver covering 160 to
10 meters (including WARC bands). It operates on SSB, CW,and
AM. The receiver is very sensitive. This rig has noise blanker,
squelch, adjustable AGC and attenuator, as well as memories
and two VFOs. A narrow CW filter is included. It even has a
computer interface and is very similar to the Yaesu FT-747.

This one works 100% and looks very, very nice.
It includes power cord and paper work for $300.

Heath SB-1400-2 hand microphone:
This hand mic is basically the same as a Yaesu MH-1, but with a
Heath label. Use it with the SB-1400 above, or with Yeasu rigs
with the round 8 pin connector. Like new for $40.

Astron RS-20M Power Supply with meters:

The RS-20M is a DC Power Supply producing 13.8 V DC (internally
adjustable from 11 to 15 V DC) at up to 16 amps continuous and
20 amps ICS. The RS-20M features crowbar over voltage protection
and fold-back current limiting to protect your equipment. There
isa separate large voltmeter and separate large ammeter.

This particular supply works fine, and looks very close to new.
I do not find a scratch on it.

With paper work for $95.

Heath SB-634 Station Console:

The Heathkit SB-634 station console is a multifunction unit.
It contains a 24 hour digital clock (6 large digits, including
seconds), 10 minute interval timer (3 digits -- minutes and
seconds), phone patch and an SWR/Power meter. The large
wattmeter reads either 200 watts or 2000 watts full scale,
in addition to SWR. It matches the Heath SB series of equipment
(Heath green), and is powered by 115 V AC.

This unit works on all of its functions. It looks extremely
nice. I can not find a scratch on it, but there is very slight
(and I emphasize very slight) wear on the 2000 watt push button.

With paper work for $150.

Heath HM-2140 A, dual meter Wattmeter / SWR Bridge:

The HM-2140 A uses two separate meters to measure power and SWR (forward and reflected power). It will measure either average power, or peak power (PEP) with a 9 volt battery. Power ranges are 200 and 2000 watts. Frequency range is from 160 thru 10 meters. It has a remote sensor, which permits the meter to be separated from the coax connection by up to 3 feet. This is the "A" model of this meter, which is the Heath Brown color (not the green), and has more features.

More details can be found at
http://www.radiomuseum.org/r/heath_wattmeter_hm_2140a_hm2140.html

This particular unit works fine, and looks very close to new. With paper work for $100.

Heath HD-15 phone patch / digital interface:

This unit can be used to interface a sound card in a PC to your transceiver. It was originally designed to be used as a phone patch, but many have converted them to a digital interface.

This is the unit with the VU meter on the left and 3 knobs that match the SB series to the middle and right. Low or high Z output to the transmitter. The meter makes it great for setting levels.

This one is all original. It is in great condition. Paper work included for $22.

I also have parts from a Heath HD-15 phone patch available. This includes an audio transformer used for digital interfacing, VU meter, and other parts. Outer cover and knobs are gone. What do you need?

Miscellaneous Heath Parts:

I have many Heath SB-630 Station Console parts available. Most of the internal parts are available, but no clock. Front panel and outer case are gone, but reflectometer assembly, switches, etc. are still available. Please let me know what you need.

I also have parts from a Heath HD-15 phone patch available. This includes an audio transformer used for digital interfacing, VU meter, and other parts. Outer cover and knobs are gone. What do you need?

RCA VT-138 / 1629 Magic Eye Tube:

This magic eye tube is a RCA VT-138 that is also known as a JAN-CRC-1629, or simply a 1629.

The RCA 1629 / VT-138 is a military spec magic eye tube
for use as a tuning level indicator. It has a green phosphor
element.

This tube is often used as an indicator in capacitor checking
instrumentation. I know it is used in some of the Heathkit
units, and probably others.

This one works fine and is $17.

ORIGINAL Heath manuals For Sale:

These are manuals / brochures / schematics only.
They are all originals, not copies, and all are in
extremely nice condition.

Brochure "Heathkit Specials" featuring the
Twoer, Sixer, SB series, and others. $4

GD-600 Photoelectric Light Switch, 1972, $5

HM-102 HF Wattmeter
1971, Schematic in book $10

HW-29 A "Sixer" 6 meter transceiver
1964, Schematic in book, $12

HW-2021 2 meter hand held transceiver
1975, No check marks $9

SB-620 Scanalyzer
Schematic Only, Large fold out page, $4

These are original manuals / brochures / schematics only.

I also have many other accessories available such as many
different types of microphones, HTs, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

2424. Wattmeters and SWR Bridges FS

Yahoo group: amatuerradioswapfest
Date: 2011-10-14 14:13:35 UTC
From: Ken Simpson, W8EK
Topic: 1317 Message: 2424

Several Wattmeters and SWR Bridges For Sale:

Swan WM-2000 Wattmeter / SWR Bridge:

The Swan WM-2000 power meter and SWR bridge covers 3.5 to 30 MHz. Power scales are 200, 1000, 2000 watts. It has a very large (over 5 inch) meter, for easy visibility. The rear panel has SO-239 input and output connectors.

This is an extremely nice meter, primarily due to its large physical meter, making it easy to read.

This one is in extremely good condition. It works 100% and looks very close to new.

With paper work for $80.

Heath HM-2140 A, dual meter Wattmeter / SWR Bridge:

The HM-2140 A uses two separate meters to measure power and SWR (forward and reflected power). It will measure either average power, or peak power (PEP) with a 9 volt battery. Power ranges are 200 and 2000 watts. Frequency range is from 160 thru 10 meters. It has a remote sensor, which permits the meter to be separated from the coax connection by up to 3 feet. This is the "A" model of this meter, which is the Heath Brown color (not the green), and has more features.

More details can be found at
http://www.radiomuseum.org/r/heath_wattmeter_hm_2140a_hm2140.html

This particular unit works fine, and looks very close to new. With paper work for $100.

Heath SB-634 Station Console, with Wattmeter and more:

The Heathkit SB-634 station console is a multifunction unit. It contains a 24 hour digital clock (6 large digits, including seconds), 10 minute interval timer (3 digits -- minutes and seconds), phone patch and an SWR/Power meter. The large wattmeter reads either 200 watts or 2000 watts full scale, in addition to SWR. It matches the Heath SB series of equipment (Heath green), and is powered by 115 V AC.

This unit works on all of its functions. It looks extremely nice. I can not find a scratch on it, but there is very slight (and I emphasize very slight) wear on the 2000 watt push button.

With paper work for $150.

HF and VHF Standing Wave Ratio Bridges:

All of these cover from 3 to 150 MHz, covering HF, 6 meters, and 2 meters, so are ideal for the new rigs with 6 meters and 2 meters in them. SO-239 connectors.

Carter Craft 90-300 HF SWR Bridge:
The Carter Craft 90-300 is a single Meter SWR Bridge / Field Strength Meter. It covers from 3 to 150 MHz, covering HF, 6 meters, and 2 meters, so is ideal for the new rigs with 6 meters and 2 meters in them.
SO-239 connectors.
Although this has a Carter Craft name on it, it is the same meter that was sold years ago under a couple dozen different names, including Vanco, Midland, Quements, Olson, and many others.
This one works fine, and looks extremely nice. I do not see any scratches on it, and I am 99% certain it has not been used, except for my testing of it.
In its original box with original instructions and little field strength antenna. $30

Quement SWB-2
This unit features two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on the antenna at the same time.
It works fine and looks great. With paper work for $37.

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see any scratches on it, but it does have a previous owners name on it. In its original box with original instructions. $28

I also have many other accessories available such as many different types of microphones, HTs, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

2425. Heil Microphone, Mic stands and cables, & mic accessories FS

Yahoo group: amatuerradioswapfest
Date: 2011-10-15 17:01:15 UTC
From: Ken Simpson, W8EK
Topic: 2425 Message: 2425

Heil Microphone, Mic Cables, Mic stands, and other
microphone related accessories for sale:

Heil HM-10-5 Deluxe Microphone:

The Heil HM-10-5 is a beautiful microphone resembling the
"gold line series". It has the HM-5 wide element for good
frequency response, and good articulation.
This particular microphone looks very close to new.
It includes paper work in its original fancy Heil box. $75

Cables for Heil (and other) Microphones:

Yaesu (yellow) cable
Connects to Heil mics with the 4 pin XLR connector (most
Heil mics), and has a round 8 pin connector wired for Yaesu,
plus a jack for PTT. $25

Heil CC-1 XLR 4
4 pin XLR Female to 3 pin XLR Male $25

3 pin XLR to stripped and tinned ends
About 10 feet of quality rubber covered mic cable with a 3 pin
XLR connector on one end, and nothing on the other end. Ideal
to add your own connector. Can be used with the CC-1 XLR-4
above. $20

Heil round 8 pin connector to 8 pin modular connector for Icom
Not positive of the number, but it might be HSTA-IM or HSTA-706
$15

Microphone Stands:

Heil SB-2 small boom
The Heil Sound SB-2 Small Boom is ideal for mounting your
Heil microphone in tight quarters. It is compact, yet rugged.
The stem of the SB-2 is removable, and the Heil SB-2 will screw
onto a standard 5/8" - 27 threaded microphone stand.
The SB-2 includes the 'stealth' C-Clamp.
This one is in extremely nice condition. $50

Regular round desk stand
Round 6 inch diameter heavy black / dark grey base, with
a 3 inch chrome tube coming up from the middle.
Standard 5/8 inch threaded. $15

Heil Wind Screen
This windscreen can be used with a variety of microphones,

including the HM-10, GM-5 and others. Excellent condition. $8

Microphone holders:

Heil
Black plastic holder, for 1 inch diameter mics.
Standard 5/8 inch threads. $8

Electro Voice
Gray colored EV, designed to hold 5/8 to 3/4 inch diameter mics,
and go into a stand with standard 5/8 inch threads. $5

Chrome Mic holder
Similar to EV holder, but chrome metal with a green felt on the
inside to protect the mic. For 1/2 inch to 5/8 inch diameter
microphones. Standard 5/8 inch threads. $5

I also have many other accessories available such as many
different types of microphones, HTs, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

Topic: 2426 Message: 2426

From a local estate of ham that was deep into SatTV, radio astronomy, microwaves, radar, etc. the following

items. Price: reasonable offers + shipping (no chrge for packing and taking to PO/UPS. Pix available on request. If requesting addl info,
pls refer to the reference number at left end of first line for
each item.

73 Walt (N4GL)

---

686) Coaxial Directional Coupler
Narda Microwave Corp "Microline" model 22836. 2500-5500 mhz,
20.2db coupling. "N" coax connectors. Used. Untested, good physical
condx but some paint flecking on case

662) Microwave Directional Coupler
Narda model 2671. 4225 mhz, 20.80db coupling. "N" ocax connextors. Used.Untested. Good physical condx but paint flecks on the case.

685) Coaxial Directional Coupler
Narda Microwave Corp "Microline" model 22836. 2500-5500 mhz,
20.2db coupling. "N" coax connectors. Used. Untested, good physical
condx but some paint flecking on case.

687) Coaxial Directional Coupler
Omega Labs, Inc. model 4314-G, 4000 - 10000 mhz, 29.2 - 30.6db.
"N" coax connections. Used, untested. some paint flecking on case.
Good physical condx.

2427. PALSTAR AT AUTO 1500 WATT AUTOMATIC ANTENNA TUNER

Yahoo group: amatuerradioswapfest
Date: 2011-10-17 04:39:54 UTC
From: n3dg
Topic: 2427 Message: 2427

Palstar AT AUTO Automatic Antenna Tuner supports 160-6 Meters Continuously at up to 1500 Watts key-down, Coaxial Cable, Single Wire and Ladder Lines, both Balanced and Unbalanced Feed Lines, and automaticlly matches almost any antenna to practically 1:1 SWR by Frequency Tracking your transceiver and/or RF Sensing any transceiver/transmitter with Fast, Quiet Stepper Motors controlling the Heavy-Duty Motorized Capacitor and Roller Inductor. A Dual Backlit Analog Meter displays Forward/Reverse Power & SWR as well as an LCD Display shows SWR and operating conditions at all times. You can have the Palstar AT AUTO in Automatic Mode to automatically ensure lowest SWR wherever you go, or manually tune if you wish, or Bypass the tuner when you desire, all with a convenient front panel switch. Also included is a 4:1 Balun so you can tune open-wire and ladder-line antennas.

She is in Mint Condition from an estate, rarely used as the owner had a SteppIR antenna that did not require a tuner.
Package includes: Palstar AT AUTO with latest Palstar Version 2.11 Firmware, Power Cable, Original Manual, Palstar Packaging and Carton.
$995 shipped to USA, will include optional Yaesu 6' CAT Interface Cable for $25.

2428. Microphones - Hi & Low Z; Desk & Hand; DTMF; Spkr Mics: and more FS

Yahoo group: amatuerradioswapfest
Date: 2011-10-21 21:02:56 UTC
From: Ken Simpson, W8EK
Topic: 2428 Message: 2428

Various Microphones For Sale:
Desk Mics, Hand Mics, DTMF Touch Tone Mics, Speaker
Mics, and Miscellaneous Mic accessories

Astatic D-104 "Lollypop" Desk Microphone:

The D-104 is a high impedance microphone that matches many
of the older rigs, and is often seen pictured with them.
It looks somewhat like a giant chrome plated lollypop, stuck
into a gray base. The chrome PTT switch is a bar that is
parallel to the "stick" of the lollypop. This is the
unamplified version.

This particular D-104 is in extremely nice condition.
Of course it works well, and has good frequency response.
Cosmetically, it is extremely nice. The chrome seems
perfect, with no scratches or defects of any sort.
The gray base has a couple of very minor scratches.
It presently has a 4 pin connector, but that obviously
could be changed. $55

Astatic Model 810-6 Gooseneck Microphone:

This mic is on a 12 inch gooseneck. The mic is a brushed
metal about 5 1/4 inches long, and is actually part of the
gooseneck. The cable goes thru the gooseneck. This has a
2 conductor shielded cable, so it is a quality balanced
microphone with about a 4000 ohm impedance. The gooseneck
terminates in a standard 5/8 inch threaded connector.

This one works fine and looks good. $45

Turner 350, High Impedance Hand Microphone
This is a Hi Z hand mic, that looks like a Turner 350. The
label is off of it, but I am 99% certain it is a 350. This
one is the grayish color, and has a right angle 1/4 inch
stereo plug on it, as used by many rigs in the 1970's. It
has a great pattern on the scope, and looks fine as well. $28

Deluxe Desk Microphone - Kenwood round 8 pin:

This is a great looking and great performing low impedance
desk mic. It has a quality Shure 600 ohm cartridge in it
(the cartridge alone is over $40 new), with a very nice
black die case base and neck, with a chrome grill. It
looks somewhat like a Shure 444, but no plastic on this
one -- all metal! This one has a round 8 pin connector

wired for Kenwood on it, but that can be changed.

This one looks like new, and works the same. It has a
long (approx 6 foot) cord. $75

Heil HM-10-5 Deluxe Microphone:

The Heil HM-10-5 is a beautiful microphone resembling the
"gold line series". It has the HM-5 wide element for good
frequency response, and good articulation.
This particular microphone looks very close to new.
It includes paper work in its original fancy Heil box. $75

Cables for Heil (and other) Microphones:

Heil CC-1 Y (also known as Yellow)
4 pin XLR connector on one end, to Yaesu round 8 pin connector
(Yellow cable) $25

Heil CC-1 XLR 4
3 pin XLR Male to 4 pin XLR Female $25

3 pin XLR to stripped and tinned ends
About 10 feet of quality rubber covered mic cable with a 3 pin
XLR connector on one end, and nothing on the other end. Ideal
to add your own connector. Can be used with the CC-1 XLR-4
above. $20

Heil round 8 pin connector to 8 pin modular connector for Icom
Not positive of the number, but it might be HSTA-IM or HSTA-706
$15

Heil Wind Screen
This windscreen can be used with a variety of microphones,
including the GM-5. Excellent condition. $8

Microphone Stands and holders:

Microphone Stands:

Heil SB-2 small boom
The Heil Sound SB-2 Small Boom is ideal for mounting your
Heil microphone.
The SB-2 includes the 'stealth' C-Clamp.
This one is in extremely nice condition. $50

Regular round desk stand
Round 6 inch diameter heavy black / dark grey base, with
a 3 inch chrome tube coming up from the middle.
Standard 5/8 inch threaded. $15

Microphone holders:

Heil Mic Holder
Black plastic holder, for 1 inch diameter mics.
Standard 5/8 inch threads. $8

Electro Voice Mic Holder
Gray colored EV, designed to hold 5/8 to 3/4 inch diameter mics,
and go into a stand with standard 5/8 inch threads. $5

Chrome Mic holder
Similar to EV holder, but chrome metal with a green felt on the
inside to protect the mic. For 1/2 inch to 5/8 inch diameter
microphones. Standard 5/8 inch threads. $5

Heil Wind Screen
This windscreen can be used with a variety of microphones,
including the GM-5. Excellent condition. $8

Hand Microphone with round 8 pin plug for Kenwood:

This hand mic works great on most Kenwood rigs with the
round 8 pin connector, such as the TS-5-, TS-60, TS-430,
TS-440, TS-570, TM-241, TM-2530, TW-4000, and others.
It only says "Electret Condenser Mic" on it, with no
model number. It is very similar to an MC-47, but the
4 buttons are at the top instead of the bottom.

Basically, this mic is like an MC-43, only with a couple
more features. Of course it has the mic and PTT switch;
it also has up/down switches on the top. There are four
"extra" buttons labeled Call, VFO, MR, and PF. What these
four buttons do depends on the rig that it is attached to.
They will function on some rigs, and are completely useless
on others. There is also a "Lock" switch on the back.

Regardless if you use the four extra buttons or not, you
still have a mic that works like an MC-43.

This mic works fine, and looks like new. I am guessing it
came with a rig, and was immediately put in the drawer. $28

Kenwood Mic with modular connector:

This mic is basically the same as the one with the round
8 pin connector above, except it has the modular plug on it,
as used by the TM-261, TM-271, and many others.
It looks like new. $30

Yaesu Hand Microphones:

Yaesu MH-1 Hand Microphone
The Yaesu MH-1 b8 is the hand mic that is used on most of
the Yaesu HF and some of the Yaesu VHF rigs. It is a hand
mic that has a switch on the back with two audio frequency
responses -- one for rag chewing, and one for more punch

for DX. It has up and down switches, in addition to a "fast" switch. Of course it also has the normal PTT switch. It has a round 8 pin mic connector, wired for Yaesu.
This particular microphone looks like it might not have ever been used. I think it was probably put in a drawer when new, and left there. Of course it works fine. $40

Yaesu MH-31 B 8 dynamic hand microphone:
This is the Yaesu hand microphone that has the round 8 pin connector on it. It will go with virtually any Yaesu rig that uses the round 8 pin connector. It has up, down, and fst switches, and well as a tone switch, in addition to the PTT switch.
This particular unit works 100%, and appears to be unused. $40

Yaesu YM-31 hand microphone
The Yaesu YM-31 is a hand mic with a round 6 pin connector. Apparently it is either similar or the same as the MH-25A6j (not the MH-25 with the 8 pin connector). It is a 600 ohm impedance hand microphone, and has a Monitor on-off switch on the back. It should be compatible with any of the Yaesu rigs that uses the round 6 pin connector. It looks very similar to the Yaesu MH-1.
This one works fine and looks extremely nice. $25

Yaesu YM-22 DTMF Condenser Microphone
This mic has a 16 digit touch tone (DTMF) pad on the front. There are up and down buttons on the top, in addition to the PTT switch.
Stripped and tinned ends. Great condition. $40

Heath SB-1400-2 hand microphone
This hand mic is basically the same as a Yaesu MH-1, but with a Heath label. Use it with the SB-1400, or with Yeasu rigs with the round 8 pin connector. Like new for $40.

DTMF Touch Tone Microphones:

Yaesu YM-22 DTMF Condenser Microphone
This mic has a 16 digit touch tone (DTMF) pad on the front. There are up and down buttons on the top, in addition to the PTT switch.
Stripped and tinned ends. Great condition. $40

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in the mic, and "speed dial". 12 digit touch tone pad on the front. 8 pin modular plug (like computer LAN).
Looks to be new. $38

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin plug. Looks to be unused. $38

Several HT Speaker Microphones:

Yaesu MH-34 b 4 b speaker microphone
This is the one that fits the Yaesu HT with the 4 conductor
1/8 inch (3.5 mm) plug, such as the VX-5, VX-3, etc.
This one is just like new. $35

Pryme Speaker Microphone
This is the equivalent of the Yaesu MH-34 (above). It
has the 4 conductor 1/8 inch plug on it. It works 100%
and looks like it has not been used. $28

Yaesu YM-24 A speaker microphone
This speaker mic fits the Yaesu FT-207, 208, plus many
others. It can be modified for Santec, Wilson, and others.
It has the odd little round connector on it like Yaesu,
Wilson, Santec, and others used in the 1970s and 80s.
This particular unit works fine, and looks great also.
$20

All of the following speaker mics have the 3.5 mm and
2.5 mm plugs on them, as used by Icom, Alinco, Radio Shack,
some Yaesu, and other HTs.

Azden SDX-316
This is the rounder style speaker mic that fits nicely in
the palm of your hand. $ 20

Pryme Speaker Microphone
It works fine and look line new. $20

MFJ-287 Speaker Microphone
This fits the TH-21/31/41 series HTs, TH-205, TH-215, TH-415,
as well as others. It has a 3 conductor 3.5 mm plug and a 2
conductor 2.5 mm plug.
It works fine, and looks close to new. $15

I also have many other accessories available such as many
different types of microphones, HTs, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

From: Ken Simpson, W8EK
Topic: 2429 Message: 2429

Yaesu Items For Sale -- Filtered speaker, several microphones, cables, HT accessories, and more

Yaesu SP-6 Speaker with phone patch and Filters:

This Yaesu SP-6 speaker has the phone patch and filters in it. It is the matching speaker for the Yaesu FT-990 and many others. It permits one to switch between two different rigs, and has adjustable filters on both the high and low end to permit one to get rid of QRM, and have a great sound.

This one is in extremely nice condition and works 100%. Not a single scratch or mark on it. You will not find a nicer one unless it just came out of the box.

With paper work for $150.

Heil HM-10 Deluxe Microphone:

The Heil HM-10-5 is a beautiful microphone resembling the "gold line series". It has the HM-5 wide element for good frequency response, and good articulation.
This particular microphone looks very close to new.
It includes paper work in its original fancy Heil box. $75

Cables for Heil (and other) Microphones:

Heil CC-1 Y cable for Yaesu (yellow)
Connects to Heil mics with the 4 pin XLR connector (most Heil mics), and has a round 8 pin connector wired for Yaesu, plus a jack for PTT. $25

Hand held PTT switch
The Heil Microphones require a separate PTT switch -- either a hand switch or a foot switch. This is a home made hand switch. It is similar to the Heil, except it is in a 1 x 1 x 2 inch minibox, with about a 3 foot cord. It works and looks fine.
$12

Heil CC-1 XLR 4
4 pin XLR Female to 3 pin XLR Male $25

3 pin XLR to stripped ends
About 10 feet of quality rubber covered mic cable with a 3 pin XLR connector on one end. Ideal to add your own connector.
Can be used with the CC-1 XLR-4 above. $20

Heil Wind Screen
This windscreen can be used with a variety of microphones, including the HM-10 and others. Like new condition. $8

Yaesu MH-1 Hand Microphone:

The Yaesu MH-1 b8 is the hand mic that is used on most of the Yaesu HF and some of the Yaesu VHF rigs. It is a hand mic that has a switch on the back with two audio frequency responses -- one for rag chewing, and one for more punch for DX. It has up and down switches, in addition to a "fast" switch. Of course it also has the normal PTT switch. It has a round 8 pin mic connector, wired for Yaesu.

This particular microphone looks like it might not have ever been used. I think it was probably put in a drawer when new, and left there. Of course it works fine. $40

Yaesu MH-31 B 8 dynamic hand microphone:

This is the Yaesu hand microphone that has the round 8 pin connector on it. It will go with virtually any Yaesu rig that uses the round 8 pin connector. It has up, down, and fst switches, and well as a tone switch, in addition to the PTT switch.

This particular unit works 100%, and appears to be unused. $40

Yaesu YM-22 DTMF Condenser Microphone
This mic has a 16 digit touch tone (DTMF) pad on the front. There are up and down buttons on the top, in addition to the PTT switch.
Stripped and tinned ends. Great condition. $40

Speaker Microphones:

Yaesu MH-34 b 4 b speaker microphone
This is the one that fits the Yaesu VX-8, VX-7, VX-6, VX-5, VX-3, VX-2, VX-1, and that series of HTs. I think it also fits the FT-50 and FT-60, and maybe others. It has a single 4 conductor, 3.5 mm plug on it. This one is just like new. $35

Pryme Speaker Microphone
This is the equivalent of the Yaesu MH-34 (above). It has the 4 conductor 1/8 inch plug on it. It works 100% and looks like it has not been used. $28

Yaesu YM-24 A speaker mic.
Fits FT-207, 208, plus many others. It has the odd little round connector on it like Yaesu, Wilson, and others used in the 1970s and 80s. This particular unit

works fine, and looks great also. $20

Azden SDX-316
This is the rounder style speaker mic that fits nicely in
the palm of your hand. Has 3.5 mm and 2.5 mm plugs for
Azden, Icom, some Yaesu, and others. $ 20

Pryme Speaker Microphone
This speaker mic has the 2.5 mm and 3.5 mm molded connector
as used by Icom, Alinco, Radio Shack, some Yaesu, and others.
It works fine and look line new. $20

MFJ-287 Speaker Microphone
This fits the TH-21/31/41 series HTs, TH-205, TH-215, TH-415,
as well as others. It has a 3 conductor 3.5 mm plug and a 2
conductor 2.5 mm plug.
It works fine, and looks close to new. $15

Yaesu HT Accessory Items:

Battery pack for Yaesu VX-2 or VX-3 HT
Lithium Ion Battery Pack fits both the VX-2 and the
VX-3. 3.7 volts, 1200 mahr, works great, and holds a charge
like new. $15

Yaesu NC-18 B Charger
Provides 14.5 V DC at 50 ma to charge many different HTs,
including the Yaesu FT-411, FT-811, FT-911, FT-23, FT-209,
FT-415, FT-410, FT-470, FT-727, FT-530, FT-703, and more.
Small 2.5 mm male plug. $10

Belt Clip for Yaesu FT-207, with hardware. $8

Wrist Strap for Yaesu FT-209, and probably others $4

Prices do not include shipping from Florida.

I also have many other accessories available such as many
different types of HTs, VHF and UHF rigs, HF and VHF/UHF
antennas, etc.
Just too many to list here. Please e-mail your requests.

Thanks.

2433. FS: Crystal Ovens

Yahoo group: amatuerradioswapfest
Date: 2011-10-26 13:55:53 UTC
From: Bry Carling
Topic: 2433 Message: 2433

FOR SALE: New Crystal Ovens, by Electronic Research Co.

8-pin Octal base, plugs into standard octal socket.
These will hold two metal hc6u crystals with 1/2" pin spacing.
6.3V heater, and rated for constant 65 degrees C.
Model ERO-100D40

QTY 12 available - will sell for $4.00 each or take all 12 for $32.00
shipping additional.

Bets regards - AF4K, Bry Carling

FOR SALE: Heathkit Parts

Heathkit DX100 Front panel (NOT B) - $35.00
Heathkit DX100 54-30 LV Power Transformer 634VCT 5V 120VCT 12.6V - $35.00
Heathkit DX100 46-11 LV Filter Choke 150 mA - $15.00
Heathkit DX100 pair of H.V. Electrolytic Capacitors 125 uF at 450V DC - $10.00
Heathkit DX100 - 15K + 15K Bleeder resistor, plus two 10K, 10 watt power resistors - $6.00
Heathkit DX100 - Pair of 1625 tubes - $10.00
Heathkit DX100 - 5V4 tube - $9.00
Heathkit DX100 - Some other individual tubes are still available (inquire)
Heathkit DX100 - Pair of ceramic 1625 tube sockets - $10.00
Heathkit DX100 - Pair of ceramic 6146 tube sockets - $10.00
Heathkit DX100 - Pair of ceramic 5R4GY tube sockets - $10.00
Heathkit DX100 - single ceramic 5V4 tube socket - $5.00
Heathkit DX100 - Plate tuning Capacitor, 350 pF, EF JOHNSON - $25.00
Heathkit DX100 - Output loading variable Capacitor, with concentric switch and caps - $15.00
Heathkit DX100 - PA RF Tank Coil, bandswitching - $15.00
Heathkit DX100 - RFC final Plate Choke - $10.00
Heathkit DX100 - VFO - with 6AU6 tube $25.00
Heathkit DX100 - VFO - no tube $18.00
Heathkit DX100 - CRYSTAL SOCKET ASSY - 4 positions, FT243 - $24.00
Heathkit DX100 - CHASSIS (Copper) includes about 30 smaller parts - $25.00
Heathkit DX100B - CHASSIS (silver color) includes about 30 smaller parts - $25.00
Heathkit DX100 - BANDSWITCH Assembly - $12.00
Heathkit DX100 - DRIVER COIL - Band-switching type - $12.00
Heathkit DX100 - DRIVER variable Capacitor, 75 pF - $12.00
Heathkit DX100B - 25K-ohm / 4 Watt Driver Potentiometer - $9.00
Heathkit DX100 - 25K-ohm / 4 Watt Driver Potentiometer - $9.00
Heathkit DX100 - AUDIO GAIN POTENTIOMETER - $4.00
Heathkit DX100 - VFO - with tube - $25.00
Heathkit DX100 - VFO - no tube - $18.00
Heathkit DX100 - FUNCTION SWITCH assy - AM/CW - $8.00
Heathkit DX100 - XTAL-VFO SWITCH assy - $5.00
Heathkit DX100 - METER with rotary Meter Function switch - $12.00
Heathkit DX100 - PAIR of switches: AC ON-OFF (SPST) & PLATE ON-OFF (DPDT) - $5.00
Heathkit DX100 - Microphone jack and key jack assys - $5.00
Heathkit DX100 - AC input filter assy - $5.00
Heathkit DX100 - Rear accessory socket and filters assy - $4.00

DX100 Manual copy available with any of the items above. Shipping additional on the parts.

2439. FOR SALE: PALSTAR AT AUTO 1500 WATT AUTOMATIC ANTENNA TUNER

Yahoo group: amatuerradioswapfest
Date: 2011-11-02 01:40:41 UTC
From: n3dg
Topic: 2439 Message: 2439

Palstar AT AUTO Automatic Antenna Tuner supports 160-6 Meters Continuously at up to 1500 Watts key-down, Coaxial Cable, Single Wire and Ladder Lines, both Balanced and Unbalanced Feed Lines, and automaticlly matches almost any antenna to practically 1:1 SWR by Frequency Tracking your transceiver and/or RF Sensing any transceiver/transmitter with Fast, Quiet Stepper Motors controlling the Heavy-Duty Motorized Capacitor and Roller Inductor. As a Very Limited Edition unique device and soon to be collectors item, Palstar AT AUTO is the only high power automatic antenna tuner that has automatic frequency tracking, following your transceiver wherever it goes from 160-6 meters and even in between. Even the new Palstar HF AUTO does not Automatically Frequency Track. A Dual Backlit Analog Meter displays Forward/Reverse Power & SWR as well as an LCD Display shows SWR and operating conditions at all times. You can have the Palstar AT AUTO in Automatic Mode to automatically ensure lowest SWR wherever you go, or manually tune if you wish, or Bypass the tuner when you desire, all with a convenient front panel switch. Also included is a 4:1 Balun so you can tune open-wire and ladder-line antennas does not even come with the new Palstar HF AUTO.

The advantages of the Palstar AT AUTO over the Palstar HF AUTO are:
☐ Automatic Frequency Tracking
☐ Dual Analog Power/SWR Meter (as well as digital SWR)
☐ 4:1 Balun

She is in Mint Condition from an estate, rarely used as the owner had a SteppIR antenna that did not require a tuner.
Package includes: Palstar AT AUTO with latest Palstar Version 2.11 Firmware, Power Cable, Original Manual, Palstar Packaging and Carton.
$895 plus shipping, will include the optional Yaesu 6' CAT Interface Cable for $25.

2440. Need test leads for -

Yahoo group: amatuerradioswapfest
Date: 2011-11-04 14:35:01 UTC
From: John Murphy
Topic: 2440 Message: 2440

Hi all, recently at a hamfest, I acquired a Simpson Model 467 Digital Multimeter for $10.00. However it did not come with test leads. I am guessing, looking at the connectors where the leads plug into, it needs some special connectors. Anyone have a pair (or just the connectors) that would fit? I have looked online and have found them for a low, low, low price (but wait there□s more) (LOL Love those infomercials) for $23.+, however, I was hoping someone had something in their junkbox that may fit. Thanks for looking.

Paul,

I have already tried Radio Shack, no luck. I don□t have any local electronic supply stores within at least 500+ miles, so that is out.

I will try Newark Electronics tomorrow.

Thank you for the suggestions.

2443. RE: [ham4sale] Test Leads

Yahoo group: amatuerradioswapfest
Date: 2011-11-07 02:14:32 UTC
From: John Murphy
Topic: 2443 Message: 2443

Hi all, I am the original poster for this subject. I had found the test leads on Ebay, but waited to see what, if anything, anyone else would come up with. I thank you all for your suggestions, however none of them matched the Simpson Model 467. Someone had posted the exact link to eBay of the one□s I bought, so I went ahead and purchased them tonight. Again thank you everyone for the various suggestions

/snip/

I was looking for meter leads for a Sumpson 260 series 7, which I think are the same ones the OP was looking for. These military leads that fit Fluke and Tripplett probably do NOT have the right connectors for the Simpson equipment. If you know otherwise, please let me know.

From: Bry Carling
Topic: 2444 Message: 2444

FOR SALE: QTY 32 - New Electrolytic Caps, radial leads.

QTY - Capacitance / DC Voltage

1 - 10 uF / 400V
1 - 33 uF / 350V
13 - 33 uF / 400V
1 - 47uF / 400V
4 - 47 uF / 450V
4 - 82 uF / 400V
2 - 220uF / 400V
3 - 270uF / 200V
2 - 330uF / 63V
1 - 470uF / 63V

Total of 32 new capacitors, great for amateur radio and other electronic applications.

Will sell the whole box for $12.00 plus shipping

73 - Brian, AF4K

2445. Kenwood and other items FS

Yahoo group: amatuerradioswapfest
Date: 2011-12-12 12:44:50 UTC
From: Ken Simpson, W8EK
Topic: 2445 Message: 2445

HF Rig, Power Supplies, Dummy Load, Station Console,
Wattmeters/SWR Bridges, Coax Antenna Switch,
Microphones, HT Speaker Mics, DTMF Touch Tone
Microphones, Accessories for Kenwood HTs, original
Kenwood Manuals, and other Kenwood items For Sale:

Kenwood TS-130 HF rig, and PS-30 Power Supply:

Kenwood TS-130 HF SSB / CW transceiver
This rig covers 80 thru 10 meters, including the WARC bands.
It has about 100 watts out, with slightly lower on 12 and 10
meters. Of course it has IF shift, speech processor, and other
features. It is all solid state.
This one works fine, and looks fine. With paper work for $350.

Kenwood PS-30, 20 amp (at 13 V DC) power supply:
This power supply will furnish up to 20 amps at 13 V DC to power
most 100 W output HF transceivers. It also has auxiliary
terminals on the back to power an additional rig, such as a
2 m rig. The main connector is the 6 pin molex connector
that will match most Kenwood, Icom, and Alinco HF radios,
as well as some Yaesu.
This particular unit works 100% and looks very nice.
Paper work included for $90.

Buy both of the above for $425.

Pyramid PS-25 Power Supply:

The Pyramid PS-25 is a 13 Volt DC power supply with both a
voltmeter and an ammeter built in. The output voltage is
adjustable over a range from about 11.5 to 15.5 volts DC.
There is also an adjustment to set the current limiting,
up to 25 amps. This means it can be set so that it will
protect the finals of a solid state rig. In addition, a
buzzer is activated if it goes into over current limiting.
This power supply has the features you want!

This particular unit works fine, and looks extremely nice.

With paper work for $80.

Heath HN-31 "Cantenna" RF Dummy Load

This is the traditional Heath dummy load that will handle a
kilowatt. It has a derating curve both printed in the manual
and on the can.

It is in good shape both electrically and cosmetically. The cantenna has no rust, dents or dings.

I can ship it either with or without oil. The cost to purchase is the same, but of course the shipping will be higher with the oil.

Paper work is included for $40.

Heath SB-634 Station Console:

The Heathkit SB-634 station console is a multifunction unit. It contains a 24 hour digital clock (6 large digits, including seconds), 10 minute interval timer (3 digits -- minutes and seconds), phone patch and an SWR/Power meter. The large wattmeter reads either 200 watts or 2000 watts full scale, in addition to SWR. It matches the Heath SB series of equipment (Heath green), and is powered by 115 V AC.

This unit works on all of its functions. It looks extremely nice. I can not find a scratch on it, but there is very slight (and I emphasize very slight) wear on the 2000 watt push button.

With paper work for $150.

Heath HM-2140 A, dual meter Wattmeter / SWR Bridge:

The HM-2140 A uses two separate meters to measure power and SWR (forward and reflected power). It will measure either average power, or peak power (PEP) with a 9 volt battery. Power ranges are 200 and 2000 watts. Frequency range is from 160 thru 10 meters. It has a remote sensor, which permits the meter to be separated from the coax connection by up to 3 feet. This is the "A" model of this meter, which is the Heath Brown color (not the green), and has more features.

More details can be found at
http://www.radiomuseum.org/r/heath_wattmeter_hm_2140a_hm2140.html

This particular unit works fine, and looks very close to new. With paper work for $100.

HF and VHF SWR Bridges:

All of these cover from 3 to 150 MHz, covering HF, 6 meters, and 2 meters. SO-239 connectors.

Quement SWB-2
This unit features two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on the antenna at the same time.
It works fine and looks great. With paper work for $37.

Carter Craft 90-300
Single Meter SWR Bridge / Field Strength Meter
This one works fine. I am 99% certain it has not been used, except for my testing it.
In its original box with original instructions and little field strength antenna. $30

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see any scratches on it, but it does have a previous owners name on it. In its original box with original instructions. $28

MFJ "Strip Line" Coaxial antenna switch:

This antenna switch is in a heavy diecast housing that utilizes "stripline" construction to keep the impedance very close to 50 ohms. This means it permits good operation at higher frequencies up to 500 MHz, and gives over 50 db isolation. Unused antennas are grounded, with an additional position to ground all antennas. SO-239 connectors.

MFJ 1702 B Coax Switch
Switches 2 antennas. This one works 100% and looks great also. $24

Deluxe Desk Microphone w/ Kenwood 8 pin connector:

This is a great looking and great performing low impedance desk mic. It has a quality Shure 600 ohm cartridge in it (the cartridge alone is over $40 new), with a very nice black die case base and neck, with a chrome grill. It looks somewhat like a Shure 444, but no plastic on this one -- all metal!

This one looks like new, and works the same. It has a long (approx 6 foot) cord, with a round 8 pin connector for Kenwood. $75

Astatic Model 810-6 Gooseneck Microphone:

This mic is on a 12 inch gooseneck. The mic is a brushed metal about 5 1/4 inches long, and is actually part of the gooseneck. The cable goes thru the gooseneck. This has a 2 conductor shielded cable, so it is a quality balanced microphone with about a 4000 ohm impedance. The gooseneck terminates in a standard 5/8 inch threaded connector.

This one works fine and looks good. $45

Kenwood Hand Microphone with round 8 pin plug:

This hand mic works great on most Kenwood rigs with the round 8 pin connector, such as the TS-430, TS-440, TS-570, TM-241, TM-2530, TW-4000, and others.

It only says "Electret Condenser Mic" on it, with no
model number.

Basically, this mic is like an MC-43, only with a couple
more features. Of course it has the mic and PTT switch;
it also has up/down switches on the top. There are four
"extra" buttons labeled Call, VFO, MR, and PF. What these
four buttons do depends on the rig that it is attached to.
They will function on some rigs, and are completely useless
on others. There is also a "Lock" switch on the back.

Regardless if you use the four extra buttons or not, you
still have a mic that works like an MC-43.

This mic works fine, and looks like new. I am guessing it
came with a rig, and was immediately put in the drawer. $30

Speaker Microphones:

All of these have the 3.5 mm and 2.5 mm plugs on them,
as used by Kenwood, Icom, Alinco, Radio Shack, some Yaesu,
and other HTs.

Azden SDX-316
This is the rounder style speaker mic that fits nicely in
the palm of your hand. $ 20

Pryme Speaker Microphone
It works fine and look line new. $20

MFJ-287 Speaker Microphone
This fits the TH-21/31/41 series HTs, TH-205, TH-215, TH-415,
as well as others. It has a 3 conductor 3.5 mm plug and a 2
conductor 2.5 mm plug.
It works fine, and looks close to new. $15

DTMF Touch Tone Microphones:

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in
the mic, and "speed dial". 12 digit touch tone pad on the
front. 8 pin modular plug (like computer LAN).
Looks to be new. $38

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently
has a round 8 pin connector wired for Kenwood.
Nice condition. $40

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin plug. Looks to be unused. $38

Yaesu YM-22 DTMF Condenser Microphone
This mic has a 16 digit touch tone (DTMF) pad on the front.
There are up and down buttons on the top, in addition to
the PTT switch.
Stripped and tinned ends. Great condition. $40

Cables for Heil (and other) Microphones:

Heil CC-1 XLR 4
3 pin XLR Male to 4 pin XLR Female $25

3 pin XLR to stripped and tinned ends
About 10 feet of quality rubber covered mic cable with a 3 pin
XLR connector on one end, and nothing on the other end. Ideal
to add your own connector. Can be used with the CC-1 XLR-4
above. $20

Heil round 8 pin connector to 8 pin modular connector for Icom
Not positive of the number, but it might be HSTA-IM or HSTA-706
$15

Microphone Stands and holders:

Microphone Stands:

Regular round desk stand
Round 6 inch diameter heavy black / dark grey base, with
a 3 inch chrome tube coming up from the middle.
Standard 5/8 inch threaded. $15

Microphone holders:

Electro Voice Mic Holder
Gray colored EV, designed to hold 5/8 to 3/4 inch diameter mics,
and go into a stand with standard 5/8 inch threads. $5

Chrome Mic holder
Similar to EV holder, but chrome metal with a green felt on the
inside to protect the mic. For 1/2 inch to 5/8 inch diameter
microphones. Standard 5/8 inch threads. $5

Cables for CW keyers and keys:

Cable for paddles
About 3 feet long, and with a 1/8 inch (3.5 mm) stereo
connector on the end, like used by most rigs. $8
As above, but 1/4 inch plug. $8
As above, with 1/4 inch GOLD plated plug. $15

Cable for straight key
About 3 feet long, with a mono 1/8 inch (3.5 mm) phone
plug on it, as used with a straight key. $5
As above, but 1/4 inch plug. $5
Vintage cotton covered cord, with brass PL-55-A

(1/4 inch) plug (probably from WW2) $10

Accessories for Kenwood TH-205, TH-215, TH-225, TH-415,
and other HTs in this series:

Original Kenwood Rubber Duck antenna from TH-215. $10

Kenwood BC-2 Charger for PB-2 batteries. $12

MFJ-287 Speaker Microphone
Fits same HTs as the MFJ 286 above, but is a smaller more
compact speaker mic. It works fine, and looks close to new. $15

Kenwood Wrist Strap for TH-215, plus many other HTs. $4

BNC to PL-259 antenna adapter $5

Accessories for the Kenwood TH-21 / 31 / 41 series HTs:

Original Operating manual for TH-21 HT for 2 meters $8

Kenwood BH-3 belt clip and hardware for Kenwood TH-21/31/41
series HTs. $8

MFJ-287 Speaker Microphone
Fits same HTs as the MFJ 286 above, but is a smaller more
compact speaker mic. It works fine, and looks close to new. $15

Kenwood W09-0315 charger
This charger is used to charge the larger PB-21 H batteries
for the TH-21 series, and also on other Kenwood radios.
It produces 10.5 V DC at 42 ma, with a standard 2.1 mm
coaxial connector. $12

Kenwood Rubber duck antenna for the TH-21 HT
Shorter "Stubby Duck" from Kenwood. $20

Operator's Manual for Kenwood (Trio) TS-440 S:

This is a quality reproduction with a "comb" binding
that has been done by one of the professional reproduction
houses. W7FG I think.

This one has a plastic protector on the front, and is
in very nice condition. It includes schematic diagrams.
$18

Original Manuals for Kenwood equipment:
New ones have been added.

All manuals are in very nice condition, for Kenwood equipment.
All are original manuals only.

Operating manual for TM-2570/2550/2530 2 m xcvr $15
Operating manual for TW-4000 dual bander $15
Service manual for TW-4000 dual bander $20
Operating manual for TW-4100 dual bander $15
Operating manual for TH-21 HT for 2 m $8
Operating manual for TH-225, 2 m HT $12
Operating manual for TM-221/421 mobile $15
Operating manual for TH-241/441/541 mobile FM transceivers
...For 2 m, 440 MHz, & 1200 MHz. $12
Operating manual for TR-2400, 2 m HT $12
Service manual for TR-2600, 2 m HT $12
Operating manual for TR-7400, 2 m xcvr $8

Kenwood TM G-707 operating manual in Spanish:
Spanish version of the Operating Manual
for the TM G-707 dual band transceiver. New $10
All other manuals are English.

LF-30A Low Pass Filter $5
MC-30 & MC-35 hand microphones $5
MC-85 desk microphone $4
PB-1, PB-2, PB-3, & PB-4 battery packs $3
PS-6 power supply $6
SMC-24 speaker mic $4
SMC-25 speaker mic $4
SP-430 speaker $2
SP-820 Speaker $2

These are original Kenwood manuals only.

HT Belt Clips and Wrist Straps:

Belt Clips:
All include the hardware with the belt clip and are $6 each.
Kenwood BH-3 for Kenwood TH-21 / 31 / 41 series HTs
Motorola
Yaesu FT-207

Wrist Straps for various HTs - $4 each
Kenwood TH-215 / 225 / 415, TR-2500, etc.
Kenwood TR-2400
Yaesu FT-209

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, and many miscellaneous accessories.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

2446. Yaesu and related items FS

Yahoo group: amatuerradioswapfest
Date: 2011-12-17 13:38:02 UTC
From: Ken Simpson, W8EK
Topic: 2446 Message: 2446

Yaesu Items For Sale -- microphones, cables,
HT accessories, and more

Yaesu MH-1 Hand Microphone:
The Yaesu MH-1 b8 is the hand mic that is used on most of the Yaesu HF and some of the Yaesu VHF rigs. It is a hand mic that has a switch on the back with two audio frequency responses -- one for rag chewing, and one for more punch for DX. It has up and down switches, in addition to a "fast" switch. Of course it also has the normal PTT switch. It has a round 8 pin mic connector, wired for Yaesu.
This particular microphone looks like it might not have ever been used. I think it was probably put in a drawer when new, and left there. Of course it works fine. $38

Yaesu MH-31 B 8 dynamic hand microphone:
This is the Yaesu hand microphone that has the round 8 pin connector on it. It will go with virtually any Yaesu rig that uses the round 8 pin connector. It has up, down, and fst switches, and well as a tone switch, in addition to the PTT switch.
This particular unit works 100%, and appears to be unused. $40

Yaesu YM-31 hand microphone
The Yaesu YM-31 is a hand mic with a round 6 pin connector. Apparently it is either similar or the same as the MH-25A6j (not the MH-25 with the 8 pin connector). It is a 600 ohm impedance hand microphone, and has a Monitor on-off switch on the back. It should be compatible with any of the Yaesu rigs that uses the round 6 pin connector. It looks very similar to the Yaesu MH-1.
This one works fine and looks extremely nice. $25

Yaesu YM-22 DTMF Condenser Microphone
This mic has a 16 digit touch tone (DTMF) pad on the front. There are up and down buttons on the top, in addition to the PTT switch.
Stripped and tinned ends. Great condition. $40

Speaker Microphones:

Yaesu MH-34 b 4 b speaker microphone
This is the one that fits the Yaesu VX-8, VX-7, VX-6,

VX-5, VX-3, VX-2, VX-1, and that series of HTs. I
think it also fits the FT-50 and FT-60, and maybe
others. It has a single 4 conductor, 3.5 mm plug on
it. This one is just like new. $35

Yaesu YM-24 A speaker mic.
Fits FT-207, 208, plus many others. It has the odd
little round connector on it like Yaesu, Wilson, and
others used in the 1970s and 80s. This particular unit
works fine, and looks great also. $20

Pryme Speaker Microphone
This is the equivalent of the Yaesu MH-34 (above). It
has the 4 conductor 1/8 inch plug on it. It works 100%
and looks like it has not been used. $28

Azden SDX-316
This is the rounder style speaker mic that fits nicely in
the palm of your hand. Has 3.5 mm and 2.5 mm plugs for
Azden, Icom, some Yaesu, and others. $ 20

Pryme Speaker Microphone
This speaker mic has the 2.5 mm and 3.5 mm molded connector
as used by Icom, Alinco, Radio Shack, some Yaesu, and others.
It works fine and look line new. $20

MFJ-287 Speaker Microphone
This fits the TH-21/31/41 series HTs, TH-205, TH-215, TH-415,
as well as others. It has a 3 conductor 3.5 mm plug and a 2
conductor 2.5 mm plug.
It works fine, and looks close to new. $15

Yaesu HT Accessory Items:

Battery pack for Yaesu VX-2 or VX-3 HT
Lithium Ion Battery Pack fits both the VX-2 and the
VX-3. 3.7 volts, 1200 mahr, works great, and holds a charge
like new. $15

Yaesu NC-18 B Charger
Provides 14.5 V DC at 50 ma to charge many different HTs,
including the Yaesu FT-411, FT-811, FT-911, FT-23, FT-209,
FT-415, FT-410, FT-470, FT-727, FT-530, FT-703, and more.
Small 2.5 mm male plug. $10

Belt Clip for Yaesu FT-207, with hardware. $8

Wrist Strap for Yaesu FT-209, and probably others $4

Cables for Heil (and other) Microphones:

Heil CC-1 XLR 4
4 pin XLR Female to 3 pin XLR Male $25

3 pin XLR to stripped ends
About 10 feet of quality rubber covered mic cable with a 3 pin XLR connector on one end. Ideal to add your own connector. Can be used with the CC-1 XLR-4 above. $20

Microphone Stands:

Regular round desk stand
Round 6 inch diameter heavy black / dark grey base, with a 3 inch chrome tube coming up from the middle. Standard 5/8 inch threaded. $15

Microphone holders:

Electro Voice Mic Holder
Gray colored EV, designed to hold 5/8 to 3/4 inch diameter mics, and go into a stand with standard 5/8 inch threads. $5

Chrome Mic holder
Similar to EV holder, but chrome metal with a green felt on the inside to protect the mic. For 1/2 inch to 5/8 inch diameter microphones. Standard 5/8 inch threads. $5

Heath SB-634 Station Console with Wattmeter:

The Heathkit SB-634 station console is a multifunction unit. It contains a 24 hour digital clock (6 large digits, including seconds), 10 minute interval timer (3 digits -- minutes and seconds), phone patch and an SWR/Power meter. The large wattmeter reads either 200 watts or 2000 watts full scale, in addition to SWR. It matches the Heath SB series of equipment (Heath green), and is powered by 115 V AC.

This unit works on all of its functions. It looks extremely nice. I can not find a scratch on it, but there is very slight (and I emphasize very slight) wear on the 2000 watt push button.

With paper work for $150.

HF and VHF SWR Bridges:

All of these cover from 3 to 150 MHz, covering HF, 6 meters, and 2 meters. SO-239 connectors.

Quement SWB-2
This unit features two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on the antenna at the same time.
It works fine and looks great. With paper work for $37.

Carter Craft 90-300
Single Meter SWR Bridge / Field Strength Meter
This one works fine. I am 99% certain it has not been used,

except for my testing it.
In its original box with original instructions and little
field strength antenna. $30

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see
any scratches on it, but it does have a previous owners name
on it. In its original box with original instructions. $28

Prices do not include shipping from Florida.

I also have many other accessories available such as many
different types of HTs, VHF and UHF rigs, HF and VHF/UHF
antennas, etc.
Just too many to list here. Please e-mail your requests.

Thanks.

2447. REDUCED: Heathkit DX100 parts

Yahoo group: amatuerradioswapfest
Date: 2011-12-19 00:37:24 UTC
From: Bry Carling
Topic: 2447 Message: 2447

FOR SALE: DX100 Parts / updated list as of DEC 18, 2011

QTY 4 - 120 uF at 450V DC Capacitors

QTY 1 - 20 + 20 + 20 uF at 450V Capacitor

QTY 2 - Switch, plate ON-OFF

QTY 1 - Switch main power ON-OFF

QTY 1 - Bleeder resistor - 15 K plus 15K-ohms

QTY 2 - 10K at 10 Watts resistor

QTY 1 - Drive level potentiometer 25 K at 4 watts with shaft

QTY 1 - Ceramic feedthru and coil for underside of 6146 tube feed from driver stage.

QTY 1 - Driver coil assembly, bandswitching

QTY 4 - 1625 Plate Caps - ceramic

QTY 4 - 1625 socket, 7-pin

QTY 2 - 5U4 sockets

QTY 5 - ceramic octal socket for 5V4 tube etc.

QTY 1 - Sub-chassis for 6146 tubes with bracket, tube sockets etc.

QTY 1 - RF Final tank coil assembly

QTY 1 - Loading Variable Capacitor, 0 - 250 pF

QTY 1 - Plate Tuning Variable Capacitor, 0 - 150 pF with shaft extension

QTY 2 - Driver Tuning Variable Capacitor, 0 - 100 pF with shaft extension

QTY 3 - Mode Switch - AM, CW etc.

QTY 1 - VFO control shaft and bushing - 3/4"

QTY 2 - Meter selector switch - rotary

QTY 1 - CW Key jack

QTY 2 - Audio input jack assembly with bracket, 5 capacitors, 3 resistors, terminal strips etc.

QTY 2 - Audio Gain potentiometer for microphone input level

QTY 1 - AC Input filter assembly

QTY 2 - Accessory jack assembly with coils

QTY 2 - AC power cable with fused plug

BOX OF TUBES:
5U4 X 3
OA2 X 3
6AQ5 X 1
12BY7A X 5
5763 X 1
12AX7A X 6
12AU7A X 2
6AL5 X 2
6AU6A X 1

Various couplings, control shafts and small parts, red bezel lamp glass, etc.

2 bags of small hardware parts etc.

Several extra capacitors and odds-ends such as 0.1 uF at 600V DC caps etc.

For details and pricing - see web page:

2448. FS: Crystal Sockets

Yahoo group: amatuerradioswapfest
Date: 2011-12-19 15:10:04 UTC
From: Bry Carling
Topic: 2448 Message: 2448

FOR SALE: Crystal Sockets

FT243 Crystal Sockets - 1/2" spacing X 0.094" diameter pins

Single FT243 Socket - two hole mount - classic style with shoulder - $8.00 each
(24 available)

Single FT243 Socket - smaller black type - single hole mount - $6.00 each
(4 available)

DUAL FT243 socket - square phenolic, Cinch, single hole mount, accepts two crystals - $10.00
(1 available)

QUAD in-line FT243 socket for multiple crystals, end to end on nice small copper subchassis - as used in DX100 - $24.00
(1 available)

HC6U Crystal Sockets - 1/2" spacing X 0.050" diameter pins
These are new ceramic sockets, single hole mount.
Available for $3.00 each or ten for $25.00 plus shipping
(60 available)

Triple hc6u socket - black or white - $5.00 each
(2 available)

Used hc6u sockets available for $2.00 each
(4 available)

CR1A (20C, DC30) crystal sockets, rare - pin spacing 0.5" and pin diameter 0.125" - for $4.00 each
(2 available)

DC34 / DC35 crystal sockets, Ceramic. rare - pin spacing 0.75" and pin diameter 0.125" - for
$4.00 each
(14 available)

DC34 / DC35 crystal sockets, Plastic. Rare - pin spacing 0.75" and pin diameter 0.125" - for
$4.00 each
(24 available)

CR-15/U Crystal socket, 3 pins New, Rare - 1-5/8" X 1-3/16" X 2" tall.
3 pins are 1/8" dia. Two are spaced 1/2" apart. third pin
is offset by 7/8" from each othe other two. $8.00 each
(2 available)

hc25 / hc50 crystal sockets, for the smaller metal can crystals, pc mount or attach wires $2.50 each.
(5 available)

2449. FS: Boxes of Electrolytic Capacitors

Yahoo group: amatuerradioswapfest
Date: 2011-12-20 12:43:54 UTC
From: Bry Carling
Topic: 2449 Message: 2449

FOR SALE: ELECTROLYTIC CAPACITORS

Mix of radial, axial, upright can - some NOS. Almost all are new.
(one or two may be good, tested caps)

BOX #1 = QTY 35 electrolytic CAPACITORS
QTY 2, 0.068 uF at 630 V
QTY 2, 0.056 uF at 630 V
QTY 1, 4 uF at 600 V
QTY 2, 8 uF at 450 V
QTY 1, 8 + 8 uF at 450 V
QTY 2, 16 uF at 450 V
QTY 1, 125 uF at 450 V
QTY 1, 10 + 10 uF at 450 V
QTY 2, 820 uF at 450 V
QTY 1, 40 uF at 450 V
QTY 1, 68 uF at 400 V
QTY 4, 220 uF at 400V
QTY 2, 33 uF at 400V
QTY 1, 40 + 20 + 10 uF at 350 V
QTY 1, 22 uF at 350 V
QTY 1, 10 uF at 350 V
QTY 1, 100 uF at 250 V
QTY 1, 100 uF at 200 V
QTY 1, 4700 uF at 35 V
QTY 1, 4.7 uF at 35 V
QTY 2, 2200 uF at 25 V
QTY 4, 100 uF at 25 V
Total of 35 excellent capacitors for $45.00 plus $12.00 shipping

BOX #2 = QTY 40 electrolytic CAPACITORS
Mix of radial, axial, upright can - some NOS. Almost all are new.
QTY 2, 0.068 uF at 630 V
QTY 2, 0.056 uF at 630 V
QTY 1, 16 uF at 600V
QTY 1, 0.47 uF at 600V
QTY 2, 47 uF at 450 V
QTY 1, 20 uF at 450 V
QTY 1, 10 + 10 uF at 450 V
QTY 3, 82 uF at 400 V
QTY 5, 220 uF at 400 V
QTY 1, 33 uF at 400 V
QTY 3, 0.47 uF at 400 V

QTY 1, 22 uF at 350 V
QTY 1, 3 uF at 350 V
QTY 1, 47 uF at 250 V
QTY 1, 33 uF at 250 V
QTY 1, 270 uF at 200 V
QTY 1, 100 uF at 200 V
QTY 1, 1 uF at 200 V
QTY 1, 1000 uF at 50 V
QTY 2, 2200 uF at 35 V
QTY 1, 4.7 uF at 35 V
QTY 1, 1000 uF at 25 V
QTY 5, 100 uF at 25 V
QTY 1, 2200 uF at 16 V
Total of 40 excellent capacitors for $45.00 plus $12.00 shipping

BOX #3 = QTY 30 electrolytic CAPACITORS
Mix of radial, axial, upright can - some NOS. Almost all are new.
QTY 2, 0.068 uF at 630 V
QTY 2, 0.056 uF at 630 V
QTY 1, 16 uF at 600 V
QTY 1, 125 uF at 450 V
QTY 1, 30 uF at 450 V
QTY 1, 20 uF at 450 V
QTY 3, 16 uF at 450 V
QTY 4, 20 + 20 uF at 450 V
QTY 8, 220 uF at 400 V
QTY 3, 270 uF at 400 V
QTY 1, 82 uF at 400 V
QTY 1, 33 uF at 400 V
QTY 2, 1500 uF at 250 V
Great group of capacitors for a low price. $45.00 plus $12.00 shipping

2453. FS: Heathkit test equipment - GDO

Yahoo group: amatuerradioswapfest
Date: 2012-01-14 15:47:01 UTC
From: Bry Carling
Topic: 2453 Message: 2453

FOR SALE: Two complete Heathkit Grid Dip Oscillator sets:

1) Heathkit GD1A - covers 2.0 - 250.0 MHz. in above average condition, with all 5 of the coils
in their original box. Used to determine the resonant frequency of tuned circuits, antennas etc.
Also useful for aligning receivers, transmitters etc. The lower range can be extended down to 350 kHz. with an optional coil (not included) as described in the manual. 120V AC operation. Manual included - a copy of the original 21 page manual with schematic.
Exceptionally nice, works great - available for $50.00 plus shipping
(photos available)

2) Heathkit HD1250 Solid State Dip Meter in excellent condition with all 7 coils in great shape, covering 1.6 MHz to 260.0 MHz. Used to determine the resonant frequency of tuned circuits, antennas etc. Also useful for aligning receivers, transmitters etc.
This one includes the nice plastic carry caseand is all in excellent shape. Looks great.
Uses a standard 9V DC battery. Works fine as it should and is an exceptionally nice set.
Includes a copy of the 76 page manual with schematic (pdf).
Available for $50.00 plus shipping.
(photos available)

FOR SALE:

MFJ-812 VHF Wattmeter / SWR meter.
This is the worlds most popular and most affordable VHF SWR/Wattmeter.
It has a built-in Field strength Meter. Covers 144 and 220 MHz.
Read forward and reflected power in 2 ranges - 30 or 300 Watts. Reads SWR from
144 thru 220Mhz. Also reads relative field strength from 1 to 220 MHz. Has binding
post for field strength antenna. Measures 4.5 x 2.25 x 3 inches. Eggshell White.
Excellent appearance and in working condition.
Available for $24.00 plus shipping
(photo available)

RL DRAKE Low Pass Filter model TV1000LP rated for 1000 Watts up to 30 MHz, 52 Ohms.
Has the two standard SO-239 connectors for attaching coaxial cables. These typically go
for around $35.00 on eBay.
Available for $20.00 plus shipping
(photo available)

2456. FS: Panel Meters

Yahoo group: amatuerradioswapfest
Date: 2012-01-14 20:37:42 UTC
From: Bry Carling
Topic: 2104 Message: 2456

FOR SALE: Panel Meters - all in excellent condition except as noted.

Simpson Square Panel Meter model 37, 0 - 1 Amperes "radio frequency" .
Three inches square with traditional rounded corners.
QTY 1 available for $10.00 plus shipping.

Jewell Electrical round panel meter Pattern No. 66 for 0 - 1 Amperes "radio frequency."
Thermocouple type. Round 3.25" diameter for 2-1/2" hole.
QTY 1 available for $10.00 plus shipping.

Weston Electrical Instrument Model 425 for 0 - 5 Amperes RF.
Round panel meter with 3.5" diameter and uses a 2.75" diameter hole.
Since the outer case has a crack in it, the price is set
accordingly. Seems to still work fine though.
QTY 1 available for $3.00 plus shipping.

General Electric 0 - 50 mA DC meter, 3" X 3-1/8" square type with rounded corners.
QTY 1 available for $10.00 plus shipping.

Jewell Electrical panel meter Pattern No. 53. 0 - 10V DC. Round 3.25" diameter for 2-1/2"
hole.
QTY 1 available for $6.00 plus shipping.

General Electric Elapsed Time Meter for 120V AC. Reads Hours on a 0 -99999 scale.
Has already had 192 hours usage. This is a round panel meter - 3.5" diameter.
Uses a 3" hole. Since the outer ring of the case has a chip out of it, the price is set
accordingly.
QTY 1 available for $3.00 plus shipping.

Weston Electrical Instrument Model 301 Voltmeter, with scales for 0 - 140V and
0 - 7V DC
QTY 1 available for $5.00 plus shipping.

Weston Electrical Instrument Model 478 round panel meter for 0 - 5V AC.
with 3.5" diameter and uses a 2.75" diameter hole.
QTY 1 available for $8.00 plus shipping.

Triplett Model 321 round panel meter for 100 - 0 - 100 microAmperes DC, dual polarity.
Has center zero. 3.25" diameter for 2.75" hole.
QTY 1 available for $10.00 plus shipping.

Weston Electrical Instrument - Model 476 round panel meter- rear mount, no flange.
Scales for 0 - 60V and 0 - 120V AC. Has 2.75" outer diameter and 2.5" inside diameter.
QTY 1 available for $8.00 plus shipping.

Jewell Electrical panel meter Pattern No. 70. Round panel meter for 0 - 15V AC.
3.25" diameter for 2-1/2" hole.
QTY 1 available for $6.00 plus shipping.

This next one is a beauty - WESTERN ELECTRIC 0 - 1mA, MODEL ADK84 with scales for:
P.A. Plate 0 - 200 mA segmented as CW in the 80-120mA range and MCW in the 120 - 200 mA range. Also has a scale in the center for P.A. Grid and Battery.
Has 2.75" diameter and uses a 2.25" diameter hole.
QTY 1 available for $15.00 plus shipping.

Jewell Electrical Company dual scale meter for 0 - 12V DC and 0 - 120V DC.
3.75" diameter for 3" hole. The case looks fine but has a small chip out of the glass, and the so price is set accordingly.
QTY 1 available for $3.00 plus shipping.

Combine to save on shipping. Thanks for looking.

2457. FS: Pair of EIMAC 4-125A Tubes

Yahoo group: amatuerradioswapfest
Date: 2012-01-15 02:47:59 UTC
From: Bry Carling
Topic: 2457 Message: 2457

FOR SALE: Pair of EIMAC 4-125A Tubes

A pair of these will typically produce 300 - 400 watts output when used with a 2500V plate supply. These are good, used / tested tubes. They come in original EIMAC boxes and have plenty of life left in them.

I will sell these for $20.00 each plus shipping

73 - Brian, AF4K

2458. FS: 6146 Tubes

Yahoo group: amatuerradioswapfest
Date: 2012-01-16 12:14:36 UTC
From: Bry Carling
Topic: 2458 Message: 2458

For sale 6146 tubes:

QTY 4 - type 6293 / 6146 tubes. Used, good tested. RCA Brand.
This is the rare heavy duty version of the 6146 much sought after. To quote K9STH, these are a very heavy duty version of the 6146 and can be substituted without any problems. This is the 6293. A 6293 will outlast a "plain" 6146 by at least 5 times the life (over 10 times is not that unusual!). We would "kill" back in the late 1950s and early 1960s to get our hands on a pair of 6293 tubes for our DX-100s, etc.

Available for $7.00 each plus shipping

QTY 2 - 6146A / 8298 Tubes. Used, good tested. Westinghouse brand.

Available for $6.00 each plus shipping

2460. FS: Three 12JB6 Tubes

Yahoo group: amatuerradioswapfest
Date: 2012-01-17 02:49:55 UTC
From: Bry Carling
Topic: 2460 Message: 2460

FOR SALE: Three good used 12JB6 Tubes

As used in the Drake TR3 and other radios. They are used but in the original boxes.
Two test fine and one of them tests at 45, so slightly weak.

I would like $12.00 each for the two better ones and $8.00 for the weaker one.
Shipping additional.

Best regards - Brian, AF4K

2465. FS: Allen-Bradley Pot Assortments etc.

Yahoo group: amatuerradioswapfest
Date: 2012-01-23 15:38:10 UTC
From: Bry Carling
Topic: 2465 Message: 2465

FOR SALE: Allen-Bradley Pot Assortments

While I could never be accused of selling pot, I do have a large number of good potentiometers to sell. Most of us kno wthat Allen-Bradley makes som of the very best potentiometers ever.

Most of these are new, USA made items, several are removed from working equipment.

POT ASSORTMENT #1 - Mostly TYPE J and TYPE P.
QTY 55 A-B pots, maybe a couple of Ohmite that look jusy the same. All 1/4" shafts. Many full length. Some are trimmer length. Includes 250, 1K, Dual 1K, 3.5K, 5K, 10K, 15K, 25K, 250K, 1.0M, 1.5M, Dual 10 M - total of 55 potentiomeneters available for $25.00 plus shipping.

POT ASSORTMENT #2 - Mostly TYPE J and TYPE P.
QTY 55 A-B pots, a couple of them are Ohmite. All have the standard 1/4" shafts. Many full length. Several are trimmer length pots. Includes: 50, 1K, 10K, 50K, 100K, 250K, Dual 500K full shaft, Dual 500K shorter shaft, 1.0 M, 2.5 M, 5 M, 10 M - total of 55 potentiomeneters available for $25.00 plus shipping.

POT ASSORTMENT #3 - Allen Bradley Type J yellow plastic pots with 1/4" shafts.
QTY 7 A-B pots with 200 ohms
QTY 3 A-B pots with 1000 ohns
QTY 2 CTS 250K pots New in Box pots with long 1/4" shafts
QTY 1 Centralab 1000 Ohms, new in box, long shaft, mix of new and used.
Total of 13 potentiometers available for $8.00 plus shipping

POT ASSORTMENT #4 - Precision multiturn pots - Bourns, Spectrol and Clarostat.
QTY 12 total, including 1K, 10K, 20K and 100K pots, mix of new and used.
Total of 12 potentiometers available for $8.00 plus shipping

POT ASSORTMENT #5 - QTY 18 slider pots - nos, audio faders by Stackpole, Dale etc.
QTY 5 X 10K
QTY 5 X 20K
QTY 5 X 30K
QTY 3 X 100K
Total of 18 potentiometers available for $9.00 plus shipping

NON-Allen-Bradley potentiometer asortments -

POT ASSORTMENT #6 - QTY 30 Various brands of potentiometers, mix of new and used.
Some dual pots. All 1/4" shafts, mostly full length. Includes values such as:
1K, 25K, 100K, 1 M, 5M etc.
Total of 30 potentiometers available for $12.00 plus shipping

POT ASSORTMENT #7 - QTY 30 Various brands of potentiometers, mix of new and used.
Some dual pots. All 1/4" shafts, mostly full length. Includes values such as:

1K, 25K, 100K, 1 M, 5M etc.
Total of 30 potentiometers available for $12.00 plus shipping

Please don't ask me if these are audio taper (logarithmic) or linear taper (I have NO idea!)
Also - please don't ask me if I have specific pots. I don't really have a way to hunt for them.

Contact me off the list to arrange purchase.

Thanks & 73 - Brian, AF4K

FOR SALE: NATIONAL RADIO CO. Variable Capacitor 110pF + 110 pF

This is a split stator 220 pF variable capacitor that can be configuered either for 220 pF or
two sections of 110 pF each. Looks to be good for around 3 kV or more.

Ceramic frame measures 6" X 4" X 3-1/2" and has a standard 1/4" shaft that is 1-1/2" long.

QTY 1 available for $22.00 plus shipping

(I have flexible, insulated 1/4" couplings if anyone needs some!)

2478. Kenwood and other ham items FS

Yahoo group: amatuerradioswapfest
Date: 2012-02-22 16:38:33 UTC
From: Ken Simpson, W8EK
Topic: 2478 Message: 2478

HF Rig, Power Supplies, Station Console,
Wattmeters/SWR Bridges, Microphones, HT Speaker
Mics, DTMF Touch Tone Microphones, Accessories
for Kenwood HTs, original Kenwood Manuals, and
other Kenwood items For Sale:

Kenwood TS-130 HF rig, and PS-30 Power Supply:

Kenwood TS-130 HF SSB / CW transceiver
This rig covers 80 thru 10 meters, including the WARC bands.
It has about 100 watts out, with slightly lower on 12 and 10
meters. Of course it has IF shift, speech processor, and other
features. It is all solid state.
This one works fine, and looks fine. With paper work for $350.

Kenwood PS-30, 20 amp (at 13 V DC) power supply:
This power supply will furnish up to 20 amps at 13 V DC to power
most 100 W output HF transceivers. It also has auxiliary
terminals on the back to power an additional rig, such as a
2 m rig. The main connector is the 6 pin molex connector
that will match most Kenwood, Icom, and Alinco HF radios,
as well as some Yaesu.
This particular unit works 100% and looks very nice.
Paper work included for $90.

Buy both of the above for $425.

Pyramid PS-25 Power Supply:

The Pyramid PS-25 is a 13 Volt DC power supply with both a
voltmeter and an ammeter built in. The output voltage is
adjustable over a range from about 11.5 to 15.5 volts DC.
There is also an adjustment to set the current limiting,
up to 25 amps. This means it can be set so that it will
protect the finals of a solid state rig. In addition, a
buzzer is activated if it goes into over current limiting.
This power supply has the features you want!

This particular unit works fine, and looks extremely nice.

With paper work for $80.

Heath SB-634 Station Console:

The Heathkit SB-634 station console is a multifunction unit.
It contains a 24 hour digital clock (6 large digits, including
seconds), 10 minute interval timer (3 digits -- minutes and

seconds), phone patch and an SWR/Power meter. The large
wattmeter reads either 200 watts or 2000 watts full scale,
in addition to SWR. It matches the Heath SB series of equipment
(Heath green), and is powered by 115 V AC.

This unit works on all of its functions. It looks extremely
nice. I can not find a scratch on it, but there is very slight
(and I emphasize very slight) wear on the 2000 watt push button.

With paper work for $150.

Heath HM-2140 A, dual meter Wattmeter / SWR Bridge:

The HM-2140 A uses two separate meters to measure power and
SWR (forward and reflected power). It will measure either
average power, or peak power (PEP) with a 9 volt battery.
Power ranges are 200 and 2000 watts. Frequency range is
from 160 thru 10 meters. It has a remote sensor, which
permits the meter to be separated from the coax connection
by up to 3 feet. This is the "A" model of this meter, which
is the Heath Brown color (not the green), and has more features.

More details can be found at
http://www.radiomuseum.org/r/heath_wattmeter_hm_2140a_hm2140.html

This particular unit works fine, and looks very close to new.
With paper work for $100.

HF and VHF SWR Bridges:

All of these cover from 3 to 150 MHz, covering HF, 6 meters,
and 2 meters. SO-239 connectors.

Quement SWB-2
This unit features two separate meters -- one for reading
forward power and another for reading SWR. This permits one
to easily monitor both the power going out, and the SWR on
the antenna at the same time.
It works fine and looks great. With paper work for $37.

Carter Craft 90-300
Single Meter SWR Bridge / Field Strength Meter
This one works fine. I am 99% certain it has not been used,
except for my testing it.
In its original box with original instructions and little
field strength antenna. $30

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see
any scratches on it, but it does have a previous owners name
on it. In its original box with original instructions. $28

Deluxe Desk Microphone w/ Kenwood 8 pin connector:

This is a great looking and great performing low impedance desk mic. It has a quality Shure 600 ohm cartridge in it (the cartridge alone is over $40 new), with a very nice black die case base and neck, with a chrome grill. It looks somewhat like a Shure 444, but no plastic on this one -- all metal!

This one looks like new, and works the same. It has a long (approx 6 foot) cord, with a round 8 pin connector for Kenwood. $75

Astatic Model 810-6 Gooseneck Microphone:

This mic is on a 12 inch gooseneck. The mic is a brushed metal about 5 1/4 inches long, and is actually part of the gooseneck. The cable goes thru the gooseneck. This has a 2 conductor shielded cable, so it is a quality balanced microphone with about a 4000 ohm impedance. The gooseneck terminates in a standard 5/8 inch threaded connector.

This one works fine and looks good. $45

Kenwood Hand Microphone with round 8 pin plug:

This hand mic works great on most Kenwood rigs with the round 8 pin connector, such as the TS-430, TS-440, TS-570, TM-241, TM-2530, TW-4000, and others.
It only says "Electret Condenser Mic" on it, with no model number.

Basically, this mic is like an MC-43, only with a couple more features. Of course it has the mic and PTT switch; it also has up/down switches on the top. There are four "extra" buttons labeled Call, VFO, MR, and PF. What these four buttons do depends on the rig that it is attached to. They will function on some rigs, and are completely useless on others. There is also a "Lock" switch on the back.

Regardless if you use the four extra buttons or not, you still have a mic that works like an MC-43.

This mic works fine, and looks like new. I am guessing it came with a rig, and was immediately put in the drawer. $30

Speaker Microphones:

All of these have the 3.5 mm and 2.5 mm plugs on them, as used by Kenwood, Icom, Alinco, Radio Shack, some Yaesu, and other HTs.

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. $ 20

Pryme Speaker Microphone
It works fine and look line new. $20

MFJ-287 Speaker Microphone
This fits the TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug.
It works fine, and looks close to new. $15

DTMF Touch Tone Microphones:

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in the mic, and "speed dial". 12 digit touch tone pad on the front. 8 pin modular plug (like computer LAN).
Looks to be new. $38

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently has a round 8 pin connector wired for Kenwood.
Nice condition. $40

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic. Presently with 4 pin plug. Looks to be unused. $38

Yaesu YM-22 DTMF Condenser Microphone
This mic has a 16 digit touch tone (DTMF) pad on the front. There are up and down buttons on the top, in addition to the PTT switch.
Stripped and tinned ends. Great condition. $40

Cables for Heil (and other) Microphones:

Heil CC-1 XLR 4
3 pin XLR Male to 4 pin XLR Female $25

3 pin XLR to stripped and tinned ends
About 10 feet of quality rubber covered mic cable with a 3 pin XLR connector on one end, and nothing on the other end. Ideal to add your own connector. Can be used with the CC-1 XLR-4 above. $20

Heil round 8 pin connector to 8 pin modular connector for Icom
Not positive of the number, but it might be HSTA-IM or HSTA-706
$15

Microphone Stands and holders:

Microphone Stands:

Regular round desk stand
Round 6 inch diameter heavy black / dark grey base, with a 3 inch chrome tube coming up from the middle. This one has

a 1/4 inch hole in the base, half way between the center and
the edge, where I think someone might have had a PTT switch
in the past.
Standard 5/8 inch thread. $15

Microphone holders:

Electro Voice Mic Holder
Gray colored EV, designed to hold 5/8 to 3/4 inch diameter mics,
and go into a stand with standard 5/8 inch threads. $5

Chrome Mic holder
Similar to EV holder, but chrome metal with a green felt on the
inside to protect the mic. For 1/2 inch to 5/8 inch diameter
microphones. Standard 5/8 inch threads. $5

Cables for CW keyers and keys:

Cable for paddles
About 3 feet long, and with a 1/8 inch (3.5 mm) stereo
connector on the end, like used by most rigs. $8
As above, but 1/4 inch plug. $8
As above, with 1/4 inch GOLD plated plug. $15

Cable for straight key
About 3 feet long, with a mono 1/8 inch (3.5 mm) phone
plug on it, as used with a straight key. $5
As above, but 1/4 inch plug. $5

Accessories for Kenwood TH-205, TH-215, TH-225, TH-415,
and other HTs in this series:

Original Kenwood Rubber Duck antenna from TH-215. $10

Kenwood BC-2 Charger for PB-2 batteries. $12

MFJ-287 Speaker Microphone
Fits same HTs as the MFJ 286 above, but is a smaller more
compact speaker mic. It works fine, and looks close to new. $15

Kenwood Wrist Strap for TH-215, plus many other HTs. $4

BNC to PL-259 antenna adapter $5

Accessories for the Kenwood TH-21 / 31 / 41 series HTs:

Original Operating manual for TH-21 HT for 2 meters $8

Kenwood BH-3 belt clip and hardware for Kenwood TH-21/31/41
series HTs. $8

MFJ-287 Speaker Microphone
Fits same HTs as the MFJ 286 above, but is a smaller more
compact speaker mic. It works fine, and looks close to new. $15

Kenwood W09-0315 charger
This charger is used to charge the larger PB-21 H batteries
for the TH-21 series, and also on other Kenwood radios.
It produces 10.5 V DC at 42 ma, with a standard 2.1 mm
coaxial connector. $12

Kenwood Rubber duck antenna for the TH-21 HT
Shorter "Stubby Duck" from Kenwood. $20

Operator's Manual for Kenwood (Trio) TS-440 S:

This is a quality reproduction with a "comb" binding
that has been done by one of the professional reproduction
houses. W7FG I think.

This one has a plastic protector on the front, and is
in very nice condition. It includes schematic diagrams.
$18

Original Manuals for Kenwood equipment:
New ones have been added.

All manuals are in very nice condition, for Kenwood equipment.
All are original manuals only.

Operating manual for TM-2570/2550/2530 2 m xcvr $15
Operating manual for TW-4000 dual bander $15
Service manual for TW-4000 dual bander $20
Operating manual for TW-4100 dual bander $15
Operating manual for TH-21 HT for 2 m $8
Operating manual for TH-225, 2 m HT $12
Operating manual for TM-221/421 mobile $15
Operating manual for TH-241/441/541 mobile FM transceivers
...For 2 m, 440 MHz, & 1200 MHz. $12
Operating manual for TR-2400, 2 m HT $12
Service manual for TR-2600, 2 m HT $12
Operating manual for TR-7400, 2 m xcvr $8

Kenwood TM G-707 operating manual in Spanish:
Spanish version of the Operating Manual
for the TM G-707 dual band transceiver. New $10
All other manuals are English.

LF-30A Low Pass Filter $5
MC-30 & MC-35 hand microphones $5
MC-85 desk microphone $4
PB-1, PB-2, PB-3, & PB-4 battery packs $3
PS-6 power supply $6
SMC-24 speaker mic $4
SMC-25 speaker mic $4
SP-430 speaker $2
SP-820 Speaker $2

These are original Kenwood manuals only.

HT Belt Clips and Wrist Straps:

Belt Clips:
All include the hardware with the belt clip and are $6 each.
Kenwood BH-3 for Kenwood TH-21 / 31 / 41 series HTs
Motorola
Yaesu FT-207

Wrist Straps for various HTs - $4 each
Kenwood TH-215 / 225 / 415, TR-2500, etc.
Kenwood TR-2400
Yaesu FT-209

I also have many other accessories available such as many different types of microphones, HTs, HF, VHF and UHF rigs, HF and VHF/UHF antennas, and many miscellaneous accessories. Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

CW Items For Sale:

CW Keyer and Bencher Paddles:

MFJ 422 B X electronic keyer
This keyer includes sidetone, and has adjustments for volume, tone frequency, and weighting, as well as speed. It will key either positive or negative voltages, and is powered by an internal 9 V battery, or external 5 to 9 volt supply. It is made to go on the back of a Bencher Paddle.
It works 100%, and looks great also.
With paper work for $45.

Bencher BY-1 Iambic Paddle
True Bencher, and not the MFJ clone. This has the black base, with chrome parts. It looks great and works the same. $65

Wall Wart Power Supply
This power supply will furnish 9 Volts DC and has the small 2.5 mm plug on it, as needed by the MFJ-422 above. $10

Buy all three of the above for $110.

Straight Keys:

Generic brass colored, oval base key
This is similar to a J-38 (without the bakelite base), but is a Japanese copy. It is brass colored, but is not real brass. Includes shorting switch.
It works fine and looks fine. $18

Generic straight key
This is a generic CW straight key with a plastic base.
It is nothing fancy, but it will do the job. $10

Cables for Keys and Keyers:

Cable for straight key
About 3 feet long, with a mono 1/8 inch (3.5 mm) phone plug on it, as used with a straight key. $5
As above, but 1/4 inch plug. $5

Cable for paddles
About 3 feet long, and with a 1/8 inch (3.5 mm) stereo connector on the end, like used by most rigs. $8
As above, but 1/4 inch plug. $8

As above, with 1/4 inch GOLD plated plug. $15

Prices do not include shipping from Florida.

Thanks.

2487. Power Supplies FS

Yahoo group: amatuerradioswapfest
Date: 2012-03-09 13:22:30 UTC
From: Ken Simpson, W8EK
Topic: 2487 Message: 2487

Power Supplies For Sale:

Astron VS-35 M Power Supply:

Astron power supplies feature solid-state electronic regulation, EMI filter, fold back current limiting for protection from excessive current and shorted output. Crowbar over-voltage protection is also provided.

This supply is rated for provide 35 amps ICAS, or 25 amps continuous at 13.8 V DC, so it is more than enough for all of the 100 watt rigs. This model has the voltage adjustable from the front panel from about 5 volts to 15 volts. Current limiting is also adjustable from the front panel, permitting one to set it to protect your solid state rig. Voltmeter and ammeter are included.

This particular unit works 100%, and looks really great. I can not find any scratches on it, although there is one very small defect on the top that one can see if the light is just right.

These sell for about $250 new. Buy this one, with the paper work, for $145.

TenTec 25 amp switching power supply:

"Switcher / 25" 25 amp switching power supply

This is a 25 amp switching power supply in a case that matches the early Omni series case, with the metal bezel around it. It is in a case that is the same size as a 243 remote VFO. It has an ammeter on the front, along with Switch, TenTec logo, and output bulb. The front panel basically looks like a 280 power supply with a metal bezel, but says "Switcher/25" on it. It is electrically very quiet, and well shielded. It does not produce any electrical noise that I could find.

Of course it works fine, and looks fine also. $175

Pyramid PS-25 Power Supply (25 amps at 13 V DC):

The Pyramid PS-25 is a 13 Volt DC power supply with both a voltmeter and an ammeter built in. The output voltage is adjustable over a range from about 11.5 to 15.5 volts DC. There is also an adjustment to set the current limiting, up to 25 amps. This means it can be set so that it will

protect the finals of a solid state rig. In addition, a
buzzer is activated if it goes into over current limiting.
This power supply has the features you want!

This particular unit works fine, and looks extremely nice.

With paper work for $80.

Kepco Variable Bench Power Supply:

This variable power supply is a Kepco Model CK 18-3, which
means that it will produce up to 18 V DC at up to 3 amps.
This is an ideal bench power supply!

The voltage is adjustable with a 10 turn pot from close to zero,
up to almost 20 volts. There is a fairly large analog meter that
reads the voltage. Built in current limiting is adjustable with
a 10 turn pot from a few ma to up to about 3 amps. A separate
meter reads the current, so both voltage and current can be read
at the same time. Also, there are connections on the back to
allow remote sensing and remote programming. This is a quality
regulated power supply!

This particular unit works 100%, and looks extremely nice. $160

Kepco Variable Bench Power Supply:

This is an ideal bench power supply! It is a Kepco Model ABC
40-0.5, which means that it will produce from zero up to 40 V
DC at up to 1/2 amp. Great for the bench.

The voltage is adjustable with a 10 turn pot from close to zero,
up to about 40 volts. There is a fairly large analog meter that
reads the voltage. There is also current limiting built in that
is adjustable from about 100 ma to up to about 700 ma. The same
meter that reads voltage can be switched to read current, or
short circuit current (the point that the current limit is set).
In addition, there are connections on the back to allow remote
sensing and remote programming. This is a quality regulated
power supply!

This particular unit works 100%, and looks extremely nice.

These normally sell for $125 to $150 (plus shipping).
Buy this one for $90.

Radio Shack 22-124 Regulated Power Supply
This supply is regulated and will furnish 13 V DC at up
to 2.5 amps. It works fine and looks extremely nice.
I do not find a scratch on it. $20

Olson RA-472 Bench Type Power Supply
This power supply is suitable for low current bench use.

It provides a variable voltage source from about 5 V DC
up to about 15 V DC. It has one knob for course voltage
that is labeled 6 V, 9 V and 12 V. An additional knob
will fine tune the voltage. I do not have specs on this
supply, but I would guess that it is good for maybe 1/3
to 1/2 amp current. It has an analog meter that seems
to be fairly accurate; at least it compares favorably
to my lab type DMM.
This unit is is a utility type power supply. $15

AEA AC-1 "Wall Wart" Power Supply

This "Wall wart" power supply will supply 12 V DC at
up to 1 amp.
It can be used with the AEA PK-232, PK-88 or others.

This unit has a 2.1 mm coaxial power plug, with the
center positive, so it can be used on many different
things that require about 12 V DC at up to an amp,
such as keyers, antenna tuners, etc.

This is a "regular" wall wart -- not the new switching
type that creates all sort of noise in your receiver.
Get this one, and leave the noise behind. $14

Yaesu NC-18 B Charger
Provides 14.5 V DC at 50 ma to charge many different HTs,
including the Yaesu FT-411, FT-811, FT-911, FT-23, FT-209,
FT-415, FT-410, FT-470, FT-727, FT-530, FT-703, and more.
Small 2.5 mm male plug. $10

Kenwood W09-0315 charger
This charger is used to charge the larger PB-21 H batteries
for the TH-21 series, and also on other Kenwood radios.
It has a standard 2.1 mm coaxial connector. $12

Icom DC-25 DC adapter :
This is a pack that is used on the Icom µ2AT, Icom µ4AT, and
on other HTs that use the BP-20, BP-21, BP-22, BP-23 and
BP-24 battery packs. It takes 13 V DC (such as from a
cigarette lighter), and converts it to the 9.4 V DC voltage
needed for the HT. It is used in place of a battery.
This one works fine and looks fine. $18

Icom BC-127 A, Battery Charger for Icom IC-Q7A
Dual Band HT:
This charger charges two AA NiCads (or NiMH) for the
IC-Q7 A Dual band HT, and Icom R-2 receiver, and probably
others.
This one appears to be new, unused, still in its bag.
Icom lists them at $21.
Buy this one for $12.

I also have many other accessories available such as many different types of microphones, HTs, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

2489. MFJ Items FS

Yahoo group: amatuerradioswapfest
Date: 2012-03-11 18:19:29 UTC
From: Ken Simpson, W8EK
Topic: 2489 Message: 2489

MFJ Items For Sale:

MFJ 989, 3000 Watt rated, HF Antenna Tuner:

The 3 KW MFJ-989 features two massive transmitting capacitors and a roller inductor with a three digit counter. You won't have arcing problems with this roller inductor, because firm springs put considerable pressure on a plated contact wheel.

You can tune your SWR down to the absolute minimum from 1.8 to 30 MHz, including MARS and the WARC bands. It has a super heavy duty balun for balanced lines.

You can select two coax antennas direct or through the tuner, balanced line or random wire, plus a built-in 50 ohm 300 watt dummy load. A wattmeter is also included.

This one works fine, and looks good, although there is some slight wear. The meter light has burned out. Paper work included for $175.

MFJ 207 HF Antenna Analyzer:

The MFJ-207 10-160 Meter Antenna SWR Analyzer gives you a direct readout of your antennas SWR without the need for formulas or indirect readings. The MFJ-207 can also be used to adjust a tuner to match your antenna without the need for transmitting. Its frequency coverage is approximately from 1.75 MHz to 30 MHz in five bands.
The bands and coverage are approximately:
BAND A: 1.75 - 3.00 MHz
BAND B: 3.00 - 5.00 MHz
BAND C: 6.50 - 11.70 MHz
BAND D: 11.65 - 20.00 MHz
BAND E: 18.00 - 30.00 MHz

The MFJ-207 uses a 9V battery or 110VAC from a wall wart power supply.

This one works fine, and looks fine. It is in its original box, with paper work for $60.

Wall Wart power supply for use with the MFJ 207. $12

Buy both of the above for $70.

MFJ-284 Speaker Microphone
Fits most Icom, Yaesu, Alinco 560, Santec ST-20, and others.

It works great, and looks like new. $15

MFJ-287 Speaker Microphone
This fits the TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug.It works fine, and looks close to new. $15

CW Key and cables:

Generic brass colored, oval base key
This is similar to a J-38 (without the bakelite base), but is a Japanese copy. It is brass colored, but is not real brass. Includes shorting switch.
It works fine and looks fine. $18

Cable for straight key
About 3 feet long, with a mono 1/8 inch (3.5 mm) phone plug on it, as used with a straight key. $5
As above, but 1/4 inch plug. $5

Cable for paddles
About 3 feet long, and with a 1/8 inch (3.5 mm) stereo connector on the end, like used by most rigs. $8
As above, but 1/4 inch plug. $8
As above, with 1/4 inch GOLD plated plug. $15

AEA AC-1 "Wall Wart" Power Supply

This "Wall wart" power supply will supply 12 V DC at up to 1 amp.
It can be used with the AEA PK-232, PK-88 or others.

This unit has a 2.1 mm coaxial power plug, with the center positive, so it can be used on many different things that require about 12 V DC at up to an amp, such as keyers, antenna tuners, etc.

This is a "regular" wall wart -- not the new switching type that creates all sort of noise in your receiver. Get this one, and leave the noise behind. $14

Coax connectors and adapters

Prices are per connector. Several of each are available. It looks like these have not been used.

"N" Connector - Double Male $8

BNC male for coax cables
Standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3

screw in type $3

BNC "T" - two female and one male $3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "Bulkhead Connector" - Double female, as above, but for
mounting thru a window, siding, etc. about 3 inches long $6

UHF double male connector (two PL-259's together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

I also have many other accessories available such as many
different types of microphones, HTs, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

2490. Antennas and related items FS

Yahoo group: amatuerradioswapfest
Date: 2012-03-12 01:20:45 UTC
From: Ken Simpson, W8EK
Topic: 2122 Message: 2490

Antennas and related items For Sale:

Doublet Antenna:

Doublet antenna consisting of about 110 feet of wire, with center insulator, 2 end insulators, and 2 center supporting insulators. This antenna is made to be fed with "open wire" 450 ohm transmission line, and used with an antenna tuner. It should be able to tune from 80 thru 10 meters, with the proper tuner. $20

Hustler 4BTV HF Vertical Antenna:

The 4BTV is a vertical antenna that covers 10, 15, 20, and 40 meters. It can also cover 75/80 meters by using an RM-75 resonator.

This one is in extremely good shape. It actually still shines! No corrosion evident. The actual base shows very minor signs of being out in the weather, but the silent key who used it was in a restricted community, and took the top part out of the garage only when he wanted to get on the air.

Paper work is included for $120.

Hustler RM-75 resonator - standard version
(can be used to add 75 meters to 4BTV above) $19

I would prefer pickup near Ocala, Florida, just off of I-75. It will easily fit inside a car. It is possible to ship it, but the cost is high due to it being oversize. Obviously, shipping is not included in the price.

MFJ 989, 3000 Watt rated, HF Antenna Tuner:

The 3 KW MFJ-989 features two massive transmitting capacitors and a roller inductor with a three digit counter. You won't have arcing problems with this roller inductor, because firm springs put considerable pressure on a plated contact wheel.

You can tune your SWR down to the absolute minimum from 1.8 to 30 MHz, including MARS and the WARC bands. It has a super heavy duty balun for balanced lines.

You can select two coax antennas direct or through the tuner, balanced line or random wire, plus a built-in 50 ohm 300 watt dummy load. A wattmeter is also included.

This one works fine, and looks good, although there is
some slight wear. The meter light has burned out. Paper
work included for $175.

TenTec 229 HF antenna tuner:

This roller inductor tuner will handle full legal power.
It uses an "L" match instead of a "T" match, which means
there is only one spot that will give the correct match.
The "L" match is also more efficient. Electrically, it is
the same as the 238 series, 229 A, 229 B, and 4229.

There is also a built in wattmeter with full scale reading
of 200 and 2000 watts. It also has an SWR bridge with
lighted meter, plus a 4 position antenna switch.

It can be used on any HF frequency, including the WARC
bands, as it is continuously adjustable. It has a built
in internal balun, so open wire can be used.

Cosmetically, this unit is the color of the earlier Omni
series (Omni 546, series A, B, and C) with the black vinyl
covering, and nice aluminum trim around the front.

This particular unit functions 100%, and looks perfect.
I can not find a scratch on it. Paper work is included
for $325.

MFJ 207 HF Antenna Analyzer:

The MFJ-207 10-160 Meter Antenna SWR Analyzer gives you a
direct readout of your antennas SWR without the need for
formulas or indirect readings. The MFJ-207 can also be used
to adjust a tuner to match your antenna without the need
for transmitting. Its frequency coverage is approximately
from 1.75 MHz to 30 MHz in five bands.
The bands and coverage are approximately:
BAND A: 1.75 - 3.00 MHz
BAND B: 3.00 - 5.00 MHz
BAND C: 6.50 - 11.70 MHz
BAND D: 11.65 - 20.00 MHz
BAND E: 18.00 - 30.00 MHz

The MFJ-207 uses a 9V battery or 110VAC from a wall wart
power supply.

This one works fine, and looks fine. It is in its original box,
with paper work for $60.

Wall Wart power supply for use with the MFJ 207. $12

Buy both of the above for $70.

HF and VHF SWR Bridges:

All of these cover from 3 to 150 MHz, covering HF,
6 meters,and 2 meters. SO-239 connectors.

Quement SWB-2
This unit features two separate meters --
one for reading forward power and another for reading SWR.
This permits one to easily monitor both the power going
out, and the SWR on the antenna at the same time. It works
fine and looks great. With paper work for $37.

Carter Craft 90-300
Single Meter SWR Bridge / Field Strength Meter
This one works fine. I am 99% certain it has not been used,
except for my testing it. In its original box with original
instructions and little field strength antenna. $30

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see
any scratches on it, but it does have a previous owners name
on it. In its original box with original instructions. $28

Heath HM-2102 VHF Wattmeter:

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.
Similar to the HM-102, but for VHF frequencies, with
250 and 25 watt scales. It can also be used to check SWR,
and has a remote sensor that can either be left inside
the meter, or separated from the actual meter by about
3 feet. SO-239 connectors in and out.

This particular meter works great, looks really great,
and includes paper work for $50.

Mobile Antenna Mounts:

Large, heavy duty magnetic mount
This large mag mount will take any antenna with a standard
3/8 inch 24 thread connector. It is very heavy duty, about
5 inches in diameter, with a long coax for $25.

Larsen NMO "Button" Mount
This mount fits into a 3/4 inch hole, and will then take any
of the many NMO types of antennas. Coax included.
It is in close to new condition. $15

Larsen NLA Type VHF Mobile Antenna for 2 meters:

This antenna fits the Larsen NLA mobile mount, which is
a special mount made by Larsen.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 meters.

This one works fine and looks fine also.

Coil only, without whip (whip is hard to ship). $10
With four foot whip. $19

Avanti "On Glass" mobile antenna for 440 MHz:

This antenna was made by Avanti to mount on a windshield, or other glass. It does not require a ground plane, as it is a 1/2 wave antenna, rated to have 3 db gain. It is ideal for places where a ground plane is not available, such as a boat or motor home, in addition to cars. A special tuning box is included to match to your particular situation.

This one is still in its original tube, unopened. $33

Rubber Duck antennas for your HT:

All are for 2 meters, are in good condition, and are $10 each, unless stated otherwise.

BNC - Original from Kenwood TH-215, about 5 inches long

BNC - Stubby about 4.5 inches long

5/16 inch threaded, as used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Stubby, about 4.5 inches long - $20

BNC Stubby for 440 MHz, 3 inches long

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter to reduce harmonic interference. All have SO-239 connectors, are 50 ohm filters, and include paper work.

Bencher YA-1, high power, low pass TVI filter
If you need a more heavy duty filter for the output of your amplifier, this one is ideal. It will take full legal power plus, and has at least 80 db signal attenuation at TV channel 2.This one works great, and looks close to new. Bencher currently sells these for about $90. Only $60.

Drake TV-1000-LP Low pass TVI filter
This is the filter that may also be used on the low end of six

meters, as well as HF. It is good for 1000 W "average" below
30MHz, and about 200 W up to 52 MHz. $30.

Drake TV-1000
LP Filter as above, which functions fine electrically, but
looks ugly. With paper work. $25

B & W FL-10/1500
This filter cuts off just above 10 meters, and handles 1500
Watts. It is the latest model B&W filter.In very nice condition,
it looks close to new. $40

Para Dynamics PDC 1089
This filter is rated at a full Kilowatt, up to 30 MHz.
5 x 6 x 2 inch black box, instead of the more familiar long
enclosure. It looks like new. $25

1970 ARRL Antenna Book
This is the 12th edition of this classic ARRL publication.
This one is in the older, smaller size, and is in very
nice condition. $12

ARRL Radio Amateur's VHF Manual
1966, 11th edition, $12

Coax connectors and adapters:

Prices are per connector. Several of each are available.
It looks like these have not been used.

"N" Connector - Double Male $8

BNC male for coax cables
tandard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T" - two female and one male $3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "Bulkhead Connector" - Double female, as above, but for
mounting thru a window, siding, etc. about 3 inches long $6

UHF double male connector (two PL-259's together) $3

UHF "T" connector with two female (SO-239) and one male (PL-259) connection $5

I also have many other accessories available such as many different types of microphones, HTs, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

FOR SALE:

Heathkit SB200 Linear Amplifier
Looks great. 600 watts RF output with 100 watts of drive. Covers 80 through 10m amateur bands. SO-239 RF Output suitable for 50 - 75 ohm antennas.

Power requirements: 120 / 240V AC. This one is wired for 240V, and is in very good working condition.

Dimensions: 378 × 168 × 340 mm (15" X 6.5" X 13.5 inches)
Weight approximately 36 pounds plus crating.
This one is in excellent condition. PTT line is not tripping but all other functions are good and
it works.

FOR SALE: Henry Radio TEMPO ONE HF TRANSCEIVER

80m through 10m bands (No WARC) - Covers the 80m, 40m, 20m, 15m and 10m amateur bands on SSB and CW.
240 Watts Input power.
Carrier suppresion -40 dB.
A.F. Bandwidth 300-2700 Hz
Power Supply - 120V AC or 12 V DC using external power supplies (See below)
16 Tubes, 15 diodes and 7 transistors.
Dimensions: 13.25" wide X 5.5" high x 11" deep
Approx. weight: 18 pounds.
Cables will be included with the power supply below.
Comes with a copy of the operators manual.

Henry Radio AC/One Power Supply extra nice condition.
With built-in 3" X 5" speaker for audio out from the Tempo One Transceiver.
Any of the following AC Voltages may be used: 110 - 120V AC or 200 - 240V AC
Dimensions: 8" wide X 5.5" tall X 11" deep / 22 pounds.
Cables are included.

2497. Low Pass TVI Filters and Dummy Load FS

Yahoo group: amatuerradioswapfest
Date: 2012-03-28 22:47:45 UTC
From: Ken Simpson, W8EK
Topic: 2497 Message: 2497

Low Pass TVI Filters and Dummy Load For Sale:

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter to reduce harmonic interference. All have SO-239 connectors, are 50 ohm filters, and are rated to take full legal power.

The Bud LF-601 and the Drake TV-1000 work fine on six meters.

Bud LF-601 low pass filter
This filter is adjustable for best attenuation in your particular situation, and also to more closely match your specific impedance. It cuts off at about 52 MHz (if adjusted as such) so it can be used on 6 meters, and will handle 1500 watts. $35

Drake TV-1000-LP Low pass TVI filter
This is the filter that may also be used on the low end of six meters, as well as HF. It is good for 1000 W "average" below 30MHz, and about 200 W up to 52 MHz. With paper work for $30.

Drake TV-1000
LP Filter as above, which functions fine electrically, but looks ugly. With paper work. $25

Drake TV-3300-LP Low Pass Filter
This modern low pass filter has been optimized to have more attenuation in the 40 MHz region, where many TVs have their IF. It is good for 1000 Watts "average" according to the manual, and has over 80 db attenuation at 41 MHz. This one looks great, and includes the paper work. $30

Bencher YA-1, high power, low pass TVI filter
If you need a heavy duty filter for the output of your amplifier, this one is ideal. It will take full legal power plus, and has at least 80 db signal attenuation at TV channel 2. This one works great, and is in its original box.
Bencher currently sells these for about $90. Only $60.

Bencher YA-1
As above, but not in original box. $45

B & W FL-10/1500
This filter cuts off just above 10 meters, and handles 1500 Watts. It is the latest model B&W filter.In very nice condition, it looks close to new. $40.

Johnson 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut off frequency of 45 MHz and 75 db of attenuation.
It is rated to take 1000 Watts of AM, or 5000 Watts PEP SSB. With mounting bracket. $30

Para Dynamics PDC 1089
This filter is rated at a full Kilowatt, up to 30 MHz.
5 x 6 x 2 inch black box, instead of the more familiar long enclosure. It looks like new. $25

Homebrew "Cantenna" Dummy Load:

This dummy load is similar to the Heath HN-31 "Cantenna", but it is homebrew. It has an SO-239 connector on the top of a black, one gallon paint can. The paint can completely shields the dummy load. Inside, it basically has 33, 2 watt, 1800 ohm resistors in parallel, to create the load. These resistors will not handle 1000 watts like the Heath "Cantennas", but should handle 100 watts as long as you are not too heavy on the key. These resistors are presently air cooled. Adding oil would certainly increase the power dissipation.

This unit works fine, and looks very, very nice. No paper work on this one, but what do you need to show resistors in parallel? $25

ARRL Handbooks For Sale:

1973 - 50th edition -
This one is in the smaller format, which means it has tube charts and vintage ads.
It is in very nice condition, although the pages have yellowed slightly. $14

1985 - 62nd edition
This one is in the larger format. It has been "well used" and has some loose pages, but I think they are all there.
The binding has duct tape on it, but the important info is still there. $7

1988 - 65th edition - Hard bound
This one is a couple inches thick.
Very close to new condition. $22

1992 - 69th edition - Hard Bound
Several inches thick with a lot of information.
This one looks like new, except for a previous owner's call sign on the inside cover. $22

I also have many other accessories available such as many different types of microphones, HTs, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

2498. FS: Sweep Tubes etc.

Yahoo group: amatuerradioswapfest
Date: 2012-03-31 14:00:16 UTC
From: Bry Carling
Topic: 2498 Message: 2498

For Sale: Sweep Tubes - some New No Box, New In Box... some Used Tested or Used Tested w/Box.
(NNB, NIB / UT / UTB) - Quantity 1 unless stated otherwise.

Ameritron AL-84 used four 6JM6 tubes in it. Sweep tubes were used one Yaesu linear amp. Many amplifiers and radios use 6KD6es and the Yaseu FL-1000 used 6JS6A's. Yaesu used sweep tubes in the finals of the FT-101 series, 6JS6C. Swan used sweep tubes. The Siltronix 1011c and many other CB amplifiers use sweep tubes of various voltages. They say that Galaxy WRL made a 10 sweep tube legal limit amplifier. I never saw one.

6CD6GA - RCA - UT - $1.50

6DQ5 - Westinghouse - NIB - $5.00
6DQ5 - Westinghouse - New, NB - $5.00

6GV5 - Zenith USA - UT - $1.00

6JB5 / 6HE5 - General Electric - NIB - $2.50

6JB6 - RCA - USA - UTIB - $5.00
6JB6 - Sylvania USA - UTIB - $5.00

6JE6B - General Electric USA - UT - $8.00
6JE6 - USA - UT - $6.00
6JE6 - RCA, USA - UIB - $8.00
6JE6C / 6LQ6C - Magnavox USA - UT - $8.00
6JE6C - Westinghouse USA - UT - $8.00

6JM6A - RCA, USA - NIB - $3.00

6JS6C SYLVANIA USA - UT - $15.00
6JS6C USA - UT - QTY 3 - $15.00 each
6JS6C NEC JAPAN - UT - $15.00

6JZ6 - USA - UT - $1.50

6KD6 ITT, Japan - UTB - $10.00
6KD6 Raytheon, Japan Green Stripe - UTB - $10.00

6KM6 - RCA USA - NIB - $5.00

6LB6 - General Electric USA - NIB - $15.00
6LB6 - USA - UT - $7.00

6LF6/6MH6 - International Servicemaster USA - UT - $15.00

6LQ6 - Sylvania USA - UT - $12.00
6LQ6 - RCA - USA - UT - $12.00

6MJ6 - USA - UT - QTY 3 for $18.00 each

12JB6A - RCA USA - NIB - QTY 2 - $8.00 each
17DQ6B / 17GW6 - ITT Japan - NIB - QTY 2 available for $3.00 each

21JS6A - Realistic Japan - NIB - $8.00
25CD6GB - General Electric USA - NIB - $3.00

31JS6C - Sylvania - USA - NIB - $8.00
40KD6 Raytheon, Japan Green Stripe - NIB - $11.00

3DS3 - oddball General Electric, USA - "55% LEAD OXIDE" - New - $2.00
837 - RCA, USA - UT - $10.00
5894 AMPEREX - UTB - $10.00

Shipping will be additional. Please e-mail me off the list:

2499. FS: Greenlee Punch

Yahoo group: amatuerradioswapfest
Date: 2012-04-06 14:56:35 UTC
From: Bry Carling
Topic: 2499 Message: 2499

FOR SALE:

Greenlee Punch - 5/8 inch diameter punch for round holes.
Perfect for installing most 7-pin miniature tube sockets or other similar sized items into an aluminum chassis, front panel etc.

New price for these seems to be around $45.00 to $46.00.

One available for $25.00 plus shipping

2500. FS: Groups of PL259 - SO239 Connectors

Yahoo group: amatuerradioswapfest
Date: 2012-04-06 15:09:04 UTC
From: Bry Carling
Topic: 2500 Message: 2500

FOR SALE:

Over PL259 / SO239 plugs, sockets, adapters etc. for RF coaxial connections.

Each group has about 15 - 20 pieces of mostly new / new old stock PL259 and SO 239 connectors and adapters of all kinds. These normally sell for several
dollars a piece. Some of these include a few odd 'N' connector or adapter etc. I have added a couple of other pieces
to these kits to sweeten the deal.

The remaining groups are each available for $12.00 per group plus shipping.

Pictures and details with ordering buttons are available here:

Do you have a Motorola repeater that is in operating condition? My ARES group is trying to find a way to get a repeater up at lowest cost. If you do, I will be in Littleton, CO around the first two weeks in May, and can get to your QTH to pick it up. Thank you.

2504. FS: Carbon Comp Resistors etc.

Yahoo group: amatuerradioswapfest
Date: 2012-04-09 16:20:23 UTC
From: Bry Carling
Topic: 2504 Message: 2504

FOR SALE: CARBON COMPOSITION RESISTORS

Here are some grab bag assortments of ALL NEW 2 WATT, 1 WATT and 1/2 WATT resistors, with a good mix of values from 1 ohm to 15 Megohms. Authentic parts made by Ohmite, IRC etc. Ideal for homebrewing and repairs tube radio transmtters and receivers etc.
1 Watt and 2 Watt resistors usually cost around $1.50 to $3.00 each when you can find them... Half watt resistors are $2.00 each at Radio Shack. A Surplus Place in Nebraska sells
them for $10 to $15.00 for a 50 pack.

SPECIAL: The first 5 orders will get a free bag of 100 new resistors.

2 WATT Resistors Packs - Quantity 50 - $10.00 each
1 WATT Resistor Packs - Quantity 100 - $10.00 each
1/2 WATT Resistors Packs - Quantity 100 - $8.00 each
LARGE MIXED BAG of 500 - 2 Watt, 1 Watt and 1/2 WATT mix of mostly New and Good Used Resistors - Quantity over 500. All for $12.00

Also: LARGE BLEEDER RESISTORS FOR LARGE TRANSMITTER PROJECTS:
Examples:
12Kohms at 40 Watts $9.00
50,000 ohms at 100 watts $18.00
25,000 ohms at 100 watts $19.00
15,000 ohms at 120 watts $16.00
16,000 ohms at 50 watts $13.00

ALSO - most "Common Values" of the 2 Watt and 1 Watt resistors are available. From 1 ohms to 22 Megohms.
A few exceptions are unavailable such as 100 K, but I do have some 110 K which will work fine in most applications.
These are brand new resistors with full lead length and are excellent 5% and 1% components.
Available for the following prices:
2 Watt = $2.00 each / ten or more of same value for $1.75 each
1 Watt = $1.00 each / ten or more of same value for $0.80 each
1/2 Watt = $0.70 each / ten or more of same value for $0.60 each
Shipping additional.

Pictures and details:

2506. FS: Crystal Converters

Yahoo group: amatuerradioswapfest
Date: 2012-04-14 22:20:28 UTC
From: Bry Carling
Topic: 2506 Message: 2506

FOR SALE: Brand new Peterson Radio Co. Crystal Converters.

Several of these for sale, and they are brand new. All are made for 455 kHz i.f. output, and
offer fixed local oscillator and rf amp-mixer stage for conversion to popular i.f of 455 kHz.
See pictures at web site below. I do not have a diagram, but perhaps it is stll available from
Peterson. In any event, it is going to be easy to figureout, since these two transistor converters have input, output and power connections on the PC boards, that should be fairly obvious. Fun project - these could easily be adapted to 6m, 10m and 30m operation - or use as an oscillator or other project.

Input receive frequency is shown. Crystal frequency will be 455 kHz away. You will find ordering the ordering buttons at link below.

One each: 10.000 MHz, 39.050 MHz, 45.060 MHz and 48.150 MHz, ALSO: for 39.500 MHz -
I have an initial quantity of 3. All others are one each. Price is $3.00 each plus shipping, while
they last!

Pictures, details and ordering page here:

2508. FS: Western Electric Tubes

Yahoo group: amatuerradioswapfest
Date: 2012-04-17 23:19:47 UTC
From: Bry Carling
Topic: 2508 Message: 2508

FOR SALE:

Western Electric 717A tubes - These are great little Miniature Octal base tubes often used to soup up front end RF stage on the Hammarlund HQ129 series receivers or the 2-40D for higher gain in the HF bands.

These typically go for about $17.00 each. For example:
Item# 110845315197 at that place.

Good used, tested condition, like the others... only far less. I will sell the pair for $10.00 plus shipping.

2510. HF Antennas and related items FS

Yahoo group: amatuerradioswapfest
Date: 2012-04-19 12:55:50 UTC
From: Ken Simpson, W8EK
Topic: 2510 Message: 2510

It is "Antenna Season."

HF Antennas and related items For Sale -- Dipoles, Verticals, Dummy Load, SWR Bridges, Antenna Tuner, Low Pass TVI Filters, and Connectors

B & W Broadband HF Dipole Antenna:

B & W states that this broadband dipole will tune from 3.5 thru 30 MHz. From their web site: "Our field proven broadband HF antennas operate all frequencies continuously from 1.8 to 30 Mhz without an antenna tuner, plus 6 meters. If you are participating in various programs such as MARS, ARES, RACES or CAP these antennas will work all of your frequencies all the time. If your frequencies get reassigned, it does not matter."

This particular antenna is the AC 3.5-30, which is also called the BWD-65. It does not cover 160 meters. It is about 65 feet long, and has a special balun and loading coil, plus the wire and spreaders.

This particular antenna works fine, and looks very close to new. It was installed inside an attic, so has not been exposed to the weather.

These sell for over $300 new. Buy this one that is close to new, with paper work, for only $175.

B & W AC 1.8-30 (AC-110) Broadband antenna For Sale:

The Barker & Williamson AC-1.8-30 [AC110] End-Fed V is another unique antenna from B & W utilizing the same technology as their folded dipoles. It offers operation over the entire HF bands without need for an antenna tuner. Work any frequency you want without going through a lot of knob twirling and measurements. Hop frequencies at any speed as long as you want, as there are no mechanical parts or active components to wear out. It is not limited to conventional ham bands. Capture weak signals in receive mode. Much better performance than any vertical.

This unique design covers a frequency range of 1.8 to 30 MHz, with a SWR of less than 2:1 across the entire range.

More information is at
http://www.bwantennas.com/ama/veeant.ama.htm

This one works fine and looks great.

B & W sells these for $375. Buy this one, with paper work, for $200.

Broadband Dipole Antennas:

These antennas are sometimes call "Bazooka" dipoles, but also go by other names. They are made from RG-8 coax instead of just wire. They are fed differently, with both halves of the coax used. The result is an antenna that is more broad banded than a regular wire dipole, permitting one to cover all, or most, of a ham band with a reasonable SWR. Of course these can be put into an inverted V configuration as well. They have been described in the ARRL Handbook and ARRL antenna book at various times.

I have antennas for two different bands:

40 meter antenna as described above (approx 66 feet long) with about 25 feet of RG-8 coax feedline attached, terminated in a PL-259 connector. $50

MFJ 1796 Halfwave Vertical Antenna:

The MFJ 1796 covers the 40, 20, 15, 10, 6, and 2 meter bands, with no radials needed.

It is only 12 feet high and can be mounted anywhere -- ground level to tower top -- apartments, small lots, trailers. Perfect for vacations, field day, DXpedition, camping.

Efficient end-loading, with no lossy traps
Full size halfwave on 2 & 6 Meters
High power air-wound balun eliminates feedline radiation
Adjusting 1 band has minimum effect on others
Automatic band switching
Low radiation angle for great DX
Omnidirectional
Handles 1500 watts PEP
Low SWR
Stainless steel hardware

This antenna was used in a restricted community, and only put outside when being used, so it is in terrific shape. Paper work included.

These sell for over $300 new. Buy this one for only $175. Pick up near Ocala FL, just off of I-75.

Doublet Antenna:

Doublet antenna consisting of about 110 feet of wire, with center insulator, 2 end insulators, and 2 center supporting

insulators. This antenna is made to be fed with "open wire"
450 ohm transmission line, and used with an antenna tuner.
It should be able to tune from 80 thru 10 meters, with the
proper tuner. $20

Hustler 4BTV HF Vertical Antenna:

The 4BTV is a vertical antenna that covers 10, 15, 20, and 40
meters. It can also cover 75/80 meters by using an RM-75
resonator.

This one is in extremely good shape. It actually still shines!
No corrosion evident. The actual base shows very minor signs
of being out in the weather, but the silent key who used it
was in a restricted community, and took the top part out of
the garage only when he wanted to get on the air.

Paper work is included for $120.

Hustler RM-75 resonator - standard version
(can be used to add 75 meters to 4BTV above) $19

I would prefer pickup near Ocala, Florida, just off of I-75.
It will easily fit inside a car. It is possible to ship it,
but the cost is high due to it being oversize. Obviously,
shipping is not included in the price.

Hustler Resonators for Hustler Mobile HF Antenna Systems:

"Standard" Hustler resonators (400 Watt):
75 meter resonator RM-75 $19
40 meter resonator RM-40
This resonator has tape on the bottom. I assume the
tape was used to tell the silent key which frequency
the RM-40 was tuned to, being he had two of them. $15

Dentron "Big Dummy" RF Dummy Load:

This is Dentron's equivalent to the the traditional Heath
"Cantenna" dummy load that will handle a kilowatt. It has
a derating curve with it.

It is in good shape both electrically and cosmetically.
It has no rust, dents nor dings.

I measured the resistor and it is 53 ohms, so obviously it
is in good shape. I have never seen any others this close
to 52 ohms!

I can ship it either with or without oil. The cost to
purchase is the same, but of course the shipping will be
higher with the oil.

With derating curve paper work for $45.

Heath HM-15 SWR Bridge:

This is an HF SWR Bridge, with SO-239 connectors on
the back. The front has the meter on the left, and two
knobs to the right. It is the same size as the HD-15
phone patch.

This one works fine and is in nice cosmetic shape.
I can not find a scratch on it.

Paper work included for $20.

HF and VHF SWR Bridges:

All of these cover from 3 to 150 MHz, covering HF,
6 meters,and 2 meters. SO-239 connectors.

Quement SWB-2
This unit features two separate meters --
one for reading forward power and another for reading SWR.
This permits one to easily monitor both the power going
out, and the SWR on the antenna at the same time. It works
fine and looks great. With paper work for $37.

Carter Craft 90-300
Single Meter SWR Bridge / Field Strength Meter
This one works fine. I am 99% certain it has not been used,
except for my testing it. In its original box with original
instructions and little field strength antenna. $30

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see
any scratches on it, but it does have a previous owners name
on it. In its original box with original instructions. $28

TenTec 229 HF antenna tuner:

This roller inductor tuner will handle full legal power.
It uses an "L" match instead of a "T" match, which means
there is only one spot that will give the correct match.
The "L" match is also more efficient. Electrically, it is
the same as the 238 series, 229 A, 229 B, and 4229.

There is also a built in wattmeter with full scale reading
of 200 and 2000 watts. It also has an SWR bridge with
lighted meter, plus a 4 position antenna switch.
-
It can be used on any HF frequency, including the WARC
bands, as it is continuously adjustable. It has a built
in internal balun, so open wire can be used.

Cosmetically, this unit is the color of the earlier Omni
series (Omni 546, series A, B, and C) with the black vinyl
covering, and nice aluminum trim around the front.

This particular unit functions 100%, and looks perfect.
I can not find a scratch on it.

Paper work is included for $325.

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter to reduce harmonic interference. All have SO-239 connectors, are 50 ohm filters, and include paper work.

Bencher YA-1, high power, low pass TVI filter
If you need a more heavy duty filter for the output of your amplifier, this one is ideal. It will take full legal power plus, and has at least 80 db signal attenuation at TV channel 2.This one works great, and looks close to new. Bencher currently sells these for about $90. Only $60.

Bud LF-601 low pass filter
This filter is adjustable for best attenuation in your particular situation, and also to more closely match your specific impedance. It cuts off at about 52 MHz (if adjusted as such) so it can be used on 6 meters, and will handle 1500 watts. $35

Drake TV-1000-LP Low pass TVI filter
This is the filter that may also be used on the low end of six meters, as well as HF. It is good for 1000 W "average" below 30MHz, and about 200 W up to 52 MHz. With paper work for $30.

Drake TV-1000
LP Filter as above, which functions fine electrically, but looks ugly. With paper work. $25

Drake TV-3300-LP Low Pass Filter
This modern low pass filter has been optimized to have more attenuation in the 40 MHz region, where many TVs have their IF. It is good for 1000 Watts "average" according to the manual, and has over 80 db attenuation at 41 MHz. This one looks great, and includes the paper work. $30

B & W FL-10/1500
This filter cuts off just above 10 meters, and handles 1500 Watts. It is the latest model B&W filter.In very nice condition, it looks close to new. $40.

Johnson 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut off frequency of 45 MHz and 75 db of attenuation. It is rated to take 1000 Watts of AM, or 5000 Watts PEP SSB. With mounting bracket. $30

Para Dynamics PDC 1089
This filter is rated at a full Kilowatt, up to 30 MHz. 5 x 6 x 2 inch black box, instead of the more familiar long

enclosure. It looks like new. $25

Coax connectors and adapters:

Prices are per connector. Several of each are available.
It looks like these have not been used.

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "Bulkhead Connector" - Double female, as above, but for
mounting thru a window, siding, etc. about 3 inches long $6

UHF double male connector (two PL-259's together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

"N" Connector - Double Male $8

BNC male for coax cables
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T" - two female and one male $3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

I also have many other accessories available such as many
different types of microphones, HTs, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

Looking to trade my 7900 for an HF rig. The 7900 is new (have invoice with DEC 2011 date) and used once never mobile non-smoking enviroment.

2512. REDUCED: Ham Band hc6u Crystals

Yahoo group: amatuerradioswapfest
Date: 2012-04-22 13:27:59 UTC
From: Bry Carling
Topic: 2512 Message: 2512

REDUCED: Ham Band hc6u Crystals
(prices are for these groups only)

$2.50 crystals for 80m band:
Group of four nice, new 80m ham band hc6u crystals on 3742.0 kHz.
QUANTITY of 4 - 3742.0 kHz crystals - Type hc6u - Share some with a friend!
Will sell as groups of 4 for $10.00 plus shipping.

ALSO REDUCED Group of SIX ham band crystals under $5.00 each.
Group of six nice, new condition 80m and 40m ham band crystals, like new.
Not available individually at this price. SIX hc6u crystals on:
QTY 1 - 3742.0 kHz
QTY 1 - 3777.5 kHz
QTY 1 - 3778.7 kHz
QTY 1 - 3781.2 kHz
QTY 1 - 3787.5 kHz
QTY 1 - 7011.0 kHz
Note: this is only for this one group of crystals as listed.
Will sell this whole group of 6 for $29.00 plus shipping.

Pictures, details and Ordering Page here:

2513. REDUCED: Panel Meters - under $3.00

Yahoo group: amatuerradioswapfest
Date: 2012-04-22 14:28:33 UTC
From: Bry Carling
Topic: 2513 Message: 2513

REDUCED: Panel Meters

Here is a nice box of six panel meters in very good condition.

These are all the typical 3.25" diameter meters you see on older ham equipment, test equipment etc.

1) Weston model 476 with 0 - 120V AC with an additional scale for 60V AC

2) Weston model 301 with 0 - 140V DC with an additional scale for 7 V DC.

3) General Electric model ADK84 - cool 0 - 200 mA PA Plate with markings for CW, MCW, PA Grid and Battery.

4) General Electric with 0 - 50mA DC

5) Weston model 147866 with 0 - 5V AC

6) General Electric Time Meter - model 8KT8E3 / USN type 120V AC 60 Hz (small case chip)

I do not want to sell these individually. I will sell these as a group. The whole box for $16.00
plus $12.00 for USA shipping

From: Ken Simpson, W8EK
Topic: 2515 Message: 2515

Power Supplies and related items For Sale --
High Current Power Supplies, Bench Type Supplies,
lower current supplies, Wall Wart Supplies,
chargers, etc.:

Pyramid PS-25 Power Supply (25 amps at 13 V DC):

The Pyramid PS-25 is a 13 Volt DC power supply with both a
voltmeter and an ammeter built in. The output voltage is
adjustable over a range from about 11.5 to 15.5 volts DC.
There is also an adjustment to set the current limiting,
up to 25 amps. This means it can be set so that it will
protect the finals of a solid state rig. In addition, a
buzzer is activated if it goes into over current limiting.
This power supply has the features you want!

This particular unit works fine, and looks extremely nice.

With paper work for $80.

TenTec 25 amp switching power supply:

"Switcher / 25" 25 amp switching power supply

This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel
around it. It is in a case that is the same size as a 243
remote VFO. It has an ammeter on the front, along with
Switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,
but says "Switcher/25" on it. It is electrically very quiet,
and well shielded. It does not produce any electrical noise
that I could find.

Of course it works fine, and looks fine also. $175

Astron RS-20A Power Supply:

The RS-20A is a DC Power Supply producing 13.8 V DC (internally
adjustable from 11 to 15 V DC) at up to 16 amps continuous and
20 amps ICS. The RS-20 features crowbar over voltage protection
and fold-back current limiting to protect your equipment.

This particular supply works fine, and looks very close to new.
I do not find a scratch on it.

With paper work for $60.

Kepco Variable Bench Power Supply:

This is an ideal bench power supply! It is a Kepco Model ABC 40-0.5, which means that it will produce from zero up to 40 V DC at up to 1/2 amp. Great for the bench.

The voltage is adjustable with a 10 turn pot from close to zero, up to about 40 volts. There is a fairly large analog meter that reads the voltage. There is also current limiting built in that is adjustable from about 100 ma to up to about 700 ma. The same meter that reads voltage can be switched to read current, or short circuit current (the point that the current limit is set). In addition, there are connections on the back to allow remote sensing and remote programming. This is a quality regulated power supply!

This particular unit works 100%, and looks extremely nice.

These normally sell used for $125 to $150 (plus shipping). Buy this one for $88.

Kepco Variable Bench Power Supply:

This variable power supply is a Kepco Model CK 18-3, which means that it will produce up to 18 V DC at up to 3 amps. This is an ideal bench power supply!

The voltage is adjustable with a 10 turn pot from close to zero, up to almost 20 volts. There is a fairly large analog meter that reads the voltage. Built in current limiting is adjustable with a 10 turn pot from a few ma to up to about 3 amps. A separate meter reads the current, so both voltage and current can be read at the same time. Also, there are connections on the back to allow remote sensing and remote programming. This is a quality regulated power supply!

This particular unit works 100%, and looks extremely nice. $160

Micronta 22-120 A Regulated power supply

This supply is rated at 2.5 amps at 13 V DC. It is well regulated. It has a switch and LED power light on the front, with a circuit breaker and output terminals on the back. The case (left and right side and top) is basically all a heat sink, so it should cool the regulator well.

This one works fine and looks like new. No scratches. $30

Radio Shack 22-124 Regulated Power Supply

This supply is regulated and will furnish 13 V DC at up to 2.5 amps. It is ideal for the lower powered 2 meter rigs, or to get rid of that huge collection of wall warts.

This one works fine and looks extremely nice.
I do not find a scratch on it. $20

Olson RA-472 Bench Type Power Supply:

This power supply is suitable for low current bench use.
It provides a variable voltage source from about 5 V DC
up to about 15 V DC. It has one knob for course voltage
that is labeled 6 V, 9 V and 12 V. An additional knob
will fine tune the voltage.

I do not have specs on this supply, but I would guess
that it is good for maybe 1/3 to 1/2 amp current. It
has an analog meter that seems to be fairly accurate;
at least it compares favorably to my lab type DMM.

This unit is a great utility type power supply. $15

"Wall Wart" Power Supplies:

All of these are "regular" wall warts -- not the new
switching type that create all sort of noise in your
receiver. Get one of these, and leave the noise behind.

MFJ 1312 B
This unit provides 12 V DC at 300 ma. It has a 2.1 mm
coaxial plug with the center positive, and is often used
for keyers, lighting tuner lights, and other small misc
jobs where 12 V DC at low current is needed. $12

9 Volt DC at 500 ma
This one was used on a MFJ 422 keyer, but will also power
other items needing 9 V DC at low current. It has a
2.5 mm male plug on it. $12

AEA AC-1
This unit supply 12 V DC at up to 1 amp.
It can be used with the AEA PK-232, PK-88 or others.
It has a 2.1 mm coaxial power plug, with the center
positive, so it can be used on many different
things that require about 12 V DC at up to an amp,
such as keyers, antenna tuners, etc. $14

Kenwood MS-1 charger / DC power supply:

The MS-1 is designed to be used with the Kenwood TR-2500
and TR-2600 HTs. The HT slips into the unit, and will
charge the battery, or power the unit, or both. The HTs
use 9.6 volts DC to operate. This unit converts 13 V DC
down to the required 9.6 V DC. It also functions as a
holder for the HT in the car, and as a light to illuminate
the LCD display on the HT.

This one works fine, and looks OK.
With paper work for $20.

Kenwood BC-2 Charger for PB-2 batteries.
In Original box for $12.

Icom DC-25 DC adapter:

This is a pack that is used on the Icom µ2AT, Icom µ4AT, and on other HTs that use the BP-20, BP-21, BP-22, BP-23 and BP-24 battery packs. It takes 13 V DC (such as from a cigarette lighter), and converts it to the 9.4 V DC voltage needed for the HT. It is used in place of a battery.

This one works fine and looks fine. $18

Icom BC-127 A, Battery Charger for Icom IC-Q7A
Dual Band HT:

This charger charges two AA NiCads (or NiMH) for the IC-Q7 A Dual band HT, and Icom R-2 receiver, and probably others.

This one appears to be new, unused, still in its bag.
Icom lists them at $21. Buy this one for $12.

I also have many other accessories available such as many different types of microphones, HTs, HF, VHF and UHF rigs, HF and VHF/UHF antennas, and many miscellaneous accessories.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

2516. REDUCED: HENRY RADIO TEMPO ONE

Yahoo group: amatuerradioswapfest
Date: 2012-04-29 21:10:22 UTC
From: Bry Carling
Topic: 2516 Message: 2516

REDUCED: HENRY RADIO TEMPO ONE HF TRANSCEIVER

The Tempo One wasoriginally built by the Yaesu Musen company in Japan in the 1970s. Same as a Yaesu / Sommerkamp FT200. I couold piucture using this at a camp too - lots of fun for portable HF or as a home station. Henry Radio Tempo One HF transceiver in very good condition.

Input Power - 240 Watts
Covers the 80m, 40m, 20m, 15m and 10m amateur bands on SSB and CW.
Antenna 50-100 ohms.
Carrier suppresion -40 dB.
A.F. Bandwidth 300-2700 Hz
Receiver Sensitivity 0.5 uV
Image ratio -50dB.
Audio output 1 watt into 8 ohms.
Power Supply - 120V AC or 12 V DC using external power supplies (See below)
16 Tubes, 15 diodes and 7 transistors.
Dimensions: 13.25" wide X 5.5" high x 11" deep
Approx. weight: 18 pounds.
Cables are included with the power supply below.

Comes with a copy of the operators manual.
Service manual copy available for an additional $5.00

Transceiver only - Now reduced from $145.00 to $105.00
AC Power Supply is available too:

Also I have the Henry Radio Tempo One POWER SUPPLY in very good condition.
With built-in 3" X 5" speaker for audio out from the Tempo One Transceiver.
Has 9 diodes.
Any of the following AC Voltages may be used: 110 - 120V AC or 200 - 240V AC
Dimensions: 8" wide X 5.5" tall X 11" deep
Approx. weight: 22 pounds.
Cables are included. REDUCED from $85.00 to $65.00

AC/ONE Power supply is available for $65.00 plus shipping.
OR BUY BOTH TOGETHER FOR $160.00 plus shipping

2517. FS: Hallicrafters S38C Receiver

Yahoo group: amatuerradioswapfest
Date: 2012-05-02 20:18:13 UTC
From: Bry Carling
Topic: 2517 Message: 2517

FOR SALE: Extra nice S38C shortwave receiver - many hams used these as their very first receiver.

Very good condition. All original knobs etc. The S38C uses six tubes, and has a metal cabinet and built-in speaker. Its compact size and low cost maakes this a very attractive set. The S-38 models were in production until 1961.

Despite its simplicity, the S-38 is a "hot" radio, offering good sensitivity. Like more expensive shortwave receivers, it has a separate bandspread tuner, automatic noise limiter (ANL), and beat frequency oscillator (BFO) for CW listening. It covers frequencies from .54 Mhz to 32 Mhz in four bands.

With distinctive semi-circular dials, the S-38 through S-38C models are very recognizable. The S-38C has cool-looking shiny gray, hammertone paint. Excellent working condition.

Available for $65.00 plus shipping. USA only.

73 - Bry, AF4K

2519. FS: More 2W, 1W and 1/2 W Carbon Resistor Packs

Yahoo group: amatuerradioswapfest
Date: 2012-05-06 11:44:05 UTC
From: Bry Carling
Topic: 2519 Message: 2519

Hi guys,

I know a lot of people asked me for some more of these resistors and I found some.

As of right now, I have found 6 more assortments of New 2 Watt Carbon Compopsition Resistors (50 in each.)
I have 3 more packs of the 1 Watt carbon composition resistors (50 in each.)
and I have another 8 packs of the 1/2 Watt composition resistors (100 in each.)

I have posted these on my web pages for easy purchase for whomever would like some.
2W - $15 each
1W - $10 each
1/2W - $8 each
For anyone who buys 2 or more of these I will throw in a surprise pack of 50 - 100 new resistors of my choice. FYI - one or two of the 2 watt resistor packs might contain a couple of
good used looking resistors or shorter lead ones but you won't be disappointed.

http://af4k.com/resistors.htm

There are also some very excellent, useful power resistors and bleeder resistors etc. at that
link.

Thanks for looking & 73 - Bry AF4K

2524. FS: ARC5-looking 40m transmitter

Yahoo group: amatuerradioswapfest
Date: 2012-05-13 01:04:18 UTC
From: Bry Carling
Topic: 2524 Message: 2524

FOR SALE - Navy transmitter for 40m band.
Dial reads from about 7.0 - 9.0 Megasickles.

Includes two 1625 FInal RF power tubes for plenty of oomph.

To me it looks just like any other ARC5 style radio, but the experts warn that his is not actually an "ARC5" as far as purists are concerned. For someone who enjoys military radios or actually getting something fun on the air with tiubes it will be just fine I am sure!

One place that I read (maybe a web site) says that it is part of the AN/ARC-5 Command Radio Set. Analogous to type BC-459-A, T-22/ARC-5 transmitters. It would have typically been paired with a CBY-46106 receiver, similar to the BC455-B and R-27/ARC5 receivers.

It also stated that the AN/ARC-5 Command Radio Set is a series of radio receivers, transmitters, and accessories used to provide two-way Morse code and AM radiotelephone communication for U.S. Navy aircraft during World War II and the years following. It was an improvement of the Navy's ARA/ATA command set. Similar units designated SCR-274-N were used in U.S. Army aircraft. The Army set is based on the Navy ARA/ATA, not the later AN/ARC-5. (perhaps this one is part of the ARA/ATA instead of ARC5? You be the judge!

Covers 7.0 to 9.1 MHz. Comes with all tubes, including the magic eye tube, the covers, all coils, etc. There are some paint chips off the top and front, but can be easily restored. Overall
in very good condition for its age. SERIAL number is 665.
Technical Data: The transmitter can run 40 watts on CW, and would draw approx. 9 amps at 28 volts in operation although it works satisfactorily between 22 - 30 volts input. The circuits
of the transmitter are as follows: A master oscillator (1626) excites a pair of beam tetrode
power tubes (1625) connected in parallel. An antenna coupling control is used to vary the coupling between the output tank and the roller inductor loading coil. The transmitter could be
modulated using screen grid modulation or plate modulation. This style of transmitter was used by many amateurs after world war two, but many were modified or stripped for their high quality components, particularly the variable capacitors. The sets had an extremely good
name for their frequency stability. This unit uses tubes which look great. The two 1625 tubes
test good. There is no crystal, as in most of these radios. It appears to be missing the VFO
shield and inductor trim slug. Otherwise, complete with all original knobs and tubes, and is in
above-average condition.

Available for $75.00 plus shipping.

Pictures and details at:

Topic: 2525 Message: 2525

It is "Antenna Season."

HF Antennas and related items For Sale -- Coaxial Cable, Connectors, Dipoles, Verticals, SWR Bridges, Antenna Tuner, Low Pass TVI Filters, etc.

Coaxial Cable:

I accumulated a fairly large amount of miscellaneous lengths of coaxial cable. Most of the cable is RG-8 (.405 inches in diameter) or equivalent. Most has a PL-259 on at least one end, and most on both ends.

All of the coax over 20 feet has been checked with an analyzer, and its loss has been confirmed to be within 10% of new specs which is as close as I can measure. Lengths under 20 feet have been checked for continuity, because loss is almost impossible to measure for lengths this short.

I have a large amount in many different lengths, varying from 1 foot to 160 feet. To put it another way, I have jumpers for in your shack, and lengths to run up your tower. I can not list all of the lengths. Please let me know what you need, and I will see how close I can come.

The coax is 3 feet for a dollar (33 cents a foot), plus $2 for each installed PL-259.

Coax connectors and adapters:

Prices are per connector. Several of each are available. Most are unused.

UHF Right angle 90 degree elbow connector $3

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "Bulkhead Connector" - Double female, as above, but for mounting thru a window, siding, etc. about 3 inches long $6

UHF double male connector (two PL-259's together) $3

UHF "T" connector with two female (SO-239) and one male (PL-259) connection $5

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit

a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male to BNC female (opposite of above) $5

BNC male for coax cables
standard type $2
crimp on type $3
-
Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T", two female and one male $3

"N" Connector, Double Male $8

Broadband Dipole Antennas:

These antennas are sometimes call "Double Bazooka" dipoles, but also go by other names. They are made from RG-8 coax instead of just wire. They are fed differently, with both halves of the coax used. The result is an antenna that is more broad banded than a regular wire dipole, permitting one to cover all, or most, of a ham band with a reasonable SWR. Of course these can be put into an inverted V configuration as well. They have been described in the ARRL Handbook and ARRL antenna book at various times.

I have antennas for two different bands:

40 meter antenna as described above (approx 66 feet long) with about 25 feet of RG-8 coax feedline attached, terminated in a PL-259 connector. $50

10 meter version, about 16 feet long. No feedline on this one, but there is a place for you to attach your own coax. $15

Buy both of the above for $60.

MFJ 1796 Halfwave Vertical Antenna:

The MFJ 1796 covers the 40, 20, 15, 10, 6, and 2 meter bands, with no radials needed.

It is only 12 feet high and can be mounted anywhere -- ground level to tower top -- apartments, small lots, trailers. Perfect for vacations, field day, DXpedition, camping.

Efficient end-loading, with no lossy traps
Full size halfwave on 2 & 6 Meters
High power air-wound balun eliminates feedline radiation
Adjusting 1 band has minimum effect on others
Automatic band switching

Low radiation angle for great DX
Omnidirectional
Handles 1500 watts PEP
Low SWR
Stainless steel hardware

This antenna was used in a restricted community, and only
put outside when being used, so it is in terrific shape.
Paper work included.

These sell for over $300 new. Buy this one for only $175.
Pick up near Ocala FL, just off of I-75.

Hustler 4BTV HF Vertical Antenna:

The 4BTV is a vertical antenna that covers 10, 15, 20, and 40
meters. It can also cover 75/80 meters by using an RM-75
resonator.

This one is in extremely good shape. It actually still shines!
No corrosion evident. The actual base shows very minor signs
of being out in the weather, but the silent key who used it
was in a restricted community, and took the top part out of
the garage only when he wanted to get on the air.

Paper work is included for $120.

Hustler RM-75 resonator - standard version
(can be used to add 75 meters to 4BTV above) $19

I would prefer pickup near Ocala, Florida, just off of I-75.
It will easily fit inside a car. It is possible to ship it,
but the cost is high due to it being oversize. Obviously,
shipping is not included in the price.

Heath HM-15 SWR Bridge:

This is an HF SWR Bridge, with SO-239 connectors on
the back. The front has the meter on the left, and two
knobs to the right. It is the same size as the HD-15
phone patch.

This one works fine and is in nice cosmetic shape.
I can not find a scratch on it.

Paper work included for $20.

HF and VHF SWR Bridges:

All of these cover from 3 to 150 MHz, covering HF,
6 meters,and 2 meters. SO-239 connectors.

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see

any scratches on it, but it does have a previous owners name
on it. In its original box with original instructions. $28

TenTec 229 HF antenna tuner:

This roller inductor tuner will handle full legal power.
It uses an "L" match instead of a "T" match, which means
there is only one spot that will give the correct match.
The "L" match is also more efficient. Electrically, it is
the same as the 238 series, 229 A, 229 B, and 4229.

There is also a built in wattmeter with full scale reading
of 200 and 2000 watts. It also has an SWR bridge with
lighted meter, plus a 4 position antenna switch.
-
It can be used on any HF frequency, including the WARC
bands, as it is continuously adjustable. It has a built
in internal balun, so open wire can be used.

Cosmetically, this unit is the color of the earlier Omni
series (Omni 546, series A, B, and C) with the black vinyl
covering, and nice aluminum trim around the front.

This particular unit functions 100%, and looks perfect.
I can not find a scratch on it.

Paper work is included for $325.

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter to reduce
harmonic interference. All have SO-239 connectors, are 50
ohm filters, and include paper work.

Bencher YA-1, high power, low pass TVI filter
If you need a more heavy duty filter for the output of
your amplifier, this one is ideal. It will take full legal
power plus, and has at least 80 db signal attenuation at
TV channel 2.This one works great, and looks close to new.
Bencher currently sells these for about $90. Only $60.

Bud LF-601 low pass filter
This filter is adjustable for best attenuation in your particular
situation, and also to more closely match your specific impedance.
It cuts off at about 52 MHz (if adjusted as such) so it can be
used on 6 meters, and will handle 1500 watts. $35

Drake TV-1000-LP Low pass TVI filter
This is the filter that may also be used on the low end of six
meters, as well as HF. It is good for 1000 W "average" below
30MHz, and about 200 W up to 52 MHz. With paper work for $30.

Drake TV-1000
LP Filter as above, which functions fine electrically, but looks ugly.
With paper work. $25

Drake TV-3300-LP Low Pass Filter
This modern low pass filter has been optimized to have more
attenuation in the 40 MHz region, where many TVs have their
IF. It is good for 1000 Watts "average" according to the manual,
and has over 80 db attenuation at 41 MHz. This one looks great,
and includes the paper work. $30

B & W FL-10/1500
This filter cuts off just above 10 meters, and handles 1500
Watts. It is the latest model B&W filter.In very nice condition,
it looks close to new. $40.

Johnson 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut
off frequency of 45 MHz and 75 db of attenuation.
It is rated to take 1000 Watts of AM, or 5000 Watts
PEP SSB. With mounting bracket. $30

Para Dynamics PDC 1089
This filter is rated at a full Kilowatt, up to 30 MHz.
5 x 6 x 2 inch black box, instead of the more familiar long
enclosure. It looks like new. $25

I also have many other accessories available such as many
different types of microphones, HTs, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

2526. FS Misc Radio/Boatanchor Gear

Yahoo group: amatuerradioswapfest
Date: 2012-05-16 22:28:30 UTC
From: K7NKS
Topic: 2526 Message: 2526

Cleaning out my garage and storage units. Will send out irregular lists as I tunnel down thru the electronic stacks. All items best offer plus shipping from 80104.

1. Collins 17L-8A VHF Aircraft Transmitter.
2. What is it? O-402 Crystal Oscillator Module. Label on side is MX-708116-1. Looks to be a oven type multicrystal unit.
3. Stacks of Motorola Two-Way radio gear and accessories. Mocom, Motrac, Syntor, Speakers, Mikes, Converta-coms, etc.
4. A Motorola NLN-6260, 12 Unit Charger for MT-500 Handhelds.

Some of the older items are heavy enough to require big shipping costs. Probably best to bring a pickup truck to 80104 Zip. Will ship items 1 & 2.

Thanks for reading,

Chuck, K7NKS

2527. FS: Hallicrafters S94 Civic Patrol RCVR $39

Yahoo group: amatuerradioswapfest
Date: 2012-05-17 00:21:46 UTC
From: Bry Carling
Topic: 2527 Message: 2527

I have for sale, THREE Hallicrafters Civic Patrol S-94 VHF RECEIVERs

Superhet with RF-stage; IF frequency is 10700 kHz; 2 AF stage(s)

Includes 8 tubes:
6BH6, 12AT7, 12BA6, 12BA6 12AL5, 12AU7, 6BH6 and 50L6 AF out.

Has a built-in 5 inch Permanent Magnet Loudspeaker.
Cabinet dimensions: 12.9 x 7 x 7.25 inch / 328 x 178 x 184 mm
Coverage: 30 to 50 MHz
Will include a copy of the manual with schematic.

Two of these are available in EXCELLENT condition for $65.00 each plus shipping.
There is a third one that is also nice but has a non-original knob or two, and needs minor work - for $39.00 plus shipping. - see below

Pictures and details here:

2528. Coax Switch, Wattmeter, SWR Bridges, and more FS

Yahoo group: amatuerradioswapfest
Date: 2012-05-18 12:26:51 UTC
From: Ken Simpson, W8EK
Topic: 2528 Message: 2528

Coax Switch, Wattmeter and SWR Bridges,
Microphones, and more For Sale:

Daiwa CS-401 Stripline 4 Position Coax Switch:

Daiwa switches utilize professionally engineered all
metal cavity construction for maximum efficiency, high
isolation and minimum resistance. Isolation is better
than 60 dB at 300 MHz. Insertion losses are less than
0.2 dB. The Daiwa CS-401 permits the selection of up
to four antennas. Unused antenna positions are grounded.

Freq. Limit 800MHz
Power Rating 2.5 kW PEP 1 kW CW
VSWR below 1:1.2
Insertion Loss < 0.2dB
Isolation 60 dB at 300 MHz
Connectors SO239

This one works fine with great switching action. $70

Heath HM-2141 Dual Meter VHF Wattmeter / SWR Bridge:

The HM-2141 is the VHF version of the more popular
HM-2140 wattmeter and SWR Bridge, and has the same
features, except it covers from 50 to 175 MHz.

This is the wattmeter that has two meters on it, so it
reads both forward and reflected power at the same time.
It also has a "Peak" position, so it can capture the peak
power, in essence reading PEP output. Forward scales
are 30 or 300 Watts, and reverse are 10 W or 100 W,
plus SWR scale. It covers 50 to 175 MHz. It needs a 9
volt battery for "peak" operation. It has a remote
sensor with about 3 feet of cable.

This particular meter works 100%. The outer case (top
and sides) has been repainted black hammertone, and looks
very nice.

With paper work for $100.

Heath HM-15 SWR Bridge:

This is an HF SWR Bridge, with SO-239 connectors on
the back. The front has the meter on the left, and two
knobs to the right. It is the same size as the HD-15
phone patch.

This one works fine and is in nice cosmetic shape.
I can not find a scratch on it.

Paper work included for $20.

HF and VHF SWR Bridges:

Both of these cover from 3 to 150 MHz, covering HF,
6 meters,and 2 meters. SO-239 connectors.

Monarch FSI-5
This unit features two separate meters --
one for reading forward power and another for reading SWR.
This permits one to easily monitor both the power going
out, and the SWR on the antenna at the same time. It works
fine and looks great. With paper work for $37.

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see
any scratches on it, but it does have a previous owners name
on it. In its original box with original instructions. $28

Yaesu Hand Microphone:

Yaesu YM-31 hand microphone
The Yaesu YM-31 is a hand mic with a round 6 pin
connector. Apparently it is either similar or the
same as the MH-25A6j (not the MH-25 with the 8 pin
connector). It is a 600 ohm impedance hand microphone,
and has a Monitor on-off switch on the back. It should
be compatible with any of the Yaesu rigs that uses the
round 6 pin connector. It looks very similar to the
Yaesu MH-1.
This one works fine and looks extremely nice. $25

Hand Microphone with 8 pin modular plug for Kenwood:

This hand mic says "Electret Condenser Mic" on the back
of it, and Kenwood on the front, with no model number.

This mic has the mic and PTT switch; it also has
up/down switches on the top. There are four "extra" buttons
labeled Call, VFO, MR, and PF. What these four buttons do
depends on the rig. They will function on some rigs, and
are completely useless on others. There is also a "Lock"
switch on the back.

This mic has the 8 pin modular plug (like a computer LAN)
on it, as used by the Kenwood TM-261, TM-271 and others.
It has been tested on a TM-261, but probably works on
many others.

This mic works fine, and looks like new. I am guessing it
came with a rig, and was immediately put in the drawer. $30

DTMF Touch Tone Microphones:

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in the mic, and "speed dial". 12 digit touch tone pad on the front. 8 pin modular plug (like computer LAN).
Looks to be new. $38

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin plug.
Looks to be unused. $38

Code Tapes:

Code Quick 30 Day Master Plan
"The Fastest Way to Master the Morse Code"
by Dr Gerald Wheeler, W6TJP

This is a set of 5 cassette tapes designed to teach the code and get up to about 13 WPM in a month.

This set is in great shape, in its original binder, and includes the instruction book with it. $25

I also have many other accessories available such as many different types of microphones, HTs, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

2532. Palstar AT2K 2kw Tuner

Yahoo group: amatuerradioswapfest
Date: 2012-05-23 14:16:02 UTC
From: kb0wsw
Topic: 2532 Message: 2532

For sale is a like new Palstar AT2K Roller Inductor antenna tuner. I bought the tuner a couple of months ago to go with a new amp. Previously owned an autotuner and would like to go back to one, so this tuner needs to go. I have all the original parts and accessories for it including the box. Sell for $498 new, asking $420 plus $15 help for shipping. MO or Credit Card accepted (over the phone using Square for my business). Call or email with any questions. 605-376-5131

[Non-text portions of this message have been removed]

2533. Dual Band Rig, 2 m rig, HF rig, and more FS

Yahoo group: amatuerradioswapfest
Date: 2012-05-26 11:01:21 UTC
From: Ken Simpson, W8EK
Topic: 2533 Message: 2533

Dual band (2 m and 440 MHz) transceivers (Mobile and HT), 2 meter FM transceivers (mobile and HT), HF transceiver, HF Linear amplifier, Power Supplies, Coaxial antenna switch, coaxial cable, and related items For Sale:

Icom IC-2350 dual band FM transceiver:

The Icom IC-2350H features large dual LCD displays, simultaneous dual-band receive, simultaneous two frequency reception on the same band, built-in duplexer, separate volume and squelch controls, high power output, built-in programmable tone encoder, auto repeater shift function and compact size. This radio supports sub band mute, three output levels, tone encode, built-in duplexer and dual volume and squelch. Enjoy extended receive on the 2 meter band from 118 to 174 MHz. Includes DTMF hand mic and DC power cable.

Features:
Two Call Channel
Tone Scan
110 Memories
Scanning
Time-Out Timer
Multi Function Mic
50/10/5 Watts Output 2 M
35/10/5 Watts Output 440
Two Call Channels
Priority Watch
Extended receive
Auto-repeater Function
Air band Receive [AM]

This particular unit works 100% and looks the same. I can not find a scratch on it. With paper work for $275.

Alinco DJ-580 dual band (2m and 440 MHz) HT:

This HT receives from 110 to 174 MHz in the VHF position, which includes the AM Aircraft band. 440 to over 480 MHz in the UHF position. Of course it transmits in the 2 meter and 440 MHz ham bands. It is my understanding that it can also be modified to receive into the 800 and 900 MHz region. It will also cross band repeat,

and is an extremely rugged radio.

Power output has 3 different levels. With the
7.2 V battery packs, it has 0.25 W / 1 W / 2.5 W.
If used with the larger 12 V batteries, it will
produce 0.25 W / 1.2 W / 5 W.

This particular unit is in very good shape, both
electrically and cosmetically. The keyboard has very
crisp and clear lettering. It includes desk charger,
rubber duck antenna, belt clip, wrist strap, battery,
and paper work. $130

Yaesu FT-227 RA "Memorizer" 2 meter FM transceiver:

The FT-227 is an FM rig with about 12 watts output (1.5 W
in low power) covering the entire 2 meter band. This is
the "A" model that has four memories. It has provisions
for installing a CTCSS subaudible tone module.

This rig was used on packet, and will make an excellent
APRS or packet rig. It works fine and looks fine. Since
it was used on packet, there is no microphone included,
but it does include power cord and paper work for $40.

Kenwood TR-7730, 2 meter FM Transceiver:

The Kenwood TR-7730 is 2 meter mobile transceiver that has
CTCSS subaudible tone capability (tone board not installed).
It has 25W or 5W output, with 5 memories and scan functions
(band & memory).
This is an easy to operate radio! It is a great radio for
APRS or packet.

This one works 100% and looks OK, but certainly not mint.
It does have some scratches. Paper work is included.

I will sell it one of two ways.
With the MC-46 DTMF touch tone mic (which works fine and
looks really great), it is $80.
With a generic, non DTMF touch tone, regular mic, it is $50.

Kenwood TH-235 Two Meter FM HT:

The Kenwood TH-235A Two meter HT has a large easy-to-read
LCD, 60 channel memories with scanning and ten DTMF
memories. Extended receive is 136-174 MHz so it includes
the weather frequencies. When used on external DC power
you will get a full 5 watts output. With the included
PB36 battery pack, it produces 1.5 watts. The low power
setting is 0.5 watts.

Features
Backlit LCD Display
60 Memories
Scanning
Battery Saver
Built-In CTCSS Encode
Extended Receive

This particular unit works 100% and looks like it just came
out of the box new. It came from a silent key who I don't
think ever used it. This one includes the desk charger,
rubber duck antenna, belt clip, and paper work for $115.
I added a new PB-36 battery, as the old one had been in
the drawer long enough that it is not in good condition.

Cigarette lighter power cord for TH-235 above. $12

Yaesu FT-990 Deluxe HF Transceiver:

The Yaesu FT-990 features multiple direct digital synthesizers
for pure local signals and high performance. It has an
automatic antenna tuner. A 500 Hz CW filter is built in.
It has keypad entry. Power output is adjustable up to 100
watts output (25W AM). A power supply for operation from
120 V AC is built in, or it can be powered by 13 V DC at
about 22 amps.

Features:
General coverage receiver, tunes continuously from 100 kHz to 30 MHz
Modes: AM, USB, LSB, CW, FM, FSK
Iambic CW keyer
Automatic Antenna Tuner
Notch filter, IF shift, noise blanker, and a digitally
switched capacity audio filter
Multi-function illuminated analog S-meter
90 Memories
Dual VFOs
Built-in AC Power Supply
Noise Reduction
Digital Filtering
IF Notch
Manual and Auto AGC

This particular unit works fine, and looks very close to
perfect. This is a terrific radio. $895

Ameritron AL-84 HF Amplifier:

The Ameritron AL-84 is a grounded grid linear amplifier
using four 6MJ6 tubes driven thru an impedance matching
and power swamping network. It has a pi net output, and
an illuminated meter that reads plate current and voltage.
There is a connector on the back that will furnish 12 V

DC at low current for such things as lights on an antenna tuner, powering a keyer, etc. The AL-84 is rated to deliver 400 watts when driven with a 100 watt rig.

This particular unit has had the 10 meter mod done, so it covers 160 thru 10 meters. It works fine, producing rated power, and looks almost perfect.

With paper work for $400.

Pyramid PS-25 Power Supply (25 amps at 13 V DC):

The Pyramid PS-25 is a 13 Volt DC power supply with both a voltmeter and an ammeter built in. The output voltage is adjustable over a range from about 11.5 to 15.5 volts DC. There is also an adjustment to set the current limiting, up to 25 amps. This means it can be set so that it will protect the finals of a solid state rig. In addition, a buzzer is activated if it goes into over current limiting. This power supply has the features you want!

This particular unit works fine, and looks extremely nice.

With paper work for $80.

Astron RS-20A Power Supply:

The RS-20A is a DC Power Supply producing 13.8 V DC (internally adjustable from 11 to 15 V DC) at up to 16 amps continuous and 20 amps ICS. The RS-20 features crowbar over voltage protection and fold-back current limiting to protect your equipment.

This particular supply works fine, and looks very close to new. I do not find a scratch on it.

With paper work for $60 plus shipping from Florida.

Daiwa CS-401 Stripline 4 Position Coax Switch:

Daiwa switches utilize professionally engineered all metal cavity construction for maximum efficiency, high isolation and minimum resistance. Isolation is better than 60 dB at 300 MHz. Insertion losses are less than 0.2 dB. The Daiwa CS-401 permits the selection of up to four antennas. Unused antenna positions are grounded.

Freq. Limit 800MHz
Power Rating 2.5 kW PEP 1 kW CW
VSWR below 1:1.2
Insertion Loss < 0.2dB
Isolation 60 dB at 300 MHz
Connectors SO239

This one works fine with great switching action. $70

Heath HM-2141 Dual Meter VHF Wattmeter / SWR Bridge:

The HM-2141 is the VHF version of the more popular HM-2140 wattmeter and SWR Bridge, and has the same features, except it covers from 50 to 175 MHz.

This is the wattmeter that has two meters on it, so it reads both forward and reflected power at the same time. It also has a "Peak" position, so it can capture the peak power, in essence reading PEP output. Forward scales are 30 or 300 Watts, and reverse are 10 W or 100 W, plus SWR scale. It covers 50 to 175 MHz. It needs a 9 volt battery for "peak" operation. It has a remote sensor with about 3 feet of cable.

This particular meter works 100%. The outer case (top and sides) has been repainted black hammertone, and looks very nice.

With paper work for $100.

Coaxial Lightning Arresters:

These lightning arresters are made to be inserted in to your coaxial feedline, to help reduce lightning damage.

Cushcraft LAC-2
Still in the original blister pack, unused.
This one has an SO-239 (female UHF) connector on each end, so that a PL-259 can be screwed into it. $15

Cushcraft LAC-1 ??
No markings on this to confirm the model number, but it looks like the Cushcraft "Blitz Bug".
It has an SO-239 on one end and a PL-259 on the other end (female UHF on one end and male on the other). $10

Coaxial Cable:

I accumulated a fairly large amount of miscellaneous lengths of coaxial cable. Most of the cable is RG-8 (.405 inches in diameter) or equivalent. Most has a PL-259 on at least one end, and most on both ends.

All of the coax over 20 feet has been checked with an analyzer, and its loss has been confirmed to be within 10% of new specs which is as close as I can measure. Lengths under 20 feet have been checked for continuity, because loss is almost impossible to measure for lengths this short.

I have a large amount in many different lengths, varying from 1 foot to 80 feet. To put it another way, I have jumpers for in your shack, and lengths to run up your

tower. I can not list all of the lengths. Please let
me know what you need, and I will see how close I can come.

The coax is 3 feet for a dollar (33 cents a foot), plus
$2 for each installed PL-259, plus shipping from Florida.

Coax connectors and adapters:

Prices are per connector. Several of each are available.
Most are unused.

UHF Right angle 90 degree elbow connector $3

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "Bulkhead Connector" - Double female, as above, but for
mounting thru a window, siding, etc. about 3 inches long $6
-
UHF double male connector (two PL-259's together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male to BNC female (opposite of above) $5

BNC male for coax cables
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T", two female and one male $3

"N" Connector, Double Male $8

Power Cord:

This is a two pin power cord that is used on some 2 meter,
and other VHF/UHF rigs. The connector looks very similar
to a round 2 pin female mic connector.

This type cord was used by KDK, Kenwood, Yaesu and probably
others, typically back in the 1990's. I know it was used
on the KDK 2015 and 2016, Kenwood TR-9000 and others, Yeasu
FT-720 and 727 series, plus many others.

This cable works fine, and looks fine. $15

I also have many other accessories available such as many different types of microphones, HTs, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

2534. FA: Weston 120V AC LINE MONITOR Item 110887188019

Yahoo group: amatuerradioswapfest
Date: 2012-05-26 21:43:33 UTC
From: Bry Carling
Topic: 2534 Message: 2534

For auction:

WESTON AC LINE VOLTAGE METER 0 - 150V AC in a beautiful case. This is a first class test instrument with a large reflecting galvanometer scale from zero to 150 volts AC. It also
has a scale for 0 - 15 V AC and separate terminals on the side for both ranges. Model is 433
/ serial number 30418. It includes highly calibrated markings for the internal resistance.

The last calibration was conducted by the U.S. Navy Calibration program and it has the stickers from their standards calibration laboratory in Indianapolis,. Indiana dated October
1962. I checked it against a modern digital meter and it appears to be very accurate.

Dimensions are approx. 6" X 3" X 5-1/2" tall.
The rubber feet are there and in very good condition.. There is no handle.

It will be carefully packed and insured.

Starting price is $25.00 for this beautiful precision instrument.

2536. FOR SALE: RARE COMMANDER II 2 METER 144-148 MHz KW + VHF AMPLIFIER

Yahoo group: amatuerradioswapfest
Date: 2012-05-30 22:11:33 UTC
From: n3dg
Topic: 2536 Message: 2536

High Power 2 Meter Amplifiers are quite rare for serious DX, Moonbounce, EME, E Skip, Tropo, Aurora, Moonbounce, Contests, or ragchewing long-distance on SSB or FM.

Made by renown Command Technologies of Bryant, Ohio, Commander II is a Very Rare & Rugged 1 KW+ All Mode 2 Meter Linear Amplifier supporting 144-148 MHz.
Only 10-15 watts drive nominal is needed and 30 watts will yield 1 KW SSB/CW with its reliable Eimac 3CX800A7 Final and with all Silver-Plated RF Components, Stripline Tank Circuit, Dow Key Relay all in a compact attractive cabinet measuring only 14.75"W x 14.75"D x 6"H and powered by either 120 Volts AC or 240 Volts AC (now wired for 240 Volts AC, easy to change to 120 Volts AC).

Specifications and Manual at:
http://www.palstar.com/manual_CommanderII_old.pdf

Commander II is absolutely Mint, Like New, just sat on the shelf not used and now need the room for HF gear.
Includes Original Commander II Shipping Cartons (double-boxes for RF Deck), Owners Manual and 240 Volt @ 20 Amp AC Plug.
Photographs upon request.

New list price is over $3000, yours for $2300 plus shipping.

2537. MIRAGE B-1030G 350 WATT 2 METER ALL MODE AMPLIFIER

Yahoo group: amatuerradioswapfest

MIRAGE B-1030-G 2 Meter All Mode Solid-State 350 Watt Amplifier supports 144-148 MHz on SSB/CW/FM/AM and delivers 300-375 Watts Output with just 10-15 Watts Drive (and like 30 Watts Output with 1 Watt Drive).
Features a Red Hot GaAsFET Low Noise 22+ dB Receiver Preamplifier and is Very Compact for Base or Mobile/Portable and measures 13"L x 5"H x 10"W.

Excellent Reviews at:
http://www.eham.net/reviews/detail/5501

Specifications and Manual at:
http://www.comdac.com/literature/mirage/b-1030-g.pdf

She is in Like New, Mint Condition with Original Owners Manual, Warranty Card in Original Mirage Packaging and Carton.
List Price is $790, yours for $600 shipped to USA.

2540. WTB: ICOM SP3 or SP23 Speaker

Yahoo group: amatuerradioswapfest
Date: 2012-06-06 02:58:16 UTC
From: Jeffrey
Topic: 2540 Message: 2540

Looking to purchase either a ICOM SP3 or a SP23. Anyone selling one of these...
Leaning more towards the SP2 since it's the cheaper of the two but will take
either. Please let me know what you have, how much, and if possiable a picture.
Want a nice speaker for my ICOM 756PROII.

Thanks so much

2544. FS: Hallicrafters S20R rcvr

Yahoo group: amatuerradioswapfest
Date: 2012-06-13 03:01:38 UTC
From: Bry Carling
Topic: 2544 Message: 2544

Hallicrafters S20R SKY Champion Receiver

This vintage SW receiver has 8 tubes. Excellent condition and it works - $125.00 plus shipping.

This is a four-band general coverage receiver, covering all frequencies from 540 kHz to 44.0
MHz. In addition to bandspread tuning, it features AVC (automatic volume control), ANL (automatic noise limiter), BFO (beat frequency oscillator) for SSB and CW reception, a three-
position tone control, and headphone jack. The S-20R has an RF amplifier and two stages of IF amplification.

The Hallicrafters S-20R Sky Champion was made from 1939-1945 and sold for $49.50, putting it in middle of the company's prewar radio lineup. The entry-level Hallicrafters set for
1939 was the model S-19 Sky Buddy, selling for $29.50. Higher priced prewar models included the SX-24 Skyrider Defiant at $69.50 and the SX-25 Super Defiant at $94.50.

Model S-20R was the first in a long-lived product line. Hallicrafters repackaged essentially the
same radio, with minor updates, as models S-40, S-85 and S-108.

The back panel contains sockets for two optional accessories. One socket is for power, permitting mobile use with batteries (one 6-volt and one 340-volt). The second socket is for
an external S-meter to show signal strength while tuning. The S-meter socket came in handy for my magic eye project.

This was a pretty full-featured receiver for the price. The higher-priced SX models added only
a few nice-but-not-necessary features: variable selectivity, a crystal filter, calibrated band
spread, and a built-in S-meter. Available for $125.00 plus shipping. Offers and trades considered.

Picture and details:

2545. VHF and UHF antennas and related items FS

Yahoo group: amatuerradioswapfest
Date: 2012-06-18 16:30:02 UTC
From: Ken Simpson, W8EK
Topic: 2545 Message: 2545

VHF and UHF Antennas (2 m and 440 MHz) and related equipment
For Sale:

VHF Triband Mobile Mag Mount Antenna:

This mobile antenna is a VHF Triband antenna covering the
6 meter, 2 meter, and 440 MHz ham bands. This makes it
ideal for some of the newer multiband and dual band rigs
available today.

The antenna is about 3 feet long and has a very strong
magnet. It has a long coax cable with a PL-259 connector.

It works great, and looks very close to new. $75

Larsen NLA Type Mobile Antennas:

These antennas fit the Larsen NLA mobile mount, which is
a special mount made by Larsen.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 meters.

This one works fine and looks fine also.

Coil only, without whip (whip is hard to ship). $10
With four foot whip. $19

Larsen NLA-UHF coil for 440 MHz
This is the coil only for use on the amateur 440 MHz
band and UHF public service bands. Good condition. $10

Mobile Antennas for 440 MHz band:

"On Glass" mobile antenna for 440 MHz:
This antenna is made to mount on a windshield,
or other glass. It does not require a ground plane, as
it is a 1/2 wave antenna, rated to have 3 db gain. It is
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.
This one is still in its original tube, unopened. $33

Larsen NLA Type Mobile Antenna:
This antenna fits the Larsen NLA mobile mount, which is
a special mount made by Larsen.
Larsen NLA-UHF coil for 440 MHz

This is the coil only for use on the amateur 440 MHz
band and UHF public service bands. Good condition. $10

Mobile Antenna Mounts:

Large, heavy duty magnetic mount
This large mag mount will take any antenna with a standard
3/8 inch 24 thread connector. It is very heavy duty, about
5 inches in diameter, with a long coax for $22.

NMO "Luggage rack mount"
This NMO mount will attach to a luggage rack. The bracket
is made so it can attach to either a vertical or horizontal
portion. It is heavy chrome plated, with stainless steel
hardware, and is quite heavy duty for NMO. With 17 feet coax
and PL-259. It looks to be new. $18

NMO "Button" Mount
This mount fits into a 3/4 inch hole, and will then take any
of the many NMO types of antennas. Coax included.
It is in close to new condition. $12

Rubber Duck antennas for your HT:

All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC - Original from Kenwood TH-215, about 5 inches long

BNC - Stubby about 4.5 inches long

5/16 inch threaded, as used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

BNC Stubby for 440 MHz, 3 inches long

Heath HM-2141 Dual Meter VHF Wattmeter / SWR Bridge:

The HM-2141 is the VHF version of the more popular
HM-2140 wattmeter and SWR Bridge, and has the same
features, except it covers from 50 to 175 MHz.

This is the wattmeter that has two meters on it, so it
reads both forward and reflected power at the same time.
It also has a "Peak" position, so it can capture the peak
power, in essence reading PEP output. Forward scales

are 30 or 300 Watts, and reverse are 10 W or 100 W,
plus SWR scale. It covers 50 to 175 MHz. It needs a 9
volt battery for "peak" operation. It has a remote
sensor with about 3 feet of cable.

This particular meter works 100%. The outer case (top
and sides) has been repainted black hammertone, and
looks very nice.

With paper work for $100.

HF and VHF SWR Bridge:

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter

This unit covers from 3 to 150 MHz, covering HF,
6 meters,and 2 meters. SO-239 connectors in and out.

This one works fine, and looks extremely nice. I do not see
any scratches on it, but it does have a previous owner's
name on it.

In its original box with original instructions. $25

Coaxial Lightning Arresters:

These lightning arresters are made to be inserted in to
your coaxial feedline, to help reduce lightning damage.

Cushcraft LAC-2
Still in the original blister pack, unused.
This one has an SO-239 (female UHF) connector on each end,
so that a PL-259 can be screwed into it. $15

Cushcraft LAC-1
No markings on this to confirm the model number, but it
looks like the Cushcraft "Blitz Bug".
It has an SO-239 on one end and a PL-259 on the other end
female UHF on one end and male on the other). $10

High Power HF 1 to 1 Balun:

This is Palomar's very high power 1 to 1 HF balun. I am
not sure if it is rated at 3000 watts or 5000 watts, but
it is the big one. It is 4 inches in diameter and about
3 1/2 inches high. It has an SO-239 connector on the
bottom, that has a gold plated center pin, and silver
plated outer. It has "pigtails" coming out of the top
to connect to your balanced antenna.

It is designed so that it can easily be used with a beam.
It has a bracket from each side, and then a U bolt that
can attach to up to a 2 1/2 inch diameter mast or boom.
All hardware is stainless steel. This is a quality balun!

This one works fine and looks fine. $60

Coaxial Cable "Jumpers" for your shack:

I have a good quantity of coaxial cable "jumpers" available. These are short lengths of RG-8 coax, with a PL-259 connector on both ends. I have a variety of lengths from under a foot to about 5 feet long. Send me the lengths that you would like, and I will see how close I can come.

Although most are RG-8 (the larger, approximately 0.4 inch coax that takes full legal power), I also have some that are RG-8 X (the medium coax approximately 1/4 inch in diameter). Please ask for RG-8 X, if that is what you would like.

All jumpers are $6 each.

Coax connectors and adapters:

Prices are per connector. Several of each are available. Most are unused.

UHF Right angle 90 degree elbow connector $3

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "Bulkhead Connector" - Double female, as above, but for mounting thru a window, siding, etc. about 3 inches long $6

UHF double male connector (two PL-259's together) $3

UHF "T" connector with two female (SO-239) and one male (PL-259) connection $5

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male to BNC female (opposite of above) $5

BNC male for coax cables
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T", two female and one male $3

"N" Connector, Double Male $8

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter to reduce harmonic interference. All have SO-239 connectors, and are 50 ohm filters.

This first one works on 6 meters as well as HF:

Drake TV-1000-LP Low pass TVI filter
This is the filter that may also be used on the low end of six meters, as well as HF. It is good for 1000 W "average" below 30 MHz, and about 200 W up to 52 MHz. With paper work for $30.

Drake TV-1000
LP Filter as above, which functions fine electrically, but looks ugly. With paper work. $25

Others for HF:

B & W FL-10/1500
This filter cuts off just above 10 meters, and handles 1500 Watts. It is the latest model B&W filter.
In very nice condition, it looks very close to new. $40.

Johnson 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut off frequency of 45 MHz and 75 db of attenuation.
It is rated to take 1000 Watts of AM, or 5000 Watts PEP SSB. With mounting bracket. $30

Para Dynamics PDC 1089
This filter is rated at a full Kilowatt, up to 30 MHz.
5 x 6 x 2 inch black box, instead of the more familiar long enclosure. It looks like new. $25

Bencher YA-1, high power, low pass TVI filter
If you need a more heavy duty filter for the output of your amplifier, this one is ideal. It will take full legal power plus, and has at least 80 db signal attenuation at TV channel 2.This one works great, and looks close to new.
Bencher currently sells these for about $90. Only $60.

I also have many other accessories available such as many different types of microphones, HTs, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

2547. FOR SALE: RARE COMMANDER II VHF-144 2 METER 144-148 MHz KW + VHF AMPLIFIER

Yahoo group: amatuerradioswapfest
Date: 2012-06-21 22:27:01 UTC
From: n3dg
Topic: 2547 Message: 2547

High Power 2 Meter Amplifiers are quite rare for serious DX, Moonbounce, EME, E Skip, Tropo, Aurora, Moonbounce, Contests, or ragchewing long-distance on SSB or FM.

Made by renown Command Technologies of Bryant, Ohio, Commander II is a Very Rare & Rugged 1 KW+ All Mode 2 Meter Linear Amplifier supporting 144-148 MHz.
Only 10-15 watts drive nominal is needed and 30 watts will yield 1 KW SSB/CW with its reliable Eimac 3CX800A7 Final and with all Silver-Plated RF Components, Stripline Tank Circuit, Dow Key Relay all in a compact attractive cabinet measuring only 14.75"W x 14.75"D x 6"H and powered by either 120 Volts AC or 240 Volts AC (now wired for 240 Volts AC, easy to change to 120 Volts AC).

Specifications and Manual at:

http://www.palstar.com/manual_CommanderII_old.pdf

Commander II is absolutely Mint, Like New, just sat on the shelf not used and now need the room for HF gear.
Includes Original Commander II Shipping Cartons (double-boxes for RF Deck), Owners Manual and 240 Volt @ 20 Amp AC Plug.
Photographs upon request.

New list price is over $3000, yours for $2100 plus shipping.

2548. Kenwood Items--2 m HT, speakers, mics, cables, manuals and more FS

Yahoo group: amatuerradioswapfest
Date: 2012-06-22 21:45:44 UTC
From: Ken Simpson, W8EK
Topic: 2548 Message: 2548

Kenwood Items For Sale
Two meter FM HT, speakers, chargers and other HT
accessories, desk and hand microphones, cable for
switching linear amp, coaxial cable, original
Kenwood manuals, etc.:

Kenwood TH-235 Two Meter FM HT:

The Kenwood TH-235A Two meter HT has a large easy-to-read
LCD, 60 channel memories with scanning and ten DTMF
memories. Extended receive is 136-174 MHz so it includes
the weather frequencies. When used on external DC power
you will get a full 5 watts output. With the included
PB36 battery pack, it produces 1.5 watts. The low power
setting is 0.5 watts.

Features
Backlit LCD Display
60 Memories
Scanning
Battery Saver
Built-In CTCSS Encode
Extended Receive

This particular unit works 100% and looks like it just came
out of the box new. It came from a silent key who I don't
think ever used it. This one includes the desk charger,
rubber duck antenna, belt clip, and paper work for $110.
I added a new PB-36 battery, as the old one had been in
the drawer long enough that it is not in good condition.

Cigarette lighter power cord for TH-235 above. $12

Communications Speakers:

All have 3.5 mm (1/8 inch) mono plugs.

Realistic 40-1280
About 4 inch cube, this wood grain speaker is rated for up
to 7 watts, and has a 8 ohm impedance. It works fine,
sounds good, and looks nice. $18

Realistic 21-549 A
This one is about 4 inches square but only about 2 inches
deep. It is rated for 5 watts, has an 8 ohm impedance, and
is listed as a 300 to 3000 Hz frequency response, making it
ideal for communications. It is black in color, looks great,

and sounds great. $18

General Electric
This speaker is about 6 by 4 inches, and about 3 inches deep.
It is black with a gimbal mount. 4 ohm impedance. $15

Poly Planar MB-41
This cream colored 4 inch square speaker is about 2 inches
thick and is rated at 10 watts. It has a mobile mounting
bracket. $15

Accessories for the Kenwood TH-21 / 31 / 41 series HTs:

Special Antenna adapter that fits the TH-21 series HTs,
and has a BNC on the other end. $10

Kenwood SC-8 T "Soft Case" for any of the TH-21 series HTs
great condition $12

Original Operating manual for TH-21 HT for 2 meters $8

MFJ 287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the
TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as
others. It has a 3 conductor 3.5 mm plug and a 2 conductor
2.5 mm plug. It works fine. $15

Kenwood W09-0315 charger
This charger is used to charge the larger PB-21 H batteries
for the TH-21 series, and also on other Kenwood radios.
It has a standard 2.1 mm coaxial connector. $12

Accessories for Kenwood TH-205, TH-215, TH-225, TH-415,
and other HTs in this series:

MFJ 287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the
TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as
others. It works fine, and looks close to new. $15

Kenwood Wrist Strap for TH-215, plus many other HTs. $4

Original Kenwood Rubber Duck antenna from TH-215. $10

Kenwood BC-2 Charger for PB-2 batteries.
In Original box for $12.

BNC to PL-259 antenna adapter
Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
This adapter can be used on any HT with a BNC connector. $5

Deluxe Desk Microphone w/ Kenwood 8 pin connector:

This is a great looking and great performing low impedance desk mic. It has a quality Shure 600 ohm cartridge in it (the cartridge alone is over $40 new), with a very nice black die case base and neck, with a chrome grill. It looks somewhat like a Shure 444, but no plastic on this one -- all metal!

This one looks like new, and works the same. It has a long (approx 6 foot) cord, with a round 8 pin connector for Kenwood. $75

Kenwood Hand Microphone with round 8 pin plug:

This hand mic works great on most Kenwood rigs with the round 8 pin connector, such as the TS-430, TS-440, TS-570, TM-241, TM-2530, TW-4000, and others.
It only says "Electret Condenser Mic" on it, with no model number.

Basically, this mic is like an MC-43, only with a couple more features. Of course it has the mic and PTT switch; it also has up/down switches on the top. There are four "extra" buttons labeled Call, VFO, MR, and PF. What these four buttons do depends on the rig that it is attached to. They will function on some rigs, and are completely useless on others. There is also a "Lock" switch on the back.

Regardless if you use the four extra buttons or not, you still have a mic that works like an MC-43.

This mic works fine, and looks like new. I am guessing it came with a rig, and was immediately put in the drawer. $30

Hand Microphone with 8 pin modular plug for Kenwood:

This hand mic says "Electret Condenser Mic" on it, with no model number.

This mic has the mic and PTT switch; it also has up/down switches on the top. There are four "extra" buttons labeled Call, VFO, MR, and PF. What these four buttons do depends on the rig. They will function on some rigs, and are completely useless on others. There is also a "Lock" switch on the back.

This mic has the 8 pin modular plug (like a computer LAN) on it, as used by the Kenwood TM-261, TM-271 and others. It has been tested on a TM-261, but probably works on many others.

This mic works fine, and looks like new. I am guessing it came with a rig, and was immediately put in the drawer. $30

Coaxial Cable "Jumpers" for your shack:

I have a good quantity of coaxial cable "jumpers" available. These are short lengths of RG-8 coax, with a PL-259 connector on both ends. I have a variety of lengths from under a foot to about 5 feet long. Send me the lengths that you would like, and I will see how close I can come.

Although most are RG-8 (the larger, approximately 0.4 inch coax that takes full legal power), I also have some that are RG-8 X (the medium coax approximately 1/4 inch in diameter). Please ask for RG-8 X, if that is what you would like.

All jumpers are $6 each.

Coaxial Lightning Arrestors:

These lightning arrestors are made to be inserted in to your coaxial feedline, to help reduce lightning damage.

Cushcraft LAC-2
Still in the original blister pack, unused.
This one has an SO-239 (female UHF) connector on each end, so that a PL-259 can be screwed into it. $15

Cushcraft LAC-1
No markings on this to confirm the model number, but it looks like the Cushcraft "Blitz Bug".
It has an SO-239 on one end and a PL-259 on the other end (female UHF on one end and male on the other). $10

High Power HF 1 to 1 Balun:

This is Palomar's very high power 1 to 1 HF balun. I am not sure if it is rated at 3000 watts or 5000 watts, but it is the big one. It is 4 inches in diameter and about 3 1/2 inches high. It has an SO-239 connector on the bottom, that has a gold plated center pin, and silver plated outer. It has "pigtails" coming out of the top to connect to your balanced antenna.

It is designed so that it can easily be used with a beam. It has a bracket from each side, and then a U bolt that can attach to up to a 2 1/2 inch diameter mast or boom. All hardware is stainless steel. This is a quality balun!

This one works fine and looks fine. $60

Linear Amp Switching Cable for Kenwood Rigs:

This cable goes from a Kenwood transceiver to a linear amplifier to switch the amp from transmit to receive.

One end has a DIN connector, as is used with most
Kenwood rigs. The other end has an RCA phono plug,
as used by most linear amplifiers.

Before using this cable, please check the switching
capabilities of your transceiver.

This cable has one coax for switching the relay. $15

Operator's Manual for Kenwood (Trio) TS-440 S:

This is a quality reproduction with a "comb" binding
that has been done by one of the professional reproduction
houses. W7FG I think.

This one has a plastic protector on the front, and is
in very nice condition. It includes schematic diagrams.
$18

Original Manuals for Kenwood equipment:

All manuals are in very nice condition, for Kenwood equipment.
All are original manuals only.

Operating manual for TS-130 S/V HF xcvr $20
Operating manual for TM-2570/2550/2530 2 m xcvr $15
Operating manual for TW-4000 dual bander $15
Service manual for TW-4000 dual bander $20
Operating manual for TW-4100 dual bander $15
Operating manual for TH-21 HT for 2 m $8
Operating manual for TH-225, 2 m HT $12
Operating manual for TH-235, 2 m HT $15
Operating manual for TH-241/441/541 mobile FM transceivers
...For 2 m, 440 MHz, & 1200 MHz. $12
Operating manual for TM-221/421 mobile $15
Operating manual for TR-2400, 2 m HT $12
Service manual for TR-2600, 2 m HT $12
Operating manual for TR-7400, 2 m xcvr $8

Kenwood TM G-707 operating manual in Spanish:
Spanish version of the Operating Manual
for the TM G-707 dual band transceiver. New $10
All other manuals are English.

LF-30A Low Pass Filter $5
MC-30 & MC-35 hand microphones $5
MC-85 desk microphone $4
PB-1, PB-2, PB-3, & PB-4 battery packs $3
PS-6 power supply $6
SMC-24 speaker mic $4
SMC-25 speaker mic $4
SP-430 speaker $2
SP-820 Speaker $2

These are original Kenwood manuals only.

I also have many other accessories available such as many different types of microphones, HTs, HF, VHF and UHF rigs, HF and VHF/UHF antennas, and many miscellaneous accessories. Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

Yaesu Items For Sale:
Speaker/Phone Patch, 440 MHz FM Transceiver, Two meter FM transceiver, Communications Speakers, HF transceiver, Coax Jumpers, Microphones, HT accessories, and more

Yaesu "Landliner" SP-101 P Speaker and Phone Patch:

This is a nice speaker that has a phone patch added to it. Its styling matches the FT-101 line, but it looks nice with most any rig. It has a VU meter on it, as well as controls for both transmit and receive gain.
I realize many people do not use a phone patch much any more, but even if you do not use the phone patch portion, you still have an excellent speaker.

This particular unit works fine, and looks extremely nice as well. It is in its original box.

With paper work for $90.

Yaesu FT-720, UHF 440 MHz FM Transceiver:

The FT-720 is a synthesized rig covering 440 to 450 MHz FM. It has about 10 watts out, with a good receiver. It is especially immune to intermod. This unit is built like a tank. Of course it has memories, memory scan, etc. The mic has up/down buttons.

The FT-720 came in several configurations. A VHF (2 meter) version, a UHF (440 MHz) version, and a dual band version that used the first two units, plus a switch box. This is the UHF unit only.

The rig includes a connector for PL subaudible tones. This unit has a Comm Specs SS-32 attached to it, with the DIP switches replaced with toggle switches, so that the tone can be set, and changed easily.

This one works fine, and looks great. It includes the chrome bail and paper work for $100.

Yaesu FT-227 RA "Memorizer" 2 meter FM transceiver:

The FT-227 is an FM rig with about 12 watts output (1.5 W in low power) covering the entire 2 meter band. This is the "A" model that has four memories. It has provisions for installing a CTCSS subaudible tone module.

This rig was used on packet, and will make an excellent APRS or packet rig. It works fine and looks fine. Since it was used on packet, there is no microphone included, but it does include power cord and paper work for $40.

Communications Speakers:

All have 3.5 mm (1/8 inch) mono plugs.

Realistic 40-1280
About 4 inch cube, this wood grain speaker is rated for up to 7 watts, and has a 8 ohm impedance. It works fine, sounds good, and looks nice. $18

Realistic 21-549 A
This one is about 4 inches square but only about 2 inches deep. It is rated for 5 watts, has an 8 ohm impedance, and is listed as a 300 to 3000 Hz frequency response, making it ideal for communications. It is black in color, looks great, and sounds great. $18

General Electric
This speaker is about 6 by 4 inches, and about 3 inches deep. It is black with a gimbal mount. 4 ohm impedance. $15

Poly Planar MB-41
This cream colored 4 inch square speaker is about 2 inches thick and is rated at 10 watts. It has a mobile mounting bracket. $15

Yaesu FT-990 Deluxe HF Transceiver
The Yaesu FT-990 features multiple direct digital synthesizers for pure local signals for high performance. The triple-conversion, general coverage receiver tunes from 100 kHz to 30 MHz. It has an automatic antenna tuner. A 500 Hz CW filter is built in. It has keypad entry. Power output is adjustable up to 100 watts output (25W AM). The top panel provides access for special user adjustments. A power supply for operation from 120 V AC is built in, or it can be powered by 13 V DC at about 22 amps.

Features:
General coverage receiver, tunes continuously from 100 kHz to 30 MHz
Modes: AM, USB, LSB, CW, FM, FSK
Iambic CW keyer
Automatic Antenna Tuner
Multi-function illuminated analog S-meter
Computer Aided Transceiver (CAT) allows computer control via a serial cable with a DIN jack
Notch filter, IF shift, noise blanker, and a digitally switched capacity audio filter
90 Memories
Dual VFOs

Built-in AC Power Supply
100 Watts Power
Noise Reduction
Digital Filtering
IF Notch
Manual and Auto AGC

This particular unit works fine, and looks very close to perfect. This is a terrific radio. $900

Deluxe Desk Microphone:

This is a great looking and great performing low impedance desk mic. It has a quality Shure 600 ohm cartridge in it (the cartridge alone is over $40 new), with a very nice black die case base and neck, with a chrome grill. It looks somewhat like a Shure 444, but no plastic on this one -- all metal!

This one has stripped and tinned ends on it, which means any connector can easily be added.

This one looks like new, and works the same. It has a long (approx 6 foot) cord. $70

Coaxial Cable "Jumpers" for your shack:

I have a good quantity of coaxial cable "jumpers" available. These are short lengths of RG-8 coax, with a PL-259 connector on both ends. I have a variety of lengths from under a foot to about 5 feet long. Send me the lengths that you would like, and I will see how close I can come.
All jumpers are $6 each.

Coaxial Lightning Arresters:

These lightning arresters are made to be inserted in to your coaxial feedline, to help reduce lightning damage.

Cushcraft LAC-2
Still in the original blister pack, unused.
This one has an SO-239 (female UHF) connector on each end, so that a PL-259 can be screwed into it. $15

Cushcraft LAC-1
No markings on this to confirm the model number, but it looks like the Cushcraft "Blitz Bug".
It has an SO-239 on one end and a PL-259 on the other end (female UHF on one end and male on the other). $10

High Power HF 1 to 1 Balun:

This is Palomar's very high power 1 to 1 HF balun. I am not sure if it is rated at 3000 watts or 5000 watts, but it is the big one. It is 4 inches in diameter and about 3 1/2 inches high. It has an SO-239 connector on the bottom, that has a gold plated center pin, and silver plated outer. It has "pigtails" coming out of the top to connect to your balanced antenna.

It is designed so that it can easily be used with a beam. It has a bracket from each side, and then a U bolt that can attach to up to a 2 1/2 inch diameter mast or boom. All hardware is stainless steel. This is a quality balun!

This one works fine and looks fine. $60

Antennas West "Maxi-J" 2 meter antenna:

The "Maxi-J" is a specialized version of the J pole antenna, and is made by Antennas West. It is made to be used for portable applications, although it could be used in a more permanent situation. Basically, the antenna needs only one support; a suction cup is included so that it can be attached in many places. Of course it can also be hung from a tree limb in a portable situation. It is very versatile. It provides a significant amount of gain, compared to the normal rubber duck antenna used on an HT.

The radiating portion of the antenna is just under six feet long, with an additional six feet of coax, that terminates in a BNC connector.

This particular antenna works fine and looks very close to new. It includes paper work, plus a carrying case, for $25.

Yaesu YM-31 hand microphone
The Yaesu YM-31 is a hand mic with a round 6 pin connector. Apparently it is either similar or the same as the MH-25A6j (not the MH-25 with the 8 pin connector). It is a 600 ohm impedance hand microphone, and has a Monitor on-off switch on the back. It should be compatible with any of the Yaesu rigs that uses the round 6 pin connector. It looks very similar to the Yaesu MH-1.
This one works fine and looks extremely nice. $25

Cariole Headphones:
This is a nice pair of headphones of the type that completely cover your ear. These are true monophonic headphones, and not a pair of stereo headphones that have been converted to mono. They have a molded mono 1/4 inch plug on them.
These work fine, and look extremely nice. $20

Yaesu HT Accessory Items:

Pryme Speaker Mic
This is the equivalent of the Yaesu MH-34.
It fits the Yaesu HTs with the 4 conductor 1/8 inch
(3.5 mm) plug, such as the VX-1, VX-3, VX-5, etc.
It looks like it has not been used. $28

Belt Clip for Yaesu FT-207, with hardware. $8

Wrist Strap for Yaesu FT-209, and others $4

Small Power Supplies:

Radio Shack 22-124 Regulated Power Supply

This supply is regulated and will furnish 13 V DC at up
to 2.5 amps. It is ideal for the lower powered 2 meter
rigs, or to get rid of that huge collection of wall warts.

This one works fine and looks extremely nice.
I do not find a scratch on it. $20

Micronta 22-120 A Regulated power supply:

This supply is rated at 2.5 amps at 13 V DC. It is
well regulated. It has a switch and LED power light
on the front, with a circuit breaker and output terminals
on the back. The case (left and right side and top) is
basically all a heat sink, so it should cool the
regulator well.

This one works fine and looks like new. No scratches. $30

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, and many miscellaneous accessories.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

2551. Looking for a robust radio for a simplex IRLP node

Yahoo group: amatuerradioswapfest
Date: 2012-07-05 23:50:16 UTC
From: John Murphy
Topic: 2551 Message: 2551

I am looking for a robust radio (MASTR II was recommended) as in the next 6-7 months I am putting up a simplex IRLP node and wish to connect to the WIN System, which is a very busy system. The radio should have apprx 50 watts out and be completely usable out of the box (with the exception of frequency setting I am planning on using 147.550). Price should be reasonable as I will only have 200-300 dollars to spend.

Thanks in advance for any help

From: Ken Simpson, W8EK
Topic: 2552 Message: 2552

TenTec Items For Sale --
Power Supplies, Antenna Tuner, Microphone, Coaxial
"Jumpers", Connectors. and more For Sale:

TenTec 260 Power Supply:

The TenTec Model 260 power supply came in two versions --
one matches the Corsair I dark gray color. This is the later
version which is the lighter gray/tan color that matches
the Corsair II, Paragon, Omni VI, and others.

The supply has an 8 ohm speaker, and will power most any HF rig.

This particular unit works 100%, and looks close to the same.
I can find one very small scratch on the right side that one
can only see if the light is right. Otherwise it looks perfect.

Paper work is included for $150.

TenTec Switching Power Supply:

"Switcher / 25" 25 amp switching power supply:
This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel
around it. It is in a case that is the same size as a 243
remote VFO. It has an ammeter on the front, along with
Switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,
but says "Switcher/25" on it. It is very quiet, and well
shielded, and does not produce any electrical noise that
I could find. $170

TenTec 229 antenna tuner:

This tuner will handle full legal power, and features a
roller inductor, so you can get an exact match. It uses
an "L" match instead of a "T" match, which means there is
only one spot that will give you the correct match. With
the "T" match, one can get a match at several different
points, but only one of these points is the correct one.
The "L" match is also more efficient. Electrically, it
is the same as the 238, 238 A, 238 B, 238 C, 229 A,
229 B, and the 4229 kit.

There is also a built in wattmeter with full scale reading
of 200 and 2000 watts. It also has an SWR bridge with
lighted meter, plus a 4 position antenna switch.

It can be used on any HF frequency, including the WARC bands, since it is continuously adjustable. It includes a built in internal balun, so open wire can be used, if desired.

Cosmetically, this unit is the color of the earlier Omni series (Omni 546, series A, B, and C) with the black vinyl covering, and nice aluminum trim around the front.

This particular unit functions 100%, and looks perfect. I can not find a scratch on it.

Paper work is included for $320.

Deluxe Desk Microphone:

This is a great looking and great performing low impedance desk mic. It has a quality Shure 600 ohm cartridge in it (the cartridge alone is over $40 new), with a very nice black die case base and neck, with a chrome grill. It looks somewhat like a Shure 444, but no plastic on this one -- all metal!

This one has stripped and tinned ends on it, which means any connector can easily be added.

This one looks like new, and works the same. It has a long (approx 6 foot) cord. $70

Coaxial Cable "Jumpers":

I have a good quantity of coaxial cable "jumpers" available. These are short lengths of RG-8 coax (the larger, approximately 0.4 inch coax that takes full legal power), with a PL-259 connector on both ends. I have a variety of lengths from under a foot to about 3 feet long. Send me the lengths that you would like, and I will see how close I can come.

All jumpers are $6 each.

Coaxial Lightning Arresters:

These lightning arresters are made to be inserted in to your coaxial feedline, to help reduce lightning damage.

Cushcraft LAC-1
No markings on this to confirm the model number, but it looks like the Cushcraft "Blitz Bug".
It has an SO-239 on one end and a PL-259 on the other end (female UHF on one end and male on the other). $10

Coax connectors and adapters:

Prices are per connector. Several of each are available. Most are unused.

UHF Right angle 90 degree elbow connector $3

UHF double female "Barrel connector" $3

UHF "Bulkhead Connector" - Double female, as above, but for
mounting thru a window, siding, etc. about 3 inches long $6

UHF double male connector $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male to BNC female $5

BNC male for coax cables
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T", two female and one male $3

"N" Connector, Double Male $8

Cables for CW keyers and keys:

Cable for paddles
About 3 feet long, and with a 1/8 inch (3.5 mm) stereo
connector on the end, like used by most rigs. $8
As above, but 1/4 inch plug. $8
As above, with 1/4 inch GOLD plated plug. $15

Cable for straight key
About 3 feet long, with a mono 1/8 inch (3.5 mm) phone
plug on it, as used with a straight key. $5
As above, but 1/4 inch plug. $5

I also have many other accessories available such as many
different types of microphones, HTs, VHF and UHF rigs,
antennas, etc. Just too many things to list here.
Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

2553. FOR SALE: RARE COMMANDER II VHF-144 2 METER 144-148 MHz KW + VHF AMPLIFIER

Yahoo group: amatuerradioswapfest
Date: 2012-07-18 14:13:39 UTC
From: n3dg
Topic: 2547 Message: 2553

High Power 2 Meter Amplifiers are quite rare for serious DX, Moonbounce, EME, E Skip, Tropo, Aurora, Moonbounce, Contests, or ragchewing long-distance on SSB or FM.

Made by renown Command Technologies of Bryant, Ohio, Commander II is a Very Rare & Rugged 1 KW+ All Mode 2 Meter Linear Amplifier supporting 144-148 MHz.
Only 10-15 watts drive nominal is needed and 30 watts will yield 1 KW SSB/CW with its reliable Eimac 3CX800A7 Final and with all Silver-Plated RF Components, Stripline Tank Circuit, Dow Key Relay all in a compact attractive cabinet measuring only 14.75"W x 14.75"D x 6"H and powered by either 120 Volts AC or 240 Volts AC (now wired for 240 Volts AC, easy to change to 120 Volts AC).

Specifications and Manual at:
http://www.palstar.com/manual_CommanderII_old.pdf

Commander II is absolutely Mint, Like New, just sat on the shelf not used and now need the room for HF gear.
Includes Original Commander II Shipping Cartons (double-boxes for RF Deck), Owners Manual and 240 Volt @ 20 Amp AC Plug.
Photographs upon request.

New list price is over $3000, yours for $2000 plus shipping.

2554. Many Miscellaneous Items FS

Yahoo group: amatuerradioswapfest
Date: 2012-07-18 15:55:47 UTC
From: Ken Simpson, W8EK
Topic: 2554 Message: 2554

Miscellaneous Items For Sale:
Power Supplies, Speakers, Headphones, 440 MHz
transceiver, 2 meter transceiver, Lightning
Arrestors, Wattmeters, Linear Amp Switching
Cable, and many other miscellaneous things:

TenTec 260 Power Supply:

The TenTec Model 260 power supply came in two versions -- one
matches the Corsair I dark gray color. This is the later
version which is the lighter gray/tan color that matches
the Corsair II, Paragon, Omni VI, and others.

The supply has an 8 ohm speaker, and will power most any HF rig.

This particular unit works 100%, and looks close to the same.
I can find one very small scratch on the right side that one
can only see if the light is right. Otherwise it looks perfect.

Paper work is included for $150.

Yaesu "Landliner" SP-101 P Speaker and Phone Patch:

This is a nice speaker that has a phone patch added
to it. Its styling matches the FT-101 line, but it looks
nice with most any rig. It has a VU meter on it, as well
as controls for both transmit and receive gain.
I realize many people do not use a phone patch much any
more, but even if you do not use the phone patch portion,
you still have an excellent speaker.

This particular unit works fine, and looks extremely nice
as well. It is in its original box.

With paper work for $90.

Communications Speakers:

All have 3.5 mm (1/8 inch) mono plugs.

Realistic 40-1280
About 4 inch cube, this wood grain speaker is rated for up
to 7 watts, and has a 8 ohm impedance. It works fine,
sounds good, and looks nice. $18

Realistic 21-549 A
This one is about 4 inches square but only about 2 inches
deep. It is rated for 5 watts, has an 8 ohm impedance, and

is listed as a 300 to 3000 Hz frequency response, making it ideal for communications. It is black in color, looks great, and sounds great. $18

General Electric
This speaker is about 6 by 4 inches, and about 3 inches deep. It is black with a gimbal mount. 4 ohm impedance. $15

Cariole Headphones:

This is a nice pair of headphones of the type that completely cover your ear. These are true monophonic headphones, and not a pair of stereo headphones that have been converted to mono. They have a molded mono 1/4 inch plug on them.

These work fine, and look extremely nice. $20

Yaesu FT-720, UHF 440 MHz FM Transceiver:

The FT-720 is a synthesized rig covering 440 to 450 MHz FM. It has about 10 watts out, with a good receiver. It is especially immune to intermod. This unit is built like a tank. Of course it has memories, memory scan, etc. The mic has up/down buttons.

The FT-720 came in several configurations. A VHF (2 meter) version, a UHF (440 MHz) version, and a dual band version that used the first two units, plus a switch box. This is the UHF unit only.

The rig includes a connector for PL subaudible tones. This unit has a Comm Specs SS-32 attached to it, with the DIP switches replaced with toggle switches, so that the tone can be set, and changed easily.

This one works fine, and looks great. It includes the chrome bail and paper work for $100.

Yaesu FT-227 RA "Memorizer" 2 meter FM transceiver:

The FT-227 is an FM rig with about 12 watts output (1.5 W in low power) covering the entire 2 meter band. This is the "A" model that has four memories. It has provisions for installing a CTCSS subaudible tone module.

This rig was used on packet, and will make an excellent APRS or packet rig. It works fine and looks fine. Since it was used on packet, there is no microphone included, but it does include power cord and paper work for $40

Linear Amp Switching Cable for Kenwood Rigs:
This cable goes from a Kenwood transceiver to a

linear amplifier to switch the amp from transmit
to receive.

One end has a DIN connector, as is used with most
Kenwood rigs. The other end has an RCA phono plug,
as used by most linear amplifiers.

Before using this cable, please check the switching
capabilities of your transceiver.

This cable has one coax for switching the T/R relay. $15

Coaxial Lightning Arrestors:

These lightning arrestors are made to be inserted in to
your coaxial feedline, to help reduce lightning damage.

Cushcraft LAC-1
No markings on this to confirm the model number, but it
looks like the Cushcraft "Blitz Bug".
It has an SO-239 on one end and a PL-259 on the other end
(female UHF on one end and male on the other). $10

HF and VHF SWR Bridge:

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter

This unit covers from 3 to 150 MHz, covering HF,
6 meters,and 2 meters. SO-239 connectors in and out.

This one works fine, and looks extremely nice. I do not see
any scratches on it, but it does have a previous owner's
name on it.

In its original box with original instructions. $25

Heath HM-2141 Dual Meter VHF Wattmeter / SWR Bridge:

The HM-2141 is the VHF version of the more popular
HM-2140 wattmeter and SWR Bridge, and has the same
features, except it covers from 50 to 175 MHz.

This is the wattmeter that has two meters on it, so it
reads both forward and reflected power at the same time.
It also has a "Peak" position, so it can capture the peak
power, in essence reading PEP output. Forward scales
are 30 or 300 Watts, and reverse are 10 W or 100 W,
plus SWR scale. It covers 50 to 175 MHz. It needs a 9
volt battery for "peak" operation. It has a remote
sensor with about 3 feet of cable.

This particular meter works 100%. The outer case (top
and sides) has been repainted black hammertone, and
looks very nice.

With paper work for $100.

Small Wattmeter:

This wattmeter is made by Gold Line, and is designed for
27 MHz. It reads 5 watts full scale. It is small --
only about 3 x 2 x 2 inches, with SO-239 connectors on
each end.

This one works, but I can not vouch for its accuracy
on all frequencies. I would think it should be fine
for 10 or 12 meters, if not more. It looks fine. $8

Icom HM-4 Hand Microphone:

The Icom HM-4 is a 600 ohm dynamic hand microphone that can
be used on most rigs requiring a low Z mic. It is a dark
gray color, with "Icom" on the front.

This one works fine, and looks great. It has stripped
and tinned ends, so that any connector can easily be added.
$22

20 meter trap:

This is an LC "Trap" to eliminate 20 meter interference.
Nominal frequency is 14.250 MHz, but it has a variable
capacitor to adjust it for best signal rejection. It
is in a minibox about 5 x 2 1/2 x 2 1/2 inches, with
an SO-239 connector on each end. It looks as if it
would handle 100 watts, but not a linear amplifier.

A note on it says "14.250 MHz Trap. Use on 10 m and 15 m"
$10

"Y" Cable for AEA PK-232 Digital Controller

This is the cable that came with the original PK-232's.
One end plugs into the serial port of your computer.
There are two other connectors at the opposite end.
One goes to the PK-232, and the other has a connector
for a parallel printer.
This cable is like new. $20

AEA AC-1
This unit supply 12 V DC at up to 1 amp.
It can be used with the AEA PK-232, PK-88 or others.
It has a 2.1 mm coaxial power plug, with the center
positive, so it can be used on many different
things that require about 12 V DC at up to an amp,
such as keyers, antenna tuners, etc. $14

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter to reduce harmonic interference. All have SO-239 connectors, and are 50 ohm filters.

This first one works on 6 meters as well as HF:

Drake TV-1000-LP Low pass TVI filter
This is the filter that may also be used on the low end of six meters, as well as HF. It is good for 1000 W "average" below 30 MHz, and about 200 W up to 52 MHz. With paper work for $30.

Drake TV-1000
LP Filter as above, which functions fine electrically, but looks ugly. With paper work. $25

Others for HF:

B & W FL-10/1500
This filter cuts off just above 10 meters, and handles 1500 Watts. It is the latest model B&W filter.
In very nice condition, it looks very close to new. $40.

Johnson 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut off frequency of 45 MHz and 75 db of attenuation.
It is rated to take 1000 Watts of AM, or 5000 Watts PEP SSB. With mounting bracket. $30

Para Dynamics PDC 1089
This filter is rated at a full Kilowatt, up to 30 MHz.
5 x 6 x 2 inch black box, instead of the more familiar long enclosure. It looks like new. $25

Bencher YA-1, high power, low pass TVI filter
If you need a more heavy duty filter for the output of your amplifier, this one is ideal. It will take full legal power plus, and has at least 80 db signal attenuation at TV channel 2.This one works great, and looks close to new.
Bencher currently sells these for about $90. Only $60.

Small Power Supplies:

Radio Shack 22-124 Regulated Power Supply

This supply is regulated and will furnish 13 V DC at up to 2.5 amps. It is ideal for the lower powered 2 meter rigs, or to get rid of that huge collection of wall warts.

This one works fine and looks extremely nice.
I do not find a scratch on it. $20

Micronta 22-120 A Regulated power supply:

This supply is rated at 2.5 amps at 13 V DC. It is well regulated. It has a switch and LED power light

on the front, with a circuit breaker and output terminals
on the back. The case (left and right side and top) is
basically all a heat sink, so it should cool the
regulator well.

This one works fine and looks like new. No scratches. $30

KemTronics Power Supply:

This power supply is in a slopped enclosure that is made
to set your rig on top, at an angle for good viewing and
sound. It is good for about 3 amps, or to put it another
way, would be great for powering 2 meter rigs in the 10
to 15 watt category.

This one is a "Tech Special". It produces no output
voltage. It looks fine, however. $5

Books about DXing:

All are in "like new" condition.
It appears they have never been read!

Secrets of Ham Radio DXing
by Dave Ingram, K4TWJ - Tab Books
Hardbound First Edition $12

DX Power - Effective Techniques for the Radio Amateur
by Eugene Tilton, K5RSG - Tab Books and ARRL
First Edition $10

Repeater Directories:

ARRL Repeater Directory
1985-86 edition
Like New Condition. $4

US Repeater Map Book
by Art Sci, Inc.
1992-93 Edition
Instead of listing the repeaters,
this book shows them on a map.
Like New. $6

I also have many other accessories available such as many
different types of microphones, HTs, various transceivers,
HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

2555. ROHN 25 TOP TOWER SECTION 25AG2

Yahoo group: amatuerradioswapfest
Date: 2012-07-20 15:28:03 UTC
From: n3dg
Topic: 2555 Message: 2555

ROHN 25AG2 Ten Foot Top Tower Section in Excellent Condition just kept in garage storage. ROHN R-25AG 25G standard top section features the same 12 ½-in face and 5/16-in solid serpentine Zig-Zag bracing as the standard 25G tower sections and it also comes with a tapered top and integrated mounting pipe. The pipe, measured from the apex of the side rails, is 2 ¼ inches OD x 18 inches.

It consists of 16 gauge walls with 5 bays of bracing and swaged, double-bolted connections. The Pinnacle of this Section is Capped with a 14 AWG (2.25 inches O.D.) Tube, protruding 18.00 inches above apex of side rails. This Rohn section is used to top off the 25G tower. The 25AG2 is available in the standard 9 foot 9 inch section length. This tower uses double bolted joints which are proven to be the best method of joining tower sections for sturdiness and dependability. Featuring a 12-1/2" equilateral triangular design, the 25AG is constructed of extra heavy duty 1-1/4" steel tubing side rails with continuous solid steel rod bracing. Each 9' section is shipped containing all required nuts and bolts inside one leg.

You can connect the 10 foot long R-25AG2 to any standard ROHN 25G tower section and the entire section has been completely hot-dip galvanized for years of worry-free corrosion protection and it can be used in guyed, self-supporting and bracketed tower configurations

Specifications at:
http://www.3starinc.com/manuals/25G-11.pdf

New list price $300, yours for $100 Cash & Carry in near Philadelphia.

2556. Hustler Antennas FS

Yahoo group: amatuerradioswapfest

From: Ken Simpson, W8EK
Topic: 2556 Message: 2556

Hustler Antennas For Sale:

Hustler 4BTV HF Vertical Antenna:

The 4BTV is a vertical antenna that covers 10, 15, 20, and 40 meters. It can also cover 75/80 meters by adding an RM-75 resonator (see below).

This one is in extremely good shape. It actually still shines! No corrosion evident. The actual base shows very minor signs of being out in the weather, but the silent key who used it was in a restricted community, and took the top part out of the garage only when he wanted to get on the air.

Paper work is included for $120.

Hustler RM-75 resonator - standard version
(can be used to add 75 meters to 4BTV above) $19

I would prefer pickup near Ocala, Florida, just off of I-75. It will easily fit inside a car. It is possible to ship it, but the cost is high due to it being oversize. Obviously, shipping is not included in the price.

Hustler SF-2 Antenna for 2 meters:

This is a 5/8 wave antenna with about 3 db gain over a quarter wave antenna. It is about 4 feet long, and is made to screw into a standard 3/8 inch 24 thread mount. It works fine and looks fine. $15

Large, heavy duty magnetic mount
This large mag mount will take any antenna with a standard 3/8 inch 24 thread connector. It is very heavy duty, about 5 inches in diameter, with a long coax for $22.

Buy both the SF-2 antenna and the mag mount together for $35. This would make a tremendous, very heavy duty, 2 meter antenna.

VHF Triband Mobile Mag Mount Antenna:

This mobile antenna is a VHF Triband antenna covering the 6 meter, 2 meter, and 440 MHz ham bands. This makes it ideal for some of the newer multiband and dual band rigs available today.

The antenna is about 3 feet long and has a very strong magnet. It has a long coax cable with a PL-259 connector.

It works great, and looks very close to new. $75

Hustler mobile mast:

Hustler MO-3.5 mobile mast.
Hustler makes the MO-3 mast for use with their series of mobile HF resonators. They also make an MO-4. The MO-3 is 54 inches long, and the MO-4 is a "shorty" only 22 inches long. This particular mast has been modified and is between the two -- it is 34 inches long. It would be ideal if you have the room for slightly more length than the MO-4, but not enough for the MO-3. Of course this one would result is more efficiency than the MO-4. $18

Hustler "Standard" mobile resonators:

Hustler RM-75 resonator - standard version $19

Mobile Antenna Mounts:

Large, heavy duty magnetic mount
This large mag mount will take any antenna with a standard 3/8 inch 24 thread connector. It is very heavy duty, about 5 inches in diameter, with a long coax for $22.

NMO "Button" Mount
This mount fits into a 3/4 inch hole, and will then take any of the many NMO types of antennas. Coax included.
It is in close to new condition. $12

Coaxial Lightning Arrestors:

These lightning arrestors are made to be inserted in to your coaxial feedline, to help reduce lightning damage.

Cushcraft LAC-1
No markings on this to confirm the model number, but it looks like the Cushcraft "Blitz Bug".
It has an SO-239 on one end and a PL-259 on the other end (female UHF on one end and male on the other). $10

Coaxial Cable "Jumpers":

I have a good quantity of coaxial cable "jumpers" available. These are short lengths of RG-8 coax (the larger size, about 0.4 inches in diameter), with a PL-259 connector on both ends. I have a variety of lengths from under a foot to about 3 feet long. Send me the lengths that you would like, and I will see how close I can come.

All jumpers are $6 each.

Coax connectors and adapters:

Prices are per connector.
Several of each are available.
Most are unused.

SPECIAL: Buy 5 connectors and take 10% off.
Buy 10 or more connectors and take 20% off.

UHF Right angle 90 degree elbow connector $3

UHF double female "Barrel connector" $3

UHF "Bulkhead Connector" - Double female, as above, but for
mounting thru a window, siding, etc. about 3 inches long $6

UHF double male connector $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male to BNC female $5

BNC male for coax cables
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T", two female and one male $3

"N" Connector, Double Male $8

I also have many other accessories available such as many
different types of microphones, HTs, various transceivers,
HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

2559. looking for a SSB transmitter

Yahoo group: amatuerradioswapfest
Date: 2012-07-22 16:44:24 UTC
From: dalepavlicek
Topic: 2559 Message: 2559

Looking for a Heath, HX-20 or a SB-400/401. Maybe a HX-10 if close enough to pick up...Florida. Hopefully in operating condition,Will consider all, will consider any other HF ssb transmitter. Please get back off list.
thanks
dale wt4t

2560. HF Antennas FS

Yahoo group: amatuerradioswapfest
Date: 2012-07-26 20:06:15 UTC
From: Ken Simpson, W8EK
Topic: 2560 Message: 2560

HF Antennas and related items For Sale --
"Double Bazooka" Antenna, Doublet Antenna, Vertical
Antenna, Mobile Mast, Antenna Switch box, Lightning
Arrestors, Connectors, SWR Bridges, Low Pass TVI
Filters, etc.

"Double Bazooka" Broadband Dipole Antennas:

These antennas are sometimes call "Double Bazooka" dipoles,
but also go by other names. They are made from RG-8 coax
instead of just wire. They are fed differently, with
both halves of the coax used. The result is an antenna
that is more broad banded than a regular wire dipole,
permitting one to cover all, or most, of a ham band with
a reasonable SWR. Of course these can be put into an
inverted V configuration as well. Some say these have
gain, and some say they do not.

I have antennas for two different bands:

40 meter antenna as described above (approx 66 feet long)
with about 25 feet of RG-8 coax feedline attached, terminated
in a PL-259 connector. $50

10 meter version, about 16 feet long. No feedline on this
one, but there is a place for you to attach your own coax.
$15

Buy both of the above for $60.

HF Doublet Antenna:

Doublet antenna consisting of about 110 feet of wire, with
center insulator, 2 end insulators, and 2 center supporting
insulators. This antenna is made to be fed with "open wire"
450 ohm transmission line, and used with an antenna tuner.
It should be able to tune from 80 thru 10 meters, with the
proper tuner. $20.

Hustler 4BTV HF Vertical Antenna:

The 4BTV is a vertical antenna that covers 10, 15, 20, and 40
meters. It can also cover 75/80 meters by using an RM-75
resonator.

This one is in extremely good shape. It actually still shines!
No corrosion evident. The actual base shows very minor signs
of being out in the weather, but the silent key who used it

was in a restricted community, and took the top part out of
the garage only when he wanted to get on the air.

Paper work is included for $120.

I would prefer pickup near Ocala, Florida, just off of I-75.
It will easily fit inside a car. It is possible to ship it,
but the cost is high due to it being oversize. Obviously,
shipping is not included in the price.

Hustler mobile mast:

Hustler MO-3.5 mobile mast.
Hustler makes the MO-3 mast for use with their series of
mobile HF resonators. They also make an MO-4. The MO-3
is 54 inches long, and the MO-4 is a "shorty" only 22
inches long. This particular mast has been modified and
is between the two -- it is 34 inches long. It would be
ideal if you have the room for slightly more length than
the MO-4, but not enough for the MO-3. Of course this
one would result is more efficiency than the MO-4. $18

Heath HD-1481 Antenna Switch box:

The Heath HD-1481 is a remote antenna switch for switching
up to four antennas. Power is provided thru the coax, so
no control cable is needed.

This is the control box only that is used inside the shack.
It does not include the outside box. This came from a silent
key and we can not find the outside box. The inside box works
fine, and looks very close to new.

Paper work is included for $35.

Lightning Arrestors:

These lightning arrestors are made to be inserted in to
your coaxial feedline, to help reduce lightning damage.

Cushcraft LAC-1
No markings on this to confirm the model number, but it
looks like the Cushcraft "Blitz Bug".
It has an SO-239 on one end and a PL-259 on the other end
(female UHF on one end and male on the other). $10

Alliance HD-73 Rotor "Lower Mast Bracket":

This is the complete bracket that attaches to an Alliance
HD-73 rotor, so that it can be mounted on a mast, outside
of the tower.

This includes the two bracket pieces, plus all of the
hardware, including all washers, lock washers, and nuts.

The hardware is all stainless steel, and is in exceptionally nice shape. The hardware is probably worth the price of the entire package!

Actually, it appears that the "upper bracket" on the HD-73 is the same as the lower bracket, so if you have an upper bracket that is messed up, this might be just what you need to repair it. $20

HF and VHF SWR Bridges:

This unit covers from 3 to 150 MHz, covering HF, 6 meters,and 2 meters. SO-239 connectors.

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see any scratches on it, but it does have a previous owners name on it. In its original box with original instructions. $28

Surge Station and Noise Filter:

This unit is still in its Radio Shack (#61-2327) box, never used. It says it is for a notebook computer, but it can be used with anything. It has connections for a computer network (LAN, RJ-45 connector), the AC power, and for phone lines (RJ-11 connector), and provides noise filtering and surge suppression on each. It even includes $25,000 insurance against surges. Maximum power rating is 1875 Watts, or 15 amps. Noise filtering is listed at 40 db.

This unit is new, in its original box, with its original paper work. $12

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter to reduce harmonic interference. All have SO-239 connectors, are 50 ohm filters, and include paper work.

Bencher YA-1, high power, low pass TVI filter
If you need a more heavy duty filter for the output of your amplifier, this one is ideal. It will take full legal power plus, and has at least 80 db signal attenuation at TV channel 2.This one works great, and looks close to new. Bencher currently sells these for about $90. Only $60.

Bud LF-601 low pass filter
This filter is adjustable for best attenuation in your particular situation, and also to more closely match your specific impedance. It cuts off at about 52 MHz (if adjusted as such) so it can be used on 6 meters, and will handle 1500 watts. $35

Drake TV-1000-LP Low pass TVI filter
This is the filter that may also be used on the low end of six meters, as well as HF. It is good for 1000 W "average" below 30MHz, and about 200 W up to 52 MHz. With paper work for $30.

Drake TV-1000
LP Filter as above, which functions fine electrically, but looks ugly. With paper work. $25

B & W FL-10/1500
This filter cuts off just above 10 meters, and handles 1500 Watts. It is the latest model B&W filter.In very nice condition, it looks close to new. $40.

Johnson 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut off frequency of 45 MHz and 75 db of attenuation. It is rated to take 1000 Watts of AM, or 5000 Watts PEP SSB. With mounting bracket. $30

Para Dynamics PDC 1089
This filter is rated at a full Kilowatt, up to 30 MHz. 5 x 6 x 2 inch black box, instead of the more familiar long enclosure. It looks like new. $25

20 meter trap:

This is an LC "Trap" to eliminate 20 meter interference. Nominal frequency is 14.250 MHz, but it has a variable capacitor to adjust it for best signal rejection. It is in a minibox about 5 x 2 1/2 x 2 1/2 inches, with an SO-239 connector on each end. It looks as if it would handle 100 watts, but not a linear amplifier.

A note on it says "14.250 MHz Trap. Use on 10 m and 15 m"
$8

Coax connectors and adapters:

Prices are per connector. Several of each are available. Most are unused.

UHF Right angle 90 degree elbow connector $3

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "Bulkhead Connector" - Double female, as above, but for mounting thru a window, siding, etc. about 3 inches long $6

UHF double male connector (two PL-259's together) $3

UHF "T" connector with two female (SO-239) and one male (PL-259) connection $5

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male to BNC female (opposite of above) $5

BNC male for coax cables
standard type $2
crimp on type $3
-
Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T", two female and one male $3

"N" Connector, Double Male $8

I also have many other accessories available such as many
different types of microphones, HTs, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

2563. ROHN 25 TOP TOWER SECTION 25AG2

Yahoo group: amatuerradioswapfest
Date: 2012-08-28 02:01:10 UTC
From: n3dg
Topic: 2555 Message: 2563

ROHN 25AG2 Ten Foot Top Tower Section in Excellent Condition just kept in garage storage.

You can use this section:
☐ Atop your ROHN 25 Tower
☐ As a Mini-Tower in your backyard, or alongside the fence, RV, etc.
☐ Atop your roof as a Super-Rugged Compact Tower
ROHN R-25AG 25G Standard Ten Foot Top Tower Section features the same 12.5" face and 5/16" solid serpentine Zig-Zag bracing as the standard 25G tower sections and it also comes with a tapered top and integrated mounting pipe. The pipe, measured from the apex of the side rails, is 2.25" OD x 18".
It consists of 16 gauge walls with 5 bays of bracing and swaged, double-bolted connections. The Pinnacle of this Section is Capped with a 14 AWG (2.25" OD) Tube, protruding 18" above apex of side rails. This Rohn section is used to top off the 25G tower. The 25AG2 is available in the standard 9 foot 9 inch section length. This tower uses double bolted joints which are proven to be the best method of joining tower sections for sturdiness and dependability. Featuring a 12.5" equilateral triangular design, the 25AG is constructed of extra heavy duty 1.25" steel tubing side rails with continuous solid steel rod bracing.

You can connect the 10 foot long R-25AG2 to any standard ROHN 25G tower section and the entire section has been completely hot-dip galvanized for years of worry-free corrosion protection and it can be used in guyed, self-supporting and bracketed tower configurations

Specifications at:
http://www.3starinc.com/manuals/25G-11.pdf

ROHN 25AG2 New List Price is $300, is in Very Good to Excellent Condition with a fresh coat of Aluminum Paint, no rust, dents, bends, pings or pits.

$100 Cash & Carry Pickup near Philadelphia.

FA on that place:

FT243 crystal on 8400 KC for use in the 6m band on the AM calling frequency at 504 MHz. NEW UNUSED EXCELLENT CONDITION. Here is an original old WW2 era FT243 crystal on a useful 6 meter band frequency of 8400 kHz. This is a rare and much sought-after crystal. It has the standard 1/2 inch pin spacing used with most amateur radio equipment manufactured throughout the period from 1945 - 1968 and works especially well in any GONSET, CLEGG, LI'L LULU, EF JOHNSON, HALLICRAFTERS, HEATHKIT, KNIGHT and similar transmitters.

This is the frequency everyone uses all over the USA for Six Meter AM operation, and in almost all commercial and homebrew transmitters they use a multiplying factor of X6 which will put this crystal right on 50.400 MHz.

Ideal for making sure you are in the right frequency when operating 6m AM. This crystal has been fully tested and is in excellent operating condition.

QUESTION - Are you selling two of these? How come the pictures look the same as your other auction? YES, I am selling two identical crystals and these are the last I have like this.
Please see my other auction if you would like both.

http://www.ebay.com/itm/110950407914

http://www.ebay.com/itm/110950409468

ALSO - a 100 kHz calibrator crystal, brand new:

http://www.ebay.com/itm/110950409792

AND - a 6 position QRO band switch for building linear amplifiers, antenna tuners etc. -

2576. Ten 902 MHz antennas cheap...

Yahoo group: amatuerradioswapfest
Date: 2012-10-21 11:04:06 UTC
From: Bry Carling
Topic: 2576 Message: 2576

I have ten new 902 MHz rubber duck antennas available for auction on the bay.

I have ten all together. I also have two 450 MHz antennas.

They are all portable / rubber antennas. I am suggesting $19.95 plus shipping for the whole lot. That's the buy-it-now price. Maybe a lot less if you just bid. If you want them, I will toss in
the 450 MHz antennas too. Remind me!

QTY TEN (10) Rubber duck style portable antennas. Eight of then have screw-on SMA connectors. Two of them have BNC Connectors. The sma connector ones are 7 inches long. The two stubby BNC types are 3.5 inches long. These are all new, unused antennas.

Pictures and more details here:
http://www.ebay.com/itm/110966608234

(scroll down)

Best regards - Brian Carling

From: G3XBM <rogerlapthorn@...>
Sent: Sun Oct 21 17:09:17 EDT 2012
To: VHFam@yahoogroups.com
Subject: [VHFam] 10m AM - there won't be a better time for a long time!

In the last few days, 29.0-29.1MHz has been busy with US and Canadian AM stations at up to S9+ for hours on end.
I managed to work K1IED on 10m AM when using just 2W to my halo this afternoon and got an RS54 report. K1KW was also a cracking signal but my QRP could not break the pile up.
So, if you want to enjoy some exciting AM operating, get on 10m this week and enjoy the good times while they last. Some believe we have already passed the sunspot peak and that cycle 25 will be very weak indeed.
Conditions like this weekend may never return in our lifetimes after the next month or so. Grab them!
There is a brief video clip on YouTube and on my blog of K1IED shortly after we worked. See http://g3xbm-qrp.blogspot.co.uk/2012/10/10m-am-dx-qso.html .

2582. Yaesu Items FS

Yahoo group: amatuerradioswapfest
Date: 2012-11-10 00:58:04 UTC
From: Ken Simpson, W8EK
Topic: 2429 Message: 2582

Yaesu Items For Sale:
HF transceiver, Speaker/Phone Patch, Communications Speaker,Desk Microphones, DTMF Microphone, HT accessories, and more

Yaesu FT-990 Deluxe HF Transceiver
The Yaesu FT-990 features multiple direct digital synthesizers for pure local signals for high performance. The triple-conversion, general coverage receiver tunes from 100 kHz to 30 MHz. It has an automatic antenna tuner. A 500 Hz CW filter is built in. It has keypad entry. Power output is adjustable up to 100 watts output (25W AM). The top panel provides access for special user adjustments. A power supply for operation from 120 V AC is built in, or it can be powered by 13 V DC at about 22 amps.

Features:
General coverage receiver, tunes continuously from 100 kHz to 30 MHz
Modes: AM, USB, LSB, CW, FM, FSK
Iambic CW keyer
Automatic Antenna Tuner
Multi-function illuminated analog S-meter
Computer Aided Transceiver (CAT) allows computer control via a serial cable with a DIN jack
Notch filter, IF shift, noise blanker, and a digitally switched capacity audio filter
90 Memories
Dual VFOs
Built-in AC Power Supply
100 Watts Power
Noise Reduction
Digital Filtering
IF Notch
Manual and Auto AGC

This particular unit works fine, and looks very close to perfect. This is a terrific radio. $875

Yaesu YD-148 Dual Impedance Desk Microphone:

The Yaesu YD-148 is a very nice "gooseneck" type desk microphone. It has both high and low impedances, which can be selected by a switch. This means it can be used on some of the older rigs requiring a high impedance mic, or with the more modern rigs needing a low impedance mic.

This particular mic is in very nice condition. It works 100%.
At the present time, it has an 8 pin connector, wired for
Kenwood, on it, which of course can be changed. $75

Yaesu "Landliner" SP-101 P Speaker and Phone Patch:

This is a nice speaker that has a phone patch added
to it. Its styling matches the FT-101 line, but it looks
nice with most any rig. It has a VU meter on it, as well
as controls for both transmit and receive gain.
I realize many people do not use a phone patch much any
more, but even if you do not use the phone patch portion,
you still have an excellent speaker.

This particular unit works fine, and looks extremely nice
as well. It is in its original box.

With paper work for $90.

Communications Speaker:

Realistic 21-549 A
This one is about 4 inches square but only about 2 inches
deep. It is rated for 5 watts, has an 8 ohm impedance, and
is listed as a 300 to 3000 Hz frequency response, making it
ideal for communications. 3.5 mm (1/8 inch) mono plug. It
is black in color, looks great, and sounds great. $18

Deluxe Desk Microphone:

This is a great looking and great performing low impedance
desk mic. It has a quality Shure 600 ohm cartridge in it
(the cartridge alone is over $40 new), with a very nice
black die case base and neck, with a chrome grill. It
looks somewhat like a Shure 444, but no plastic on this
one -- all metal!

This one has stripped and tinned ends on it, which means
any connector can easily be added.

This one looks like new, and works the same. It has a
long (approx 6 foot) cord. $70

Yaesu MH-36 E8J DTMF Touch Tone Hand Microphone:

This Microphone includes a 16 digit DTMF Touch Tone Pad,
as well as Up and Down switches, lock provisions, etc.
It has the 8 pin modular connector (like a computer network).
It is designed to be used with the FT-817, FT-857, FT-897,
and others.

This particular mic is in its original box, unused.
It even includes a mic holder. $50

Yaesu YM-31 hand microphone:
The Yaesu YM-31 is a hand mic with a round 6 pin connector. Apparently it is either similar or the same as the MH-25A6j (not the MH-25 with the 8 pin connector). It is a 600 ohm impedance hand microphone, and has a Monitor on-off switch on the back. It should be compatible with any of the Yaesu rigs that uses the round 6 pin connector. It looks very similar to the Yaesu MH-1.
This one works fine and looks extremely nice. $25

Yaesu HT Accessory Items:

Pryme Speaker Mic
This is the equivalent of the Yaesu MH-34.
It fits the Yaesu HTs with the 4 conductor 1/8 inch (3.5 mm) plug, such as the VX-1, VX-3, VX-5, etc.
It looks like it has not been used. $28

Belt Clip for Yaesu FT-207, with hardware. $8

Wrist Strap for Yaesu FT-209, and others $4

Rubber Duck antennas for your HT:

All are for 2 meters, are in good condition, and are $10 each, unless stated otherwise.

BNC - Original from Kenwood TH-215, about 5 inches long

BNC - Stubby about 4.5 inches long

5/16 inch threaded, as used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

BNC Stubby for 440 MHz, 3 inches long

Keithley Model 179 A True RMS DMM:

The 179A is a 4 1/2 digit True RMS reading DMM that runs off of 115 V AC. It has DC voltage ranges up to 1200 volts, with AC voltage ranges to 1000 volts. Ohms readings go up to 20 Meg, with both DC and AC current ranges up to 2000 ma. This is a true precision DMM, designed for bench/lab use.

This particular unit works 100% and looks extremely nice. Probes are included, as is the paper work for $100.

Surge Station and Noise Filter:

This unit is still in its Radio Shack (#61-2327) box, never used. It says it is for a notebook computer, but it can be used with anything. It has connections for a computer network (LAN, RJ-45 connector), the AC power, and for phone lines (RJ-11 connector), and provides noise filtering and surge suppression on each. It even includes $25,000 insurance against surges. Maximum power rating is 1875 Watts, or 15 amps. Noise filtering is listed at 40 db.

This unit is new, in its original box, with its original paper work. $12

I also have many other accessories available such as many different types of microphones, HTs, HF, VHF and UHF rigs, HF and VHF/UHF antennas, and many miscellaneous accessories. Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

Very Nice and Clean Condition kept as a spare rig owned by a caring engineer, all original a bargain at $380.

2586. FA: Original 7050 kHz FT243 crystal

Yahoo group: amatuerradioswapfest
Date: 2012-11-16 17:52:05 UTC
From: Bry Carling
Topic: 2586 Message: 2586

Here is an Original 7050 kHz FT243 crystal for your transmitter.
Full size, so it shouldn't chirp, drift or fail on you. I have put a lot of other crystals on there too.

This one is starting out at $5.95 - no bids so far...

Enjoy - 73 de AF4K

VIKING II Transmitter for sale

Decent condition, complete. Contact me if you would like pictures or to discuss. We can talk
about the price or possible trades etc. If you are interested in a solid EFJ Transmitter for AM
and CW this would be it. Not fully restored but in decent shape. Front panel is better than
most you will find.

2591. FT: Icom IC-7000

Yahoo group: amatuerradioswapfest
Date: 2012-12-02 16:44:09 UTC
From: dxqsl
Topic: 2591 Message: 2591

Have a nice Icom IC-7000 with IT-100 LDG tuner with all cables, and manual, would like to trade for a radio I can read display better like a TENTEC Jupiter (newer black with blue display and internal antenna tuner) or Kenwood TS-2000 with hand microphone. Might consider others but prefer these ones. I will include RT systems software and cable as well as cables for computer control and mobile mount, radio not been mobile, used as base receiver mostly used on tx very little, radio is almost 2 years old, no smoking environment. Thanks for looking at my post.

2592. Special 75m CW Crystals $3 to $4 each

Yahoo group: amatuerradioswapfest

2594. FOR SALE: NEW AMERITRON AL-811 160-10 METER HF LINEAR AMPLIFIER

Yahoo group: amatuerradioswapfest
Date: 2012-12-13 02:15:05 UTC
From: n3dg
Topic: 2594 Message: 2594

NEW Ameritron AL-811 HF Linear Amplifier delivers 600 Watts PEP Output on all HF bands, 160 thru 10meters, with no compromise on WARC and MARS bands, you get 100% rated output. You can operate the AL-811 on all modes including SSB & CW, and even demanding continuous modes like RTTY, SSTV, FM and AM.

Ameritron AL-811 uses three very rugged and very low cost 811A tubes which resist failure and are assured for long life, even when your amplifier is mis-tuned, and she also has a very rugged power supply.

Features at:
http://www.ameritron.com/Product.php?productid=AL-811

Manual at:
http://www.ameritron.com/support.php?productid=AL-811

She was purchased a few months ago as a backup amplifier and only tested, not used, just sat in the closet and I now have no need, so she must go to a new caring owner who will enjoy using her.
New List Price is $800 + Shipping, I will ship and insure with original manual and warranty form and information for $650 to Continental USA.

2603. FOR SALE: NEW AMERITRON AL-811 160-10 METER HF LINEAR AMPLIFIER

Yahoo group: amatuerradioswapfest
Date: 2012-12-23 01:01:23 UTC
From: n3dg
Topic: 2594 Message: 2603

NEW Ameritron AL-811 HF Linear Amplifier delivers 600 Watts PEP Output on all HF bands, 160 thru 10 meters (already modified for 12 & 10 Meters), with no compromise on WARC and MARS bands, you get 100% rated output. You can operate the AL-811 on all modes including SSB & CW, and even demanding continuous modes like RTTY, SSTV, FM and AM.

Ameritron AL-811 uses three very rugged and very low cost 811A tubes which resist failure and are assured for long life, even when your amplifier is mis-tuned, and she also has a very rugged power supply.

Features at:
http://www.ameritron.com/Product.php?productid=AL-811

Manual at:
http://www.ameritron.com/support.php?productid=AL-811

She was purchased a few months ago as a backup amplifier and only tested, not used, just sat in the closet and I now have no need, so she must go to a new caring owner who will enjoy using her.
New List Price is $800 + Shipping, Holiday Special Price at $500.

2604. FOR SALE: YAESU FT-847 TRANSCEIVER & FC-20 AUTOMATIC ANTENNA TUNER

Yahoo group: amatuerradioswapfest
Date: 2012-12-30 02:45:31 UTC
From: n3dg
Topic: 2604 Message: 2604

Yaesu FT-847 is really three radios in one: HF, VHF/UHF and Satellite and she delivers 100 watts output on HF and 6 Meters, and 50 watts output on both 2 Meters and 430 MHz bands. Additional features include: Cross-band Full Duplex operation, Normal/Reverse Tracking, CTCSS/DCS Encode and Decode, 0.1 Hz tuning steps, DSP Notch, DSP NR and DSP BPF, Shuttle Jog Tuning Dial, Keypad Entry and 1200/9600 bps Packet ready.

She just sat boxed in the closet as a backup transceiver, never used and like new with DC Power Cable and Original Owners Manual at $1200 Shipped to Continental USA.

MINT YAESU FC-20 HF & 6 METER AUTOMATIC ANTENNA TUNER

Yaesu FC-20 External Automatic Tuner is designed for the FT-100, FT-100D, FT-847, FT-857, FT-897 operating on all HF ham bands plus 6 meters. It is ideal for tuning out SWR variations in your antenna system present at the radio end of your coax. Utilizing fixed inductances and variable capacitors controlled by precision stepper motors, the FC-20 can accommodate and resolve SWRs of up to 3:1 on HF and up to 2:1 on 50 MHz. The Yaesu FC-20 also provides 100 memories for tuning data, so you will instantly be ready to transmit on your favorite frequencies and it includes a convenient Auto-Start feature in case the antenna system impedance suddenly changes.

Specifications:
* Coverage: 1.8 to 54 MHz Amateur Bands
* Power rating: 150 Watts
* Memories: 100 Total
* Tuning time: <30 seconds
* Antenna matching impedance: 17 to 150 Ohms

She just sat boxed in the closet for my backup transceiver, never used and like new, and I now have no need, so she must go to a new caring owner who will enjoy using her at $185 Shipped to USA.

She just sat boxed in the closet as a backup transceiver, never used and like new with DC Power Cable and Original Owners Manual at $1150 Shipped to Continental USA.

2608. Palomar Keyer in S-line Style Gray

Yahoo group: amatuerradioswapfest
Date: 2013-01-08 19:29:33 UTC
From: Bry Carling
Topic: 2608 Message: 2608

I have for sale a really nice Palomar Keyer with built-in Brown Brothers Paddles.
This unit was built to match the Collins S-line with the familiar gray wrap around style cabinet.

Front panel has HOLD/(tine) switch, ON/OFF volume and speed control. Built-in sidetone and speaker. If you know this unit it is first class and has rear terminals for Key, Key, Gnd,
Receiver. Also has 1/4" jack for phones. Has relay output so it is also great for keying tube
rigs. 120V AC operation. Excellent working condition. Just needs a new home.

Pictures available on request. First $159.00 plus shipping takes it.

Brian Carling, AF4K

2609. FS: Various Items

Yahoo group: amatuerradioswapfest
Date: 2013-01-13 16:34:13 UTC
From: Bry Carling
Topic: 2609 Message: 2609

For sale:

National NC125 Receiver - excellent $150.00 plus shipping

Knight Space Spanner regen receiver, exc. with manual $65.00 plus shipping

Hallicrafters S94 Civic Patrol VHF Receiver - $65.00 plus shipping

Hallicrafters S40B Receiver project - needs restoration. It's all there. Available for $55.00 plus shipping.

CS137 Military crystal case - holds 120 crystals. Two drawers with latches. Just the case, no crystals in it - $35.00

BX40 Military crystal case - holds 120 crystals. Flat style. Just the case, no crystals in it - $35.00

Pair of Crystals for BC611 set - 5500 / 5995 kHz - $24.00 + S/H
Pair of Crystals for BC611 set - 3885 / 4340 kHz - $24.00 + S/H
Crystal for 6m AM - FT243 type on 8400 kHz for 50.4 MHZ - $14.00 + S/H
Crystal for 2m AM - FT243 type on 8025 kHz for 144.450 MHZ - $14.00 + S/H
100 kHz calibrator crystal. Tall type hc13u as use din moist HF radios, brand new - $19.00 plus shipping

Yaesu Landliner Phone Patch for FT101 series - $65.00

Bud Codemaster - morse code practice set. Excellent condition. 120V AC operation.

Palomar Keyer with built-in Brown Broithers paddles one of the best. Can cathode key or grid block key any amateur transmitter including tube rigs. Collins S-line style cabinet. 120V AC. Excellent condx. - $165.00 plus shipping

Jones Micromatch SWR meter. A classic. This is the meter only in a cabinet - without the sampling part.
Available for $5.00 plus shipping.

GONSET VHF Amplifier for 144 MHz - $180.00 plus shipping.
Spare 826 tube NIB for Gonset - $20.00
Nice collectible 2m amp in excellent condition. For use with Gonset Communicator, Clegg etc. Drive with 1 - 5 watts for

full output. Power input of around 50 to 100 watts. This is a really nice collector item and also great for those roundtables on 144.450 MHz AM.

Multi-Elmac AF67 HF Transmitter AM and CW with built-in VFO.
No power supply included - $99.00 plus shipping

Yaesu FT77 HF Transceiver - $375.00 plus shipping
Yaesu FC700 Tuner - $225.00 plus shipping
Yaesu MD1b8 Desk Microphone - $99.00 plus shipping
All three Yaesu items together for $495.00 plus shipping

EF Johnson Low pass Filter - $15.00 plus shipping
B&W 425 Low pass Filter - $25.00 plus shipping
B&W FL10/1500 Low pass Filter - $35.00 plus shipping

Pictures available on request. I will post more pictures and details soon at:
http://af4k.com/radios.htm

2612. FS: New coils - 50 cents each

Yahoo group: amatuerradioswapfest
Date: 2013-01-20 20:38:20 UTC
From: Bry Carling
Topic: 2612 Message: 2612

FOR SALE - attention homebrewers QRPers and experimenters....

$10.00 package deal on 20 brand new coils and IF transformers. New in their original plastic
boxes and looking like they should as brand new coils in the package. These are mostly WORKMAN BRAND coils. Many of them are adjustable. While some are listed as video coils, they usually have an inductanc ethat is suitable for any type of RF signal.

I have over 200 of these coils and parts as listed at:
http://af4k.com/coils.htm

I don't have time to go through them all and pick specific coils for any buyer. Please don't ask. First come first served on the IFTs. Therefore the price is way below cost. They are priced to move and I don't have much ability or time to pick and choose. I will try where
possible, but you will not be disappointed.

Sincerely,

Bry AF4K

2613. Mobile Antennas FS

Yahoo group: amatuerradioswapfest
Date: 2013-01-21 13:41:12 UTC
From: Ken Simpson, W8EK
Topic: 2613 Message: 2613

Mobile Antennas For Sale:

HF, VHF, UHF, and multiband antennas,
plus a variety of antenna mounts

Hustler HF Mobile Antennas:

"Standard" Hustler resonators (400 Watt):
75 meter resonator RM-75 $19
20 meter resonator RM-20 $16
15 meter resonator RM-15 $14

Hustler mobile mast:
Hustler MO-3.5 mobile mast.
Hustler makes the MO-3 mast for use with their series of mobile HF resonators. They also make an MO-4. The MO-3 is 54 inches long, and the MO-4 is a "shorty" only 22 inches long. This particular mast has been modified and is between the two -- it is 34 inches long. It would be ideal if you have the room for slightly more length than the MO-4, but not enough for the MO-3. Of course this one would result is more efficiency than the MO-4. $18

Mobile Antenna Mounts:

Large, heavy duty magnetic mount
This large mag mount will take any antenna with a standard 3/8 inch 24 thread connector. It is very heavy duty, about 5 inches in diameter, with a long coax for $22.

BNC Magnetic Mount
This mag mount has a BNC connector on the top of it, and a BNC connector on the coax. Among other things, it can be used to put a BNC rubber duck outside on the roof of your car, instead of using it inside the car on your HT. I think this is really what it was designed for. It is in nice condition. $20

Larsen PO-MM mobile magnetic mount:
This is a mobile mount that takes antennas with a PL-259. Coax is included. This one works great. $25

NMO "Button" Mount
This mount fits into a 3/4 inch hole, and will then take any of the many NMO types of antennas. Coax included.
It looks to be in new condition. $12

NMO-MM Magnetic Mount
For use with any of the Larsen, Motorola, and many others that use the NMO Mount. This is a magnetic mount with a good strong magent, coax, and PL-259 connector. $18

NMO-TLM Trunk Lip Mount
For use with any of the NMO type of antennas, this is a trunk lip mount, with a short coax. $10

Ten Meter Mobile Antennas:

All of these are vertical mobile antennas for the 10 meter band. Unless listed otherwise, all are for what is normally called an "Antenna Specialists" mount, which is sort of a reversed PL-259 type of connection. All have a spring just above the coil, at the bottom of the whip. All are about 3 to 3.5 feet long. I have checked each with an antenna analyzer, to determine resonant frequency. I am sure that mounting and surrounding objects might shift this frequency slightly, but they are adjustable.

Antenna Incorporated - 28.8 MHz - $15

Unknown brand (might be Antenna Specialists) 28 MHz
$15

Unknown brand (might be Antenna Specialists) 29.2 MHz
$15

Magnetic Mount, with antenna, coil, and mag mount as one unit.
About 18 feet of coax, with PL-259 connector.
Breaker brand, 28.35 MHz, $25

VHF Triband Mobile Mag Mount Antenna:

This mobile antenna is a VHF Triband antenna covering the 6 meter, 2 meter, and 440 MHz ham bands. This makes it ideal for some of the newer multiband and dual band rigs available today.

The antenna is on the order of 3 feet long and has a very strong magnet. It has a long coax cable with a PL-259 connector.

It works great, and looks very close to new. $75

Comet "Impulse" Z-780 dual band mobile antenna:

The Comet Z-780 dual band is a 2 meter and 440 MHz mobile antenna. It is 5/8 wave center loaded on 2 meters providing 4.5 dB gain and 5/8 x 3 wave on 440 MHz providing 7.2 dB gain. VSWR 1.5 : 1 or less. This antenna can handle up to 150 watts.

The antenna is 5 feet high. The connector type is gold-plated
UHF PL-259 (for PO mount).

This particular antenna works fine and looks very close to
new. $60

Larsen PO-MM mobile magnetic mount:

This is a mobile mount that takes antennas with a PL-259 (such as
the Z-780 above). Coax is included. This one works great. $25

Buy both of the above for $80.

Larsen NMO type antennas
These provide about 3 db gain over a quarter wave, and are a
very rugged antenna. About 4 feet long.

NMO-150 - for use on 2 meters
This has been the standard of the industry for a very long time.
Coil only $12
Coil with whip $19

NMO-150 B for use on 2 meters
Same as NMO-150 above, but Black in color,
Coil only $15
Coil with whip $24

NMO-Q - Quarter wave whip for 2 meters
about 19 inches long. $10

NMO-50 for use on six meters
Quarter wave loaded antenna.
Coil only $12
Coil with whip $19

LM-150 for 2 meters
Similar to the NMO-150, but for the LM "Larsen Mount"
5/16 inch stud
Coil only $12
Coil with whip $19

Larsen NLA Type Mobile Antennas:

These antennas fit the Larsen NLA mobile mount, which is
a special mount made by Larsen.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 meters.

This one works fine and looks fine also.

Coil only, without whip (whip is hard to ship). $10
With four foot whip. $19

Larsen NLA-UHF coil for 440 MHz
This is the coil only for use on the amateur 440 MHz
band and UHF public service bands. Good condition. $10

Antenna Specialists 2 meter antenna
This is a 5/8 wave antenna with a "Gutter clip" type
mount. This is ideal for more portable or temporary
installations. Includes mount, coil, whip, and coax
with a PL-250 connector. $25

Mobile Magnetic Mount Antenna for 6 and 2 Meters:

There are no markings on this antenna indicating who made it,
but it has an extremely strong magnetic mount, complete with
coax and PL-259 connector. The antenna is about 4 feet long,
with a spring at the base of the antenna. It does not appear
that the coil at the base is removable.

Since there are no markings, I put it on the antenna analyzer.
The SWR is below 1.1 to 1 with no reactance at both 52 MHz,
and at 146.5 MHz, so apparently it is a dual band 6 and 2
meter antenna. Probably a 5/8 wave on two meters (which
would have about 3 db gain), and a quarter wave on 6 meters.
$30

Rubber Duck antennas for your HT:

All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC - Original from Kenwood TH-215, about 5 inches long

5/16 inch threaded, as used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

BNC Stubby for 440 MHz, 3 inches long

Coax connectors and adapters:

Prices are per connector.
Several of each are available.
Most are unused.

SPECIAL: Buy 5 and take 10% off.
Buy 10 or more and take 20% off.

UHF Right angle 90 degree elbow connector $3

UHF double female "Barrel connector" $3

UHF "Bulkhead Connector" - Double female, as above, but for
mounting thru a window, siding, etc. about 3 inches long $6

UHF double male connector $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male to BNC female $5

BNC male for coax cables
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T", two female and one male $3

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

2614. national rigs and supply for sale

Yahoo group: amatuerradioswapfest
Date: 2013-01-23 14:59:26 UTC
From: dalepavlicek
Topic: 2614 Message: 2614

Have 2 NCX-3 rigs, one receives fine the other transmits fine,neither does both. Also included is a ncx power supply that has all the correct voltages. all have full cases and are decent condition. have manuals for radios.
Don't have the time to go thru these rigs,should be a easy fix on both. pickup in sw Florida would be good, will ship if wanted ... shipping apx. 40.00
asking 80.00 for all or trade for ?
thanks
dale wt4t

2615. FOR SALE: MINT YAESU FT-847 HF VHF UHF TRANSCEIVER

Yahoo group: amatuerradioswapfest
Date: 2013-01-25 04:45:01 UTC
From: n3dg
Topic: 2607 Message: 2615

Yaesu FT-847 is really three radios in one: HF, VHF/UHF and Satellite and she delivers 100 watts output on HF and 6 Meters, and 50 watts output on both 2 Meters and 430 MHz bands. Additional features include: Cross-band Full Duplex operation, Normal/Reverse Tracking, CTCSS/DCS Encode and Decode, 0.1 Hz tuning steps, DSP Notch, DSP NR and DSP BPF, Shuttle Jog Tuning Dial, Keypad Entry and 1200/9600 bps Packet ready.

She just sat boxed in the closet as a backup transceiver, never used and like new with DC Power Cable and Original Owners Manual at $1050.

2616. FS: Military Comms Crystal Box

Yahoo group: amatuerradioswapfest
Date: 2013-01-25 11:43:46 UTC
From: Bry Carling
Topic: 2616 Message: 2616

For Sale:

Signal Corps crystal boxes - will hold up to 120 type FT243 or FT241 radio crystals
in a convenient, oirganized case that lets you find them quickly and easily.

The piano hinges and all aspects of the case are in excellent shape. These have latching
covers and felt pad liners in good condition.

First type is the familiar CS137 crystal case - excellent condition.
The dimensions are 11" x 4.35" x 3". A picture of a similar one may be found here:

http://www.bwgsurplus.com/web/sc_misc/cs137.jpg

Second type is a more flat-looking BX40 crystal case also in excellent condition. It has one
flat tray of crystals. This is a rather rare and military excellent case. The lid and piano hinge
and all other aspects of this case are in excellent shape.
Dimensions are: 11" X 8" X 2"
Picture of a similar one can be found at this web site:

http://af4k/com/imag/ham/bx40.jpg

E-mail me to arrange purchase or see:
http://www.af4k.com/miscpart.htm

2617. LOW PASS FILTERS FOR SALE

Yahoo group: amatuerradioswapfest
Date: 2013-01-25 12:19:56 UTC
From: Bry Carling
Topic: 2617 Message: 2617

FOR SALE:

LOW PASS FILTERS FOR RFI REDUCTION Completely eliminate interference to RF device and TVs from your HF transmitter! TVI begone...

These low pass filters are good for use from 160m through 10m bands with your HF transmitter or transceiver.

EF Johnson Tubular Low pass Filter - $20.00 plus shipping (2 Available.)

B&W Model 52 LOW PASS FILTER - heavy duty, with hammertone case. Extra nice - $30.00

B&W 425 Low pass Filter - $25.00 plus shipping

B&W FL10/1500 Low pass Filter - $35.00 plus shipping

Save on shipping - buy more than one. Pictures coming soon with details at:

http://www.af4k.com/radios.htm#LPFILTERS

73 & thanks for looking - Bry, AF4K

2618. FS: Pair of nice CBS 6L6GC tubes

Yahoo group: amatuerradioswapfest
Date: 2013-01-25 14:52:38 UTC
From: Bry Carling
Topic: 2618 Message: 2618

FS: Pair of nice 6L6GC tubes

CBS - Made in USA. These work fine and they test at over 100% on my Sencore TC142 tube tester. They look like new except the pin locators on the bottom are broken off. This is no big
deal. You just take care to line them up properly when plugging thenm in and they will do fine. They will be carefully packed for safe shipment.

Will sell the pair for $12.00 plus shipping.

Regards - Brian Carling

2619. FS: Yaesu FL2100Z

Yahoo group: amatuerradioswapfest
Date: 2013-01-26 13:04:36 UTC
From: Bry Carling
Topic: 2619 Message: 2619

FOR SALE: YAESU FL2100Z Linear Amplifier.

This is an HF linear amplifier rated for 1200W PEP input, and using two 572B triode tubes
Matches the FT-101Z and FT101ZD models and also the FT901, FT901DM, FT902 etc.
Will work great with any typical HF transceiver. I typically see 500-600 watts output on CW and 700 - 750 watts p.e.p. on SSB. All the advantages of a tube final in a compact package with built in AC power supply. Set for 120V AC.

Very few of these are still available, and many think of them as having some improvements over the older FL2100B etc. Very few of these excellent model amp are available.

Covers all 160m - 10m amateur bands including WARC. Working 100% and looks excellent inside and out. Has been cared for very well, in a non-smoking environment.

Has a brand new set of 572B tubes recently installed in it. They have about 2 hours on them.
Has full output per the manufacturer's specifications on all bands. You won't find a better example of this amplifier to go with your station. Clean as a whistle. If you have ever considered one of these now is your chance.

Pictures available on request.

Available for $595.00 plus shipping.

Brian Carling, AF4K

2621. FS: BAGS of BNC connectors and adapters

Yahoo group: amatuerradioswapfest
Date: 2013-01-29 12:10:47 UTC
From: Bry Carling
Topic: 2621 Message: 2621

For Sale:
Three bags of BNC connectors and adapters.

Each bag contains 25 items - some new, some used, all in good usable condition.
There are 3 or 4 BNC T-adapters in each bag. There are also 3 or 4 terminators.
You will get a mix of plugs and also adapters to go to things like "F" connectors, PL259, sma etc. Cable end, chasis mount etc. There may also be one or two "F" splitters and other unlisted item,s but the vast majority of these items are BNC adapters and connectors.
A few are brand new, bagged or carded items still in their package. Several of the others are unused but not in a package. Some are used but in very good condition.

The three bags of BNC items are available for $12.50 per bag plus $6.50 for USA shipping.
Reply by e-mail if you would like to have one, or all of them.

Best regards - Brian Carling, AF4K

2622. FS: Hefty 50V AC at 13A transformer

Yahoo group: amatuerradioswapfest
Date: 2013-01-31 02:37:42 UTC
From: Bry Carling
Topic: 2622 Message: 2622

For sale:

Power Transformer. Wired for 120V AC primary, but can be rewired for 240V AC.

Secondary 1: 50V AC at 13A continuous. Comes with a bridge rectifier that produces 70V DC under no-load conditions. About 65 - 68V DC with a load. Also available - a suitable,
high-grade 9800 uF at 100V DC capacitor. Makes a complete, unregulated 68V DC supply with plenty of power.

Secondary 2: 120V AC at about 2 amps, unregulated. (isolated)

The above are conservative ratings. Weight is 34 pounds.
Dimensions approx: 7" X 6.5" X 5.25"
Clean, excellent condition. Comes with all mounting hardware.

QTY 1 available for $35.00 plus shipping.
Capacitor available for $4.00 with transformer.

2624. For Sale or Trade: Ameritron AL-800H HF Amplifier

Yahoo group: amatuerradioswapfest
Date: 2013-02-01 05:07:21 UTC
From: K F 5 O K T
Topic: 2624 Message: 2624

I have a Ameritron AL-800H linear amplifier in outstanding condition, physically and electrically.

The top of the Ameritron line, in terms of power and value, this compact desktop powerhouse has been in regular use in my station and easily makes full legal limit (1,500 w +) with about 65 W of exciter drive.

This AL-800H has two matched 3CPX800-A7 pulse-rated power triodes which easily deliver legal limit (plus).

This amplifier has many great features, but best of all, outstanding power with reasonable `overhead' in a small `footprint'

I will sell this for $2,500.00 or I will trade for a good HF setup...
I'm hoping for a decent HF all band transceiver... Do0n't let the price scare you... If you have a radio I might want then the trade is done....

2625. For sale or Trade: Henry 2KD Classic

Yahoo group: amatuerradioswapfest
Date: 2013-02-01 05:28:18 UTC
From: K F 5 O K T
Topic: 2625 Message: 2625

The unit is heavy; about 90 pounds packaged. It WORKS, boy does it work!

It has the advertised 10dB gain and then some. Mine is mostly used on 10 meters where 90 watts in from my Yaesu FT-902DM easily produces 1,000 plus watts output when in the SSB setting (~3,000 volts), in the CW setting (~2,000 volts) it outputs ~650 watts. As you go up in the bands the overall gain of the amplifier increases somewhat.

New blower installed etc.. this is a great pice of equipment..

Will trade for a decent HF system or cash...

2626. Icom HF rig, PS, Spkr Mics and more FS

Yahoo group: amatuerradioswapfest
Date: 2013-02-01 21:50:50 UTC
From: Ken Simpson, W8EK
Topic: 2626 Message: 2626

Icom and related items For Sale --
HF transceiver, Power Supply, Speaker
Microphones, Speakers, Charger and DC Adapter,
Manuals, cables, and other Miscellaneous Items

Icom IC-738 HF transceiver:

This all band HF transceiver features a 500 kHz to 30
MHz general coverage receiver, and a built-in automatic
antenna tuner. 10 to 100 watts full duty RF output
SSB/CW/FM (40W AM). Double band stacking registers
store 2 frequencies along with modes in each band so
it can be used like 2 VFO's in one band. Ten electronic
'memo pads' are available for DX hunting or contests.
The frequency tuning resolution is 1 Hz. This is
particularly useful when dealing with AMTOR, PACTOR
and other digital modes. Other enhancements include:
PBT (Passband Tuning), Notch, RIT and XIT.
Requires 12 VDC at 20 amps.

Features:
All Mode
Analog S/RF Meter
160-10 Meters
1 Hz Tuning
All Mode Squelch
IF Notch
10 Hz Display
Automatic Antenna Tuner
Electronic Keyer
101 Memories

This one works 100%, and looks very close to new. Immaculate.
Paper work and original box are included for $575.

Icom PS-30 Deluxe Metered Power Supply:

The Icom PS-30 power supply is a deluxe supply that delivers
13.8 VDC at 25 amps. This power supply features a meter which
can be set to display amperage or voltage. Four outputs are
provided on the rear panel. Output 1 is a hard wired, high
amperage cable with the Icom standard 6 pin Molex plug.
Outputs 2, 3 and 4 provide low amperage 13.8 VDC output.
This power supply has a snap-out tilt bracket.
Size: 9.5 x 5 x 12.5 inches.

This particular supply works fine, and looks very close to new.

With paper work for $200.

MFJ 815 B Cross Needle Peak Reading HF Wattmeter:

The MFJ-815B cross-needle meter allows you to monitor both forward and reflected power, and SWR simultaneously. There are buttons to select either Peak or Average reading and power ranges of 200/2000 watts forward and 50/500 watts reflected. Frequency coverage is 1.8 to 60 MHz, so it covers 6 meters in addition to the HF bands, making it ideal for some of the new rigs that include 6 meters.
The peak reading function of this meter and meter light require external 12 V DC.

This particular unit works fine, and looks very close to new.
With paper work for $65.

HT Speaker Microphones:

All of these have the 3.5 mm and 2.5 mm plugs on them, as used by Icom, Alinco, Radio Shack, some Yaesu, and other HTs.

Radio Shack 19-310 speaker mic
This speaker mic fits most HTs that require the 3.5 mm and 2.5 mm plugs, such as Icom, Alinco, Radio Shack, some Yaesu, and others.
This one works fine and looks very close to new. $15

MFJ-284 Speaker Microphone
Fits most Icom, Yaesu, Alinco 560, Santec ST-20, and others.
It works great, and looks like new. $15

MFJ-287 Speaker Microphone
This fits the TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug.
It works fine, and looks close to new. $15

Communications Speaker:

Realistic 21-549 A
This one is about 4 inches square but only about 2 inches deep. It is rated for 5 watts, has an 8 ohm impedance, and is listed as a 300 to 3000 Hz frequency response, making it ideal for communications. 3.5 mm (1/8 inch) mono plug. It is black in color, looks great, and sounds great. $18

Icom Battery Charger:

Icom BC-127 A, Battery Charger for Icom IC-Q7A Dual Band HT:
This charger charges two AA NiCads (or NiMH) for the IC-Q7 A Dual band HT, and Icom R-2 receiver, and probably others.

This appears to be new, unused, still in its bag.
Icom lists them at $21. Buy this one for $12.

Icom DC adapter:

Icom DC-25
This is a pack that is used on the Icom µ2AT, Icom µ4AT, and on other HTs that use the BP-20, BP-21, BP-22, BP-23 and BP-24 battery packs. It takes 13 V DC (such as from a cigarette lighter), and converts it to the 9.4 V DC voltage needed for the HT. It is used in place of a battery. This one works fine and looks fine. $18

CW Key and Keyer cables:

Cable for straight key
About 3 feet long, with a mono 1/8 inch (3.5 mm) phone plug on it, as used with a straight key. $5
As above, but 1/4 inch plug. $5

Cable for paddles
About 3 feet long, and with a 1/8 inch (3.5 mm) stereo connector on the end, like used by most rigs. $8
As above, but 1/4 inch plug. $8
As above, with 1/4 inch GOLD plated plug. $15

ORIGINAL Icom operating manuals:

Please note that all of these are original Icom manuals and are not copies. All are in very good condition.
These are original manuals only.

Mobile transceiver manuals:
IC-22 S, 2 m FM transceiver $12
IC-28 H, 2 m FM transceiver $12
IC-281 H, 2 m FM Transceiver $12
IC-2350 H, Dual Band FM transceiver $15
IC-3200 A/E, Dual Band FM Transceiver $15

Other Icom manuals:
BC-30 Desk Charger $5
BC-35 Desk Charger $7
BP-2, BP-3, BP-4, BP-5 battery packs $3
BP-21, BP-22, BP-23, and BP-24 Batteries $3
DC-1 DC pack for IC-2 AT series HTs $4
HM-8 Hand Microphone, w/schematic $5
IC-3 PA Power supply / speaker $10
UT-16 Voice Synthesizer $5

These are original manuals only.

I also have many other accessories available such as many different types of microphones, HTs, HF, VHF and UHF rigs, HF

and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

2629. FS: Group of metal can Capacitors

Yahoo group: amatuerradioswapfest
Date: 2013-02-05 18:56:34 UTC
From: Bry Carling
Topic: 2629 Message: 2629

For sale: Group of seven (7) new in boxes metal can capacitors. Made by Illinois Cpacitor Company, USA.

These new, in the boxes, unused 3-section electrolytic capacitors.

Section 1 = 40 MFD at 150V DC
Section 1 = 20 MFD at 150V DC
Section 1 = 20 MFD at 150V DC

Dimensions are 2" tall X 1" diameter.

FP style mounting for use on a typical chassis. Solder terminals for connection to these.

Just making space here - I will sell the whole lot of (7) capacitors for $5.00 plus shipping.

Best regards - Brian, AF4K

Topic: 2635 Message: 2635

Free for postage - Two New, 902 MHz rubber ducjk style (SMA) antennas.

I put these on thsis list once before for a few dollars. No takers. I tried eBay and lost my fees, no buyers even at $2.00

I will give these free for postage to the first person who says they will pay the "at-cost postage" and pay for the padded envelope in the next few days. Otherwise I am throwing them away.

2637. FS: MULTI-ELMAC AF67 Transmitter AM-CW

Yahoo group: amatuerradioswapfest
Date: 2013-02-16 18:37:24 UTC
From: Bry Carling
Topic: 2637 Message: 2637

FOR SALE: Multi-Elmac 60 Watts AM-CW, TUBE TRANSMITTER, Model AF67.

THE MULTI-ELMAC AF-67 Trans-Citer is a ten-tube variable frequency or crystal controlled seven band transmitter or exciter. It uses a really good "push-pull" plate modulation scheme with two 5881 modulator tubes.

All circuits are simultaneously switched to the desired band by a single bandswitch lever. Designed as a complete transmitter for mobile or fixed installations, or an exciter to drive a higher power transmitter. When used as an exciter the 500 ohm tap on modulation transformer can be used to drive the higher power modulators. The AF-67 Trans-citer employs a variable frequency oscillator with output on wither 1.75 to 2.0 Mc. or 3.5 to 4.0 Mc. In addition to the V.F.O. feature, two crystal positions are included for operation on two spot frequencies. Any crystal that will work straight through, double of quadruple to the desired frequency may be used. The oscillator circuit employs a voltage regulator tube to maintain the plate voltage at a constant level.
The multiplier stages are broad tuned with a front panel control for peaking the final grid, insuring best performance on all bands. The audio circuit is designed to use either a carbon microphone or a low output microphone such as a crystal or dynamic. A slide switch on the rear apron on the AF-67 Trans-citer sets up the circuit for use with either type of microphone. A reactance tube modulator is incorporated in the variable frequency oscillator circuit for narrow-band-frequency-modulation. The variable frequency oscillator dial scale is directly calibrated in megacycles for each of the amateur bands. The AF-67 Trans-citer is supplied complete with all tubes, viz: 6AK6 Oscillator, 6BJ6 Reactance Modulator, 6AG5 Buffer-multiplier, 6AQ5 RF Driver, 6146 Final RF Amplifier, 6AU6 Speech amplifier, 12AU7 AF Driver, Two 5881 PP Modulators, OB2 Voltage regulator

The AF-67 is designed for use with a resonant antenna coupled to its output with a transmission line of 50 to 300 ohms impedance. Other impedance or balanced lines can be coupled through the use of an antenna tuning device. When used as an exciter the coupling link of the high powered final can be directly connected to the AF-67 with a suitable length of coaxial cable. The MULTI-ELMAC AF-67 is designed for a maximum plate power input of 60 watts. Maximum ratings for this Trans-citer are 600 volts at 100 milliamperes; or 500 volts at 120

milliamperes. Full 100% modulation occurs when the modulator plate current swings to about 60% of the final plate current with normal voice frequencies.

The modulation transformer is provided with a 500 ohm output tap brought to the power plug for driving the grids of high powered modulators. The 5881's will deliver approximately 40 watts of audio with a plate supply of 500 volts.

Dimensions: 11 1/4 inches wide, 7 inches high, and 8 1/2 inches deep.
Weight: 18 pounds.

There are some good articles on maintaining and modifying the AF67 at some web sites. This one is unmodified as far as I know. Fairly good condition for its age, and is complete, with all original knobs etc.

One of these sold recently on eBay for $181.00

Will sell for only $99.00 plus shipping. Or next stop eBay.

Picture and details at:

http://af4k.com/radios.htm#AF67

2638. FS: GONSET VHF POWER AMPLIFIER 50 MHz

Yahoo group: amatuerradioswapfest
Date: 2013-02-17 19:09:26 UTC
From: Bry Carling
Topic: 2638 Message: 2638

For Sale: GONSET VHF POWER AMPLIFIER 50 MHz, model 3065.

Give your Six Meter Band Gooney Box / Communicator, or other radio a boost.

With 3 to 6 watts of drive power, it will run 90 - 100 watts when using AM, FM or CW modes, according to the manual. Uses two 826 power tubes and also has two 5U4GB rectifier tubes. Should you ever need them replacement tubes are easy to fin on eBay for anout $5 - 10 each. Has a built-in 120V AC power supply. AC power cord in great shape, and has all the original knobs. Will include a copy of the manual with schematic diagram. This amplifier is in
great condition, and works properly.

Pictures and details at:
http://af4k.com/radios.htm

One recently sold on the bay for $224.50

For the complete amplifier and manual, I'm asking $195.00 or best offer plus shipping.

73 - Bry, AF4K

2639. KENWOOD PC-1 PHONE PATCH @ $30

Yahoo group: amatuerradioswapfest
Date: 2013-02-20 15:06:03 UTC
From: n3dg
Topic: 2639 Message: 2639

Kenwood PC-1 Phone Patch provides a connection between the transceiver and a telephone line and is designed to provide high isolation between receiver input and transmitter output. Impedance levels (nominal): Line 600 ohms, Receiver Input 8 ohms, Speaker Output 8 ohms and Microphone 50K ohms. Microphone input and output is 4 pin and measures 6" x 2.25" x 5.75" in clean condition as a Vintage Kenwood Collector's Item or for daily usage, Only $30.

2640. FOR SALE: MINT YAESU FT-847 HF VHF UHF TRANSCEIVER

Yahoo group: amatuerradioswapfest
Date: 2013-02-20 15:06:55 UTC
From: n3dg
Topic: 2607 Message: 2640

Yaesu FT-847 is really three radios in one: HF, VHF/UHF and Satellite and she delivers 100 watts output on HF and 6 Meters, and 50 watts output on both 2 Meters and 430 MHz bands. Additional features include: Cross-band Full Duplex operation, Normal/Reverse Tracking, CTCSS/DCS Encode and Decode, 0.1 Hz tuning steps, DSP Notch, DSP NR and DSP BPF, Shuttle Jog Tuning Dial, Keypad Entry and 1200/9600 bps Packet ready.

She just sat boxed in the closet as a backup transceiver, never used and like new with DC Power Cable and Original Owners Manual at $1025.

2641. Boatanchor and related items FS

Yahoo group: amatuerradioswapfest
Date: 2013-02-24 17:44:54 UTC
From: Ken Simpson, W8EK
Topic: 2641 Message: 2641

Boatanchor and related items for sale:

Variac, Heath SWR Bridge, Bench Power Supply, Low Pass
TVI Filters, Communications Speakers, Coax Switches,
Wattmeter, Antenna Tuner, Callbooks, Antenna Connectors
and more

General Radio Model 200 B Variac:

Most of us know what a variac is. This is a relatively
small one. It has the markings on it, but I can not find
a current rating, but would guess it is in the amp to amp
and a half range. Ideal for some of those small projects
where you don't want to drag a huge one out.

This one works fine, and includes the knob. It is made
for panel mounting with three screws.

I checked that bay place and find these have sold for any
place from $35 to $89. Buy this one for $20 plus shipping
from Florida. It will fit in a USPS medium flat rate box.

Heath AM-2 HF SWR Bridge:

This HF SWR Bridge matches the DX-40, although it can be
used with any HF transmitter. It is about 8 inches wide
and 4.5 inches high, with the meter in the middle, and a
gray colored knob at each side near the bottom. It covers
160 thru 2 meters and will handle full power.

This particular unit works fine and is in very good shape.

Paper work is included for $25.

Kepco Variable Bench Power Supply:

This is an ideal bench power supply! It is a Kepco Model ABC
40-0.5, which means that it will produce from zero up to 40 V
DC at up to 1/2 amp. Great for the bench.

The voltage is adjustable with a 10 turn pot from close to zero,
up to about 40 volts. There is a fairly large analog meter that
reads the voltage. There is also current limiting built in that
is adjustable from about 100 ma to up to about 700 ma. The same
meter that reads voltage can be switched to read current, or
short circuit current (the point that the current limit is set).
In addition, there are connections on the back to allow remote
sensing and remote programming. This is a quality regulated

power supply!

This particular unit works 100%, and looks extremely nice.

These normally sell used for $125 to $150 (plus shipping).
Buy this one for $85.

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter to reduce
harmonic interference. All have SO-239 connectors, and are
50 ohm filters.

The first one works on 6 meters as well as HF:

Drake TV-1000
This filter may also be used on the low end of six meters,
as well as HF. It is good for 1000 W "average" below 30MHz,
and about 200 W up to 52 MHz. Works fine, looks ugly.
With paper work for $22.

Bencher YA-1, high power, low pass TVI filter
If you need a heavy duty filter for the output of your amplifier,
this one is ideal. It will take full legal power plus, and has at
least 80 db signal attenuation at TV channel 2. This one works
great, and is in its original box.
Bencher currently sells these for about $90. Only $60.

Bencher YA-1
As above, not in original box. $45

Johnson 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut
off frequency of 45 MHz and 75 db of attenuation.
It is rated to take 1000 Watts of AM, or 5000 Watts
PEP SSB. With mounting bracket. $30

B & W FL-10/1500
This filter cuts off just above 10 meters, and handles 1500
Watts. It is the latest model B&W filter.In very nice condition,
it looks close to new. $40

Para Dynamics PDC 1089
This filter is rated at a full Kilowatt, up to 30 MHz.
5 x 6 x 2 inch black box, instead of the more familiar long
enclosure. It looks like new. $25

Communications Speakers:

Realistic 21-549 A
This speaker is about 4 inches square and about 2 inches
deep. It is rated for 5 watts, has an 8 ohm impedance, and
is listed as a 300 to 3000 Hz frequency response, making it

ideal for communications. It has a 3.5 mm (1/8 inch) mono
plug, as used by most modern rigs. Gimbal mount included.
It is black in color, looks great, and sounds great. $15

Vanco SPB-5
Appears to be the same at above, but with a Vanco label.
Also includes gimbal mount. $15

Coax switches:

B & W 550 A 2 Coax Switch
This coax switch will switch between two different coaxial
cables, such as two antennas, or switch one antenna between
two rigs. It has SO-239 connectors.
Although this one is an older switch, it is also more heavy
duty, and will easily handle 1500 watts.
This one is in its original box, and obviously works well and
looks great also. $22

Workman CX-3, three position coax switch
It looks new, also in its original box. $15

GC 2 position coax switch
This one looks like new, but no original box. $12

Coaxial Lightning Arrestor:

This lightning arrestor is made to be inserted in to
your coaxial feedline, to help reduce lightning damage.

Cushcraft LAC-1
No markings on this to confirm the model number, but it
looks like the Cushcraft "Blitz Bug".
It has an SO-239 on one end and a PL-259 on the other end
(female UHF on one end and male on the other).
Simply unscrew the PL-259 on your coax, insert this
lightning arrestor, and you are all set. $10

MFJ 949 E HF Antenna Tuner:

The MFJ-949E deluxe 300 watt Versa Tuner II gives you full
coverage from 1.8 to 30 MHz, with a peak and average reading
cross-needle SWR/power meter. It features a custom designed
inductor switch, 1000 volt tuning capacitors, Teflon insulation
washers and proper L/C ratio to ensure arc-free operation with
up to 300 Watts. MFJ's Cross-Needle Meter shows you SWR, forward
and reflected power simultaneously. It reads both peak and
average power on 300 or 30 watt ranges. A dummy load is built
in. It includes an 8 position antenna switch for the two coaxial
cables and one random wire or balanced line, in addition to
the dummy load.
It needs 12 V DC to illuminate the meter.

This is the current model that MFJ is selling. This particular unit works fine, and looks great. With paper work for $95.

Wall Wart for above. $12

But both above for $105.

MFJ 815 B Cross Needle Peak Reading HF Wattmeter:

The MFJ-815B cross-needle meter allows you to monitor both forward and reflected power, and SWR simultaneously. There are buttons to select either Peak or Average reading and power ranges of 200/2000 watts forward and 50/500 watts reflected. Frequency coverage is 1.8 to 60 MHz, so it covers 6 meters in addition to the HF bands, making it ideal for some of the new rigs that include 6 meters.
The peak reading function of this meter and meter light require external 12 V DC.

This particular unit works fine, and looks very close to new. With paper work for $65.

Ham Radio Amateur "Flying Horse" Callbooks:

All are in extremely nice condition, close to new, unless listed otherwise.

1995 North American "US" Callbook with over 700,000 listings, including Canadian - $8

1981 Foreign "DX" Callbook - $5

1994 International "DX" Callbook - $5

Coax connectors and adapters:

Prices are per connector.
Several of each are available.
Most are unused.

SPECIAL: Buy 5 and take 10% off.
Buy 10 or more and take 20% off.

UHF Right angle 90 degree elbow connector $3

UHF double female "Barrel connector" $3

UHF "Bulkhead Connector" - Double female, as above, but for mounting thru a window, siding, etc. about 3 inches long $6

UHF double male connector $3

UHF "T" connector with two female (SO-239) and one male (PL-259) connection $5

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male to BNC female $5

BNC male for coax cables
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T", two female and one male $3

I also have many other ham items available. Please e-mail
me if you have specific needs. I might be able to help you.

Prices do not include shipping from Florida.

Thanks.

2642. FOR SALE: MFJ 209 ANTENNA ANALYZER

Yahoo group: amatuerradioswapfest
Date: 2013-03-02 02:52:11 UTC
From: n3dg
Topic: 2642 Message: 2642

MFJ-209 SWR Analyzer is an easy to operate, versatile, metered test instrument for analyzing nearly any 50 Ohm RF System on frequencies between 1.8 and 170 MHz (160 thru 2 Meters) and can also be used as signal source.

The MFJ-209 combines three basic circuits: a wide range oscillator, a 50 Ohm RF Bridge, and a calibrated bridge unbalance indicator to synergistically allow measurement of the SWR (referenced to 50 ohms) of any load connected to the ANTENNA connector.

MFJ-209 is extremely versatile especially for measuring antenna, tuner, amplifier and tuned circuit resonance and can also be used to adjust or measure:

Antennas: SWR, Resonant Frequency, Bandwidth, Efficiency
Antenna Tuners: SWR, Frequency
Amplifiers: Input and Output Networks
Coaxial Transmission Lines: SWR, Velocity Factor, Losses, Resonance
Balanced transmission lines: Impedance, Velocity Factor, Resonance
Matching or tuning stubs: SWR, Resonant Frequency, Bandwidth
Traps: Resonant Frequency
Tuned Circuits: Resonant Frequency
Small Capacitors: Value
RF Chokes and Inductors: Self Resonance, Series Resonance, Value
Transmitters and Oscillators: Frequency

MFJ-209 is in Nice, Clean Condition at ONLY $100 (New Price is $160+).

2643. FS: NIB Hammarlund Variable Capacitor

2644. FS: Pair of Cetron 572B Tubes

Yahoo group: amatuerradioswapfest
Date: 2013-03-08 14:09:02 UTC
From: Bry Carling
Topic: 2644 Message: 2644

FOR SALE: Pair of Cetron 572B / T160L Tubes

These are older tubes but they continue to last and last. Made in USA power tubes are getting hard to find. These are tested, working used tubes. They come with tube boxes that will protect them during shipping and will be packed very carefully for safe trans-shipment.
I ran them in a FL2100Z with minimum 350 watts carrier out from the pair on all HF bands.
I guarantee you will get good owrking tubes. Pictures are available on request.

There is a pair on the Bay right now for $165.00 which seems excessive.
Will sell the pair for $99.00 plus shipping.

2645. REDUCED: Two GONSET 6m AM RIGS - EXCELLENT

Yahoo group: amatuerradioswapfest
Date: 2013-03-08 14:39:10 UTC
From: Bry Carling
Topic: 2645 Message: 2645

REDUCED GONSET 6 Meter Amplifier AND ADDED Collector Condition Gonset G50 AM TRANSCEIVER

1) First the new offering - a really nice clean Gonset G50 VHF AM-CW Transmitter-Receiver. A much sought-after base rig for antique radio lovers! EXCELLENT CONDITION. Restored and tested. Supplied with a PDF manual.

Frequency Range: 50.00 - 54.00 MHz (VFO or crystal (f/6) controlled)

Mode: AM with RF power output of 27W (48W DC input)

Selectivity: 6db at 7kc

S+N/N: 6db with 2uV input

12 Tubes:
V1 6AU6 Transmitter VFO tripler
V2 6AQ5 Transmitter frequency doubler
V3 6146 Transmitter power amplifier
V4 12AX7 Transmitter microphone amplifier & transmitter/receiver audio amplifier
V5,V6 6L6GB Transmitter modulator & receiver audio power amplifier
V7 6BZ6 Receiver RF amplifier
V8 6U8 Receiver 1st mixer & oscillator
V9 6BE6 Receiver 2nd converter
V10 6BH6 Receiver 455 kc IF amplifier
V11 6AV6 Receiver 2nd detector, AVC protector, and receiver 1st audio amplifier
V12 6AL5 ALC, squelch limiter
Power source: 117V AC

Full details and picture at web link below.
Available for $175.00 plus shipping

ALSO -

2) REDUCED: GONSET VHF POWER AMPLIFIER 50 MHz, model 3065.

Give your Six Meter Band Gooney Box / Communicator, or other radio a boost.

With 3 to 6 watts of drive power, it will run 90 - 100 watts when using AM, FM or CW modes, according to the manual. Uses two 826 power tubes and also has two 5U4GB rectifier tubes. Should you ever need them replacement tubes are easy to find on eBay for anout $5 - 10.00 each. Has a built-in 120V AC power supply. AC power cord in great shape, and has all the original knobs. Will include a copy of the manual with schematic diagram. This amplifier is in great condition, and works properly.

One recently sold on the bay for $224.50 - Was asking $179.00 for this one previously.

REDUCED PRICE for Gonset 6m Amplifier and manual, I'm asking $125.00 plus shipping.

Pictures and details of both pieces of Gonset gear at:
http://af4k.com/radios.htm

DTMF Page with Group Calling
DTMF Transmit and Memory
Programmable Frequency Steps
Extended Band Coverage, receiving from 136 to 174 MHz
Dual VFO and Duplex Modes

This one works 100%, and looks extremely nice. It does have
tape around the mic cord near the connector to reinforce a
potential weak point. It is in its original box.

It includes the rig, power cord, DTMF touch tone mic, and
miscellaneous hardware, in the original box.
With paper work for $95.

Yaesu VX-7 RS TriBand HT:

The Yaesu VX-7R is a triple band (6M, 2M & 440 MHz) HT
with extensive receive coverage, and leading-edge features.
This American version even transceives with 300 mW on the
220 band. Power output on 6 meters, 2 meters and 440 MHz
is 5/2.5/1/0.5 watts. It receives the AM and FM broadcast
bands, shortwave (AM), VHF and UHF TV audio, VHF Air and
public service frequencies. This model features a rugged
magnesium case with rubber bumpers and gaskets.
Only 2.5 x 4 x 1.2 inches.

Features:
24 hour clock
900 Memories
changeable icons
weather alert
AM/FM BCB

AM band and full SW to 30 MHz
CTCSS/DCS
European Tone Burst
Wideband Receive
True Dual Receive
ARTS-Automatic In-Range Transponder
Backlit Keypad & LCD
Internet Key for Access to WIRES?

This one works 100%, looks very nice and includes the rubber duck with the 6 m extension, good battery, charger and paper work for $275.

Yaesu VX-5 R tri-band HT:

The VX-5 will cover the 6m, 2m, and 440 MHz ham bands, with receive almost from DC to light. Actually receive starts at the AM broadcast band, and goes to about 1000 MHz, so that means it includes all of the public service bands outside of the ham bands, weather, FM commercial, commercial TV, SW bands, and much more. Power output is up to about 5 watts, in 4 steps. Of course PL tones (encode and decode) are included, plus much, much more.

Features:
220 Memories
AM/FM BCB
CTCSS/DCS
Wideband Receive
Dual Watch
ARTS-Automatic In-Range Transponder
Backlit Keypad

This particular unit is in nice shape. It includes the things that came with it originally, including charger and Lithium Ion battery that seems to last forever. The rubber duck antenna is complete with the 6 meter "extension" that is often lost and not included. Of course it works fine.

With paper work for $190.

Kenwood TH-235 Two Meter FM HT:

The Kenwood TH-235A Two meter HT has a large easy-to-read LCD, 60 channel memories with scanning and ten DTMF memories. Extended receive is 136-174 MHz so it includes the weather frequencies. When used on external DC power you will get a full 5 watts output. With the included PB36 battery pack, it produces 1.5 watts. The low power setting is 0.5 watts.

Features
Backlit LCD Display
60 Memories
Scanning
Battery Saver
Built-In CTCSS Encode
Extended Receive

This particular unit works 100% and looks like it just came out of the box new. It came from a silent key who I don't think ever used it. I added a new PB-36 battery, as the old one had been in the drawer long enough that it is not in good condition. This one includes the desk charger, rubber duck antenna, belt clip, and paper work for $95.

Cigarette lighter power cord for TH-235 above. $12

Icom MB-17 A, Quick Release Mobile Mounting Bracket:

The Icom MB-17A "Quick Release" mobile mounting bracket fits the Icom 207, 281, 481, 800, 2100, 2200, 2340, 2350, 2410, 2700, 2710, 2800, and likely other rigs that are about 5 1/2 inches wide.

Since it is the "quick release" type where the rig just slides in, it likely can be used with many other rigs, made by many different manufacturers. This means you can use it with a Kenwood, Yaesu, Alinco, etc. in addition to Icom.

This particular unit is new, in its original box, complete with all hardware. $30

Radio Shack PRO 2051 Trunking Scanner:

This scanner will do it all! It has 1000 memories, and covers from 25 MHz thru 1300 MHz, and includes "Signal Stalker" and triple trunking. It can also function as a weather radio with full alerting capabilities. There are more scanning and searching facilities than one can imagine! Of course it covers the 6 meter, 2 meter, 220 MHz, and 440 MHz ham bands, but it does so much more.

This particular radio is in its original box. It appears that it was not used, but that the manual was examined. I have tested it and everything seems to work perfectly, although it has so many features I was not able to test everything. This is a terrific immaculate scanner!

Only $125.

Heath Wattmeters/SWR Bridges:

Heath HM-2102 VHF Wattmeter/SWR Bridge:
The HM-2102 is similar to the HM-102, but covering 50 to 160 MHz., with 250 and 25 watt scales. It can also be used to check SWR, and has a remote sensor that can either be left inside the meter, or separated from the actual meter. SO-239 connectors in and out. This particular meter works great, looks great, and includes paper work for $45.

Heath HM-2141 Dual Meter VHF Wattmeter / SWR Bridge:

The HM-2141 is the VHF version of the more popular HM-2140 wattmeter and SWR Bridge, and has the same features, except it covers from 50 to 175 MHz.

This is the wattmeter that has two meters on it, so it reads both forward and reflected power at the same time. It also has a "Peak" position, so it can capture the peak power, in essence reading PEP output. Forward scales are 30 or 300 Watts, and reverse are 10 W or 100 W, plus SWR scale. It covers 50 to 175 MHz. It needs a 9 volt battery for "peak" operation. It has a remote sensor with about 3 feet of cable.

This particular meter works 100%. The outer case (top and sides) is black hammertone, and looks very nice.

With paper work for $85.

Antennas for your HT:

All rubber ducks are for 2 meters, are in good condition, and are $10 each, unless stated otherwise.

BNC - Original from Kenwood TH-215, about 5 inches long

BNC Connector about 7 inches long

5/16 inch threaded, as used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging
-
PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

BNC Stubby for 440 MHz, 3 inches long

ANLI AL-800 dual band HT antenna

This is a telescoping antenna that pulls out to about a 3 foot length. If covers both 2 meters and 440 MHz, and has

a BNC connector on it. It is rated to have 3.2 dbi gain on
2 meters and 5.6 dbi gain on 440 MHz.
It appears close to new. These are $39 on Amazon.
Get this one for only $25.

Radio Shack 20-006 A
This antenna is just over 2 feet in length when fully
extended. Radio Shack does not give it any gain rating,
and I don't know if I would trust those ratings anyhow.
It is safe to say it performs better than a rubber duck
antenna. This one will cover 6 m, 2 m , 220 MHz and
440 MHz. BNC connector. It is actually in its original
bag with original paper work. $15

I also have many other ham items available. Please e-mail
me if you have specific needs. I might be able to help you.

Prices do not include shipping from Florida.

Thanks.

2657. FOR SALE: MINT YAESU FT-847 HF VHF UHF TRANSCEIVER

Yahoo group: amatuerradioswapfest
Date: 2013-03-26 23:35:02 UTC
From: n3dg
Topic: 2607 Message: 2657

Yaesu FT-847 is really three radios in one: HF, VHF/UHF and Satellite and she delivers 100 watts output on HF and 6 Meters, and 50 watts output on both 2 Meters and 430 MHz bands. Additional features include: Cross-band Full Duplex operation, Normal/Reverse Tracking, CTCSS/DCS Encode and Decode, 0.1 Hz tuning steps, DSP Notch, DSP NR and DSP BPF, Shuttle Jog Tuning Dial, Keypad Entry and 1200/9600 bps Packet ready.

She just sat boxed in the closet as a backup transceiver, later model with CAT support, never used and like new with DC Power Cable and Original Owners Manual at $1000.

2658. FOR SALE: MFJ 209 ANTENNA ANALYZER

Yahoo group: amatuerradioswapfest
Date: 2013-03-26 23:35:50 UTC
From: n3dg
Topic: 2642 Message: 2658

MFJ-209 SWR Analyzer is an easy to operate, versatile, metered test instrument for analyzing nearly any 50 Ohm RF System on frequencies between 1.8 and 170 MHz (160 thru 2 Meters) and can also be used as signal source.

The MFJ-209 combines three basic circuits: a wide range oscillator, a 50 Ohm RF Bridge, and a calibrated bridge unbalance indicator to synergistically allow measurement of the SWR (referenced to 50 ohms) of any load connected to the ANTENNA connector.

MFJ-209 is extremely versatile especially for measuring antenna, tuner, amplifier and tuned circuit resonance and can also be used to adjust or measure:

Antennas: SWR, Resonant Frequency, Bandwidth, Efficiency
Antenna Tuners: SWR, Frequency
Amplifiers: Input and Output Networks
Coaxial Transmission Lines: SWR, Velocity Factor, Losses, Resonance
Balanced transmission lines: Impedance, Velocity Factor, Resonance
Matching or tuning stubs: SWR, Resonant Frequency, Bandwidth
Traps: Resonant Frequency
Tuned Circuits: Resonant Frequency
Small Capacitors: Value
RF Chokes and Inductors: Self Resonance, Series Resonance, Value
Transmitters and Oscillators: Frequency

MFJ-209 is in Nice, Clean Condition at ONLY $90 (New Price is $160+).

2659. FOR SALE: YAESU ATAS 100 HF & VHF MOBILE & PORTABLE ANTENNA

Yahoo group: amatuerradioswapfest
Date: 2013-03-26 23:51:21 UTC
From: n3dg
Topic: 2659 Message: 2659

Yaesu ATAS-100 Active Tuning Antenna System provides HF/VHF/UHF coverage with automatic motorized tuning. Utilizing control signals from the transceivers microprocessor received via the coaxial cable, the ATAS-100's internal motor adjusts the radiator length for best SWR and is approximately 5.25 feet. The ATAS-100 covers the 7, 14, 21, 28, 50, 144 and 430 MHz amateur bands and is integrated with the FT-857, FT-897, FT-100 and FT-847 etc. with single button automatic tuning. Also, MFJ has a controller for this antenna that allows it to be used with other radios (not included). Never used outside, just stored in a box, new price at $350+, selling Like New for Only $200.

2674. Icom IC-2 AT 2 m HT and accessories FS

Yahoo group: amatuerradioswapfest
Date: 2013-04-20 12:32:02 UTC
From: Ken Simpson, W8EK
Topic: 2674 Message: 2674

Icom IC-2 AT, 2 meter HT and accessories For Sale:

Icom IC-2 AT, 2 meter HT:

The Icom IC-2 AT is a fairly generic HT for the 2 meter band.
It is fully synthesized, with the frequency controlled by thumb
wheel switches on the top; it has a touchtone pad on the front.
For a long time, this was the "standard", since it is such a
well built HT.

The HT has about 3 watts output in high power and just under a
watt in low. Instead of a NiCad pack that would likely be dead
anyhow, this HT has the "empty" battery pack that takes six AA
cells. You can use NiMHs in this, and then recharge the
batteries outside of the pack, or you can use alkaline cells.
Using this type battery pack is the only reasonable way to go.

This particular unit works 100% and looks very, very nice.

Rubber duck and paper work included for $35.

Icom DC-1, 13 V DC adapter for many Icom HTs:
This adapter slides on the HT, in place of the battery pack.
If 13 V DC is applied, it converts the voltage to the proper
voltage for the HT. It can be used with the IC-2, IC-3, IC-4,
IC-02, IC-03, IC-04, and others. This one works fine, and
looks very nice. With paper work for $18.

Icom CP-1 DC cord
This cord will work with the DC-1 above, plus many other items needing
the 2.1 mm coaxial power plug. The opposite end has a cigarette
lighter plug on it. $10

Multi Band BNC Telescoping Antennas:

Two telescoping antennas are available. Both are in very
nice, close to new condition, and have BNC connectors.

ANLI AL-800 dual band HT antenna
This is a telescoping antenna that pulls out to about
a 3 foot length. If covers both 2 meters and 440 MHz,
and has a BNC connector on it. It is rated to have
3.2 dbi gain on 2 meters and 5.6 dbi gain on 440 MHz.
It appears close to new. These are $39 on Amazon.
Get this one for only $25.

Radio Shack 20-006 A
This antenna is just over 2 feet in length when fully

extended. Radio Shack does not give it any gain rating, and I don't know if I would trust those ratings anyhow. It is safe to say it performs better than a rubber duck antenna. This one will cover 6 m, 2 m , 220 MHz and 440 MHz. BNC connector. It is actually in its original bag with original paper work. $15

MFJ-284 HT Speaker Microphone:

This speaker mic has the 3.5 mm and 2.5 mm plugs on it, as used by Icom, Alinco, Radio Shack, some Yaesu, and many other HTs.

It works with the Icom IC-2 AT above, but also with the following:

YAESU 109, 209, 709, 23, 73, 33, 727 and other YAESU radios which are pin compatible with the above rigs.

ICOM 2AT, 02AT, 3AT, 03AT, 4AT, 04AT, 12AT, u2A, u2AT, u4AT and other ICOM radios which are pin compatible with the above rigs.

ALINCO DJ-560 and other ALINCO radios which are pin compatible with the DJ-560

RADIO SHACK - most

SANTEC ST-20

It works great, and looks like new.

With paper work for $15.

I also have many other accessories available such as many different types of microphones, HTs, HF, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

2675. Antenna Tuners FS

Yahoo group: amatuerradioswapfest
Date: 2013-04-21 12:36:04 UTC
From: Ken Simpson, W8EK
Topic: 2675 Message: 2675

HF Antenna Tuners For Sale:

From very high power to lower power,
manual and automatic

MFJ 984 Versa Tuner IV Antenna Tuner:

MFJ says this will handle 3000 Watts PEP. Since the legal
limit is half of that, you will be fine at legal power.

It covers 1.8 to 30 MHz with 250 pf 6kv caps and matches
anything you want to throw at it, or so it seems.
It also includes an RF ammeter at the output of the tuner
so you know how much actual RF current you are putting
into the antenna. There's a wattmeter/swr bridge built
in along with a small dummy load.

It has rugged heavy-duty construction. Switches are rated
for 2KV and 17 amp carry capacity. There's a 4:1 balun
and real ceramic feed through insulators.

This particular unit works fine. The case looks very nice.
There is slight wear on the front panel, and one small
scratch that you can see if the light is just right.

Paper work is included for $200.

MFJ 962 B, 1500 Watt Antenna Tuner:

This HF antenna tuner is rated for 1500 Watts from 160
thru 10 meters. It features a cross needle wattmeter
that will read forward and reverse power, and SWR
simultaneously. Full scale readings are 2000/200 watts
forward, and 500/50 watts reverse. An antenna switch
is built in, as is a balun. The meter has a back light
that may be turned on or off. You need 12 V DC to
power the light.

This tuner works fine, the meter works fine, and it
lights properly. The cosmetics are good. The case
looks great. The front panel shows some wear.
Wear, but not scratches.

With paper work for $160.

Yaesu FC-757 AT, Automatic HF Antenna Tuner:

The Yaesu FC-757 AT is a automatic antenna tuner designed to be used on 160 thru 10 meters, including the WARC bands. It is designed to work with the FT-757GX, FT-757GXII and FT-747GX transceivers, but can work with virtually any HF rig.

The frequency range of this tuner is: 1.8-2, 3.5-4, 7-7.5, 10-10.5, 14-14.5, 18-18.5, 21-21.5, 24.5-25 and 28-29.9 MHz. The maximum RF power is 150 watts. The built in wattmeter has ranges of 15 and 150 watts. There is a 4-bit microprocessor which allows for fast, accurate automatic tuning. Two SO-239 connectors are provided, and it includes a built-in dummy load. It requires 13 V DC at 300 ma.

This unit works fine. Cosmetically it is not perfect; it shows some use, but it is not bad.

With paper work for $190.

Joymatch "Lo-z 500" Antenna Tuner:

This antenna tuner is manufactured by Partridge Electronics Ltd in England. It appears to be an "L" network with a 12 tap inductor and a single tuning capacitor. Apparently back in the 1960's or 70's Partridge made an antenna they called the Joystick. This is an antenna tuner that could be used with it, but of course it can be used with other antennas as well. It would appear to work on 80 thru 10 meters (including WARC bands). L networks only match impedances one direction, i.e. only lower than 50 ohms, or only higher than 50 ohms. You can change the direction of match by swapping the coax cables between the two SO-239 connectors.

I don't think the 500 means 500 watts. It looks more like it would handle 100 watts.

This tuner works fine and looks great. $50

I also have many other accessories available such as many different types of microphones, HTs, HF, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

FOR SALE or trade:

Astatic D104 Microphone with stand and cable. Has standard round screw-on connector with single pin in center. Available for $45.00 plus shipping.

Hallicrafters S94 Civic Patrol tunable VHF receiver $30.00 plus shipping.

Hallicrafters S40B Receiver. Needs work - $45.00 plus shipping.

20 feet of 450 ohm open wire feeder plus a solid heavy duty B&W center insulator. Good for a KW station. Available for $5.00 plus shipping.

LDG Balun 4:1 for open wire to auto-tuners. Model RBA-4:1
Available for $12.00 plus shipping.

100 kHz calibrator crystal, new for $19.00 plus shipping

200 kHz, 455 kHz crystals available for $30.00 each plus shipping.

1000 kHz and 1700 kHz crystals available for $16.00 each plus shipping.

Power Supply 65VDC at 10 amps, plus 5V and +/- 15V DC at 1.5A each.
Has 120V AC primary. Available for $35.00 plus shipping.

Fender Jazz bass, exc. $350.00 plus shipping.

Aphex Bass Exciter pedal - $99.00 plus shipping.

Korg Nanopad - $20.00 plus shipping.

Open to trades. Thanks for looking.

Radio Shack HTX-10 10 Meter Transceiver with matching Up/Down Microphone, Power Cable, Cigarette Lighter Plug and Original Manual.

Specifications:
☐ Modes: AM (7 watts), FM, SSB (25 watts)
☐ Receiver Sensitivity: 0.5uV for 10 db S/N
☐ Receiver Selectivity 50db min, Intermod 60db, S/N 40db min, IF Rejection 70db or better
☐ Power: 3 amps max, with SSB gulping 5 amps on peaks (can be powered by a capable cigarette lighter output in a vehicle) at 12-16VDC negative ground.
☐ Frequency Range: 28 MHz - 29.699 MHz
☐ VFO - Digital PLL with 1KHz steps
☐ Tuning steps selectable at 1/10/200 KHz using disgusting detent tuning knob
☐ Operating temperature: -4 to 122 degrees F
☐ Dimensions: 6 1/16 x 2 3/64 x 9 41/64 inches, 2.65 lbs (1.2kg)
Features, Details and Manual at:
http://support.radioshack.com/support_electronics/56895.htm

Topic: 2691 Message: 2691

FOR SALE: Fine, new USA-made Crystal Sockets collection...

National Radio Co. Type CS-6 socket, ceramic new in unopened packaging
with the mounting hardware. These are made for FT243 crystals. First quality.
QTY 4 available for $9.00 each plus shipping.

Mosley Electronics Co. Catalog No. 500 crystal socket. Brand new with mounting hardware.
Brown phenolic style. These are made for FT243 crystals. Excellent quality.
QTY 2 available for $8.00 each plus shipping.

Amphenol Type 54-2 crystal sockets for 3/4" pin spacing use don larger type crystals.
These are brand new and unused. Clear plastic construction. No mounting hardware.
Single #6 screw and nut, or similar are needed. QTY 2 available for $6.00 each plus
shipping.

If anyone would like to buy all 8 of the crystal sockets, they can be purchased for $55.00
plus shipping.

Please reply by e-mail if interested.

FOR SALE: Collection of air wound coils

Some are Airdux, and some are B&W according to the boxes they are in anyway.
There are 10 coils total. 6 still have the boxes. Most of them look very decent.
A couple could use a bath...

BW3014, AD 408T, 808T etc.

Example 1" diameter 2-3/4" long, about 45 turns. A couple of them look to be
more like 1/2" diameter. These are not all perfect, but most look to be very
serviceable. I would like $8.00 each for them if sold individually, but will sell the whole
collection for $49.00 plus shipping.

FS: RF CHOKES COLLECTION - 3 boxes available...

2.5 mH and 5 mH chokes along with other values frequently used for ham radio homebrewing. Over twenty coils total - plate chokes, RFCs and a few other coils, plus a couple of coil forms, some Ohmite chokes, and piston caps. Some are used but in good shape. These are all USA made and include items used in high powered transmitters etc.
RFC Group #1 available for $30.00 plus shipping

PICTURE OF GROUP #1:
http://www.af4k.com/imag/ham/rfc1.jpg

FS: RF CHOKES COLLECTION #2
2.5 mH and 5 mH chokes along with other values frequently used for ham radio homebrewing. Around 20 inductors here including plate chokes, RFCs, some Ohmite chokes, and a variety of other coils, plus a coil form and a piston cap or something. Some are used but in good shape. These are all USA made and include items used in high powered transmitters etc.
RFC Group #2 available for $30.00 plus shipping

PICTURE OF GROUP #2:
http://www.af4k.com/imag/ham/rfc2.jpg

FS: RF CHOKES COLLECTION #3
This is the largest group and it includes a bifilar wound filament choke, plate chokes, Ohmite
chokes... Plate chokes, 2.5 mH and 5 mH RF chokes walong with other values frequently used for ham radio homebrewing. There are over 40 inductors here including RFCs and other coils, coil form etc. Some are used but all are in good shape. These are all USA made and include items used in receivers, high powered transmitters etc.
RFC Group #3 available for $40.00 plus shipping

PICTURE OF GROUP #3:

2696. BIG SCREEN DAIWA CN-720B HF & VHF SWR POWER METER

Yahoo group: amatuerradioswapfest
Date: 2013-05-19 15:26:47 UTC
From: n3dg
Topic: 2696 Message: 2696

DAIWA CN-720B HF & VHF SWR & POWER METER with BIG 4.5 Inch Diagonal Cross-Needle display you can view ergonomically from anywhere in the shack, with Power Ranges of 20, 200 and 2000 Watts. Supports Frequency Range of 1.8 - 150 MHz with Standard SO-239 Input/Output in Very Nice & Clean Condition with Shiney Chrome Face.

Perfect Eham Reviews at:
http://www.eham.net/reviews/detail/7367

Manual at:
http://www.radiomanual.info/schemi/ACC_instrument/Daiwa_CN-710-720_SWR&Power_Meter_user_IK8TEA.pdf

You'll never need another HF & VHF SWR Power Meter again. . .only $85.

2697. HEATH HD-1481 COAXIAL REMOTE ANTENNA SWITCH

Yahoo group: amatuerradioswapfest
Date: 2013-05-19 15:27:21 UTC
From: n3dg
Topic: 2697 Message: 2697

Ultra-Convenient Mast or Tower Mounted Remote Antenna Switch lets you use just one coax feedline to switch and control up to four remote antennas supporting 1.8 thru 50 MHz (easily modified to up to 150 MHz) and supporting up to 2 KW without any AC/DC power required (simply gets its power through the antenna coax).

You Save Money & Time with this device.
You'll Save 75% in Coax Costs by just having to install one Great Coax Feedline to support up to four antennas.
And, if you ever need to replace or upgrade coax feedlines, with this device, you just upgrade one (not 2, 3 or 4).

Details at:
http://pdf.textfiles.com/manuals/SCANNERS-F-R/Heathkit-HD-1481.pdf

Reviews at:
http://www.eham.net/reviews/detail/6884

Indoor Control Unit and Outdoor Remote Unit included at $100.

2698. FS: Military Crystals Box

From: Bry Carling
Topic: 2698 Message: 2698

FOR SALE: Military Crystals Box

Hold all of your crystals in one place for easy access and a tidy shack.

This Model BX40 crystals box has a hinged lid and holds 120 Type FT243 crystals or similar. This is for crystals with 1/2 inch pin spacing. It is in excellent condition. Unlike some of the
other cases that have four compartments and separate panels and lids to open, it only has one hinged lid and is in excellent condition. Military drab olive color.

Pictures may be found at:
http://af4k.com/imag/ham/BX40_1.jpg
http://af4k.com/imag/ham/BX40_2.jpg

Available for only $25.00 plus $13.00 for shipping.

Reply via e-mail off-list with questions or to arrange purchase.

2700. WTB: Packet Radio TNC

Yahoo group: amatuerradioswapfest
Date: 2013-05-23 01:13:03 UTC
From: Jeffrey
Topic: 2700 Message: 2700

Hello All,
Anyone selling a cheaper TNC?? I own 2 PK232MBX, and a KPC-3. Well, run APRS over here at the QTH and a DIGI/I-GATE. Only use one of these TNC's for the APRS. Today sure enough the one PK232 dead on me after YEARS of use. So, hooked up my other PK232 and for some reason it won't communicate with the computer at all. So, tried my KPC-3 and luck has it works fine. EXCEPT the darn thing doesn't go into KISS mode, which I need for my DIGI. I believe it doesn't have KISS mode. So, on the hunt for a new TNC what will go into KISS mode for the APRS DIGI to work again.

Anyone have a TNC laying around they wish to depart with??

Please let me know

Jeffrey

2707. Wattmeters FS

Yahoo group: amatuerradioswapfest
Date: 2013-06-08 14:33:41 UTC
From: Ken Simpson, W8EK
Topic: 1178 Message: 2707

Wattmeters For Sale:

MFJ 815 B Cross Needle Peak Reading HF Wattmeter:

Cross needle reads forward and reverse power simultaneously
SWR displayed also
300/3000 Watt forward and 60/600 Watt reverse
peak or average reading meter
160 thru 6 meters
12 V DC needed for lighted meter

Since it covers from 160 thru 6 meters, it is ideal for some
of the newer rigs that include six meters.

This particular unit works fine, and looks very close to new.
With paper work for $65.

Daiwa CN-520 "Cross Needle" wattmeter:

This wattmeter covers 1.8 to 60 MHz, and is the "cross needle"
type, so it reads SWR at the same time it reads forward and
reflected power.

Since it covers from 160 thru 6 meters, it is ideal for some
of the newer rigs that include six meters.

Forward scales of 2000 W or 200 W; reflected 400 W and 40 Watts.

This one looks very nice and works like new,
with the paperwork for $65.

Diawa CN-101 L Peak Reading Cross Needle Wattmeter:

The CN-101 L covers frequencies from 1.8 thru 150 MHz, which
means it covers all of the way from 160 meters thru 2 meters
-- much more than most wattmeters. It has a cross needle meter,
so it will read forward power, reverse power, and SWR all
simultaneously. It has a switch for reading either peak or
average power. In addition, it has a very nice back lit
meter, if 13 V DC is applied.

This particular meter works 100% and looks very close to new.
It even has the rubber "bumpers" on the left and right ends.
It is pristine!

With paper work for $80.

Heath HM-2141 Dual Meter VHF Wattmeter / SWR Bridge:

The HM-2141 is the VHF version of the more popular
HM-2140 wattmeter and SWR Bridge, and has the same
features, except it covers from 50 to 175 MHz.

This is the wattmeter that has two meters on it, so it
reads both forward and reflected power at the same time.
It also has a "Peak" position, so it can capture the peak
power, in essence reading PEP output. Forward scales
are 30 or 300 Watts, and reverse are 10 W or 100 W,
plus SWR scale. It covers 50 to 175 MHz. It needs a 9
volt battery for "peak" operation. It has a remote
sensor with about 3 feet of cable.

This particular meter works 100%. The outer case (top
and sides) is black hammertone, and looks very nice.

With paper work for $80.

Heath HM-2102 VHF Wattmeter/SWR Bridge:

The HM-2102 is similar to the HM-102, but covering
50 to 160 MHz., with 250 and 25 watt scales. It can
also be used to check SWR, and has a remote sensor
that can either be left inside the meter, or separated
from the actual meter. SO-239 connectors in and out.
This particular meter works great, looks great, and
includes paper work for $45.

Heath HM-102/HM-2102 Wattmeter Parts:

Outer clam shell cabinet (left and right sides plus top)
fits either of these wattmeters. This one is in extremely
nice condition, with no scratches or blemishes.$12

Front panel and bottom of HM-2102 VHF Wattmeter
Great condition with no blemishes, and very nice crisp
lettering.$12

Reflectometer Assembly for HM-2102 VHF Wattmeter
This is the complete reflectometer assembly, including
the aluminum case, and the cable. $15

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

2710. HF Antenna tuner and wattmeters FS

Yahoo group: amatuerradioswapfest
Date: 2013-06-19 12:40:39 UTC
From: Ken Simpson, W8EK
Topic: 2710 Message: 2710

HF Antenna Tuners and Wattmeters For Sale:

From very high power to lower power,

MFJ 984 Versa Tuner IV, 3000 watt Antenna Tuner:

MFJ says this will handle 3000 Watts PEP. Since the legal limit is half of that, you will be fine at legal power.

It covers 1.8 to 30 MHz with 250 pf 6kv caps and matches anything you want to throw at it, or so it seems.
It also includes an RF ammeter at the output of the tuner so you know how much actual RF current you are putting into the antenna. There's a wattmeter/swr bridge built in along with a small dummy load.

It has rugged heavy-duty construction. Switches are rated for 2KV and 17 amp carry capacity. There's a 4:1 balun and real ceramic feed through insulators.

This particular unit works fine. The case looks very nice. There is slight wear on the front panel, and one small scratch that you can see if the light is just right.

Paper work is included for $200.

MFJ 962 B, 1500 Watt Antenna Tuner:

This HF antenna tuner is rated for 1500 Watts from 160 thru 10 meters. It features a cross needle wattmeter that will read forward and reverse power, and SWR simultaneously. Full scale readings are 2000/200 watts forward, and 500/50 watts reverse. An antenna switch is built in, as is a balun. The meter has a back light that may be turned on or off. You need 12 V DC to power the light.

This tuner works fine, the meter works fine, and it lights properly. The cosmetics are good. The case looks great. The front panel shows some wear.
Wear, but not scratches.

With paper work for $160.

Joymatch "Lo-z 500" Antenna Tuner:

This antenna tuner is manufactured by Partridge Electronics Ltd in England. It appears to be an "L" network with a 12

tap inductor and a single tuning capacitor. Apparently back in the 1960's or 70's Partridge made an antenna they called the Joystick. This is an antenna tuner that could be used with it, but of course it can be used with other antennas as well. It would appear to work on 80 thru 10 meters (including WARC bands). L networks only match impedances one direction, i.e. only lower than 50 ohms, or only higher than 50 ohms. You can change the direction of match by swapping the coax cables between the two SO-239 connectors.

I don't think the 500 means 500 watts. It looks more like it would handle 100 watts.

This tuner works fine and looks great. $50

MFJ 815 B Cross Needle Peak Reading HF Wattmeter:

Cross needle reads forward and reverse power simultaneously
SWR displayed also
300/3000 Watt forward and 60/600 Watt reverse
peak or average reading meter
160 thru 6 meters
12 V DC needed for lighted meter

This particular unit works fine, and looks very close to new.
With paper work for $65.

Daiwa CN-520 "Cross Needle" wattmeter:

This wattmeter covers 1.8 to 60 MHz, and is the "cross needle" type, so it reads SWR at the same time it reads forward and reflected power.

Forward scales of 2000 W or 200 W; reflected 400 W and 40 Watts.

This one looks very nice and works like new,
with the paperwork for $65.

I also have many other accessories available such as many different types of microphones, HTs, HF, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

2711. I have the following items For Sale or Trade

Yahoo group: amatuerradioswapfest
Date: 2013-06-21 18:37:56 UTC
From: K F 5 O K T
Topic: 2711 Message: 2711

I have the following items for sale or Trade.
Things I am interesting in as far as trades are, Handheld 2 Meter radios, Handheld 2 Meter/70cm radios, Mobile dual band antennas, HF Radios,
Mobile 2 meter radios, Dual Band mobile radios, Digital Police scanners. Laptop computers..
Also interested in other items??? What you got to trade?

MFJ -751 "Signal Enhancer" tunable CW/SSB filter

This unit is very similar to the Autek QF-1. It has
provisions for being a notch filter, a peaking filter, or
a low pass filter.

The width of the filter can be varied
(making it useful on both CW and SSB), and the
frequency of the notch, peak, or low pass function can
be selected. It is quite versatile.

It requires 9 to 18 VDC, and has an input jack, output jack, and a
headphone jack on the back. Comes with the MFJ Wall wart.

$45.00 OBO + Shipping CONUS

MFJ-901B ANTENNA TUNER, 200 WATTS, 1.8-30 MHZ, BALUN

ANTENNA TUNER, 200 WATTS, 1.8-30 MHZ, BALUN
The MFJ-901B is a small (5 x 2 x 6 inch) and affordable 200 watt PEP versa tuner. You can operate anywhere in a band and get low SWR.
You will get maximum power out for your rig and it will run cooler and last longer.

The MFJ-901B matches dipoles, vees, random wires, verticals, mobile whips, beams, balanced and coax lines continuously from 1.8 to 30 MHz.

It is excellent for matching solid state rigs to linears. Efficient airwound inductor gives you lower losses and more power.
You get SO-239 connectors for transmitter and coax, binding posts for random wire or balanced lines and a wing-nut ground connection.
A 4:1 balun for balanced lines is also built into this sturdy, compact tuner. Works with solid state and tube rigs.
The 901B will fit into your station and your car.

$65.00 + Shipping CONUS

MFJ-1278 MultiMode Data Controller, Packet, Amtor, RTTY, ASCII, CW, Memory Keyer

MFJ-1278 Multi-Mode Data Controller With Multi-Gray Level Modem
This tnc interface is capable of receiving, decoding, and transmitting in CW, RTTY, HF and VHF PACKET,
PACTOR, AMTOR, NAVTEX, ASCII, and WEFAX.

This TNC/Controller can have 2 different radios plugged into it at the same time. HF & VHF ...
VHF and UHF ... whatever.
Manual is located at:
http://gmcotton.com/Ham_Radio/MISC%20Manuals/MFJ/MFJ%201278%20Manual.pdf

Includes the MFJ 12v Wall Wart power cube

$75.00 OBO + Shipping CONUS

VoCom 2CO60-Z Mobile Power Amplifier (linear)

2 watts in gets 60 Watts out, This is a nice 2 Meter mobile power amplifier.
In pretty good condition, great for handhelds to get that much needed output power.
$55.00 OBO + Shipping CONUS

2712. Mobile Antennas FS

Yahoo group: amatuerradioswapfest

From: Ken Simpson, W8EK
Topic: 2613 Message: 2712

Mobile Antennas For Sale:

HF, VHF, UHF, and multiband antennas, plus
a variety of antenna mounts and connectors

Hustler HF Mobile Antennas:

"Standard" Hustler resonators (400 Watt):
10 meter resonator RM-10 $ 12

Hustler 54 inch mobile masts:
MO-1 (folds about 14 inches above ball) $22
MO-2 (folds about 27 inches above ball) $22

Mobile Antenna Mounts:

BNC Mag Mount
Has BNC connector on the mag mount so you can add the
rubber duck from your HT.
Coax has BNC connector for your HT.
It permits one to get the HT rubber duck out of the
car for better performance. $25

Antenna Specialists Mag Mount
with short coax $15

Trunk Lip Mount
Male 3/8 inch stud, with coax. $12

Generic Mag Mount
has female 1/4 inch threaded connection, with coax $12

Mobile Antenna Springs:

I found several mobile antenna springs that appear to
be new. They are the chrome plated type, and designed
for light to medium duty use, i.e. use on VHF type antennas,
and not for heavy duty HF use.

These are about 3 inches long. I have some that are
for 1/4 inch diameter antenna mounts and some for 3/8 inch.

These appear to be new, or at least unused.
They are $5 each.

Ten Meter Mobile Antennas:

All of these are vertical mobile antennas for the 10 meter
band. Unless listed otherwise, all are for what is normally

called an "Antenna Specialists" mount, which is sort of a
reversed PL-259 type of connection. All have a spring just
above the coil, at the bottom of the whip. All are about
3 to 3.5 feet long. I have checked each with an antenna
analyzer, to determine resonant frequency. I am sure that
mounting and surrounding objects might shift this frequency
slightly, but they are adjustable.

Antenna Incorporated - 28.8 MHz - $15

Unknown brand (might be Antenna Specialists) 28 MHz
$15

Unknown brand (might be Antenna Specialists) 29.2 MHz
$15

Magnetic Mount, with antenna, coil, and mag mount as one unit.
About 18 feet of coax, with PL-259 connector.
Breaker brand, 28.35 MHz, $25

VHF Triband Mobile Mag Mount Antenna:

This mobile antenna is a VHF Triband antenna covering the
6 meter, 2 meter, and 440 MHz ham bands. This makes it
ideal for some of the newer multiband and dual band rigs
available today.

The antenna is on the order of 3 feet long and has a
very strong magnet. It has a long coax cable with a
PL-259 connector.

It works great, and looks very close to new. $75

Larsen VHF (2 meter) mobile antennas:

The first two provide about 3 db gain over a quarter wave,
and are very rugged antennas. About 4 feet long.

NMO-150 - for use on 2 meters
About 4 feet long.
This has been the standard of the industry for a very long time.
Coil only $18
Coil with whip $25

LM-150 for 2 meters
Similar to the NMO-150, but for the LM "Larsen Mount"
5/16 inch stud
Coil only $12
Coil with whip $19

NMO-Q - Quarter wave whip for 2 meters
Obviously no gain on this one.
about 19 inches long. $10

Larsen NLA Type Mobile Antennas:

These antennas fit the Larsen NLA mobile mount, which is
a special mount made by Larsen.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 meters.

This one works fine and looks fine also.

Coil only, without whip (whip is hard to ship). $10
With four foot whip. $19

Larsen NLA-UHF coil for 440 MHz
This is the coil only for use on the amateur 440 MHz
band and UHF public service bands. Good condition. $10

Antenna Specialists 2 meter antenna
This is a 5/8 wave antenna with a "Gutter clip" type
mount. This is ideal for more portable or temporary
installations. Includes mount, coil, whip, and coax
with a PL-259 connector. $25

Rubber Duck antennas for your HT:

All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC - Original from Kenwood TH-215, about 5 inches long

5/16 inch threaded, as used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

BNC Stubby for 440 MHz, 3 inches long

ANLI AL-800 dual band HT antenna
This is a telescoping antenna that pulls out to about
a 3 foot length. If covers both 2 meters and 440 MHz,
and has a BNC connector on it. It is rated to have
3.2 dbi gain on 2 meters and 5.6 dbi gain on 440 MHz.
It appears close to new. Only $25.

Coax connectors and adapters:

Prices are per connector.
Several of each are available.
Most are unused.

SPECIAL: Buy 5 and take 10% off.
Buy 10 or more and take 20% off.

UHF Right angle 90 degree elbow connector $3

UHF double female "Barrel connector" $3

UHF "Bulkhead Connector" - Double female, as above, but for
mounting thru a window, siding, etc. about 3 inches long $6

UHF double male connector $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male to BNC female $5

BNC male for coax cables
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T", two female and one male $3

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

2713. Looking for an old standard 4' mobile base mast, with 3/8' studs.

Yahoo group: amatuerradioswapfest
Date: 2013-06-22 18:32:26 UTC
From: Ray LaRue
Topic: 2713 Message: 2713

Looking for the older style 4' base mast which was standard for most older center loaded mobile antennas. I have a Johnson automatic 20/10 dual band coil combo which doesn't have enough inductance to work on a longer Hustler 5' base rod. Anyone have one they are not using?

Your attention is appreciated.
Ray, W4BYG
Cleveland, TN

2714. WTB: WRL Globe Champion Transmitter

Yahoo group: amatuerradioswapfest
Date: 2013-06-23 23:08:29 UTC
From: W0Vt
Topic: 2714 Message: 2714

I'm wanting to buy a reasonably priced WRL Globe Champion or even a Globe King for restoration. If you have one or know of someone who has one please let me know. (I'll be making a trip from Houston through Chicago and Milwaukee around Labor Day so we could close a deal that way too).

Lee, w0vt

2716. FS: Heathkit DX100 Parts

Yahoo group: amatuerradioswapfest
Date: 2013-07-04 03:10:05 UTC
From: Bry Carling
Topic: 2716 Message: 2716

FOR SALE:

Many parts for the DX100 bandswitching AM and CW transmitter. Tested and in first class condition.

Several transformers, tube sockets, chokes, switches, coils, coils, RF final inductor, variable
capacitors etc. are currently available.

Example: Modulation transformer (1 only) at $75.00
AF Driver Transformer $25.00
Drive potentiometer with all mounting hardware including shaft and bushing $15.00
Ceramic 1625 tube sockets - $10.00 for the pair.
Ceramic 6146 tube sockets - $10.00 for the pair.
DX100 Chassis, with many small parts - $25.00
shipping additional.

For pricing and a complete list with details please see:

From: Ken Simpson, W8EK
Topic: 2718 Message: 2718

Vintage books, Manuals, and other publications For Sale:

Reference Data for Radio Engineers:

This book published by Sams / ITT is somewhat similar
to an ARRL Handbook, but in much more depth and detail,
since it is designed for engineers.

This book covers the fields of research, development,
production, operation and education for radio engineers.
It is loaded with tables and charts necessary in
communications. Excellent resource book when looking for
data,from the acoustic spectrum to radio wave propagation.

This one is the Sixth Edition printed in 1978, but the
basic information has not changed much.

This one is hardback, and it is in excellent condition,
close to new. The cover does not even appear to be worn.
This exact book in this condition is selling on Amazon
from between $123 and $338.
Buy this one for only $75.

A R R L Handbooks:

The first one is older and in the smaller format.
The last three are in the larger format.

1962 - 39th edition
Good condition, with many nice ads for vintage
equipment. $10

1981-58th edition
Cover is taped, and binding shows fading;
pages are yellowed, but intact and good. $8

1984-61st edition
It looks close to new. $15

1988-65th edition - Hard bound
This one is a couple inches thick.
Very close to new condition. $22

ARRL Books about Operating your ham station:

ARRL "Radio Amateurs Operating Manual"
2nd edition, $8
4th edition, inch thick $10

5th edition, over an inch thick, $12

ARRL "Operating an Amateur Radio Station"
1972 - 53rd edition $4
1976 - 57th edition $3
1978 - 58th edition $3
1983 - 61st edition $3

ARRL Public Service Communications - $3 each
Eighth Edition
Ninth edition
no edition number listed, looks fairly recent

ARRL Amateur Radio Field Resources Directory
First edition, $7

CQ: The Packet Radio Operators Manual
By Buck Rogers, K4ABT, Close to new condition, $14

ARRL Your Packet Companion
by Steve Ford, WB8IMY; like new. $8

The Radio Amateur's Digital Communications Handbook
By KR3T, J Mayo, Published by Tab, Hardback Book,
Like New, 208 pages, $12

Vintage ARRL Publications:

These are in the smaller 6.5 x 9.5 inch format.
Most have some very nice vintage ads in them.
All are very pristine, in close to new condition.

ARRL Specialized Communications Techniques
1975, First Edition, $15

ARRL Radio Amateur's VHF Manual
1966, 11th edition, $12
1972, Third Edition, $8

Fifty Years of ARRL, 1965, $5

ARRL Hints and Kinks for the Radio Amateur
1968, Close to new condition, Collectible. $12

ARRL Single Sideband for the Radio Amateur
1970, Fifth edition, $12

The next three are in the larger 8.5 x 11 inch format.

ARRL Radio Frequency Interference
1978, First Edition, $6

ARRL Electronics Data Book
1976, First Edition, $6

ARRL Learning to Work with Integrated Circuits,
First edition $10

Digital and Satellite Books:

The Radio Amateur's Digital Communications Handbook
By KR3T, J Mayo, Published by Tab, Hardback Book,
Like New, 208 pages, $12

The Packet Radio Operators Manual published by CQ
By Buck Rogers, K4ABT,Close to new condition, $12

Your Packet Companion by Steve Ford, WB8IMY
ARRL, First Edition, $5

Tab Books:"Oscar: The Ham Radio Satellites"
by recent silent key Dave Ingram, K4TWJ
First Edition, Hardback, Like new, $14

ARRL Tune in the World with Amateur Radio, $3

ARRL Now You're Talking, $10

ARRL Tech Q & A, $8
ARRL Advanced and Extra Q & A, $3

ARRL License Manuals - $3 each
All classes
Technician Class
General Class
Advanced Class
Extra Class

Ameco Ham Licensing Publications:

These are all Ameco Publications that are in
extremely nice, close to new, condition.

Ameco "Question and Answer License Guide"
1956 - apparently First Edition
some writing in it (answers circled) but in
extremely nice condition. Cover looks new. $8

Ameco "Complete Technician Radio Amateur FCC Test
Manual" $3

Ameco "General Class Radio Amateur FCC Test Manual"
Like new $4

Ameco "Advanced Class Radio Amateur License Guide"
First Edition, like new $5

Ameco "Advanced Class Radio Amateur FCC Test Manual"
First Edition, Like New $6

W5YI Books, Misc Licensing Materials:

W5YI Books:
"Ham Operator Education Package" $4
W5YI "Rules and Regulations - Part 97 Amateur Radio
Service" $4

Miscellaneous Licensing material:

General Class License Manual by Gordon West, WB6NOA
Second Edition - Like New - $3
Fifth Edition - Like new - $5

Upgrade to General Class by Don Stoner, W6TNS
$4

Advanced Class License Manual by Gordon West, WB6NOA
"New Edition" - Second Edition, $4

FCC Rule Books and related ham publications:

ARRL "FCC Rulebook"
Sixth Edition, $3
Seventh Edition, $3
Eighth Edition, $4
As above, but "Newly Revised to include Codeless
.....Technician" - Like New, $6
13th edition $10

W5YI"Ham Operator Education Package" $4
"Rules and Regulations - Part 97 Amateur Radio Service"
Fourth Edition $3
17th Revised Edition $4

Vintage CQ, 73, and QST Magazines:

CQ Magazine - 50 cents each
1962 - 5
1983 - 8

73 Magazine - 50 cents each
1976 - 9, 12, and "Holiday"
1977 - 1, 8, 11,
1978 - 1, 3, 5, 6,
1979 - 2, 3, 4, 5,
1981 - 11
1983 - 8, 9, 10, 11, 12
1984 - 1, 2, 3, 4, 5, 6, 7, 8,

QST - 50 cents each
1971 - 7
1973 - 4

Ham Radio Amateur "Flying Horse" Callbooks:

All are in extremely nice condition, close to new,
unless listed otherwise.

1995 North American "US" Callbook with over
700,000 listings, including Canadian - $8

1981 Foreign "DX" Callbook - $5

1994 International "DX" Callbook - $5

Service Manuals:

These are service manuals (not operating manuals) in
extremely good condition.

Original Service manual for Kenwood TW-4000 dual bander, $18

"Service Pack" for Santec ST-142/144 HTs
This is similar to a service manual, but Santec calls it a
service pack. It has schematics, circuit explanations,
voltages, etc. $15

Original Manuals for Kenwood equipment:

All manuals are in very nice condition, for Kenwood equipment.
All are Operating manuals unless otherwise specified.
All are original Kenwood manuals only.

TH-21 HT for 2 m, $8
TH-215/315/415 HT for 2 m, 220 MHz, or 440 MHz, $10
TH-225, 2 m HT, $12
TH-235, 2 m HT, $15
TH-241/441/541 mobile FM transceivers
...For 2 m, 440 MHz, & 1200 MHz, $12
TM-221/421 2 m or 440 MHz mobile, $12
TM-261/461 2m or 440 MHz mobile, $12
TM-2570/2550/2530 2 m mobile, $15
TR-2400, 2 m HT, $12
Service manual for TR-2600, 2 m HT, $12
TR-7400, 2 m mobile, $8
TR-9000, 2 m mutimode, $12
TR-9130, 2 m murlimode, $12
TS-120 S/V, HF xcvr, $20
TS-130 S/V, HF xcvr, $20
TW-4000 dual bander mobile, $15
Service manual for TW-4000 dual bander $20
TW-4100 dual band mobile, $15

These are original Kenwood manuals only.

Original Manuals for Kenwood Accessories:

All manuals are in very nice condition, for Kenwood
accessories.

All are original Kenwood manuals only.

BC-5 DC to DC quick charger $2
LF-30A Low Pass Filter $5
MC-30 & MC-35 hand microphones $4
MC-85 desk microphone $4
MS-1 mobile stand $3
PB-1, PB-2, PB-3, & PB-4 battery packs $3
PB-24 battery pack for TR-2400 $2
PB-25 H battery pack for TR-2500 $2
PS-6 power supply $5
PS-30 power supply $4
SMC-24 speaker mic $3
SMC-25 speaker mic $3
SP-430 speaker $2
SP-820 Speaker $2

These are original Kenwood manuals only.

ORIGINAL Icom operating manuals:

Please note that all of these are original Icom manuals
and are not copies. All are in very good condition.
These are original Icom manuals only.

Mobile transceiver manuals:
IC-22 A, 2 m FM transceiver, $10
IC-22 S, 2 m FM transceiver, $12
IC-27 A/E, 2 m transceiver, still in plastic bag, $15
IC-27 H, 2 m FM transceiver, $12
IC-28 H, 2 m FM transceiver, $12
IC-281 H, 2 m FM Transceiver $12
IC-290 H, 2 m FM transceiver, still in plastic bag, $15
IC-736/738, HF + transceiver, $20
IC-751, HF transceiver, still in plastic bag, $25
IC-3200 A/E, Dual Band FM Transceiver $15

ORIGINAL Icom accessory manuals:

Please note that all of these are original Icom manuals
and are not copies. All are in very good condition.
These are original Icom manuals only.

Icom accessory manuals:
BC-30 Desk Charger, $4
BC-35 Desk Charger, $5
BP-2, BP-3, BP-4, BP-5 battery packs, $3
BP-21, BP-22, BP-23, and BP-24 Batteries, $3
DC-1 DC pack for IC-2 AT series HTs, $4
EX-310 Voice Synthesizer, $5
HM-8 Hand Microphone, w/schematic, $5
HM-10 scanning microphone, $3

IC-3 PA Power supply / speaker, $10
RC-10 Frequency controller, $4
SM-5 desk microphone, $3
UT-16 Voice Synthesizer, $5

These are original Icom manuals only.

ORIGINAL Heath manuals:

These are original manuals only, for Heath equipment.
They are in very nice condition. Schematic is in the book.

How to Understand and use your VTVM
Spiral Bound Educational series, $8

GD-600 Photoelectric Light Switch, $5
HD-1234 Coaxial Switch, $5
HD-1426 Relative Field Strength Meter, $5
HD-1481 Remote Coax Switch, $8
HM-15 Reflected Power and SWR Bridge, $5
HM-2140, Dual HF Wattmeter, $8
HW-2021 2 meter HT, No check marks, $9
ID-1290 Weather Station, $10
IM-11 VTVM, $8
IM-36 Transistor Tester, $6
IM-5284 Multimeter, $8

These are original Heath manuals only.

Heathkit Catalogs:

These are the catalogs that Heath sent to many of us
years ago, featuring all of the Heath products.
All catalogs are in very good condition.
Most look to be unread.
All are $3 each plus shipping from Florida.

Christmas 1982 - #859
Spring Summer 1983 - # 861 R
Winter 1983-84 - #864 R
Spring 1984 - #865 R

I also have many other accessories available such as many
different types of microphones, HTs, various transceivers,
HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

2721. Yaesu FT857 with remote kit $550.00 shipped

Yahoo group: amatuerradioswapfest
Date: 2013-07-09 17:53:18 UTC
From: PottsLadd13
Topic: 2721 Message: 2721

Yaesu FT857 HF-UHF all mode mobile HF radio. This is the original 857, NOT the D. However it has been opened up for 60 meters. The screen has a small blemish in it and the UHF tx is sometimes intermittent. Radio works fine other than the two issues I just stated. I had this radio listed for $575, I've lowered the price to $550. I only accept USPS money orders as payment or cash.
If you have questions please email off list at:

k3emg@...

2722. FS: Transmitter Tubes

Yahoo group: amatuerradioswapfest
Date: 2013-07-10 23:36:49 UTC
From: Bry Carling
Topic: 2722 Message: 2722

FOR SALE: Transmitter Tubes from a Johnson Viking II Transmitter - all tubes available.

V7 and V17 - Pair of RCA 6146 tubes - good, tested - $15.00 each
V3 and V4 - Pair of RCA 807 tubes with plate cap connectors - $10.00 each
Rectifiers - Two RCA 5R4GY tubes - $10.00 each
5V4 rectifier tube - rare - $12.00
All other tubes - V1, V2, V5, V11 - QTY 3 OF 6AU6 plus 6AQ5, 6AL5 - total of 5 tubes.
All of these for $10.00 plus shipping.

These are all good tested used tubes with full output. If anyone would like all of the above
tubes - 12 in total, I will sell them for $75.00

Shipping additional.

2726. HT and HT accessories FS

Yahoo group: amatuerradioswapfest
Date: 2013-07-16 18:11:41 UTC
From: Ken Simpson, W8EK
Topic: 2726 Message: 2726

HTs and HT accessories For Sale:

Azden PCS-300, 2 meter FM HT:

The PCS-300 HT covers the 2 meter band, and has 3 watts in high power or 1 watt in low. It has a very good receiver.

Of course it has memories, and scan features as one would expect. The LCD display is larger than some.

This particular HT is in its original box, and in pristine condition. It includes the desk stand charger, and the earphone is still in the box with it. It includes its manual, with the original warranty card.

All of this for only $60

Yaesu FT-209, 2 meter HT:

The Yaesu FT-209R operates on 2 meters from 144-148 MHz with 2.5 watts. The controls are easy to use. High/Low power and VOX on/off is selectable from the top panel of the radio. 19 soft rubber, dual-function keys provide flexible control. There is an analog meter and digital LCD display, along with 10 memories.

This particular radio is in need of repair, or it can be used for parts. It is dead. It does nothing when turned on. No display, no audio, nothing.

This is the HT only with no accessories for $10

Yaesu VX-7 Reference Manual and Programming cable:

VX-7 Nifty Mini Manual
Has most of the commands that everyone always forgets. Permits one to have the info close at hand without needing to carry the entire operating manual. Spiral bound with laminated pages. Like new. $18

Programming cable
This cable has the threaded connector as used by the VX-7, but it can also be used on the VX-6, 5, 3, etc. Uses USB port. It works great with the free "Chirp" program. I have not tried it with other programs. $18

HT Speaker Microphone:

This HT speaker microphone was made for the
Baofeng UV-3 dual band HTs, but it should fit
many other HTs as well. It has a single 4
conductor connector on it.

This one works fine and is still in its original
box. $8

MFJ-284 HT Speaker Microphone:

This speaker mic has the 3.5 mm and 2.5 mm plugs on
it, as used by Icom, Alinco, Radio Shack, some Yaesu,
and many other HTs.

It works with the following:

YAESU 109, 209, 709, 23, 73, 33, 727 and other YAESU
radios which are pin compatible with the above rigs.

ICOM 2AT, 02AT, 3AT, 03AT, 4AT, 04AT, 12AT, u2A, u2AT,
u4AT and other ICOM radios which are pin compatible
with the above rigs.

ALINCO DJ-560 and other ALINCO radios which are pin c
ompatible with the DJ-560

RADIO SHACK - most

SANTEC ST-20

It works great, and looks like new.

With paper work for $15.

Accessories for the Kenwood TH-21 / 31 / 41 series HTs:

Antenna adapter that fits the TH-21 series HTs, and has
a BNC on the other end. $10

Kenwood SC-8 T "Soft Case" for any of the TH-21 series HTs
great condition $12

Original Operating manual for TH-21 HT for 2 meters $8

Kenwood W09-0315 charger
This charger is used to charge the larger PB-21 H batteries
for the TH-21 series, and also on other Kenwood radios.
It has a standard 2.1 mm coaxial connector. $12

Icom BC-127 A, Battery Charger for Icom IC-Q7A
Dual Band HT:

This charger charges the NiCads or NiMH for the IC-Q7 A
Dual band HT, and Icom R-2 receiver, and probably
others.

This one appears to be new, unused, still in its bag.
Icom lists them at $21.
Buy this one for $10.

HT Belt Clips and Wrist Straps:

Belt Clips:
All include the hardware with the belt clip and are $6 each.
Icom IC-2 AT
Motorola
Yaesu FT-207
Yaesu FT-209

Wrist Straps for various HTs - $4 each
Kenwood TH-215 / 225 / 415, TR-2500, etc.
Kenwood TR-2400
Yaesu FT-209

Antennas for your HT:

All rubber ducks are for 2 meters, are in good condition, and are $10 each, unless stated otherwise.

BNC - Original Alinco EA0024 - 4 inches long

BNC - Original from Kenwood TH-215, about 5 inches long

BNC Connector about 7 inches long

Type F connector - 6.5 inches long

BNC Stubby for 440 MHz, 3 inches long

Optoelectronics Model 7010.1 Precision Frequency Counter:

The Opto 7010.1 freq counter is a really deluxe unit. It operates up to 600 MHz. This particular model features an extra precision TCXO, guaranteed at 0.1 ppm. Most of these counters came with a "standard" TCXO that was 1 ppm.

This unit has three frequency ranges -- 10 hz to 12 MHz, 10 MHz to 50 MHz, and 25 to 600 MHz. It also has three time base counting periods of .1 second, 1 second, and 10 seconds.
This permits extreme precision!

This unit functions flawlessly, and looks like it has never been used, other than for my testing of it. It is in its original box, complete with power cube, the original manual, the original warranty card (not filled out), and certificate of calibration.

All of this for only $125.

Crystals for 2 meter ham rigs:

Does anyone have an older two meter ham rig and need crystals?

Maybe I can help. I have some 2 meter crystals available -- both transmit and receive. Most are in the 146 and 147 MHz band segments, with very, very few in the 145 MHz segment, and none in the 144 MHz segment. These are for ham rigs only, and not commercial rigs.

These are all the small HC-25 crystals, like are used in most of the solid state 2 meter mobiles and HTs. Please e-mail the operating frequency you need. I have them listed by operating frequency and rig,and not by actual xtal frequency. Send the frequencies you need (transmit or receive), and the rig that you have, and I will see if I can help. I have cross references for the various rigs, so I will know what you need if you give the rig.

Coax connectors and adapters:

Prices are per connector.
Several of each are available.
Most are unused.

SPECIAL: Buy 5 and take 10% off.
Buy 10 or more and take 20% off.

UHF Right angle 90 degree elbow connector $3

UHF double female "Barrel connector" $3

UHF "Bulkhead Connector" - Double female, as above, but for mounting thru a window, siding, etc. about 3 inches long $6

UHF "T" connector with two female (SO-239) and one male (PL-259) connection $5

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male to BNC female $5

BNC male for coax cables
standard type $2crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T", two female and one male $3

I also have many other accessories available such as many different types of microphones, HTs, HF, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

2728. FS: 120V AC Isolation Transformers

Yahoo group: amatuerradioswapfest
Date: 2013-07-20 19:27:19 UTC
From: Bry Carling
Topic: 2728 Message: 2728

FOR SALE - (Two types)

Isolation Transformer rated 1:1 for 120V AC to 120V AC at 12 amps
continuous, 50 - 60 Hz. Excellent condition, and mounted in extra nice 14 gauge gray cabinet
with ON-OFF breaker switch, rubber feet and 4 IEC outlets. This one is rated 1400VA - nice case, with cables. AC Primary Cable and outlet adapter included.
Excellent quality, excellent condition.
Available for $45.00 each plus shipping. (2 available)

Isolation Transformer rated 1:1 for 120V AC to 120V AC at 9 amps
continuous, 50 - 60 Hz. Excellent condition, and mounted in extra nice 14 gauge gray cabinet
with ON-OFF breaker switch, rubber feet and 4 IEC outlets. This one is rated 1000VA - nice case, with cables. AC Primary Cable and outlet adapter included.
Excellent quality, excellent condition.
Available for $35.00 plus shipping. (1 only)

2729. Mobile Antennas FS

Yahoo group: amatuerradioswapfest
Date: 2013-07-21 12:54:31 UTC
From: Ken Simpson, W8EK
Topic: 2613 Message: 2729

Mobile Antennas For Sale:

HF, VHF, and UHF antennas, plus a variety
of antenna mounts and connectors

Hustler HF Mobile Antennas:

Hustler 54 inch mobile masts:
MO-1 (folds about 14 inches above ball) $22
MO-2 (folds about 27 inches above ball) $22

Mobile Antenna Mounts:

BNC Mag Mount
Has BNC connector on the mag mount so you can add the
rubber duck from your HT.
Coax has BNC connector for your HT.
It permits one to get the HT rubber duck out of the
car for better performance. $25

Antenna Specialists Mag Mount
with short coax $15

Trunk Lip Mount
Male 3/8 inch stud, with coax. $12

Generic Mag Mount
has female 1/4 inch threaded connection, with coax $12

Mobile Antenna Springs:

I found several mobile antenna springs that appear to
be new. They are the chrome plated type, and designed
for light to medium duty use, i.e. use on VHF type antennas,
and not for heavy duty HF use.

These are about 3 inches long. I have some that are
for 1/4 inch diameter antenna mounts and some for 3/8 inch.

These appear to be new, or at least unused.
They are $5 each.

Ten Meter Mobile Antennas:

All of these are vertical mobile antennas for the 10 meter
band. Unless listed otherwise, all are for what is normally
called an "Antenna Specialists" mount, which is sort of a
reversed PL-259 type of connection. All have a spring just

above the coil, at the bottom of the whip. All are about
3 to 3.5 feet long. I have checked each with an antenna
analyzer, to determine resonant frequency.

Antenna Incorporated - 28.8 MHz - $15

Unknown brand (might be Antenna Specialists) 28 MHz
$15

Unknown brand (might be Antenna Specialists) 29.2 MHz
$15

Antenna Specialists Mag Mount with short coax
Can be used with any of the above 10 meter antennas $15

Larsen VHF (2 meter) mobile antennas:

The first two provide about 3 db gain over a quarter wave,
and are very rugged antennas. About 4 feet long.

NMO-150 - for use on 2 meters
About 4 feet long.
This has been the standard of the industry for a very long time.
Coil only $18
Coil with whip $25

LM-150 for 2 meters
Similar to the NMO-150, but for the LM "Larsen Mount"
5/16 inch stud
Coil only $12
Coil with whip $19

NMO-Q - Quarter wave whip for 2 meters
Obviously no gain on this one.
about 19 inches long. $10

Larsen NLA Type Mobile Antennas:

These antennas fit the Larsen NLA mobile mount, which is
a special mount made by Larsen.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 meters.

This one works fine and looks fine also.

Coil only, without whip (whip is hard to ship). $10
With four foot whip. $19

Larsen NLA-UHF coil for 440 MHz
This is the coil only for use on the amateur 440 MHz
band and UHF public service bands. Good condition. $10

Antenna Specialists 2 meter antenna
This is a 5/8 wave antenna with a "Gutter clip" type mount. This is ideal for more portable or temporary installations. Includes mount, coil, whip, and coax with a PL-259 connector. $25

Rubber Duck antennas for your HT:

All rubber ducks are for 2 meters, are in good condition, and are $10 each, unless stated otherwise.

BNC - Original Alinco EA0024 - 4 inches long

BNC - Original from Kenwood TH-215, about 5 inches long

BNC Connector about 7 inches long

Type F connector - 6.5 inches long

BNC Stubby for 440 MHz, 3 inches long

Coax connectors and adapters:

Prices are per connector.
Several of each are available.
Most are unused.

SPECIAL: Buy 5 and take 10% off.
Buy 10 or more and take 20% off.

UHF Right angle 90 degree elbow connector $3

UHF double female "Barrel connector" $3

UHF "Bulkhead Connector" - Double female, as above, but for mounting thru a window, siding, etc. about 3 inches long $6

UHF "T" connector with two female (SO-239) and one male (PL-259) connection $5

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male to BNC female $5

BNC male for coax cables
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T", two female and one male $3

I also have many other accessories available such as many different types of microphones, HTs, HF, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

4 ft. Fiberglass Military Poles for Sale

These poles are great for permanent and temporary antennas!

They are great for HF, VHF and UHF antennas!

Experiment in the back yard, go portable, use on Field Day, or for EMCOM and even permanent installations, with or without guying depending on load. The sections are not tapered but have a fitting embedded in one end that slides inside the next section which enhances their strength and usefulness! I regularly go up 30 ft for wire and lightweight 2 meter antennas without guying.

Bundles of 5 poles $20 each + shipping

Please indicate how many bundles you are ordering..

Will ship by any regular carrier, but UPS or FEDEX are preferred.

Payment via PayPal to W2TTT@...

Inquires to Gordon W2TTT@... or 201.314.6964

Thanks & 73,

Gordon Beattie, W2TTT

2731. FS: Heathkit DX100 Parts

Yahoo group: amatuerradioswapfest
Date: 2013-07-21 18:08:55 UTC
From: Bry Carling
Topic: 2716 Message: 2731

FOR SALE:
Bunch of Heathkit DX100 parts - just about anything you need at present anyway...

Examples:

HV transformer - $65.00

Plate supply choke - $20.00

DX100 Modulation Transformer - in good working condition with long leads - $75.00 plus shipping

AF Driver transformer, in good working condition with long leads - $25.00 plus shipping

LOW VOLTAGE CHOKE - excellent with long leads - $15.00

Plate tuning capacitor - $25.00

Drive tuning capacitor - $5.00

LOADING variable capacitor - $20.00

Loading switched capacitors assembly with rotary switch and fixed capacitors - $9.00

COMPLETE SET OF ALL TUBES - $65.00

COMPLETE VFO Assembly with tube - $50.00

DX100 Front Panel - complete. Looks very good - $25.00

DX100 CABINET - complete. The outer cabinet panels require cleaning due to being a bit grubby but otherwise looks great. Available for $40.00

RF TANK COIL ASSEMBLY, bandswitching with mtg hardware - $15.00

DRIVER COIL ASSEMBLY, bandswitched - $5.00

Bandswitch assembly - complete with all sections, hardware and lever - $15.00

Complete set of the knobs (missing one small red one) - $35.00 for all.

Pair of 6146 octal sockets, ceramic and mounting hardware, ceramic - $10.00

Pair of 1625 tube sockets (7-pin), ceramic and mounting hardware, ceramic - $10.00

Two main electrolytic can Capacitors - $10.00 each. (Two sets available)

LV can Capacitor - $5.00

Bleeder Resistor, 15K + 15K with mounting hardware - $4.00

Wire-wound Potentiometer, AF Drive 25K - $10.00 (SALE PENDING)

Pair of 1625 ceramic plate cap connectors - $10.00

Plate RF choke assembly for RF final - $20.00

RF Final Coil with taps for all bands. Plus auxiliary coil - $18.00

Buffer coil - bandswitched - $8.00

Main Loading Variable Capacitor 3-gang, 0 - 500 pF each - $25.00

Pair of Toggle Switches for AC Power ON and Plate Supply ON - $3.00 for the pair.

Band Switch Assembly with shaft and bushing - $15.00 (SALE PENDING)

DX100 Chassis assembly including all shields, wiring harness, line filter, VFO socket etc. $25.00

Experiment in the back yard, go portable, use on Field Day, or for EMCOM and even permanent installations, with or without guying depending on load. The sections are not tapered but have a fitting embedded in one end that slides inside the next section which enhances their strength and usefulness! I regularly go up 30 ft for wire and lightweight 2 meter antennas without guying.

Bundles of 5 poles $20 each + shipping

Please indicate how many bundles you are ordering..

Will ship by any regular carrier, but UPS or FEDEX are preferred.

Payment via PayPal to W2TTT@...

Inquires to Gordon W2TTT@... or 201.314.6964

Thanks & 73,

Gordon Beattie, W2TTT

2735. FS: Hustler Base Model G7-144 Vertical Antenna

Yahoo group: amatuerradioswapfest
Date: 2013-07-27 19:16:58 UTC
From: Kyle N4NSS
Topic: 2735 Message: 2735

This antenna was probably put up on the tower sometime in late October-November 2012 at the estate of W9DVM (SK).
New at $195.00 It is assembled and tuned.
Asking $125.00 delivered Tampa Bay area.
Info:

http://www.dxengineering.com/parts/hsr-g7-144
Hustler Base Model G7-144 Vertical Antenna
Hustler base model G7-144 vertical antennas feature a 7 dB maximum effective gain, which provides a more consistent pattern, even in marginal areas. Extremely low-angle stacked 5/8 wave radiators provide superior gain. Harsh environments do not affect their mechanical or signal integrity. They are constructed from high-strength aluminum and fiberglass for all-weather durability. Hustler Antenna base model G7-144 vertical antennas are totally self-supporting and are easily assembled. When they are disassembled, the longest part is approximately 4 ft., which makes them easy to handle and move.
Brand: Hustler Antenna
Manufacturer's Part Number: G7-144
Part Type: VHF/UHF Base Vertical Antennas
Product Line: Hustler Base Model G7-144 Vertical Antennas
DXE Part Number: HSR-G7-144
Vertical Antenna Height: 15.33 ft.
Antenna Material: Fiberglass/Aluminum
Antenna Power Rating: 1,000 W
Antenna Connector: Type N, female
Mast Mounting Type: Clamp-on
Mast Mounting Clamp Minimum: 1.000 in.
Mast Mounting Clamp Maximum: 1.750 in.
Wind Surface Area: 0.97 sq. ft.
Wind Survival: 100 mph
Antenna Weight: 10.00 lbs.
Notes: Mast clamp hardware included.
Band Coverage: 2 meters
Frequency Coverage Range: 144-148 MHz
Vertical Antenna Gain: 7.0 dBd

Kyle N4NSS n4nss@... see picture at: http://www.buysellnet.net/

2736. Power Supplies FS

Yahoo group: amatuerradioswapfest
Date: 2013-07-30 23:17:22 UTC
From: Ken Simpson, W8EK
Topic: 2487 Message: 2736

Several Power Supplies For Sale
From high current to low current

Icom PS-30 Deluxe Metered Power Supply:

The Icom PS-30 power supply is a deluxe supply that delivers
13.8 VDC at 25 amps. This power supply features a meter which
can be set to display amperage or voltage. Four outputs are
provided on the rear panel. Output 1 is a hard wired, high
amperage cable with the Icom standard 6 pin Molex plug.
Outputs 2, 3 and 4 provide lower current 13.8 VDC output.
This power supply has a snap-out tilt bracket.
Size: 9.5 x 5 x 12.5 inches.

This particular supply works fine, and looks very close to new.
Absolutely pristine. It is in its original box, with paper work.
$200

TenTec 25 amp switching power supply:

"Switcher / 25" 25 amp switching power supply

This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel
around it. It is in a case that is the same size as a 243
remote VFO. It has an ammeter on the front, along with
Switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,
but says "Switcher/25" on it. It is electrically very quiet,
and well shielded. It does not produce any electrical noise
that I could find.

Of course it works fine, and looks fine also. $140

Astron RS-20A Power Supply:

The RS-20A is a DC Power Supply producing 13.8 V DC (internally
adjustable from 11 to 15 V DC) at up to 16 amps continuous and
20 amps ICS. The RS-20 features crowbar over voltage protection
and fold-back current limiting to protect your equipment.

This particular supply works fine, and looks very close to new.
There is one very small scratch that can be seen if the light
is just right, but is not normally visible.

With paper work for $60.

Kepco Variable Bench Power Supply:

This is an ideal bench power supply! It is a Kepco Model ABC 40-0.5, which means that it will produce from zero up to 40 V DC at up to 1/2 amp. Great for the bench.

The voltage is adjustable with a 10 turn pot from close to zero, up to about 40 volts. There is a fairly large analog meter that reads the voltage. There is also current limiting built in that is adjustable from about 100 ma to up to about 700 ma. The same meter that reads voltage can be switched to read current, or short circuit current (the point that the current limit is set). In addition, there are connections on the back to allow remote sensing and remote programming. This is a quality regulated power supply!

This particular unit works 100%, and looks extremely nice.

Only $85.

Micronta 22-120 A Regulated power supply:

This supply is rated at 2.5 amps at 13 V DC. It is well regulated. It has a switch and LED power light on the front, with a circuit breaker and output terminals on the back. The case (left and right side and top) is basically all a heat sink, so it should cool the regulator well.

This one works fine and looks like new. No scratches. $30

KemTronics Power Supply:

This power supply is in a slopped enclosure that is made to set your rig on top, at an angle for good viewing and sound. It is good for about 3 amps, or to put it another way, would be great for powering 2 meter rigs in the 10 to 15 watt category.

This one is a "Tech Special". It produces no output voltage. It looks fine, however. $5

"Wall Wart" Power Supplies:

All of these are "regular" wall warts - not the new switching type that create all sort of noise in your receiver. Use one of these, and leave the noise behind.

12 V DC at 625 ma
Many uses for the 12 volt variety! $14

Heathkit "Converter / Charger"
9 Volts DC at 100 ma.
No Heath number on this, and I don't know what it was used on originally. It can be used either as a 9 Volt DC "power pack" or as a charger. It has a 2.5 mm male plug on it, with

the tip positive, so it can be used on many devices. $10

9 Volt DC at 500 ma
This one was used on a MFJ 422 keyer, but will also power other items needing 9 V DC at low current. It has a 2.5 mm male plug on it, tip positive. $12

I also have many other ham items available. Please e-mail me if you have specific needs. I might be able to help you.

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

2739. Icom HF rig, PS, and many accessories FS

Yahoo group: amatuerradioswapfest
Date: 2013-08-13 14:30:13 UTC
From: Ken Simpson, W8EK
Topic: 2739 Message: 2739

Icom items For Sale --
HF Transceiver, Power Supply, Desk Microphone,
Service Manual, Crystal Filter, Accessory
Cable, Voice Synthesizer, Original Boxes,
Cable / Adapter, Speaker Microphone, Charger
and DC Adapter, Manuals, and other Miscellaneous
Items

Icom IC-751 HF Transceiver:

The Icom IC-751 is an advanced transceiver covering 160 to
10 meters. It features a high performance 100 KHz to 30 MHz
general coverage receiver built in. Output is 10 to 100 watts
SSB/CW/RTTY modes (10 to 40 watts AM). The IC-751 has
sophisticated capabilities such as: dual digital VFOs,
all-mode squelch, Notch, Passband Tuning, RIT/XIT, pre-amp
and attenuator. You also get 32 memories. The two color
fluorescent digital display is easy to read. There is a
multi-function meter. Full and semi break-in CW capability.

Features:
All Mode
Analog S/RF Meter
180-10 Meters
All Mode Squelch
100 Hz Display
CW break-in
PBT
32 Memories
RIT/XIT
Noise Blanker
Notch

This particular unit is pristine. If the SK who had this unit used,it,
it does not show. I have checked it out and of course it operates fine.

With paper work for $450.

Icom PS-30 Deluxe Metered Power Supply:

The Icom PS-30 power supply is a deluxe supply that delivers
13.8 VDC at 25 amps. This power supply features a meter which
can be set to display amperage or voltage. Four outputs are
provided on the rear panel. Output 1 is a hard wired, high
amperage cable with the Icom standard 6 pin Molex plug.
Outputs 2, 3 and 4 provide lower current 13.8 VDC output.
This power supply has a snap-out tilt bracket.

Size: 9.5 x 5 x 12.5 inches.

This particular supply works fine, and looks like new.
It is in its original box, with paper work. $200

Icom SM-6 microphone:

The Icom SM-6 is a unidirectional, electret microphone
designed for base station operation with many Icom
transceivers. The SM-6 features a switch for push to
talk and also a lock feature. There is a free-bending
neck for convenient adjustment. On the bottom of the
mic base there is a level adjustment. This mic is
powered from the Icom transceiver. The mic cable
terminates to a standard round Icom 8 pin mic plug.
This mic works with the Icom 28, 78, 271, 275, 471,
475, 718, 745, 746, 746 Pro, 756, 756 Pro, 756 Pro II,
775, 781, 900, 901, 970, 1275 and many others.

This one works 100% and looks very nice. No scratches.
Wind screen included, along with paper work for $65.

Icom 751 Service Manual:

This is an original service manual for the IC-751.
It must be an inch thick! It appears like it was
never used. $28

Icom EX-310 Voice Synthesizer:

The EX-310 is used in many Icom rigs, including the IC-751,
IC-761, IC-271, IC-471, R-71 A, R-7000, and others. This
is a voice synthesizer that permits the frequency to to be
read out in a nice readable voice. It is ideal for blind
and sight impaired hams, but it is useful to anyone.

This particular unit is still in its original box, works 100%
and includes cables and paper work for hookup, all for $100.

Icom FL-52 A, 500 Hz Filter:

This is the "good one" with the steep shirts for
the 455 KHz IF. With the 500 KHz bandwidth it is
useful for narrow CW but it is also useful for
digital work as well.

It works with the IC-703, 718, 736, 737, 738, 740,
745, 746, 751, 751A, 756, 78, R75, R8500, and
likely others.

This one is in its original box, with original paper
work and hardware. I don't think it has ever been
used. There are not even finger prints on the filter!

AES sells this for $200. Buy this one in the same
condition for only $150.

Icom 24 pin accessory cable:

Icom uses a cable with a 24 pin molex connector on many
rigs for many purposes. Additional pins can be added
for additional functions, if desired. Consult the manual
for your rig for exact functions.

This cable was a gray, a yellow, and a red cable, each
with RCA phono connectors on them. I think it was used
to interface digital modes, but I am not 100% certain
of that.

This one is in good shape. $20

DC Power Cable

This is the heavy duty power cable as used on most of
the Icom HF rigs, plus also many Kenwood, Alinco, and others.
It has the 6 pin molex connector, with four pins used - two
for plus and two for ground. The cable may not have ever
been used. At least it looks good, and of course works
fine. $22

Original Boxes for Icom IC-2 AT, IC-22 and IC-27:

The original box for the IC-2 AT includes the styrofoam
insert that holds the HT, charger, and other accessories.
It even has the cardboard box for the charger with it.
It is in nice condition. $8

The box for the IC-22 A includes the two "clam shell"
styrofoam pieces that hold the rig and accessories.
It is in good shape. $8

The box for the IC-27 includes the two internal
styrofoam inserts that holds the rig, the cardboard
box for accessories that also acts as a spacer,
and even includes the original plastic bag for
the rig.
It is in nice condition. $10

Astron RS-20A Power Supply:

The RS-20A is a DC Power Supply producing 13.8 V DC (internally
adjustable from 11 to 15 V DC) at up to 16 amps continuous and
20 amps ICS. The RS-20 features crowbar over voltage protection
and fold-back current limiting to protect your equipment.

This particular supply works fine, and looks very close to new.
There is one very small scratch that can be seen if the light
is just right, but is not normally visible.

With paper work for $60.

Icom BC-72 A Desk Charger:

The Icom BC-72 A is a desk charger that will "fast charge" the BP-81 thru BP-85 battery packs used in the "S" series of HTs in about an hour or so. This charger operates from 13 V DC with the supplied wall wart, but it can also be used with a CP-12 DC cable from a cigarette lighter.

This particular unit works fine and is still in its original box. Of course paper work is included for $25.

Icom Battery Charger:

Icom BC-127 A, Battery Charger for Icom IC-Q7A Dual Band HT:
This charger charges two AA NiCads (or NiMH) for the IC-Q7 A Dual band HT, and Icom R-2 receiver, and probably others.
This appears to be new, unused, still in its bag.
Icom lists them at $21. Buy this one for $12.

Icom DC-1, 13 V DC adapter for many Icom HTs:
This adapter slides on the HT, in place of the battery pack. If 13 V DC is applied, it converts the voltage to the proper voltage for the HT. It can be used with the IC-2, IC-3, IC-4,IC-02, IC-03, IC-04, and others. This one works fine, and looks very nice. With paper work for $18.

Icom CP-1 DC cord
This cord will work with the DC-1 above, plus many other items needing the 2.1 mm coaxial power plug. The opposite end has a cigarette lighter plug on it. $10

MFJ-284 HT Speaker Microphone:

This speaker mic has the 3.5 mm and 2.5 mm plugs on it, as used by Icom, Alinco, Radio Shack, some Yaesu, and many other HTs.

It works with the following:

YAESU 109, 209, 709, 23, 73, 33, 727 and other YAESU radios which are pin compatible with the above rigs.

ICOM 2AT, 02AT, 3AT, 03AT, 4AT, 04AT, 12AT, u2A, u2AT, u4AT and other ICOM radios which are pin compatible with the above rigs.

ALINCO DJ-560 and other ALINCO radios which are pin c ompatible with the DJ-560

RADIO SHACK - most

SANTEC ST-20

It works great, and looks like new.

With paper work for $15.

HT Belt Clips and Wrist Straps:

Belt Clips:
All include the hardware with the belt clip and are $6 each.
Icom IC-2 AT
Motorola
Yaesu FT-207
Yaesu FT-209

Wrist Straps for various HTs - $4 each
Kenwood TH-215 / 225 / 415, TR-2500, etc.
Kenwood TR-2400
Yaesu FT-209

Antennas for your HT:

All rubber ducks are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC - Original from Kenwood TH-215, about 5 inches long

BNC - Original Alinco EA0024 - 4 inches long

BNC "Stubby" about 4 1/2 inches long

BNC Connector, about 7 inches long

Type F connector - 6.5 inches long

BNC Stubby for 440 MHz, 3 inches long

ORIGINAL Icom operating manuals:

Please note that all of these are original Icom manuals
and are not copies. All are in very good condition.
These are original Icom manuals only.

Mobile transceiver manuals:
IC-22 A, 2 m FM transceiver, $10
IC-22 S, 2 m FM transceiver, $12
IC-27 A/E, 2 m transceiver, still in plastic bag, $15
IC-27 H, 2 m FM transceiver, $12
IC-28 H, 2 m FM transceiver, $12
IC-281 H, 2 m FM Transceiver $12
IC-290 H, 2 m FM transceiver, still in plastic bag, $15
IC-736/738, HF + transceiver, $20
IC-751, HF transceiver, still in plastic bag, $22
IC-3200 A/E, Dual Band FM Transceiver, $15

IC-751 HF Transceiver SERVICE manual, $28

Other Icom manuals:
BC-30 Desk Charger, $4
BC-35 Desk Charger, $5
BP-2, BP-3, BP-4, BP-5 battery packs, $3
BP-21, BP-22, BP-23, and BP-24 Batteries, $3
DC-1 DC pack for IC-2 AT series HTs, $4
EX-310 Voice Synthesizer, $5
HM-8 Hand Microphone, w/schematic, $5
HM-10 scanning microphone, $3
IC-3 PA Power supply / speaker, $10
RC-10 Frequency controller, $4
SM-5 desk microphone, $3
UT-16 Voice Synthesizer, $55

These are original Icom manuals only.

I also have many other accessories available such as many different types of microphones, HTs, HF, VHF and UHF rigs, HF and VHF/UHF antennas, HF linear amplifiers, and many other accessories.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

2744. Collins Filter Questions

Yahoo group: amatuerradioswapfest
Date: 2013-08-20 13:30:51 UTC
From: Bry Carling
Topic: 2744 Message: 2744

I have a Collins Mechanical Filter F455-FB-21 (6W2) - it looks new.

Can anyone tell me what radio this was used in? What bandwidth is the filter?
I presume it is a 455 kHz filter.

Does anyone have any idea what this filter is worth? I have two crystals with it so presumably
it i was used as an SSB generator, or they were used as BFO crystals. 453.58 kc. and 456.43 kc.

Thanks for any helpful ideas.

Bry AF4K

2745. RE: Collins Filter Questions

Yahoo group: amatuerradioswapfest
Date: 2013-08-20 20:52:18 UTC
From: Bry Carling
Topic: 2744 Message: 2745

Thanks to everyone for the replies...

I did find this:

F455 FB 21 1019 6328
PN 526 9448 00
6 terminals, 2 studs, 2.1kHz -3dB Bandwidth

So it is indeed a 455 kHz SSB filter.

They seem to go for asking prices around $85 to $120 on eBay without the crystals.

and thanks to Michael Tauson for finding the following from another site - interesting material:

Your F455FB-21 Mechanical Filter offers the same stability and steep-skirted selectivity characteristic of all Collins mechanical filters. It is a precision built component and should be
treated with care. Do not apply excessive current through the transducer coils or subject the
filter to excessive shock. Treat it as you would a vacuum tube or any piece of precision equipment.

Each filter has 20 db points measured and marked to insure proper crystal frequencies for SSB applications.

Specifications: F455FB-21 Mechanical Filter
Center Frequency..... 455 kc. nom.
Frequency Response
Bandwidth, 6 db attenuation..... 2.1 kc nom.
Bandwidth, 60 db attenuation..... 5.3 kc max.
Passband Response Variation..... 3 db max.
Resonating Capacity..... 130 pf +/- 5 pf
DC Voltage: 300 VDC max. potential between terminals and ground.
Source and Load Impedance
Parallel Resonance..... 50 K ohms min.
Series Resonance..... 1,500 ohms max.

Recommended Operating Parameters:
Signal Input Voltage: 0 to 2 volts RMS. Direct Current: 2 ma max. Shunt feed is recommended to eliminate DC current and potential from transducer coils. Direct current should be shunted around the transducer coils through a 10 mh choke or a suitable resistor. In no case should more than 2 ma of DC be permitted to flow through the filter coils.

In order to obtain full advantage from the mechanical filter, use a common ground connection
and effective shielding between the input and output. Keep the leads from the filter

terminals
as short and direct as possible. If these precautions are not observed, the signals normally
rejected by the filter may bypass the filter through inductive or capacitive coupling.

Vacuum Tube Applications. When the filter is used in vacuum tube circuits, it should be tuned to parallel resonance within the range of 125 to 135 pf. This value will include tube,
stray and wiring capacity. It may consist of a fixed capacitor of 82 to 100 pf, shunted by a
variable capacitor with a range of 5-48 or any similar arrangement that will permit peaking the
filter for maximum output at its center frequency. This will compensate for the inherent capacity existing in the circuit. Both input and output must be resonated. The F455FB-21 is internally terminated; therefore, a high resistance termination (100K ohms or more) is preferred. Mechanical filters are normally used interstage; when the filter is used in I.F. circuits, it essentially replaces an I.F. transformer.

Transistor Application. For low impedance applications the mechanical filter should be tuned
to series resonance; for high impedance requirements parallel resonance should be employed.

On 20 Aug 2013 at 9:30, Bry Carling wrote:

I have a Collins Mechanical Filter F455-FB-21 (6W2) - it looks new.

Can anyone tell me what radio this was used in? What bandwidth is the filter?
I presume it is a 455 kHz filter.

Does anyone have any idea what this filter is worth? I have two crystals with it so presumably
it i was used as an SSB generator, or they were used as BFO crystals. 453.58 kc. and 456.43 kc.

Thanks for any helpful ideas.

2747. HF Linear Amplifiers FS

Yahoo group: amatuerradioswapfest
Date: 2013-08-24 21:38:33 UTC
From: Ken Simpson, W8EK
Topic: 2747 Message: 2747

HF Linear Amplifiers For Sale:

Amp Supply LK-500 Z A, HF Amplifier:

The LK-500 is an HF amp that runs a pair of 3-500 tubes, on the 160 thru 10 meter bands, producing close to the legal limit. On this amp, 30 watts of drive produces about 400 watts out of the amp; 50 watts gives about 650 Watts out; etc.

This amp has a MUCH heavier duty Peter Dahl power transformer, and covers 160 meters. It has a excellent tuned input matching circuit. It is a superior amplifier.

This particular amp works very well. It has a manual step start circuit added, and the electrolytic capacitors have been replaced. Cosmetically it looks very, very nice. I can not find a scratch on it. It looks like new.

Since this is heavy, I would much prefer pickup in the Ocala, FL area.

With paper work for $900.

Ameritron AL-572, HF Amplifier:

Ameritron's new class of Near Legal Limit Amplifiers give you nearly full legal SSB power output for a much lower price. You get 1300 Watts PEP SSB nominal power out on amateur bands 160-15M.

Two lighted Cross-Needle Meters
Grid current, plate current and forward PEP output power are continuously monitored to tell you of proper loading and alert you to abnormal conditions. A fourth scale switches among peak reflected power (and SWR), high voltage, ALC threshold and ALC output voltage.

It has a transmit LED, 12 VDC, 200 mA accessory jack, and 12 VDC keying relay for solid state/tube rigs.
It draws 16 amps at 120 VAC, but can also be used on 240 V AC.

Features:
Instantaneous RF Bias
Step-Start Inrush Protection
Heavy duty power supply
Pi/Pi-L network

Tuned input
Dual lighted Cross-Needle meters
6:1 vernier reduction drives
Four rugged 572 B Tubes

This particular amp is in extremely nice condition
both cosmetically and electrically. Everything works
100% and it looks very close to new.

Paper work included for $900.

TenTec Hercules II 420 HF Amplifier:

This is a fully solid state all-mode HF linear
amplifier covering 1.8 to 30 MHz continuously.
It requires 13.6 VDC at 100 A max. Drive power
is 50 to 80 W typical for 550 W output. Maximum
Power output on SSB/CW/RTTY is 550 W DC at 50%
duty cycle.

This amp features full QSK break in CW. It can
be remote controlled (bands switched remotely)
from many transceivers.

This particular amplifier looks extremely nice.
I can not find a scratch on it. Electrically, I
think all works fine. It requires a 13 V DC power
supply in the 80 to 100 amp category. I only have
a 35 amp supply to test it with. As a result, I
only get 250 watts out of it before the power supply
over current limit kicks off. But all of the QSK
and everything works fine, as long as I keep it low
enough for the power supply I have.

With paper work for $900.

Heath SB-200 HF Linear Amplifier:

The SB-200 uses a pair of 572B tubes, and operates
on 80 thru 10 meters. It may be used on SSB, CW,
or digital modes.

This particular amplifier puts out about 750 watts
on 20 meters, and has been tested for operation on
all bands.

Cosmetically, it is in extremely nice condition.
I can not find a scratch on it.

Paper work is included for $475.

In all cases, pick up of the amplifier is first choice.
The amplifiers are heavy and hard to ship. I am located

near Ocala FL, not far off of I-75.

Obviously, if it necessary to ship, the cost is not
included in the prices listed.

I also have many other accessories available such as many
different types of microphones, HTs, various transceivers,
HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

2748. AEA PK-232 multi-mode modem for sale

Yahoo group: amatuerradioswapfest
Date: 2013-08-30 14:22:37 UTC
From: Ray, W4BYG
Topic: 2748 Message: 2748

I have an AEA PK-232 multi-mode modem for sale. It is in excellent condition, in the original box, includes a 12 VDC 1 amp power supply, interconnect cables and the original factory manual. On a 1 to 10 scale I would rate it a 9.5.

Pictures available on request. Price $100 plus shipping, personal check, USPS MO, or PayPal, is fine.

Please reply off list.

2749. 29 MHz AM

Yahoo group: amatuerradioswapfest
Date: 2013-09-03 10:33:22 UTC
From: Bry Carling
Topic: 2749 Message: 2749

10m sporadic E, trans-equatorial and other exotic modes can often be pretty hot during this time of year. Even with a few watts, contacts can often be made. Suitable crystals are available as follows:

I have a few each of these FT243s left (and numerous other 10m crystals that will work with almost any ham rig from the golden era of tube radio!)

29.000 MHz
29.010 MHz
29.020 MHz
29.040 MHz
29.100 MHz
29.120 MHz
29.160 MHz
29.172 MHz
29.180 MHz

Limited stock available - most of these are $14.00 each.

Some folks say not to expect much from 3 or 4 watts of AM on ten meters, but under the right
circumstances I have made QRP contacts into central Asia and other spots on the opposite side of the globe with decent R5 signal reports each way. Those were with a converted CB rig, so would be similar power levels...

YMMV

10m Crystals

4 ft. Fiberglass Military Poles for Sale

These poles are great for permanent and temporary antennas!
They are great for HF, VHF and UHF antennas!

Experiment in the back yard, go portable, use on Field Day, hilltopping or for EMCOM and even permanent installations, with or without guying depending on load. The sections are not tapered but have a fitting embedded in one end that slides inside the next section which enhances their strength and usefulness! I regularly go up 30 ft for wire and lightweight 2 meter antennas without guying.

Bundles of 5 poles $20 each + shipping
Please indicate how many bundles you are ordering.

Will ship by any regular carrier, but FEDEX Ground or UPS are preferred.
Payment via PayPal to W2TTT@...

Reduced:

Power Transformer - 50V AC at 18 amps with 120V AC primary - heavy - CLEAN, like new, $15.00 plus shipping.

P-3064 USA-made, new Filament transformer 6.3V CT at 6 Amps - $6.00 plus shipping.

12 HENRY Choke at 140 mA NEW TF3SX0422 UTRA 5135 - $4.00

UTC HA-134 transformer - new - $45.00

UTC model S70 transformer, used clean - $45.00

TRIAD HSM-84 Output transformer 5K ohms to 4/8/16 ohms 20 watts, clean - $35.00

Power Supply 65V DC at 12 Amps with additional +/-15V DC at 1 amps and 5V DC at 3 Amps. Very clean. Like new. Has dual primary set for 120V AC. $20.00 plus shipping.

Isolation transformer, extra nice - 4 outlets, 120:120V AC at 12 Amps - $35.00 plus shipping
(two available)

Terminal boards, all new phenolic and fiberglass, for point-to-point wiring. Group includes
three pieces approx. 10" X 1.5" with two rows of 20 turrets. Easily split into smaller pieces,.
Also one 9" X 2" piece with 38 turrets, and four more pieces that are 2.5" X 0.5" with 6 turrets. These turret boards are difficult to find and excellent for tube audio and RF projects.
Sill sell the whole batch for $12.00 plus shipping.

Project cabinet for homebrew radio or electronic construction. Aluminum case with woodgrain
finish looks totally excellent. Rubber feet, sloping cowl on front of the top cover for a rofessional finish. Has rubber feet and measures 9" X 6" X 3" - it looks like something TenTec might have made. QTY 1 available for $5.00

FT243 ORIGINAL CRYSTALS: (while they last)

1816 kHz - $16.00
3732 kHz - $10.00

7025 kHz - $16.00
7050 kHz - $16.00
7075 kHz - $16.00
7100 kHz - $10.00
7125 kHz - $10.00
7150 kHz - $10.00

7163 kHz - $10.00
7164 kHz - $10.00
7172 kHz - $10.00
7175 kHz - $10.00
7194 kHz - $10.00
7200 kHz - $10.00
7225 kHz - $10.00
7245 kHz - $10.00
7250 kHz - $10.00
7275 kHz - $10.00

8025 kHz - $10.00 (2m)
8350 kHz - $10.00 (6m)
8375 kHz - $10.00
8400 kHz - $16.00
8425 kHz - $10.00
8450 kHz - $10.00

Sockets for FT243 crystals:
Ceramic - $8.00
Plastic $6.00

Sockets for hc6u crystals - $3.00

LARGER CR1A Crystals: (thicker pins)

7039 kHz - $14.00
7290 kHz - $14.00 (new)

Socket for CR1A crystals - $6.00

3742 kHz crystals, hc6u new old stock, checked - pack of FOUR (4) for $8.00 plus shipping.

20m FT243 crystals - $5.00 each plus shipping:
14165, 14210, 14213, 14215, 14235, 14247, 14270, 14301, 14312 kHz
Each available for $5.00

Also available: 14286 kHz for $16.00 each.

Shipping additional on everything - combine and dssaave on shipping costs.

E-mail me to arrange purchase or with any questions - or if you need pictures.

B & W Antenna Switches by Barker and Williamson and some other goodies...

1 - B & W Protax Model 376 - this is a 5 position rotary switch and it allows you to also switch
to Ground when desired. Connect your radio equipment and select up to 5 different antennas with this 6 position rotary switch. Includes knob and mounting hardware.

QTY 1 available for $35.00 plus shipping

2 - B & W Coaxial Switch model 591 - this s a two position rotary switch.
Includes knob and mounting hardware.

QTY 1 available for $25.00 plus shipping

3 - Heathkit DX100 VFO with dial. Includes tube etc. and mounting hardware.
Complete and in very good condition. Available for $45.00 plus shipping.

4 - Larger Navy issue CR1A crystal on 7290 kHz with socket. Crystal looks new. Socket is clean, used - $15.00 plus shipping.

5 - Bliley ROUND crystal type BC3 on 1813 KC. Like new, in original box with documentation. Will fit into a 5 pin socklet like 807 or other sockets with 3/4" spacing - $25.00 plus shipping.

6 - Original full sized FT243 crystals - 3712, 3732, 3734, 3742, 7040, 7050, 7070, 7075, 7133, 7150, 7158, 7164, 7165, 7170, 7172, 7175, 7190, 7192, 7194, 7200, 7208, 7225, 7245, 7250, 7275, 8025, 8350, 8375, 8400, 8425, 8450, 14165, 14235, 14210, 14213, 14215, 14270, 14301,
Great for 80m through 10m plus 6m and 2m. This group of crytals only, priced as follows:
Available for $16.00 each plus shipping
Also available, 4 or more for $15.00 each
Also available, 8 or more for $12.00 each

Many other parts available at:
http://www.af4k.com/radios.htm

2767. pcb for sale, newly design DEAD BUG UGLY STYLE PCB's..

Yahoo group: amatuerradioswapfest
Date: 2013-10-05 03:34:12 UTC
From: shubham tiwari VU3SXN
Topic: 2767 Message: 2767

pcb for sale,
newly design DEAD BUG UGLY STYLE PCB's..

especially made for working on SMD designs using regular through hole

components,

material -- good quality Paper Phenolic Pcb
,
the copper pads are tinned so soldering on them is extremely easy,
no corrosion ..

these pcb are ideal for experimenting with different designs and components,as they can be mounted directly to any surface and are easy to apply any design of circuit..

also available is a single strand tinned pure copper wire easy for soldering .mm thickness..meters for only 1 us dollar.

size 1 -- 5 by 5cm square

size 2 -- 5 by 10cm rectangle

cost is very cheap,

cost for size 1 -- 4pieces/per US dollar

cost for size 2 -- 2pieces/per US dollar

minimum order quantity is for dollar 10$.

international shipping is no problem,
will ship with registered post
shipping charges are additional .

i prefer paypal..

email -- vu3sxn@...

here check out the pictures of pcb's --

link -- http://www.flickr.com/photos/32288537@N07/

Thanks & Regards

2768. REDUCED: 160m and 80m $2 crystals, hc6u

Yahoo group: amatuerradioswapfest
Date: 2013-10-08 09:26:26 UTC
From: Bry Carling
Topic: 2768 Message: 2768

Reduced price: 160m experimenter crystal packs

1) 160m - Pack #1 of 5 crystals:
1800, 1801, 1838, 1928, 1930 kHz

2) 160m - Pack #2 of 5 crystals:
1932, 1934, 1935, 1937, 1941 kHz

3) 80m pack - Pack #3 of 5 crystals:
All 5 are on 3742 kHz.

These are all original full size crystals and I have ceramic and plastic sockets available too if
you need them.

The above are available for $10.00 per pack which is $2.00 per crystal.
Shipping additional.

Topic: 2774 Message: 2774

FOR SALE:

Homebrew CW transmitter 6CL6 and 2E26 tubes. Approx.15 watts. Buiilt in AC power supply and relay switching for antenna nd high voltage all built in. Has meter for plate current and all
typical conveniences. 1/4" jack for CW key, and SO 239 connectors for Antenna AND receiver. Uses advanced grid block keying so you can also use it with your keyer.
FT243 crystals may be plugged into the socket on the front. (added later after the picture below was taken.)

Standard PI network output to antenna. Stable, clean signal. Excellent and has made many contacts. Currently set up for 40m CW but may be easily changed to other bands such as 80m, 30m and 20m by swapping out one coil. 120V AC operation.

See:
http://www.af4k.com/imag/ham/2e26_5.jpg
More pictures and details on request... Available for $60.00 plus shipping

TUBE ERA AC power supply. Nicely built classic homebrew point-to-point wired supply wit switches and pilot lamps. Suitable for a medium sized or small sized transmitter up to about
100 watts+ input. Made for 120V AC primary and has outputs of 500V DC at 200 mA and 6.3V AC at 5 amps.
Pictures and details on request... Available for $40.00 plus shipping

CLEGG 99er 6m Transceiver - classic 5 watt AM Transceiver.
50 - 52 MHz. Has SO239 connector for antenna nad tunable receiver.
120V AC operation. Very clean looking for its age. Excellent condition with manual copy.
See mic stand below... See video also:
http://www.youtube.com/watch?v=FDVAIVC_5pk
Pictures and details on request... Reduced to $75.00 plus shipping

Astatic Microphone stand UG type with cable. Has the 3-pin connection in top for a D104 or similar cartridge. Lovely flat black wrinkle paint base, clean and in superior condition. Cable
has connector for the CLEGG 99er listed above. Looks like this one:
http://forums.qrz.com/attachment.php?attachmentid=34264&stc=1&thumb=1&d=128892839
5
(Stand only - no microphone is included)
Pictures and details on request... Available for $15.00 plus shipping

MEISSNER Signal Shifter VFO model EX. This is the bandswitching VFO that actually can be used as a cool tube QRP transmitter and produces more than 5 watts from an 807 RF final tube. This is a great looking example of one of the coolest little transmitter / VFO devices from the golden age of radio.

Has the normal, built-in power supply for 120V AC use. This is one of the nicest ones I have
seen. Pictures and details on request... REDUCED TO $95.00 plus shipping

YAESU FL2100B LINEAR AMPLIFIER - 80m through 10m ham bands
Uses two 572B Tubes. 1200 watts p.e.p. input on 80 through 10m. 120V AC operation.
Comes with a copy of the manual. Pictures and details on request
Available for $500.00 plus shipping

2775. Mobile Tower Shack For Sale

Yahoo group: amatuerradioswapfest
Date: 2013-10-24 04:34:05 UTC
From: J.Gordon Beattie, Jr., W2TTT
Topic: 2775 Message: 2775

I am selling my beloved mobile ham shack with its unique 28 ft crankup tubular tower. The tower can be raised and lowered by hand using a 1/2 inch ratchet handle in about two minutes. The base of the tower is supported by a custom offset base bracket that is inserted into a two inch receiver and a heavy duty custom cargo roof rack on top. Just add a rotator and a suitable mast and you can get up to 45 or more feet with your antennas! This is a great vehicle for EMCOM, Field Day, Hilltopping and more!

It is based on a 1997 Ford E350XLT van with a 6.8l Triton V10 engine that has only 85K miles on it. The van has 385K miles, but it is in fairly good shape, with a bit of rust in spots and a need for a new rear section of the exhaust.

It has two front bucket seats with a bulkhead mount in the front console area for radios, computers and the like according to your preferences. The front console is fed by a piece of fused #4 cable from the battery.

Right behind the front seats, it has a single forward-facing bench seat that faces a large custom operating desk/workbench. It is really great for doing on-site bench work and operating. The bench is long enough to stretch out for a snooze while operating overnights and there is LOTS of cargo room in the rear behind the bench seat for all sorts of gear or even to sleep two or more operators!

It has heavy cabling to an inside electrical box mounted just inside the rear door of the van to provide access to 12V power or to provide a jump, should the need arise. It also features a custom steel ladder on the rear door and 2 inch receiver and electrical hookups for a trailer.

To take a look, please text or call me at 201 314 6964 or email me.
I am asking $3,500.

Thanks & 73,
Gordon Beattie, W2TTT at ARRL dot NET

From: Ken Simpson, W8EK
Topic: 2777 Message: 2777

Wattmeter, and HF Antenna related items For Sale:

MFJ 815 B Cross Needle Peak Reading HF Wattmeter:

Cross needle reads forward and reverse power simultaneously
SWR displayed also
300/3000 Watt forward and 60/600 Watt reverse
peak or average reading meter
160 thru 6 meters
12 V DC needed for lighted meter

This particular unit works fine, and looks very close to new.
With paper work for $65.

Balun / Antenna Center Insulators:

HyGain BN-86 Balun
The case of the BN-86 is constructed so that one can use
it to hang a dipole or inverted V, or a U-bolt can be added
to attach it to the boom of an HF beam antenna.
This particular balun works fine, but does show slight physical
use. It includes the paper work for $40.

VanGorden HiQ Balun
The Van Gorden HI-Q balun is designed to handle full legal
power with a low standing wave radio (SWR). It includes a
hanger for a dipole. Some rust on screw eyes. $10

W2AU ANsulator
The Unadilla W2AU ANsulator? Antenna Center Insulator is handy
for many types of antennas. It features a top eye-bolt for
support (if needed). There are strong eye bolts and spade
lugs on either side for the antenna wire.
It looks to be new. $12

Hustler HF Mobile Antennas:

All work 100% and are in good condition.

Hustler 54 inch mobile masts:
MO-1 (folds about 14 inches above ball) $22
MO-2 (folds about 27 inches above ball)
..... NEW, still sealed in the package, $30

"Super" Hustler resonators (high power version):
75 meter RM-75 S, $35
40 meter RM-40 S, $25

Coax connectors and adapters:

Prices are per connector. Several of each are available.
Most are unused.

SPECIAL: Buy 5 and take 10% off. Buy 10 or more and take 20% off.

Amphenol PL-259
Still sealed in the original package. These are the silver plated, teflon insulation variety. $3

Amphenol UG-176 reducing adapters for PL-259 connectors to use with RG-8 X or RG-59. Still sealed in the package. $1

UHF Right angle 90 degree elbow connector $3

UHF double female "Barrel connector" $3

UHF "Bulkhead Connector" - Double female, as above, but for mounting thru a window, siding, etc. about 3 inches long $6

UHF "T" connector with two female (SO-239) and one male (PL-259) connection $5

BNC male to UHF female $5

UHF Male to BNC female $5

BNC male for coax cables
standard type $2
crimp on type $3

Chassis mount BNC female $3

BNC "T", two female and one male $3

I also have many other accessories available such as many different types of microphones, HTs, HF, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

2778. Mobile Tower Shack For Sale - with Photos!

Yahoo group: amatuerradioswapfest
Date: 2013-11-01 02:54:12 UTC
From: J.Gordon Beattie, Jr., W2TTT
Topic: 2778 Message: 2778

Hi Folks!

I am selling my beloved mobile ham shack with its unique 28 ft crankup tubular tower. This cable driven tower can be raised and lowered by hand using a 1/2 inch
ratchet handle in about two minutes. The base of the tower is supported by a custom offset base bracket that is inserted into a two inch trailer hitch receiver and a
heavy duty custom cargo roof rack on top. Just add a rotator and a suitable mast, and you can get up to 45 or more feet with your antennas! This is a great vehicle for EMCOM, Field Day, Hilltopping and more!

It is based on a 1997 Ford E350XLT van with a 6.8l Triton V10 engine that has only 85K miles on it. The van has 385K miles, but it is in fairly good shape, with a bit of rust in spots and a need for a new rear section of the exhaust.

It has two front bucket seats with a bulkhead mount in the front console area for radios, computers and the like according to your preferences. The front console is fed by a piece of fused #4 cable from the battery.

Right behind the front seats, it has a single forward-facing bench seat that faces a large custom operating desk/workbench. It is really great for doing on-site bench work and operating. The bench is long enough to stretch out for a snooze while operating overnights and there is LOTS of cargo room in the rear behind the bench seat for all sorts of gear or even to sleep two or more operators!

It has heavy cabling to an inside electrical box mounted just inside the rear door of the van to provide access to 12V power or to provide a jump, should the need arise. It also features a custom steel ladder on the rear door and 2 inch receiver and electrical hookups for a trailer.

Enclosed are two photos. The first photo shows the tower and how it fits on the

steel portion of the rack and custom bumper mount. This is a photo of the tower and

the cable conduit on the van when the steel rack was full length. The steel rack is now

a much shorter platform but has been extended with a more lightweight but sturdy

aluminum rack over the roof. It includes a solid aluminum mounting plate for

HF and VHF/UHF antennas running across aluminum rack.

The second photo shows the current roof rack layout but with the tower dismounted.

It takes about ten minutes to install or remove. It also shows a 96 inch rack box which

is no longer on the roof as I found it to be an impediment to carrying some antennas

and other goodies on the roof.

There is also a white PVC tube on the passenger side that I still have that can be used

to bring cables down the outside of the van and underneath to a rectangular hole with

grommet for cables to enter inside the side wall of the rear of the van. I

can give you that cable tube as well if you are interested.

To take a look, please text or call me at 201 314 6964 or email me.
I am asking $3,500.

Thanks & 73,
Gordon Beattie, W2TTT at ARRL dot NET

2786. Mobile Tower Shack - $3,500 OBO; will sell tower & mobile shack separately

Yahoo group: amatuerradioswapfest
Date: 2013-11-12 12:03:10 UTC
From: J.Gordon Beattie, Jr., W2TTT
Topic: 2786 Message: 2786

Hi Folks!

I am selling my beloved mobile ham shack with its unique 28 ft crankup tubular tower. This cable driven tower can be raised and lowered by hand using a 1/2 inch ratchet handle in about two minutes. The base of the tower is supported by a custom offset base bracket that is inserted into a two inch trailer hitch receiver and a heavy duty custom cargo roof rack on top. Just add a rotator and a suitable mast, and you can get up to 45 or more feet with your antennas! This is a great vehicle for EMCOM, Field Day, Hilltopping and more!

It is based on a 1997 Ford E350XLT van with a 6.8l Triton V10 engine that has only 85K miles on it. The van has 385K miles, but it is in fairly good shape, with a bit of rust in spots and a need for a new rear section of the exhaust.

It has two front bucket seats with a bulkhead mount in the front console area for radios, computers and the like according to your preferences. The front console is fed by a piece of fused #4 cable from the battery.

Right behind the front seats, it has a single forward-facing bench seat that faces a large custom operating desk/workbench. It is really great for doing on-site bench work and operating. The bench is long enough to stretch out for a snooze while operating overnights and there is LOTS of cargo room in the rear behind the bench seat for all sorts of gear or even to sleep two or more operators!

It has heavy cabling to an inside electrical box mounted just inside the rear door of the van to provide access to 12V power or to provide a jump, should the need arise. It also features a custom steel ladder on the rear door and 2 inch receiver and electrical hookups for a trailer.

This photo shows the tower and how it fits on the steel portion of the rack and custom bumper mount. This is a photo of the tower and the cable conduit on the van when the steel rack was full length. The steel rack is now a much shorter platform but has been extended with a more lightweight but sturdy aluminum rack over the roof. It includes a solid aluminum mounting plate for HF and VHF/UHF antennas running across aluminum rack.

I have included photos of the full vehicle as it is currently configured.

The tower takes about ten minutes to install or remove. It also shows

a 96 inch rack box which is no longer on the roof as I found it to be an

impediment to carrying some antennas and other goodies on the roof.

I will say though, that it is very convenient for carrying "quick access" items,

cables, lighting and the like. It is a matter of taste!

There is also a white PVC tube on the passenger side that I still have that can be used to bring cables down the outside of the van and underneath to a rectangular hole with grommet for cables to enter inside the side wall of the rear of the van. I can give you that cable tube as well if you are interested.

To take a look, please text or call me at 201 314 6964 or email me.

I am asking $3,500 or best offer. I will sell the tower and mobile shack separately, but at a premium for either one.

Make an offer and I'll give it some consideration.

Thanks & 73,
Gordon Beattie, W2TTT at ARRL dot NET

From: Bry Carling
Topic: 2789 Message: 2789

FOR SALE
MEISSNER Signal Shifter VFO model EX. This cool bandswitching VFO that actually can be used as a vintage, tube-era QRP transmitter. It produces around 5 - 6 watts from an 807 RF final tube. This is the bandswitching version and it has all of the coil sets for full HF coverage, Unmodified.

This is a great example of one of the coolest little transmitter / VFOs from the golden era of
radio. Truly a fun boatanchor / QRP combo!

Has the normal, built-in power supply for 120V AC use. This is one of the nicest ones I have
seen. Pictures and details on request...

Available for only $95.00 plus shipping

Will post pictures and details soon on:
http://af4k.com/radios.htm

Hi Folks!

I am selling my unique 28 ft heavy duty, military tubular tower.

This cable-driven tower can be raised and lowered by hand using a 1/2 inch ratchet handle in about two minutes. The base of the tower is supported by a custom offset base bracket that is inserted into a two inch trailer hitch receiver and a
heavy duty custom cargo roof rack to support the top.

Just add a rotator and a suitable mast, and you can get up to 45 or more feet with your antennas!

This is a great tower for EMCOM, Field Day, Hilltopping and more!

It will go on any vehicle but the roof rack piece is based on a van body with gutters..
Also included is a custom base that slides into a 2 inch receiver.

I will send you photos upon request.

To take a look, please text or call me at 201 314 6964 or email me.
I am asking $2,900 or best offer.

Fellers,

I have seen this and it's an amazing receiver. A certain ham celebrity almost bought it a couple of months ago. Anyone would be well advised to jump on it!

It's not mine and I have no financial interest in the sale. Just vouching for Gary's nice radio!

http://www.gjohanson.com/Homesite/PHOTOS/HRO7.jpg

She came from an Auction lot. Former owner obviously took care of her. She is complete with original dog house supply which has been fused, btw. The speaker is HRO, yes, but it was from an HRO-50. It's been wrinkle finished to match the receiver, it does have a transformer inside. This receiver also has the aftermarket Xtal Calibrator which National made for it.

It has it's original coil compliment, but it does not have the wooden coil storage rack.

Her problem is....she's TOO stock. She needs a recap. I have a photo copy manual and parts list. I also have a numbered list of the caps that need to be replaced. She is as clean
underneath as she is above deck.

I am asking $300.00 for her as she sits. She comes with her own foot-locker.

No, you don't want to ship this thing. When I say footlocker, the rig takes up every square inch of a genuine U.S. Navy Steamer Trunk. Well over 150 lbs total. Steamer trunk goes with her, btw. Local Pick Up, Deltona FL., 32725

Her mfg date is 1946.

If interested, pse contact me at:

2799. Microphones and Audio Related Items FS

Yahoo group: amatuerradioswapfest
Date: 2013-12-19 14:58:17 UTC
From: Ken Simpson, W8EK
Topic: 2799 Message: 2799

Microphones and Audio Related Items For Sale:

Desk Microphones, RF Speech Processor, DTMF Touch
Tone Microphones, several hand Microphones, Speakers,
Speaker Microphone, and more

Kenwood MC-50 dual impedance desk Microphone:

The Kenwood MC-50 is a dynamic desk microphone. It features
a push-to-talk and lock button. This mic has connector
switched, dual impedance ratings of 50k ohm and 600k ohm.
Frequency response is from 150 Hz to 10 kHz (-6 dB).

The MC-50 is the perfect match for many of classic Kenwood
transceivers such as TS-120S, TS-520S, TS-530S, TS-830S,
but can be used on almost any rig.

This one works 100% and looks close to new.
With paper work for $60.

Yaesu YD-148 Dual Impedance Desk Microphone:

The Yaesu YD-148 is a very nice "goose neck" type
desk microphone.
It has both high and low impedances, which can be
selected by a switch. This means it can be used on
some of the older rigs requiring a high impedance mic,
or with the more modern rigs needing a low impedance mic.

This particular mic is in very nice condition.
It works 100%.
With round 8 pin connector for $85.

TenTec 715 RF Speech Processor:

The Model 715 RF Speech Processor is a high performance
true RF-type speech processor designed to operate with
most modern HF Amateur Radio transceivers. RF speech
processing is a superior system to traditional AF
systems found in a typical HF transceiver.

..Increase average SSB power output by up to 6 dB
..Enhance readability by stations hearing your signal
..Break pileups for DXpeditions faster
..Keep your net or contest run frequency clearer
..Easy to install, easy to operate

The 715 RF speech processor is installed between the
microphone and the microphone jack on your transceiver.
Two microphone inputs are provided -- an 8 pin microphone
connector wired for TenTec and Yaesu, and a 1/8? input
used for direct connection of microphones. 13 V DC required.

This particular unit works 100% and looks like new.
Paper work is included for $200.

DTMF Touch Tone Microphones:

Yaesu MH-15 DTMF Mic
with up/down buttons and lock switch $40

Radio Shack DTMF Mic
with up/down switches, lock switch, and 8 pin modular
plug as used on HT-212, HTX-242, etc. $40

CES 610 L DTMF Mic
Can manually dial a number, or automatically store it in
the mic, and "speed dial". 12 digit touch tone pad on the
front. 8 pin modular plug (like computer LAN).
Looks to be new. $38

Johnson 250-0761-010 DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Looks to be unused. $38

CES 655 L DTMF Mic
Like Johnson above, but with 8 pin modular plug.
Looks new. $38

Kenwood Hand Microphones:

Kenwood MC-43 Hand Microphone:

The MC-43 is the hand microphone that is included with
many of the Kenwood rigs. It has has up/down switches
on the top, but of course also has a PTT switch on the
side. The mic itself is a low impedance mic. It has
a round 8 pin connector as used on many Kenwood rigs.

This one works 100% and looks great.
With paper work for $40.

Hand Microphone with round 8 pin plug for Kenwood, Alinco, etc.

This hand mic works great on most Kenwood rigs with the
round 8 pin connector, such as the TS-430, TS-440, TM-241,
TM-2530, TW-4000, and others, including Alinco and ADI.
It says "Electret Condenser Mic" on the back, and
"Kenwood" on the front, with no model number.

Basically, this mic functions like an MC-43, with a couple
more features. It has the mic and PTT switch; it also has

up/down switches on the top. There are four "extra" buttons labeled Call, VFO, MR, and PF. What these four buttons do depends on the rig. There is also a "Lock" switch on the back.

Regardless if you use the four extra buttons or not, you still have a mic that works like an MC-43.

This mic works fine, and looks like new. I am guessing it came with a rig, and was immediately put in the drawer, and never used. $30

Astatic Model 810-6 Gooseneck Microphone:

This mic is on a 12 inch gooseneck. The mic is a brushed metal about 5 1/4 inches long, and is actually part of the gooseneck. The cable goes thru the gooseneck. This has a 2 conductor shielded cable, so it is a quality balanced microphone with low impedance. The gooseneck terminates in a standard 5/8 inch threaded connector.

This one works fine and looks good. $45

Yaesu Hand Microphones:

Yaesu MH-15 DTMF Touch Tone Microphone:
The MH-15 c6 is a hand microphone that features a 16 digit DTMF Touch Tone Pad on the back, along with a lock/unlock switch. The top has up/down buttons. Of course the PTT is on the side. This one has the round 6 pin connector. It works fine and looks close to new. $40

Yaesu YM-17 hand microphone:
The YM-17 is a hand microphone with up/down switches on the top corner. It has the round 6 pin connector.
This one works fine and looks really great. $30

Yaesu YM-31 hand microphone:
The Yaesu YM-31 is a hand mic with a round 6 pin connector. Apparently it is either similar or the same as the MH-25A6j (not the MH-25 with the 8 pin connector). It is a 600 ohm impedance hand microphone, and has a Monitor on-off switch on the back.
It looks very similar to the Yaesu MH-1.
This one works fine and looks extremely nice. $25

Communications Speakers:

Realistic 21-549 A
This speaker is about 4 inches square and about 2 inches deep. It is rated for 5 watts, has an 8 ohm impedance, and is listed as a 300 to 3000 Hz frequency response, making it ideal for communications. It has a 3.5 mm (1/8 inch) mono plug, as used by most modern rigs. Gimbal mount included.

It is black in color, looks great, and sounds great. $12

Vanco SPB-5
Appears to be the same at above, but with a Vanco label.
Also includes gimbal mount. $12

Vanco SPB-6
Similar to SPB-5 above, but is considered a noise
cancelling speaker. 10 Watt rating. Still in original
box, new. $18

MFJ-284 HT Speaker Microphone:

This speaker mic has the 3.5 mm and 2.5 mm plugs on
it, as used by Icom, Alinco, Radio Shack, some Yaesu,
and many other HTs.

It works with the following:

YAESU 109, 209, 709, 23, 73, 33, 727 and other YAESU
radios which are pin compatible with the above rigs.

ICOM 2AT, 02AT, 3AT, 03AT, 4AT, 04AT, 12AT, u2A, u2AT,
u4AT and other ICOM radios which are pin compatible
with the above rigs.

2800. For Sale: Heavy Duty Mobile Tower

Yahoo group: amatuerradioswapfest
Date: 2013-12-19 21:35:46 UTC
From: J.Gordon Beattie, Jr., W2TTT
Topic: 2791 Message: 2800

Hi Folks!

I am selling my unique 28 ft heavy duty, military tubular tower.

This cable-driven tower can be raised and lowered by hand using a 1/2 inch ratchet handle in about two minutes. The base of the tower is supported by a custom offset base bracket that is inserted into a two inch trailer hitch receiver and a
heavy duty custom cargo roof rack to support the top.

Just add a rotator and a suitable mast, and you can get up to 45 or more feet with your antennas!

This is a great tower for EMCOM, Field Day, Hilltopping and more!

It will go on any vehicle but the roof rack piece is based on a van body with gutters..
Also included is a custom base that slides into a 2 inch receiver.

I will send you photos upon request.

To take a look, please text or call me at 201 314 6964 or email me.
I am asking $2,900 or best offer.

Thanks & 73,
Gordon Beattie, W2TTT at ARRL dot NET

2801. For Sale or Trade Yaesu FP-700 power supply

Yahoo group: amatuerradioswapfest
Date: 2013-12-20 03:53:19 UTC
From: <jjkuzma@...>
Topic: 2801 Message: 2801

I have a nice Yaesu FP-700 power supply in good working condition, I will sell for $100.00 + Shipping CONUS...

The rear panel has a hard-wired, high amperage cable This power supply matches many Yaesu radios and is in very good condition. It has a built in speaker and also comes with a connection cable to attach to many Yaesu radios. This power supply has a user replaceable fuse. Input
110 VAC. 9.25 x 3.75 x 9.5 inches.

2802. For Sale: RCI-2970 10 Meter Mobile

Yahoo group: amatuerradioswapfest
Date: 2013-12-20 04:27:45 UTC
From: <jjkuzma@...>
Topic: 2802 Message: 2802

This RCI-2970 (Ranger) 10 Meter mobile is in good condition, Everything works great on it, Gets full 100 Watts out.. I will take $250.00 or B.O. + Shipping CONUS

Reference Books For Sale:

Reference Data for Radio Engineers:

This book published by Sams / ITT is somewhat similar
to an ARRL Handbook, but in much more depth and detail,
since it is designed for engineers.

This book covers the fields of research, development,
production, operation and education for radio engineers.
It is loaded with tables and charts necessary in
communications. Excellent resource book when looking for
data,from the acoustic spectrum to radio wave propagation.

This one is the Sixth Edition printed in 1978, but the
basic information has not changed much.

This one is hardback, and it is in excellent condition,
close to new. The cover does not even appear to be worn.
This exact book in this condition is selling on Amazon
from between $123 and $338.
Buy this one for only $75.

Terman Classic Engineering Book For Sale:

Radio Engineering by Terman
McGraw Hill Electrical and Electronic Engineering Series
Third Edition, 1947 - close to new condition
Hard bound - $30

A R R L Handbooks:

1984-61st edition
It looks close to new. $15

1988-65th edition - Hard bound
This one is a couple inches thick.
Very close to new condition. $20

ARRL Books about Operating your ham station:

ARRL "Radio Amateurs Operating Manual"
2nd edition, $8
4th edition, inch thick $10
5th edition, over an inch thick, $12

ARRL "Operating an Amateur Radio Station"
1972 - 53rd edition $4

1976 - 57th edition $3
1978 - 58th edition $3
1983 - 61st edition $3

ARRL Public Service Communications - $3 each
Eighth Edition
Ninth edition
another with no edition number listed, looks fairly recent

ARRL Amateur Radio Field Resources Directory
First edition, $7

I also have many other accessories available such as many
different types of microphones, HTs, various transceivers,
HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

2804. YAESU TWINS-FL/FR-101 FOR SALE OR TRADE

Yahoo group: amatuerradioswapfest
Date: 2013-12-22 16:12:59 UTC
From: <wt4t@...>
Topic: 2804 Message: 2804

Have a very nice pair of the original TWINS. The FR-101 is the receiver with the green digital readout. The FL-101 is analogue ,as were all the FL's. cosmetics on both rigs are easily 8.5/10,never been around smoke. Faces plates are near perfect. I have owned these for several years. The transmitter was just out to certified electronics and completely gone thru, Will be under warranty. full out on all bands. Have found no operational problems in 2 years.
Comes with the matching factory landline speaker.Will include all original manuals,cables and interconnect cables
the fl-101 sn# is 7D308270,RECEIVER IS 6A313186. The twins are easy to operate and are a lot of fun to use.. both have built in power supplies. Have lots of pictures-just ask
ASKING 850.00 SHIPPED FEDEX INSURED.
MIGHT CONSIDER A TRADE FOR ?? ANOTHER RIG ETC.

2805. Looking for a BEST OFFER For Sale: Heavy Duty Mobile Tower

Yahoo group: amatuerradioswapfest
Date: 2013-12-23 05:01:51 UTC
From: J.Gordon Beattie, Jr., W2TTT
Topic: 2805 Message: 2805

Hi Folks!

This tower could be used in a fixed or mobile environment. What I like about it, is that you can use a short A-frame ladder to put whatever you want on top (e. g. rotator and tall mast and then just use a 1/2 inch ratchet to raise it up in about 2 minutes to full height. The ability to put an antenna between 30-45 ft in the air, depending on antenna load without having to tip it up is a liberating capability. I mounted it on the back of my old van which I no longer have, and I would just go up on the platform built into the rack to drop in the rotator and mast. In fact, I would preinstall the rotator with its cabling into the van and then just drop in the mast, antennas and feed lines into the top of the rotator. I would then ratchet it up from the safety and ease of the ground.

The rack as it exists today, is only the rear 20% needed to support the tower and fits very well on a van. It allows access to the top and also provides for in-transit storage of gear. The key element is the 2 inch hitch fixture that supports the bottom of the tower.

Finally, this tower is REALLY STURDY and can support a whole bunch of antenna load. The limiting element will be the rotator. It was built for the U. S. Army by a German company (unknown) and does not require maintenance of seals for hydraulics or pneumatics or the use of a compressor to operate. This is unlike the surplus broadcast towers you see. Its internal cable-driven design is reliable and a pleasure to use. I have never seen another one on the market and I have searched through many military vehicle and radio web sites, lists and experts. My guess is that it was built to support a dish on an armored or heavy wheeled vehicle.

Please let me know of your interest. I will accept cash or PayPal to W2TTT@....

I am selling my unique 28 ft heavy duty, military tubular tower.

This cable-driven tower can be raised and lowered by hand using a 1/2 inch ratchet handle in about two minutes. The base of the tower is supported by a custom offset base bracket that is inserted into a two inch trailer hitch receiver and a
heavy duty custom cargo roof rack to support the top.

Just add a rotator and a suitable mast, and you can get up to 45 or more feet with your antennas!

This is a great tower for EMCOM, Field Day, Hilltopping and more!

It will go on any vehicle but the roof rack piece is based on a van body with gutters..

Also included is a custom base that slides into a 2 inch receiver.

I will send you photos upon request.

2806. MFJ Items FS

Yahoo group: amatuerradioswapfest
Date: 2013-12-24 19:48:36 UTC
From: Ken Simpson, W8EK
Topic: 2489 Message: 2806

MFJ Items For Sale:

Dual Audio Filter, Antenna Tuner, DC Power
Distribution Strip, Speaker Mic, and Wall Warts

MFJ 752 Dual Audio Filter

The MFJ 752 is a dual tunable audio filter that permits
one to zero in on a single sideband and Morse code signal
and notch out interference at the same time. It can also
be used for AM mode shortwave listening. The primary filter
has tunable peak, notch, low pass and high pass. The
auxiliary filter has peak and notch. The filter is
automatically bypassed when the unit is off. Speaker and
phone jacks are provided.
It requires 9-15 VDC @300 ma.

Two of these units are available.

One is a plain 752. It works fine and looks good, but
not perfect. With paper work for $45.

The second is the 752 C. The C model has an LED that
lights when power is applied. There are other minor
cosmetic changes. This one works fine and looks very
close to perfect. With paper work for $65.

MFJ 949 C HF Antenna Tuner / Wattmeter / Dummy Load:

This HF antenna tuner is rated by MFJ to handle 300 Watts,
although I really feel the standard 100 Watt rig is pretty
much the limit. It has an SWR bridge built in, along with
a cross needle wattmeter that reads 300 W and 30 W full
scale. This means it will read forward power, reverse
power, and SWR simultaneously.

It also will handle two coax antennas, which can be used
direct, or thru the tuner. A balun is included, as is a
separate antenna switch position for use with open wire
line. It has an internal dummy load that MFJ rates at
300 Watts, but again, 100 W is the practical limit.
This one measure 51 ohms, so it could not be much more
accurate.

This particular unit works fine, and looks good. I can
only find a very small scratch on the bottom that is not
normally visible. With paper work for $90.

MFJ 1118 Heavy Duty DC Power Distribution Strip:

The MFJ-1118 is a versatile, high-current deluxe multiple DC power outlet. It lets you power two HF and/or VHF transceivers and six or more accessories from your transceiver's main 13 V DC power supply. You get two pairs of super heavy duty 30 amp 5-way binding posts for powering your transceivers. Each pair is individually fused and RF bypassed, capable of a total of 35 amps.

An LED indicates power "ON". Six pairs of heavy duty, RF bypassed 5-way binding posts lets you power your accessories. They handle a total of 15 amps and are protected by a master fuse, have an ON/OFF power switch and an LED power indicator.

You get 6 feet of super heavy eight gauge color-coded cable with ring tongue terminals, plus a built-in 0 - 25 VDC monitor meter.

This one is like new. Buy it for only $60 with paper work.

MFJ-284 HT Speaker Microphone:

This speaker mic has the 3.5 mm and 2.5 mm plugs on it, as used by Icom, Alinco, Radio Shack, some Yaesu, and many other HTs.

It works with the following:

YAESU 109, 209, 709, 23, 73, 33, 727 and other YAESU radios which are pin compatible with the above rigs.

ICOM 2AT, 02AT, 3AT, 03AT, 4AT, 04AT, 12AT, u2A, u2AT, u4AT and other ICOM radios which are pin compatible with the above rigs.

ALINCO DJ-560 and other ALINCO radios which are pin compatible with the DJ-560

RADIO SHACK - most

SANTEC ST-20

It works great, and looks like new.

With paper work for $10.

"Wall Wart" Power Supplies:

All of these are "regular" wall warts - not the new switching type that create all sort of noise in your receiver. Use one of these, and leave the noise behind.

12 V DC at 625 ma
Many uses for the 12 volt variety! $14

Heathkit "Converter / Charger"
9 Volts DC at 100 ma.
No Heath number on this, and I don't know what it was used on originally. It can be used either as a 9 Volt DC "power pack" or as a charger. It has a 2.5 mm male plug on it, with the tip positive, so it can be used on many devices. $10

9 Volt DC at 500 ma
This one was used on a MFJ 422 keyer, but will also power other items needing 9 V DC at low current, including the MFJ 752 audio filters above. It has a 2.5 mm male plug on it, tip positive. $12

I also have many other accessories available such as many different types of microphones, HTs, HF, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

2809. WTB: DRAKE 42.5 Mhz and 43.6 Mhz Crystals

Yahoo group: amatuerradioswapfest
Date: 2013-12-27 06:58:03 UTC
From: <pulsarxp@...>
Topic: 2809 Message: 2809

I need a 42.5 Mhz and a 43.6 Mhz Drake crystals for my Drake TR-4C Transceiver. These will give me the two optional extra 10 meter band segments. I'd like the Drake crystals to not be drifted too far of if any from their stated value. I also don't want any of those fake HC-6 crystals which have cheap foreign crystals stuffed into their HC-6 holders.
If you have what I am looking for, let me know what you want for it or them including shipping to my Texas home.
Thanks,
Lee, w0vt
pulsarxp@embarqmail.com mailto:pulsarxp@embarqmail.com .

From: Ken Simpson, W8EK
Topic: 2811 Message: 2811

Microphones and Audio Related Items For Sale:

Desk Microphone, RF Speech Processor, DTMF Touch
Tone Microphones, several hand Microphones, Speakers,
Speaker Microphone, and more

Yaesu YD-148 Dual Impedance Desk Microphone:

The Yaesu YD-148 is a very nice "goose neck" type
desk microphone.
It has both high and low impedances, which can be
selected by a switch. This means it can be used on
some of the older rigs requiring a high impedance mic,
or with the more modern rigs needing a low impedance mic.

This particular mic is in very nice condition.
It works 100%.
With round 8 pin connector for $85.

TenTec 715 RF Speech Processor:

The Model 715 RF Speech Processor is a high performance
true RF-type speech processor designed to operate with
most modern HF Amateur Radio transceivers. RF speech
processing is a superior system to traditional AF
systems found in a typical HF transceiver.

..Increase average SSB power output by up to 6 dB
..Enhance readability by stations hearing your signal
..Break pileups for DXpeditions faster
..Keep your net or contest run frequency clearer
..Easy to install, easy to operate

The 715 RF speech processor is installed between the
microphone and the microphone jack on your transceiver.
Two microphone inputs are provided -- an 8 pin microphone
connector wired for TenTec and Yaesu, and a 1/8? input
used for direct connection of microphones. 13 V DC required.

This particular unit works 100% and looks like new.
Paper work is included for $200.

DTMF Touch Tone Microphones:

Yaesu MH-15 DTMF Touch Tone Mic
The MH-15 c6 is a hand microphone that features a 16 digit
DTMF Touch Tone Pad on the back, along with a lock/unlock
switch. The top has up/down buttons. Of course the PTT

is on the side. This one presently has the round 6 pin
connector, which can be changed of course.
It works fine and looks close to new. $40

CES 810 L DTMF Mic
One can manually dial a number, or automatically store it in
the mic, and "speed dial". It has a 12 digit touch tone pad
on the front. With 8 pin modular plug (like computer LAN).
It looks to be unused. $38

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin connector. It looks to be unused. $38

Kenwood Hand Microphones:

Kenwood MC-43 Hand Microphone:

The MC-43 is the hand microphone that is included with
many of the Kenwood rigs. It has has up/down switches
on the top, but of course also has a PTT switch on the
side. The mic itself is a low impedance mic. It has
a round 8 pin connector as used on many Kenwood rigs.

This one works 100% and looks great.
With paper work for $40.

Hand Microphone with round 8 pin plug for Kenwood, Alinco, etc.

This hand mic works great on most Kenwood rigs with the
round 8 pin connector, such as the TS-430, TS-440, TM-241,
TM-2530, TW-4000, and others, including Alinco and ADI.
It says "Electret Condenser Mic" on the back, and
"Kenwood" on the front, with no model number.

Basically, this mic functions like an MC-43, with a couple
more features. It has the mic and PTT switch; it also has
up/down switches on the top. There are four "extra" buttons
labeled Call, VFO, MR, and PF. What these four buttons do
depends on the rig. There is also a "Lock" switch on the back.

Regardless if you use the four extra buttons or not, you
still have a mic that works like an MC-43.

This mic works fine, and looks like new. I am guessing it
came with a rig, and was immediately put in the drawer,
and never used. $30

Astatic Model 810-6 Gooseneck Microphone:

This mic is on a 12 inch gooseneck. The mic is a brushed
metal about 5 1/4 inches long, and is actually part of the
gooseneck. The cable goes thru the gooseneck. This has a

2 conductor shielded cable, so it is a quality balanced
microphone with low impedance. The gooseneck terminates
in a standard 5/8 inch threaded connector.

This one works fine and looks good. $45

Yaesu Hand Microphones:

Yaesu MH-15 DTMF Touch Tone Microphone:
The MH-15 c6 is a hand microphone that features a 16 digit
DTMF Touch Tone Pad on the back, along with a lock/unlock
switch. The top has up/down buttons. Of course the PTT
is on the side. This one has the round 6 pin connector.
It works fine and looks close to new. $40

Yaesu YM-17 hand microphone:
The YM-17 is a hand microphone with up/down switches on
the top corner. It has the round 6 pin connector.
This one works fine and looks really great. $30

Yaesu YM-31 hand microphone:
The Yaesu YM-31 is a hand mic with a round 6 pin
connector. Apparently it is either similar or the
same as the MH-25A6j (not the MH-25 with the 8 pin
connector). It is a 600 ohm impedance hand microphone,
and has a Monitor on-off switch on the back.
It looks very similar to the Yaesu MH-1.
This one works fine and looks extremely nice. $25

Communications Speakers:

Realistic 21-549 A
This speaker is about 4 inches square and about 2 inches
deep. It is rated for 5 watts, has an 8 ohm impedance, and
is listed as a 300 to 3000 Hz frequency response, making it
ideal for communications. It has a 3.5 mm (1/8 inch) mono
plug, as used by most modern rigs. Gimbal mount included.
It is black in color, looks great, and sounds great. $12

Vanco SPB-5
Appears to be the same at above, but with a Vanco label.
Also includes gimbal mount. $12

Vanco SPB-6
Similar to SPB-5 above, but is considered a noise
cancelling speaker. 10 Watt rating. Still in original
box, new. $18

MFJ-284 HT Speaker Microphone:

This speaker mic has the 3.5 mm and 2.5 mm plugs on
it, as used by Icom, Alinco, Radio Shack, some Yaesu,
and many other HTs.

It works with the following:

YAESU 109, 209, 709, 23, 73, 33, 727 and other YAESU
radios which are pin compatible with the above rigs.

ICOM 2AT, 02AT, 3AT, 03AT, 4AT, 04AT, 12AT, u2A, u2AT,
u4AT and other ICOM radios which are pin compatible
with the above rigs.

ALINCO DJ-560 and other ALINCO radios which are pin c
ompatible with the DJ-560

RADIO SHACK - most

SANTEC ST-20

It works great, and looks like new.

With paper work for $10.

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, and many miscellaneous accessories.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

Antenna Tuner, and other HF Antenna related
items For Sale:

MFJ 949 C HF Antenna Tuner / Wattmeter / Dummy Load:

This HF antenna tuner is rated by MFJ to handle 300 Watts,
although I really feel the standard 100 Watt rig is pretty
much the limit. It has an SWR bridge built in, along with
a cross needle wattmeter that reads 300 W and 30 W full
scale. This means it will read forward power, reverse
power, and SWR simultaneously.

It also will handle two coax antennas, which can be used
direct, or thru the tuner. A balun is included, as is a
separate antenna switch position for use with open wire
line. It has an internal dummy load that MFJ rates at
300 Watts, but again, 100 W is the practical limit.
This one measure 51 ohms, so it could not be much more
accurate.

This particular unit works fine, and looks good. I can
only find a very small scratch on the bottom that is not
normally visible. With paper work for $90.

HF and VHF SWR Bridges:

All cover from 3 thru 150 MHz and have SO-239
connectors in and out.

Royce 2-100 SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. No scratches,
but it does have a previous owner's name on it.
In its original box with original instructions. $20

Heath AM-2 SWR Bridge
Matches the DX-40, although it can be used with any HF
or VHF transmitter. About 8 inches wide and 4.5 inches
high, with the meter in the middle, and a gray colored
knob at each side near the bottom.
This particular unit works fine and is in very good shape.
Paper work is included for $22.

"Window Line" 450 ohm transmission line:

This is similar to "open wire" transmission line,
but has some plastic insulation on it instead of
being open, so it is protected more. The openings

look like windows, hence the name.

I have two lengths available. Both are new, never used.
One is 50 feet long, and is $20.
The other is 100 feet long and is $35.

Balun / Antenna Center Insulators:

All baluns are 1:1 ratio, and handle full legal power.

Unadilla W2AU "Big Signal" Balun
Use this as a center insulator for a dipole, or on a beam.
Built in lightning arrestor.
This one is new, still in its original box, with paper work. $20

HyGain BN-86 Balun
The case of the BN-86 is constructed so that one can use
it to hang a dipole or inverted V, or a U-bolt can be added
to attach it to the boom of an HF beam antenna.
This particular balun works fine, but does show slight physical
use. It includes the paper work for $40.

VanGorden "HiQ" Balun
The Van Gorden HI-Q balun is designed to handle full legal
power with a low standing wave radio (SWR). It includes a
hanger for a dipole. Some rust on screw eyes. $10

W2AU ANsulator
The Unadilla W2AU ANsulator? Antenna Center Insulator is handy
for many types of antennas. It features a top eye-bolt for
support (if needed). There are strong eye bolts and spade
lugs on either side for the antenna wire.
It looks to be new. $12

VanGorden "Hi Q" Antenna Center Insulator
No balun included in this one, but it is designed to act as the
center insulator for a dipole or inverted V antenna, similar to
the W2AU Ansulator above. This one appears to be unused. $12

B & W 591 Coax Switch:
This switch is designed to switch an auxiliary piece of
equipment in and out (For example, bypass a linear
amplifier, transverter, preamp, etc.). It is round and
has four SO-239 connectors coming out the back of it.
With paper work for $35.

Hustler HF Mobile Antennas:

All work 100% and are in good condition.

Hustler 54 inch mobile masts:
MO-1 (folds about 14 inches above ball) $22
MO-2 (folds about 27 inches above ball)

..... NEW, still sealed in the package, $30

"Super" Hustler resonators (high power version):
40 meter RM-40 S, $25

Coax connectors and adapters:

Prices are per connector. Several of each are available.
Most are unused.

SPECIAL: Buy 5 and take 10% off. Buy 10 or more and take 20% off.

Amphenol UG-176 reducing adapters for PL-259 connectors to
use with RG-8 X or RG-59.
Still sealed in the package. $1
No longer sealed in package. 50 cents

UHF double female "Barrel connector" $3

UHF "Bulkhead Connector" - Double female, as above, but for
mounting thru a window, siding, etc. about 2 inches long $6

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

BNC male to UHF female $5

UHF Male to BNC female $5

BNC male for coax cables
standard type $2
crimp on type $3

Chassis mount BNC female $3

BNC "T", two female and one male $3

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

2814. Power Supplies and related items FS

Yahoo group: amatuerradioswapfest
Date: 2014-01-11 17:57:48 UTC
From: Ken Simpson, W8EK
Topic: 2515 Message: 2814

Power Supplies and Related Items For Sale:

MFJ 1118 Heavy Duty DC Power Distribution Strip:

The MFJ-1118 is a versatile, high-current deluxe multiple DC power outlet. It lets you power two HF and/or VHF transceivers and six or more accessories from your transceiver's main 13 V DC power supply. You get two pairs of super heavy duty 30 amp 5-way binding posts for powering your transceivers. Each pair is individually fused and RF bypassed, capable of a total of 35 amps.

An LED indicates power "ON". Six pairs of heavy duty, RF bypassed 5-way binding posts lets you power your accessories. They handle a total of 15 amps and are protected by a master fuse, have an ON/OFF power switch and an LED power indicator.

You get 6 feet of super heavy eight gauge color-coded cable with ring tongue terminals, plus a built-in 0 - 25 VDC monitor meter.

This one is like new. With paper work for only $60.

TenTec 25 amp switching power supply:

"Switcher / 25" 25 amp switching power supply

This is a 25 amp switching power supply in a case that matches the early Omni series case, with the metal bezel around it. It is in a case that is the same size as a 243 remote VFO. It has an ammeter on the front, along with Switch, TenTec logo, and output bulb. The front panel basically looks like a 280 power supply with a metal bezel, but says "Switcher/25" on it. It is electrically very quiet, and well shielded. It does not produce any electrical noise that I could find.

Of course it works fine, and looks fine also. $140

10 amp, 13 V DC, Power Supply:

This is a basic 10 amp power supply made by Stabylex Electronics Corp., and is model 10 SR. It has automatic short circuit protection, and a very large heat sink.

Obviously a supply with a 10 amp rating is ideal
for most 2 meter and dual band rigs.

This one works fine and looks great also. $35

Vintage Icom IC-3PA Power Supply / Speaker:

The Icom IC-3 PA was originally designed to be used
with Icom's 10 watt 2 meter rigs, such as the IC-22,
IC-230, IC-22 S, etc. It produces 13 V DC at 3 amps,
and shuts down at 4.5 amps.

In addition to being a power supply, it also has a front
facing speaker in the enclosure. It is designed so that
the 2 meter rig sets on top of the power supply. It has
four lights for power, normal, warning, and over current.

This particular unit is in extremely nice condition.
The normal and power lights work. I don't know about
"warning" and "Over current", but I expect that they
do. I do not find any scratches on it.

With the paper work for $40.

Micronta 22-120 A Regulated power supply:

This supply is rated at 2.5 amps at 13 V DC. It is
well regulated. It has a switch and LED power light
on the front, with a circuit breaker and output terminals
on the back. The case (left and right side and top) is
basically all a heat sink, so it should cool the
regulator well.

This one works fine and looks like new. No scratches. $30

Homebrew Power Supply:

This power supply is in a very nice gray and black enclosure
with binding posts for the output on the front, along with
a pilot bulb and power switch. The back panel has a fuse
and the regulator. It looks to be good for 13 V DC at
about 1.5 amps.

It works fine and looks really great. No scratches or
defects on the cabinet. $15

Bench Type Power Supply:

This power supply is completely adjustable
with a multiturn pot, up to about 20 Volts DC.
It appears to be good for about 3/4 of an amp.
The analog meter reads 0 to 15 Volts DC or
0 to 30 V, switch selected.

It is housed in a very nice eggshell and wood
grain cabinet. Of course it works fine. $20

"Wall Wart" Power Supplies:

All of these are "regular" wall warts - not the new
switching type that create all sort of noise in your
receiver. Use one of these, and leave the noise behind.

12 V DC at 625 ma
Many uses for the 12 volt variety! $14

Heathkit "Converter / Charger"
9 Volts DC at 100 ma.
No Heath number on this, and I don't know what it was used
on originally. It can be used either as a 9 Volt DC "power
pack" or as a charger. It has a 2.5 mm male plug on it, with
the tip positive, so it can be used on many devices. $10

9 Volt DC at 500 ma
This one was used on a MFJ 422 keyer, but will also power
other items needing 9 V DC at low current. It has a
2.5 mm male plug on it, tip positive. $12

Kepco Variable Bench Power Supply:

This is an ideal bench power supply! It is a Kepco Model ABC
40-0.5, which means that it will produce from zero up to 40 V
DC at up to 1/2 amp. Great for the bench.

The voltage is adjustable with a 10 turn pot from close to zero,
up to about 40 volts. There is a fairly large analog meter that
reads the voltage. There is also current limiting built in that
is adjustable from about 100 ma to up to about 700 ma. The same
meter that reads voltage can be switched to read current, or
short circuit current (the point that the current limit is set).
In addition, there are connections on the back to allow remote
sensing and remote programming. This is a quality regulated
power supply!

This particular unit works 100%, and looks extremely nice.
Only $85.

Large 150 Volt AC Weston Analog Meter:

Weston Model 1934, 150 Volt AC meter
This meter is a nice large 3.5 inch modern meter.
The AC scale is expanded, so that 120 volts is
easier to read. This meter is new, never used,
still in its original box, complete with hardware.
$40

Weston Model 1931, 150 Volt DC Meter
This meter is similar to the one above, except

it is for DC instead of AC.
It is also new, in its original box, with hardware.
$25

Surge Station and Noise Filter:

This unit is still in its Radio Shack (#61-2327) box, never used. It says it is for a notebook computer, but it can be used with anything. It has connections for a computer network (LAN, RJ-45 connector), the AC power, and for phone lines (RJ-11 connector), and provides noise filtering and surge suppression on each. It even includes $25,000 insurance against surges. Maximum power rating is 1875 Watts, or 15 amps. Noise filtering is listed at 40 db.

This unit is new, in its original box, with its original paper work. $15

I also have many other accessories available such as many different types of microphones, HTs, HF, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

Sorry no paypal, western union or check payments, been there done that.

Yaesu FT-101E with matching digital display and manuals. Comes with original power cable, new NEC final tubes, aligned ready to play again, nice condition $355.00 plus shipping

Another Yaesu FT-101e , this one has the original 11m installed, and also has new NEC tubes installed and is freshly aligned, and ready to play again, very nice condition $300.00 plus shipping

Kantronics Kam XL, this one has psk31, pactor etc, comes with CD disc that came with it from Kantronics, was purchased in September 2013 and used only a few times, $225.00 obo plus shipping

2820. Scanners For Sale

Yahoo group: amatuerradioswapfest
Date: 2014-01-23 14:00:18 UTC
From: Ken Simpson, W8EK
Topic: 2820 Message: 2820

Several Scanners For Sale:

Regency Touch K100 Scanner:

The Regency Touch K100 is a programmable scanner that
covers the low VHF, Hi VHF, and UHF frequencies. Of
course this means it covers weather frequencies. It
has battery back up of the programmed frequencies and
also will do searches.

Frequencies covered include
30 - 50 MHz
144-148 MHz
148-174 MHz
440-450 MHz
450-470 MHz
470-512 MHz

More info can be found at
http://radiopics.com/Regency/Regency_Touch%20K100.htm

This one works fine and looks fine.

With telescoping antenna, power cord, and paper work
for $25.

Bearcat BC-560 XLT / PRO-2025 Scanner:

The Uniden Bearcat BC-560XLT 16 channel scanner (also known as
PRO-2025) covers VHF Low Band, VHF High Band and UHF. It has a
priority channel and channel lockout, plus weather search for
instant access to your local NOAA weather station.
Programming is easy. Just key in the desired frequency. You
can press the Review button to check each channel.

External jacks include: external antenna, external speaker
and 12 VDC power.
5.5 x 1.75 x 7 inches.

It covers
29-29.7 Amateur Band 10 Meters
29.7-50 VHF Low
50-54 Ham Band 6 Meters
136-144 Federal Government
144-148 Amateur Band 2 Meters
148-174 VHF High Band
406-420 Federal Government

420-450 Amateur Band 70 Cm
450-470 UHF Band
470-512 UHF "T" Band

This one works fine.
With paper work and power cord for $25.

Realistic/Radio Shack PRO-37 Handheld Scanner:

The PRO-37 is a handheld scanner with 200 memories, covering
30-54 / 108-174 / 380-512 / 806-960 MHz. It has the features
that one would normally expect in a good hand held scanner.
It runs off of six AA cells, and has a BNC antenna connector.

For more info, please see
http://rigreference.com/en/rig/3890-RadioShack_Realistic_Pro_37

This one works OK, but it could use some cleaning. There is a
small scratch on the LCD display, which does not detract from
its usefulness.

It includes paper work and rubber duck antenna for $25.

Realistic PRO-56 Scanner:

The PRO-56 covers from 144 to 174 MHz and also 430
to 512 MHz. It is a small scanner with 8 channels,
and is powered by a 9 volt battery, or battery eliminator.

This one works fine and looks fine as well.

It includes a telescoping antenna for $15.

Uniden Bearcat BC-50 XL Scanner:

The BC-50 is a handheld programmable scanner that
covers the low VHF, high VHF and UHF bands. It can
run off of five AA cells, or external 7.5 volts DC.
It has a BNC antenna connector.

Frequency coverage:
66 - 88 MHz
136-174 MHz
406-512 MHz

More info at
http://www.rigpix.com/bearcat/bc50xl.htm

This one works fine with an external speaker, but not
with the internal speaker. This could just be dirty
connections, as the SK who had it stored it in his
garage. It could stand some cleaning, but it does work.

With paper work for $10. If you desire a rubber duck
antenna with it, add $10.

Coax connectors and adapters:

Prices are per connector. Several of each are available.
Most are unused.

SPECIAL: Buy 5 and take 10% off.
Buy 10 or more and take 20% off.

Adapter that takes a PL-259, and plugs in to a Motorola
type jack, as is used on the back of many scanners. $5

UG-175 reducing adapters for PL-259 connectors to
use with RG-58 $.50

UG-176 reducing adapters for PL-259 connectors to
use with RG-8 X or RG-59.
Amphenol, still sealed in the package $1

Amphenol crimp type PL-259, sealed in package $3

UHF double female "Barrel connector" $3

UHF "Bulkhead Connector" with mounting hardware
Double female, about 2 inches long $6

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

BNC HT to PL-259 adapter.(BNC male to UHF female) $5

BNC male for coax cables
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
Amphenol screw in type, sealed in package $4

BNC "T", two female and one male $3

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

2821. FS: YAESU Amp Control Cable

Yahoo group: amatuerradioswapfest
Date: 2014-01-23 12:33:33 UTC
From: Bry Carling
Topic: 2821 Message: 2821

For Sale: Yaesu Linear Amplifier Control Cable

Cable to key a linear amplifier with your Yaesu FT450, FT450D or FT950 Transceivers etc.

Control any linear amplifier such as SB200, FL2100B, Ameritron AL80B, AL811 etc. to the best of their capability with this dual control cable.

This is the better cable with both the PTT line AND the ALC signal. It is clearly labeled and
plugs right into the small, round 10-pin DIN connector This is unused - brand new.
These sell for $25.00 or more on eBay. Will sell for $16.00 plus shipping.

B & W Coax Switches, Coax Cable, Balun, and many
coax connectors and adapters For Sale:

B & W Coaxial Antenna Switches:

All have SO-239 connectors, and will handle full legal power.

B & W Model 550 A coax switch
This model will switch up to 5 antennas, and does NOT
ground unused antennas. It has the coax coming out the
sides like spokes of a wheel.
This one works fine and looks fine as well. $40

B & W 592 two position coax switch
This switch has the coax coming out the back, and it does
NOT ground the unused antenna.
This one is in nice electrical and mechanical shape. $30

B & W CS-3 G three position coax switch
This switch DOES ground all of the unused positions.
It has the coax coming out the rear of a rectangular box.
It works and looks fine. $40

Coaxial Cable with "N" Connectors:

This cable has a male "N" connector on each end.
It is about 60 feet long.

The coax is labeled 50-2 V, which is slightly
larger in diameter than RG-8 X, but not quite
as large as RG-8.

This piece is in extremely good condition, with heat
shrink around the connectors for strain relief. $35

HyGain BN-86 Balun:

This is a 1 to 1 HF balun, rated to handle full legal power.

Use it to hang a dipole, or add a U-bolt for an HF beam antenna.
This particular balun works fine, but does show slight physical
use. It includes the paper work for $40.

Coax connectors and adapters:

Prices are per connector. Several of each are available.
Most are unused.

SPECIAL: Buy 5 and take 10% off.
Buy 10 or more and take 20% off.

UG-175 reducing adapters for PL-259 connectors to
use with RG-58 $.50

UG-176 reducing adapters for PL-259 connectors to
use with RG-8 X or RG-59.
Amphenol, still sealed in the package $1

Amphenol crimp type PL-259, sealed in package $3

UHF double female "Barrel connector" $3

UHF "Bulkhead Connector" with mounting hardware
Double female, about 2 inches long $6

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

BNC HT to PL-259 adapter.(BNC male to UHF female) $5

BNC male for coax cables
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
Amphenol screw in type, sealed in package $4

BNC "T", two female and one male $3

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs,
HF and VHF/UHF antennas, HF linear amplifiers, and many
other accessories.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

Wanted: Icom BP-90 "Empty" Battery Case

I am looking for an Icom BP-90 battery case.
This takes six AA cells, and is used on a variety
of Icom HTs, including the IC- 2SAT, 3SAT, 24AT,
W2/A, 2SRA, 4SRA, R1, and others.

Do you have one in good usable condition?

VHF related Items For Sale:

Yaesu VX-5 tri band HT, 2 meter mobile rig, "Strip
line" constant Z coax switches, several Microphones,
Wattmeters, Communications Speakers, Chargers and
power supplies, VX-7 "Nifty Manual", Scanners,
Antenna connectors and adapters, and much more

Yaesu VX-5 R tri-band HT:

The VX-5 will cover the 6m, 2m, and 440 MHz ham bands,
with receive almost from DC to light. Actually receive
starts at the AM broadcast band, and goes to about 1000
MHz, so that means it includes all of the public service
bands outside of the ham bands, weather, FM commercial,
commercial TV, SW bands, and much more.

It provides 5 watts out on 6M and 2M and 4.5 watts on 440 MHz,
at three power levels.

Features include 16 digit 9 memory DTMF autodialer, CTCSS/DCS,
220 memories, aluminum die-cast case and 8 character alphanumeric
display. It is a compact 2.3 x 3.4 x 1.1 inches.

To say that this is better quality and has more features than the
Chinese HTs would be an understatement!

This particular unit works 100%, and is in very nice condition.
It includes charger, a good Lithium Ion battery, rubber duck with
the 6 meter extension, and paper work for $145.

Realistic HTX-212 Two Meter FM Transceiver:

The HTX-212 is a 45 watt (10 watt low power) 2 meter FM
rig with most any function you could think of on it.
It also has a very good "tight" front end on the receiver.
There are 31 memory channels, individually programmed
offsets, subaudible tone on both transmit and receive,
DTMF paging, dual VFOs, and receive coverage from 136

to 174 MHz, among many other features.

This particular rig functions perfectly, and looks very nice.

Power cord, DTMF Touch tone mic with up/down switches,
mobile bracket, and paper work are all included for $80.

Two position "Strip Line" Coax Switches:

These switches utilize professionally engineered all
metal cavity construction for maximum efficiency and
high isolation. Isolation is typically better than
50 dB at 300 MHz with insertion loss less than 0.2 dB.
All are two position and use SO-239 connectors, are
50 ohm impedance, are typically rated for 2.5 KW PEP,
and good to 600 MHz.

All work fine and look extremely nice.

Diawa CS-201 - $22

Opek CX-201 - $22

MFJ 1702 B
With Center position that grounds both antennas. $18

MFJ 1702 C
As 1702 B, but with added lightning protection. $25

DTMF Touch Tone Microphones:

Yaesu MH-15 DTMF Touch Tone Mic:
The MH-15 c6 is a hand microphone that features a 16 digit
DTMF Touch Tone Pad on the back, along with a lock/unlock
switch. The top has up/down buttons. Of course the PTT
is on the side. This one presently has the round 6 pin
connector, which can be changed of course.
It works fine and looks close to new. $40

CES 810 L DTMF Mic
One can manually dial a number, or automatically store it in
the mic, and "speed dial". It has a 12 digit touch tone pad
on the front. With 8 pin modular plug (like computer LAN).
It looks to be unused. $38

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin connector. It looks to be unused. $38

VHF Wattmeters:

Drake WV-4 Watt Meter
This wattmeter covers from 20-200 MHZ, up to 1000 watts
input continuous. Full scale readings of 100 W and 1000 W.

It has the type N input and output connectors, although
adapters are available, if you want.
This one works fine and looks like new. No scratches.
With paper work for $80.

Adapters from Type N connector to PL-259. $8 each

Heath Wattmeter/SWR Bridge:

Heath HM-2102 VHF Wattmeter/SWR Bridge:
The HM-2102 is similar to the HM-102, but covers
50 to 160 MHz., with 250 and 25 watt scales. It can
also be used to check SWR, and has a remote sensor
that can either be left inside the meter, or separated
from the actual meter. SO-239 connectors in and out.
This particular meter works great, looks great, and
includes paper work for $45.

Communications Speakers:

Realistic 21-549 A
This one is about 4 inches square but only about 2 inches
deep. It is rated for 5 watts, has an 8 ohm impedance, and
is listed as a 300 to 3000 Hz frequency response, making it
ideal for communications. 3.5 mm (1/8 inch) mono plug. It
is black in color, looks great, and sounds great. $18

Vanco SPB-5
Appears to be the same at above, but with a Vanco label.
Also includes gimbal mount. $15

Vanco SPB-6
Similar to SPB-5 above, but is considered a noise
cancelling speaker. 10 Watt rating. Still in original
box, new. $18

Icom BC-72 A Desk Charger:

The Icom BC-72 A is a desk charger that will "fast charge"
the BP-81 thru BP-85 battery packs used in the Icom "S"
series of HTs. It does this in about an hour.

This charger operates from 13 V DC with the supplied wall
wart, but it can also be used with a CP-12 DC cable from
a cigarette lighter, or other source of 13 V DC.

This particular unit works fine and is still in its
original box. Of course paper work is included for $25.

12 Amp Regulated Power Supply:

This is a very nice 13.8 Volt DC power supply, rated
at 12 amps ICAS. It says "U/VHF Power Supply" on it,

but I can not find a manufacturer name.
It appears to be very rugged.

It has over voltage protection, which is adjustable,
as well as adjustable output voltage, which is very
well regulated at 13.8 Volts.

It has a lighted voltmeter on the front, and output
connections on both the front and rear.

This is obviously more than enough current for most
2 meter and 440 MHz rigs.

It works fine and looks fine. $50

10 amp, 13 V DC, Power Supply:

The Stabylex Electronics Corp., model 10 SR
power supply has automatic short circuit protection,
and a very large heat sink.

A 10 amp rating is ideal for most 2 meter and
dual band rigs.

This one works fine and looks great also. $35

Low Pass TVI Filter:

A low pass TVI filter is added to the transmitter to reduce
harmonic interference. All have SO-239 connectors, and are
50 ohm filters.

Drake TV-5200-LP Low pass TVI filter
This is the filter that may also be used on the low end of six
meters, as well as HF. It is good for 1000 Watts "average" below
30MHz, and about 200 W up to 52 MHz. It is the newer version
of the TV-1000. $30

VX-7 Nifty Mini Manual
A pocket reference to all of those commands that no one
remembers! For the VX-7. Spiral bound. $18

Scanners:

Regency Touch K100 Scanner:

The Regency Touch K100 is a programmable scanner that
covers the low VHF, Hi VHF, and UHF frequencies. Of
course this means it covers weather frequencies. It
has battery back up of the programmed frequencies and
also will do searches.

Frequencies covered include
30 - 50 MHz

144-148 MHz
148-174 MHz
440-450 MHz
450-470 MHz
470-512 MHz

More info can be found at
http://radiopics.com/Regency/Regency_Touch%20K100.htm

This one works fine and looks fine.

With telescoping antenna, power cord, and paper work for
$25.

Uniden Bearcat BC-50 XL Scanner:

The BC-50 is a handheld programmable scanner that
covers the low VHF, high VHF and UHF bands. It can
run off of five AA cells, or external 7.5 volts DC.
It has a BNC antenna connector.

Frequency coverage:
66 - 88 MHz
136-174 MHz
406-512 MHz

More info at
http://www.rigpix.com/bearcat/bc50xl.htm

This one works fine with an external speaker, but not
with the internal speaker. This could just be dirty
connections, as the SK who had it stored it in his
garage. It could stand some cleaning, but it does work.

With paper work for $10.
If you desire a rubber duck antenna with it, add $10.

Realistic PRO-56 Scanner:

The PRO-56 covers from 144 to 174 MHz and also 430 to 512 MHz.
It is a small scanner with 8 channels, and is powered by a 9
volt battery, or battery eliminator.

This one works fine and looks fine as well.

It includes a telescoping antenna for $15.

Coaxial Cable with "N" Connectors:

This cable has a male "N" connector on each end.
It is about 60 feet long.

The coax is labeled 50-2 V. It is slightly larger
in diameter than RG-8 X, but not quite as large

as RG-8.

This piece is in good condition, with heat shrink
around the connector for strain relief. $35

Coax connectors and adapters:

Prices are per connector.
Several of each are available.
Most are unused.

SPECIAL: Buy 5 and take 10% off.
Buy 10 or more and take 20% off.

I have quite a few different variety of "N" connectors.
Please send your request.

UG-175 reducing adapters for PL-259 connectors to
use with RG-58. 50 cents each

UG-176 reducing adapters for PL-259 connectors to
use with RG-8 X or RG-59.
Amphenol, still sealed in the package. $1

UHF double female "Barrel connector" $3

UHF "Bulkhead Connector" - Double female, as above, but for
mounting thru a window, siding, etc. about 2 inches long $6

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male to BNC female $5

BNC male for coax cables
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T", two female and one male $3

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, and many miscellaneous accessories.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

pcb for sale,

newly design DEAD BUG UGLY STYLE PCB's..

especially made for working on SMD designs using regular through hole components,

material -- good quality Paper Phenolic Pcb, glass epoxy pcb,

the copper pads are tinned so soldering on them is extremely easy,

no corrosion ..

these pcb are ideal for experimenting with different designs and components, as they can be mounted directly to any surface and are easy to apply any design of circuit..

also available is a single strand tinned pure copper wire easy for soldering .6mm thickness..5meters for only 1 us dollar.

size 1 -- 5 by 5cm square

size 2 -- 5 by 10cm rectangle

cost is very cheap,

for paper phenolic material pcb

cost for size 1 -- 4pieces/per US dollar

cost for size 2 -- 2pieces/per US dollar

minimum order quantity is for dollar 10$.

for glass epoxy material pcb,

cost for size 1 -- 2pieces/per US dollar

cost for size 2 -- 1pieces/per US dollar

minimum order quantity is for dollar 10$.

international shipping is no problem, i will ship anywhere

will ship with registered post

shipping charges are additional .

i prefer paypal..

email -- vu3sxn@...

already sold these pcb to more than 65 different fellow ham radio operators.

here check out the pictures of pcb's --

For Sale: AM Broadcast Band Crystals

Great for commercial users or for experimenter purposes. Build an AM transmitter or other fun gadget with them! Most of these are new FT243 original crystals - they are all fully tested.

Examples: (I have a few others that are not listed on the web page)

1000 kHz, 1020 kHz, 1030 kHz, 1050 kHz, 1070 kHz etc.

1100, 1200, 1920, 1300, 1320, 1350, 1400, 1430 kHz etc.

I just found an extra one on 1400 kHz that is an hc6u metal can crystal.

Ordering information and full details may be found here:

http://af4k.com/FT243crystals100-1499khz.htm

Ham Band crystals are at:

Running (or restoring) a Heathkit DX100 ??

These are from a working DX100 transmitter. Great for use as spares or replacements.
All tested and working as described below

Two RCA 807 tubes (one gassy one) - with plate caps
Two RCA 6146 tubes
One G.E. 5V4 rectifier (worth serious money)
One RCA 5U4 Rectifier
One Tung-sol 6AU6
One RCA 6AU6
Two G.E. 6AU6
Two G.E. 6AQ5
One G.E. 6AL5
(I prefer not to sell these individually)
You get all 13 tubes for $30.00 plus shipping.

ALSO:

Heathkit DX100 chassis with many small parts - $20.00 plus shipping
(Two available.)

Heathkit DX100 VFO assembly - $20.00 plus shipping
(Two available.)

ONE HV Choke from a DX100 or a Viking II - not sure as it is unmarked - $25.00 plus shipping

ONE Plate Transformer from a Viking II Transmitter - $50.00 plus shipping.

73 & thanks for looking.

TenTec "Scout" Accessories, Power Supplies, RF Speech
Processors, Digital Rotor Control, Communications
Speakers, Coaxial Antenna Switches, Noise Filter,
AC Line Voltage Meter, Low Pass TVI Filters, Bird
Wattmeter, and other miscellaneous accessories For Sale:

Accessories for TenTec 555 Scout For Sale:

All of these items are used with the TenTec Model 555
"Scout" HF transceiver.

Band modules for 80/75, 20, and 15 meters.
Band modules are $55 each.

TenTec 297 noise blanker for the 555 Scout
It works great on impulse / ignition type of noise.
Not as great on other kinds, such as static crashes. $75

TenTec hand microphone
It appears to be a model 701, but that info is not on the mic.
Four pin connector can be used on any of the TenTec rigs with
the 4 pin connector. Works fine and looks close to new.
With paper work for $30.

TenTec 715 RF Speech Processor:

The Model 715 RF Speech Processor is a high performance
true RF-type speech processor designed to operate with
most modern HF Amateur Radio transceivers. RF speech
processing is a superior system to traditional AF
systems found in a typical HF transceiver.

..Increase average SSB power output by up to 6 dB
..Enhance readability by stations hearing your signal
..Break pileups for DXpeditions faster
..Keep your net or contest run frequency clearer
..Easy to install, easy to operate

The 715 RF speech processor is installed between the
microphone and the microphone jack on your transceiver.
Two microphone inputs are provided -- an 8 pin microphone
connector wired for TenTec and Yaesu, and a 1/8? input
used for direct connection of microphones. 13 V DC required.

This particular unit works 100% and looks like new.
Paper work is included for $200.

TenTec 234 RF Speech Processor
The 234 is the predecessor to the 715 speech processor (listed above) except it matches the early Omni Series A, B, and C rigs, and others of that era. It has both a 4 pin plug and a 1/4 inch stereo jack for input. It needs 13 V DC at low current. It is an extremely effective unit, typically providing about a 6 db increase in talk power. With paperwork for $150.

HyGain DCU-1 Deluxe Digital Rotor Control Box:

The innovative DCU-1 Pathfinder Digital Rotor control unit gives you automatic operation of your brake and rotor. It has computer control with RS-232 pass through and is compatible with many logging and contest programs as well. It has 6 presets for your favorite beam settings, 1 degree heading accuracy, automatic 8-second brake delay, and 360 degree choice for center of rotation. It operates at 110V.

The DCU-1 digital rotor control unit is compatible with the T-2X, HAM-IV, and HAM-V families of rotators.

This unit works fine and looks fine as well.
Paper work is included for $450.

APC "Pro 7" Noise Filter and Surge Suppressor:

This unit has 7 outlets, with a 6 foot cord, and provides surge suppressor for your equipment. It also provides noise filtering / EMI / RFI suppression of 60 db. There is $75,000 worth of insurance included. It comes with a lifetime warranty, and I think this is APC's "Top of the line" unit.

Detailed specs can be found at
http://www.apc.com/products/resource/include/techspec_index.cfm?base_sku=PRO7

This one appears to be new, unused, in its original box.
Only $18/

TenTec Switching Power Supply:

"Switcher / 25" 25 amp switching power supply:
This is a 25 amp switching power supply in a case that matches the early Omni series case, with the metal bezel around it. It is in a case that is the same size as a 243 remote VFO. It has an ammeter on the front, along with Switch, TenTec logo, and output bulb. The front panel basically looks like a 280 power supply with a metal bezel, but says "Switcher/25" on it. It is very quiet, and well shielded, and does not produce any electrical noise that I could find. $140

Kepco Variable Bench Power Supply:

This is an ideal bench power supply! It is a Kepco Model ABC 40-0.5, which means that it will produce from zero up to 40 V DC at up to 1/2 amp. Great for the bench.

The voltage is adjustable with a 10 turn pot from close to zero, up to about 40 volts. There is a fairly large analog meter that reads the voltage. There is also current limiting built in that is adjustable from about 100 ma to up to about 700 ma. The same meter that reads voltage can be switched to read current, or short circuit current (the point that the current limit is set). In addition, there are connections on the back to allow remote sensing and remote programming. This is a quality regulated power supply!

This particular unit works 100%, and looks extremely nice. $85

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter to reduce harmonic interference. All have SO-239 connectors and are 50 ohm filters.

Johnson 250-20
This cylindrical low pass filter has a cut off frequency of 45 MHz and 75 db of attenuation, and is adjustable.
Rated at 1000 Watts AM, or 5000 Watts PEP SSB.
The fact that it is adjustable, means you can get rid of more TVI, and it is rated to handle higher power than most.
A real win-win situation. $30 or with mounting bracket, $35.

B & W 425 (same as FL-10/1500)
Cuts off just above 10 meters, and handles 1500 Watts.
Newer case style, $30.
Older, heavier copper style case, painted gray. $35

Para Dynamics PDC 1089
This filter is rated at a full Kilowatt, up to 30 MHz.
5 x 6 x 2 inch black box, instead of the long enclosure.
$25

Coaxial Antenna Switches:

All work fine, look fine, and use SO-239 connectors.

B & W Model 550 A Coax Switch
This model will switch up to 5 antennas, and does NOT ground unused antennas. Coax comes out the side, like spokes of a wheel.
It will handle the full legal limit. $35

SCP Comm Switch SC-40-AS Coax Switch
Three position antenna switch in rectangular box.
Connectors on the back. In original box. May be new. $25

Two position "Strip Line" Coax Switches:

These switches utilize metal cavity construction for max efficiency
and high isolation. Isolation is better than 50 dB at 300 MHz
with low insertion loss less.
All are two position and are typically rated for 2500 W PEP,
and good to 600 MHz.

Diawa CS-201 - $22
Opek CX-201 - $22
MFJ 1702 C - With center position that grounds both antennas,
and added lightning protection. $25

Bird 43 Watt Meter:

The Bird 43 is an insertion type RF watt meter, designed
to measure RF power and load match in 50 ohm coaxial
transmission lines. It is intended for use with CW, AM,
FM, and TV modulation. It measures power from 100 mw
to 10KW, depending on the element used. The meter provides
direct readings in watts with an expanded scale for easy
reading. The scale is graduated for 25, 50, and 100 full
scale. Elements are available in a variety of power, and
frequency ranges.

This particular meter is model 4300.21 manufactured in
March 1957, so it is the older, well constructed model.
It has "N" connectors, with the leather handle, which
is in good shape.

The meter works well. $175

50 H Element for Bird Wattmeter
This measures 50 watts full scale over the HF spectrum
from 2 to 30 MHz. $65

Buy both of the above together for $225.

Communications Speakers:

Realistic 21-549 A
This speaker is about 4 inches square and about 2 inches
deep. It is rated for 5 watts, has an 8 ohm impedance, and
is listed as a 300 to 3000 Hz frequency response, making it
ideal for communications. It has a 3.5 mm (1/8 inch) mono
plug, as used by most modern rigs. Gimbal mount included.
It is black in color, looks great, and sounds great. $12

Vanco SPB-5
Appears to be the same at above, but with a Vanco label.
Also includes gimbal mount. $12

Vanco SPB-6
Similar to SPB-5 above, but is considered a noise

cancelling speaker. 10 Watt rating. Still in original
box, new. $18

Cables for CW keyers and keys:

Cable for paddles
About 3 feet long, and with a 1/8 inch (3.5 mm) stereo
connector on the end, like used by most rigs. $8
As above, but 1/4 inch plug. $8
As above, with GOLD 1/4 inch plug. $15

Cable for straight key
About 3 feet long, with a mono 1/8 inch (3.5 mm) phone
plug on it, as used with a straight key. $5
As above, but 1/4 inch plug. $5

I also have many other accessories available such as many
different types of microphones, HTs, VHF and UHF rigs,
antennas, etc. Just too many things to list here.
Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

2853. FS: Set of Transmitter Tubes... DX100?

Yahoo group: amatuerradioswapfest
Date: 2014-07-09 19:28:50 UTC
From: bcarling@...
Topic: 2853 Message: 2853

For Sale: Set of Transmitter Tubes... I THINK these are for a Heathkit DX100.

In any event they are in a box marked as such. I know I probably got it wrong last time, but
these are then probably the correct ones, hi hi... Please no silly comments about how any of
them is "not rare" or "worthless" etc. These are good used tubes I have and they are priced reasonably enough.

They all test good unless otherwise indicated. The box contains:

1 X 6146 tested good
1 X 6146 missing plate cap but tests good
2 X 1625 tubes RCA
1 X 5U4GB Westinghouse
1 X 5U4 - RCA
1 X 5763
1 X 12BY7
1X 6AQ5
1 X 12AX7
1 X 6AL5

10 tubes in total - will sell for $25.00 plus shipping

73 and thanks for looking - Brian Carling, AF4K

2855. FS: High Impedance Headhones

Yahoo group: amatuerradioswapfest
Date: 2014-07-10 21:03:48 UTC
From: bcarling@...
Topic: 2855 Message: 2855

For Sale: High Impedance Headhones

H-43 B/U headset in new condition. Comfortable set with nice padding. They look new and unused, but since is no package are being sold as "used" but in good working condition.

Found on the web:
"The H-43 B/U was a 3000 ohm set that was made for a Radiac Geiger Counter and also works well with crystal radios. "

Seems to be ideal for a regen or other homebrew receiver requiring hi-z.

Available for $15.00 plus shipping

2857. PARTS etc. FOR SALE

Yahoo group: amatuerradioswapfest
Date: 2014-07-23 18:09:35 UTC
From: bcarling@...
Topic: 2857 Message: 2857

PARTS etc. FOR SALE

1) Barker and Williamson Coaxial Antenna Switch model 592 (two way) - excellent condition
QTY 1 available for $32.00 plus shipping

2) Sprague 8 uF at 1000V DC oil-filled capacitor. Tested and works fine, no leakage or other issues. Dimensions 3.75" X 1.25" X 5.25" tall
QTY 1 available for $6.00 plus shipping

3) Pair of ceramic octal sockets wired for 6146 tubes, an a small copper plated subchassis, with a nice 2.5 mH choke, ceramic feedthru etc. $5.00 plus shipping

4) - Box of 16 power resistors and bleeder resistors, Ohmite etc. mostly 25, 50 and 100 watt.
Examples: 100 ohms at 100 watts, 12K at 100 watts, 14K at 50 watts, 15K at 72 watts, 16K at 50 watts, 20K at 100 watts, 24K at 72 watts, 25K at 100 watts, etc. This is about 10% of list price:
Available - all 15 for $25.00 plus shipping

5) DX100 plate tank coil including extra 160m coil - $5.00

6) RFC - Plate choke from a Viking II transmitter - $5.00

7) Pair of 10K at 10 watts resistors, plus one 15K at 10 watts from DX100 - $4.00 for all 3.

8) Panel Meter from DX100 Transmitter - $10.00

9) Chassis for DX100 Transmitter - $20.00

10) VFO assembly for DX100 - $20.00

11) Transformer with secondary: 50V AC at 20 Amps. Like new, scientific grade, and in excellent condition.
Primary is 120V AC and this is a beautiful workhorse transformer. 4 hole mounting.
Dimensions: 7" X 6.5" X 4.5" tall.
QTY 1 available for $25.00 plus $15 for USA shipping

12) Pair of ceramic 807 sockets with mounting hardware - $5.00

13) Pair of ceramic plate caps for 807 tubes Millen - $4.00

14) Microphone socket for DX100 - 2-pin with hardware - $4.00

15) Group of capacitors - One Astron 0.1 uF at 600V DC, Two 0.05 at 1600V DC, One 0.0002 uF at 1200V and two electrolytics 40 uF at 450V DC. These are good tested used parts. The 0.1 and 0.05 ones have usable short leads - others normal. Also, one DX100 Fixed loading capacitor HV, switches in parallel to the loading variable capacitor.
Total of 7 capacitors for $6.00

16) New Silver mica 0.001 uF capacitors at 2500V DC. Available for $6.00 each while they last.

17) G.E. MASTR external speaker $5.00

18) G.E. mobile Power supply for two way radio - $5.00

19) Three black IERC tube shields, heat dissipating types, for 7 pin miniature tubes. $6.00 for all three.

20) HAL-TRONIX model HAL FC-600A frequency counter. Good working condition. BNC inputs and runs on 120V AC. I have no manual for this. Available for $15.00 plus shipping.

21) 6Y6G tube made by G.E. - QTY 1 available for $3.00

22) 811 Transmitting tube Penta Labs - looks new - $12.00

23) 5R4WGY tube new in box JAN type from Chatham Electronics - $5.00

24) 5T4 tube, new - $2.00

25) 6146 (S2001A) from Matsushita - looks new, like 6146 - $6.00

26) Mullard TDD2A gold tube new in box - $10.00

27) 3B28 rectifier tube - JAN - QTY 1 only for $4.00

Shipping additional on all the above. For additional details, pictures or questions, please e-mail me off the list.

73 & thanks for looking

FOR SALE - TENTEC 564 OMNI VI PLUS TRANSCEIVER - in excellent condition.

Just serviced by Ten-tec and thoroughly aligned / checked out.

Has some extra filters. 1.8 MHz SSB, 500 Hz CW etc.

Covers 160m - 10m plus the WARC bands.

Image rejection > 90 dB.

100 memories, serial interface, DSP, NB, ANL, NOTCH, KEYER etc. etc.

Desk mic and manual included. This is one of the finest HF transceivers
ever made.

Completely clean and working as it should. No scratches or marks.

Available for $995.00 plus shipping.

ALSO 963 power supply / speaker in excellent condition.

Available for $195.00 plus shipping.

Buy both together for $1150.00 firm plus shipping.

Additional pictures available on request.

2869. Kenwood Items FS

Yahoo group: amatuerradioswapfest
Date: 2014-08-22 17:07:54 UTC
From: Ken Simpson, W8EK
Topic: 2869 Message: 2869

Kenwood and related Items For Sale:

Dual Band FM Transceiver, Two meter muti-mode transceiver,
Dual Band HT, Microphones, Original Box, Coaxial Antenna
Switches, HT Accessories, Noise Filter, Original Manuals,
and more

Kenwood TM G-707 A Dual Band Transceiver:

The TM-G 707 has an extra-large control panel with the welcoming glow of its amber-colored LCD. The TM-G 707 is extraordinarily user-friendly, which is an important consideration for a mobile rig. This mobile transceiver provides 50 (50/10/5W) watts on 2 meters and 35 (35/10/5W) watts on 440 MHz. The TM-G707A offers features such as memory name function (7 character), S-meter squelch, time-out timer, tone encode/decode, dimmer, and auto power-off. Non-simultaneous cross-band repeater access is supported. A 6 pin mini DIN connector for 1200/9600 bps packet and other digital modes is provided.

Receive coverage is 118-174 and 410-524 MHz F3E (FM).
Transmit range is 144-148 and 430-450 MHz F3E (FM).
Size is 5.5 x 1.7 x 7.4 inches. It requires 13.8 VDC at 11 amps.

Features include:
180 Alpha Memories
Big Display
DTMF Hand Mic.
Auto Repeater Offset
Guide Function
Dimmer
Time Out Timer
Visual Scan
Priority Scan
Auto Simplex Checker
DTSS Selective Call
PL Decode/Encode
Packet 1200/9600 DIN plug
Hi/Med/Lo RF Out

This particular unit is still in its original box. It functions 100%, and looks the same. As best I can tell, all of the little packages of screws, fuses, etc. are included. $250

Kenwood TS-711, multimode 2 meter transceiver:

This unit is an FM, SSB, and CW transceiver for 2 meters. It has 40 memory channels, and up to 25 Watts of output power, which is continuously variable (no Hi or Low switch, but a front panel control to continuously vary power). Of course it will scan, and do the things one expects in a 2 meter rig. It has a GASFET in the front end for one of the best receivers I have ever used. The 120 V AC power supply as well as 13 V DC, is built in. The case looks very similar to a TS-440 or TS-450 HF rig.

This particular unit is very nice. I do not find any scratches, but it does show slight use. It has the optional TU-5 subaudible tone PL encoder in it, so it can be used with modern repeaters. Power cord and mic are included, with paper work, for $425.

Kenwood TH-78 A Dual Band HT:

The Kenwood TH-78A is a sophisticated dual-band HT. It has built in tone and paging functions, alphanumeric memory and message paging. Additionally it has dual-frequency receive capability (including VHF+VHF and UHF+UHF). There are 50 memory channels. The operator can choose from 8 different scan types. DTSS allows DTMF access to the transceiver.

The receive range is 118-173.995 and 438-449.995 MHz.
It has three RF output levels of about 5.0/0.5/0.02 watts.

Features include:
Two Line LCD Display
50 Memories
Alphanumeric Memory
Message Paging
Cross Band Operation
Backlit Keypad
Multi Scan Function

This one works fine, and looks fine. It includes the HT, rubber duck antenna, wall charger, and paper work.
A PB-13 standard battery is included, that holds its charge fine. Also included are two PB-17 heavy duty packs that are in bad condition. $135

Kenwood MC-60 A Deluxe Desk Microphone:

The Kenwood MC-60A has been a popular desk mic among Kenwood owners for many years. It has a communication type dynamic unidirectional moving coil type mic element and features UP-DOWN tuning (on compatible Kenwood transceivers) plus a built-in pre-amp. There is a switch for PTT (push to talk) and also a lock feature. The mic impedance may be set for 50K ohms or 500 ohms. The frequency response is 150 Hz to 10 kHz (-6dB) with the Preamp off and 200 Hz to 7 kHz (-6 dB) with the Preamp

on.

The heavy zinc die-cast base provides extra stability. The mic terminates to a standard 8 pin mic plug. The preamp requires two AA cells which are mounted through the bottom of the base. Please note that the earlier MC-60 (non-"A") version featured a 4 pin mic plug and did not have UP-DOWN tuning.

This one works 100% and looks very close to new.

With paper work for $100.

Hand Microphone with round 8 pin plug for Kenwood, Alinco, etc.

This hand mic works great on most Kenwood rigs with the round 8 pin connector, such as the TS-430, TS-440, TM-241, TM-2530, TW-4000, and others, including Alinco and ADI. It says "Electret Condenser Mic" on the back, and "Kenwood" on the front, with no model number.

Basically, this mic functions like an MC-43, with a couple more features. It has the mic and PTT switch; it also has up/down switches on the top. There are four "extra" buttons labeled Call, VFO, MR, and PF. What these four buttons do depends on the rig. There is also a "Lock" switch on the back.

Regardless if you use the four extra buttons or not, you still have a mic that works like an MC-43.

This mic works fine, and looks like new. I am guessing it came with a rig, and was immediately put in the drawer, and never used. $30

Original Boxes for Kenwood VHF / UHF Rigs:

The following original boxes for Kenwood equipment are available. They are all in very nice condition, and include the molded styrofoam inserts to protect the rig, plus the box itself.

Kenwood TM-221 two meter transceiver $5

Antennas for your HT:

All rubber ducks are for 2 meters, are in good condition, and are $10 each, unless stated otherwise.

BNC - Dual Band (2 m and 440 MHz) Telescoping antenna provides significant gain when extended, $18

BNC - As used on most HTs, 7 inches long

BNC - Original Alinco EA0024, about 4 inches long

BNC - Original from Kenwood TH-215, about 5 inches long

BNC - "Stubby" about 4 1/2 inches long

Type F connector - 6.5 inches long

BNC Stubby for 440 MHz, 3 inches long

Threaded (as used by Motorola, etc.) stubby for 440 MHz

Not a Rubber Duck, but can be used on your HT:
Telescoping Antenna w/ BNC about 19 inches long
can be used as a quarter wave antenna on 2 m,
or on 220, or 450 MHz if telescoped shorter. $12

Accessories for the Kenwood TH-21 / 31 / 41 series HTs:

Antenna adapter that fits the TH-21 series HTs, and has
an SO-239 on the other end, to accept a PL-259. $5

Antenna adapter that fits the TH-21 series HTs, and has
a BNC on the other end. $8

Kenwood SC-8 T "Soft Case" for any of the TH-21 series HTs
great condition $12

Original Operating manual for TH-21 HT for 2 meters $8

Kenwood W09-0315 charger
This charger is used to charge the larger PB-21 H batteries
for the TH-21 series, and also on other Kenwood radios.
It has a standard 2.1 mm coaxial connector. $12

HT Belt Clips and Wrist Straps:

Belt Clips:
All include the hardware with the belt clip and are $6 each.
Icom IC-2 AT
Kenwood BH-6
Motorola
Yaesu FT-207
Yaesu FT-209

Wrist Straps for various HTs - $4 each
Kenwood TH-215 / 225 / 415, TR-2500, etc.
Kenwood TR-2400
Yaesu FT-209

Two position "Strip Line" Coax Switches:

These switches utilize metal cavity construction for max efficiency
and high isolation. Isolation is better than 50 dB at 300 MHz
with low insertion loss less.
All are two position and are typically rated for 2500 W PEP,
and good to 600 MHz.

Diawa CS-201 - $22
Opek CX-201 - $22
MFJ 1702 C - With center position that grounds both antennas, and added lightning protection. $25

APC "Pro 7" Noise Filter and Surge Suppressor:

This unit has 7 outlets, with a 6 foot cord, and provides surge suppressor for your equipment. It also provides noise filtering / EMI / RFI suppression of 60 db. There is $75,000 worth of insurance included. It comes with a lifetime warranty, and I think this is APC's "Top of the line" unit.

Detailed specs can be found at
http://www.apc.com/products/resource/include/techspec_index.cfm?base_sku=PRO7

This one appears to be new, unused, in its original box. $18

Original Manuals for Kenwood equipment:

All manuals are in very nice condition, for Kenwood equipment.
All are Operating manuals unless otherwise specified.
All are original manuals only.

SPECIAL:
Buy two, three, or four of my books/manuals, and take 10% off.
Buy five or more and take 20% off.

TH-21 HT for 2 m, $8
TH-215/315/415 HT for 2 m, 220 MHz, or 440 MHz, $10
TH-225, 2 m HT, $12
TH-235, 2 m HT, $15
TH-241/441/541 mobile FM transceivers
...For 2 m, 440 MHz, & 1200 MHz, $12
TM-221/421 2 m or 440 MHz mobile, $12
TM-261/461 2m or 440 MHz mobile, $12
TM-2570/2550/2530 2 m mobile, $15
TR-2400, 2 m HT, $12
Service manual for TR-2600, 2 m HT, $12
TR-9000, 2 m multimode, $12
TS-120 S/V, HF xcvr, $20
TW-4000 dual bander mobile, $15
Service manual for TW-4000 dual bander $20
TW-4100 dual band mobile, $15

BC-5 DC to DC quick charger $2
LF-30A Low Pass Filter $5
MC-30 & MC-35 hand microphones $4
MS-1 mobile stand $3
PB-1, PB-2, PB-3, & PB-4 battery packs $3
PB-24 battery pack for TR-2400 $2
PB-25 H battery pack for TR-2500 $2

PS-6 power supply $5
PS-30 power supply $4
SMC-24 speaker mic $3
SMC-25 speaker mic $3
SP-430 speaker $2
SP-820 Speaker $2

These are original Kenwood manuals only.

Versión en español de Kenwood TM G-707 manual de Venta:

Versión en español del Manual de Operación
para el Kenwood TM G-707 transmisor-receptor de banda dual

Este es el manual de instrucciones original, en español.
Parece que es bastante extensa y detallada.
Es básicamente nuevo, sólo se abre para observar que
es sólo en español. Es original de Kenwood.

$ 8 más gastos de envío de la Florida.

Spanish Version of Kenwood TM G-707 manual:

Spanish version of the Operating Manual
for the Kenwood TM G-707 dual band transceiver

This is the original operating manual only, in Spanish.
It looks like it is quite extensive and detailed.
It is basically new, only being opened to observe that
it is in Spanish only. It is original from Kenwood. $8

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

2871. FS: Microphone Compressor - Limiter

Yahoo group: amatuerradioswapfest
Date: 2014-09-15 11:20:47 UTC
From: bcarling@...
Topic: 2871 Message: 2871

FOR SALE: Pro Audio Compressor - Limiter - ideal for AM and SSB stations.

Do you want the best sounding audio you can get - add a little compression and limiting.

Here is a versatile Behringer MDX4400 Multicom Pro audio processor, 19" rack-mount. 120V AC operation. Professional audio processor, great for the ham shack. Uses 1/4" TRS and XLR connectors for microphone I/O.

INPUT AND OUTPUT level is VU metered.

Has up to 4 channels of compression-limiting with multiple adjustments for both effects. Combine compression with limiting.

Looks new and works perfectly.

Cost $179.00 new and now available for $50.00 plus shipping.

Discounted Original FT243 Crystals for the AMATEUR BANDS (mostly!)

The following ARE ALL Original FT243 crystals are offered at a discount price.
There are a few hc6u metal can one slisted and a couple of AX2 (Same pins as FT243.)

These are radio crystals etc. are useful for transmitting, experimenting, homebrewing and testing. Unless otherwise noted, they are all FT243 types -

- indicates more than one is currently avaiable

260 kHz hc6u - $5.00
455 kHz hc6u - $12.00
466 kHz hc6u - $12.00
905 kHz (AM BC Band) - $5.00
1400 kHz (AM BC Band) - $12.00
3715 kHz - $6.00
3735 kHz - $6.00
3742 kHz hc6u - $2.00 each
3797 kHz - $6.00
3937 kHz - $6.00
4000 kHz - $6.00
7000 kHz - $5.00 each
7100 kHz - $5.00 each
7140 kHz (15m AM) - $8.00
7173 kHz - $4.00
7250 kHz (40m/10m AM) - $5.00 each
7275 kHz (40m/10m AM) - $6.00 each
7300 kHz FT243 - $5.00 each
8000 kHz hc6u - $5.00 each
8000 kHz FT243 - $5.00 each
8375 kHz (6m) - $5.00 each
8400 kHz (6m) - $12.00
8425 kHz (6m) - $5.00 each
14.165 MHz - $5.00
14.210 MHz AX2 - $5.00
14.213 MHz AX2 - $5.00
14.213 MHz - $5.00
14.215 MHz - $5.00
14.229 MHz AX2 - $5.00
14.235 MHz - $5.00
14.247 MHz - $5.00
14.300 MHz - $5.00
14.301 MHz - $5.00
14.335 MHz - $5.00
16.133 MHz - $4.00
16.293 MHz - $4.00 each

Order via web page at:

2874. Icom HT related items FS

Yahoo group: amatuerradioswapfest
Date: 2014-10-11 17:40:30 UTC
From: Ken Simpson, W8EK
Topic: 2874 Message: 2874

Icom and related items For Sale --
Many HT Accessories including batteries, Original Boxes,
Cable / Adapter, Speaker Microphones, Communications Speakers,
Manuals, and other Miscellaneous Items

Accessories that fit the Icom A6, A24, V8, V82, U82, and
other Icom HTs:

Batteries America CBE-20 Battery eliminator
Goes on HT; plugs into cigarette lighter to power HT.
Appears new, unused. $18

Icom BP-210 Battery, 7.2 V, 1650 mahr
Heavy duty, high capacity NiMH battery.
Looks like new; holds charge well. $30

Icom BP-222 Battery, 7.2 V, 600 mahr
Light duty, light weight NiMH battery.
Looks like new; holds charge well. $15

Icom BC-146 Desk charger
Use with BP-209, BP-210, and BP-222 battery packs.
Appears to be new. Includes the "spacer". $15

Icom BC-147 A, Wall charger
Can be used to charge the HT direct, or to power
the BC-146 desk charger (above).
In original box. $15

Icom MB-86 Belt clip
Connects to the BP-208, 209, 210, and 222 battery packs.
New condition. $8

Original box for Icom IC-V8 HT
Complete with insert. Looks like new. $8

Accessories for Icom IC-2A, 3A, 4A, 02 A, etc. series of HTs:

Icom BC-30 desk charger
This charger will fast charge many different battery packs used
on the Icom IC-2 AT, IC-02 AT, and other HTs of this series. This
includes the BP-2, BP-3, BP-4, BP-5, etc. With paper work for $30.

Icom DC-1, 13 V DC adapter for many Icom HTs:
This adapter slides on the HT, in place of the battery
pack. If 13 V DC is applied, it converts the voltage to
the proper voltage for the HT. This one works fine, and
looks fine. With paper work for $12.

Icom CP-1 DC cord
This cord will work with the DC-1 above, plus many other items needing the 2.1 mm coaxial power plug. The opposite end has a cigarette lighter plug on it. $10

Belt Clip for the above HTs.
Complete with hardware. $6

Batteries for Icom IC-2 AT series of HTs:

These items can be used on the IC-2 A, 3 A, 4 A, 02 A, 03 A, 04A, 2G AT, 32 AT series HTs plus many others.

Icom BC-25 U wall charger
Standard wall charger for most of these HTs. $15

Icom BP-3 Battery pack
This was the "standard" battery that came with many of these HTs. It can be charged with a BC-25 U wall charger, or the BC-30 or BC-35 desk chargers, or with 12 V DC.
This one appears to hold a charge OK. $10

Icom BP-5 Heavy duty battery pack
This battery has several times the capacity of the BP-3, and slightly higher voltage for more power output.
It must be charged by a desk charger (BC-30 or BC-35).
Good condition. $15

W & W aftermarket BP-8 Heavy duty battery pack
This is a NiMH pack, 8.4 V at 2700 mahr; extremely heavy duty, long life.
This one looks close to new; excellent electrical condition. $30

DC Power Cable

This is the heavy duty power cable as used on most of the Icom HF rigs, plus also many Kenwood, Alinco, and others.
It has the 6 pin molex connector, with four pins used - two for plus and two for ground. The cable may not have ever been used. It looks good, and of course works fine. $22

Original Boxes for Icom IC-27 mobiles and IC-V8 HT:

The box for the IC-27 includes the two internal styrofoam inserts that holds the rig, the cardboard box for accessories that also acts as a spacer, and even includes the original plastic bag for the rig.
It is in nice condition. $8

Original box for Icom IC-V8 HT
Complete with insert. Looks like new. $8

Several Speaker Microphones:

All of these speaker mics have the 3.5 mm and 2.5 mm two conductor plugs that are spaced about 3/8 inch apart, and are molded into a single connector. They are used on Icom, Yaesu, Radio Shack, Maxon, Ritron, Vertex and many other radios.

Icom HM-9
This mic was originally used on the Icom IC-2 AT series of HTs. This one works fine and is in great cosmetic condition. Mic clip included. $18

Premier SPM-100
It is a lightweight and compact unit, featuring a powerful speaker as well as a high-quality condenser-style microphone element that produces excellent transmitted audio clarity. The microphone may be secured to the user's lapel or shoulder. It also features a built-in 3.5mm jack for using an external earphone. $18

DM-100
Appears to be the same as the SPM-100 above, but just with a different label. $18

Icom Battery Charger:

Icom BC-127 A, Battery Charger for Icom IC-Q7A Dual Band HT:
This charger charges two AA NiCads (or NiMH) for the IC-Q7 A Dual band HT, and Icom R-2 receiver, and probably others.
This appears to be new, unused, still in its bag.
Icom lists them at $21. Buy this one for $12.

Communications Speakers:

Realistic 21-549 A
This speaker is about 4 inches square and about 2 inches deep. It is rated for 5 watts, has an 8 ohm impedance, and is listed as a 300 to 3000 Hz frequency response, making it ideal for communications. It has a 3.5 mm (1/8 inch) mono plug, as used by most modern rigs. Gimbal mount included. It is black in color, looks great, and sounds great. $12

Vanco SPB-5
Appears to be the same at above, but with a Vanco label. Also includes gimbal mount. $12

Vanco SPB-6
Similar to SPB-5 above, but is considered a noise cancelling speaker. 10 Watt rating. Still in original box, new. $18

HT Belt Clips and Wrist Straps:

Belt Clips:
All include the hardware with the belt clip and are $6 each.
Icom IC-2 AT
Kenwood BH-6
Motorola
Yaesu FT-207
Yaesu FT-209

Wrist Straps for various HTs - $4 each
Kenwood TH-215 / 225 / 415, TR-2500, etc.
Kenwood TR-2400
Yaesu FT-209

Antennas for your HT:

All rubber ducks are for 2 meters, are in good
condition, and are $10 each, unless stated otherwise.

BNC - Dual Band (2 m and 440 MHz) Telescoping antenna
provides significant gain when extended, $18

BNC - As used on most HTs, 7 inches long

BNC - Original Alinco EA0024, about 4 inches long

BNC - Original from Kenwood TH-215, about 5 inches long

BNC - "Stubby" about 4 1/2 inches long

Type F connector - 6.5 inches long

BNC Stubby for 440 MHz, 3 inches long

Threaded (as used by Motorola, etc.) stubby for 440 MHz

Not a Rubber Duck, but can be used on your HT:
Telescoping Antenna w/ BNC about 19 inches long
can be used as a quarter wave antenna on 2 m,
or on 220, or 450 MHz if telescoped shorter. $12

ORIGINAL Icom operating manuals:

Please note that all of these are original Icom manuals
and are not copies. All are in very good condition.
These are original Icom manuals only.

SPECIAL:
Buy two, three, or four manuals and take 10% off.
Buy five or more and take 20% off.

Mobile transceiver and HT manuals:
IC-2 AT, 2 meter HT, still in plastic bag, $6
IC-22 A, 2 m FM transceiver, $10
IC-22 S, 2 m FM transceiver, $12
IC-27 A/E, 2 m transceiver, still in plastic bag, $15

IC-27 H, 2 m FM transceiver, $12
IC-28 H, 2 m FM transceiver, $12
IC-290 H, 2 m FM transceiver, still in plastic bag, $15
IC-736/738, HF + transceiver, $20
IC-751, HF transceiver, still in plastic bag, $22
IC-765, HF Transceiver, appears to be new, $18
IC-3200 A/E, Dual Band FM Transceiver, $15
IC-V8, 2 meter HT, $6

Other Icom manuals:
BC-30 Desk Charger, $4
BC-35 Desk Charger, $5
BP-2, BP-3, BP-4, BP-5 battery packs, $3
BP-21, BP-22, BP-23, and BP-24 Batteries, $3
DC-1 DC pack for IC-2 AT series HTs, $4
EX-310 Voice Synthesizer, $5
HM-8 Hand Microphone, w/schematic, $5
HM-10 scanning microphone, $3
IC-3 PA Power supply / speaker, $10
MB-5 mobile bracket, $2
MB-65 mobile bracket mount, $2
RC-10 Frequency controller, $4
SM-5 desk microphone, $3
SM-6 desk microphone, $3
UT-16 Voice Synthesizer, $5

These are original Icom manuals only.

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs,
HF and VHF/UHF antennas, HF linear amplifiers, and many
other accessories.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

2875. FS: More ORIGINAL FT243 Ham Crystals

Yahoo group: amatuerradioswapfest
Date: 2014-10-19 11:39:48 UTC
From: bcarling@...
Topic: 2875 Message: 2875

FOR SALE:

While they last - these are all original, tested FT243 crystals.
Some have only one available; others may have several.
Unless otherwise mentioned, these are FT243 types.

For some applications, usaers p[refer fuol size, original FT243 quartz crystals, so here they
are, and these are just a selection of a few discounted ones that we offer for sale.

1000kHz hc6u - $10
1400 kHz hc6u - $16

160m:
1955 kHz - $10.00
1990 kHz - $16.00

80m:
3535 kHz AX2 $16.00
3552 kHz - $16.00
3595 kHz - $12.00
3635 kHz - $16.00
3642 kHz - $12.00
3805 kHz - $12.00
3810 kHz - $12.00
3820 kHz - $12.00
3838 kHz - $12.00
3855 kHz - $16.00
3866 kHz - $14.00

3995 kHz FT171B - $19.00

40m:
7002.9 kHz CR1A - $16.00
7010 kHz CR1A - $16.00
* CR1A sockets - $8.00 each
* FT243 sockets - $8.00 each

2877. FS: Cable Lacing Cord

Yahoo group: amatuerradioswapfest
Date: 2014-10-21 03:27:25 UTC
From: bcarling@...
Topic: 2877 Message: 2877

FOR SALE:

CABLE LACING CORD...

I have some spools of new old stock, traditional waxed lacing cord; only a few left. They are
rather heavy since there is 500 yards of lacing cord per spool. It ought to last a long time...

The ones I had before were 200 or 250 yards and sold for $12 each. I need $14 per spool for these ones. When inquiring, please give me your ZIP Code so that I can calculate the shipping. (Better price than Paragear and twice as much.)

Please e-mail me OFF the list.

Hello,
I own a ID- 880H D-Star radio... Looking for someone willing to swap for a Kenwood APRS TM-D700 or D710. Radio is in perfect condition and remote cables for remote head.

If interested please let me know. Also willing to purchase a 700 or 710 if price is right.

Thanks All

Jeffrey

2880. FS: Rare Bliley CCO - 6AG7 Crystal Oscilator Module

Yahoo group: amatuerradioswapfest
Date: 2014-11-03 17:45:03 UTC
From: bcarling@...
Topic: 2880 Message: 2880

FOR SALE:

Bliley CCO - "Crystal Controlled Oscillator" = 6AG7 Crystal Oscilator Module

Here is a Very Cool Commerically built 6AG7 tube oscillator - great for the heart of a homebrew transmitter. Rare antique rom hte 1950s - long since discontinued.

This is a Bliley Co. gadget uilt on a little chassis with terminals for power and RF out. On the
front there is a nice Ceramic Millen Co. style ceramic crystal socket suitaqble for FT243 crystals.

There is a switch for selecting ranges for use at 27 - 30 MHz or 46 - 54 MHz.
Intended for VHF but with the change of one coil at the poutput this can easily
become be an HF oscillator.

Neat looking gray painted chassis with terminal strip in rear for all connections.
Excellent condition. Comes with all documentation. Complete with the 6AG7, tube - tested nandeworking.

Available for $25.00 plus shipping.

Pictures and details here:

http://af4k.com/cco.htm

2881. FS: Homebrew Transmitter & 120V PS

Yahoo group: amatuerradioswapfest
Date: 2014-11-06 14:25:49 UTC
From: bcarling@...
Topic: 2881 Message: 2881

FOR SALE:

Homebrew Single Tube 6DQ5 CW Transmitter and 120V AC Power Supply

This is a Single Tube transmitter but has room to be modified for additional separate oscillator stage.

RF final consists of a 6DQ5 tube with bandswitching RF tank for 80 through 10m.
PI NETWORK Output with quality air variable capacitors and a tapped EFJ or Heathkit 200 watt class tank coil. (I forget which!) Currently set to just run on 40m, but add rotary switch
and away you go on all bands.

Antenna switch-over is included with switch and SO239 connections for both RCVR and ANTENNA.

Front panel has a XMIT/RVC switch, Key jack 1/4" and crystal socket for FT243 crystals.

Uses top quality patrs laid out on a traditional cake pan chassis with matching power supply.

Power supply runs on 120V AC and has a stabilized 150V screen grid supply / LV supply. Supplies all needed power including 400V DC, 150V DC, 6.3V AC.

Transmitter is working but willl need some improvements to reduce chirp.

I used this in the recejnt WES event for single tube rigs and made some contacts with it. I had intended to add a 6AU6 osc stage.

Pictures available on request. Complete set up has all cables, includes the interconnetcing cable and all connections. You supply a key and crystal, or I will include a 40m ham band crystal for an extra $6.00

Will sell for $55.00 plus shipping

Pictures available - e-mail me with inquiries.

2890. Audio cable package for sale

Yahoo group: amatuerradioswapfest
Date: 2014-11-24 19:03:45 UTC
From: John Geiger
Topic: 2890 Message: 2890

I have for sale a set of audio cables which includes:
1) A 54 inch cable with a 1/8" mono male plug on 1 end and a female 1/8" plug on the other end.

2) 1 coiled up cable with a female 1/8" plug on 1 end, bare on the other end. It is approximately 24 inches as is, obviously much longer if you uncoil it. Very tight coils on it, so probably several feet long in total.

3) 28 inch cable with male 1/8" stereo on one end, bare on the other end.

4) two cables that are 45 inches long, with male right angle 1/8" plug on 1 end, bare on the other end.

5) 13 inch cable with female 1/8" mono plug on 1 end, bare on the other end.

6) 10 inch cable with male 1/8" mono plug on 1 end, bare on the other end.

I am asking $14 for the set and can take paypal/check/MO.

2895. VHF and UHF antennas and related items FS

Yahoo group: amatuerradioswapfest
Date: 2014-12-13 17:59:27 UTC
From: Ken Simpson, W8EK
Topic: 2545 Message: 2895

VHF and UHF Antenna related items For Sale:

Mobile Antenna Mounts:

Larsen LM-MM Mag Mount
This rectangular mag mount features an extremely strong
magnet. The center of the mag mount takes an Larsen LM
type antenna (5/16 inch stud). It includes coax for $18.

Round NMO Mag Mount
Black, 4 + inches in diameter, with coax. $24

BNC Mag Mount
Has BNC connector on the mag mount so you can add the
rubber duck from your HT.
Coax has BNC connector for your HT.
It permits one to get the HT rubber duck out of the
car for better performance. $22

Trunk Lip Mount
3/8 inch 24 thread stud, with coax. $10

Round Mag Mount for "Antenna Specialists" antenna
It uses the sort of reversed PL-259 type antenna that
was used for many years by Antenna Specialists.
With coax for $10.

Round Mag Mount
has 5/16 inch threaded connection, with coax $10.

White Round Mag Mount
1/4 inch threaded connection, with coax for $10.

Astatic "Mirror Mount" or "Roof Rack Mount"
Mounts to mirror or roof rack, and takes a PL-259 on one side,
and has a 3/8 inch 24 post for the mobile whip on the other.
Used for either HF or VHF/UHF antennas.
New, still sealed in the package. $12
As above, unused, but out of package. $10

Antenna Specialists Antenna Mounting Hardware:

All of the following Antenna Specialists hardware is NEW, unused,
still in their original boxes, with original paper work.

HM-66 Gutter Clip Mount
This gutter clip takes a standard 3/8 inch 24 thread antenna.
It includes coax. It is suitable for VHF/UHF antennas, but is

not rugged enough for HF antennas. NEW $15

K-221 NMO Trunk Lip Mount
This takes any of the NMO VHF or UHF type antennas. It is a nice trunk lip mount, complete with coax. NEW $15

K-66 NMO Hole Mount
This takes any of the NMO type antennas. It is made to mount in a 3/4 inch diameter hole, and includes coax. NEW $15

M-3 Ball Mount
This is a standard, heavy duty ball, suitable for use with HF antennas, or VHF antennas requiring a 3/8 inch, 24 thread antenna. NEW $15

ASC-3D Heavy Duty Ball Mount
Extremely heavy duty, Chrome plated, for 3/8-24 antennas. NEW $28

Mobile Antenna Springs:

These mobile antenna springs appear to be new. They are the chrome plated type, and designed for light to medium duty use, i.e. use on VHF type antennas, and not for heavy duty HF use.

These are about 3 inches long. I have some that are for 1/4 inch diameter antenna mounts, some for 5/16, and some for 3/8 inch. Please let me know what size you need.

These appear to be new, or at least unused.
They are $5 each.

Dual Band 2 m / 440 MHz Mag Mount Antenna:

This antenna has a very strong mag mount. The antenna itself is a quarter wave antenna on 2 meters (unity gain), and provides a couple db gain on 440 MHz. It seems to be very rugged, and even has extra strain relief on the PL-259 coax connector. It is about 20 inches tall, including the mag mount.

This particular antenna appears to be new, unused. It is the black color (not silver). $30

Hustler UHT-1, VHF / UHF mobile antenna:

The Hustler UHT-1 is 1/4 Wave Hole Mount Antenna.
It can be cut for any frequency from 136 to 500 MHz. It is low profile, with a 3/4" hole required. Includes 15' coax and connector, and is rated to handle up to 200 Watts of power. This particular antenna is new, still sealed in its original shrink wrap package. $15

Larsen mobile antennas for NLA Mounts:

Both of these fit the Larsen NLA mounts.

Larsen NLA-150
This antenna provides about 3 db gain over a quarter wave, and is a very rugged antenna, about 4 feet long. In very good condition, it the fits Larsen NLA mounts.
Coil only $10
Coil with whip $17

Larsen NLA-UHF coil for 440 MHz
This is the coil only for NLA mounts, for use on the amateur 440 MHz band and UHF public service bands.
Good condition. $10

Cushcraft 4 element 124 WB, 2 meter beam:

The Cushcraft 124WB is a 4 element wideband boomer for 2 meters. It is the right choice for packet systems and other applications requiring a dedicated directional antenna.

124WB Specifications:
Frequency: 144-148 MHz
Elements: 4
Gain: 10.2 dBi
Front To Back Ratio: 19 dB
VSWR 2:1 Bandwidth: 4 MHz.
Power: 2000 watts PEP
Longest Element: 41 inches (1.04 m)
Turning Radius: 8.8 Ft. (2.7 m)
Boom Length: 4 Ft. (1.22 m)
Wind Surface: 0.34 sq. feet
Connector: UHF (SO239)
Weight: 3 Lbs (1.6 kg)

This one is in extremely nice shape. No corrosion.
Only $75.

Coaxial Antenna Switches:

All work fine, look fine, and use SO-239 connectors.

B & W Model 550 A Coax Switch
This model will switch up to 5 antennas, and does NOT ground unused antennas. Coax comes out the side, like spokes of a wheel. It will handle the full legal limit. $35

SCP Comm Switch SC-40-AS Coax Switch
Three position antenna switch in rectangular box. Connectors on the back. In original box. May be new. $24

Two position "Strip Line" Coax Switches:

These switches utilize metal cavity construction for max efficiency and high isolation. Isolation is better than 50 dB at 300 MHz with low insertion loss less. All are two position and are typically rated for 2500 W PEP, and good to 600 MHz.

Diawa CS-201 - $20
Opek CX-201 - $20
MFJ 1702 C - With center position that grounds both antennas,
and added lightning protection. $25

Antennas for your HT:

All rubber ducks are for 2 meters, are in good
condition, and are $10 each, unless stated otherwise.

BNC - Dual Band (2 m and 440 MHz) Telescoping antenna
provides significant gain when extended, $18

BNC - As used on most HTs, 7 inches long

BNC - Original Alinco EA0024, about 4 inches long

BNC - Original from Kenwood TH-215, about 5 inches long

BNC - "Stubby" about 4 1/2 inches long

Type F connector - 6.5 inches long

BNC Stubby for 440 MHz, 3 inches long

Threaded (as used by Motorola, etc.) stubby for 440 MHz

Not a Rubber Duck, but can be used on your HT:
Telescoping Antenna w/ BNC about 19 inches long
can be used as a quarter wave antenna on 2 m,
or on 220, or 450 MHz if telescoped shorter. $12

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs,
HF and VHF/UHF antennas, HF linear amplifiers, and many
other accessories.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

2897. HF Antenna Tuner and HF related antenna items FS

Yahoo group: amatuerradioswapfest
Date: 2015-01-24 15:44:24 UTC
From: Ken Simpson, W8EK
Topic: 2897 Message: 2897

HF Antenna Tuner and HF Antenna related items For Sale:

Murch UT-2000, 2 KW HF Antenna Tuner:

The Murch tuner followed the "Ultimate Transmatch" design
that appeared for many, many years in the ARRL Handbook.
It was considered to be the absolute top of the line HF tuner.

It is rated at 2000 watts, 80 thru 10 meters. Once one looks
at the inside, it is easy to see why. The roller inductor is
HUGE. So is the spacing on the capacitors. This is a very
rugged tuner.

The front panel says this is a UT-2000. The plain UT-2000
was primarily sold without a meter. This one has a meter with
switch for "Off-Fwd-Ref". I think it was available with a meter
as an option.

The case on Murch tuners originally had a really sick green
color. Like most, this one has been repainted and is now a black
hammertone that is in excellent shape.

This one works fine, and looks exceptionally nice.

Paper work for the A and B models is included for $150.

CDE Rotor Control Box for 8 wire rotors:

This CDE Rotor control box will control any of the CDE/Telex/HyGain
8 wire rotors. This is labeled for use with the Tailtwister, but
can be used with Ham M, Ham II, Ham II, or Ham IV, and others as
well.

This one is in the black case, and is a CDE as opposed to the
Telex or HyGain. Most people consider the CDE higher quality.
This one has the LEDs showing direction of rotation and brake
release, in addition to the North centered meter. It has a
female 8 pin Jones connector on it.

This one works fine and looks really great.
Paper work is included for $110.

Coaxial Antenna Switches:

All work fine, look fine, and use SO-239 connectors.

Waters (B & W) Model 376 Protax Coax Switch:

This five position switch permits all five antennas to be shorted to ground. It does not short the input connector to ground. This is the Waters "Protax" series, which grounds all unused antennas (or all antennas if in the "ground" position.

It accepts PL-259 connectors, with the coax going out like the spokes of a wheel. There is also a mounting bracket if one would want to wall mount it.

This one works fine and looks extremely nice.
Paperwork is included for $40.

Two position "Strip Line" Coax Switch:
The MFJ 1702 C switch utilizes metal cavity construction for max efficiency and high isolation. This two position coax switch has a new center ground protection! Better than 60 dB isolation at 300 MHz and better than 50 dB at 450MHz. 50 Ohm. The unused terminal is automatically grounded for static and RF protection. It has less than 0.2 dB insertion loss and SWR below 1.2:1. Heavy cavity type construction and SO-239 connectors. Mounting holes. It looks very close to new.
With paper work for $25.

SCP Comm Switch SC-40-AS Coax Switch
Three position antenna switch in rectangular box. Connectors on the back. In original box. May be new. $22

Wattmeter / SWR Bridges:

All have SO-239 connectors and work fine.

Vanco SWR-2 SWR Bridge / Wattmeter
It covers from 1.7 to 150 MHz. It has a single meter, and is actually a 10 W and 100 W full scale watt meter as well as the "normal" SWR meter. It is still in its original box, with original paper work, and appears to be new. $25.

Lafayette 99-25835 SWR Bridge
This HF single meter SWR Bridge also functions as a field strength meter. This one is also in its original box, with original paper work and appears to be new. $20

Radio Shack 21-524 SWR and Power Meter
This HF meter measures both average and PEP power in 20/200/2000 watt ranges as well as functioning as a regular SWR meter. Looks close to new. With paperwork for $25.

High Sierra HS-1800 DX/B "Screwdriver" HF Mobile Antenna

This HF mobile antenna package includes the HS-1800DX/B antenna, the HS-201C/SS Stainless Steel powder coated mounting bracket, the HS-110A/PC powder coated stainless steel whip, the MM-SSQD powder coated stainless steel quick disconnect, and 60 feet of control cable and coax in the same cable, plus radial package.

This is all completely new, unused. A silent key purchased it just before his death, and never unpacked it. It is still sealed in the plastic bags. It cost him $570.

Buy this package complete with original manual for only $400.

Quick Disconnects, Resonator Spring, Roof Rack Mount

Quick Disconnects
Hustler QD-1, stainless steel, still sealed in package. $18
Lakeview set of four top portions, and one lower portion, often used with Hamsticks. Like new. $24

Hustler RSS-2, Stainless steel resonator spring
Appears to be unused. No blemishes. $10

Astatic "Mirror Mount" or "Roof Rack Mount"
Mounts to mirror or roof rack, and takes a PL-259 on one side, and has a 3/8 inch 24 post for the mobile whip on the other.
Used for either HF or VHF/UHF antennas.
New, still sealed in the package. $12
As above, unused, but out of package. $10

Hustler "Double Talk" Phasing Harness:

Back in the 1970's, Hustler sold a harness of coaxial cable that they called a "Double Talk Harness". It was used to connect to two mobile ball mounts, each of which would have an antenna for the same band. In theory, they would be phased such that there was about 3 db gain, but the reality is that they really shined by reducing QSB, in effect acting as a sort of diversity system.

This phasing harness looks fine and works fine. $17

Other Hustler HF mobile items:

Hustler RSS-2, Stainless steel resonator spring
Appears to be unused. No blemishes. $10

Hustler QD-1 Quick Disconnect, new, still sealed in package. $18

Coaxial Cable with "N" Connectors:

This cable has a male "N" connector on each end.
It is about 60 feet long.

The coax is labeled 50-2 V.

This piece is in extremely good condition, with heat shrink around the connectors for strain relief. $35

Coax connectors and adapters:

Prices are per connector. Several of each are available.
Most are unused.

SPECIAL: Buy 5 and take 10% off.
Buy 10 or more and take 20% off.

UG-175 reducing adapters for PL-259 connectors to
use with RG-58 $.50

UG-176 reducing adapters for PL-259 connectors to
use with RG-8 X or RG-59.
Amphenol, still sealed in the package $1

Amphenol crimp type PL-259, sealed in package $3

UHF double female "Barrel connector" $3

UHF "Bulkhead Connector" with mounting hardware
Double female, about 2 inches long $6

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

BNC HT to PL-259 adapter.(BNC male to UHF female) $5

BNC male for coax cables
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
Amphenol screw in type, sealed in package $4

BNC "T", two female and one male $3

Turnbuckles:

I have two sets of turnbuckles. One is a set of three and are
larger. The other is a set of five. All of them appear to be
new, unused.

The set of three has the turnbuckle itself about 6 1/2 inches
long, with each of the bolts having 3+ inches of thread, plus
the 1+ inch diameter eye. This set is $30.

The second set consists of five turnbuckles, and is marked "5"
on it. Does this mean it is considered to be a 5 inch turnbuckle?
The actual body of it is 3 1/2 inches long, with 2 inches of
thread on each of the eye bolts, plus the 1 inch diameter eye.
This set is $25.

Buy both sets for $50.

I also have many other accessories available such as many
different types of microphones, HTs, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

2901. Daka-Ware sSkirted 2" knob

Yahoo group: amatuerradioswapfest
Date: 2015-02-07 18:07:17 UTC
From: pulsarxp@...
Topic: 2901 Message: 2901

I am restoring an old Eldico TR-75TV Novice CW transmitter and need two, 2" diameter skirted Daka-Ware knobs. The knob has flutes on the main part of the knob. (Collins used a lot of Daka-Ware knobs of this type on their older St James Gray equipment.) Anyone out there with a couple I could buy from you?

I also need three knobs around one inch in diameter for the project. They need to be something similar to the above but should not be skirted. A pointer would be nice or at least a hash mark as a pointer on the knob.

The two main knobs are my biggest concern right now.

Can anyone help?

Lee, w0vt

FOR SALE: Swan 250C - this is a 50 MHz transmitter and comes with AC power supply.

I have the Swan 250C with the original manual and a 117XC power supply.

This set is complete and in excellent condition other than some minor surface rust on the front of the 117XC. I have not been able to test it, but it looks super clean inside and nothing
is missing. No modifications etc.

Comes with the AC Cable and manual only. I do not have a microphone or the interconnect cable.

E-mail me if you would like to see pictures.

I would like $150.00 for the Swan 250C and $100 for the 117XC power
supply. It has no interconnect cable.

FOR SALE: Two BARKER and Williamson 6-position Antenna Switches.

One SO-239 connector for the coaxial input and SIX SO-239 connections for the antennas.

These are both the rectangular, in-line switches with all connectors exiting off the rear. No
awkward round box to mount or other issues. Fairly common and well known design. They typically sell for around $35 - $45 or more on eBay.

Real ceramic construction inside and in excellent condition. They have some markings and show some normal use, but no dents or gouges. Tested and working fine.

Both look more or less identical. E-mail me if you need to see pictures.

One is the Model CS-6G and the other is a model 595. Both are made by B & W and look more or less identical.

Available for only $26.00 each plus shipping.

E-mail if you need details or pictures.

2907. Microphones FS

Yahoo group: amatuerradioswapfest
Date: 2015-02-16 21:16:17 UTC
From: Ken Simpson, W8EK
Topic: 2077 Message: 2907

Icom, Kenwood, Yaesu, DTMF Touch Tone, Speaker
Microphones, etc. For Sale:

Icom Microphones:

Icom HM-14 DTMF Touch Tone Microphone:

The Icom HM-14 has the standard round 8 pin connector as used
by most Icom radios. It has a 16 digit DTMF Touch Tone pad on
the back. It will work with the IC-25A, 28, 38, 45, 48, 77, 78,
120, 229, 271, 275, 290, 375, 451, 471, 475, 505, 575, 707, 718,
725, 728, 729, 735, 736, 737, 745, 746, 751, 756/PRO, 761, 765,
775, 781, 820H, 821H, 900, 901, 970, 1201, 1271, 1275, 2400,
3200, 3210, and probably others. It can be used to add a DTMF
microphone to a rig that does not normally have one.

This one has good audio quality, all 16 digits on the DTMF pad
work like they should, and the coiled cord is in extremely good
shape. $40

Icom HM-36 Hand Microphone:

The Icom HM-36 is used on most of the Icom HF rigs. It has
a round 8 pin plug, making it compatible with almost any of
the Icom rigs with this connector. This includes the IC-746
and 756 series, IC-718, IC-7600, IC-7200, IC-775, plus many
more, including VHF rigs like the IC-28, IC-229, IC-3200
and others.

It also has up / down buttons on the top for changing the frequency.

This one works 100% and looks like it is new. It likely was put
in a drawer after receiving it with a rig, and never used. $35

Kenwood Microphones:

Hand Microphone with round 8 pin plug for Kenwood, Alinco, etc.

This hand mic works great on most Kenwood rigs with the round 8 pin
connector, such as the TS-430, TS-440, TM-241, TM-2530, TW-4000, and
others, including Alinco and ADI. It says "Electret Condenser Mic"
on the back, and "Kenwood" on the front, with no model number.

Basically, this mic functions like an MC-43, with a couple more
features. It has the mic and PTT switch; it also has up/down
switches on the top. There are four "extra" buttons labeled Call,
VFO, MR, and PF. What these four buttons do depends on the rig.
There is also a "Lock" switch on the back.

Regardless if you use the four extra buttons or not, you still have
a mic that works like an MC-43.

This mic works fine, and looks like new. I am guessing it came with
a rig, and was immediately put in the drawer, and never used. $30

Kenwood MC-48 DTMF Touch Tone Microphone
Used on most Kenwood rigs with round 8 pin mic plug.
Includes up/down switches as well as the 16 digit tone
pad. Excellent, close to new, condition. $40

Yaesu Hand Microphones:

Yaesu MH-15 DTMF Touch Tone Mic:
The MH-15 c6 is a hand microphone that features a 16 digit DTMF Touch
Tone Pad on the back, along with a lock/unlock switch. The top has
up/down buttons. Of course the PTT is on the side. This one has the
round 6 pin connector. It works fine and looks close to new. $40

Yaesu YM-17 hand mic:
The YM-17 is a hand microphone with up/down switches on the top
corner. It has the round 6 pin connector. This one works fine and
looks really great. $30

Yaesu YM-31 hand mic:
The Yaesu YM-31 is a hand mic with a round 6 pin connector.
Apparently it is either similar or the same as the MH-25A6j (not
the MH-25 with the 8 pin connector). It is a 600 ohm impedance
hand microphone, and has a Monitor on-off switch on the back.
It looks very similar to the Yaesu MH-1.
This one works fine and looks extremely nice. $25

DTMF Touch Tone Microphones For Sale:

Kenwood MC-48 DTMF Touch Tone Mic
Used on most Kenwood rigs with round 8 pin mic plug.
Includes up/down switches. Excellent condition. $40

Yaesu MH-15 DTMF Touch Tone Mic
The MH-15 c6 is a hand microphone with a 16 digit
DTMF Touch Tone Pad on the back, along with a lock/unlock
switch. The top has up/down buttons.
This one presently has the round 6 pin connector, which can
be changed of course.
It works fine and looks close to new. $40

CES 810 L DTMF Mic
One can manually dial a number, or automatically store it in
the mic, and "speed dial". It has a 12 digit touch tone pad
on the front. With 8 pin modular plug (like computer LAN).
It looks to be unused. $38

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.

Presently with 4 pin connector. It looks to be unused. $38

16 digit DTMF Touch Tone Pad:
This is a standard 16 digit DTMF Touch Tone Pad that is made to be added to rigs (or microphones) that do not presently include one. It is about 2 inches square, with a three wire interface (Positive DC voltage in, audio output, and ground) for easy interfacing. There is a pot to adjust the output level. It appears that this unit is new. At least it has not been used. $20

Astatic Model 810-6 Gooseneck Microphone:

This mic is on a 12 inch gooseneck. It is a brushed metal about 5 1/4 inches long, and is actually part of the gooseneck. The cable goes thru the gooseneck. It is a 2 conductor shielded cable, indicating a quality balanced microphone with low impedance. The gooseneck terminates in a standard 5/8 inch threaded connector.

This one works fine and looks good. $40

HT Speaker Microphones:

Both of these speaker mics have the 3.5 mm and 2.5 mm two conductor plugs that are spaced about 3/8 inch apart, and are molded into a single connector. They are used on Icom, Yaesu, Radio Shack, Maxon, Ritron, Vertex and many other radios.

Premier SPM-100
It is a lightweight and compact unit, featuring a powerful speaker as well as a high-quality condenser-style microphone element that produces excellent transmitted audio clarity. The microphone may be secured to the user's lapel or shoulder. It also features a built-in 3.5mm jack for using an external earphone. $17

DM-100
Appears to be the same as the SPM-100 above, but just with a different label. $17

I also have many other accessories available such as many different types of microphones, HTs, HF, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

Date: 2015-02-22 20:58:14 UTC
From: Ken Simpson, W8EK
Topic: 2487 Message: 2910

Power Supplies For Sale:

Regulated 13 Volt DC power supplies:

Icom PS-30 DeLuxe Power Supply:

The Icom PS-30 power supply delivers 13.8 VDC at 25 amps. This power supply features a meter which can be set to display amperage or voltage. Four outputs are provided on the rear panel. Output 1 is a hard wired, high amperage cable with the Icom standard 6 pin Molex plug. Outputs 2, 3 and 4 provide low current outputs. This power supply has a snap-out tilt bracket. 9.5 x 5 x 12.5 inches.

This one works 100% and looks extremely nice.
With paper work for $175.

TenTec Switching Power Supply:

"Switcher / 25" 25 amp switching power supply:
This is a 25 amp switching power supply in a case that matches the early Omni series case, with the metal bezel around it. It is in a case that is the same size as a 243 remote VFO. It has an ammeter on the front, along with Switch, TenTec logo, and output bulb. The front panel basically looks like a 280 power supply with a metal bezel, but says "Switcher/25" on it. It is very quiet, and well shielded, and does not produce any electrical noise that I could find. $140

GSC 20 R, 20 amp
This supply is rated at 20 amps. Output terminals are on the back, with the fuse, power switch, and pilot light on the front. This one works fine, and looks fine, except for a few scratches on the bottom. $50

EVG Model 10-395, 4 amp power supply
This supply is regulated, with switch and pilot bulb on the front, and binding post output on the rear panel, along with the fuse. It works fine and looks good. $30

Micronta 22-120 A
This supply is rated at 2.5 amps. It is well regulated. It has a switch and LED light on the front, with a circuit breaker and output terminals on the back. The case (left & right side & top) is basically all a heat sink. This one works fine and looks like new. No scratches. $30

Homebrew Power Supply:
This power supply is in a very nice gray and black enclosure with binding posts for the output on the front, along with a pilot bulb and power switch. The back panel has a fuse and the regulator. It looks to be good for about 1.5 amps.
It works fine and looks really great. No scratches or defects. $15

Kepco Variable Bench Power Supply:

This is an ideal bench power supply! It is a Kepco Model ABC 40-0.5, which means that it will produce from zero up to 40 V DC at up to 1/2 amp. Great for the bench.

The voltage is adjustable with a 10 turn pot from close to zero, up to about 40 volts. There is a fairly large analog meter that reads the voltage. There is also current limiting built in that is adjustable from about 100 ma to up to about 700 ma. The same meter that reads voltage can be switched to read current, or short circuit current (the point that the current limit is set). In addition, there are connections on the back to allow remote sensing and remote programming. This is a quality regulated power supply!

This particular unit works 100%, and looks extremely nice. $85

"Wall Wart" Power Supplies:

All of these are "regular" wall warts - not the new switching type that create all sorts of noise in your receiver. Use one of these, and you will not need to put up with all of the interference.

There are many uses for the 12 volt variety.
These all have 2.1 mm coaxial connectors with center positive.
12 V DC at 800 ma $15
12 V DC at 625 ma $14
12 V DC at 500 ma $12
12 V DC at 300 ma $10

13.5 V DC at 800 ma $16

12 Volt AC at 1 amp - Note it is AC, not DC. $15

9 Volt DC at 500 ma
This unit was used on a MFJ 422 keyer, but will also power other items needing 9 V DC. It has a 2.5 mm male plug on it, tip positive.
$12

Icom BC-25 / Santec HT Charger
Same thing, with slightly different tags. 2.1 mm coaxial power plug output, with center +. 12 V DC at 50 ma. Still in box, unused. $12

Eico 751 AC power supply / Speaker:

This power supply is used with tube type transceivers. It includes a speaker as well as the power supply in a very nice cabinet. It was designed to be used with the Eico 753 transceiver, but can be used with most any of the tube type rigs from the 1960's and 70's.

The manual says it provides the following voltages:
750 V DC at 300 ma High Voltage
280 V DC at 170 ma Low Voltage
-100 V DC at 5 ma for bias
12.6 V AC at 4 amps for filaments

This supply comes from a silent key estate; I am sure it has not been used for years. I do not have a rig to test it, but would expect it to work fine, but the filter capacitors likely will need to be replaced, as is the case with any of the units of this vintage.

With manual for $120.

I also have many other accessories available such as many different types of microphones, HTs, VHF and UHF rigs, antennas, etc. Just too many things to list here.
Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

2911. REDUCED: Pair of EIMAC 4-65A Tubes

Yahoo group: amatuerradioswapfest
Date: 2015-02-24 13:26:34 UTC
From: bcarling@...
Topic: 2911 Message: 2911

REDUCED: Pair of EIMAC 4-65A Tubes

Rated at - 3000 volts max plate voltage!
2 watts driving power. 380 watts OUTPUT per tube!
handy 6.3V filament at 3.5 Amps.
Inexpensive - though you will almost certainly never need replacements.

USED IN THE GLOBE CHAMPION 350 Transmitter!
GATES HF1 Transmitter uses a pair.
Continental 316 transmitter uses four.
ALSO used in the RT-1B spy transitter.

These look to be new tubes - one is still in the box. Great for homebrew transmitting projects.

These sell typically for $50.00 - $80.00 each on eBay and other sites.

Previously offered at $70.00 for the pair.
Now I'm offering these at only $40.00 for the pair!

See: http://frank.pocnet.net/sheets/088/4/4-65A.pdf

For questions or to arrange purchase please contact me off the list.

Date: 2015-03-17 22:58:23 UTC
From: Ken Simpson, W8EK
Topic: 2916 Message: 2916

DTMF Touch Tone Microphones For Sale:
-
Icom HM-14 DTMF Mic:
The Icom HM-14 has the standard round 8 pin connector as used by most Icom radios. It has a 16 digit DTMF Touch Tone pad on the back. It will work with the IC-25A, 229, 271, 718, 725, 728, 746, 751, 756/PRO, 761, 765, 781, 820H, 901, 3200, 3210, and others. This one has good audio quality, all 16 digits on the DTMF pad work like they should, and the coiled cord is in extremely good shape. $40
-
CES 810 L DTMF Mic
One can manually dial a number, or automatically store it in the mic, and "speed dial". It has a 12 digit touch tone pad on the front. With 8 pin modular plug (like computer LAN). It looks to be unused. $38
-
Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic. Presently with 4 pin connector. It looks to be unused. $38
-
Prices do not include shipping from Florida.

Date: 2015-03-21 13:18:02 UTC
From: bcarling@...
Topic: 2918 Message: 2918

FOR SALE - Two very nice Military BC348-R HF Receivers

I have two of these - one with an AC power supply built in (and working) for use with 120V AC.

Both are excellent radios that wil provide many hours of fun listening.

Excellent old military HF receiver in very good condition. Great for coverage of the shortwave
and HF amateur bands.

This was the last and best model of the BC-348
Has six Tuning ranges: 200-500 kHz and 1.5 - 18.0 MHz
Includes a built-in 120V AC supply, designed and neatly constructed by an Electrical Engineer. This is a working receiver ready to plug in and operate.

I will include copies of the instruction manuals, some articles and schematics, mods etc. with
this radio. Also, Data Sheets for Tubes used in the BC-348.

Available for $135.00 plus shipping.

Second one - Untested and needs a power supply. Complete and in good condition

Available for $105.00 plus shipping.

Pictures and details available at:

2919. FS motorola GP300.

Yahoo group: amatuerradioswapfest
Date: 2015-03-22 22:48:09 UTC
From: goshawk on horseback
Topic: 2919 Message: 2919

hello all,
I have a Motorola GP300 handheld set with charger to clear. I got it in with some other stuff, but have no use for it myself.
it looks like it could do with a new aerial, and I will say that the charger seems to work, but can't get anything out of the radio.
I don't know if it is a fault with the set, or if the battery is just completely knackered.
apart from the aerial, the set is in good condition.
open to sensible offers.

Simon

2920. HTs and HT accessories FS

Yahoo group: amatuerradioswapfest
Date: 2015-03-24 18:46:52 UTC
From: Ken Simpson, W8EK
Topic: 2920 Message: 2920

HTs and HT accessories For Sale:

Icom IC-W31 A, dual band HT:

The Icom IC-W31A dual bander has alphanumeric and memory display. The transceiver's two dials are used for independent tuning of the VHF and UHF band. This allows you to receive both VHF and UHF simultaneously; or use the V/V and U/U functions for receiving two frequencies on the same band. Full crossband duplex is supported. Great for satellites.

You get 100 memories; each can be assigned a name. Alpha tagging is also available for DTMF memory channels. You also get programmed, full and memory skip scanning. Other features include impressive audio, backlit LCD, 50 frequency PL encode, auto power off and 3 power levels.

Features
100 Alpha Memories
Extended Receive
3 RF Levels
Auto Repeater
DTMF Keypad
Battery Saver
DTMF Memories

This one works 100% and looks like new. It includes antenna, belt clip, wrist strap, paper work, and an almost new battery for $140.

Radio Shack 2 meter and 440 MHz HTs:

Radio Shack HTX-404 HT for 440 MHz
This HT covers the 440 MHz band and includes SubAudible PL tones, DTMF tones, Memories, Scan, and the things that one expects in an HT these days. The receiver is especially good, with a "tight" front end. This one is like new. It looks like it has hardly been used. Its original manual even looks new! Of course it works fine. $60

Radio Shack HTX-202 HT for 2 meters
This HT is the companion to the HTX-440, but covers two meters. It works fine, and looks great. Not quite as good as the HTX-404 above, but close. $50

Buy both of the above together for $100.

HT Speaker Microphones:

Both of these speaker mics have the 3.5 mm and 2.5 mm two conductor plugs that are spaced about 3/8 inch apart, and are molded into a single connector. They are used on Icom, Yaesu, Radio Shack, Maxon, Ritron, Vertex and many other radios.

Premier SPM-100
It is a lightweight and compact unit, featuring a powerful speaker as well as a high-quality condenser-style microphone element that produces excellent transmitted audio clarity. The microphone may be secured to the user's lapel or shoulder. It also features a built-in 3.5mm jack for using an external earphone. $17

DM-100
Appears to be the same as the SPM-100 above, but just with a different label. $17

Kenwood "Soft Case" for HTs:

SC-35 soft case
For Kenwood TH-78 dual band HT. Looks like new.
Only $12.

SC-8 T soft case
For Kenwood TH-21, TH-31, TH-41 series HTs.
Like new condition. $10

Accessories for the Kenwood TH-21 / 31 / 41 series HTs:

Kenwood SC-8 T "Soft Case" for any of the TH-21 series HTs
Appears to be unused, $10

Antenna adapter that fits the TH-21 series HTs, and has an SO-239 on the other end, to accept a PL-259. $5

Antenna adapter that fits the TH-21 series HTs, and has a BNC on the other end. $8

Original Operating manual for TH-21 HT for 2 meters $8

Kenwood W09-0315 charger
This charger is used to charge the larger PB-21 H batteries for the TH-21 series, and also on other Kenwood radios.
It has a standard 2.1 mm coaxial connector. $12

Accessories for Icom IC-2 AT series HTs:

These items can be used on the IC-2A, 3A, 4A, 02A, 03A, 04A, 2GAT, 32AT series HTs plus many others.

Icom DC-1, 13 V DC adapter for many Icom HTs:
This adapter slides on the HT, in place of the battery pack. If

13 V DC is applied, it converts the voltage to the proper voltage
for the HT. This one works fine, and looks fine. With paper work
for $12.

Icom CP-1 DC cord
This cord will work with the DC-1 above, plus many other items
needing the 2.1 mm coaxial power plug. The opposite end has a
cigarette lighter plug on it. $10

W & W aftermarket BP-8 Heavy duty battery pack
This is a NiMH pack, 8.4 V at 2700 mahr; extremely heavy
duty, long life.
This one looks close to new; excellent electrical condition. $30

Icom BC-25 U wall charger
Standard wall charger for most of these HTs. $15

Belt Clip for the above HTs, with hardware. $6

Batteries for Icom IC-2 AT series of HTs:

These items can be used on the IC-2 A, 3 A, 4 A, 02 A,
03 A, 04A, 2G AT, 32 AT series HTs plus many others.

Icom BC-25 U wall charger
Standard wall charger for most of these HTs. $15

Icom BP-3 Battery pack
This was the "standard" battery that came with many of
these HTs. It can be charged with a BC-25 U wall charger,
or the BC-30 or BC-35 desk chargers, or with 12 V DC.
This one appears to hold a charge OK. $10

Icom BP-5 Heavy duty battery pack
This battery has several times the capacity of the BP-3,
and slightly higher voltage for more power output.
It must be charged by a desk charger (BC-30 or BC-35).
For rebuild only $5

W & W aftermarket BP-8 Heavy duty battery pack
This is a NiMH pack, 8.4 V at 2700 mahr; extremely heavy
duty, long life.
This one looks close to new; excellent electrical condition. $30

Buy all for $45.

Icom BC-127 A, Battery Charger:

This charger charges the NiCads or NiMH for the IC-Q7 A
Dual band HT, and Icom R-2 receiver, and probably others.

This one appears to be new, unused, still in its bag.
Icom lists them at $21.
Buy this one for $10 plus shipping from Florida.

Accessories for Santec HTs:

These accessories fit most of the Santec HTs, such as the HT-1200, ST-142, ST-144, etc. They also can be used with some Icom HTs of the IC-2 AT and IC-02 AT era.

Santec ST-MC, DC Charge cord
Cigarette lighter plug on one end, and 2.1 mm coaxial power connector on the other. Drops 13 V DC down to the voltage required by the HT. New, unused, in package, with paper work for $10.

Santec AC "Wall Wart" Charger
12 DC at 50 ma. Linear type, so no switching noise.
Same as Icom BC-25. New, unused, $15.

Real Leather Shoulder Strap
Although used for the Santec HTs, these can be used for many things. Not only HTs, but also cameras, and other items.
New, unused, in package. $5

"Service Pack" for Santec ST-142/144 HTs
This is similar to a service manual, but Santec calls it a service pack. It has schematics, circuit explanations, voltages, etc. $15

HT Belt Clips and Wrist Straps:

Belt Clips:
All include the hardware with the belt clip and are $6 each.
Icom IC-2 AT
Kenwood BH-6
Motorola
Radio Shack HTX-202/404
Yaesu FT-207
Yaesu FT-209

Wrist Straps for various HTs - $4 each
Radio Shack HTX-202/404
Kenwood TH-215 / 225 / 415, TR-2500, etc.
Kenwood TR-2400
Yaesu FT-209

Antennas for your HT:

All rubber ducks are for 2 meters, are in good condition, and are $10 each, unless stated otherwise.

BNC - Dual Band (2 m and 440 MHz) Telescoping antenna provides significant gain when extended, $18

BNC - As used on most HTs, 7 inches long

BNC - Original Alinco EA0024, about 4 inches long

BNC - Original from Kenwood TH-215, about 5 inches long

BNC - "Stubby" about 4 1/2 inches long

Type F connector - 6.5 inches long

Threaded (as used by Motorola, etc.) - about 7 inches long

BNC Stubby for 440 MHz, 3 inches long

Threaded (as used by Motorola, etc.) stubby for 440 MHz

Not a Rubber Duck, but can be used on your HT:
Telescoping Antenna w/ BNC about 19 inches long
can be used as a quarter wave antenna on 2 m,
or on 220, or 450 MHz if telescoped shorter. $12

I also have many other accessories available such as many
different types of microphones, HTs, VHF and UHF rigs,
antennas, etc. Just too many things to list here.
Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

2932. 2 meter & 222 beams for sale

Yahoo group: amatuerradioswapfest
Date: 2015-05-08 15:00:53 UTC
From: Scott Millick
Topic: 2932 Message: 2932

I am sellling my 17 element 2 meter Cushcraft CC17B2 and 225WB 222 Mhz Boomer beams It is on the ground but still assembled located in central Illinois

2933. 10 meter multimode rigs FS

Yahoo group: amatuerradioswapfest
Date: 2015-05-26 11:31:45 UTC
From: Ken Simpson, W8EK
Topic: 2933 Message: 2933

10 meter multimode transceivers For Sale:

I have an HR-2510 and an RCI-2950 available.

Regency HR-2510, 10 meter Multimode Transceiver:

The Uniden HR-2510 is a 25 watt 10 meter all mode (SSB, CW, AM, FM) amateur radio. Standard features included Volume, Squelch, R.F. Gain, and a receive-only RIT control. The 10 segment LCD bar graph meter included S/R.F. and SWR functionality. The receiver is sensitive and fairly selective.

This unit works fine and looks fine as well. It includes mic, power cord and paper work.

Ranger RCI 2950, 10 meter Multimode Transceiver:

The RCI 2950 is a 10 meter transceiver that has about 50 watts output, and is literally "all mode" with SSB, CW, AM, FM, and will even do digital modes with the proper interface. It has memories, scan, split operation, a noise blanker, and a nice LCD display.

This particular unit works fine and looks great. Of course it has a mic, power cord and paper work included.

Buy either of the above for $165 plus shipping from Florida.

I also have many other accessories available such as many different types of microphones, HTs, HF, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Thanks.

73,

Ken, W8EK

Date: 2015-06-30 13:48:50 UTC
From: Bry Carling AF4K
Topic: 2941 Message: 2941

FOR SALE: MFJ-202 Noise Bridge

This noise bridge can be used with any radio. It is used to determine the value of unknown antenna impedance etc. A 9-v battery is used to power the noise bridge (not supplied). A manual for the model 202B is included.

Quickly adjust almost any antenna for maximum performance, 1 to 100 MHz.

Lengthen or shorten your antenna for minimum SWR. Measure resonant frequency, feedpoint resistance and reactance.

Works with any receiver or transceiver.

Hand-calibrated resistance scale, expanded capacitance range.

Dimensions: 4-1/4" Wide x 2" High x 4" Deep

Available for $35.00 plus shipping

GAP TILT BASE for Vertical Antennas - New in Box - $35.00

Hallicrafters SX-99 Receiver, complete - $99.00
(two available)

Multi-Elmac AF67 Transmitter - needs work - make offer

Clegg 22er - Classic 144 MHz AM transceiver. Comes with a nice Astatic microphone and biult in 120V AC power supply - $75.00

RME45 Receiver - RARE and has an amazingly smooth, easy reduction drive DIAL. A unique receiver with classic and unusual ART DECO stying; they are very collectible. No cabinet. 120V AC operation - $125.00

Hallicrafters SR46A - very nice - $99.00
with HA26 VFO - $150.00

Gonset G-50 (Model 3221) 6m AM Transceiver
12 tubes, Frequency Range: 50.00 - 54.00 MHz
working condition, with manual. Built-in 120V AC supply.
Requires some partial re-assembly. Available for $125.00

AMECO converter 144 MHz to 28 MHz - $35.00

Brush BA106 microphone - $140.00

Heathkit SB-303 / SB-500 Cabinet, excellent - only $15.00

Heathkit Chart Recorder - $15.00

Heathkit QM-1 with coil and book "Q" Meter - Make offer

Heathkit HD-10 Paddles - (2) non working - make offer

Heathkit IG-18 Signal Generator with manual and articles $55.00

Heathkit IG-18 Signal Generator, no manual $45.00

Heathkit HD-1 Distortion Analyzer, with manual - make offer

CS137 Military crystal case - excellent condition - holds 120 standard FT243 crystals. Several available for $25.00 or two for $40.00

Pair of Crystals for BC611 set - 5500 / 5995 kHz - $32.00 + S/H
Pair of Crystals for BC611 set - 3885 / 4340 kHz - $32.00 + S/H
Pair of Crystals for BC611 set - 3880 / 4335 kHz - $32.00 + S/H
Pair of Crystals for BC611 set - 3870 / 4325 kHz - $32.00 + S/H

Crystal for 6m AM - FT243 type on 8400 kHz for 50.4 MHZ - $16.00 + S/H
Crystal for 2m AM - FT243 type on 8025 kHz for 144.450 MHZ - $16.00 + S/H

MFJ-201 Grid Dip Meter with all coils, NIB - $95.00

EICO Grid Dip Meters, excellent (2) - $75.00 each

HITACHI OScilloscope V211 - works - make offer

TEKTRONIX 465-B SCOPE - needs work - make offer

TEKTRONIX 109 Pulse Generator with accessories (for microwave calibration) -
MAKE OFFER

SIMPSON 713 Freq Counter 512 MHz - make offer

TOROTRON 0 - 5000V HIPOT Tester - make offer

HP3400A, RMS voltmeter, with manual, needs work - make offer

HP415B, SWR Meter, needs work - make offer

HP475 DC micro ameter, no probe - make offer

HP1725A SCOPE, with manual (AN/USM483) - needs work - make offer

HP 5381A Frequency Counter, untested - make offer
HP 5382A Frequency Counter, untested - make offer
(or counter offer!)

EICO TV-FM Sweep Generator, with crystal and 4 adapters, working - make offer

CORNELL-DUBILIER CAPACITOR ANALYZER - rare, in wooden case, works - make offer.

Please contact me off list to discuss details, pictures, shipping etc.

I will try to update the web poages with some more photos soon at:

2948. Antennas and antenna related items FS

Yahoo group: amatuerradioswapfest
Date: 2015-08-04 14:20:04 UTC
From: Ken, W8EK
Topic: 2085 Message: 2948

Antennas and related items For Sale:

"Hex-Pac" Portable Hex Beam, HF Phasing harness, HF Mounts
and accessories; VHF and UHF antennas, mounts, and springs;
antenna switches; antenna books; HT antennas; Coax connectors,
and more

"Hex-Pac" Portable Hex Beam:

This antenna covers the 20 m, 17 m, 15 m, 12 m, 10 m, and 6
meter ham bands. It is made for portable use, and is actually
in a heavy canvas bag with carrying handles and shoulder strap.
It would be ideal for small DXpeditions, or operations such as
"Islands on the air", etc. It provides good gain and directivity
in a package that is relatively small (about 42 inches long and
less than 6 inches in diameter).

The HexPac is said to be identical in performance to the larger
hex beams, but is packaged for easier carrying. It is rated for
1500 Watts.

This particular antenna looks to be new, unused, but it is possible
it was used once and then packed back into the canvas case again.
Paper work is included.

Apparently these are about $1000 new. Get this one for only $600
plus shipping from Florida.

Hustler "Double Talk" Phasing Harness:

Back in the 1970's, Hustler sold a harness of coaxial cable that
they called a "Double Talk Harness". It was used to connect to two
mobile ball mounts, each of which would have an antenna for the
same band. In theory, they would be phased such that there was
about 3 db gain, but the reality is that they really shined by
reducing QSB, in effect acting as a sort of diversity system.

This phasing harness looks fine and works fine. $17

Other Hustler HF mobile items:

Hustler RSS-2, Stainless steel resonator spring
Appears to be unused. No blemishes. $10

Hustler QD-1 Quick Disconnect, new, still sealed in package. $18

Hustler UHT-1, VHF / UHF mobile antenna

The Hustler UHT-1 is 1/4 Wave Hole Mount Antenna.
It can be cut for any frequency from 136 to 500 MHz. It is low profile, with a 3/4" hole required. It includes 15' coax and connector, and is rated to handle up to 200 Watts of power.
This particular antenna is new, still sealed in its original shrink wrap package. $15

Dual Band 2 m / 440 MHz Mag Mount Antenna:

This antenna has a very strong mag mount. The antenna itself is a quarter wave antenna on 2 meters (unity gain), and provides a couple db gain on 440 MHz. It seems to be very rugged, and even has extra strain relief on the PL-259 coax connector. It is about 20 inches tall, including the mag mount.

This particular antenna appears to be new, unused. It is the black color (not silver). $30

Antenna Specialists Antenna Mounting Hardware:

All of the following hardware is NEW, unused, still in their original packaging, with original paper work.

K-66 NMO Hole Mount
This takes any of the NMO type antennas. It is made to mount in a 3/4 inch diameter hole, and includes coax. NEW $15

K-221 NMO Trunk Lip Mount
This takes any of the NMO VHF or UHF type antennas. It is a nice chrome trunk lip mount, complete with coax. The K-221 is basically a K-66 with a nice chrome plated Trunk Lip Mount.
NEW $15

HM-66 Gutter Clip Mount
This gutter clip takes a standard 3/8 inch 24 thread antenna. It includes coax. It is suitable for VHF/UHF antennas, but is not rugged enough for HF antennas. NEW $15

Mobile Antenna Mounts:

BNC Mag Mount
Has BNC connector on the mag mount so you can add the rubber duck from your HT.
Coax has BNC connector for your HT.
It permits one to get the HT rubber duck out of the car for better performance. $22

Astatic "Mirror Mount" or "Roof Rack Mount"
Mounts to mirror or roof rack, and takes a PL-259 on one side, and has a 3/8 inch 24 post for the mobile whip on the other.
Used for either HF or VHF/UHF antennas.
New, still sealed in the package. $12
As above, unused, but out of package. $10

Trunk Lip Mount
3/8 inch 24 thread stud, with coax. $10

Round Mag Mount for "Antenna Specialists" antenna
It uses the sort of reversed PL-259 type antenna that was
used for many years by Antenna Specialists.
With coax for $10.

Mobile Antenna Springs:

These mobile antenna springs appear to be new. They are the chrome
plated type, and designed for light to medium duty use, i.e. use
on VHF type antennas, and not for heavy duty HF use.

These are about 3 inches long. I have some that are for 1/4 inch
diameter antenna mounts, and some for 3/8 inch.
Please let me know what size you need.

These appear to be new, or at least unused. They are $5 each.

Coaxial Antenna Switches:

All work fine, look fine, and use SO-239 connectors.

Two position "Strip Line" Coax Switch
The MFJ 1702 C switch utilizes metal cavity construction for max
efficiency and high isolation. This two position coax switch has
a new center ground protection! Better than 60 dB isolation at
300 MHz and better than 50 dB at 450MHz. 50 Ohm. The unused
terminal is automatically grounded for static and RF protection.
It has less than 0.2 dB insertion loss and SWR below 1.2:1.
Heavy cavity type construction and SO-239 connectors.
Mounting holes. It looks very close to new.
With paper work for $25.

SCP Comm Switch SC-40-AS Coax Switch
Three position antenna switch in rectangular box. Connectors on
the back. In original box. May be new. $22

Antenna Books:

All are paper back, in nice condition.

The ARRL Antenna Book - 13th Edition - 1974
Close to new condition - $12

The ARRL Antenna Book - 14th Edition - 1984
Close to new condition, $12

The ARRL Antenna Book - 17th Edition - 1994
Several inches thick! - $18

Antennas - Selection, Installation, and Projects
Published by Radio Shack - 3rd Edition by Evans and Britain - $6

UHF Antennas, Converters, and Tuners by Milton Kiver
Sams Book - $10

Antennas for your HT:

All rubber ducks are for 2 meters, are in good
condition, and are $10 each, unless stated otherwise.

BNC - As used on most HTs, 7 inches long

BNC - Original Alinco EA0024, about 4 inches long

BNC - Original from Kenwood TH-215, about 5 inches long

BNC - "Stubby" about 4 1/2 inches long

Type F connector - 6.5 inches long

Threaded (as used by Motorola, etc.) - about 7 inches long

BNC Stubby for 440 MHz, 3 inches long

Threaded (as used by Motorola, etc.) stubby for 440 MHz

Not a Rubber Duck, but can be used on your HT:
Telescoping Antenna w/ BNC about 19 inches long
can be used as a quarter wave antenna on 2 m,
or on 220, or 450 MHz if telescoped shorter. $12

Coax connectors and adapters:

Prices are per connector. Several of each are available.
Most are unused.

SPECIAL: Buy 5 and take 10% off.
Buy 10 or more and take 20% off.

UHF double female Barrel connector $3

UHF Bulkhead Connector with mounting hardware
Double female, about 2 inches long $6

UHF T connector with two female and one male $5

UG-175 reducing adapters for PL-259 for RG-58 $.50

BNC HT to PL-259 adapter (BNC male to UHF female) $5

BNC female to UHF male (reverse of above) $5

BNC male for coax cables $2

BNC L elbow, right angle $3

BNC double female $3

Chassis mount BNC female
square mount (uses 4 screws) $3
Amphenol screw in type, sealed in package $4

BNC T, two female and one male $3

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

2949. FS: Two u-Wave Dish Antennas

Yahoo group: amatuerradioswapfest
Date: 2015-08-05 15:22:00 UTC
From: Gedas
Topic: 2949 Message: 2949

I have a 24" and a 14" aluminum solid aluminum dish antennas available for $20 each. No feeds, just the dishes. Both are in excellent condition and white in color, no names etc. Pictures available and easily shipped.

Gedas, W8BYA

From: Scott Millick
Topic: 2950 Message: 2950

I am sellling a lot of excess equipment All is plus shipping from 62056

Astron RS35A - $100
RS70 $225

Duplexers and triplexers

Comet CFX514 $40

Diamond MX214 $40
MX3000 80

Heil Booms $30
Shock Mounts $50
HM10 Dual element $60
Gold line $100

Rig Runner 4012 $50

Icom IC375A 222 multimode $1300
CT-17 Communcations interface $100

Henry 2002A 2 meter $600

Yaesu Rotors G550 & GS232A moonbounce $500
G800 $225

SSB Electronics sequencers DCW15B & DCWSHF $90 each

Collins MM1 Mobil Microphone $70

AEA Packet PK88 $20
PK12 $20

Down East Microwave 3318PA 900 Amp 1-18 out $125
3370 900 Amp 10-70 out $225
2370PAS 1.2 Amp 10-70
out $500 has built in TR switch
1315PA 2.3 Amp 1-15 out $225
2340PA 1.2 Amp 40 out $200
3370PA 900 Amp 70 out $200
902-28 900
xvter $225
2304-144 2.3
xvter 250

Bensat satellite Fm receiver 900 & 1.2 ATV $50

PC Electronics ATV TC7020C ATV xcvr $300
TX33-1 900
xmitter $100
TVG 900 rcvr $50
23/33FMR 900/1.2 FM rcvr $50
VideoLynx 1.2 FM xmitter $100

Alpha Delta A4 4 port PL259 switch $50
2 port PL259 switch $30

Radio Shack Scanner Pro 2026 $20
Pro 2053 $20 have a lot of them

NCS NCS 3240 Multiswitch 4 output
microphone $250
NCS 3230 Multiswitch 6 input
audio speaker controller $250

Numchrom Clock Tymeter 10 minute timer mechanical clock- does
not work $25

Hamtronics R139 HF Fax receiver $25

MFJ MFJ 1112 Power strip $25.00

Stridsberg Engineering MC204 1 in 4 out multicoupler antenna
splitter $25
MC208 1 in 8 out multicoupler
antenna splitter $40

All items plus shipping

.

2951. FS: Odds and Ends

Yahoo group: amatuerradioswapfest
Date: 2015-08-10 20:47:58 UTC
From: Gedas
Topic: 2951 Message: 2951

Here are some test equipment & misc items I have for sale. All of the items known to work fine unless noted. However, I have not performed an exhaustive review of every feature or function on every item and for that reason all items being sold as-is. Prices do not include S/I. As many of you who have purchased from me in the past know I do a pretty decent job packing your items for a safe trip.

1. Noise-Com Model 6109 Broadband 10 mW, 100 Hz-1 GHz Noise Source.
There are several N/C Model 6109 that were made available over time, this is the top-of-the-line model. This generator was pulled from service from a local defense contractor earlier this year. I connected it up to my spectrum analyzer and swept it from 100 Hz to past 1 GHz and it worked rock solid with no hiccups whatsoever.

The unit features two precision rotary step attenuators. One attenuator goes from 0 to 10 dB while the other goes from 0 to 100 dB ! The operation of all the attenuators were smooth and without any noise or issues. With each change in attenuation I saw the correct change in noise level on my S.A.

The unit is in clean condition (no dust or dirt) and will not need cleaning but it does show signs of typical lab use which means it has small nicks and scrapes here and there. The sides have more serious scrapes where the units were slid into and out of a rack unit. The generator provides RF output via a Female N connector. $300, Images at the URL's below:

http://w8bya.com/index.php/Misc/HAM-1/NC-6109-1

http://w8bya.com/index.php/Misc/HAM-1/NC-6109-2

2. Noise-Com Model 6109 Broadband 10 mW, 100 Hz-1 GHz Noise Source Also Works & Looks Great.
As mentioned above, there were several N/C Model 6109 that were made available over time, this one features a single 0-10 dB step attenuator. This generator too was pulled from service from a local defense contractor earlier this year. I connected it up to my spectrum analyzer and swept it from 100 Hz to past 1 GHz and it worked rock solid with no hiccups whatsoever.

The operation of the attenuator was smooth and without and noise or issues. With each change in attenuation I saw the correct change in noise level on my S.A.

The unit is in clean condition (no dust or dirt) and will not need cleaning but it does show signs of typical lab use which means it has small nicks and scrapes here and there and even some left over sticker

remains I will let you remove (my finger nails are too sore). The generator provides RF output via an SMA connector. Asking $300. Image at the URL below:

http://w8bya.com/var/albums/Misc/HAM-1/Noisecom-2.jpg?m=1439235765

3. Western Microwave High-Power Circulator 3JA-2088
For sale is this high-power microwave circulator made by Western Microwave, Model 3JA-2088. It was in sound condition and pulled from working service from from a local defense contractor earlier this year. It is clean and complete but you can tell it has been used in a lab environment so it will not look brand new. The circulator uses Female N-connectors. $25

http://w8bya.com/var/albums/Misc/HAM-1/3JA-2088-Circulator.jpg?m=1427842113

4. E&M Laboratories High-Power Circulator U22Y Good Condition
For sale is this high-power microwave circulator made by E&M Laboratories of Westlake California. It is a Model number U22Y and covers the range from 700 MHz to 1 GHz. It was in 100% sound condition and pulled from service from from a local defense contractor earlier this year. It is clean and complete but you can tell it has been used in a lab environment so it will not look brand new. The circulator uses Female N-connectors. $25

http://w8bya.com/var/albums/Misc/HAM-1/U22Y-Circulator.jpg?m=1427842120

5. HP-8731B Agilent 800 MHz - 2.4 GHz PIN Modulator
For sale is this HP Agilent 8731B, 800 MHz to 2.4 GHz PIN Modulator. This modulator was pulled from service from a local defense contractor earlier this year and I have not tested it. It is in very clean and complete condition and could almost pass for near new. $25

http://w8bya.com/var/albums/Misc/HAM-1/HP-8731B-Pin.jpg?m=1427842112

6. CEI 356 S/N-3 WJ Watkins Johnson, Very Rare, Collector Grade VLF Receiver.

For sale is this very rare, collector grade surveillance/tempest receiver from the cold-war era. Based on comments from an expert and well known WJ collector, there may have only been 4 of this model ever created back in 1967. This is S/N-3 and it is in very clean condition with absolutely no signs of any dust or dirt. I have verified it's electrical condition by performing some basic audible sensitivity tests and the receiver is still very sensitive and could easily hear my signal generators test signals at levels from -123 dBm to as low as -138 dBm depending on B.W. and tuned frequency.

The receiver has AM and FM modes, USB, LSB and a variable BFO. FM output and level control are on the back. This receiver covers from 1 kHz to 900 kHz and has 1 kHz, 6 kHz, 20 kHz, and 50 kHz I.F. bandwidths. It also features an antenna switch on the back where an antenna with a 50 ohm or 1000 ohm impedance can be selected. My tests were conducted

using the 50 ohm position and a HP-3325 signal generator with 0-80 dB step attenuator.

The receiver still has it's last calibration sticker (from the late 80's) as well as two tamper indicators on the back which are both 100% in-tact indicating that it has not been opened up since it's last calibration. During testing I did notice a 120 Hz hum which is common for vintage receivers that need the power supply filter caps replaced (they dry up over the years). Every knob and function switch functioned well during my testing and without any issues. If I were to retain this receiver I would suggest spraying each of the pots, controls, and switches with a product like DeOxit to ensure no scratchiness. The front face is in very nice and clean condition with all lettering 100% perfect. The face does have some minor scuff marks here and there, most of them you have to look for. The top cover has a couple stains which I will try to remove with a damp rag and Windex and there is a scratch mark along the top cover running from left-to-right but it is not very serious. This receiver was used in a lab environment and for this reason it was well looked after and will show signs of careful use. Will come with hard to find AC power cable and more pictures available. $1400.

http://w8bya.com/var/albums/Misc/HAM-1/CEI-356-Front-3.jpg?m=1435776352

http://w8bya.com/var/albums/Misc/HAM-1/CEI-356-Back-1.jpg?m=1435776350

http://w8bya.com/var/albums/Misc/HAM-1/CEI-356-Front-Label.jpg?m=1435776350

7. HP-8900C Agilent Peak Power Meter 18 GHz, In EXC, Near MINT Condition
For sale is this HP-8900C Agilent peak power meter in near MINT condition. It was pulled from service and was used by a local defense contractor earlier this year. It is in very clean condition and ready to use with your sensor and cable. I do not have a sensor to connect to this meter to fully test it out. $90

http://w8bya.com/var/albums/Misc/HAM-1/HP-8900C-3.jpg?m=1439235885

http://w8bya.com/var/albums/Misc/HAM-1/HP-8900C-2.jpg?m=1439235885

8. HP-8901A Modulation Analyzer, Very Clean with OPT 001, 002, 003, 010 HP-IB. $600 OBO
I had the opportunity to check out most of the features of this analyzer and found the instrument to be spot-on. Here is a very brief description of just some of it's capabilities:

The HP-Agilent Technologies 8901A modulation analyzer combines the capabilities of several RF instruments to give complete, accurate characterization of modulated signals in the 150 kHz to 1300 MHz frequency range. It very accurately measures modulation and recovers the modulation signal, determines RF frequency and measures RF power. Below are some URL's of the unit in various test modes with the Racal-Dana sig gen as RF source.

•Measures very low to high levels of AM and FM to 1% accuracy
•Measures RF frequency from 150 kHz to 1300 MHz
•Measures RF power
•Low internal noise
•Completely automatic or manual operation

http://w8bya.com/var/albums/Misc/HAM-1/HP-8901-Opt-5.jpg?m=1432171805

http://w8bya.com/var/albums/Misc/HAM-1/HP-8901-Opt-8.jpg?m=1432171813

http://w8bya.com/var/albums/Misc/HAM-1/HP-8901-Opt-9.jpg?m=1432171814

http://w8bya.com/var/albums/Misc/HAM-1/HP-8901-Opt-11.jpg?m=1432171820

http://w8bya.com/var/albums/Misc/HAM-1/HP-8901-Opt-12.jpg?m=1432171824

9. Zygo Video Controller. Have no clue what it does or if it works. $20

http://w8bya.com/var/albums/Misc/HAM-1/IMG_1504.JPG?m=1420403345

Please note, as in the past, my ISP service with Mediacom is less than acceptable at times. It seems I can get e-mails from everyone but not everyone gets mine back when I try to reply to you. PLEASE if you do not hear back from me in 1 day know that is the case and that I did try. In your e-mail to me provide a phone number or an alternate e-mail address I may try for you. That usually works.

As always, I have no problem accepting your personal check, money order, or Paypal (which I prefer). Also, if you have any questions at all or if you need additional images please do not hesitate to ask. Thank you.

2952. Microphones FS

Yahoo group: amatuerradioswapfest
Date: 2015-08-11 22:02:44 UTC
From: Ken, W8EK
Topic: 2077 Message: 2952

Icom, Kenwood, Yaesu, DTMF Touch Tone, Speaker
Microphones, etc. For Sale:

Icom Microphones:

Heil Microphone and Cable:

Heil HM-I Microphone for use on Icom rigs.
This mic is a beautiful gold/bronze color. It has BOTH
the wide (designed for rag chewing and full fidelity) and
the narrow (designed for maximum "punch", especially
for DX pileup penetration) elements. It also has a PTT
switch on the mic, which has a 4 pin XLR connector.

This one works great, and looks great as well. $85

Cable for use with Icom rigs
Has 4 pin XLR connector to mate with the above mic, with a
very nice rubber covered cord, and a round 8 pin connector
wired for Icom on the other end, along with a 1/4 jack that
can be used with an external PTT switch, if desired. $25

Buy both of the above for $100.
Cable sells only with or after the mic.

Icom HM-133 V Remote Control DTMF Microphone:

This mic has a DTMF Touch Tone pad on it, but also offers
full remote control including VFO select, Up-Down tuning
and memory select. It also has keypad back lighting. It
has an 8 pin modular plug and is used with the IC-2100,
IC-2200, IC-2300, IC-2725, IC-V8000, and others.

This one appears to be new, unused, still in its original
plastic bag.

With paper work for $40.

Kenwood Hand Microphones:

Kenwood MC-44 DM, DTMF Touch Tone Mic
Used on many Kenwood rigs with round 8 pin mic plug.
Includes up/down switches, and lock switch, along with
the 16 digit DTMF pad. Excellent condition. $40

Hand Microphone with round 8 pin plug for Kenwood, Alinco, etc.

This hand mic works great on most Kenwood rigs with the round 8 pin connector, such as the TS-430, TS-440, TM-241, TM-2530, TW-4000, and others, including Alinco and ADI. It says "Electret Condenser Mic" on the back, and "Kenwood" on the front, with no model number.

Basically, this mic functions like an MC-43, with a couple more features. It has the mic and PTT switch; it also has up/down switches on the top. There are four "extra" buttons labeled Call, VFO, MR, and PF. What these four buttons do depends on the rig. There is also a "Lock" switch on the back.

Regardless if you use the four extra buttons or not, you still have a mic that works like an MC-43.

This mic works fine, and looks like new. I am guessing it came with a rig, and was immediately put in the drawer, and never used. $30

Yaesu Hand Microphones:

Yaesu MH-15 DTMF Touch Tone Mic:
The MH-15 c6 is a hand microphone that features a 16 digit DTMF Touch Tone Pad on the back, along with a lock/unlock switch. The top has up/down buttons. Of course the PTT is on the side. This one has the round 6 pin connector. It works fine and looks close to new. $40

Yaesu YM-17 hand mic:
The YM-17 is a hand microphone with up/down switches on the top corner. It has the round 6 pin connector. This one works fine and looks really great. $30

Yaesu YM-31 hand mic:
The Yaesu YM-31 is a hand mic with a round 6 pin connector. Apparently it is either similar or the same as the MH-25A6j (not the MH-25 with the 8 pin connector). It is a 600 ohm impedance hand microphone, and has a Monitor on-off switch on the back. It looks very similar to the Yaesu MH-1.
This one works fine and looks extremely nice. $25

DTMF Touch Tone Microphones For Sale:

Kenwood MC-44 DM, DTMF Touch Tone Mic
Used on many Kenwood rigs with round 8 pin mic plug. Includes up/down switches, and lock switch, along with the 16 digit DTMF pad. Excellent condition. $40

Yaesu MH-15 DTMF Touch Tone Mic
The MH-15 c6 is a hand microphone with a 16 digit DTMF Touch Tone Pad on the back, along with a lock/unlock switch. The top has up/down buttons.
This one presently has the round 6 pin connector, which can be changed of course.
It works fine and looks close to new. $40

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin connector. It looks to be unused. $38

HT Speaker Microphones:

Both of these speaker mics have the 3.5 mm and 2.5 mm two conductor plugs that are spaced about 3/8 inch apart, and are molded into a single connector. They are used on Icom, Yaesu, Radio Shack, Maxon, Ritron, Vertex and many other radios.

Premier SPM-100
It is a lightweight and compact unit, featuring a powerful speaker as well as a high-quality condenser-style microphone element that produces excellent transmitted audio clarity. The microphone may be secured to the user's lapel or shoulder. It also features a built-in 3.5mm jack for using an external earphone. $17

DM-100
Appears to be the same as the SPM-100 above, but just with a different label. $17

I also have many other accessories available such as many different types of microphones, HTs, HF, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

2953. FS: Very Clean HP-3325A With Opt-01 and Opt-02

Yahoo group: amatuerradioswapfest
Date: 2015-08-16 22:07:43 UTC
From: Gedas
Topic: 2953 Message: 2953

Continuing hunger has resulted in the sale of this very clean HP-3325A synthesized function/signal generator with options 01 and 02 <g>. OPT-01 is the oven-stabilized OCXO reference oscillator while OPT-02 is the high-output voltage option. Here is a summary of it's general capabilities:

The HP-3325A has micro-hertz resolution below 100 kHz along and a standard frequency coverage from .000001 Hz to 20.999999999 MHz using the front panel output BNC interface. What a lot of people don't know about the 3325 is that a 0 dBm, 21 MHz to 60 MHz signal is available off a BNC on the rear panel making this a very powerful instrument good for testing rigs etc up to 6m.

Signal purity, accuracy, and stability are as good or better than earlier stand-alone HP synthesizers. Harmonics are at least 65 dB down below 50 kHz and you can externally modulate with AM and PM. OPT-01 provides a high-stability temperature controlled oven quartz oscillator reference that can be jumpered in the rear. 10 MHz ref I/O ports & a multitude of modulation etc ports are also provided on the rear panel.

The frequency can be selected from 11 digits & the output amplitude can be adjusted from 1 mV to 10 V p-p and displayed either in V rms, P-P, or dBm (50 ohms). DC offsets of +/-4.5 V are possible. The high-output voltage option 02 (which this unit has) can supply up to a 40 V p-p signal into a >=500 ohms load rather than the standard 10 V p-p output.

The generator has an HP-IB interface bus with analog and digital outputs for many applications including linear or log sweeps, phase & DC offsets, ext modulation, sine, triangle, square, saw tooth, positive or negative ramp outputs.

This unit was acquired from a local defense contractor & I was going to keep it for myself but I must sell it. I have run a series of basic tests on it this AM to ensure it functions exactly as it should. I did not detect any hiccups whatsoever and it was stable as a rock. I used my SA, O-scope and frequency counter all running simultaneously to monitor frequency and amplitude accuracy. The fan filter looks like it is new. It is in very clean condition and you not have to do any cleaning to it whatsoever.

Below are some snapshots of the unit I took about an hour ago operating at various frequencies and modes using the from and rear output connectors. Note the freq counter and 3325 we not frequency locked or connected to my 10 MHz timebase standard during these tests. It is being offered as-is but I can promise you it will function as shown in the images. It will be well boxed when shipped. HP operating and service manuals are still available off the net for free. Asking $350

plus S/I. I prefer Paypal but have no issues accepting your personal or corporate check or money orders, etc. Pse contact me off-line if you have any questions or need any additional images or testing performed, TU for looking.

2956. Power Supplies from 25 amps to 1 amp FS

Yahoo group: amatuerradioswapfest
Date: 2015-08-29 14:10:35 UTC
From: Ken, W8EK
Topic: 2956 Message: 2956

Various Power Supplies For Sale:

Pyramid Phase III, PS-25, 25 amp power supply:

This power supply will furnish up to 25 amps. The voltage
is adjustable from the front panel from 4.5 to 15 V DC.
It includes both an ammeter and a voltmeter on the front panel.
The output connections are on the front, making this a really
great bench supply, as well as great for powering a rig.

This unit works fine, and looks very nice. It may be new.
It is still in its original box, with the packing material
and paper work. The box is marked $299.50!

Buy this one for only $100.

Radio Shack 25 Amp, 13 V DC Power Supply:

The Radio Shack 22-510 is a 13.8 V DC switching power supply
rated at 25 amps continuous duty. Note the 100% duty cycle
rating! It should easily power most any modern HF transceiver.
It is small and relatively light weight.

The front has a lighted power switch. The back has the 13 V
DC output, the 120 V AC input cord, and a fan.

This unit works 100%, and looks extremely nice -- close to new.
It includes paper work -- operating manual, parts list, schematic,
and circuit board layout. Only $65.

Astron RS-12 A
Astron rates this supply at 12 amps intermittent, and 9 amps
continuous. It is ideal for 2 meter or dual band rigs.
With paper work for $35.

Staco RPS-6, 6 amp regulated power supply
Ideal for 25 watt VHF or dual band rigs. $30

Stinger 6 amp regulated power supply
Similar to RPS-6 above. $30

EVG Model 10-395, 4 amp, 13 V DC power supply:
This supply is regulated, with switch and pilot bulb on the front,
and binding post output on the rear panel, along with the fuse.
It works fine and looks good. $28

Micronta 22-120 A, 13 V DC power supply:
This supply is rated at 2.5 amps. It is well regulated. It has a

switch and LED light on the front, with a circuit breaker and output terminals on the back. The case (left & right side & top) is basically all a heat sink. This one works fine and looks like new. No scratches. $30

Homebrew Power Supply:
This power supply is in a very nice gray and black enclosure with binding posts for the output on the front, along with a pilot bulb and power switch. The back panel has a fuse and the regulator. It looks to be good for about 1.5 amps at 12 V DC.
It works fine and looks really great. No scratches or defects. $15

Other power supplies:

"Open Frame" Regulated Power supply

This power supply is a real brute. It produces +12 V DC, + 5 V DC, and also - 12 V DC. There are separate voltage adjust pots for each voltage, as well as current limiting adjustments. Regulation is superb; less than 0.01 V variation from no load to loaded.

I can not find a manufacturer marked on it, but the info on the PC board is great. It appears to be 1982 vintage from the markings on the parts. The transformer is about a 5 inch cube, and it includes a 43,000 mfd cap, among others.
Very heavy duty!

Only $30. It will just barely fit into a post office large flat rate priority mail box for shipping.

Kepco Variable Bench Power Supply:

This is an ideal bench power supply! It is a Kepco Model ABC 40-0.5, which means that it will produce from zero up to 40 V DC at up to 1/2 amp. Great for the bench.

The voltage is adjustable with a 10 turn pot from close to zero, up to about 40 volts. There is a fairly large analog meter that reads the voltage. There is also current limiting built in that is adjustable from about 100 ma to up to about 700 ma. The same meter that reads voltage can be switched to read current, or short circuit current (the point that the current limit is set). In addition, there are connections on the back to allow remote sensing and remote programming. This is a quality regulated power supply!

This particular unit works 100%, and looks extremely nice. $85

"Wall Wart" Power Supplies:

All of these are "regular" wall warts - not the new switching type that create all sorts of noise in your receiver. Use one of these,

and you will not need to put up with all of the interference.

There are many uses for the 12 volt variety.
These all have 2.1 mm coaxial connectors with center positive.
12 V DC at 1000 ma $17
12 V DC at 800 ma $15
12 V DC at 625 ma $14
12 V DC at 500 ma $12
12 V DC at 300 ma $10

13.5 V DC at 800 ma $16

12 Volt AC at 1 amp - Note it is AC, not DC. $15

9 Volt DC at 500 ma
This unit was used on a MFJ 422 keyer, but will also power other items needing 9 V DC. It has a 2.5 mm male plug on it, tip positive. $12

Icom BC-25 / Santec HT Charger
Same thing, with slightly different tags. Used with Icom IC-2AT, 3AT, 4AT, IC-32, and many other Icoms. Used with Santec HT-1200, ST-142, ST-144, and other Santecs. This is the same as the original wall wart that came with these HTs. 2.1 mm coaxial power plug output, with center +. Still in box, unused. $15

APC Back UPS 400 Uninterruptible Power Supply:

We all know that this is the season when we get a lot of thunderstorms, plus the possibility of hurricanes and tornadoes. When that happens the power can be very unreliable, and have many surges and spikes on it.

Because of this, your electronics should have an Uninterruptible Power Supply, or UPS. The ones made by APC are considered the best.

The APC Back UPS 400 is ideal to place between the power outlet and your electronics, including your ham equipment. It is rated at 400 VA, which should be adequate for most applications.

This particular unit works fine and looks really great -- close to new. It has recently had a new battery. Only $30.

Noise Filter and Surge Suppressor:

This unit is still in its Radio Shack (#61-2327) box, never used. It has connections for a computer network (LAN, RJ-45 connector), the AC power, and for phone lines (RJ-11 connector), and provides noise filtering and surge suppression on each. It even includes $25,000 insurance against surges. Maximum power rating is 1875 Watts, or 15 amps. Noise filtering is listed at 40 db.

This unit is new, in its original box, with its original
paper work. $12

I also have many other accessories available such as many
different types of microphones, HTs, VHF and UHF rigs,
antennas, etc. Just too many things to list here.
Please e-mail your requests.

Prices do not include shipping from Florida.
In all cases, pick up near Ocala, FL would be great.

Thanks.

FOR SALE:

1) Hewlett Packard Model: 425A VTVM
Specs: Vacuum Tube DC Micro Volt Ammeter
DC Voltage Ranges: Eleven zero-center ranges in a 1-3-10 sequence with following full scale positive and negative values:
±10, 30, 100, 300 microvolts;
±1, 3, 10, 30 millivolts;
±0.1, 0.3, 1 volt.
Input impedance on Voltage Ranges: 1 meg ohm ±2%; determined by input resistor which can be removed to provide input Z in excess of 50 megohms.
DC Current Ranges: Eighteen zero-center ranges in a 1-3-10 sequence with following full scale positive and negative values.

Has no accessories, untested - sold as-is, but appears to be in good condition.
Requires 115V AC
Available for $35.00 plus shipping.

2) Hewlett Packard 415B SWR Meter. Untested - looks good. I have no specs, but looks like a cool gadget. Available for $30.00 plus shipping.

2968. FS: EICO 710 Grid Dip Meters

Yahoo group: amatuerradioswapfest
Date: 2015-09-10 09:59:32 UTC
From: Bry Carling AF4K
Topic: 2968 Message: 2968

For sale: EICO 710 Grid Dip Meters

Set of two in excellent condition, with one set of coils.

The EICO 710 GDO was one of the more successful tube-type, AC line powered, GDOs. It had a frequency range of 400kHz-250MHz in 8 overlapping ranges. Uses plug-in coils wound to a 0.5% accuracy on polystyrene forms. The EICO 710 GDO uses a 1:7 planetary drive on the tuning capacitor. It uses a 6AF4A in a Colpitts oscillator circuit. It is transformer-operated,
and uses about 10W of AC power.

Dimensions for the EICO 710 GDO are: 2.25" high; 2.6" wide; & 6.9" long. It weighs approximately 3 lbs. The exterior is Silver and Grey wrinkle finish.

Details on line at:
http://w5jgv.com/downloads/EICO%20710%20Grid%20Dip%20Meter%20Manual.pdf

These are complete, in excellent,working condition with no damage.

Available for only $40.00 each plus $25.00 for the coils, original manual $10.00

Complete package including original manual only $90.00 plus shipping.

E-mail me off list to arrange purchase.

REDUCE price: RARE RME-45 shortwave receiver.
This fine beauty has an amazingly smooth easy reduction drive DIAL. A unique receiver with classic and unusual ART DECO stying; they are very collectible.
Included is a copy of the manual. Has the wonderful 180 degree dial with the 600:1 tuning ratio that these RME receivers are famous for. This is an amazing set. Extremely nice to operate. Not many were made and very few remain. Some have sold on eBay for around $450.00 as reported via QRZ dot COM forum.
120V AC operation. No cabinet. 19" rack mount.
Very good condition - was $125.00 - now reduced to $99.00 plus shipping.

FOR SALE: CLEGG 22er Transceiver 144 MHz AM / CW.
CLASSIC 144 MHz AM Transceiver with built-in 120V AC power supply. Comes with Astatic microphone and manual. Good working conditon.
Will include a crystal for 144.450 MHz - that standard 2m AM frequency.
Available for $75.00 plus shipping.

FOR SALE: AMECO CB2 converter for 144 - 148 MHz to various i.f. frequencies. Looks excellent - nice clean copper chassis. Obviously well cared for!
Available for $35.00 plus shipping.

REDUCED: Hallicrafters SR46A transceiver AND HA26 VFO
6m AM at its best! This set is in beautiful condition.
RF output 12 watts. Power: 117V AC or 12V DC
Antenna connection: Standard SO-239
Comes with the standard accessories including the microphone and a crystal for the 50.4 MHz AM calling frequency. Can take up to 4 crystals.
Excellent working condition, and it has a built in 120V AC power supply.
Excellent condition.
Hallicrafters SR46A - very nice - $89.00
HA26 VFO - $55.00
Complete set with the manual and microphone - $125.00

```
FOR SALE: Original Crystals
Old stock crystals, from the tube era - not reworked.
Fully tested. Available as follows:

FT243
1990 kHz QTY 1 - $18.00
3535 kHz (AX2 case) QTY 1 - $16.00
3550 kHz QTY 1 - $18.00
3595 kHz QTY 1 - $16.00
3642 kHz QTY 1 - $16.00
3655 kHz QTY 1 - $12.00
3680 kHz QTY 1 - $12.00
3735 kHz QTY 1 - $16.00
3797 kHz QTY 1 - $16.00
3805 kHz QTY 1 - $16.00
3820 kHz QTY 2 - $16.00 ea.
3835 kHz QTY 1 - $16.00
3855 kHz QTY 1 - $12.00 ea.
3937 kHz QTY 1 - $16.00
3955 kHz QTY 3 - $12.00 ea.

7025 kHz QTY 1 - $16.00
7050 kHz QTY 1 - $16.00
7075 kHz QTY 1 - $16.00
7100 kHz QTY 2 - $16.00 ea.
7150 kHz QTY 1 - $12.00
7173.3 kHz QTY 1 - $12.00
7175 kHz QTY 4 - $12.00
7183.1 kHz QTY 1 - $12.00
7200 kHz QTY 2 - $12.00
7225 kHz QTY 2 - $12.00

7400 kHz (29.6 MHz FM) QTY 1 - $16.00

8025 kHz (144.450 MHz AM) QTY 3 - $16.00 ea

8350 kHz ( 50.100 MHz) QTY 2 - $16.00
8375 kHz ( 50.250 MHz) QTY 2 - $16.00
8425 kHz ( 50.550 MHz) QTY 2 - $16.00
8450 kHz ( 50.700 MHz) QTY 2 - $16.00
8475 kHz ( 50.850 MHz) QTY 2 - $16.00
8500 kHz ( 51.000 MHz) QTY 2 - $16.00

50.088 MHz QTY 1 - $16.00
50.142 MHz QTY 1 - $16.00
50.166 MHz QTY 1 - $16.00
```

50.238 MHz QTY 1 - $16.00
50.334 MHz QTY 1 - $16.00
50.250 MHz QTY 1 - $16.00

CR1/A
7002.8 kHz QTY 1 - $16.00
7010 kHz QTY 1 - $16.00

hc6u
1400 kHz (AM BCB) QTY 1 - $16.00
3680 kHz QTY - $12.00
22.895 MHz Heathkit QTY 1 - $16.00

FT171-B
3995 kHz for BC610 - QTY 1 - $19.00

Others available on many frequencies. See:

FOR SALE:

Gonset G-50 (Model 3221) 6m AM Transceiver "kit."
12 tubes, Frequency Range: 50.00 - 54.00 MHz
working condition, with manual. Built-in 120V AC supply.
Requires some partial re-assembly. Reduced to $99.00

AMECO converter 144 MHz to 28 MHz - Reduced to $24.00
(one tube and crystal missing)

Brush BA106 microphone - $140.00

Heathkit IG-18 Signal Generator with manual and articles $55.00
Heathkit IG-18 Signal Generator, no manual $45.00

Contact me off the list for details, pictures etc. if needed.

2984. Various Microphones FS

Yahoo group: amatuerradioswapfest
Date: 2015-10-11 23:28:51 UTC
From: Ken, W8EK
Topic: 2178 Message: 2984

Icom, Kenwood, Yaesu, DTMF Touch Tone, Speaker
Microphones, etc. For Sale:

Icom Microphones:

Icom HM-133 V Remote Control DTMF Microphone:

This mic has a DTMF Touch Tone pad on it, but also offers
full remote control including VFO select, Up-Down tuning
and memory select. It also has keypad back lighting. It
has an 8 pin modular plug and is used with the IC-2100,
IC-2200, IC-2300, IC-2725, IC-V8000, and others.

This one appears to be new, unused, still in its original
plastic bag.

With paper work for $40.

Kenwood Hand Microphones:

Hand Microphone with round 8 pin plug for Kenwood, Alinco, etc.

This hand mic works great on most Kenwood rigs with the round 8 pin
connector, such as the TS-430, TS-440, TM-241, TM-2530, TW-4000, and
others, including Alinco and ADI. It says "Electret Condenser Mic"
on the back, and "Kenwood" on the front, with no model number.

Basically, this mic functions like an MC-43, with a couple more
features. It has the mic and PTT switch; it also has up/down
switches on the top. There are four "extra" buttons labeled Call,
VFO, MR, and PF. What these four buttons do depends on the rig.
There is also a "Lock" switch on the back.

Regardless if you use the four extra buttons or not, you still have
a mic that works like an MC-43.

This mic works fine, and looks like new. I am guessing it came with
a rig, and was immediately put in the drawer, and never used. $30

Yaesu Hand Microphones:

Yaesu YM-17 hand mic:
The YM-17 is a hand microphone with up/down switches on the top
corner. It has the round 6 pin connector. This one works fine and
looks really great. $30

Yaesu YM-31 hand mic:
The Yaesu YM-31 is a hand mic with a round 6 pin connector.

Apparently it is either similar or the same as the MH-25A6j (not the MH-25 with the 8 pin connector). It is a 600 ohm impedance hand microphone, and has a Monitor on-off switch on the back. It looks very similar to the Yaesu MH-1.
This one works fine and looks extremely nice. $25

DTMF Touch Tone Microphones:

Drake 1525 EM Touchtone (DTMF) Microphone
This is the mic that was used to add a touchtone pad to many rigs in the 70s and 80s. Normal hand mic from the front, but a touchtone pad on the back. Four pin mic plug. This one has been used, but is in good shape and includes paper work. $35

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic. Presently with 4 pin connector. It looks to be unused. $38

HT Speaker Microphones:

Both of these speaker mics have the 3.5 mm and 2.5 mm two conductor plugs that are spaced about 3/8 inch apart, and are molded into a single connector. They are used on Icom, Yaesu, Radio Shack, Maxon, Ritron, Vertex and many other radios.

Premier SPM-100
It is a lightweight and compact unit, featuring a powerful speaker as well as a high-quality condenser-style microphone element that produces excellent transmitted audio clarity. The microphone may be secured to the user's lapel or shoulder. It also features a built-in 3.5mm jack for using an external earphone. $17

DM-100
Appears to be the same as the SPM-100 above, but just with a different label. $17

I also have many other accessories available such as many different types of microphones, HTs, HF, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

FOR SALE:

Extra Nice Clegg 22er VHF AM Desktop Transceiver for 2m.

12 tubes. Operates from 144 - 148 MHz. 50 ohm antenna output.
Requires 12V DC or 120v AC power. Good working condition.

2m AM is still hot with activity in many areas. Mostly at around 144.450 MHz.

Built-in AC Supply.
Complete with a nice Astatic microphone and manual.

2988. FS: HP 1725A Oscilloscope 275 MHz

Yahoo group: amatuerradioswapfest
Date: 2015-10-15 18:37:43 UTC
From: Bry Carling AF4K
Topic: 2988 Message: 2988

FOR SALE: Hewlett Packard Oscilloscope model 1725A.
(Also military grade designation of AN/USM483.)

This is a medium sized, dual trace / 2-Channel, high performance scope.

This beautiful laboratory oscilloscope has an input voltage range of 10mV/div to 5 V/div vertical deflection. The scope is capable of providing CH A, CH B, ALT, CHOP, A+B, and A vs. B display modes as well as a 10 nS sweep rate expandable to 1 nS/div. It also has selectable impedance of 50 ohms RF to 1 Megohm input.
Vertical deflection factors of 10 mV/div to 5 V/div over the full bandwidth.
Available display modes of CH A, CH B, ALT, CHOP, A+B, & A vs. B
Sweep ranges from 10 ns/div to 0.5 Sec/div (24 ranges), 1-2-5 sequence.

Incorporates a single marker delayed sweep, and delta time measurement capabilities
For easy percentage measurements, reference lines of 0% and 100% amplitude are five divisions apart and markings for 10%, 20%, 80%, and 90% are also provided for easy transition time measurements.

Comes with the 120V AC power cable and original manual. No probes are included.

Looks very similar to the one shown here. If you need actual pictures I have to get my phone
camera to behave better (!)

This is an excellent working scope.

http://i.imgur.com/OQQ6f.jpg

There are two of these on eBay right now going for $199.00 and $389.00

Available for $139.00 plus shipping.

Sincerely,

Brian Carling AF4K

2991. FS: Multi Elmac AF67 Transmitter

Yahoo group: amatuerradioswapfest
Date: 2015-10-21 02:12:01 UTC
From: Bry Carling AF4K
Topic: 2991 Message: 2991

FOR SALE: Multi Elmac AF67 Transmitter
from an estate. Appears complete, but sold as-is, untested.

This AM-CW Transmitter as ten tubes and uses VFO or Crystals to cover SEVEN (7) bands
Some have also modified these rigs for DSB operation.

The MULTI-ELMAC AF-67 "Trans-Citer" is a ten-tube variable frequency or crystal controlled seven band transmitter or exciter. All circuits are simultaneously switched to the desired band
by a single bandswitch lever. Designed as a complete transmitter for mobile or fixed installations, or an exciter to drive a higher power transmitter. When used as an exciter the
500 ohm tap on modulation transformer can be used to drive the higher power modulators.

DIMENSIONS. The maximum external dimensions of the AF-67 Trans-citer, excluding projections of control knobs, is 11 1/4 inches wide, 7 inches high, and 8 1/2 inches deep behind panel. Approximate weight is 18 pounds.

CIRCUIT DESCRIPTION. The AF-67 Trans-citer employs a variable frequency oscillator with output on wither 1.75 to 2.0 Mc. or 3.5 to 4.0 Mc. In addition to the V.F.O. feature, two crystal
positions are included for operation on two spot frequencies. Any crystal that will work straight through, double of quadruple to the desired frequency may be used. The oscillator circuit employs a voltage regulator tube to maintain the plate voltage at a constant level. The multiplier stages are broad tuned with a front panel control for peaking the final grid,
insuring best performance on all bands. The audio circuit is designed to use either a carbon
microphone or a low output microphone such as a crystal or dynamic. A slide switch on the rear apron on the AF-67 Trans-citer sets up the circuit for use with either type of microphone.
A reactance tube modulator is incorporated in the variable frequency oscillator circuit for narrow-band-frequency-modulation. The variable frequency oscillator dial scale is directly calibrated in megacycles for each of the amateur bands.

Looks fairly average. No power supply is included. E-mail me for pictures if desired.

Available for $75.00 plus shipping.

Regards - Bry Carling, AF4K

2992. FS: Heathkit QM-1 Meter

Yahoo group: amatuerradioswapfest
Date: 2015-10-21 19:31:18 UTC
From: Bry Carling AF4K
Topic: 2992 Message: 2992

FOR SALE

Heathkit QM-1 meter in excellent condition with original manual
Beautifully cared for by a gentleman who worked at a calibration lab.

Tests components at operating frequency-150 kc to 18 mc
Large 4½" 50 ua meter-easy to read dial scales
Measures Q, L, and distributed capacity of coils
No special alignment equipment required-test coil and manual included
Metered oscillator output for constant injection

The Q meter is not just a "prestige" instrument to be dusted off each morning when opening the shop or lab. It is fully capable of performing many tasks in a matter of minutes that ordinarily require considerable mechanical and mathematical dexterity. Originally a Q meter
was out of financial reach of the average service shop but now Heathkit ingenuity has brought it into line.

Suspected components and parts being developed or manufactured can be tested at frequencies at which they normally are used (150 kc to 18 mc). Wide ranges of inductance, capacitance and Q will cover practically all values encountered. All indications are read directly on a large 4½", 50 microampere, panel-mounted meter. Surprisingly easy to use, the model QM-1 will take the guesswork out of your electronic efforts.

The Heathkit Q Meter uses a 12AT7 oscillator with pre-wound coils to obtain the full frequency range on four bands. Oscillator output is metered to provide constant injection. A
complete VTVM circuit is used as a resonance indicator, using a 6AL5 twin diode and a 12AU7 VTVM amplifier. Voltage regulated and transformer operated power supply utilizes a 6X5 full wave rectifier and an OD3 regulator tube. All other components are of the highest quality.

Behind the attractive charcoal gray panel with white lettering is a well laid out and factory-formed chassis. No "extras" are required to build or operate this instrument. A special
test coil is provided for calibration purposes.

Specifications: Frequency: 150 kHz to 18 MHz on 4 bands. Inductance: 1 microhenry to 10 millihenrys. Q: 250 Full scale x 1 or x 2. Capacitance: Actual 40 mmf-450 mmf; Effective 40 mmf-400 mmf; Vernier ± 3 mmf. Tubes: 1-12AT7, 1-6AL5, 1-12AU7, 1-6X5, 1-0D3/VR150.

Power Requirements: 105-125 VAC, 50-60 cycles, 30 watts.

Dimensions: 8" high x 17" wide x 6" deep.

Complete with manual etc.
Available for $90.00 plus shipping.

Please contact me off the list to arrange purchase or for pictures, details etc.

2993. FS: TOROTRON 5KV HI-POT Tester

Yahoo group: amatuerradioswapfest
Date: 2015-10-21 19:37:28 UTC
From: Bry Carling AF4K
Topic: 2993 Message: 2993

TOROTRON THP-05-AD - "Best of the Best" High-Pot Tester

The THP-AD series hipot insulation tester with voltage ranges from 0 to 5 kV.
It features a high-voltage output control that is continuously variable from zero to full voltage.

Looks like it is brand new.

Monitoring is via a 4.5-in. mirror-scale taut-band kilovoltmeter with
an accuracy of ±2% at full scale. Output cables are insulated for
three times the rated voltage of the model used.

This is a high grade piece of commercial equipment and looks new.
Was owned by a gentleman who worked at a calibration lab.

Made by Torotron Co. of Mount Vernon, NY

The list price is $575.00
There are some grubby looking ones on eBay from time to time for around $200 - $350.00
Available for $100.00 plus shipping

Please contact me off the list to arrange purchase or for
pictures, details etc.

A couple of days ago, I wrote a long reply to Todd K7TFC and it bounced.

I apologize for sending this to lists, but I have no idea how to reach TODD.

Todd's e-mail is bouncing and my replies sent to him at the ARRL server are being refused there.

If anyone knows an alternate addres sor if Todd is reading this please respond with an address that I can use to communicate with you.

Thanks - Brian Carling

3001. Icom items FS

Yahoo group: amatuerradioswapfest
Date: 2015-11-07 17:02:25 UTC
From: Ken, W8EK
Topic: 3001 Message: 3001

Icom and related items For Sale --
Microphones, 2 meter HT, Speaker / Phone Patch,
Power Cable, Many HT Accessories including batteries,
Original Boxes, Cable, Speaker Microphones, Communications
Speakers, Manuals, and other Miscellaneous Items

ICOM HM-133 V Remote Control DTMF Microphone:

This mic has a DTMF Touch Tone pad on it, but also offers
full remote control including VFO select, Up-Down tuning
and memory select. It also has keypad back lighting. It
has an 8 pin modular plug and is used with the IC-2100,
IC-2200, IC-2300, IC-2725, IC-V8000, and others.

This one appears to be new, unused, still in its original
plastic bag.

With paper work for $40.

Icom HM-36 Hand Microphone "Made in Japan":

The Icom HM-36 is used on most of the Icom HF rigs. It has
a round 8 pin plug, making it compatible with almost any of
the Icom rigs with this connector. This includes the IC-746
and 756 series, IC-718, IC-7600, IC-7200, IC-775, plus many
more, including VHF rigs like the IC-28, IC-229, IC-3200
and many others.

It also has up / down buttons on the top for changing the frequency.

This one works 100% and appears to be new. It is still in its original
box, and marked "Made in Japan". $35

Several Speaker Microphones:

All of these speaker mics have the 3.5 mm and 2.5 mm two
conductor plugs that are spaced about 3/8 inch apart, and
are molded into a single connector. They are used on Icom,
Yaesu, Radio Shack, Maxon, Ritron, Vertex and many other
radios.

Premier SPM-100
It is a lightweight and compact unit, featuring a powerful
speaker as well as a high-quality condenser-style microphone
element that produces excellent transmitted audio clarity.
The microphone may be secured to the user's lapel or shoulder.
It also features a built-in 3.5mm jack for using an external
earphone. $18

DM-100
Appears to be the same as the SPM-100 above, but just with
a different label. $18

IC-2 SRA, 2 meter HT and accessories:

IC-2 SRA, with belt clip, wrist strap, BOTH rubber ducks (the
regular 2 meter BNC one, and the special 440 MHz receive one),
pocket guides ("cheat sheets"), W & W Assoc 12 Volt 600 mahr
NiCad battery, 12 V 1 amp wall wart, and manual.

The above HT looks good, and works great if powered thru the top
of the HT. It does not power up from battery, even with new
batteries. It must be something very minor. $75

W & W 7.2 Volt 2500 NiMH battery for IC-2 SRA, new, not used, $40

Batteries America, BP-83 H, 7.2 V, 1100 mahr NiMH battery for
IC-2 SRA, new, not used, $30

Additional W & W 12 Volt 600 mahr NiCad, condition unknown, $5

Icom BC-72 desk charger, $30

Buy ALL of the above for $150.

Icom Speaker / Phone Patch

Although a phone patch is included, this is also a very nice speaker
with Icom styling.

This one works fine and looks great. $65

Communications Speakers:

Realistic 21-549 A
This speaker is about 4 inches square and about 2 inches
deep. It is rated for 5 watts, has an 8 ohm impedance, and
is listed as a 300 to 3000 Hz frequency response, making it
ideal for communications. It has a 3.5 mm (1/8 inch) mono
plug, as used by most modern rigs. Gimbal mount included.
It is black in color, looks great, and sounds great. $12

Vanco SPB-5
Appears to be the same at above, but with a Vanco label.
Also includes gimbal mount. $12

Vanco SPB-6
Similar to SPB-5 above, but is considered a noise
cancelling speaker. 10 Watt rating. Still in original
box, new. $18

DC Power Cable

This is the heavy duty power cable as used on most of
the Icom HF rigs, plus also many Kenwood, Alinco, and others.
It has the 6 pin molex connector, with four pins used - two
for plus and two for ground. The cable may not have ever
been used. It looks good, and of course works fine. $22

Extra mobile mounting bracket for IC-28 (or any rig needing a
5 1/2 inch wide bracket) $15

Accessories for Icom IC-2A, 3A, 4A, 02 A, etc. series of HTs:

Icom CP-1 DC cord
This cord will work with the DC-1, as a charge cord, plus many
other items needing the 2.1 mm coaxial power plug. The opposite
end has a cigarette lighter plug on it. $10

Belt Clip for the above HTs.
Complete with hardware. $6

Batteries for Icom IC-2 AT series of HTs:

These items can be used on the IC-2 A, 3 A, 4 A, 02 A,
03 A, 04A, 2G AT, 32 AT series HTs plus many others.

Icom BC-25 U wall charger
Standard wall charger for most of these HTs. $15

Icom BP-5 Heavy duty battery pack
For rebuilding only. Battery is dead. $5

Original Boxes for Icom IC-27 mobiles and IC-V8 HT:

The box for the IC-27 includes the two internal
styrofoam inserts that holds the rig, the cardboard
box for accessories that also acts as a spacer,
and even includes the original plastic bag for
the rig.
It is in nice condition. $8

Original box for Icom IC-V8 HT
Complete with insert. Looks like new. $8

Icom Battery Charger:

Icom BC-127 A, Battery Charger for Icom IC-Q7A Dual Band HT:
This charger charges two AA NiCads (or NiMH) for the
IC-Q7 A Dual band HT, and Icom R-2 receiver, and probably
others.
This appears to be new, unused, still in its bag.
Icom lists them at $21. Buy this one for $12.

Icom BC-25 / Santec HT Charger
Same thing, with slightly different tags. 2.1 mm coaxial power plug
output, with center +. 12 V DC at 50 ma. Still in box, unused. $15

Antennas for your HT:

All rubber ducks are for 2 meters, are in good
condition, and are $10 each, unless stated otherwise.

BNC - As used on most HTs, 7 inches long

BNC - Original Alinco EA0024, about 4 inches long

BNC - Original from Kenwood TH-215, about 5 inches long

BNC - "Stubby" about 4 1/2 inches long

Type F connector - 6.5 inches long

BNC Stubby for 440 MHz, 3 inches long

Threaded (as used by Motorola, etc.) stubby for 440 MHz

Not a Rubber Duck, but can be used on your HT:
Telescoping Antenna w/ BNC about 19 inches long
can be used as a quarter wave antenna on 2 m,
or on 220, or 450 MHz if telescoped shorter. $12

ORIGINAL Icom operating manuals:

Please note that all of these are original Icom manuals
and are not copies. All are in very good condition.
These are original Icom manuals only.

SPECIAL:
Buy two, three, or four manuals and take 10% off.
Buy five or more and take 20% off.

Mobile transceiver and HT manuals:
IC-2 AT, 2 meter HT, still in plastic bag, $6
IC-22 A, 2 m FM transceiver, $10
IC-22 S, 2 m FM transceiver, $12
IC-27 A/E, 2 m transceiver, still in plastic bag, $15
IC-27 H, 2 m FM transceiver, $12
IC-28 H, 2 m FM transceiver, $12
IC-290 H, 2 m FM transceiver, still in plastic bag, $15
IC-751, HF transceiver, still in plastic bag, $22
IC-820 H, good copy, not original $10
IC-3200 A/E, Dual Band FM Transceiver, $15
IC-V8, 2 meter HT, $6

Other Icom manuals:
BC-30 Desk Charger, $4
BC-35 Desk Charger, $5
BP-2, BP-3, BP-4, BP-5 battery packs, $3
BP-21, BP-22, BP-23, and BP-24 Batteries, $3
DC-1 DC pack for IC-2 AT series HTs, $4
EX-310 Voice Synthesizer, $5
HM-8 Hand Microphone, w/schematic, $5

HM-10 scanning microphone, $3
IC-3 PA Power supply / speaker, $10
MB-5 mobile bracket, $2
MB-65 mobile bracket mount, $2
RC-10 Frequency controller, $4
SM-5 desk microphone, $3
UT-16 Voice Synthesizer, $5

These are original Icom manuals only.

I also have many other accessories available such as many different types of microphones, HTs, HF, VHF and UHF rigs, HF and VHF/UHF antennas, HF linear amplifiers, and many other accessories.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

FOR SALE: Gonset G50 AM Transceiver

A much sought-after 6m AM base rig for 50 MHz radio fans! EXCELLENT CONDITION.
Restored and tested. Supplied with a PDF manual.

Frequency Range: 50.00 - 54.00 MHz (VFO or crystal (f/6) controlled)

Mode: AM with RF power output of 25 - 30W (50W DC input)

Selectivity: 6db at 7kc

S+N/N: 6db with 2uV input

12 Tubes:
V1 6AU6 Transmitter VFO tripler
V2 6AQ5 Transmitter frequency doubler
V3 6146 Transmitter RF power amplifier
V4 12AX7 Transmitter microphone amplifier & transmitter/receiver audio amplifier
V5,V6 6L6GB Transmitter AM modulators.
V7 6BZ6 Receiver RF amplifier
V8 6U8 Receiver 1st mixer & oscillator
V9 6BE6 Receiver 2nd converter
V10 6BH6 Receiver 455 kc IF amplifier
V11 6AV6 Receiver 2nd detector, AVC protector, and receiver 1st audio amplifier
V12 6AL5 ALC, squelch limiter
Power source: 117V AC

Looks excellent. From a silent key. Partial reassembly required. Nothing major.
It's all there. You will need a microphone and antenna. Will make a great winter project.

Pictures and details on request.

Available for $65.00 plus shipping.
(Add a crystal for 50.4 MHz for $15.00)

From: Bry Carling AF4K
Topic: 3004 Message: 3004

FOR SALE:

Extra nice Heathkit IG-18 Signal Generator
This Sine/Square Wave Audio Generator IG-18 came on the market in 1969 and was produced until 1975. The assembled version IGW-18 was replaced by the SG-18A in the early 70's. They were replaced by the IG-5218 in 1977 and was produced until 1990. They were all very similar. The difference between them is mostly about the look and color. The IG-18 / IGW-18 was brown and beige colored, the SG-18A was black and white colored and the IG-5218 was blue and white colored. In the 1/1971 issue of The Audio Amateur magazine had an article.

Detailed specifications may be found here:
http://www.rsp-italy.it/Electronics/Kits/_contents/Heathkit/Kits/Heathkit%20IG-18%20Sine%20
square%20audio%20generator.pdf
Comes with original manual and and some reprints of technical articles.
Belonged to a SK calibration lab engineer and looks pristine.
Available for $45.00 plus shipping

3006. WTB: Hallicrafters SR-150 Transceiver and Matching PS

Yahoo group: amatuerradioswapfest
Date: 2015-11-17 23:01:15 UTC
From: l@...
Topic: 3006 Message: 3006

I am looking for a nice looking Hallicrafters SR-150 transceiver with matching power supply to restore for my collection and use. The candidate must have a nice front panel, good original knobs. little to no rust and not be drilled with add on mods. I am not too concerned if it works or not as I plan to restore one from top to bottom. I am also not too concerned about having to repaint the cabinet as long as there are no dents in it. I don't want to put into the project tons of work when the outcome will be a shabby looking radio. The cosmetics are important to me.

Please fully describe what you have to offer and the price you want for it shipped to Coldspring, Texas 77331

Date: 2015-11-21 02:11:01 UTC
From: Bry Carling AF4K
Topic: 3008 Message: 3008

FOR SALE:

Drake TR3 Transceiver - best looking one I have seen. No rust, no crud.
Cabinet and faceplate / knobs all totally clean. Almost like new. $275.00
Drake AC4 Power Supply for the TR3 with cables. $120.00
Drake MS4 Speaker - also excellent. $50.00

All the above together for $375.00 plus shipping.

Drake W4 Wattmeter - exc. $65.00

Drake 2B Receiver - looks great, $250.00

Drake SC2 converter - super rare. The Drake SC-2 is a 2 meter receive converter. Its potential receive range is 144-148 MHz. With the 25.1 MHz crystal that is supplied with the Drake R-4A, it will receive 144-144.5 and 145-145.5 MHz. If a 25.6 MHz crystal is added the to the R-4A, then coverage is 144-146 MHz. Further, if auxiliary crystals 27.1 and 27.6 MHz are also added, then the entire 2 meter band will be covered.
The IF range is 14-18 MHz. The SC-2 requires 15-18 VDC at 40 ma.
Looks excellent - $75.00

Drake MN2000 antenna Tuner - $250.00

Drake SPR4 Receiver - rather rare in this condition, excellent - $350.00

Shipping additional

I will try to post pictures tomorrow at:

3010. High Power Antenna Tuners FS

Yahoo group: amatuerradioswapfest
Date: 2015-11-25 15:00:58 UTC
From: Ken, W8EK
Topic: 3010 Message: 3010

Two high power, full legal limit, antenna tuners For Sale:

AEA AT-3000 High Power HF Antenna Tuner:

The AEA AT-3000 is an extremely rugged antenna tuner, rated to handle 3000 watts. It will certainly easily handle the full legal limit.

The AT-3000 has two variable inductors and a single large variable capacitor. It also has an antenna switch that will switch between two coax antennas, a balanced antenna (it includes a VERY large built in balun), and dummy load. There is also a cross needle meter that reads forward and reverse power, and hence SWR, all simultaneously. It also has a back light, if 12 V is applied. Instead of the normal high and low power ranges, this tuner has three ranges of 3000 W, 300 W, and 30 W full scale. It also reads both average and peak power. This is an exceptional tuner!

This particular unit works 100% and looks like it just came from the factory. No scratches or defects. Pristine!

With paper work for $325.

TenTec 229 B HF antenna tuner:

This roller inductor tuner will handle full legal power. It uses an "L" match instead of a "T" match, which means there is only one spot that will give the correct match. The "L" match is also more efficient. Electrically, it is the same as both the 229 series and 238 series.

There is also a built in wattmeter with full scale reading of 200 and 2000 watts. It also has an SWR bridge with lighted meter, plus a 4 position antenna switch.

It can be used on any HF frequency, including the WARC bands, as it is continuously adjustable. It has a built in internal balun, so open wire can be used.

Cosmetically, this unit is the color of the Corsair I with a sort of very dark chocolate brown (almost black) color, although it certainly can be used with any HF rig or legal limit amplifier.

This unit has had the problematic dial and elastic cord changed to a turns counter for better reliability.

This particular unit functions 100%, and looks great.
I can not find a scratch on it. Paper work is included
for $300.

I also have many other accessories of many different brands
available.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

From: Bry Carling AF4K
Topic: 3022 Message: 3022

For Sale: Joystick Antenna

An amazing find!! So odd this happened RIGHT AFTER some of us were discussing
Gotham vertical antennas, and also the Joystick!

I have just found a N.O.S. JOYSTICK Antenna. This looks brand new, comes with
the mint looking tuner and the "wander lead." Great for home or portable operation on the
HF amateur bands.

Check out the tetsimonials on lin ein the old ham magazines.

It's GOLD colored for maximum transmitting effectiveness, I guess. . If anyone would like
to
see pictures, e-mail me.

If someone would enjoy this rare antenna, I will sell the
whole setup - antenna and tuner for $50.00 plus shipping.

3028. FS: Collins Mobile Power Supply

Yahoo group: amatuerradioswapfest
Date: 2015-12-14 22:48:07 UTC
From: Bry Carling AF4K
Topic: 3028 Message: 3028

FOR SALE: Collins Mobile Power Supply

Model 516E1 in very good condition. This is the mobile supply for running your Collins KWM2 or KWM2A transceiver from 12V DC. (this is NOT the cheaper 516E2 that runs on 28V DC!)

The Collins 516E-1 Power Supply operates from 12 VDC. It provides all the required voltages for the 32S-1 or KWM2/2A radios. Dimensions 11.375 x 5.75 x 7.75 inches.

Available for $125.00 plus shipping.

Pictures and details at:

http://af4k.com/radios.htm

(I also have a super nice KWM2 and one PM2 power supply available for sale.)

3033. FS: Skywalker 500 HF Amplifier AND a 50 Amp power supply

Yahoo group: amatuerradioswapfest
Date: 2015-12-17 12:41:13 UTC
From: Bry Carling AF4K
Topic: 3033 Message: 3033

FOR SALE: Skywalker 500 HF Amplifier

This is their later model amplifier...

* 500W output 160-10M 12 VDC power required - but really likes 13.8 V DC
* Power output: SSB 500W PEP
* CW/FM 500W (at 50% duty cycle)
* Drive power for rated output: 20-40 W typical, 35 watts is the sweet spot.
* Frequency range: 1.6-30 MHz continuous
* Max. input current: 75A
* Efficiency: 50-55% avg
* Duty cycle:SSB Continuous voice modulation; CW/RTTY 50%
* Keying: PTT line, 10 mA sinking to ground via RCA jack, RF sensing. Works FB with all adjustable 100 watt class rigs.
* T/R switching time: 20 mS
* Operating class: AB with separate regulated bias circuits for each module
* Modes supported: SSB/CW/RTTY/AM/FM
* Thermal protection: 130 F limit switch, auto reset
* Cooling: Two 120 mm muffin fans on heatsink and one 60mm muffin fan internal
* Metering: Collector current for each module.
* Transistors: 4-2SC2879
* Input/Output Impedance: 50 ohm unbalanced, VSWR 2:1 max
* RF connections: SO-239 sockets on rear
* Power connections: 3/8" Dia. bolts for + and -
* Dimensions: 6.5"H x 12"W x 7"D

Looks to be new and unused, but will sell as used. Covers the HF amateur bands in two switchable ranges. The circuit is the same as AN-762 from Motorola and is very similar to the
500 watt amp by MFJ using the same 2SC2879 transistors. New price was around $600.00 for this powerful amplifier. Used ones have sold in the range of $385.00 - $550.00 - this one
is far less.

I know this is not for everyone, and it could use some extra RF filtering, but it does work and
is a nice heavy duty 500 watt ouput HF amlifier at a great price.

Available for $250.00 FIRM plus shipping.

ALSO available - ASTRON RS50M power spply in excellent working condition. 13.8V DC at 50 amps! Ideal for this amplifier. Will sell for $189.00 FIRM plus shipping.

Pictures and details available at:

http://af4k.com/radios.htm

3038. Kenwood TL-922 A, HF Amp FS

Yahoo group: amatuerradioswapfest
Date: 2016-01-01 17:30:10 UTC
From: Ken, W8EK
Topic: 3038 Message: 3038

For Sale:

NOS Kenwood TL-922 A, HF Amplifier

I know that NOS (New, but old stock) is usually used
for tubes, but in this case it applies to this amplifier.
To the best of my knowledge it has never been used.
I was told that it has been in the bedroom closet of a
climate controlled house, in its original box, for the
last seven years or so. Prior to that, no one can remember
seeing it in use. It does not even have any dust, which
is something that would happen even with a little use.

Although it is apparently new, unused, it is still on the
order of 20 years old. Obviously it still has its original
filter capacitors which need to be replaced before use.
The outer box looks like it probably was moved a few
times, which corresponds to what I was told, as the
previous owner changed QTHs.

I can sell this unit in one of three ways:

1) As it presently is, in its original box, but needing new
filter capacitors, for $1000. If you are handy and/or
would like to do your own work, this is the best option.
Obviously this is the easiest option for me.

2) I replace the filter capacitors and verify it works.
Cost would then be $1200. This is the option that I
least prefer.

3) I replace not only the filter capacitors, but add a
glitch resistor in the B+, protective diodes where needed
(primarily in metering circuit and across relay coils),
change biasing of the tubes, and add a soft key circuit.
Cost would then be $1300.

Obviously, I would prefer pickup in the Ocala FL area,
very close to I-75. Being that it has its original boxes, I
could ship, although it would be costly, which is obviously
not included in the above prices.

If you have been looking for a really terrific, pristine,
mint, TL-922 A, this is it. Due to the many options, it
would be best to talk on the phone. (352) 732-8400

Thanks.

73,

Ken, W8EK

3039. Wattmeters and SWR Bridges FS

Yahoo group: amatuerradioswapfest
Date: 2016-01-02 23:38:14 UTC
From: Ken, W8EK
Topic: 1317 Message: 3039

Wattmeters and SWR Bridges For Sale:

MFJ 814 HF Wattmeter / SWR Bridge:

The MFJ 814 is listed as an HF Wattmeter and SWR bridge. It reads 200 W or 2000 W both forward and reflected, and also reads SWR. It has a large (about 3 inch) meter that has a back light if 12 Volts is applied.

This unit works fine, including the meter light. Cosmetically it is very good. Calibration compares favorably to wattmeter calibrated to NIST standards.

Only $45

HF Peak / Average Wattmeter:

Radio Shack 21-524 HF Wattmeter with peak or average readings.

Full scale power readings of 2000 W, 200 W, and 20 W, with a switch to select either peak or average. Of course it also reads SWR. It is rated for 3 to 30 MHz.

This one works fine and looks perfect. I can not find a scratch on it. It appears that it might never have been used, but simply stored in a drawer. Its accuracy compares very favorably to a wattmeter calibrated traceable to NBS.

Paper work is included for $40.

HF Peak / Average Wattmeter:

Radio Shack 21-534 HF Wattmeter with peak or average readings.

Full scale power readings of 2000 W, 200 W, and 20 W, with a switch to select either peak or average. Of course it also reads SWR. It is rated for 3 to 30 MHz.

This one works fine and looks perfect. I can not find a scratch on it. It is still in its original box, and appears that it might never have been used, but simply stored in a drawer. Its accuracy compares very favorably to a wattmeter calibrated traceable to NBS.

Paper work is included for $40.

Daiwa CN-540 Cross Needle VHF Wattmeter:

The CN-540 is a cross needle meter rated for 50 to 150 MHz. Forward power scales are 200 W and 20 W, with

40 W and 4 W in reverse. Of course since this is a cross
needle meter, it also reads SWR simultaneously.

This particular meter works fine with average looks.
Paper work (which includes the schematic diagram) is
included for $35.

Vanco SWR-2 SWR Bridge / Wattmeter
It covers from 1.7 to 150 MHz. It has a single meter, and
is actually a 10 W and 100 W full scale watt meter as well
as the "normal" SWR meter. It is still in its original box,
with original paper work, and appears to be new. $25.

Motorola S-1352A SWR Bridge
This unit is an SWR Bridge and a Wattmeter with 10 W and
100 Watt scales. It can also function as a field strength meter.
It works fine and looks close to perfect. $25

Royce Model 2-100 SWR Bridge
This is what I think of when I think of an HF SWR Bridge.
SO-239 connectors on each end, and a meter at one end.
It is in good condition, both electrically and cosmetically. $17

Vanco SWR-3 SWR Bridge
This HF SWR bridge is relatively small, so would be ideal
for mobile or portable use.
It works fine and looks fine. $15

Hawk H-3000 SWR Bridge
HF SWR Bridge similar to the SWR-3 above.
It works fine and looks fine. $15

Homebrew 3 to 150 MHz SWR Bridge:
This unit will cover the HF bands (not including 160 meters), and
also 2 meters and 6 meters. It is a well constructed homebrew unit
measuring about 4 x 4 by 2 1/2 inches (plus knob and connectors).
SO-239 connectors are on the side.
It works fine and looks fine as well. $12

M C Jones "Micro Match" MM-1:

The "Micro Match" is one of the very, very early SWR bridges.
It is made by M C Jones Electronics of Bristol, Conn. I do not
know the exact vintage, but would guess in the 1940's or 50's.
The MM-1 is certainly related to the more common Model 261,
262, and 263 units. Paper work from them is included, since
they are similar.

This unit has both SO-239 and BNC connectors on each side, in
parallel, so that either can be used. A toggle switch is on top
(for forward/reflected power), with a range switch on the left,
and SWR adjust control on the right, and the meter in the middle.

Own this vintage piece of equipment for only $20 plus shipping

Prices do not include shipping from Florida.

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Thanks.

3040. FS Surplus Radio Conversion Manual

Yahoo group: amatuerradioswapfest
Date: 2016-01-03 03:54:34 UTC
From: K7NKS
Topic: 3040 Message: 3040

Volume No. 2, 1948 Date.

Surplus gear covered: ARC-5 Receivers & Transmitters, ARC-5 VHF T-23 @ R28, GO-9/TBW Trans, BC-375, AN/ART-13, LM Freq Meter, and some oddballs. Lots of schematics: ARB, Simple Selsyns, BC-357, AN/APS-13, TA-12B, AVT-112A, AM-26/AIC, and some more oddballs.

The manual is in good condition. I'd like $20. Includes mailing. No Pay Pal. Postal Money Order or check ok, but, needs to clear before mailing.

Chuck K7NKS

3042. Six meter transceiver, antenna, etc FS

Yahoo group: amatuerradioswapfest
Date: 2016-02-08 15:33:39 UTC
From: Ken, W8EK
Topic: 3042 Message: 3042

Six meter items For Sale:
FM Transceiver, mobile antenna, Communications Speakers,
Low Pass TVI Filter, etc.

Midland 6 meter FM Transceiver:

The Midland 70-056 C is a 100 watt mobile 6 meter FM transceiver. It is a heavy duty commercial unit that has been converted for ham usage. It has 80 channels which have been loaded with just about every simplex and repeater that one can think of.

This unit consists of a very heavy duty unit with mounts in the truck, under the seat, etc. There is a remote "head" where the mic plugs in, and which selects volume, squelch, scan, channel, etc., plus an external speaker. The power cord is very heavy duty, since it requires up to 25 amps at 13 V DC.

Also included is the service manual, which is really an operating/service manual combined, and which looks like it is new. The unit works fine, with great audio, and looks fine also.

Only $90.

Six meter "Hamstick" mobile antenna

This is a Lakeview Model 9106, true Hamstick mobile antenna.

It has a standard 3/8 inch 24 thread for mounting, and is about 4 feet long, so it could be used with a 3/8 -24 mag mount, if desired.
It is rated to handle 600 watts PEP.

This one works fine, looks close to new, and includes paper work (cutting instructions) for $20.

Radio Shack 21-541 Powered Communications Speaker:

This speaker is a bit unique. It is a communications speaker, but it is also powered, much like computer speakers.

Specs say the frequency response is 300 to 3000 Hz, which is ideal for communications. It is rated to have 8 watts output, which means you could hear it in over most any noisy environment, such as high noise mobile installations. It needs 13 V DC at up to 1.5 amps, although current is very low if the volume is low.

This unit has a nice gimble mounting bracket, making it great for mobile use.

This unit works fine and looks close to new. It even includes a single page of paper work, as if that is needed.
Only $22.

Other Communications Speakers:

Realistic 21-549 A
This speaker is about 4 inches square and about 2 inches deep. It is rated for 5 watts, has an 8 ohm impedance, and is listed as a 300 to 3000 Hz frequency response, making it ideal for communications. It has a 3.5 mm (1/8 inch) mono plug, as used by most modern rigs. It is black in color, looks great, and sounds great. $12

Realistic 21-549 A
As above, but NEW, in original box. $15

Vanco SPB-6
Similar to Realistic 21-549 above, but is considered a noise cancelling speaker.
10 Watt rating. Still in original box, new. $18

Drake TV-1000 Low Pass TVI Filter
This filter may also be used on the low end of six meters, as well as on HF. It is good for 1000 W below 30 MHz, and about 200 W up to 52 MHz. $30

Crystals for Ham Bands:

All of the following crystals are in standard FT-243 holders.
Crystal frequencies are in KHz. (MHz in parenthesis.)

10 meters - Actual crystal is 7 MHz range, which multiplies times four to give 10 meter frequencies.
7325 (29.3), 7375 (29.5), 7395 (29.58), 7400 (29.6), 7404 (29.615), 7410 (29.64),

Six meter crystals
8 MHz fundamental multiplies times six to give 6 meters.
8354 (50.124), 8375 (50.25), 8410 (50.46), 8475 (50.85), 8480 (50.88), 8500 (51.0), 8575 (51.45), 8600 (51.6), 8620 (51.72)

Two meter crystals
8 MHz fundamental multiplies times 18 to give 2 meters.
8006.67 (144.12), 8040 (144.72), 8060 (145.08), 8073 (145.314), 8075 (145.35)

All crystals are $8 each.

Prices do not include shipping from Florida.

I also have many other accessories available such as many different types of microphones, HTs, HF, VHF and UHF rigs, HF and VHF/UHF antennas, etc.

Just too many to list here. Please e-mail your requests.

Thanks.

3043. Antenna Tuners FS

Yahoo group: amatuerradioswapfest
Date: 2016-02-13 15:48:34 UTC
From: Ken, W8EK
Topic: 2675 Message: 3043

Two Antenna Tuners For Sale:

These are very different types of antenna tuners.
The first is a very heavy duty, high power HF tuner.
The second is a much lighter duty tuner for 2 meters
and 220 MHz.

Nye Viking MB-V A Heavy Duty Antenna Tuner:

This antenna tuner is a "brute". Apparently it will take
on the order of 5000 watts -- at least far more power than
you should be running.

This tuner features a heavy-duty silver-plated variable
inductor with a 25:1 vernier dial, 7,000 volt variable
capacitor and 15,000 volt switch selected capacitors. The
frequency range is 1.8 to 30 MHz continuously.

Dual-metering provides for hands free SWR monitoring. The
two backlit meters show SWR and power continuously.
Forward power is measured peak power, if a 9 volt battery
if connected.

You get push button antenna switching from the front panel.
The rear panel has inputs for 4 antennas (2 coax, single
wire and twin lead). There is a tuner bypass position for
the coax antenna input.

A 3kW triple core balun is included.
The extra heavy gauge aluminum cabinet provides effective
shielding.

This one works 100% and looks very close to new.

With paper work for $500.

Antenna Tuner Wattmeter Combo for 2 meters and 220 MHz:

The MFJ 921 is an antenna tuner for 2 meters and also 220 MHz.
It also includes a wattmeter with 30 Watt and 300 Watt scales.
The paper work says it is good for 300 Watts PEP, but 100 W is
probably more realistic. Of course it also has an SWR bridge
as well as wattmeter.

This particular works fine (at least on 2 meters, as I have no
220 MHz equipment to test it on), and looks like it just came
out of the box from MFJ.

Paper work included for $60.

Prices do not include shipping from Florida.

I also have many other accessories available such as many different types of microphones, HTs, HF, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Thanks.

3045. FS: kenwood tmg-707E very versatile dualband transceiver

Yahoo group: amatuerradioswapfest
Date: 2016-02-20 05:17:19 UTC
From: goshawk on horseback
Topic: 3045 Message: 3045

hello all,
I have a little used, boxed, kenwood TMG-707E dualband transceiver to clear out.
this radio covers the 2M, and 70CM ham radio bands by default, with a max power output of 50W. it can however, with very little work, be opened up to do a lot more, both on transmit and receive, and also features adjustable frequency step, for use on other bands.
I have owned a number of dualband sets, and out of all of those, I have found this one to be the most versatile, when it comes to using it for other bands.
the set is in very good condition, and comes with mic and power lead.
asking £115 or reasonable offer.

payments by paypal, bank transfer, or cash on collection please. if using paypal, please add 4% to cover paypal charges.

if interested, please either call, on 07957880038
or e-mail:

3046. Power Supplies FS

Yahoo group: amatuerradioswapfest
Date: 2016-02-20 16:39:41 UTC
From: Ken, W8EK
Topic: 2487 Message: 3046

Power Supplies For Sale:

These are all power supplies that produce in the neighborhood
of 13.8 Volts DC, unless listed otherwise. All are regulated.

Icom PS-30 Deluxe Power Supply:

The Icom PS-30 power supply delivers 13.8 VDC at up to
25 amps. This power supply features a large lighted meter
which can be set to display amperage or voltage. Four
outputs are provided on the rear panel. Output 1 is a
hard wired, high amperage cable with the Icom standard
6 pin Molex plug. Outputs 2, 3 and 4 provide lower current
outputs.

This switching power supply has a snap-out tilt bracket,
and is 9.5 x 5 x 12.5 inches.

This one works 100% and looks very close to new.
With paper work for $175.

Astron RS-20 A, 20 amp Power Supply:

The Astron RS-20 A is a very common power supply around
most ham shacks. It provides 13 V DC for many ham rigs.

Features:
Solid State Electronically Regulated
Fold-Back Current Limiting Protects Power Supply from
...excessive current & continuous shorted output
Crowbar Over Voltage Protection
Excellent Regulation & Low Ripple at low line input voltage.
Heavy Duty Heat Sink
Chassis Mount Fuse
Three Conductor Power Cord

Specifications:
Input Voltage 105-125Vac
Output Voltage 13.8Vdc (internally Adjustable 11-15V)
Ripple Less than 5mV peak-peak (full load & low line)
Continuous Duty 16 Amps; ICS 20 Amps
Size 5" x 9" x 10-1/2"

This particular supply works great. It only varies 0.01 Volts
with a load! Cosmetically it looks great.

With paper work for only $65.

Astron RS-20 M

Same characteristics as the RS-20 A, above, but has added
voltmeter and ammeter. With paper work for $90.

Pyramid Phase III, PS-35 G:
This power supply will furnish up to 35 amps. The voltage
is front panel adjustable from 4.5 to 15 V DC.
It includes a front panel ammeter and a voltmeter, and has many
extra protection features.
It would be ideal for a high current bench supply, as well as
for a rig. $100

Very heavy duty homebrew supply

This power supply is a real brute. It is well regulated, and
has locking trimpots on the front panel for fine adjustment of
voltage (from about 10 to 15 volts), and also to set the voltage
where the over voltage protection kicks in. There is a large
voltmeter and separate ammeter on the front panel, with pilot
lights for AC power, DC power, and one for when the over voltage
protection activates.

As I said this is a brute. It has a very large transformer, and
three HUGE capacitors, among other things. The output pass
transistors are five 2N3771's on a very large heat sink. The
output is fused at 30 amps, but the supply is probably good for
at least 45 amps, if not more.

This unit weighs over 35 pounds, and is about 8 inches wide, 6
inches high, and 16 inches deep.

It works great. Cosmetically, the builder used nice lettering
on the front panel, but the heavy steel case has been reused.
It does not look bad, but it is not 100% professional.

Buy this brute for only $100.

Staco RPS-6, 6 amp regulated power supply
Ideal for 25 watt VHF or dual band rigs. $30

Stinger 6 amp regulated power supply
Similar to RPS-6 above. $30

EVG Model 10-395, 4 amp power supply
$28

Micronta 22-120A
Rated at 2.5 amps, it is well regulated.
The case is a heat sink. $30

Homebrew Power Supply
This power supply is in a very nice gray and black
enclosure and is good for about 1.5 amps. $15

Kepco Variable Bench Power Supply:

This is an ideal bench power supply! It is a Kepco Model ABC 40-0.5, which means that it will produce from zero up to 40 V DC at up to 1/2 amp. Great for the bench.

The voltage is adjustable with a 10 turn pot from close to zero, up to about 40 volts. There is a fairly large analog meter that reads the voltage. There is also current limiting built in that is adjustable from about 100 ma to up to about 700 ma. The same meter that reads voltage can be switched to read current, or short circuit current (the point that the current limit is set). In addition, there are connections on the back to allow remote sensing and remote programming. This is a quality regulated power supply!

This particular unit works 100%, and looks extremely nice.

Only $85.

Prices do not include shipping from Florida.

I also have many other accessories available such as many different types of microphones, HTs, HF, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Thanks.

3048. FS: Shallco Type VH795-G 600-ohm balanced "H" attenuator, 10/1/0.1 dB steps

Yahoo group: amatuerradioswapfest
Date: 2016-02-20 17:32:54 UTC
From: Gedas
Topic: 2487 Message: 3048

For sale is a beautiful in near mint condition Shallco Inc Type VH795-G 600-ohm balanced "H" attenuator capable of values from 0 dB to 111 dB in 10 dB, 1 dB or 0.1 dB steps ! This attenuator is quite rare on the used market, esp in this fine condition. This unit is still currently being sold by Shallco for over $1720 with a lead time of up to 4 months.

I have checked out it's operation using my HP-3400, 600 Ohm voltmeter (with dB scale) and it is 100% right on the money. It is in very clean condition and ready to use. It will require no cleaning whatsoever. It is missing one of the 4 little black feet (bumper sticker type with self adhesive). Asking $175 plus shipping.

Here are a couple pictures of it:

From: Gedas
Topic: 2487 Message: 3050

FS is this real beauty. A very rare RM-5 VLF & MF portable receiver made by ITI for the Federal Aviation Agency.

It is in very clean condition and will need no cleaning. Does has one good ding in the back case and some scrapes on the front center black face down at the very bottom. Best to examine the pictures. The meter is pristine as is the original wrinkle paint finish. The 39" telescoping whip antenna works perfect and has no bends or kinks. Condition is 100% untested and being sold as-is due to it's vintage age. This is a project I just wont have time to get to. Asking $275 OBO plus shipping.

3051. Microphones FS

Yahoo group: amatuerradioswapfest
Date: 2016-02-27 16:48:20 UTC
From: Ken, W8EK
Topic: 2077 Message: 3051

Microphones For Sale -- both Desk Mics and Hand Mics

Kenwood MC-85 Deluxe Desk Microphone:

The Kenwood MC-85 is a deluxe unidirectional electret condenser desk mic. In addition to it being a microphone, it features UP-DOWN tuning for compatible Kenwood transceivers. It also has built-in audio level compensation, preamp and a level meter.

It can be used with up to three different rigs. This one has one 8 pin mic cable.

This mic requires power that is derived from most Kenwood rigs that use the round 8 pin connector. For other models, you will need to install four AA cells (not supplied).

This 700 ohm mic has a 300 to 7000 Hz response.

This particular mic works fine and looks like it just came out of its box new. No defects.

Paper work is included for $100.

Kenwood MC-50 Desk Microphone:

The Kenwood MC-50 is a dynamic cardioid desk microphone. It features a push-to-talk [PTT] and lock button. It has a four pin plug. This mic has connector switched, dual impedance ratings of 50k ohms and 600 ohms. Frequency response is from 150 Hz to 10 kHz.

The MC-50 is the perfect match for many of the classic Kenwood transceivers such as the TS-120S, TS-130S, TS-520S, TS-530S, TS-820S, TS-830S and others.

This MC-50 works 100% and looks very nice. Most of these mics have the "piano key" PTT switches that are very yellowed with age. This one is much better than most.

With paper work for $60.

Icom SM-8 Deluxe Desk Microphone:

The Icom SM-8 desk mic has an electret condenser type mic element and gives clear tone over a wide variety of voice levels. The gooseneck may be adjusted to any angle. It features UP-DOWN tuning on compatible Icom

transceivers. This mic has two outputs for operation to two transceivers.

On the bottom of the mic base there is one control for tone, plus separate level adjustments for each output. The mic cable terminates in a standard round Icom 8 pin mic plug.

This SM-8 works fine and looks good. Paper work is included for $115.

Kenwood MC-43 Hand Microphone

The MC-43 is the standard hand mic that is used with most Kenwood HF rigs. It will work with virtually any Kenwood rig with the round 8 pin connector, including VHF and UHF rigs. It has up/down buttons as well as PTT. This one works fine. The cord has been reinforced right at the mic. $30

DTMF Touch Tone Microphones:

Drake 1525 EM Touchtone (DTMF) Microphone
This is the mic that was used to add a touchtone pad to many rigs in the 70s and 80s. Normal hand mic from the front, but a touchtone pad on the back. Four pin mic plug. This one has been used, but is in good shape and includes paper work. $35

Johnson 250-0761-010/CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic. Presently with 4 pin connector. It looks to be unused. $38

HT Speaker Microphones:

Both of these speaker mics have the 3.5 mm and 2.5 mm two conductor plugs that are spaced about 3/8 inch apart, and are molded into a single connector. They are used on Icom, Yaesu, Radio Shack (including the HTX-202 and HTX-404), Maxon, Ritron, Vertex and many other radios.

Premier SPM-100
It is a lightweight and compact unit, featuring a powerful speaker as well as a high-quality condenser-style microphone element that produces excellent transmitted audio clarity. The microphone may be secured to the user's lapel or shoulder. It also features a built-in 3.5mm jack for using an external earphone. $15

DM-100
Appears to be the same as the SPM-100 above, but just with a different label. $15

Prices do not include shipping from Florida.

I also have many other accessories available such as many different types of microphones, HTs, HF, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Thanks.

73,

3054. Wattmeters and SWR Bridges FS

Yahoo group: amatuerradioswapfest
Date: 2016-03-05 13:54:11 UTC
From: Ken, W8EK
Topic: 1317 Message: 3054

Wattmeters and SWR Bridges For Sale:

YS-60 Peak Reading Wattmeter

The Yaesu YS-60 is a compact, peak-reading SWR/Power meter with measurement accuracy of better than 10%. This meter is different than most, since it really reads PEP power. It has an electronic circuit to properly capture the peak power, unlike most peak meters which simply put a capacitor across the meter. Of course it can also read average power.

Insertion loss is only 0.1 dB with a power limit of 700W on 160 meters and 1000W from 3.5 to 60 MHz . It has 50 ohm input and output impedances, with rear panel SO-239 input and output jacks.

It has red & black wires for the required 13.8 (11-15) V DC at 200 mA. Power is needed not only for the lighted meter, but for the electronic circuitry to read peak power. It can be used to measure SWR without 13 V DC.

This meter really works great. I would keep it if I did not have an LP-100 A! With paper work for $80.

Royce Model 2-100 SWR Bridge
This is what I think of when I think of an HF SWR Bridge.
SO-239 connectors on each end, and a meter at one end.
It is in good condition, both electrically and cosmetically. $17

Hawk H-3000 SWR Bridge
This HF SWR bridge is relatively small, so would be ideal for mobile or portable use.
It works fine and looks fine. $15

M C Jones "Micro Match" MM-1:

The "Micro Match" is one of the very, very early SWR bridges. It is made by M C Jones Electronics of Bristol, Conn. I do not know the exact vintage, but would guess in the 1940's or 50's. The MM-1 is certainly related to the more common Model 261, 262, and 263 units. Paper work from them is included, since they are similar.

This unit has both SO-239 and BNC connectors on each side, in parallel, so that either can be used. A toggle switch is on top (for forward/reflected power), with a range switch on the left, and SWR adjust control on the right, and the meter in the middle.

Own this vintage piece of equipment for only $20.

Prices do not include shipping from Florida.

I also have many other accessories available such as many different types of microphones, HTs, HF, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Thanks.

3057. Two Dentron MLA-2500 HF Linear Amplifiers FS

Yahoo group: amatuerradioswapfest
Date: 2016-03-25 15:35:35 UTC
From: Ken, W8EK
Topic: 3057 Message: 3057

Dentron MLA-2500 HF Linear Amplifiers For Sale:

I have two different Dentron MLA-2500 HF Linear Amplifiers available.

The MLA-2500 is a good quality SSB linear amplifier with 600 watts total plate dissipation and a 1KW DC CCS input rating, covering the traditional HF ham bands from 160 to 10 meters.

The MLA-2500 will produce an input power of 2KW PEP. Eimac data gives the pair of 8875 triodes an output rating of 1174 watts (CCS).

The first MLA-2500 works just like it should.

This particular amp produces in excess of 1000 W when driven with 50 or 55 watts, depending on band. At 1100 W out, the grid current meter just barely registers. The tubes are obviously in good shape.

This amp has had the filter caps replaced, but otherwise is "factory stock" to the best of my knowledge, except that the power switch has been replaced. It produces power as it should, and looks very nice.

Paper work included for $800.
Pickup near Ocala, FL is certainly preferred.

The second MLA-2500 has lower power output.

This particular amp produces from 650 to 700 watts, depending on band (obviously less on 10 m). This is about the same power as a Heath SB-200. Although the tubes could be replaced, or it could be retrofitted with other tubes, it can be used as if it is an SB-200 (with a MUCH heavier power supply). I have priced it accordingly (as if it was a Heath SB-200).

This amp has had the filter caps replaced, but otherwise is "factory stock" to the best of my knowledge. It looks very nice.

Paper work included for $400.
Pickup near Ocala, FL is certainly preferred.

Note that power was measured with an LP-100 A wattmeter, traceable to NBS, and not some uncalibrated wattmeter.

I also have many other accessories available such as many different types of microphones, HTs, VHF and UHF rigs, HF and VHF/UHF antennas, connectors, miscellaneous accessories, etc.

Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.
Pick up near Ocala, FL, just off of I-75 is preferred.

Thanks.

3059. Extension "Riser" feet for Kenwood and Heath, plus more FS

Yahoo group: amatuerradioswapfest
Date: 2016-03-30 17:16:00 UTC
From: Ken, W8EK
Topic: 3059 Message: 3059

Extension "Riser" Feet for Kenwood and Heath
plus other miscellaneous items For Sale:

Kenwood "Extension Feet":

This is a set of two feet that are often used on
various Kenwood rigs to raise the front by about
1/2 inch to give a rig, speaker, remote VFO, etc.
the tilt that makes it easier to read.

This is a complete set of two front feet, with the
needed hardware. I have a couple sets available for
$15 each.

Heath "SB Line" Extension Feet:

This is a set of all four feet as used on most of the
Heath SB line included transceivers, speakers, amplifiers,
etc.

It consists of the two shorter feet for the back, and two
taller feet for the front, plus hardware for all. $20

Other items:

Linear Amp Switching Cables for Kenwood Rigs:

This cable goes from a Kenwood transceiver to a linear
amplifier to switch the amp from transmit to receive.

One end has a DIN connector, as is used with most Kenwood
rigs. The other end has an RCA phono plug, as used by most
linear amplifiers.

Before using this cable, please check the switching
capabilities of your transceiver, and the requirements
of your amplifier.

Cable for switching the T/R relay. Only $15.

Cable as above, but with ALC line in addition to T/R switching.
$22

Code Key and Cables for code keys and paddles:

Cable for straight key
About 3 feet long, with a mono 1/8 inch (3.5 mm) phone plug on it,
as used with a straight key. $5
As above, but 1/4 inch plug. $5

Cable for paddles
About 3 feet long, with a 1/8 inch (3.5 mm) stereo connector on the end, as used by most rigs for paddles. $8
As above, but 1/4 inch plug. $8
As above, but 1/4 inch plug and coiled cord. $10

Crystal for TS-820
This crystal is used in the "fixed" mode, as opposed to VFO mode. Actual crystal frequency is 5240 KHz, in an HC-25 U holder that plugs right into the TS-820 to give a 7260 KHz "fixed" frequency. I expect it can be used in other rigs such as the TS-520 as well, and likely on other bands so that it produces 14260, etc. $8

Heath SB-220 / SB-221 parts:

Heath SB-220/221 Plate meter
Looks close to new, with no scratches or defects. $75

Heath SB-221 logo
This is the logo with the Heath name and SB-221, that goes in the upper left of the front panel. It looks perfect. No scratches or defects. $15

SB-220/221 grid choke (1 mh, Part # 45-4, RFC 4 and 5)
These often go up in smoke when there is a tube problem. These are fine, with no problems. $5 each

Manual for SB-221 HF Linear Amplifier, $25

Knobs for SB series:
Dark green knobs with aluminum skirt, 1 1/8 inch in diameter. These are the medium size knobs used in all of the SB series of transceivers, receivers, transmitters and accessories. Several available at $5 each.

I also have many other accessories available such as many different types of microphones, HTs, VHF and UHF rigs, HF and VHF/UHF antennas, connectors, miscellaneous accessories, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

3061. 2 meter multimode transceivers FS

Yahoo group: amatuerradioswapfest
Date: 2016-04-08 23:29:01 UTC
From: Ken, W8EK
Topic: 3061 Message: 3061

I have two Kenwood TS-700 A, 2 meter Multimode
transceivers for sale.

The Kenwood TS-700A multimode transceiver provides 2 meter
operation in FM, LSB, USB, AM and CW modes. Power output is
rated at 10 watts. It covers the entire 2 meter band.
Enhancements include RF gain, RIT, squelch, noise blanker and
44 fixed channels (11 per MHz band). Operation is from 120/220
VAC, or 13.8 VDC at 4 amps.

Features:
Multi-Mode
RIT
Noise Blanker
On-Air Indicator
Squelch
AC/DC Operation

I have two units available.

The first looks very nice. The front is really great.
All bulbs light, and the VFO is smooth. It produces from 11 to
12 W out. However, it only transmits in FM and USB. There is no
power out in LSB or AM. Of course FM and USB is about all that
is normally used on 2 meters, so it may not matter.

The second unit looks good, but not quite as nice as the first
one. It transmits in all modes, but I am 90% sure someone took a
"golden screwdriver" to it. The power output is in the 18 to
20 watt range instead of 11 to 12 as it should be. This
indicates some one has "tweaked" it. The frequency that it
transmits and receives on is not the same as indicated.
Basically, I think it needs a complete, accurate alignment,
and then it would be great.

Buy either one with paper work and 110 V AC power cord for
$150 each. The DC power cord is not included.
Buy both of them for $275.

I also have many other accessories available such as many
different types of microphones, HTs, VHF and UHF rigs, HF
and VHF/UHF antennas, connectors, miscellaneous accessories,
etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

3062. Power Supplies FS

Yahoo group: amatuerradioswapfest
Date: 2016-04-13 14:05:20 UTC
From: Ken, W8EK
Topic: 2487 Message: 3062

Power Supplies For Sale:

These are all power supplies that produce in the neighborhood
of 13.8 Volts DC, unless listed otherwise. All are regulated.

Icom PS-30 Deluxe Power Supply:

The Icom PS-30 power supply delivers 13.8 VDC at up to
25 amps. This power supply features a large lighted meter
which can be set to display amperage or voltage. Four
outputs are provided on the rear panel. Output 1 is a
hard wired, high amperage cable with the Icom standard
6 pin Molex plug. Outputs 2, 3 and 4 provide lower current
outputs.

This switching power supply has a snap-out tilt bracket,
and is 9.5 x 5 x 12.5 inches.

This one works 100% and looks very close to new.
With paper work for $175.

Astron RS-20 A, 20 amp Power Supply:

The Astron RS-20 A is a very common power supply around
most ham shacks. It provides 13 V DC for many ham rigs.

Features:
Solid State Electronically Regulated
Fold-Back Current Limiting Protects Power Supply from
...excessive current & continuous shorted output
Crowbar Over Voltage Protection
Excellent Regulation & Low Ripple at low line input voltage.
Heavy Duty Heat Sink
Chassis Mount Fuse
Three Conductor Power Cord

Specifications:
Input Voltage 105-125Vac
Output Voltage 13.8Vdc (internally Adjustable 11-15V)
Ripple Less than 5mV peak-peak (full load & low line)
Continuous Duty 16 Amps; ICS 20 Amps
Size 5" x 9" x 10-1/2"

This particular supply works great. It only varies 0.01 Volts
with a load! Cosmetically it looks great.

With paper work for only $65.

Pyramid Phase III, PS-35 G:
This power supply will furnish up to 35 amps. The voltage is front panel adjustable from 4.5 to 15 V DC.
It includes a front panel ammeter and a voltmeter, and has many extra protection features.
It would be ideal for a high current bench supply, as well as for a rig. $100

Very heavy duty homebrew supply

This power supply is a real brute. It is well regulated, and has locking trimpots on the front panel for fine adjustment of voltage (from about 10 to 15 volts), and also to set the voltage where the over voltage protection kicks in. There is a large voltmeter and separate ammeter on the front panel, with pilot lights for AC power, DC power, and one for when the over voltage protection activates.

As I said this is a brute. It has a very large transformer, and three HUGE capacitors, among other things. The output pass transistors are five 2N3771's on a very large heat sink. The output is fused at 30 amps, but the supply is probably good for at least 45 amps, if not more.

This unit weighs over 35 pounds, and is about 8 inches wide, 6 inches high, and 16 inches deep.

It works great. Cosmetically, the builder used nice lettering on the front panel, but the heavy steel case has been reused. It does not look bad, but it is not 100% professional.

Buy this brute for only $100.

Staco RPS-6, 6 amp regulated power supply
Ideal for 25 watt VHF or dual band rigs. $30

Stinger 6 amp regulated power supply
Similar to RPS-6 above. $30

EVG Model 10-395, 4 amp power supply
$28

Micronta 22-120A
Rated at 2.5 amps, it is well regulated.
The case is a heat sink. $30

Homebrew Power Supply
This power supply is in a very nice gray and black enclosure and is good for about 1.5 amps. $15

Kepco Variable Bench Power Supply:

This is an ideal bench power supply! It is a Kepco Model ABC 40-0.5, which means that it will produce from zero up to 40 V

DC at up to 1/2 amp. Great for the bench.

The voltage is adjustable with a 10 turn pot from close to zero, up to about 40 volts. There is a fairly large analog meter that reads the voltage. There is also current limiting built in that is adjustable from about 100 ma to up to about 700 ma. The same meter that reads voltage can be switched to read current, or short circuit current (the point that the current limit is set). In addition, there are connections on the back to allow remote sensing and remote programming. This is a quality regulated power supply!

This particular unit works 100%, and looks extremely nice.

Only $85.

Prices do not include shipping from Florida.

I also have many other accessories available such as many different types of microphones, HTs, HF, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Thanks.
